For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Concentration in Professional and Technical Writing

This concentration in the graduate certificate in professional writing and editing may be pursued concurrently with any of several programs in English and elsewhere. Part of the coursework toward the concentration may be applied to those degrees with the approval of the director of the degree program. Students pursuing the certificate in professional and writing and editing with a concentration in professional and technical writing must complete 18 credits of English graduate courses with a minimum grade of 3.00 in each course.

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Concentration in Professional and Technical Writing (PTW)

This concentration in the graduate certificate in professional writing and editing may be pursued on a part-time basis only.

Coursework

Code	Title	Credits
ENGH 501	Introduction to Professional and Technical Writing [1]	3

Teaching English as a Second Language Graduate Certificate

Banner Code: LA-CERG-TESL

Academic Advising

4200 Horizon Hall
Fairfax Campus

Website: english.gmu.edu/programs/la-cerg-tesl

The graduate certificate in teaching English as a second language (TESL) prepares students to teach non-native speakers of English in the United States or abroad. Certificate courses fulfill, in part, requirements for an endorsement in English as a second language to the Virginia state teaching credential. Students who want to earn this endorsement should consult with an advisor.

The certificate may be pursued concurrently with any of several degree programs offered through the College of Education and Human Development, the English Department, and the Modern and Classical Languages Department. Part of the coursework toward the certificate may be applied toward degrees in those departments.

This certificate program qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the graduate certificate in teaching English as a second language, see Application Requirements and Deadlines (http://linguistics.gmu.edu/programs/LA-CERG-TESL/application/).

Policies

Students pursuing this certificate must complete 18 credits, earning a minimum grade of 3.00 in each course.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Coursework

Code	Title	Credits

LING 523	English Pronunciation and Pedagogy	3
LING 525	Practicum in ESL	3
LING 582	Second Language Acquisition	3
Total Credits		18

[1] This course may be waived if student is concurrently pursuing the English, MA with a concentration in linguistics.

Teaching English as a Second Language Minor

Banner Code: TESL

Academic Advising

4200 Horizon Hall
Fairfax Campus

Website: english.gmu.edu/programs/la-minor-engl-tesl

This minor helps prepare undergraduate students to teach non-native speakers of English in the United States or abroad. This course of study combines linguistic theory, second language acquisition theory, and ESL teaching methodology.

The minor may be pursued concurrently with any undergraduate major. English majors concentrating in linguistics can apply up to nine credits in LING used for the major to the TESL minor.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

[2] Students must have approval from the linguistics director to register for 500-level courses.

Writing and Rhetoric, PhD

Banner Code: LA-PHD-WRTR

Academic Advising

4200 Horizon Hall
Fairfax Campus

Email: wrphd@gmu.edu
Website: http://english.gmu.edu/programs/la-phd-wrtr

The doctoral program in writing and rhetoric offers a curriculum that emphasizes theoretical, practical, and productive approaches to composition, professional writing, and public rhetoric. The program is built on the premise that writing and teaching in twenty-first century organizations require the rigorous, integrated study of rhetoric, technology, pedagogy, culture, and research methodologies. In addition to our core curriculum, the program's proximity to Washington, D.C. makes it uniquely situated to provide opportunities for research and internships that go beyond and enrich the student's writing and rhetoric coursework.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Applicants to the PhD in Writing and Rhetoric must already have earned a master's degree in a relevant field before being admitted to the program.

For further information specific to the PhD in Writing and Rhetoric, see Application Requirements and Deadlines (http://english.gmu.edu/programs/la-phd-wrtr/application/) on the college website.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credit

Students must have a master's degree before being admitted to the PhD in Writing and Rhetoric. Most students receive a reduction of study of 30 credits based on their previous master's degree.

Program Requirements

To receive the PhD in Writing and Rhetoric, students complete a minimum of 78 credits of coursework, 48 beyond the master's degree. Beyond the basic coursework, a dissertation is required.

Requirements

Degree Requirements

Total credits: 78

Doctoral Coursework

Core Courses

Code	Title	Credits
ENGH 720	Histories of Institutional Rhetorics	3
ENGH 722	Composition Pedagogies and Programs in Context	3
ENGH 724	Professional Writing Theory and Research	3

Required Research Methods Course

Code	Title	Credits
ENGH 702	Research Methods in Rhetoric and Writing	3
Total Credits		3

Primary Focus Area

With a faculty advisor, students complete any combination of the following courses totaling 12 credits. The selected courses should form a consistent area of research around a specific object, practice, method, set of theories, or sub-field.

Code	Title	Credits
Select four courses from the following:		12
ENGH 602	Pedagogical Research	
ENGH 611	Studies in Rhetoric	
ENGH 615	Proseminar in Composition Instruction	
ENGH 620	Topics in Pedagogy	
ENGH 689	Advanced Proposal Writing	
ENGH 690	Special Topics in Writing and Rhetoric	
ENGH 697	Composition Theory	
ENGH 710	Core Readings in Writing Studies	
ENGH 820	Studies in Rhetorical Theory and Practice [1]	
ENGH 821	Writing Program Design and Administration	
ENGH 822	Studies in Composition [1]	
ENGH 824	Studies in Professional Writing [1]	
ENGH 826	Studies in Public Rhetorics [1]	
Total Credits		12

[1] May be repeated up to four times when topic differs.

Secondary Focus Area

The selected courses form a consistent secondary area of research that supports the student's primary area and developing research interests. It is strongly suggested that the secondary focus courses be taken in other programs or disciplines.

Code	Title	Credits

Electives

Code	Title	Credits
Students receiving a reduction of credit of less than 30 will complete the remaining credits through additional elective courses chosen in consultation with an advisor.		0-30
Total Credits		0-30

Advancement to Candidacy

Prior to beginning dissertation research (normally after completion of 66 hours of coursework), students will take a written examination, successful completion of which will demonstrate a qualification for advancement to candidacy. The examination will cover foundation knowledge acquired in the writing and rhetoric core courses and in the student's area of primary focus.

Dissertation

The dissertation process, which begins after the student has completed 66 credit hours and passed the written qualifying exam, includes an oral exam on the dissertation proposal, the production of the dissertation, and an oral defense of the dissertation. The student's progress at all stages will be evaluated by the dissertation committee. The dissertation should use theoretical, historical, qualitative, and/or quantitative methods to address a rhetorical problem within an institutional or public context that is framed within a disciplinary field. While these projects are often multidisciplinary in approach, they should address a gap in a discipline's research as well as solve a public rhetorical problem.

Once enrolled in ENGH 998 Doctoral Dissertation Proposal, students in this degree program must maintain continuous registration in ENGH 998 or ENGH 999 Doctoral Dissertation each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in ENGH 999, students must follow the university's continuous registration policy as specified in the Academic Policies section of the catalog. Students who defend in the summer must be registered for at least 1 credit of ENGH 999.

Code	Title	Credits
At least 3 credits of		3
ENGH 998	Doctoral Dissertation Proposal (3 credits required)	
At least 9 credits of		9
ENGH 999	Doctoral Dissertation (minimum of 9 credits)	
Total Credits		12

Department of History and Art History

3200 Horizon Hall
Fairfax Campus

Phone: 703-993-1250
Website: historyarthistory.gmu.edu

The department offers a number of degree programs, including undergraduate majors and minors in both history and art history, traditional and accelerated master of arts programs in both history and art history, and a doctoral degree in history. Additional programs include a dual master of arts in art history and arts management, and a graduate certificate in digital public humanities. The department coordinates the ancient history and Mediterranean archaeology minor. The minor in sport and American culture (https://historyarthistory.gmu.edu/programs/e1-minor-rht-samc/) is offered jointly by the Department of History and Art History and the School of Recreation, Health and Tourism.

Undergraduate Programs

History

Students in the Bachelor of Arts in History study a variety of places, from Africa to Asia to the Americas, Europe, and the Middle East, and historical time periods, from Greek and Roman antiquity to the late twentieth-century. They learn to interpret and evaluate the past by analyzing a variety of sources, from historical books and novels to images, films, oral interviews, newspapers, and other texts.

History majors have the opportunity to study with faculty who are internationally known for their work on the use of technology in the study of history. They can do an internship with one of them in the Center for History and New Media or at places like the Smithsonian Institution, the Library of Congress, or one of many other institutions in the Washington, D.C. area. There are also many opportunities to study abroad while earning credit towards the history major.

Advising

Students majoring or minoring in history are advised by the undergraduate director and a team of faculty advisors. History majors are urged to discuss their program of study periodically with the director.

Bachelor's/Accelerated Master's Programs

History, MA

The department offers highly qualified undergraduate majors in history the opportunity to apply to an accelerated master's degree program in history. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 138 credits. The BA and MA earned separately require 120 and 30 credits respectively.

MEd in Curriculum and Instruction (concentration in secondary education history and social science)

The Department of History and Art History and the Graduate School of Education jointly offer an accelerated MEd option for history majors. A BA in History and an MEd in Curriculum and Instruction with a concentration in secondary education history and social science can be earned after satisfactory completion of 138 credits.

Art History

The department offers highly qualified undergraduates in any major the opportunity to apply to an accelerated master's degree program in art history. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 138 credits, generally within five years.

Graduate Programs

History

The department offers a master's and a doctoral degree in history. In both programs, students select a specialization in American history, European history, or world history. Master's degree students choose from one of five concentrations: predoctoral history, applied history, enrichment, higher education, or teaching. Doctoral students focus their studies in one of four areas: college/university teaching, new media and information technology, public and applied history, or preprofessional development.

Graduate students in history have the opportunity to take courses in new media, studying with faculty who are internationally known for their use of technology in the study of history. Many students work alongside the faculty in the Center for History and New Media (https://rrchnm.org/), a leader in the use of digital media and computer technology to democratize history. The center uses digital media and technology to preserve and present history online, transform scholarship across the humanities, and advance historical education and understanding.

Students can do an internship in applied history at one of the many institutions in the Washington, D.C. area or study abroad while earning credit towards their degrees.

Art History

The department offers a richly interdisciplinary master's degree in art history. It draws on faculty strengths in traditional research and new media and the vast cultural resources of the Washington, D.C. area. Students learn methods of art historical analysis, a variety of art historical interpretations, and practical applications of the field. The program places a special emphasis on the development of skills in new media, museology, and pre-professional internships - program features that are unique to this region.

The master's degree in art history is designed to meet the needs of a student population with diverse interests and career goals. Because of the focus on skill building in traditional research as well as new media, graduates of this program have the tools necessary for independent research, professional work, and the dissemination of knowledge in art history.

Funding

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Ancient History and Mediterranean Archaeology Minor

Banner Code: AHMA

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: https://historyarthistory.gmu.edu/programs/la-minor-hist-ahma

This interdisciplinary minor is for students with diverse interests in the material culture of the ancient world. Coursework combines the study of archaeology, literature, art, history, philosophy, myth, and religion. The scope of the minor is not limited to Greece and Rome but touches on all the ancient civilizations of the Mediterranean and the heirs of late antiquity such as Byzantium and early Islam.

The minor represents foundation work crucial to graduate study in traditional departments of classical, near Eastern, or Mediterranean art and archaeology. Students should consult with the director for help in choosing a program of study that will complement their major.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Art History, BA

Banner Code: LA-BA-AH

3200 Horizon Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-ba-ah

Art History emphasizes the analysis of visual data in a historical context. Faculty expertise extends to many world regions—the United States, Latin America, Europe, the Mediterranean, South and Southeast Asia, China, and the Islamic world—and over all historical periods. Students apply what they learn through internship opportunities available in the Washington DC area, including the world-famous collections of the National Gallery of Art and the Smithsonian Institutions. Students go on to work in areas including museums, arts institutions, galleries, government and managerial positions. They also pursue further studies in fields including art history, library science, design technology, historic preservation, and fashion.

