**The college provided excellent placements in the year 2019.**

**Placements:** Almost 90% of the students from our course got placed. The highest salary package offered is 38 LPA, and the average salary package offered is 8 LPA, and the

**Disclaimer:** This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

lowest salary package offered is 4 LPA. Many students from our course got an internship, and many students also get PPO. Top recruiting companies like Phonepe, Capgemini, Deutsche Bank, Siemens, LTI, TCS, UBS, Credit Suisse and eQ Technologic visit our college for placements.

**Infrastructure:** The infrastructure of our college is good. Library facilities are good. The hostel is very good. The college mess is hygienic. In the hostel, there are good warden and a good mess. The campus is small but beautiful. Reading hall is huge, and the charging points are also available. Wi-Fi facility is available in both college and hostels.

**Faculty:** Faculty members in our college are helpful. They provide theoretical knowledge. The course curriculum is relevant, and it does make students industry-ready. Many teachers are PhD holders. Teachers are very helpful. They provide guidance. Staff members are also good.

**Other:** I have chosen this course because this is the best college for computer engineering course. Technical activities conducted at our college are good.

### **Pune institute of computer technology review.**

**Placements:** Placement of PICT Pune is good for Computer engineering. For IT and ENTC its a average figure. Morgan stanley, Rakuten are hiring students on big package. Rakuten offers the highest package nearly 40 Lacs per annum and more than 70 students get salary higher than 5 Lacs per annum and TCS, infosys are mass recruiters. They offer 3 Lacs per annum. Internships usually offered in third and final year. As per my knowledge internships are good and upto 17000 you can get stipend. Placement Cell is good and it is improving placement, statistics year by year.

**Infrastructure:** College campus is small it is approximately 5 acre. It includes mainly classroom buildings and girls and boys hostel. Classrooms are spacious. Labs are also good and well equipped. Library have many books and are well arranged for students. You have to return or renew book within 7 days but you can access library freely. There is reading room above library available for study. Canteen quality is not good and there many options other than canteen is available outside so don't worry about it. Hostel is expensive usually students take flat in group of 4-5 but if you want to take hostel then you may take but it is strict and restricted entry rules.

**Disclaimer:** This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

**Faculty:** Guys for first year engineering it is very strict. They take all of your energy. Classes from 8-4 and 1 lab each day. All teachers are qualified and teaching is good. They teach as per SPPU syllabus and university guidelines. One teacher is for 67 students nearly that's normal. For first year you have only Techmax in your hands and after that in third year you have industry exposure. First year curriculum is good and include all engineering branches basic knowledge but it is only remembered for your online, and university exams No such interesting application is there.

**Other:** Events are very less. CredeNZ is technical event. It is the biggest event. There are lot of competitions are there in coding. NTH is very good and you will enjoy that competition. There is art events like abhivyaktee also. Crowd is good. There are many students of bharti vidyapeeth also. Campus is connected to Pune city, scholarships are available you can check on website also EBC scheme is available.

★★★★★ Placements 5 ★ Infrastructure 3 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

**I'm satisfied due to good faculty members, awesome placements and a helpful crowd available here.**

**Placements:** In the previous year, a total of 85% of the students were placed from our college. Some of the top recruiting companies here are PhonePe, Microsoft, Rakuten, Yahoo, TCS, HSBC, etc. Internships are provided by our college, but mostly every student tries to get internships off-campus. Top roles offered here are software engineer, data analyst, etc. More than 480 students got a salary package of above 5 LPA, while more than 70 students got a salary package of below 5 LPA.

**Infrastructure:** Our college has its own library, and the library is awesome. The infrastructure is also very good. While working on the computer, it will give you a feeling like you are sitting in front of the computer in an office. The quality of the food served is not much good in the mess. The girls' hostel is very nice. The hostel fee is around 1.2 lacs, and many students stay in PGs also. Our college has a basketball court and a badminton court.

**Faculty:** Our college has very good faculty members, and they are very helpful. They will let you learn various courses which will be useful to you in the future. The teachers have very good knowledge of their subject. Their teaching quality is awesome. But they are a little strict in terms of study and assignment submissions. The crowd in PICT college is very good that even if any student is not interested in studying, they will get interested in

**Disclaimer:** This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

studying and take different courses which their classmates are doing. Seniors are really awesome here, and they are just like your family members. They will also guide you whenever you need them. The teachers are strict, so you can't even think of skipping classes.

