It is a good private college. I suggest you take admission to this college.

Placements: Placements in our course are good. Almost 100% of the students get placement in the chemical engineering course. The minimum salary package offered is 3.5

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

LPA. All the students are given industrial internships.

Infrastructure: The hostel life is one of the best life, not only in HIT, even if you are living with many restrictions. I studied in a boarding school, and I made some good memories and friends there. When I came to HIT and got my first hostel as Balaji, I was quite confused about how it would be because I had to share my room with three other friends. I had to face some issues because I lived in a single room for the past few years, but I caught up and started enjoying and making friends.

Faculty: Everything is going well. There is a bit of pressure of studies together with all the extracurricular activities in the college.

★★★★☆ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 4 ★

I would recommend this college.

Placements: More than 90% of the students of the CSE department got placed. The highest salary package offered is 14 LPA, and the average salary package offered is 4 LPA. Mass recruiting companies for CSE are Infosys, Wipro and IBM. Other companies also provide jobs to CSE students as every technology company can hire a CSE graduate. The future of students from this college is set for life.

Infrastructure: Everything is expensive today. As compared to other colleges, our college fee structure is moderate. It takes Rs. 40,000 to 42,000 each semester, excluding exam fees and late fees. Modes of payment of fee are online, cash and demand draft in the name of the college. The college provides full transparency of the fees they are charging.

Faculty: Our college faculty members are very good, and we are able to read and study properly. Each faculty member is very good, and they have very good knowledge of their subjects. They motivated us every time, and they are very helpful.

Other: The fee structure is feasible, moderate and affordable. The hostel fee is also moderate. The college provides a scholarship for challenged students and also for other fields. I opted for this college because of its excellent placement history and its atmosphere.

Placements are average. Be in the first line when communicating with professors.

Placements: The highest salary package offered is 4.5 LPA, and the average salary package offered is 3 LPA. Most of all IT companies visit the campus. But in the core fields, only a few companies come. If you are CS, IT, or ECE student then this college might be proved as heaven. In every year some achieve excellent jobs.

Infrastructure: The infrastructure is better than any other college. At WBJEE after Jadavpur, Kalyani and Jalpaiguri you can choose this college. Infrastructure is good. All labs are well-equipped. Mainly Jio Wi-Fi is available on the campus but only a 50MB limit for anyone for the entire day. Hostel life is very good. There are many hostels, and sports games, and all medical facilities are available. College gym is free of cost. There are many cafes and restaurants on campus and those are pocket-friendly.

Faculty: In the civil department, very few facilities members are excellent. A few have PhDs. Teaching quality is not much good if you plan for research experience. You can't make any strong application for the research internship proposal like SRFP. Only CS and chemical departments have a strong network in these fields.

4.4 ★★★★★ Placements 5 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 4 ★

The infrastructure of HIT is not so good.

Placements: Our college has approximately 100% placements in IT, CS, and chemical engineering departments. The average salary package of IT and CS is 5 LPA. For internships, you have to do it on your own. You have to grab opportunities for yourself to get an internship. The good thing is that in HIT you will get a lot of opportunities to explore yourselves. As there are a lot of societies in HIT. One of the students of our college got placed with Facebook with a package of 2.5 crores per annum.

Infrastructure: The infrastructure is average. The campus is fully equipped with Wi-Fi. We have "Aryabhatta Central Library" which is the biggest library in West Bengal. It is bigger than the library of IIT Kharagpur. The campus is equipped with all the labs. But the classrooms are not so good. The hostel is not so good, but the mess is too good. In sports, we have only a few games to play like cricket, badminton, table tennis. There are proper medical facilities in our college.

Faculty: Professors are well qualified, but it depends on the students whom they prefer to take classes. Many of the professors are from IITs and are well experienced. All the professors are Ph.D. holders and some of them are authors of many books. The course curriculum is good.