Admissions & Policies

Policies

Students pursuing this degree must complete 33 to 34 credits within the major, with a minimum GPA of 2.00. Up to 6 credits in art history internships may be applied toward ARTH requirements for the major, with permission of the art history undergraduate director. A maximum of 6 credits of ARTH 398 Study Abroad in the History of Art may be applied to the major with permission of department.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

All art history majors are encouraged to pursue internships in art history (ARTH 393 Art History Internships) in their junior or senior year. Students are strongly encouraged to participate in a study abroad program. Students contemplating graduate study in art history should acquire a reading knowledge of French, German, or other appropriate research languages in consultation with an advisor.

Core Courses in the Major

Code	Title	Credits
Select one 3-credit survey course from the following:		3
ARTH 200	History of Western Art I (Mason Core)

Total Credits		9-10

Elective in the Major

Code	Title	Credits
Select one 3-credit elective from any art history course		3
Total Credits		3

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as "writing intensive" in their majors at the 300 level or above. Students majoring in art history fulfill the university's writing-intensive requirement by successfully completing 3 credits in any 400-level ARTH course.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3

ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in Art History Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Honors

Honors in the Major

Eligibility

Majors who have completed 75 credits (a minimum of 15 credits in art history, with 6 credits taken at Mason) with an overall GPA of 3.50 and a GPA of 3.80 in art history are eligible to apply to graduate with honors in art history. Eligible students should apply to the undergraduate director by November 15 or April 15 with a statement of application including the names of two references from Mason art history faculty members. Transfer students should also submit transcripts. Not all applicants who meet the minimum requirements are guaranteed acceptance into honors in the major.

Honors Requirements

Students pursuing honors in the major complete ARTH 492 Honors Directed Readings and ARTH 493 Honors Directed Research, linked individualized courses that culminate in a research paper. Students must have completed at least 3 credits in the field (or with the professor) chosen for these honors courses. ARTH 492 Honors Directed Readings should be taken before ARTH 493 Honors Directed Research, but they may be taken concurrently. To graduate with honors in the major, students must earn a minimum GPA of 3.50 in honors courses and a minimum GPA of 3.50 in art history courses applied to the degree. The two honors courses (6 credits) may be applied toward the requirement of 33- to 34-credits in art history, but they cannot replace the 6 required credits in the following:

Code	Title	Credits
ARTH 400	Historiography and Methods of Research in Art History (Topic Varies)	3
ARTH 420	Advanced Studies in Ancient Art	3
ARTH 430	Advanced Studies in Medieval or Islamic Art	3
ARTH 440	RS: Advanced Studies in Renaissance and Baroque Art	3

ARTH 460	RS: Advanced Studies in 20th-Century European Art	3
ARTH 471	Advanced Studies in Art of the United States	3
ARTH 472	RS: Advanced Studies in 20th-Century Latin American Art	3
ARTH 474	Advanced Studies in Contemporary Art	3
ARTH 482	RS: Advanced Studies in Asian Art	3
ARTH 495	RS: Objects and Archives in Art History	3
ARTH 499	Advanced Studies in Art History	3
ARTH 599	Special Topics in Art History	1-6

Accelerated Master's

Many accelerated master's programs are available for any bachelor's degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Bachelor's Degree (any)/Art History, Accelerated MA

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and an MA in Art History in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Polices and Bachelor's/Accelerated Master's Degree policies. For information specific to the accelerated MA in Art History, see Application Requirements and Deadlines (https://historyarthistory.gmu.edu/programs/LA-MA-ACEL-AH/application/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits and meeting with the Art History BAM coordinator, undergraduate director and graduate director.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.50
- Completion of at least two 300-level art history courses with a minimum grade of B+ in each
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

ARTH 599 Special Topics in Art History (may be repeated for up to 12 credits when topic differs)
ARTH 600 Methods and Research in Art History (3 credits)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

ARTH 599 Special Topics in Art History (may be repeated for up to 6 credits when topic differs)

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Art History, MA

Banner Code: LA-MA-AH

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-ma-ah

Art History MA students combine traditional research with the application of new media, while accessing the opportunities offered through the cultural resources of the Washington, D.C. area. The program emphasizes new media skills, museum studies, and pre-professional internship training. Students study a broad range of art-historical periods, theory, and research methods. Faculty specialize in periods from ancient to contemporary, and in areas covering Europe, North and South America, Asia, and the Middle East. Graduates are well-prepared for art museum and gallery professional work, where a master's degree is now routinely required, or for further study in doctoral programs.

Admissions & Policies

Admissions

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. For information specific to the MA in Art History, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/la-ma-ah/application/).

Policies

For policies governing all graduate degrees, see Graduate Policies.

This program does not permit a reduction of credit based on a previously-conferred graduate degree.

Requirements

Degree Requirements

Total credits: 30

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
ARTH 600	Methods and Research in Art History	3
ARTH 601	Colloquium in Art History	3
ARTH 599	Special Topics in Art History	3
or ARTH 699	Topics in Art History	
Total Credits		9

Applied Preprofessional Learning

Code	Title	Credits
Three credits in one of the following:		3
ARTH 593	Internship in Art History	
ARTH 594	The Museum	
Other coursework approved by the program director [1]		
Total Credits		3

[1] Students who enter the MA program through the accelerated MA option, and received credit for ARTH 394 The Museum (Mason Core) as an undergraduate, are expected to fulfill this requirement with an internship or alternate course rather than ARTH 594 The Museum.

Technology and New Media

Code	Title	Credits
HIST 696	Clio Wired: An Introduction to History and New Media	3
or HIST 697	Creating Historical Knowledge using Digital Methods	
or HIST 680	Introduction to Digital Humanities	
Total Credits		3

Electives

Code	Title	Credits
Select four to five electives [1]		12-15
HIST courses		
ARTH courses		
AVT courses [2]		
ANTH courses [2]		
CULT courses [2]		
Total Credits		12-15

[1] Students who choose to write a thesis complete 12 elective credits; others complete 15.

[2] Students may choose electives in AVT, ANTH, or CULT with prior written permission of the graduate director.

Research Language Proficiency

Students must demonstrate reading ability in one relevant research language that must be approved by the graduate director. To meet this requirement, students must either achieve a satisfactory score on a proficiency exam or present coursework equivalent to a grade of B or better in an intermediate-level foreign language course (202 or higher at George Mason).

Written Comprehensive Exam

Students who do not pass may retake the exam once, following the original process. The second exam must be taken within 12 months of the first exam.

Optional Thesis

Students who choose to write a thesis should be aware of the policies governing theses as stated in AP.6.9.3 Master's Thesis policies. They must follow the thesis enrollment policy of the university and once enrolled in ARTH 799 Master's Thesis, maintain continuous enrollment.

Code	Title	Credits
Three credits of		3
ARTH 799	Master's Thesis	
Total Credits		3

Accelerated Master's

Bachelor's Degree (any)/Art History, Accelerated MA

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and an MA in Art History in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Polices and Bachelor's/Accelerated Master's Degree policies. For information specific to the accelerated MA in Art History, see Application Requirements and Deadlines (https://historyarthistory.gmu.edu/programs/LA-MA-ACEL-AH/application/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits and meeting with the Art History BAM coordinator, undergraduate director and graduate director.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.50
- Completion of at least two 300-level art history courses with a minimum grade of B+ in each
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

ARTH 599 Special Topics in Art History (may be repeated for up to 12 credits when topic differs)
ARTH 600 Methods and Research in Art History (3 credits)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

ARTH 599 Special Topics in Art History (may be repeated for up to 6 credits when topic differs)

Digital Humanities Minor

Banner Code: DGH

Abby Mullen

473 Research Hall
Fairfax Campus

Email: amullen2@gmu.edu
Website: https://historyarthistory.gmu.edu/programs/la-minor-la-dgh

Overview

The Digital Humanities minor is designed to help students expand their ability to make humanities arguments using digital tools. This minor takes an interdisciplinary, expansive view of the humanities, including courses from across the college. Students will learn how to interpret, analyze, and use digital methods to communicate in new and innovative ways, including skills such as digital rhetoric, podcast creation, mapping, and data visualization.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 16

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Digital Public Humanities Graduate Certificate

Banner Code: LA-CERG-DPH

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-cerg-dph

The graduate certificate in digital public humanities is a fully online program that trains students in a wide range of digital tools that are in increasingly high demand in humanities careers. Students will use these tools in developing their own digital projects, thus enhancing their professional portfolio. Students will also gain professional experience through an internship with the Smithsonian Institution, focused on applying skills learned from coursework. Internships will be coordinated remotely, allowing students to work from their locations.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the graduate certificate in cognitive neuroscience, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/la-cerg-dph/application/).

Policies

Students pursuing this certificate must complete 15 credits of history graduate courses with a minimum grade of 3.00 in each course.

For policies governing all certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a part-time basis only.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Health, Disease, and Culture Minor

Banner Code: HDC

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: https://historyarthistory.gmu.edu/programs/la-minor-hist-hdc

The Health, Disease, and Culture minor provides students with a multidisciplinary understanding of the social construction of health and diseases in modern and historical societies. A combination of courses in health, humanities, and social sciences allows for a view of health and disease from both a contemporary and historical lens with a variety of disciplinary perspectives.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00.

For policies governing all minors, see AP.5.3.4 Minors.

History Minor

Banner Code: HIST

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-minor-hist-hist

The history minor allows majors in other disciplines to round out their education by completing a three-course concentration in the history of a world region and taking three additional history courses of their own choosing. History minors have opportunities to conduct independent research, engage in globally relevant activities through coursework and language study at Mason and abroad, and prepare for their future careers through internships and other college-to-career activities.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. Of the 18 credits applied to the minor, 12 credits must be at the 300 or 400-level.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
Select three courses (9 credits) concentrated in a region or topic.		9
Total Credits		9

Students choose courses to meet this requirement that are concentrated in a region or topic. The region or topic should relate, if possible, to their major. Lists of courses, by region, can be found in the BA in history without concentration degree requirements. Students should review their plan with the director of the minor.

Electives

Code	Title	Credits
Select three electives (9 credits) in History		9
Total Credits		9

In addition to HIST courses, students may use HNRS 240 Reading the Past (Topic Varies) to fulfill this requirement.

History, BA

Banner Code: LA-BA-HIST

3200 Horizon Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-ba-hist

The Bachelor of Arts in History looks at the range of human experience: how people have lived in the past, how they live and coexist in the present, and the links between the two. Students learn to interpret the past by examining a variety of original sources: newspapers, letters and diaries, literature, government records, images, films, oral interviews,

and more. Majors hone their skills in collecting, interpreting, and communicating information. Majors move on to careers in government, law, and management, as well as teaching and graduate study.

Admissions & Policies

Policies

Students pursuing this degree must complete 36 credits within the major with at least 18 credits at the 300 and 400 levels. Additional credits of history in excess of 36 may be presented as elective credits to be counted toward graduation. Students must have a minimum GPA of 2.00 in courses applied to the major.

HIST 300 Introduction to Historical Method (Mason Core) and HIST 499 RS: Senior Seminar in History (Mason Core) may not be used to satisfy the geographic distribution requirements in U.S. history, European history, and global, Latin American, African, Asian, or Middle Eastern history. No more than 3 credits of ARTH coursework may apply to the History BA. For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Before registering, students should see an advisor to help plan their history program to meet Mason Core and college-level requirements. The advisor also can help students choose electives or a minor.