**Other:** I chose the information technology course because nowadays the world is digitalising, and also I like coding. Club facilities are awesome here, and there are many clubs in PICT. Some of them are international clubs like IEEE, ACM and CSI. Other clubs available are Pictoreal, PICT art circle, PICT MUN, PICT EDC, PICT Robotics, PICT DEBSOC, PICT NSS and many more. Many fests are organised here. The annual fest is attractive, which is organised for about 3 days, and every student enjoys themselves very much on these 3 days. Other events organised include individual fest of international clubs like Xenia by CSI, Pulzion by ACM, and Credenz by IEEE.

★★★★★ Placements 5 ★ Infrastructure 4 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

**Good placement provided. Teachers are good and helpful. Competitive atmosphere.**

**Placements:** The placements provided are good. Last year, they were better than COEP. Almost 75% of the students get placed. The college gives higher priority to the placements over the curriculum. But the attendance gives a headache to all the students. At least, the final year students get the time to complete their project work.

**Infrastructure:** The college has four blocks. Now we have a new infrastructure for the girl's hostel. Maybe they are not as big as you think but it has only one basketball ground. There is a good parking lot for the students and the necessary facilities. The labs are still working on Pentium 2 processor. The entire campus is quite peaceful.

**Faculty:** The faculty is very strict. 75% attendance is mandatory. It is based on Savitribai Phule Pune University's curriculum. But it is going to become an autonomous institution from the next year. The faculty members give more assignments to the students, but that is good for keeping a good score in the exams.

**Other:** Not much to tell

★★★★★ Placements 5 ★ Infrastructure 5 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

### **PICT is a creative and a supportive college.**

**Placements:** The placement for any branch in PICT is at the top in Pune. Approximately 80% to 85% placement rate is followed in PICT. E and TC branch follow most placements about 84%. The computer and IT branches also have a placement rate of 80% to 84%. Even though the placements in here are more, the students are still not able to get high salary job.

**Infrastructure:** The Infrastructure of the hostel is the best. Many facilities like Wi-Fi, gym, open gym, hot water, playroom and TV hall are provided. There are three students in a single room. We pay Rs. 22,000 per year. The hostel food is quite good. Can't say that it is bad, but they can do better than this.

**Faculty:** The faculty is very good. Their teaching is good, and the lectures are taken regularly. Some teachers were the NIT and the IIT students, so they give us extra knowledge about the industries and the practicals. They have the experienced and cool staff. They are the silent and co-operative staff. The strictness is followed in the first year. But the thing is that all the things are done by ourselves in the college only. So the studying at home is not necessary.

### Fully satisfied by choice of the college.

**Placements:** Till now nearly 50% of my batch is placed within a month. The highest package is from codenation of nearly 36 lpa whereas average goes near about 8-9 lpa. Among the top recruiting companies are phonepe, Goldman sach, Codenation, DB. Nearly 10 percent of the students got internship.

**Infrastructure:** There are 3 departments in the college comp, IT and entc. Having Wi-Fi facility in whole college. College campus is very small but even beneficial at the same time. You can interact with your friends easily. Labs are well-equipped. Considering sports it has lot of indoor as well outdoor games.

**Faculty:** Teachers at Pict are very helpful with lot of qualification and experience. They have knowledge of various domains and can clear every students doubt. They even help you in some non curriculum activities. Semester exams are not that difficult. You have an online round and an offline round.

**Other:** I choose computer science as my course. Course include subjects like OS, DBMS, Data structure which were very important considering industrial world. I learned lot of new things. I would suggest to bring hands on experience on the latest technologies and to keep course getting updated more frequently .

### Pune Institute of Computer Technology is the best for placements.

**Placements:** Our college provides great placements for us. The average package provided in our college is nearly 6 LPA, while the highest package offered in the last year was 37 LPA. Nearly 200 students got placed with a salary package of about 5 LPA. One student in the previous year got selected in the PhonePe company.

**Infrastructure:** Our college has less area to play sports like cricket, etc., and every student

**Disclaimer:** This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

in this college just study. Our college is also not interested in providing sports, but some cultural events are conducted in our college.

**Faculty:** The course curriculum of our college is entirely based on the university. Whatever the course provided by the university, teachers teach it, and we have to learn that only. Faculty members also teach very well because of the dean of our college is very strict in this aspect.

**Other:** Lots of cultural events like Credence, etc., are organised in our college where all the students gather and make the decoration. Dance competitions and lots of things are provided by our college.