Other: I opted for this course of my interest in it since childhood. There is a fest in which most famous singers like Jubin Nautalya, Arijit Singh, Shreya Shetty, etc., are invited. The college is surrounded by a riverside so when you will feel depressed you can go to the riverside and you will feel calm and blessed by seeing the beauty of nature.

 Placements 5  Infrastructure 4  Faculty & Course Curriculum 5  Crowd & Campus Life 5 

It is a really good college because of its infrastructure, facilities and also staff members.

Placements: About 85% of ECE students got placed in most of the recruiting companies. About 70%-80% of students got internships from this course. This course helps you to get jobs in both technical and non-technical fields. Infosys, TCS and Tech Mahindra are the most recruiting companies here.

Infrastructure: Facilities and infrastructure are good enough on our campus. The food available in the canteen is also good. Our college has its own medical health care department, which is excellent. Sports are good on this campus, and the campus has an average speed Wi-Fi.

Faculty: The teachers of our campus are very much educated and very helpful. They mostly behave friendly with students. Semester exams are quite difficult as the question papers are designed by our college teachers only since it's an autonomous college and affiliated with MAKAUT.

Other: Events, fest and other extracurricular activities organised here are extremely great and joyful.

HIT-Haldia Institute of technology is one of the best private colleges in West Bengal.

Placements: Around 60-70% of the students got placed in our course. The highest salary package offered was 8 LPA, and the lowest salary package offered was 2 LPA. Top recruiting companies in our college are TCS, Wipro, Infosys, Tech Mahindra, etc. Approximately 70% of the students got internships in many MNCs. Our course offers a good opportunity to get into the industry.

Infrastructure: We have the best laboratory and good classrooms. The library is also the best and is the biggest library among all the private colleges. There are total 11 hostels in our college including 3 girls hostel. The quality of the food served in our mess is also good. They provide free medical facilities, sports ground, and gymnasium.

Faculty: Faculty members in our college are the oldest, friendly and highly qualified. The course curriculum is relevant so that we can do that best in the future. Teachers always help us and in every class, there are 2 mentors to guide students.

Other: I took this course for my interest and passion in this course. If our college help us to implement more I think that will be better. Our college organised many events, tech fest. The most exciting feast of our college is Prayukti. Our college offers many scholarship and loans for students.

Review of Haldia Institute of Technology.

Placements: Almost 95% of the placements are done in CSE/IT/ECE and for core branches placement ratio is not good. But chemical and foot technology are the best branches for this college in West Bengal. Last year the highest salary package offered was 18 LPA, and the average salary package offered is 4.5 LPA. Top recruiters were Infosys, Wipro, Tech Mahindra, TCS, Haldia Petrochemical, IBM, Cognizant, Extramarks, Byju's, etc. The role offered was as a web development. The highest salary package offered is 24 LPA, and the average salary package offered is 4.5 LPA in CSE. Only CSE/IT students got internships from reputed companies.

Infrastructure: Our campus is spread in the area of 37 acres of land. The infrastructure of this college is the best in West Bengal. A big huge library is available here to study. Green

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

environment is available. Sports facility and labs should be updated. Wi-Fi facility is also available. Classrooms are good. Hostel facilities are good, but the quality of food served is average in the mess. Medical facilities are too good as one medical college is under ICARE, so HIT students get a free check-up or get free medicines. Sports facilities like cricket, badminton, volleyball, table tennis, kabbadi, etc. are available. The green group is available in this college.

Faculty: Teachers are well qualified from IIT and NIT. Other reputed colleges. Teaching quality is good. Students can interact with teachers. Students are industry-ready with our course curriculum. Students do project work in industry like web development or others.

Other: I chose this course because, at present, computer is the most important thing in our life. I'm very interested in the course. A technical fest called Prayukti is organised in this college. Other events are also organised.

I already mentioned that placement was good as compared to past placements in 2018.

Placements: In 2018, placement per cent was more than in past years. Most of the students got selected in top MNC companies like Infosys, Wipro, TCS, Mindtree, Accenture etc. Some students also got placed in local companies in Kolkata. Some of my friends got placed in Byjus too.