Major without Concentration

Electives in the Major

Students may also meet the elective requirement by completing an optional concentration.

Code	Title	Credits
Select four electives in history [1]		12
Total Credits		12

[1] Students should choose courses in history at the 300 or 400 levels to meet this requirement if they need credits to complete the 18-credit, upper-level history requirement. In addition to HIST courses, history majors may use one 300-level ARTH course and HNRS 240 Reading the Past (Topic Varies) to fulfill this requirement.

Major with Concentration

Available Concentrations

- Concentration in Digital History (HISD)
- Concentration in Public History (HISP)
- Concentration in Global History (HISG)
- Concentration in U.S. History (HISU)
- Individualized Concentration (IND)

Concentration in Digital History (HISD)

In this concentration, students explore and develop skills in using digital methods for the research, analysis, and presentation of history. Students interested in graduate education or careers in the digital humanities and new media or in working with digital methods in museums, archives, and other public history institutions should consider this concentration.

Core Courses

Code	Title	Credits
HIST 300	Introduction to Historical Method (Mason Core)	3
HIST 499	RS: Senior Seminar in History (Mason Core)	3
HIST 390	The Digital Past	3
Select three electives with at least 6 credits in HIST from the following:		9
HIST 395	Topics in Digital History	
ENGH 375	Web Authoring and Design	
ENGH 376	Rhetoric and New Media	
other coursework, including internships, approved by the program director		
Total Credits		18

HIST 465	The Middle East in the 20th Century	
Total Credits		6

Concentration in Public History (HISP)

In this concentration, students explore a variety of issues related to preserving historical materials and presenting historical information to a broader public. Students interested in graduate education in public history or in working in public history institutions such as museums, libraries, archives, and historic sites should consider this concentration.

Core Courses

Code	Title	Credits
HIST 300	Introduction to Historical Method (Mason Core)	3
HIST 499	RS: Senior Seminar in History (Mason Core)	3
HIST 396	Introduction to Public History	3
HIST 390	The Digital Past	3
HIST 399	Internship [1]	3
Select one elective from the following:		3
HIST 397	Topics in Public History	
HIST 380	Uncovering the U.S. Past Through Film	
ARTH 394	The Museum (Mason Core)	
ENGH 370	Introduction to Documentary (Mason Core)	
other coursework, not including internships, approved by the program director		
Total Credits		18

[1] Students work individually with the department's internship coordinator to find appropriate internships. HIST 399 may be repeated up to a maximum of 9 credits, and students in the public history concentration are encouraged to take more than 3 credits of internships, with additional credits beyond the first 3 counting as general electives.

Concentration in Global History (HISG)

In this concentration, students explore the interconnected histories of major world regions beyond the United States and Europe. Students interested in graduate education in global history or careers in government or business or with non-governmental organizations or other employers operating in the international arena should consider this concentration. Students in the global history concentration are especially encouraged to study abroad as part of their undergraduate program.

Core Courses

Code	Title	Credits
HIST 300	Introduction to Historical Method (Mason Core)	3
HIST 499	RS: Senior Seminar in History (Mason Core)	3
HIST 394	Globalization and History	3
Select five courses chosen from the following lists. Three of the five courses must be chosen from one of the following areas: Asian, African, Latin American, Middle Eastern and North African, or Russian and Central Asian history. No more than 3 credits of ARTH coursework may apply to the History BA.		15
Asian History		
HIST 251	Survey of East Asian History (Mason Core)	
HIST 252	Survey of East Asian History (Mason Core)	
HIST 353	History of Traditional China	
HIST 354	Modern China (Mason Core)	
HIST 356	Modern Japan (Mason Core)	
HIST 357	Postwar Japan (Mason Core)	
HIST 358	Post-1949 China (Mason Core)	
HIST 387	Topics in Global History (Mason Core) [1]	
Other HIST coursework approved by the program director		
ARTH 203	Survey of Asian Art (Mason Core)	
ARTH 382	Arts of India (Mason Core)

ARTH 384	Arts of China (Mason Core)	
ARTH 385	Arts of Japan (Mason Core)	
African History		
HIST 261	Survey of African History (Mason Core)	
HIST 262	Survey of African History (Mason Core)	
HIST 360	History of South Africa (Mason Core)	
HIST 366	Comparative Slavery	
HIST 387	Topics in Global History (Mason Core) [1]	
Other HIST coursework approved by the program director		
ARTH 206	Survey of African Art (Mason Core)	
Latin American History		
HIST 271	Survey of Latin American History (Mason Core)	
HIST 272	Survey of Latin American History (Mason Core)	
HIST 364	Revolution and Radical Politics in Latin America (Mason Core)	
HIST 365	Conquest and Colonization in Latin America (Mason Core)	
HIST 366	Comparative Slavery	
HIST 367	History, Fiction, and Film in Latin America	
HIST 387	Topics in Global History (Mason Core) [1]	
Other HIST coursework approved by the program director		
ARTH 204	Survey of Latin American Art (Mason Core)	
Middle Eastern & North African History		

HIST 281	Survey of Middle Eastern Civilization (Mason Core)	
HIST 282	Survey of Middle Eastern Civilization (Mason Core)	
HIST 359	Modern Iraq	
HIST 460	Modern Iran (Mason Core)	
HIST 461	Arab-Israeli Conflict	
HIST 462	Women in Islamic Society (Mason Core)	
HIST 465	The Middle East in the 20th Century	
HIST 387	Topics in Global History (Mason Core) [1]	
Other HIST coursework approved by the program director		
ARTH 318	Art and Archaeology of Ancient Egypt	
ARTH 319	Art and Archaeology of the Ancient Near East (Mason Core)	
ARTH 320	Art of the Islamic World (Mason Core)	
Russian & Central Asian History		
HIST 326	Stalinism	
HIST 327	The Soviet Union and Russia Since World War II	
HIST 328	Rise of Russia (Mason Core)	
HIST 329	Modern Russia and the Soviet Union (Mason Core)	
HIST 426	The Russian Revolution	
HIST 387	Topics in Global History (Mason Core) [1]	
Other HIST coursework approved by the program director		
ARTH 386	The Silk Road (Mason Core)	
World History		
HIST 125	Introduction to World History (Mason Core)	
HIST 384	Global History of Christianity (Mason Core)	
HIST 387	Topics in Global History (Mason Core) [1]	
Other HIST coursework approved by the program director		
Optional foreign language skills development course in history [2]		1
HIST 386	Topics in History	
Select four electives in history [3]		11-12
Total Credits		36

1 Depending on topic.

2 Working individually with their instructor for an upper-level HIST course, students may pursue historical reading or other work to develop skills in an appropriate foreign language in which they have already met the CHSS requirement for intermediate-level proficiency.

3 Students should choose courses in history at the 300- or 400-levels to meet this requirement if they need to complete the 18-credit, upper-level history requirement. In addition to HIST courses, students may apply HNRS 240 Reading the Past (Topic Varies) and/or one 300-level ARTH course not counted above toward this requirement. In total, no more than 3 credits of ARTH may be applied to the history BA.

Concentration in U.S. History (HISU)

In this concentration, students focus in-depth on the history of the United States while developing research and writing skills and completing at least one course in applied history. Students interested in law, government, and other career paths or in graduate education in U.S. history should consider this concentration.

Core Courses

Code	Title	Credits
HIST 300	Introduction to Historical Method (Mason Core)	3
HIST 499	RS: Senior Seminar in History (Mason Core)	3
Select one applied history elective from the following:		3
HIST 390	The Digital Past	
HIST 395	Topics in Digital History	
HIST 396	Introduction to Public History	
HIST 397	Topics in Public History	
HIST 399	Internship	
Total Credits		9

U.S. History

Code	Title	Credits
Select five U.S. history courses from the following, with at least two from each list.		15
Origins to 1877		
HIST 121	Formation of the American Republic (Mason Core)	
HIST 335	The African American Experience in the United States: African Background to 1885	
HIST 350	U.S. Women's History	
HIST 351	History of the Old South	
HIST 370	War and American Society	
HIST 373	The Civil War and Reconstruction	
HIST 391	History of Virginia to 1800	
HIST 401	Colonial America	
HIST 403	Revolutionary Era in American History, 1763-1812	
HIST 404	Jacksonian America, 1812-1854	
HIST 389	Topics in U.S. History [1]	
1877 - Present		
HIST 122	Development of Modern America (Mason Core)	
HIST 334	American Scriptures (Mason Core)	
HIST 336	The African American Experience in the United States: Reconstruction to the Present	
HIST 339	History of Baseball	
HIST 340	Basketball and the American Experience	
HIST 341	History of Sport in the United States	
HIST 342	History of the Olympics and the United States	
HIST 343	Women during the Enslavement Era	
HIST 344	Black Social Movements	
HIST 345	Women's Activism: From Jim Crow to Black Power	
HIST 350	U.S. Women's History	
HIST 352	The South since 1865	

HIST 370	War and American Society	
HIST 377	The Vietnam War	
HIST 378	History of Aviation	
HIST 380	Uncovering the U.S. Past Through Film	
HIST 392	History of Virginia Since 1800	
HIST 389	Topics in U.S. History [1]	
Total Credits		15

[1] When topic applies and with department approval.

European History

Code	Title	Credits
Select two courses from the following:		6
HIST 100	History of Western Civilization (Mason Core) [1]	
HIST 101	Foundations of Western Civilization	
HIST 102	Development of Western Civilization	
HIST 301	Classical Greece	
HIST 302	Classical Rome	
HIST 304	Western Europe in the Middle Ages	
HIST 305	The Renaissance	
HIST 306	The Reformation	
HIST 307	Old Regime and Revolutionary Europe	
HIST 308	Nineteenth-Century Europe	
HIST 309	Europe in Crisis: 1914-1948	
HIST 312	Nationalism in Eastern Europe	
HIST 314	History of Germany	
HIST 321	Modern France	
HIST 322	Modern Britain	
HIST 326	Stalinism	
HIST 327	The Soviet Union and Russia Since World War II	
HIST 328	Rise of Russia (Mason Core)	
HIST 329	Modern Russia and the Soviet Union (Mason Core)	
HIST 388	Topics in European History	
HIST 426	The Russian Revolution	
HIST 436	European Society and Culture: 19th and 20th Centuries	
Total Credits		6

[1] Used to fulfill the Mason Core requirement in Western civilization may also fulfill 3 credits of this requirement

Global, Latin American, African, Asian, or Middle Eastern History

Students in the concentration in U.S. History are encouraged to take at least one course with a broadly global perspective such as HIST 394 Globalization and History. Approved courses in history used to fulfill the Mason Core requirement in global understanding and the college-level requirement in non-Western culture may be used to fulfill this requirement.