★★★★☆ Placements 5 ★ Infrastructure 4 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 4 ★

**It is the best college for placements and the entire academic environment.**

**Placements:** For the academic year 2019-20, the placement percentage was 84.06% with the average salary package of 8.11 LPA in the above niche state. For the IT branch, total of 122 students were placed out of 180. Overall, the average salary for the above-mentioned year was 7.60 LPA. The highest salary package offered was by Phone Pay which was 38 LPA while Rakuten gave 37.18 LPA.

**Infrastructure:** There is a proper availability of Wi-Fi in PICT. Labs and classrooms are well maintained and polished. The library is also properly maintained. Plenty of reference books and other books are available in the library. There is a section for a self-study/reading hall in the library. The hostel is also good. Various facilities are provided in the hostel like well maintained and wide rooms with 2 beds in each. Elevators are also available for students. Mess and canteen facility is also fine. For sports/games, facilities are quite less. The campus is not large at PICT. So there is no playground for playing games. Although there is a basketball court on the campus.

**Faculty:** Teachers are very helpful in PICT with great knowledge. They are always ready to help you with any academic related concerns. Teach quality is also better. Teachers are quite strict about submissions. But it's good. There are always sessions by industry professionals in the college related to a given particular subject. These sessions help students a lot.

**Other:** In PICT, computer and IT branches are absolutely good but for ENTC, there are

**Disclaimer:** This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

rumors about the placements. But it's not like that. ENTC branch is also fine. Faculty members of the IT branch are best. In the CAP round, seats for the computer branch are to be filled first i.e., merit for the computer branch is higher than the IT branch. Even fees depend upon cast. There is an EBC scholarship for fees concession. Various clubs are present in PICT. Our college also supports various cultural activities. There is an event named "Addiction" held every year. This is a cultural event which is filled with a lot of enjoyment. Clubs like ACM, IEEE, and CSI arrange technical fest every year. Various debate competitions are arranged by PICT DEBSOC club. Apart from that if you are interested in social work then there is a PICT NSS club for social activities. There are clubs like pictorial, art circle, EDC, etc.

**Our college is best for placements. You don't need to worry about your career when you join here.**

**Placements:** Around 85%-88% of the students got placed in companies from B.E of all branches. In our college, the average salary package offered is 7.5 LPA. The highest salary package was offered by PhonePe to 3 students, and it was 38 LPA. Reputed companies like Rakuten, PhonePe, etc., visit here for placements. Our college also offers many internships.

**Infrastructure:** Wi-Fi facility is available only in the library. The library is well structured and has all facilities. The hostel is also good, but there is a very small ground for playing sports. The canteen is good only for breakfast, but lunch is very boring and not of much quality. In classrooms, all facilities are available.

**Faculty:** Teachers here are very helpful and generous, and they all are geniuses. Their teaching quality is the best, but all teachers are strict. Our college is also serious about attendance. Our college provides other education to get better placements. It conducts many seminars for students' development.

**Other:** Our college is well known, and the placements are very good. Placements of our college are better than COEP.

## ★★★★★ Good college for learning and getting a good job.

**Placements:** Placements were really nice for 2018 batch. A lot of first time visiting companies, most of which are exciting startups visited. Examples can be rackware, ryusi etc. Companies that have been visiting earlier also visited. Almost 70 - 80 % of the students have been placed. Types of roles mainly offered were ( in order of frequency)- software developer/engineer, programmer, business analyst, technology analyst. For a surprise, marketing and sales roles also offered by some companies like byjus and wisdmlabz. Internships provided by the college are not very much. Most of the students look for internships on their own. For 2018 batch, Nvidia and ACI were the only companies that visited for internships, in which some 4 -5 students got internships. The highest package in India was 16 LPA by Morgan stanley and outside India 35 - 40 LPA in japan by Rakuten. Placement cell is present. Now, its efficiency and working depends on the very people running it. This year, the cell was very efficient, managed to attract many companies, and was also managed very efficiently. This can be attributed to the change of leadership and proactive volunteer. The cell is run by volunteers from our batch only. So it depends on them, and so its efficiency can vary every year.

**Infrastructure:** Infrastructure of the college is average to above average. The basic infrastructure like classrooms and labs are very good. They have good quality computing resources for normal learning (however, they can sometimes be inadequate in final year for large projects). The Wi-Fi provides very good connection speed, but their can be some connection glitches, which are being worked out though. The quality of food in canteens has improved from this academic year (2017) after the caterer was changed. I was a localites, hence can not comment on hostels. Sports is, however, is an area where the college lags. Apart from a basketball and a volleyball court, there is nothing much. Also, the atmosphere here is kind of studious or geeky. So, if you are interested in sports, this is not the best place to be.