Infrastructure: I really enjoyed my hostel Life. The first time I was staying far from home, my roommates were behaving like brothers. Wi-Fi facilities, Labs, Classrooms, extra classes to cover up the doubts, all was available. The computer and lab facilities were good. I got good marks in lab exams.

Faculty: Faculty members were very expert in their subjects, If we were stuck in any topics, they solved our doubts. Computer labs were good, every computer was working, every student got good marks. I got the first rank in the 5th semester. Yes, the syllabus was related to the IT sector, how to achieve the goal. The passing percentage was 38.

Other: I really want to recommend that you can complete your B.Tech and M.Tech from this college.

★★★★☆ Placements 3 ★ Infrastructure 3 ★ Faculty & Course Curriculum 3 ★ Crowd & Campus Life 4 ★

It is an underrated college.

Placements: Around 60%-70% of the students got placed with the highest salary package of 18 LPA. The average salary package offered is 3 LPA, and the lowest salary package offered is 2 LPA. TCS, Infosys, Wipro, Cognizant, Goldman Sachs visit our college to hire students. Almost 80% of the students got internships in TCS, Wipro, Flipkart and Adobe. Top roles offered in B.Tech in information technology are data scientists and data analysts.

Infrastructure: The infrastructure of our college is good. It has a Wi-Fi facility 24x7, and it also has laboratories with equipment. There is a huge library for students. Hostel rooms and canteen are in good condition. HIT has a 33-acre massive campus with nearly all facilities. HIT also offers a world-class library equipped with all kinds of books, journals and daily 10-15 newspapers of different languages, which help students in their studies. It conducts a lot of sports events. It has 3 football grounds, a cricket ground, a basketball ground, a tennis cum badminton ground and a world-class gym.

Faculty: Faculty members are experts in their subjects. If we are stuck on any topics, they solve our doubts. Computer labs are good, and every computer is working, so every student gets good marks. When I needed help, there was always one or two teachers to help. Maximum teachers here are either from NITs, IITs or from Jadavpur University.

Other: I have chosen this course because I am interested in electrical engineering. I think there are many options after the completion of this course. You have the option to do a job in the private sector as well as in the government sector. You can also do a job in the IT sector. I wish in electrical engineering there should be many companies opportunities in India to acquire students from the college.

Review of HIT - Haldia Institute of Technology.

Placements: Approximately 60-70% of students got placed in the previous year, which is the best according to any other private college in Kolkata. CS, IT, and ECE branches have 80-90% of placements record every year. Students are eligible for campus placements from

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 09-Sep-2022.

the 6th semester. Many companies like Wipro, TCS, Infosys, Berger, Haldia petrochemical, Nestle, Adani, and many-core companies visit our college to hire students. The highest salary package offered is 20 LPA by the CSE student. The average salary package ranges from 4 LPA - 5 LPA. Almost 90% of students from our course are placed. Most of the students get placed in IT company. The highest salary package offered in our course is 12 LPA, and the lowest salary package offered is 3.5 LPA. Top recruiting companies like Samsung, TCS, and Infosys visit our campus for placements. Top roles are offered in our course. First of all the placements depends upon the market according to need, when the IT sector has a very high demand. Every student gets selected. It is best known for its core branches. Some core branches like chemical engineering, BT, FT, and AEIE have very good placements.

Infrastructure: The college has a good infrastructure. The college has occupied about 50 acres of land in which some space is occupied, and some space is not occupied. The college canteen serves average food quantity, and there are many canteens in our college. Students can play various sports in our college like cricket, football, hockey, and table tennis. This college is one of the best private colleges in West Bengal. It has great infrastructure, a big library names Aryabhata.

