Jamia Hamdard is a deemed to be university.

Placements: Placements in the college are the worst. Very few students get placements. However, very few companies visit the campus for placements. The placement cell is doing

nothing to invite reputed companies like Wipro and other IT companies. The university should provide internships to their students in proper companies.

Infrastructure: The infrastructure of the college is awesome. The campus environment is awesome from outside, but the classrooms are not that good. However, rules and regulations are strict, and it is a ragging-free campus. The canteen facilities are bad. The cricket ground is good. There is no boys hostel in the college.

Faculty: Teachers in the college are helpful, qualified, and knowledgeable. They are good at teaching. Teaching methods are okay and not that good, but some teachers are at their best. But, management of engineering is not up to the mark. They need to introduce some courses like AI.

Jamia Hammad University - The place which is open for everyone and helps you to develop the skills.

Placements: TCS is the company which comes to select the promising candidates and tries to take most famous. Infosys is also one of the many renowned companies which come for selecting candidates. Hammad is also a big brand in the pharma industry. It is okay.

Infrastructure: The infrastructure is a little old. It's a central library building, and it's near to gate number 6. Wi-Fi is available, but the speed is slow. The classrooms are okay. As mentioned earlier there is a central library building which has a vast number of books and one can get them. Well, the whole university has their own hospital Majeedia hospital.

Faculty: The teacher is okay. They are helpful and knowledgeable. The teaching methods are different as there are many options the student-faculty ratio is a little low. We haven't got any industry exposure. Well, the curriculum is basic, and once you get to hang on it, you will do fine. There are many events organised by the university and there are the different community which is formed by comprising student and teachers.

Good placement cell and mess facilities.

Placements: One plus point is that Jamia Hamdard has a training and placement cell that guides the students in choosing a good company. The placement cell helps in various things like preparation of placement brochure for final placement, pre-placement visits to the companies, General follow-up, joining formalities and other administrative activities. The college also provides internships in very reputed companies like IBM, TCS, etc. But no placements for open and distance learning.

Infrastructure: Labs are excellent. At a time over 50 students can work in the lab. And talking about sports, there are cricket and football tournaments conducted in our college each semester, class-wise and semester wise. I lived in the hostels with some Afghanis. The food is really good, the hostel from outside also looks too good. There are 3 or 4 hostels on my campus for different budget systems.

Faculty: We got 5-6 lectures daily and the faculty was highly professional and experienced. They were highly knowledgeable and we were very satisfied with their coaching. Even if we are not satisfied with some professor, they understand that thing and provides us with the alternate option. This course is based on the IT sector and for those who want to be a software engineer at an affordable price. The crowd of Jamia Hamdard is very civilized and polite. No political issues or student council is there, complete ragging prohibited, so there are no such issues.
