1.0 Rationale

It is a fact that a nation is progressive and developed in true sense when people are proud of being its citizens. India is one of the ancient nations which has survived, preserved and propagated her culture inspite of a very hard struggle for existence. She has survived because of the eternal values that she has cherished and developed since the time immemorial. Her culture is a living one rooted in a living past and based on undying spiritual foundation, which inspite of its ups and downs, has kept the lamp of the spirit burning. She has established the principle of spiritual oneness under the great variety found in the world, the world of thought as well as physical world. The study of one’s cultural heritage leads one to the appreciation of beauty and wisdom in life. Thus the knowledge of the cultural heritage of our great land is essential for each and every citizen of the country. No education can claim to be successful until and unless it is founded on the country’s cultural background and is able to fulfill the aspirations of its people.

2.0 Objectives

The main objectives of this course are –

- to develop among the learners a feeling of love and a sense of belongingness towards the nation.

Through this module our learners will know our ancestors who made immense contribution in the field of science and technology. The reference of great scientists will be made at proper places.

**Unit 17 : Science and Technology**

- Vedas as the supreme source of knowledge
- Achievements in Metallurgy – Iron Pillar at Mehrauli, Copper Statue of Buddha
- Aeronautical and Marine Times
- Mathematics
- Astronomy
- Astrology
- Physics
- Chemistry
- Natural Sciences and Ayur-Ved
- Concept of ecological Balance rooted in Traditions

**Unit 18 : Science and Scientists of Ancient India – I**

- Mathematics - India’s Numeral System – Baudhayana, Aryabhatta, Brahma, Bhaskaracharya
- Physics – Kanad, Varahmihir
- Chemistry - Nagarjuna
- Astronomy

**Unit 19 : Sciences and Scientists of Ancient India – II**

- Biology
- Surgery
- Sushrut
- Astrology - Phalit Jyotish
- Ayurved – Noteworthy Features of Ayurved, Charak
- Yog – Patanjali

**Unit 20 : Science and Scientists of Medieval India**

- Sciences in Medieval Period – Mathematics, Biology, Chemistry, Astronomy, Medicine, Agriculture
Unit 21 : Scientists of Modern India

- Srinivas Ramanujan
- Chandershekhar V. Raman
- Jagdish Chander Bose
- Homi Jehangir Bhabha
- Dr. Vikram Sarabhai
- Dr. A.P.J. Abdul Kalam
