3.4 ★★★★★ Placements 3 ★ Infrastructure 4 ★ Faculty & Course Curriculum 3 ★ Crowd & Campus Life 4 ★ Value for Money 3 ★

Dissatisfied with the college rules and placement.

Placements: Placement is not too good but not in the situation where the IT industry is facing so many ups and downs in recent times. At least students are getting placed right, but at the same time, this also hits in mind: "Is this really worth investing 15–18 lacs in total and getting placed in a company of 4-6 LPAs? .

Infrastructure: The college has been undergoing construction since the day it came. They took money from BE students and made the worst buildings for BE. Students only, the best building holders are architecture building and fashion students building.

Faculty: Exam patterns were the best in the year I joined this college but now they are getting worse. Also, the copy checking is very strict. Not a single professor is going to give you marks for something you have not done on your own. If you are joining NMIT, prepare yourself to work hard.

College is awesome you guys should come.

Placements: A lot of students were placed in my course, with a total of 75% being placed. The highest package was 6 and a half LPA, and including hostel around 8 LPA, while the least package was 1 LPA, and even free tuition for those who came under scholarship. Not sure about top recruiting companies. Around 90% get an internship from my

course.

Infrastructure: We have free Wi-Fi in the hostel, mess, and all buildings. We have several buildings. All buildings have Wi-Fi. In classrooms, signals are low but outside they're strong. We have computer labs and a 3D printing lab, mech lab, etc. We have labs for each and every subject and course offered. We have sports facilities: basketball court, football ground, badminton court, and indoor games as well.

Faculty: Teachers are all really helpful. They help us during hard times. They are all very friendly. All do lenient correction. Very happy, blah, so friendly. I love engaging with my lecturers. It's so good; they remove our tension and stress and are very helpful.

Other: No additional information.

It is an average college.

Placements: Our college provides average placements. The average salary package offered is 6 LPA. Many top companies visit our college to recruit students. A few students got placed in our college. Top recruiting companies are Oracle, Google, and Amazon.

Infrastructure: The infrastructure of our college is average. It is not much good compared to its fee. The hostel facilities are good. The hostel fee is Rs.1,00,000, including the mess fee. The food served in the mess is average. Our college is Wi-Fi enabled.

Faculty: Our teachers are average. A few teachers are good. A few teachers are not good. Many programs and club activities are conducted in the college regularly. Semester exams are moderate. Students can find easy questions related to their MSE.

Really good staff they are friendly, The infrastructure of the college is really good.

Placements: Placements in the college are really good, and the companies that visited for the campus placements are also top companies. The success ratio of the campus placements is extremely good. The companies which visited include both service-based and product-based with good CTC and good roles.

Infrastructure: The facilities like Wi-Fi, labs, classrooms, and library are pretty good, and the hostels are well-maintained. The food provided by the mess is really decent. During the festivals, the food provided is awesome with a traditional touch. The non-vegetarian food is good.

Faculty: The lecturers are well qualified and knowledgeable, but the curriculum is outdated as of now. The semester exams are medium. The pass percentage is 90. The question papers are prepared by the college faculty itself, and the correction will be done by the college faculty.

Other: Best thing about the course selection is because of well-qualified staff and lecturers, the events will happen once in a year.

Go for some other courses expect AIML and AIDS .

Placements: The college's welfare is not up to par, and the teachers' qualifications are also lacking, as AIML is a new addition to the institution. However, apart from the AIML and AIDS branches, the rest of the college excels in every aspect. Due to the recent introduction of only two batches, students have not been placed yet.

Infrastructure: This college has recently opened a new branch, which currently offers only one laboratory for this particular course. The library is well-equipped, and the Wi-Fi, hostels, canteen, and sports facilities are of high quality. The medical facility is decent, with a medical room that is typically open during college hours.

Faculty: The level of qualification among teachers in this specific field is relatively low. Although they make an effort to assist students, their knowledge about this branch is limited. In terms of semester exams, they are exceptionally challenging, with a pass rate exceeding 85%.

Other: If you are coming in this college opt for some other courses as of now.

4.2 ★★★★★ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 5 ★ Value for Money 4 ★

Good faculty members and a good campus life .

Placements: Nmit has a very good record for placements every year. Every year, almost 90% of the students get placed with a good package. The highest package has been 44 lacs till now and the average package is 6.5 Lacs. Companies such as Adobe and Amazon have visited this campus.

Infrastructure: The infrastructure of the department buildings are very good. This also contains a well-equipped library and labs with high-end computers. The classrooms are pretty good, with well-maintained benches and projectors. The campus hostel also has a high-speed Wi-Fi facility.

Faculty: The teachers at NMIT are highly qualified and very friendly with the students. However, some of the teachers are bad at teaching but you always expect that in an engineering college so no worries. Our college follows VTU syllabus, which makes the students industry ready.

Best and supporting faculty, good improving placements, good infrastructure as well.

Placements: 94% of the total students were placed in my course. The highest package was 44 lakhs, and the lowest package was 4 lakhs per annum. Many top companies recruit students from Nitte Meenakshi Institute of Technology, making it worth studying engineering at Nitte. Blessed to be here.

Infrastructure: We have proper 24*7 free Wi-Fi; classrooms are cleaned every day, hostels are kept clean, and labs have all the equipment. Campus hostel mess food is excellent, offering many varieties. Special food is provided during festivals. Sports are given a certain importance.

Faculty: Yes, the teachers are very knowledgeable and treat the students very carefully. Exams are easy because of

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 03-May-2024.

the faculty; almost all the questions are covered in the internals itself, making semester exams very easy. We are very thankful to Nitte for providing such good faculty.

Other: It has a future in it. Programming languages are taught with placement level questions as well.

Not satisfied with the faculty. College life is somewhat enjoyable.

Placements: Hello. At NMIT, about 90% of students were placed. The institution has a strong alumni network. So, many companies visit for campus placements. It also has a lot of mass recruiters. Most of the companies are German and Japanese. Last year, the highest placement was 41 LPA, and the lowest was 3 LPA. And the average package is around 7-8 LPA. In this course, most of the faculty members are average but a lot of facilities are provided.

Infrastructure: Wi-fi is available. The labs have good equipment. Good-ventilated classrooms and a small library are there. Clearly, the on-campus hostel is good. But the outside campus has more fees and fewer facilities. In the campus hostel, you can get good-quality food but not in the outer one. Here, more numbers are not present. There is one ground that is common for most sports. But there is a separate ground for basketball and volleyball as well.

Faculty: The faculty is average. Teaching quality is below average. The course is relevant. But a lot more is required for industrial purposes. You can take any college as an example; it does not make you 100% ready for industry purposes. You must learn those things from the outside, practically. May be by doing an internship or something else.

Other: Everywhere the news is spread, the placement here is very good. But it is not so. The fests and events are not that enjoyable.
