The college provides the best facilities.

Placements: We haven't got any company for the drives in our college to attend. If the drives have conducted in our college, maybe half of the percentage in our class get selected. As we haven't attended any drive, I don't know about the salary package. We have

many top recruiting companies for our course.

Infrastructure: I think we have chosen the best course, and we have good facilities for our course. Labs are good, and labs are provided with Wi-Fi facility. The library is available with many books, and also the systems are available in our library. The quality of the food will be good as I am a day scholar, so I don't have much knowledge about the hostel.

Faculty: Faculty members of our college are qualified, and their teaching will be knowledgeable and also helpful. The course curriculum is relevant, and I hope the students' will be ready-for-industry. Faculty members will always give their best, and they are always friendly with students.

Other: I think without our course there will be no machines working. All courses are important, but our courses play 1% more important role than the other, so I have chosen this course.

I am dissatisfied with the placements in the last year.

Placements: Almost 90% of students will join in our course. The highest salary package offered is 2.3 LPA. The lowest salary package offered is 1 LPA. The average salary package offered is 2 LPA. HCI and MNC companies visit our campus for placements of CSE branch. Roles like an assistant, etc., were offered to students, but not roles like HR, etc. Almost 25% of the students did an internship in HCL on their own. The college doesn't provide information about internships. Students do internships on their own.

Infrastructure: Facilities and infrastructure of our college are above average. There is a Wi-Fi network which is connected with Jio network. Labs are equipped Wi-Fi 24 hours for systems. Classrooms will have high security, and they are CCTV surveillance. The library is available here. Hostel facilities are average. The food served in the mess and canteen is good. Medical facilities are not available in our college. Sports and games are available here.

Faculty: Teachers in our college are very helpful and advise students. They had done their postgraduation, and they are highly qualified and knowledgeable. The teaching quality is very nice and easily understandable by everyone. This course is curriculum relevant, and it is very helpful. Moreover, it makes students highly qualified and ready for the industry ready as future software engineers.

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 17-Aug-2022.

Other: I have chosen this course to become a software engineer to implement new software, and it is my passion. The college should provide more internships, and that should be improved in our course. Events in our college are common. Fests are organised in our college for every two years. Extracurricular activities are not conducted here.

4.4

 Placements 4  Infrastructure 5  Faculty & Course Curriculum 5  Crowd & Campus Life 4 

I am satisfied with the college as I have learned a lot.

Placements: About 30-40% of students in our course got placed. The highest salary offered was Rs. 20,000 per month and the lowest salary offered was Rs. 12,000 per month. A top recruiting company of our course is Tata Communications. Top roles, like software engineer, associate engineer, boo and system analyst, are offered to the students. The highest salary package offered in our course is 3 LPA, and the lowest salary package offered is 1.2 LPA. About 20% of the students got an internship in companies like Entsquare and ABC For Technology.

Infrastructure: The college provides facilities like Wi-Fi and labs with a good environment. Classrooms are neatly maintained. There are many books in the library. Food served in the hostel is better not as much as good. Food served in the canteen is good, and we are very addicted. Medical facilities are perfect with good response. The college provides sports periods, and we will participate in games in events.

Faculty: Teachers in our college are very friendly and good. They are with us in every stage not only in studies they help us in any situation and stands by our side. They are highly knowledgeable. Each faculty has different interests, and they show much interest to make us learn. The course curriculum is relevant. It is a very important course to become software employee. There is good communication between teachers and students.

Other: I have chosen this course because I am interested in doing works as a software engineer. The best thing about this course is we can learn the subject to infinity because it has no limit and no end. Nothing should be improved in our course as everything is alright. The college conducts anniversary, farewell and fresher party. Many events are conducted by the management. Campus surroundings are very peaceful, and we enjoyed a lot. Many extracurricular activities are conducted in our college.

The lectures always helpful but not management.

Placements: Software developer, the highest salary is 6lpa Low sal is 12lpa We didn't get any placement in our College due pandemic we completed those days in at home only We didn't get any internship actually our college students don't know what is internship what are use of it. After completing of our college we get to know about internship, how Much that is important to software filed.

Infrastructure: Yes, we have all the facilities recording classroom labs system everything. But we don't have not that much hstl facilities the food nad mess canteen everything is absolutely fine but the dong have any medical facilities and sport and games but they will take us to hsptl if their is any emergency .

Faculty: The teacher are mostly friends with us they always share information in friendly manager and easy understand way, sssss they make student's are ready for industry. They will teach how to survive in compines we complete our semester with 90%of pass percentage.

Other: I am interested in software filled side that is one of major reason to choose the computer Science Group If I have chance to improved in our branch I will improve practically knowledge .

I am dissatisfied because of the placements provided in the previous year.

Placements: About 90% of the students got placed from our course. The highest salary offered is Rs. 75,000 per month. The average salary offered is Rs. 50,000 per month. HCL is the top recruiting company for my course. Many roles are provided for us like a software engineer, etc. The highest salary package offered here is 10 LPA, and the lowest salary package offered is 5 LPA. The average salary package offered is 8 LPA. Less percentage of students got internships in HCL company.

Infrastructure: Facilities available in our course are very useful to us like Wi-Fi to clear doubts when we have any and labs to utilise. The library has some books, which are useful.

Disclaimer: This PDF is auto-generated based on the information available on Shiksha as on 17-Aug-2022.

The quality of the facilities provided in our hostel is average. The quality of the food served is also average. Our college does not concentrate much on medical facilities as well as sports and games.

Faculty: Teachers here are helpful to us, and qualified staff members are available here. The teaching quality is average and not much good. The curriculum is relevant to the course, and it is not useful for us. To make students industry-ready, it is useful.

Other: I have chosen this course because I have a passion for it. The best things about my course are that we can be a software engineer as well as HR. I wish that our college should improve internships a lot. We enjoyed events a lot like fest organised for every 2 years.