Code	Title	Credits
Select two courses from the following:		6
HIST 125	Introduction to World History (Mason Core)	
HIST 202	Freshman/Sophomore Seminar in Global History	
HIST 251	Survey of East Asian History (Mason Core)	
HIST 252	Survey of East Asian History (Mason Core)	
HIST 261	Survey of African History (Mason Core)	
HIST 262	Survey of African History (Mason Core)	
HIST 271	Survey of Latin American History (Mason Core)	
HIST 272	Survey of Latin American History (Mason Core)	
HIST 281	Survey of Middle Eastern Civilization (Mason Core)	
HIST 282	Survey of Middle Eastern Civilization (Mason Core)	
HIST 353	History of Traditional China	
HIST 354	Modern China (Mason Core)	
HIST 356	Modern Japan (Mason Core)	
HIST 357	Postwar Japan (Mason Core)	
HIST 358	Post-1949 China (Mason Core)	
HIST 359	Modern Iraq	
HIST 360	History of South Africa (Mason Core)	
HIST 364	Revolution and Radical Politics in Latin America (Mason Core)	
HIST 365	Conquest and Colonization in Latin America (Mason Core)	
HIST 366	Comparative Slavery	
HIST 367	History, Fiction, and Film in Latin America	
HIST 384	Global History of Christianity (Mason Core)	
HIST 387	Topics in Global History (Mason Core)	
HIST 394	Globalization and History	
HIST 460	Modern Iran (Mason Core)	
HIST 461	Arab-Israeli Conflict	
HIST 462	Women in Islamic Society (Mason Core)	
HIST 465	The Middle East in the 20th Century	
Total Credits		6

Individualized Concentration (IND)

Students who wish to design their own concentration must submit a one-page proposal and create a curriculum plan to be approved by the program director. This option may be particularly appropriate for students who want to focus on U.S. history or European history without emphasis on digital or public history methods.

All students in the individualized concentration will be required to complete HIST 300 Introduction to Historical Method (Mason Core), HIST 499 RS: Senior Seminar in History (Mason Core), and 15-18 credits of breadth requirements modeled on the geographic distribution coursework in the history BA without concentration. For their remaining 12-15 credits in history, students will work with the program director to plan coursework that explores their chosen concentration across time periods and geographical lines as appropriate.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as "writing intensive" in their majors at the 300 level or above. Students majoring in history may fulfill this requirement by successfully completing:

Code	Title	Credits
HIST 300	Introduction to Historical Method (Mason Core)	3
or HIST 499	RS: Senior Seminar in History (Mason Core)	
Total Credits		3

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		

ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in History Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Honors

Honors in the Major

History majors who have completed 75 credits (a minimum of 15 in history, 6 of which must have been taken at Mason) with an overall GPA of 3.50 and a GPA of 3.50 in history courses are eligible to apply to graduate with honors in history. Applicants must have completed or be enrolled in HIST 300 Introduction to Historical Method (Mason Core). The statement of application should include references from at least one Mason history faculty member. If a major part of the student's work includes transfer credit, transcripts may be required. Not all applicants who meet the minimum requirements are guaranteed acceptance into honors in the major.

Students pursuing honors in the major will take a two-semester course sequence: HIST 490 Honors Directed Readings and HIST 491 Honors Directed Research. HIST 490 Honors Directed Readings will focus on the design of a major research project and HIST 491 Honors Directed Research will focus on completing that project. To graduate with honors in the major, students must earn a minimum GPA of 3.50 in the honors courses and a minimum GPA of 3.50 in history courses applied to the degree. A grade of B or higher in HIST 490 Honors Directed Readings is required to proceed to HIST 491 Honors Directed Research. The two honors courses (6 credits) may be applied to the requirement of 36 credits in history and successful completion of HIST 491 Honors Directed Research satisfies the seminar course requirement in place of HIST 499 RS: Senior Seminar in History (Mason Core).

Accelerated Master's

The accelerated master's programs listed below specify the BA in history as a feeder degree for their programs. Many other accelerated master's programs are also available for any bachelor's degree at

Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

History, BA/History, Accelerated MA

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA in History and an MA in History in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/la-ma-acel-hist/application/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, including HIST 300 Introduction to Historical Method (Mason Core) with a minimum grade of B+.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Completion of a HIST 499 RS: Senior Seminar in History (Mason Core) or HIST 491 Honors Directed Research
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

500- or 600-level HIST courses (https://catalog.gmu.edu/courses/hist/)
HIST 610 The Study and Writing of History is preferred, but not required

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

500- or 600-level HIST courses (https://catalog.gmu.edu/courses/hist/)

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

History, BA/Curriculum and Instruction, Accelerated MEd (Secondary Education History and Social Science Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's option and obtain a BA in History and an MEd in Curriculum and Instruction (Secondary Education History and Social Science concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/)in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered jointly by the Department of History and Art History and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can

be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 567	Teaching Social Studies in the Secondary School	3
SEED 667	Advanced Methods of Teaching Social Sciences in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

History, MA

Banner Code: LA-MA-HIST

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-ma-hist

The faculty in the Master of Arts in History program are at the forefront of traditional historical study, digital approaches to the past, and applied history. Students select from a variety of course topics while also selecting an area of historical specialization that accommodates their interests and furthers their career objectives. Students come to the program with diverse career objectives, and the program is designed with that diversity in mind. Students take classes in which they discuss history alongside future academics, public historians, teachers, military officers, non-profit professionals, government officials, entrepreneurs, and future academics.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For specific information, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/application/LA-MA-HIST/) on the departmental website.

Policies

For policies governing all graduate degrees, see Graduate Policies.

Reduction of Credit

The program does not permit a reduction of credit based on a previously conferred graduate degree. Students may apply no more than 6 credits earned through study abroad courses toward their degree.

Satisfactory Progress

According to university policy, students may be terminated if they fail to achieve satisfactory progress toward their degree. Students in the program are judged as having failed to achieve satisfactory progress toward their degree for any one of the following reasons:

- Fail to complete HIST 610 The Study and Writing of History with a satisfactory grade within 2 semesters of first enrolling as degree-seeking students in the MA in history program.
- Accumulate grades of F in two graduate courses or 9 credits of unsatisfactory grades in graduate courses.
- Accumulate 12 credits of grades of B- or below in graduate courses.

Requirements

Degree Requirements

Total credits: 30 or 36

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students pursuing this degree must complete the requirements for one of the concentrations below. The concentrations in higher education and teaching require 36 credits, all others require 30 credits.

Concentrations

- Concentration in Predoctoral History (AH1, EH1, WH1)
- Concentration in Applied History (AH2, EH2, WH2)
- Concentration in Applied History with New Media and Information Technology Emphasis (AH4, EH4, WH4)
- Concentration in Enrichment (AH3, EH3, WH3)
- Concentration in Higher Education (HEDU)
- Concentration in Teaching (HS4)

Concentration in Predoctoral History (AH1, EH1, WH1)

This concentration is for students planning to pursue doctoral studies. Students choose one of three geographic specializations and a chronological or thematic minor field within that specialization. Students complete coursework and a research seminar in their geographic specialization and an additional independent project or thesis in their minor field.

Required Course

Code	Title	Credits
HIST 610	The Study and Writing of History [1]	3
Total Credits		3

[1] Must be taken within the first 9 credits

Specialization

Students complete one of the following geographic specializations.

Specialization in U.S. History

Code	Title	Credits
Select four courses from the following: [1]		12
Origins to 1861		
HIST 613	Colonial North America	
HIST 618	The Age of Jackson, 1815-1854	

HIST 620	Development of the Early Republic, 1783-1815
HIST 627	Disasters in U.S. History
HIST 631	Era of the American Revolution
HIST 661	Religion in North America to 1870
HIST 664	Indigenous North America
HIST 615	Problems in American History (when topic applies and with department approval)
Other appropriate course with department approval	
1861-1914	
HIST 617	Topics in the American Civil War Era
HIST 622	U.S. South Since 1865
HIST 627	Disasters in U.S. History
HIST 629	The Gilded Age and Progressive Era
HIST 633	Reconstruction Era
HIST 662	U.S. Religion since 1870
HIST 664	Indigenous North America
HIST 615	Problems in American History (when topic applies and with department approval)
Other appropriate course with department approval	
1914 World War I to the Present	
HIST 622	U.S. South Since 1865
HIST 623	Recent U.S. History, 1945 to Present
HIST 627	Disasters in U.S. History
HIST 634	Interwar America: 1918-1939
HIST 662	U.S. Religion since 1870
HIST 664	Indigenous North America
HIST 677	The Vietnam War
HIST 615	Problems in American History (when topic applies and with department approval)
Other appropriate course with department approval	

[1] Select at least 3 credits from each group

Specialization in European History

Code	Title	Credits
Select four courses from the following: [1]		12
Ancient, Medieval, Early Modern to 1789		
HIST 576	The Crusades	
HIST 642	Humanism and the Renaissance	
HIST 644	Society and Culture in Early Modern Europe	
HIST 635	Problems in European History (when topic applies and with department approval)	
Other appropriate course with department approval		
1789-1914		
HIST 639	Society and Politics in Western Europe, 1750-1914	
HIST 640	Metropolitan Cities of Europe in the Nineteenth and Twentieth Centuries	
HIST 635	Problems in European History (when topic applies and with department approval)	
Other appropriate course with department approval		
1914 to the Present		
HIST 640	Metropolitan Cities of Europe in the Nineteenth and Twentieth Centuries	
HIST 646	Stalinism	
HIST 635	Problems in European History (when topic applies with department approval)	
Other appropriate course with department approval		

[1] Select at least 3 credits from each group.

Specialization in World History

Code	Title	Credits
Select four courses from the following: [1]		12
World		
HIST 510	Approaches to Modern World History	
HIST 535	Problems in Comparative World History	
Africa		
HIST 565	Problems in African History	
Other appropriate course with department approval		
Asia		
HIST 555	Problems in Asian History	
Other appropriate course with department approval		
Middle East		
HIST 575	Approaches to Middle East and Islamic History	
HIST 576	The Crusades	
HIST 585	Problems in Middle Eastern History	
Other appropriate course with department approval		
Latin America		
HIST 525	Problems in Latin American History	
Other appropriate course with department approval		

[1] Select at least 3 credits from two regions.

Research Seminar

Code	Title	Credits
HIST 797	Research Seminar in History	3
Total Credits		3

Minor Field Concentration

Code	Title	Credits
In consultation with the graduate director and other faculty, students identify a chronological or topical subspecialty and select two courses that relate directly to that subspecialty.		6
Total Credits		6

Language Proficiency

Language proficiency sufficient to conduct primary source research in the student's intended area of concentration, as demonstrated by thesis or independent research project.

Project or Thesis

Code	Title	Credits
Select 6 credits of Project or Thesis		6
Project and additional Elective		
HIST 798	Directed Research and Writing in History [1]	
Additional 3 credits from Specialization		
Thesis		

HIST 799	Thesis	
Total Credits		6

[1] Requires the completion of a major paper that is a substantial and original contribution to historical knowledge on the model of an article in a scholarly journal. If students choose to take , they complete an additional 3 credits in their specialization.

Concentration in Applied History (AH2, EH2, WH2)

This concentration is for students seeking expertise in applied history fields, such as archival management, museum studies, historic preservation, and historical editing. It is also suitable for professionally employed historians who desire to further their careers.

Required Course

Code	Title	Credits
HIST 610	The Study and Writing of History [1]	3
Total Credits		3

[1] Must be taken within the first 9 credits

Specialization

Students complete one of the following geographic specializations.

Specialization in U.S. History

Code	Title	Credits
Select four courses from the following: [1]		12

Applied History

Students take 12 credits of coursework in historic preservation, museum studies, archives, historical editing, or new media and information technology. At least 6 credits must be taken as coursework other than internship.

