 Placements 4  Infrastructure 5  Faculty & Course Curriculum 5  Crowd & Campus Life 5 

BML Munjal University is a great place to study.

Placements: The placements in our university are surely above average for CSE students. About 87% of students from CSE successfully got placed in companies with a decent salary package. Here the average salary package offered is around 6.7 LPA. In 2021, Hero has offered the highest salary package of 40 LPA. Students got placed in top companies like Deloitte, Hero MotoCorp, Samsung, KPMG, etc. Students who are interested in particular domains are also provided training by the faculty members.

Infrastructure: Our college infrastructure is really beautiful. The classrooms are well ventilated and are equipped with air-conditioners. Our university also has a cafeteria where students can visit to eat and hang out. The library is also well-equipped for students and offers many good books on many topics. Wi-Fi is also great, and around 42 GB of data is being provided every week. Our university has many well-equipped laboratories for practicals. Moreover, there is a cricket ground, tennis court, gymnasium, table tennis and billiards tables for students. Our university also has a general ward and consultation room for the medical needs of students.

Faculty: The faculty members here are really helpful, knowledgeable and supportive. They

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 23-Aug-2022.

are highly qualified and have degrees from respected institutions. They are very interested in teaching and clarifying the doubts of students. Their teaching quality is top-notch, both in the online and offline modes. The curriculum of the course is also designed in a very relevant manner where students are provided with practical knowledge regarding the industry along with a good learning experience.

Other: Our university has student clubs that serve as a connecting place for students where they can cultivate and develop their hobbies and showcase their inner talents. Those clubs are a performing arts club, photography club, culinary club, etc., where students can have a fun time with other students who share similar interests with them. These clubs also organise regular workshops and events in which students participate with great enthusiasm.

BML Munjal University is excellent.

Placements: About 87% of the students who opt for placements get placed from our college. The highest salary package offered is around 40 LPA, but I am not sure about the lowest salary package. The average salary package offered is around 6.7 LPA. Top recruiting companies here are Deloitte, Hero Motocorp, ServiceNow and many more. About 90% of the students get internships throughout the course because our curriculum involves a lot of practice schools.

Infrastructure: There are a plethora of labs, especially for our course, and they feature industry-grade equipment. Our college also has many labs in tie-ups with companies like Hero, Siemens, etc. It's an absolute pleasure to study in such an amazing environment, which feels really premium and innovative.

Faculty: Most of the faculty members here are very helpful and supportive. They hold pretty good qualifications from good institutes. The skill level of the faculty members is also really nice, and they really seem very interested in teaching. It is pretty fun to study in such an environment.

Other: I chose this course because I really like technology, and I wanted to explore it a lot. I wish that the number of assignments and projects should be less in our course because sometimes they make our schedule pretty hectic. Events, fests, clubs and everything is

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 23-Aug-2022.

pretty awesome here. It is really enjoyable to be in such an amazing environment.

It has good infrastructure, good ambience to learn, industrial-based programs and many more.

Placements: Hero offered the highest salary package of 40 LPA in 2021. The basic salary package offered was 6 LPA for mechanical. In CSC, there is a placement rate of 97%, while in CSE, there is a placement rate of 96.7%. From mechanical, about 80% of the students get placements. Our college has a very good placement history, and it is a tier 2 college. I have joined here as it belongs to Hero Group, and I am happy.

Infrastructure: Our college has a cafeteria, where you will enjoy yourself. Classrooms are excellent, and there is good speed Wi-Fi. You will be enjoying your 4 years of the course and get passed out with good knowledge and practical skills. Teachers help us to gain more knowledge through many labs and machinery. There are many labs.

Faculty: Teachers here are well qualified, and they teach us more practically than from books. Our college has an international immersion programme in which it takes us to other countries, and for this programme, it charges an extra fee of about 6-8 lacs. The teaching quality is very good in both offline and online mode, and teachers are very supportive.

Other: Many fests and many activities like cricket, dancing, gaming and kabaddi are organised. Moreover, you can create your own club or sport and implement it, and others can join in it.

I am satisfied with this college. They provide good teaching and good placements for 2021.

Placements: Around 92% of students are placed in our course. The highest salary package offered is 40 LPA, and the average salary package offered is 7 LPA. Top companies visit our college like Google, KPMG, Wipro, Deloitte, TCS, HCL, etc., to hire students. Almost 100% of students got internships in companies like Coding Blocks, Benciti Technology, Sabudh Foundation, etc. There are five specializations in the CS program i.e. data science

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 23-Aug-2022.

and AI, cyber security, AI, robotics and automation, and automobile engineering.

Infrastructure: All the facilities are good in this college. All things are available which students need like high-speed internet, library, and laboratory. The quality of the food is excellent. It is only vegetarian and the food is also good, so that students do not eat anything from outside. Students have a separate playground for each of the sports like, cricket, volleyball, football, tennis, basketball, etc.

Faculty: Faculty members are excellent in teaching and very supportive. They are highly skilled as well. The teachers always guide students for their projects. They always motivate, and provide innovative ideas to the students, and insist students to participate in extra curriculum activities. Exams are not very difficult. The passing percentage is only 7 CGPA.

Other: The college is of hero company so it provides the best students in automobiles. The best thing about our course is that it is very interesting and the teacher makes it easy for students. Students can get scholarships based on their JEE mains exam. College fest is excellent in this college. In 2019, singer Ritviz and Maninder Uttar visited, and Pranab Mukherjee and Pankaj Advani also visited our college.

★★★★☆ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 4 ★

The college is above average, with good placement records and hands-on training experience.