Faculty: Teachers are very helpful and caring. Students will get a lot to explore here in the coming four years. Some teachers are helpful, and some teachers are not helpful. Some teachers are well-qualified. They can make the students industry-ready. Students can easily pass the semester exam, because some questions are repeated from the previous year's exams. Class timing is from 9:50 AM to 5.00 PM. I have seen best to the worst faculty members in our department. If I take the name Shouvik Mallik in Power Electronics is a very good faculty out there. Students can learn a lot from him. Every teacher tries their best to help students. Most assistant professors are M.Tech with ongoing Ph.D. whereas, head of the department of is Ph.D. having enough experience to their respective field. The concept clearing capability of most of the teachers is good.

Other: I opted for this course, because ECE is known as the evergreen branch. I hope the college should improve laboratory facilities. The college is good. It organises various events, mostly in even semesters. If students belong to West Bengal, then they can get scholarships, or else students will not get them.

I am very much satisfied with this college.

Placements: More than 80% of the students got placed last year with the highest salary package of 40 LPA and the lowest salary package of 4 LPA. The average salary package offered is 6.3 LPA. Top recruiting companies here are Wipro, Tata Consultancy, Airtel, Asian Paints, Mahindra, etc. I have no idea about internships. Top courses offered are chemical, IT, CSE, ECE, etc.

Infrastructure: Facilities provided here are very good and useful. Wi-Fi is pretty much good. The library and a gymnasium are also available here. There is a swimming pool, but the hostel is of very poor quality. Beds offered are very old, and you will not get any kind of lockers. The food served in the mess is not much good.

Faculty: Teachers here are very helpful and always available for your help, but you will face a linguistic barrier as most of them have a Bengal accent. The curriculum is pretty much relevant. The difficulty level of semester exams varies between tough and moderate, and the pass percentage is 33%.

Other: I chose this core course because of NEET competitive exam.

It is a delightful and sporty campus.

Placements: The placement scenario in our college is quite decent and not quite good or not quite bad. One thing is that you must have to develop skills to be unique among the crowd. If you have great skills, you will be hired with handsome salary packages. Companies like IBM, TCS, Cognizant, Wipro, etc., visit our campus for placements.

Infrastructure: The infrastructure of our college is really good. You will enjoy this campus a lot compared to other colleges in West Bengal. The best part of our college is that it has residential accommodation for students on the campus, which is really good and safe for girls. There are many playgrounds for outdoor sports as well as a good number of courts. There is a huge library.

Faculty: Faculty members here are really good and experienced. They have great wisdom and knowledge. Some of them had completed their masters from renowned foreign universities and have great teaching experience. The curriculum of courses is organised really great here, and it is taught greatly to students.

Other: Our campus organises different types of fests and programmes for students. All fests are good, from cultural to sports, and they just make your college life awesome. You will also find many clubs and societies in our college.

manager in TCS.

Infrastructure: We have big classrooms with a fully Wi-Fi campus with a computer lab and an air-conditioned library. The hostel is neat and clean with proper cleanliness protocols and a canteen with good food at a reasonable price. For sports, the college has a football ground, badminton ground, and a basketball court. We also have a medical room with a medical practitioner available 24X7.

Faculty: Teachers are highly qualified and are from IITs. and are best at their field. The teaching quality is good and every topic is covered by teachers. The course curriculum is very relevant. It makes student industry-ready. Also there's are special classes for GATE exam preparations. The semester exams are moderate but it seems easy due to the teaching in the classes.

Other: According to the previous trend ECE is the best branch at AOT. The best things of ECE is that the best faculty with teachers from IIT. There is nothing to improve as the college updates itself with time. Many events take place regularly with a fest at end of the year. It has the best train connectivity.

to college yet. I heard from other students about these facilities. The mess provides better food than the canteen. We have medical facilities. The college organises sports too.

Faculty: Most of the teachers don't have the confidence to teach. They are poor at speaking English. But they are qualified enough to teach us, and the teachers are understanding too. A few are rude, but most of them are helpful. Semester exams are easy. The pass percentage is more than 90%.

Other: The best thing about the course is that I can get the best placements. If this college is in Bangalore, we could have got 12-20 LPA packages. Our college is underrated. But it is improving day by day, and that's a good sign.