Code	Title	Credits
Professional Experience		
Students may meet this requirement through a minimum of 3 credits of internship or with professional experience in applied history, with documentation and approval of department. Students with professional experience will take 12 credits of coursework from the list below to meet the applied history requirement.		
HIST 794	Internship in Applied History	
Select 6-12 credits from the following:		**6-12**
HIST 679	War and Remembrance	
HIST 680	Introduction to Digital Humanities	
HIST 685	Topics in Applied History	
HIST 688	Topics in History and New Media	
HIST 689	Teaching and Learning History in the Digital Age	
HIST 690	The Administration of Archives and Manuscripts	
HIST 691	Museum Studies	
HIST 692	Historical Editing	
HIST 693	Historic Preservation	
HIST 694	Digital Public History	
HIST 696	Clio Wired: An Introduction to History and New Media	
HIST 697	Creating Historical Knowledge using Digital Methods	
HIST 698	Programming for History	
Other appropriate course with department approval		

Proficiency in a Relevant Research Tool

Code	Title	Credits
Students fulfill the requirement by completing one of the following:		
Coursework, work or internship experience, or exam in computers, statistics, or a modern foreign language.		
HIST 680	Introduction to Digital Humanities	
HIST 696	Clio Wired: An Introduction to History and New Media	
Other course by approval of department		

Concentration in Applied History with New Media and Information Technology Emphasis (AH4, EH4, WH4)

Students pursuing this concentration take:

Required Course

Code	Title	Credits
HIST 610	The Study and Writing of History [1]	3
Total Credits		3

[1] Must be taken within the first 9 credits

Specialization

Students complete one of the following geographic specializations.

Specialization in U.S. History

Code	Title	Credits
Select four courses from the following: [1]		12
Origins to 1861		
HIST 613	Colonial North America	
HIST 618	The Age of Jackson, 1815-1854	
HIST 620	Development of the Early Republic, 1783-1815	
HIST 627	Disasters in U.S. History	
HIST 631	Era of the American Revolution	
HIST 661	Religion in North America to 1870	
HIST 664	Indigenous North America	
HIST 615	Problems in American History (when topic applies and with department approval)	
Other appropriate course with department approval		
1861-1914		
HIST 617	Topics in the American Civil War Era	
HIST 622	U.S. South Since 1865	
HIST 627	Disasters in U.S. History	
HIST 629	The Gilded Age and Progressive Era	
HIST 633	Reconstruction Era	
HIST 662	U.S. Religion since 1870	
HIST 664	Indigenous North America	
HIST 615	Problems in American History (when topic applies and with department approval)	
Other appropriate course with department approval		
1914 World War I to the Present		
HIST 622	U.S. South Since 1865	
HIST 623	Recent U.S. History, 1945 to Present	
HIST 627	Disasters in U.S. History	
HIST 634	Interwar America: 1918-1939	
HIST 662	U.S. Religion since 1870	
HIST 664	Indigenous North America	
HIST 677	The Vietnam War	
HIST 615	Problems in American History (when topic applies and with department approval)	
Other appropriate course with department approval		

[1] Select at least 3 credits from each group.

Specialization in European History

Code	Title	Credits
Select four courses from the following: [1]		12
Ancient, Medieval, Early Modern to 1789		
HIST 576	The Crusades	
HIST 642	Humanism and the Renaissance	
HIST 644	Society and Culture in Early Modern Europe	
HIST 635	Problems in European History (when topic applies and with department approval)	
Other appropriate course with department approval		
1789-1914		
HIST 639	Society and Politics in Western Europe, 1750-1914	
HIST 640	Metropolitan Cities of Europe in the Nineteenth and Twentieth Centuries	
HIST 635	Problems in European History (when topic applies and with department approval)	
Other appropriate course with department approval		
1914 to the Present		
HIST 640	Metropolitan Cities of Europe in the Nineteenth and Twentieth Centuries	
HIST 646	Stalinism	
HIST 635	Problems in European History (when topic applies with department approval)	
Other appropriate course with department approval		

[1] Select at least 3 credits from each group.

Specialization in World History

Code	Title	Credits
Select four courses from the following: [1]		12
World		
HIST 510	Approaches to Modern World History	
HIST 535	Problems in Comparative World History	
Africa		
HIST 565	Problems in African History	
Other appropriate course with department approval		
Asia		
HIST 555	Problems in Asian History	
Other appropriate course with department approval		
Middle East		
HIST 575	Approaches to Middle East and Islamic History	
HIST 576	The Crusades	
HIST 585	Problems in Middle Eastern History	
Other appropriate course with department approval		
Latin America		
HIST 525	Problems in Latin American History	
Other appropriate course with department approval		

[1] Select at least 3 credits from two regions.

Research Seminar

Concentration in Higher Education (HEDU)

The concentration in higher education is intended for students who want to teach history at community college. It includes coursework in both history and education, including a course on college teaching. Students are required to take at least one history course in each of three areas

(U.S., European, and world history), and they are encouraged to take two courses in each area to prepare them to teach the U.S., western civilization, and world history survey courses most commonly offered at the community college level.

Required Course

Code	Title	Credits
HIST 610	The Study and Writing of History [1]	3
Total Credits		3

[1] Must be taken with the first 9 credits.

Additional Courses in History

Code	Title	Credits
Select six courses in history [1]		18
Total Credits		18

[1] Must include at least one course each from U.S. European, and world history.

Research Seminar

Code	Title	Credits

Total Credits		3

Graduate Education

Code	Title	Credits
Select four courses from the following:		12
HE 602	College Teaching	
HE 685	Practicum	
Six credits of HE electives		
Total Credits		12

Concentration in Teaching (HS4)

This concentration offers students interested in a career in secondary education the option to devote part of their History MA to graduate coursework that can be applied toward the requirements for licensure in the Commonwealth of Virginia. Students who have an interest in obtaining licensure to teach should meet with a pre-Education advisor in the College Of Education and Human Development at the beginning of their program to create a plan for completion of the required content-coursework prerequisites (Endorsements). You can view information here: https://cehd.gmu.edu/endorse/ or contact the Pre-Education Advising Coordinator at endorse@gmu.edu. Students seeking licensure must also enroll in the Secondary Education Licensure Graduate Certificate (E1-CERG-SELC), a state-approved educator preparation program. Upon completion of the discipline-specific content competencies coursework; the MA in History, concentration in teaching; and the Secondary Education Licensure Graduate Certificate, students will be eligible for recommendation for an initial teaching license in Secondary Education History and Social Science.

Required Course

Code	Title	Credits
HIST 610	The Study and Writing of History [1]	3
Total Credits		3

[1] Must be taken within the first 9 credits.

Accelerated Master's

History, BA/History, Accelerated MA

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA in History and an MA in History in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/la-ma-acel-hist/application/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, including HIST 300 Introduction to Historical Method (Mason Core) with a minimum grade of B+.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Completion of a HIST 499 RS: Senior Seminar in History (Mason Core) or HIST 491 Honors Directed Research
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

500- or 600-level HIST courses (https://catalog.gmu.edu/courses/hist/)
HIST 610 The Study and Writing of History is preferred, but not required

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

500- or 600-level HIST courses (https://catalog.gmu.edu/courses/hist/)

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

History, PhD

Banner Code: LA-PHD-HIST

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-phd-hist

The History, PhD prepares students for careers in college teaching, digital media, publishing, educational administration, public history, and historical research. Students gain expertise in conventional historical methods and web-based technologies. Major fields include U.S. history, European history, and world history. Minor fields are chosen by the student and may include such areas as public history, constitutional studies, and new media and information technology.

The PhD program allows students to develop programs of study to fit with a variety of career goals and interests - preparation to teach and research at the community college, college, or university level; work in the fields of digital humanities, new media and technology; work in the fields of public and applied history, such as museums, archives, preservation, and editing; and professional development.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For specific information see Application Requirements and Deadlines (http://historyarthistory.gmu.edu/programs/application/LA-PHD-HIST/) on the departmental web site.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credit

For students entering the doctoral program with a master's degree, the number of required credits may be reduced by a maximum of 30 credits, subject to approval of the program faculty and the dean. Requests for reduction of credit are reviewed only after acceptance to the doctoral program.

Requirements

Degree Requirements

Total credits: 72

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students will be terminated from the program if they receive more than one unsatisfactory grade (C or F). No more than 6 credits earned through study abroad courses may be applied towards the degree.

Core Courses

Code	Title	Credits
HIST 610	The Study and Writing of History	3
HIST 696	Clio Wired: An Introduction to History and New Media	3
Choose one of the following:		3
HIST 697	Creating Historical Knowledge using Digital Methods	
HIST 698	Programming for History	
HIST 688	Topics in History and New Media	
HIST 810	History Doctoral Colloquium [1]	1-6
HIST 811	Doctoral Research Seminar	3
HIST 797	Research Seminar in History	3
Total Credits		16-21

[1] Students take 1 credit a semester until they advance to candidacy or reach a maximum of 6 credits.

Major Field

Code	Title	Credits
Select 15 credits of courses in one of three possible fields:		15
U.S. History		
European History		

Comparative World History	
Total Credits	15

Minor Fields

Code	Title	Credits
Select two minor fields and take 9 credits in each [1]		18
Total Credits		18

[1] Minor fields may include areas such as public history, digital history, cultural history, women's and gender history, the Atlantic World.

Doctoral Research Skills

Students must demonstrate basic competency in computers. Students whose research requires knowledge of a foreign language must also demonstrate a reading knowledge of one foreign language. The department sets specific research skills requirements for students, depending on their field of study.

Comprehensive Exam

Students need to pass a comprehensive exam that consists of a written field exam for each minor field and an oral exam for the major field.

Advancement to Candidacy

To advance to candidacy, students must complete all coursework required on their approved program of study. Students must also successfully complete and pass an oral comprehensive exam in a major field and written examinations in two minor fields. In addition, students must have a dissertation committee appointed by the Dean's Office as well as an approved proposal. Evidence of the approved proposal must be on file in the Dean's Office before a student can be advanced to candidacy.

Dissertation

Once enrolled in HIST 998 Doctoral Dissertation Proposal, students in this degree program must maintain continuous registration in HIST 998 Doctoral Dissertation Proposal or HIST 999 Doctoral Dissertation Research each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in HIST 999 Doctoral Dissertation Research, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research. Students who defend in the summer must be registered for at least 1 credit of HIST 999 Doctoral Dissertation Research.

Students who complete less than 6 credits of HIST 810 History Doctoral Colloquium must take additional credits of HIST 998 Doctoral Dissertation Proposal or HIST 999 Doctoral Dissertation Research to reach the 72 credits required for the program.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of HIST 998 Doctoral Dissertation Proposal and a minimum of 15 credits of HIST 999 Doctoral Dissertation Research.

Code	Title	Credits
Dissertation Research		18
HIST 998	Doctoral Dissertation Proposal (minimum of 3 credits)	
HIST 999	Doctoral Dissertation Research (minimum of 15 credits)	
Total Credits		18

Medieval Studies Minor

Banner Code: MEST

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: https://historyarthistory.gmu.edu/programs/la-minor-hist-mest

The Medieval Studies minor is an interdisciplinary study of the Middle Ages and allows focused study within the parameters of a single methodology or discipline.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. Of the 18 credits applied to the minor, 12 credits must be at the 300- or 400-level.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

STEM in Society Minor (CHSS)

Banner Code: STEM

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: historyarthistory.gmu.edu/programs/la-minor-hist-stem

The STEM in Society minor develops strategic and critical thinking capabilities to better understand how science, technology, engineering, and mathematics (STEM), as well as medicine, impact the human experience - past, present, and future. It provides a broad perspective of the STEM fields, to include how advances are developed, how they fit into the wider context of society and culture, and how historical contexts have in turn shaped advances in these fields.