**Faculty:** Teachers vary greatly and you will find each and every kind of teachers. So, it is a difficult thing to generalize. Mostly, teachers are helpful in comp and it departments. Entc department teachers are a little bit strict. Teaching quality is average to good. Teaching is mostly on boards and projectors. The course curriculum is good for building the base of knowledge. The basic and older (some students feel) technologies are more focused. But you will have to learn the latest trends by yourself. The self learning environment is also very good in college. Students can learn a lot is interest groups, events and other such activities where they can interact and develop projects with seniors. A lot of students learn

competitive programming as well in these groups.

**Other:** Many events take place across the year, catering to different interests. Most are technical events, some are cultural. Crowd in the campus is average. College does not provide its own bus for connectivity. So, you will have to use public transport or your own vehicle. Campus surroundings are mostly flats that are accommodated by college students. As bharti vidyapeeth university is also in vicinity, there are a lot of students living in that area and hence a lot of shops and services to serve their interests.

★★★★☆ Placements 5 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 3 ★

### One of the best college in Maharashtra for CE/IT/E&TC.

**Placements:** The students from CSE and IT shouldn't expect anything more, and this is the best you can get. But if you are E&TC student, it is satisfactory, and still, one of the best college in Maharashtra. You don't get many options for core in E&TC companies. If you are willing to join IT industry, just close your eyes and go for it.

**Infrastructure:** The campus is not very big, but if you look ATIT as a 3-branch college, it's enough, but that's just for studying purpose. There are not many facilities for sports and the other extracurricular activities. We have enough classrooms and labs with all the technologies you need. The only area where the infrastructure lagging is sports and games.

**Faculty:** PICT has the best faculty members in Pune. The ratio is 15 students per teacher has been constant for a long time. The course is a bit tough as you have to study one subject from different stream definitely and these subjects are not the easiest ones. The internal marks are not just for granted, and you need to work hard for it.

**Other:** The college has everything, and you need to thrive technically. The various events and hackathons are organised now and then. The internships are provided in these events too. The crowd is again much more inclined towards studies and technology. The crowd in our college is good.

## Review of Pune Institute of Computer Technology, Society for Computer Technology and Research.

**Placements:** Top roles are offered in the banking sector as well as in the IT sector. Top recruiting companies visited our campus from India are Phonepe and Goldman Sachs. The top international company offered placements to the students is Rakuten from Japan. The highest domestic salary package offered this year is 38 LPA by Phonepe.

**Infrastructure:** Wi-Fi facility is available all over the college with a decent speed. The canteen is good. The girl's hostel is recently renovated, and it is really great. The boy's hostel isn't worth it. Labs and classrooms are great with all the necessary equipment. The library has almost all the needed books in each sector, not only for engineering.

**Faculty:** Teachers in our college are helpful and highly qualified. Some of them are PhD holders. The knowledge base of teachers is quite wide, and they can teach you quite well. This college comes under SPPU, and it follows the curriculum given by it. The syllabus is quite good with the requirements.

★★★★★ Placements 4 ★ Infrastructure 2 ★ Faculty & Course Curriculum 3 ★ Crowd & Campus Life 1 ★

### The college is good, and teaching is good. Placements are also good.

**Placements:** Around 65% of the students were placed from our course. The highest salary package of 32 LPA was offered by Rakuten (Japan), and the average salary package offered was 3 LPA. TCS, Infosys, Capgemini, Cognizant and Wipro are some of the top recruiting companies for my course. Maybe around 30% of the students got internships in Jio, Tata, Tech Mahindra, Infosys, Byju's, etc., from here. Data scientist, IT, Firewall, developer, frontend/backend developer, etc., roles are offered.

**Infrastructure:** There are no many facilities here. Classrooms are average and not much good as they should be as of now. Nails from the benches sometimes poke. Facilities in hostels were average and not satisfactory. The food served was good but not always good. There is a small ground, which includes a basketball court and volleyball court. Some indoor games are also provided now like chess, carrom, etc. A doctor is not always available.

**Faculty:** Teachers were highly qualified except for a few as I think some jobs were provided on the basis of their caste. There is a lot of casteism in the college, and I felt that quite a few times. However, staff members are good. The course curriculum is surely relevant.

