It is a very good college in all terms.

Placements: The placements in this college were not so good because big-name companies do not come here to recruit engineers and no civil engineering companies are coming here. Other branches get more opportunities in this college because all other branch

companies come here to recruit the engineering students.

Infrastructure: Very good infrastructure is there in this college. The classrooms are pretty much good, and the library was also good. All the labs and workshops are also maintained. This college is very good regarding the infrastructure as compared to other colleges in Chhattisgarh.

Faculty: The faculty was very experienced in their particular subjects, and the course curriculum was also good. The faculty treat the students also very good, and all the teachers are very well-disciplined, so this college is also good regarding teaching thanks.

Our college provides a worthy outcome with affordable fees.

Placements: KITE provides very good internships and placement opportunities to the students. Almost 95% of the eligible students were placed across top companies of Chhattisgarh. I am very satisfied with the placement assistance provided by KITE and glad that I took career assessments and personality development classes seriously.

Infrastructure: KITE group has excellent infrastructure, and the campus is very beautiful. It has all the facilities like Wi-Fi, library, canteen, transportation, etc., to assist students for better student life. The campus is very neat, clean, and hygienic. It is sanitized regularly, and proper physical distance is being maintained.

Faculty: Teachers are very helpful and supportive. They help us even after college hours and are ready to assist us in all the difficulties. They are very encouraging and motivating students to perform better. The course curriculum is very relevant and helped us to learn about practical aspects of the business.

Other: I chose MBA because I want to be a manager and fulfil my ambitions to become a corporate leader. I think internships could be better as we did not have a lot of companies. We only had limited choices.

Life at KITE is good and happening.

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 17-Aug-2022.

Placements: Placements at Kruti Institute of Technology and Management are good. The placement cell and faculty members work hard round the clock for placements during drives, and the institute makes sure you get a job profile according to your choice.

Infrastructure: The infrastructure of our college is good. The college has all the facilities like Wi-Fi, centralised air-conditioners, large classrooms, well-equipped labs, a library and a good cafeteria. The quality of food available at the mess and cafeteria is good and hygienic.

Faculty: Faculty members of KITE are highly experienced, and most of them are doctorate holders. The college has very good teaching staff members, and they are very generous and emphasise more on practical learning than rote learning. The curriculum was understandable and new. Moreover, the curriculum is made in accordance with industry standards. I learned a lot from KITE.

Good college if and only if you want to work in Raipur and your aim is to do job.

Placements: Placement opportunities are good. Your percentage should be at least more than 70% in the exams. The college provides everything you need within this city. Highly recommended if you want to be more than an engineer, you will have to do everything on your own. Only the syllabus part will be undertaken by the faculty members.

Infrastructure: Well established building. Large playground area. Well established labs. Small canteen. Friendly environment. Different rooms for separate branch. Classes are well decorated. Electricity supply is good. Well established Wi-Fi campus. Eco friendly environment.

Faculty: Faculty members are experienced. Five branches of engineering available. Different courses available under the same roof. All of your doubts will be cleared. Classes are regularly taken by the faculty. Not only subject matters but sometimes lectures on life sentiments are given.

Absolutely satisfied with faculty and their support and also good placement in 2018.

Placements: Total percentage of students placed is 85%. The highest salary offered is 12 lacs and the lowest is 4.5 lacs per annum. Capgemini, optimus cognizant are good companies which offers placement here. System engineer and team lead are designation which offered here. Bharat wire ropes and chips are some of those company who offered internship here and 80% of students got opportunity to intern in different stream.

Infrastructure: Our kruti campus is fully covered with Wi-Fi system and college is having 3 computer labs for practical experience and they are also providing smart classrooms. And all books regarding course are available in library. And quality of service provided by hostel is very good. There is 24 hours open mess facilities. And they provide nutritious food so that students will always be healthy. And also there is medical room for any medical emergency. And here a lot of sports academy is there which promotes the hidden talent of students and provide one proper platform for that.

Faculty: Faculty are very qualified and they are always ready to grab responsibility. They are post graduate. And all HODs are having degree of doctorate. Course is very much relevant to practical knowledge. And yes students are ready for future opportunity.

Other: Because I love software industry and Comparison to all other branches there is more scope to grow. I pursue this course because it is most promising branch for higher growth. Course should be modified with modern languages of computer like python and all. Every year technical events take place in our campus.

Best College with best infra and facilities.

Placements: 45% student placed from our batch. The highest package offered was 3.2 lacs and the lowest was 1.8 lacs per year. Top job role offered was software developer. Top companies from across Chhattisgarh and other places recruited us. Many companies offered job and many students got placed as intern.

Infrastructure: Facility and infrastructure was absolutely best. Infrastructure is in high class, facility provided by college is great and other facilities like library, canteen, gardens, sports ground is good. Campus is very high quality and other facility is also great.

Faculty: About the teachers they are highly skilled and impressive and outstanding thoughts. Very supportive staff and always seen like helpful and kind. The bond between students and teachers are great.

Other: The scope in technology is very bright and we can go very far with that, that's why I prefer it.