The skills and competencies gained from this minor are useful to those seeking work in the tech and health care industries, as well as fields like international development and public policy or in non-profits, the government, or think tanks.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Undergraduate Programs

The department offers a Bachelor of Arts in Foreign Languages with concentrations in Arabic, Chinese, French, Korean, and Spanish.

Concentrations

The concentration in Arabic has an emphasis on developing strong language skills, including literacy and oral communication, along with an in-depth understanding of modern Arabic culture and society. Students concentrating in Arabic are expected to gain fluency in Modern Standard Arabic and a working knowledge of at least one Arabic dialect. Additionally, students will graduate with a strong background in Arab intellectual history, literature, and culture.

The concentration in Chinese enables students to become proficient in listening, speaking, reading, and writing Chinese while learning about Chinese literature, history, traditions, and culture. Students in this program are encouraged to study abroad or to do an internship. Students in Chinese are also encouraged to complete a double major.

The concentration in French is designed for students who want to increase their proficiency in French language and culture while learning about the history, politics, and economics of the many French-speaking countries around the world. Students can take a study abroad course or spend a summer in Paris or Quebec, earning credit towards their degree. They can participate in the many French-speaking activities sponsored by Mason's French Club.

The concentration in Korean prepares students to perform professional work in the field of translation, international relations, local and federal government, transnational enterprise, cultural industry, and teaching careers in Korea or at local public schools and to pursue graduate studies in Korean or Korean studies. The concentration in Korean has an emphasis on developing solid Korean language proficiency skills, technical translation skills, and in-depth understanding of both South and North Korean society and culture.

The concentration in Spanish enables students to become proficient in speaking, reading, and writing Spanish while learning about Latin American, Latino and Spanish languages practices, literatures, histories, and cultures. Students are encouraged to do an internship or service learning project, where they can draw on their knowledge of Spanish and gain valuable work experience while working for social change in their communities. Students have many opportunities to study Spanish abroad for as little as a week and as long as a semester and, at the same time, earn credit toward their degree.

All concentrations prepare students for teaching careers at the secondary school level, graduate study in languages, and research and professional work in government and private enterprise.

Faculty in the department participate in the interdisciplinary Russian and Eurasian Studies, BA.

Foreign Languages with a Second Major

Majors in foreign language are encouraged to complete a second major in another field. Students who want to pursue a second undergraduate major should plan a program of study in consultation with advisors from both degrees and be familiar with the relevant policies on more than one major. See the Academic Policies section of the catalog.

Minors

Language majors are encouraged to complete a minor in another field.

The department offers minors in Arabic, Chinese, French, German Studies, Latin, Russian, Spanish, Classical Studies, Italian Studies, Japanese Studies, and Korean Studies. They are available to students in any major at Mason. Except for Classical Studies, all the minors have as a prerequisite the completion of 202 (or equivalent) in the relevant language.

Bachelor's/Accelerated Master's Programs

The department offers highly qualified undergraduates concentrating in Spanish the opportunity to apply to an accelerated master's degree program in Foreign Languages with a concentration in Spanish or a concentration in Spanish/bilingual-multicultural education. If accepted, students will be able to earn an undergraduate degree and a graduate degree in Foreign Languages after satisfactory completion of 144-150 credits, generally within five years.

Graduate Programs

The department offers a distinctive interdisciplinary master's degree in foreign languages designed to meet the needs and interests of prospective and practicing teachers and other professionals. It also prepares students for doctoral study at other institutions. Within the master's degree, students choose one of four concentrations: French, Spanish, French and Spanish, and Spanish/bilingual-multicultural education.

Funding

The department has a limited number of teaching assistantships for highly qualified graduate students with excellent language preparation. Students develop valuable language teaching experience by working with faculty experts in language teaching pedagogy.

Faculty

Department Faculty

Professors

Berroa (chair), Leeman, Román-Mendoza, Winkler

Emeriti

Agüera, Christensen, Elstun, Francescato, Gilbert, Goldin, Ricouart, Wagner

Associate Professors

Carreño-Rodríguez, Greenberg, Leeman, Levine, Markx (associate chair), Olson, Pichichero, Rabin, Repinecz, Serafini, Sun, Vivancos-Pérez, K. Zhang

Assistant Professors

Chanethom, Jung, Serigos

Term Associate Professors

Dudnik, Sweet

Term Assistant Professors

Arans, Bonilla, Burns, J. Chen, Di Nino, Fujiwara, Kanesaka, Mahmoud, Hussein, Moon, Romaniuc, Vikis, Zach

Arabic Minor

Banner Code: ARBC

Academic Advising

5100 Horizon Hall
Fairfax Campus

Email: language@gmu.edu
Website: mcl.gmu.edu/programs/la-minor-mcl-arab

The minor has an emphasis on developing strong language skills: oral communication and the reading of texts. Students are also introduced to important works of Arabic literature and culture. A minor in Arabic can easily and effectively be combined with majors in other disciplines. It is especially valuable in combination with global affairs, international relations, security, journalism, philosophy, and religion.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. Students must complete 18 credits at the 300-level or above with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
Select three courses from the following:		9
ARAB 300	Advanced Arabic	
ARAB 330	Reading and Conversation I	
ARAB 331	Reading and Conversation II

Classical Studies Minor

Banner Code: CLA

Academic Advising

5100 Horizon Hall
Fairfax Campus

Email: language@gmu.edu
Website: mcl.gmu.edu/programs/LA-MINOR-MCL-CLA/requirements

The minor is designed for students who wish to become familiar with Classical cultures and broaden their knowledge of the foundations of Western civilization. It is especially relevant to students who are studying other areas of the humanities such as English, languages, comparative literature, history, art history, philosophy, or religious studies. The requirements of the minor provide flexibility so students can choose courses that are relevant to their primary interests.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum grade of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Foreign Languages, BA

Banner Code: LA-BA-FRLN

5100 Horizon Hall
Fairfax Campus

Email: language@gmu.edu
Website: mcl.gmu.edu/programs/LA-BA-FRLN

The Bachelor of Arts in Foreign Languages prepares students for teaching, graduate study in languages and cultures, research, professional work, as well as service in government, nonprofits, or business. Our graduates are particularly valued for their multilingual and cross-cultural knowledge. Majors are encouraged to complete a minor or a second major in another field. Concentrations are offered in Arabic, Chinese, French, Korean, and Spanish. Minors are offered in Arabic, Chinese, Classical Studies, French, German Studies, Italian Studies, Japanese Studies, Korean Studies, Latin, Russian and Spanish.

Double majors in foreign language and another subject should plan a program of study with advisors from both disciplines and follow the steps outlined in AP.5.3.3 Second Bachelor's Degree.

Admissions & Policies

Policies

Students pursuing this degree must complete 30-33 credits within the major, with a minimum GPA of 2.00

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Concentrations in the Major

In addition to the other college and university requirements for a degree, provided in the tabs below, students pursuing this degree complete a 30-33 credit concentration chosen from the following:

- Concentration in Arabic (ARBC)
- Concentration in Chinese (CHIN)
- Concentration in French (FRN)
- Concentration in Korean (KORE)
- Concentration in Spanish (SPN)

Concentration in Arabic (ARBC)

The concentration in Arabic has an emphasis on developing strong language skills, including literacy and oral communication, along with an in-depth understanding of modern Arabic culture and society. Students concentrating in Arabic are expected to gain fluency in Modern Standard Arabic and a working knowledge of at least one Arabic dialect. Additionally, students will graduate with a strong background in Arab intellectual history, literature, and culture.

Students pursuing the concentration in Arabic must complete a minimum of 30 credits in Arabic at the 300 level and above, each with a minimum grade of C. Only two courses (6 credits) taught in English may be applied to the major. Students are highly encouraged to participate in study abroad.

A minor in Arabic is also offered, which can easily and effectively be combined with majors in other disciplines, such as global affairs, international relations, government, journalism, philosophy, and religion.

Concentration in Chinese (CHIN)

The concentration in Chinese prepares students for research and professional work in government and private enterprise, teaching careers at the secondary school level, and graduate study in Chinese. Language majors with the Chinese concentration are encouraged to complete a minor or, if possible, a second major in another field.

Students pursuing the concentration in Chinese must complete a minimum of 30 credits in Chinese at the 300 level and above, each with a minimum grade of C. Students are expected to complete a balanced program that includes courses in language, culture and civilization, and literature. Only two courses (6 credits) taught in English may be applied to the major. Students are highly encouraged to participate in study abroad.

A minor in Chinese is also offered, which can easily and effectively be combined with majors in other disciplines, such as global affairs, international relations, government, journalism, philosophy, and religion.

Concentration in French (FRN)

Students pursuing the concentration in French must complete a minimum of 33 credits in French at the 300 level and above, each with a minimum grade of C. No more than two courses (6 credits) conducted in English may be used to fulfill requirements for the concentration. These may be chosen from FREN 325 Major French Writers (Topic Varies) (Mason Core) or FREN 329 Problems of Western Civilization in French Literature (Mason Core) or a FRLN or non-MCL course at the 300- or 400- level with approval. Students are expected to complete a balanced program that includes courses in language, culture and civilization, and literature.

Total Credits		33

Concentration in Korean (KORE)

The major in Korean prepares students to perform professional work in the field of translation, international relations, local and federal government, transnational enterprise, cultural industry and teaching careers in Korea or at local public schools and to pursue graduate studies in Korean or Korean studies. The concentration in Korean has an emphasis on developing solid Korean language proficiency skills, technical translation skills, and in-depth understanding of both South and North Korean society and culture.

Students majoring in Korean need to complete a minimum of 30 credits in Korean at the 300 level and above, each with a minimum grade of C. Students are expected to take well-balanced courses including language, culture, literature and translation. Only two courses (6 credits) taught in English are applied to the major requirements. Students are strongly recommended to participate in study abroad.

The major in Korean can ideally be combined with majors or minors in other disciplines, such as global affairs, international relations, government, journalism, conflict analysis and resolution, philosophy, religion, and education.

Concentration in Spanish (SPN)

With more than 400 million people speaking Spanish worldwide - nearly 40 million in the US - and the growing influence of Hispanic cultures around the globe, knowledge of Spanish and the Spanish-speaking world has never been more important. The Spanish courses and degree programs provide students with the opportunity for language development and interdisciplinary study of the cultures, film, history, linguistics and literature of the 20 Spanish-speaking countries, including the United States. Students can also receive Spanish credit through participation in study-abroad programs.

Students pursuing the concentration in Spanish must complete a minimum of 33 credits in Spanish courses at the 300-level and above, each with a minimum grade of C. Two courses taught in English (6 credits) may be applied toward the concentration, only one of which may be taught outside the department. FRLN topics courses and outside elective courses taught in English require pre-approval by the Spanish program coordinator.

Code	Title	Credits
Core Courses (Select one of the following options)		**6**

Total Credits		33

[1] Prefixes for elective courses (with pre-approval) include ANTH, ARTH, ENGH, GGS, GOVT, HIST, RELI, and SOCI.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in foreign language may fulfill this requirement by successfully completing ARAB 331 Reading and Conversation II, CHIN 480 Fourth-Year Chinese I, FREN 309 Reading and Writing Skills Development, KORE 370 Advanced Korean Writing, or SPAN 370 Spanish Writing and Stylistics.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in Foreign Languages Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Accelerated Master's

The accelerated master's programs below specify the BA in foreign languages with a Spanish concentration as a feeder degree for their programs. It is important to note, however, that many accelerated master's programs are available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Foreign Languages, BA (Spanish Concentration)/Foreign Languages, Accelerated MA (Spanish Concentration)

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA in Foreign Languages with a concentration in Spanish and an MA in Foreign Languages with a concentration in Spanish in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (http://mcl.gmu.edu/programs/la-ma-acel-frln-span/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.00
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

500-level SPAN courses (https://catalog.gmu.edu/courses/span/)
500-level FRLN courses (https://catalog.gmu.edu/courses/frln/)

Advanced standing courses may substitute for some or all (up to 12 credits) of the 400-level requirements in the BA in Foreign Languages with a concentration in Spanish.