**Disclaimer:** This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

There are lab practices and kits, which help students to be ready and comfortable for the industrial sector.

**Other:** I chose this course because my parents insisted me to do it. The best thing about this course is that if you're really interested in technical things, then this will be a lot interesting as there are several projects, kits, etc., to perform live operations. Our college should be a little friendly and should have less racist environment. Some lecturers really demotivate students, which makes them mentally weak. Events are good. The connection between students is good, and the campus surroundings are the best. Scholarships are provided, and their details are also provided. Extracurricular activities are negligible.

Placements 5 ★ Infrastructure 4 ★ Faculty & Course Curriculum 2 ★ Crowd & Campus Life 5 ★

**Our college has devastating teachers, but the placements are top-notch, which makes it has demand.**

**Placements:** Most of the students who opted for placements got placed from our college. They all got a starting salary package of 5 LPA or more in the companies. Moreover, students got a salary package of 37-38 LPA in PhonePe. Companies like Avaya, eQ Technologic, etc., visited our campus for placements.

**Infrastructure:** The canteen is not up to the mark in our college. However, everything else is just good enough for students to stay in the college hostels. Wi-Fi facility, clean drinking water, security, etc., are up to the mark. Classrooms are fine, but benches are not much comfortable or small in size like they are in a way that they are provided for primary school students and not for college students. Sports facilities are minimal, and even there is no huge playground on the campus.

**Faculty:** Teachers here are helpful after the classes, and their teaching is not good at all as there are few exceptions. However, they all are very strict towards students. Students here get good results by studying on their own and not because of academic classes conducted by the college.

**Disclaimer:** This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

**Other:** The campus crowd is really good. There is a competitive ambience, which leads to the overall development of students. Due to the bond between seniors and juniors, there are such good results in our college. The teaching doesn't play any role in the results got by the students in our college.

**The placement record is very impressive.**

**Placements:** Near about 70 percent students got placed in our course. As per my knowledge there is company named Phonepe who offered 38LPA package for our institute. There are many top recruiting companies in our course like FinIQ, Avaya, HSBC, Fiserv and many more software companies.

**Infrastructure:** There is facility of Wi-Fi in college at any place of the campus. Labs are all equipped with necessary instruments with lots of verities. Classroom are also have all facilities like projector, etc. Books of many authors are easily available in library. Hostel mess, canteen all the things are perfectly organised.

**Faculty:** All the teachers are helpful, qualified and knowledgeable and always ready for help type. The teaching quality is also simple and easy to understand. Course curriculum is relevant and it makes the students industry ready.

**It is a very good college for students who want 100% placements.**

**Placements:** Almost 70% to 80% of the students got placed in good companies. The highest salary package offered by companies is 18LPA and the lowest salary package offered is 4 LPA. Rakuten, Avaya and HSBC are top recruiting companies for our course. Almost 40% to 50% of the students got internships in companies like Gold Sachs. Developers and testers are top roles offered in our course.

**Infrastructure:** Our college is quite small, but it provides other good quality facilities like

high-quality Wi-Fi, well-equipped labs, huge classrooms and a huge library. Departments are also well organised. The library has lots of books, novels, etc. There is a good and clean hostel, and good quality food is served. Our college is also the best for sports and indoor games.

**Faculty:** We got the best teachers. They all have passed out from best colleges. They are PhD, M.E and M.Tech degree holders, and they have good knowledge of respective subjects. Their teaching quality is awesome. The course curriculum is very relevant, and it makes students industry-ready.

★★★★★ Placements 5 ★ Infrastructure 3 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 4 ★

**The college provides very good placements. The campus is good but small.**

**Placements:** Many companies visit our college for placements, and around 80 companies visited our college in the previous year. The college provides many internships in 3rd and 4th year. In the previous year, the highest salary package offered is 32 LPA. Most of the students got placed easily with an average salary package of 8 LPA. Computer department is very good here.

**Infrastructure:** Library facilities are very good with many types of books. Labs are very good. Every lab contains sufficient things which are required. Wi-Fi facility is average here. Wi-Fi facility doesn't work mostly, but in the library, it is best. The canteen offers much variety of dishes, and it has a special menu every Thursday and Sunday.

**Faculty:** Teachers in our college are very helpful. They are well qualified. They always help students in every situation. They encourage us in every possible way. They are only strict in attendance matter. The course curriculum is relevant, and it covers every possible domain. Teachers are also best here.

**Other:** Events are always organised at our college. There are many clubs you can join it. Campus life is also interesting.
