Absolutely satisfied because of highly qualified faculty and very good library facilities.

Placements: I am a student of batch 101 in MBBS. At least 250 students got admission in MBBS every year since 2018. Various PG courses are provided after MBBS. The college

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 01-Sep-2022.

also provides nursing and physiotherapy courses. The average salary offered is 50,000 per month. About 95% of students get internships.

Infrastructure: There are many practical labs for every subject, and the infrastructure is old. The new college building is under construction. The canteen is very bad. Sports and games facilities are below my expectations. Hostel facilities are average, and the quality of food is good. The library is very good.

Faculty: The teachers are helpful in studies and also research based on the subjects. They are highly qualified professionals and provide good knowledge to us. Their teaching quality is very good. This course curriculum is relevant and also makes the students ready for the industry.

Other: MBBS is a highly demanded course and also very respectable. It requires hard work. So, I chose this course.

I am dissatisfied because of the infrastructure and poor services.

Placements: Almost 100% of the students got placed because we are in the government medical college, and we all go for an internship in the government hospital. The salary offered for all students is the same, which is Rs. 70,000 per month. Government hospitals are recruiters for us. Almost 100% of the students got placements in the same hospital, and the head of the department is the top role offered by the government.

Infrastructure: In this government college, the infrastructure is of average level. Facilities are good, but they are not excellent as in a private college. Wi-Fi is not available, and classrooms and labs are in bad condition. The library is very good in position and facilities. In the hostel, food quality is average, but the mess and canteen are clean. Medical facilities are very good, and sports instruments are also available.

Faculty: In our medical course, teachers are very helpful, highly qualified and knowledgeable. Our teachers have very good teaching skills, and we all are using their skills as per our ability. Our course curriculum is relevant, and it makes students industry-ready.

Other: I have chosen this course because I want to become a brilliant doctor who can give free-of-cost services and help people surely. Our course gives me an opportunity to help

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 01-Sep-2022.

people with my knowledge and skills. In the government college, there is some lack of technical services and medical instruments, which are much needed for good study, so I wish our college to improve them. All extracurricular activities are organised by seniors. The crowd and connectivity are very good. Scholarships are also given by the government to needy students.

Dissatisfied with the quality of education provided.

Placements: As it is a government medical college, we have a one-year rural area job in the government health center compulsory after completion of the course. It's a good income for us after completion of MBBS, as around 60,000 per month is offered. Our college offers rural services in our cities too, and that's fabulous.

Infrastructure: We have a good library with a nice infrastructure and Wi-Fi for online reading. A new building is constructed, and it is amazing. The quality of food in the canteen is not much good. We have enough grounds, but not enough equipment is available to play.

Faculty: Many of the teachers are not much knowledgeable. Teaching quality is not good. Some of the senior teachers are much educated, but they don't give us enough time to contact them to clear our doubts. The new curriculum of MBBS which is applied from our batch is much good, and it will help students to be good doctors in future.

Other: The teaching quality must be improved, and they should provide good facilities for study.

Really good Infrastructure. Kind faculty members.

Placements: There are approximately 400 students in college with 100 students in each class. The package offer is between 35,000 to 1,00,000. 100% of the student got internships after completing graduation. After completing graduation, one can get a job as a medical officer & also can be a professor at Government medical College.

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 01-Sep-2022.

Infrastructure: Well furnished classroom, library, modified labs, hostel with mess and canteen. Hostel rooms are very good and it has a large AC with all the required facilities. The canteen is also good with hygienic food service and all the health care service is provided here.

Faculty: Teachers are very helpful and kind with the best teaching knowledge! Every teacher is highly experienced here with high degree certificates. Teaching quality is excellent here with modern lab, projector system and all computerized methods. The passing percentage in this course is 50%.

Review of Udhna Citizen Commerce College.

Placements: Our college is affiliated with the veer name of south Gujarat university. The placements are not good in this college. Students get only a degree after their graduation.

Infrastructure: In this college, the infrastructure is below average. There is no cafeteria or canteen in the college. Even there is no parking facility. Our college premises doesn't include any programs.

Faculty: Faculty members of our college are the best. The semester exam is difficult, and only 29% of students got passed in a recent exam. The course doesn't make the student ready for industry, they are just making the students reading and writing machines.

Organises the best events in whole city.