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

500-level SPAN courses (https://catalog.gmu.edu/courses/span/)
500-level FRLN courses (https://catalog.gmu.edu/courses/frln/)

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Foreign Languages, BA (Spanish Concentration)/Foreign Languages, Accelerated MA (Spanish/Bilingual-Multicultural Education Concentration)

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA in Foreign Languages with a concentration in Spanish and an MA in Foreign Languages with a concentration in Spanish/Bilingual Multicultural Education in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (http://mcl.gmu.edu/programs/la-ma-acel-frln-sbm/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.00
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

500-level SPAN courses (https://catalog.gmu.edu/courses/span/)
500-level FRLN courses (https://catalog.gmu.edu/courses/frln/)

Advanced standing courses may substitute for some or all (up to 12 credits) of the 400-level requirements in the BA in Foreign Languages with a concentration in Spanish.

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

500-level SPAN courses (https://catalog.gmu.edu/courses/span/)
500-level FRLN courses (https://catalog.gmu.edu/courses/frln/)

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Foreign Languages, MA

Banner Code: LA-MA-FRLN

Academic Advising

5100 Horizon Hall
Fairfax Campus

Email: language@gmu.edu
Website: https://mcl.gmu.edu/programs/la-ma-frln

The Master of Arts in Foreign Languages aims to enhance the linguistic and cultural proficiency of students through courses in sociolinguistics and second language acquisition, film studies, cultural studies and literary studies. Students may select from four concentrations: French, Spanish, French and Spanish, and Spanish/bilingual-multicultural education. Located only miles from Washington, D.C., students take advantage of the program's existing relationships with schools, embassies, federal agencies, and international businesses—providing opportunity for internships and other educational experiences outside the classroom.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For specific information, see Application Requirements and Deadlines (http://mcl.gmu.edu/programs/application/LA-MA-FRLN/) on the departmental website.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30-42

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Each concentration has a different number of required credits. In all four concentrations, 6 of the total credits may be earned with a thesis. Regardless of the concentration selected, all students must meet the core and distribution requirements given below and pass a comprehensive exam or write a thesis.

Concentration in French (FRN)

18 credits must be in courses with the subject code FREN.

Code	Title	Credits
Literature		
Select two courses in literature chosen in consultation with an advisor and cover two different literary periods or Francophone regions.		6
French Language and Linguistics		
Select two courses in French language and linguistics chosen in consultation with an advisor.		6
French		
Select two additional courses in French literature or language in consultation with an advisor.		6
Electives		
Select four electives in consultation with an advisor. A maximum of 6 credits may be used for directed reading and research or thesis.		12
FREN 798	Directed Reading and Thesis Research	
FREN 799	Thesis	
Total Credits		30

Concentration in Spanish (SPN)

Code	Title	Credits
Required Core Courses [1]		
SPAN 502	Hispanic Sociolinguistics	3
SPAN 510	Methods of Literary and Cultural Studies	3
Latino, Latin American, or Spanish cultures, literatures, or linguistics		
Select any five courses with the SPAN subject code.		15
Electives		
Select three electives in consultation with an advisor. [2]		9
SPAN 798	Directed Reading and Research	
SPAN 799	Thesis	
Total Credits		30

[1] Students must take the core courses within their first 15 credits.

[2] They can include additional courses in Latin American or Spanish culture, linguistics, or literature, courses with the subject code FRLN, up to 6 credits of courses in related fields, and up to 6 credits of thesis research and writing. Students who do not complete their thesis during one semester of SPAN 799 will need to register for additional credits. Independent studies courses are not available for graduate students of Spanish.

Concentration in Spanish and French (SF)

Code	Title	Credits
French		
Select six required courses (not electives) specified under the concentration in French.		18
Latino, Latin American, or Spanish cultures, literatures, or linguistics		
Take the two required core courses specified under the concentration in Spanish, plus four electives with the SPAN subject code.		18
Electives		
Select two electives with the FREN, FRLN, and SPAN subject codes. [1]		6
FREN 798	Directed Reading and Thesis Research	
SPAN 798	Directed Reading and Research	
FREN 799	Thesis	
SPAN 799	Thesis	
Total Credits		42

[1] Students who elect to complete a thesis may apply 6 credits of 798 and 799 to fulfill this requirement.

Concentration in Spanish/Bilingual-Multicultural Education (SBM)

Code	Title	Credits
Required Core Courses [1]		
SPAN 502	Hispanic Sociolinguistics	3
SPAN 510	Methods of Literary and Cultural Studies	3
Latino, Latin American or Spanish cultures, literatures, or linguistics		
Select four courses with the SPAN subject code.		12
Education Courses		
Select two courses from the following list in consultation with an advisor.		6
EDUC 511	Child and Adolescent Development in Global Contexts	
EDUC 537	Introduction to Culturally Linguistically Diverse Learners	
EDCI 516	Bilingualism and Language Acquisition Research	
EDCI 520	Assessment of Language Learners	
EDCI 560	Methods of Teaching in Foreign/World Languages	
EDCI 684	Advanced Methods of Teaching Foreign/ Second Languages in PK-12 Schools	
EDRD 620	Reading/Writing in Foreign/World Languages	

Electives [2]	
Select four electives in consultation with an advisor.	12
Total Credits	36

1 Students must take the core courses within their first 15 credits.

2 Students who elect to complete a thesis may apply 6 credits of 798 and 799 to fulfill this requirement.

Dual Degree Options

Foreign Languages, MA and Global Affairs, MA Dual Degree

Students interested in pursuing a dual master's program linking foreign languages or global affairs with another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master's Degree Programs.

Students approved to pursue a dual master's program linking the foreign languages MA with a concentration in French, Spanish, or Spanish bilingual/multicultural education with the global affairs MA can share 12 credits between the two programs. Application to the second master's program should be pursued with consultation of the directors of both programs. Admission to the second master's program will require that the student has met the minimum prerequisites for admissions to the second program.

Accelerated Master's

Foreign Languages, BA (Spanish Concentration)/Foreign Languages, Accelerated MA (Spanish Concentration)

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA in Foreign Languages with a concentration in Spanish and an MA in Foreign Languages with a concentration in Spanish in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (http://mcl.gmu.edu/programs/la-ma-acel-frln-span/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.00
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

500-level SPAN courses (https://catalog.gmu.edu/courses/span/)
500-level FRLN courses (https://catalog.gmu.edu/courses/frln/)

Advanced standing courses may substitute for some or all (up to 12 credits) of the 400-level requirements in the BA in Foreign Languages with a concentration in Spanish.

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

French Minor

Banner Code: FRN

Academic Advising

5100 Horizon Hall
Fairfax Campus

Website: mcl.gmu.edu/programs/LA-MINOR-MCL-FRN/

The minor in French provides students with the components of a well-rounded education in French: knowledge of the language (through conversation, composition, and grammar) combined with the study of literature and civilization.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete 18 credits at the 300-level or above with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Advanced Language Course

Code	Title	Credits
FREN 309	Reading and Writing Skills Development	3
Total Credits		3

Literature and Civilization

Code	Title	Credits
FREN 380	The Making of Modern France	3
FREN 340	Francophone Identities	3
or FREN 385	Introduction to French Linguistics	
Total Credits		6

Electives

Code	Title	Credits
Select three electives in FREN at the 300 level or above [1]		9
Total Credits		9

[1] One elective course in English may be applied to the minor. This may be chosen from FREN 325 Major French Writers (Topic Varies) (Mason Core) or FREN 329 Problems of Western Civilization in French Literature (Mason Core), or from a FRLN or non-MCL course with approval. Students choose electives in consultation with an advisor.

German Studies Minor

Banner Code: GRMS

Academic Advising

5100 Horizon Hall
Fairfax Campus

Website: mcl.gmu.edu/programs/la-minor-mcl-grm/

The emphasis of the minor is on developing strong language skills: oral communication and the reading of texts. Students are introduced

to important works of German literature and to the culture of German-speaking countries.

A German Studies minor can easily and effectively be combined with majors in other disciplines. It is especially valuable in combination with business, computer science, international studies, history, music, philosophy, or another language.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. Students pursuing this minor must complete 18 credits at the 300-level or above with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors.

A maximum of two courses (6 credits) conducted in English can be applied to the minor.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Language Courses

Code	Title	Credits
Select three courses from the following:		9
GERM 310	Conversation and Composition	
GERM 316	German for the Business World	
GERM 312	Great Cities in Germany, Austria and Switzerland	
GERM 315	German for the Global World	
GERM 318	Translation of Texts	
GERM 370	German Through the Arts	
GERM 415	Advanced Grammar and Style	
GERM 418	Advanced Composition	
Total Credits		9

Literature and Culture Courses

Code	Title	Credits
Select two courses from the following:		6
GERM 301	Culture and Civilization	
GERM 325	Major Writers (Mason Core)	
GERM 340	Topics in German Literature and Film	
GERM 355	Readings in Poetry (Topic Varies)	
GERM 365	Topics in German History and Culture	
GERM 375	Readings in Drama

GERM 480	Special Topics	
Total Credits		6

Elective

Code	Title	Credits
Select one course from the following: [1]		3
GERM 300- or 400-Level Course		
HIST 306	The Reformation	
HIST 308	Nineteenth-Century Europe	
HIST 309	Europe in Crisis: 1914-1948	
HIST 314	History of Germany	
PHIL 325	Karl Marx's Social and Political Thought	
PHIL 335	Nineteenth-Century Philosophy	
PHIL 340	Hermeneutic Philosophy	
MUSI 332	Music History in Society II	
MUSI 338	Music History in Society A	
Total Credits		3

[1] The courses listed may apply to the minor with prior written approval of the advisor.

Italian Studies Minor

Banner Code: ITLN

Academic Advising

5100 Horizon Hall
Fairfax Campus

Website: mcl.gmu.edu/programs/la-minor-mcl-itln

This minor enables students to advance their Italian language skills and to study Italian culture, history, and literature from an interdisciplinary perspective.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students complete coursework with a language emphasis or a history and culture emphasis. Special topics courses, such as HIST 388 Topics in European History, GOVT 520 Political Theory, and RELI 235 Religion and Literature (Mason Core), when relevant, may be applied to the minor with prior written approval of the coordinator.