Placements: The majority of the companies coming for placements are for CSE students. The highest salary package offered for the 2021 batch was 25 LPA, and the average salary package offered was 6.75 LPA. Faculty members of ECE work hard to ensure that almost all students get placed. Top companies that visit the campus for recruitment include Google, Samsung, Hero, KPMG, Deloitte and a lot more. Around 75% of students got internships from B.Tech and MBA. The highest stipend offered was around 22,000. Faculty members personally provide training to students who are interested in particular domains.

Infrastructure: The infrastructure of the college is quite beautiful. Classrooms have great ventilation with an air-conditioning system. Labs are moderate enough. In the hostels, we have double and triple occupancies and also a single sharing room. Every hostel has a common area on every floor with entertainment and recreational activities. Wi-Fi facility is

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 23-Aug-2022.

quite good, with around 42GB of data per week. The mess is a bit disappointing. However, they serve non-vegetarian food, but we have to pay for it separately, which is not included in the hostel fee.

Faculty: The design of the course curriculum is very good in the sense that it provides a good learning experience. Faculty members of all schools, be it engineering or law, all are excellent. The industry plays a key role to design the curriculum, provide the faculty with resources and to make available the latest learning technology and methodology tools to enhance the learning.

Other: A fest is conducted every year, and plenty of stalls are available at that time. The campus is surrounded by Dhabas which offer quite some delicious food, of course, better than the mess. There are many small canteens inside the campus which generally closes around 10 pm. There is nothing much around in a 15km radius of the college. Bhiwandi is the nearest city to the college which is situated 20-25 minutes from there. 3 luxurious malls are located in that city. But if you're from cities like Delhi, Mumbai or Bangalore, it'll be just a common thing for you. The college itself has many clubs to conduct extracurricular activities.

★★★★★ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 4 ★

I am absolutely satisfied with the course curriculum.

Placements: You would not hear about BML Munjal University (BMU) readily like other private colleges like VIT, BITS, SRM and MIT. It's a new college and founded recently by the Hero Group. The best factor which differentiates BMU from other colleges is its experiential learning methodology. Placements are surely above average here. Specifically, in our course (B.Tech CS), salary packages are very good. As per the last year's placement records, the highest salary package offered was up to 40 LPA, whereas the lowest salary package offered was 3.5 LPA. The average salary package offered was around 7 LPA-9.5 LPA for B.Tech CS students. Many reputed IT companies such as Deloitte, Accenture and TCS visit here during placements.

Infrastructure: There are 2 types of hostels here. One is the apartment type, and the second is the tower one. Double and triple occupancy rooms are provided for first-year students. However, from the 2nd year onwards, they can shift to single sharing rooms or

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 23-Aug-2022.

can stay in the same rooms. Wi-Fi facility is provided all over the campus. Classrooms are huge enough as around 40-50 students can be accommodated at a time. The library is simply spectacular. Mechanical engineering labs are very good and provide chances for students to do hands-on experience activities. The quality of the food served in the mess is good as everyone says, but you can't get the taste of the food prepared at your home anywhere. That is an exception, but after homemade food, you will get the best food in our mess. Some snacks points and refreshment sources are also available within the campus, and the quality of the food served is very good.

Faculty: The feature which distinguishes BML Munjal University (BMU) from other colleges is its experiential teaching methodology and more practical application of the subjects they teach. The student to faculty ratio is 15:1, which is just blissful. The course curriculum is well-designed and dedicated in order to understand the subject better and makes it more industry-focused.

Other: From my childhood, I had zest in computer science and technology. Further increasing of new technologies excited me more about learning and understanding their mechanism. Therefore I chose B.Tech in computer science as my UG programme. Apart from academics, BMU is very much involved in extracurricular activities. There are around 23 clubs, and students can participate in any club event. There are no restrictions for that. Scholarships depend on your 12th class marks and your JEE Mains percentile. The connectivity is very good both in terms of transportation and any medical emergency 24x7.

BML Munjal is the most valuable college.

Placements: Around 75%-80% of the students got placed from B.Tech, which is the same rate in MBA also. The highest salary package offered was 25 LPA for the 2021 batch, and the average salary package offered was 6.85 LPA. Top companies which visit here for recruitment were Google, Hero, Samsung, SEW, KPMG, Deloitte and many more. Around 60% of the students got internships from B.Tech and MBA. The highest stipend offered was around Rs. 20,000 per month.

Infrastructure: This college has a beautiful infrastructure overall. In the hostel, rooms include three, two and single sharing rooms. Hostels have common areas on every floor,

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 23-Aug-2022.

along with entertainment and recreational facilities. There is a decent Wi-Fi facility with around 45 GB of data per week. Labs and research centres are also available here.

Faculty: Faculty members of all 4 schools, i.e., engineering, law, management, economic and commerce, are well qualified. Nearly 75%-80% of faculty members in B.Tech are PhD holders. The course curriculum has integrated basic academic concepts with industry's real needs and challenges faced by the world most. The industry plays a key role to co-design the curricula, provide faculty resources and making available the latest learning tools and educational technologies.

Review of School of Management, BML Munjal University.

Placements: Placements at BMU are decent. In the previous MBA 2019-2021, students got placed with an average salary package of 7.12 LPA. Some big companies in recruitment came to the campus for hiring students, such as KPMG, Wipro, Bagrrys and others. In the current batch, internships are offered to every student.

Infrastructure: Campus life is very good, with great infrastructure. The college has amazing and well-equipped Wi-Fi-enabled classrooms with all modern facilities. The college mess is quite hygienic, and the food available here is very good. The campus is lush green in and around. Hostel facilities are amazing on the campus, and students have access to games on the campus, such as cricket, football and tennis.

Faculty: Faculty members here are amazing, and they bring in a wealth of experience with them. The learning pedagogy at BMU is unique and different from the rest of the colleges. It believes in experiential learning, which helps students get hands-on learning about practical aspects of things. They inspire students to learn beyond classroom learning.