Placements: Around 20-30% get placements with package between 3 lacs to 6 lacs. Banking companies like ICICI, SBI and many localized banks are the top recruiters. 75-80% get Internships at pvt. firms of Surat and at localized banks. Top courses includes BBA BCA B.com.

Infrastructure: All the classes are well-equipped with smart teaching facility and Wi-fi all around the campus. A library containing many books. Actually we don't have hostel facility. But there is a good canteen area which serves good and hygienic food. Campus is huge to organise events.

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 01-Sep-2022.

Faculty: All the teachers are qualified and experts in their fields. Many teachers have also obtained doctorate degrees. They provide practical teaching experience which helps students a lot. It makes students industry ready, semesters are not that difficult, pass percentage is >95%.

Other: Best course to do along with any professional course like CA CS. One of the best college in Surat for events. Other college students literally cry that they can't SDJIC events.

Teachers are the best in their field.

Placements: Placement means nothing here, no recruiter come here they just provide you a degree of Bachelor programme whatever you are doing and then go and search for a job on your own, even the staff are of full of ego. They all have some ego problem I don't know why.

Infrastructure: There is no hostel. Library is there. Sitting in campus is not allowed. In the library you will never get newly published books. You will only get books which are old published. They treat us like a school student.

Faculty: No doubt, teachers are the best in their field. The only problem is they all have some ego issue. But if you think they will make you industry ready then you are at wrong place. Most important. The pass percentage of the recent semester is only 30%.

Everything about my college.

Placements: Our college is Surat based and operates very well. It includes a lot of events and activities and is one of the best colleges in Surat. But the placements are not at a great pace because it's just a BBA course, not a Masters degree. Also, because it's not as renowned as MU colleges. But one day it will be better.

Infrastructure: It has a good campus which includes not only the college but sports arena like basketball, volleyball, table tennis, badminton, kid's arena and a canteen (which isn't working currently due to Covid) as well. The classes are huge and spacious and even the teaching methods used by professors are great.

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 01-Sep-2022.

Faculty: As I have already said that the way teachers and professors support and teach is next level. They themselves are highly experienced personnel and always find a new way to explain. They explain with a new method every time.

Other: In short, everything is good. College conducts nice events and activities. It has good interior and supportive teachers.

Review of Government Medical College, Surat.

Placements: The admission rate is high as students are allowed in our college on the basis of their scores in NEET examination. After the completion of 4.5 years, we must get an internship in our college. It is a medical college. So, we expect that after completion of under-graduation, we will get good scores in NEET PG and become a well-set future doctor.

Infrastructure: Our college building is 50-60 years old, so obviously, the infrastructure is poor and old, but most of the facilities are provided by our college. There is an AC library in our college, and labs are available, but the classrooms are poor. There is no Wi-Fi available for us. The canteen is poor, but the medical facilities are good. We also have sports and games rooms and large ground. Hostels are average.

Faculty: The professors are highly qualified, and it seems like an ocean of knowledge. Their teaching quality is far better, and they are very helpful to us. Most of them had already done post-graduation in their field. This whole curriculum is very relevant, and it makes our study quite easy and interesting.

Other: I chose this field because I want to become a good doctor and give my services in rural areas, where nowadays, no sufficient facilities are available. Events conducted in our college are average, so I wish that it should be improved to make the college life more interesting and make this whole environment joyful.

SDJ International College is worth the money paid.

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 01-Sep-2022.

Placements: Our college is not a good one in providing good placements to the students. Generally, not many companies visit our college for the placement process. Most of the students either want to study higher, or they want to start up their own business. Students looking for jobs are very few in our college.

Infrastructure: It has a decent infrastructure. There is a huge basketball setup. You can also play cricket around that place. Our college has a big garden too. They keep the garden very clean. It also has a huge library. It provides every kind of book which students need.

Faculty: Faculty members of our college are good enough. They all have done masters or Ph.D. in their respective fields. They teach us very politely and are very kind to us. They support students if students are having any discomforts. I want to pursue an MBA degree so I chose the BBA course. It helps me to understand the business properly. Our course exams are held in every semester and are a bit tough.

BBA means SDJ International College !

Placements: Placements here in our college are average or below average. Generally, companies do not visit our college often. Students have to go to companies by themselves. In our college, most of the students take admission for the regular events for which our college is well-known.

Infrastructure: Our college does not owe the hostel. Most of the students here in our College are from Surat. So, there is no point in building a hostel in the college campus. For my course, there are several facilities available in the College. Our college owes a big library where you can find all the books you need.

Faculty: Every faculty member in our college is fantastic. Their teaching method is exceptional. They clear each and every doubt of each and every student. They have done PhDs in their respective fields. My course is absolutely relevant to the ones who want to involve in the business industry. Exams were quite easy if you had studied properly a week before the examinations.

Review of SDJ International College.

Placements: SDJ College doesn't provide placements, and students mostly join for events. We get summer and winter internship projects, but there is nothing for placements. No companies come for recruitment. But it makes you equally ready for placements in companies if you work hard.

Infrastructure: The college has good infrastructure and facilities like computer labs, Wi-Fi, library etc. It has a canteen and many other facilities for students. The college has a help desk. The classrooms are ventilated and have projectors and other facilities.

Faculty: The teachers are very helpful, extremely qualified and knowledgeable. They teach very fluently and also provide proper notes. The semester exams are moderate. The pass percentage is 35%. Teachers also provide help even after college.

Placements 5 ★ Infrastructure 5 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

The college is overall good for one to have good experience and lots of memories.

Placements: As I am studying in the final year, I am not well aware of placement facilities, but it does invite many companies, and a Japanese company was also invited, which hired many students for internships. The packages are quite good. Coder, website developer, etc., roles are offered.

Infrastructure: It is a very good college for academics as well as sports and other co-curricular activities. The infrastructure is good for students to study and hang out with friends. The classrooms are bright and clean. The feel of being at college and learning new ideas at each moment is the core of SDJ International College.

Faculty: I chose BCA because I want to become a web developer. All the faculty members are awesome, and their lectures are simple and good. Almost all the faculty members are PhD holders. Internal and external exams are conducted, but sometimes, exam papers are tricky. I felt good to attempt the exams.

Other: After 3rd year, you can get leads for placements. There were placements due to Covid-19. Inferno, WOW, Komenizo, Ultimo, SDJ Cha Raja, etc., are the events conducted at SDJIC every year and are managed by the students only. The whole teamwork is done to make every event a success. SDJIC is famous for its events among all the colleges.

It's one of the best colleges in South Gujarat, with amazing infrastructure and great culture.

Placements: I have seen nearly 50% of students getting placements from our college of our senior batches. I am in my last year of the course, and placement opportunities have already started providing. In the current pandemic situation, I think opportunities for placements are above average in Surat.

Infrastructure: There is a basketball court on our campus. Classrooms are also spacious, and benches are comfortable to sit in. The library is huge, and the canteen facilities are great. Wi-Fi facilities and computer labs are available in our college. There are also projectors in every classroom for a better learning experience.

Faculty: Some faculty members here are great, and some faculty members are average. Our college follows the curriculum as per VNSGU, which is relevant for almost all colleges in South Gujarat. The quality of our internal exams is good, and the teaching quality of faculty members is also good. Overall, the academic level of courses in our college is above average.

I am satisfied with the college because of the faculty members.

Placements: Around 10% of the students can get jobs in the placements in a particular company. So, it's better for students' aptitude and attitude. The salary packages offered vary from 5 LPA to 6 LPA. So it's a very big amount for students as they are offered in bachelors degree.

Infrastructure: There are a total of five computers labs and laboratory sectors. There are very big and complex events for the study with action and activities. Our canteen is the best place because it serves the best food. It is an interesting thing about our college.

Faculty: In our college, faculty members are very senior. They all help students and are always responsible. They can get more study options abroad and get chances to the exam of CMAT.

Other: It is the best campus.

 Placements 4  Infrastructure 3  Faculty & Course Curriculum 5  Crowd & Campus Life 3 

It is a very good and helpful course.

Placements: After MBBS, government jobs are available for students. Most of the MBBS students don't go for these jobs as they prefer to do post-graduation. The package can be 60,000-90,000 per month. Students must do internships in the MBBS program, as it's compulsory in MBBS.

Infrastructure: The college is old, built in the 1980s, so don't expect good infrastructure. A new college building is under construction. Then, facilities and infrastructure will be good. Hostels are also not good but manageable.

Faculty: One of the best courses to be done till date is, I think, MBBS. All the teachers are qualified and very helpful in the college. Especially the new curriculum is very helpful, and patient-based clinical curriculum is the very high yield for many students.

Other: I like the medical field from my 10th standard. It is the best course to do. I wish to shorten the time span of this course. Fests and events are held annually, and it is very good. We love to enjoy the fest.