Language Emphasis

Code	Title	Credits
Select five language courses from the following courses, most of which are repeatable:		15
ITAL 330	Advanced Italian: Language and Culture I	
ITAL 331	Advanced Italian Language and Culture II	
ITAL 340	Italian through Arts	
ITAL 360	Southern Italy	
ITAL 420	Global and Local Italy	
Select one course in Italian literature and film in translation from the following:		3
ITAL 320	Topics in Italian Film and Literature (Mason Core)	
ITAL 325	Major Italian Writers (Mason Core)	
Total Credits		18

History and Culture Emphasis

Code	Title	Credits
Select three language courses from the following:		9
ITAL 330	Advanced Italian: Language and Culture I	
ITAL 331	Advanced Italian Language and Culture II	
ITAL 340	Italian through Arts	
ITAL 360	Southern Italy	
ITAL 420	Global and Local Italy	
Select one course in Italian literature and film in translation from the following:		3
ITAL 320	Topics in Italian Film and Literature (Mason Core)	
ITAL 325	Major Italian Writers (Mason Core)	
Select two electives from the following:		6
ARTH 340	Early Renaissance Art in Italy, 1300-1500 (Mason Core)

Japanese Studies Minor

Banner Code: JPNS

Academic Advising

5100 Horizon Hall
Fairfax Campus

Website: mcl.gmu.edu/programs/la-minor-mcl-jpns/requirements

This minor enables students to advance their Japanese language skills and develop a sound understanding of Japanese culture and history from a global perspective.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. Special topics courses, when relevant, may be applied to the minor with prior written approval of the director. Students who wish to declare this minor need to obtain the signature of the director.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students must select an emphasis in either the study of Japanese language or the history and culture of Japan.

Language Emphasis

Code	Title	Credits
Japanese Language		
Select four courses from the following:		12
JAPA 330	Advanced Reading and Speaking I	
JAPA 331	Advanced Reading and Speaking II	
JAPA 350	Readings in Japanese Culture	
JAPA 440	Integrated Study of Japanese Language and Society I	
JAPA 441	Integrated Study of Japanese Language and Society II	
Japanese and Japan-Related History		
Select one course from the following:		3
HIST 251	Survey of East Asian History (Mason Core)	
HIST 252	Survey of East Asian History (Mason Core)	
HIST 356	Modern Japan (Mason Core)	
HIST 357	Postwar Japan (Mason Core)

Latin Minor

Banner Code: LATN

Academic Advising

5100 Horizon Hall
Fairfax Campus

Website: mcl.gmu.edu/programs/la-minor-mcl-latn/requirements

This minor offers students the opportunity to develop and refine their knowledge of the Latin language by reading classical Latin literature. Students gain an understanding and appreciation of the literature, culture, and intellectual achievements of Roman antiquity that have contributed to the development of Western civilization.

A Latin minor complements majors in literature, language, history, philosophy, and the arts, all of which find their roots in classical antiquity. Majors in the natural and the social sciences are also strengthened by the historical perspective and the advanced training in language and terminology afforded by the minor in Latin.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. Students must complete 18 credits in Latin at the 300-level or above with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Coursework

Code	Title	Credits
Students complete 18 credits of the following courses which vary in content and may be repeated for credit when content is different.		18
LATN 351	Roman Prose Literature	
LATN 352	Roman Poetry	
LATN 451	Studies in Roman Literature	
LATN 452	Studies in Roman Literature	
Total Credits		18

Russian Minor

Banner Code: RUS

Academic Advising

5100 Horizon Hall
Fairfax Campus

Website: mcl.gmu.edu/programs/la-minor-mcl-rus/requirements

The minor in Russian provides students with the opportunity to acquire advanced-level skills in the Russian language and to apply these skills to the study of Russian literature and culture. The minor enhances any major, especially those in history, government and international politics, geography, literature, theater, communication, and economics.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. Students must complete 18 credits at the 300-level or above with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Department of Philosophy

6300 Horizon Hall
Fairfax Campus

Phone: 703-993-1290
Website: philosophy.gmu.edu

Undergraduate Programs

The department offers a bachelor of arts degree in philosophy, which covers the major issues and areas in philosophy. It is intended to serve the needs of students who wish to pursue graduate studies in philosophy or emphasize philosophy while acquiring a broad liberal arts education. Majors in philosophy take courses in a variety of philosophical traditions and study logic, ethics, and social and political philosophy. With the skills of critical thinking, clear writing, and analytical reasoning that are the hallmark of philosophy majors, students are well-prepared for a wide range of careers including law, government service, or graduate study.

The philosophy program can complement other interests of students when they complete a second major in another field. Students who plan to pursue more than one undergraduate major should work out a program of study in consultation with advisors from both majors and be familiar with the relevant policies for completing more than one major. See Undergraduate Policies.

In addition to the general degree in philosophy, students can choose one of two concentrations. The concentration in philosophy and law offers philosophy majors the opportunity to focus their study of philosophy in a way that prepares them for the study of the law. The concentration in Philosophy, Politics and Economics (PPE) is a high credit concentration for students interested in a program that explores the interdisciplinary connections between philosophy, political science, and economics.

Minors

The department offers a minor in philosophy and a minor in philosophy and law. These minors are available to students in any major. The department, in cooperation with the Schar School of Policy and Government, coordinates the interdisciplinary minor in political philosophy.

Bachelor's/Accelerated Master's Program

The department offers highly qualified undergraduate majors in philosophy the opportunity to apply to an accelerated master's degree program in philosophy. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 145 credits, generally within five years.

Graduate Programs

The department offers a master of arts degree in traditional and contemporary philosophy as well as specialized concentrations in philosophy and cultural theory and ethics and public affairs. The degree is designed for students who want to further their professional goals or foster their intellectual development. It provides a solid preparation for advanced work in philosophy or other fields such as women and gender studies, cultural studies, or law. The degree provides grounding in the history of philosophy, ethics, metaphysics, epistemology, contemporary continental thought, contemporary analytic philosophy, and philosophy of science.

The focus on traditional and contemporary philosophy of the master's degree program provides students with a historical and pluralistic approach to philosophical questions. The concentration in ethics and public affairs gives students the opportunity to explore the ethical and philosophical issues that arise in such fields of study and work as business, health care, scientific research, biomedical technology, and public policy. The concentration in philosophy and cultural theory provides students with a distinctive and important theoretical foundation for doctoral work in cultural studies.

Students are encouraged to pursue opportunities beyond the classroom such as study abroad, professional internships, and research with faculty members.

Philosophy and Law Minor

Banner Code: PHLW

Academic Advising

6300 Horizon Hall
Fairfax Campus

Website: philosophy.gmu.edu/programs/la-minor-phil-phlw

This minor offers students a course of study that emphasizes the philosophical analysis of legal issues. It acquaints students with the rich tradition of philosophical argument dealing with the justification of law, its relation to moral theory, the justifications for punishment, and the concepts of justice, rights, liberty, and legal responsibility. In addition, an education in philosophy stresses intellectual skills that are important in the study of law.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Philosophy Minor

Banner Code: PHIL

Academic Advising

6300 Horizon Hall
Fairfax Campus

Website: philosophy.gmu.edu/programs/la-minor-phil-phil

The Philosophy Minor allows students majoring in other disciplines to expand their analytical and critical thinking skills while engaging with pressing ethical, social, and political issues. Students will gain a grounding in the history of philosophy and with the help of an advisor, will select a range of electives that complement their major, future career plans and/or personal interests. Courses available span ancient, modern and contemporary philosophy, and focus on questions of knowledge, reality and existence; ethics, including bioethics, environmental ethics and existentialist ethics; social and political philosophy; and philosophy of art, literature and science, among other areas.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. No course may be used to fulfill more than one requirement.

For policies governing all minors, see AP.5.3.4 Minors.

Philosophy, BA

Banner Code: LA-BA-PHIL

6300 Horizon Hall
Fairfax Campus

Website: philosophy.gmu.edu/programs/la-ba-phil

The Bachelor of Arts in Philosophy examines how philosophers have answered some of the most enduring questions about human existence, while exploring how those answers continue to inform our thinking in the present. Students gain a deeper understanding of philosophy's relevance to key contemporary issues—such as global warming, social justice and the defense of human rights, or the relationship between science and religion. Students can use this major as preparation for professions such as law or government service, as a pathway to graduate work, or to complement other interests by taking a double major in philosophy and a related field of study.

Admissions & Policies

Policies

Students pursuing this degree must complete at least 33 credits within the major, earning a minimum grade of 2.00 in each course. At least 21

credits must be at the 300 level or above, including at least 3 credits in PHIL 421 Seminar (Mason Core)/PHIL 422 Honors Seminar (Mason Core). If a course counts for the requirement in analytic or continental philosophy, and also for the ethics and political philosophy requirement, then both requirements are fulfilled with that course.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

2 Only with departmental approval.

Concentration in Philosophy, Politics, and Economics (PPE)

This is a high credit concentration for students interested in a program that explores the interdisciplinary connections between philosophy, political science, and economics.

Students pursuing this concentration, similar to all students pursuing a BA in philosophy, must complete at least 33 credits in philosophy earning a minimum grade of 2.00 in each course. No course may be used to fulfill more than one requirement. In addition to the specific courses listed below, other relevant courses may be applied to the requirements for this concentration with prior written approval of the undergraduate director.

Total Credits		54

1 When the subject matter is appropriate and with the prior written approval of the undergraduate director, PHIL 391 Special Topics in Philosophy, PHIL 421 Seminar (Mason Core), PHIL 422 Honors Seminar (Mason Core), or PHIL 425 Independent Study may be used to fulfill this requirement.

2 Only with departmental approval.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. All senior seminars (PHIL 421 Seminar (Mason Core), PHIL 422 Honors Seminar (Mason Core)) in philosophy are writing intensive. Philosophy majors should consult the undergraduate director for other courses that can be taken to fulfill this requirement.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

1 Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

1 The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

2 HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	3
ANTH 381	Medical Anthropology	3
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core)	3
ARAB 360	Topics in Arabic Cultural Production	3
ARAB 420	Survey of Arabic Literature	3
ARAB 440	Topics in Arabic Religious Thought and Texts (Mason Core)	3
ARTH 203	Survey of Asian Art (Mason Core)	3
ARTH 204	Survey of Latin American Art (Mason Core)	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in Philosophy Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Honors

Honors in the Major

Highly-qualified students may apply to the honors program in the major. Students can apply in their second semester as a junior, before they have completed 90 credits and should have a minimum GPA of 3.50 in the major. Eligible students should submit a transcript, one letter of recommendation from a member of the philosophy faculty, and one writing sample, a paper from one of the student's courses in philosophy.

Students pursuing honors in the major complete 6 credits of honors coursework chosen from PHIL 422 Honors Seminar (Mason Core) or PHIL 425 Independent Study. To graduate with honors in philosophy, students must complete these courses with a minimum GPA of 3.50.

Accelerated Master's

The accelerated master's program listed below specifies the BA in philosophy as a feeder degree for its program. Many other accelerated master's programs are also available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Philosophy, BA/Philosophy, Accelerated MA

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA in Philosophy and an MA in Philosophy in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://philosophy.gmu.edu/programs/la-ma-acel-phil/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits and after completing the following:

- 9 upper level credits in philosophy.
- At least two of the following with a grade of B or higher in each: PHIL 301 History of Western Philosophy: Ancient, PHIL 303 History of Western Philosophy: Modern, or PHIL 173 Logic and Critical Thinking

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Minimum grade of 3.00 in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

600-level PHIL courses (https://catalog.gmu.edu/courses/phil/), with the exception of PHIL 600 Proseminar in Philosophy and PHIL 693 Directed Readings in Philosophy, with the advice and approval of the department.

Advanced standing courses may fulfill the requirement in the BA in Philosophy for Analytic Tradition, Continental Tradition, or Ethics and Social and Political Philosophy, if content is appropriate and with permission of the department.

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

600-level PHIL courses (https://catalog.gmu.edu/courses/phil/), with the exception of PHIL 600 Proseminar in Philosophy and PHIL 693 Directed Readings in Philosophy, with the advice and approval of the department

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Philosophy, MA

Banner Code: LA-MA-PHIL

Academic Advising

6300 Horizon Hall
Fairfax Campus

Email: philgrad@gmu.edu
Website: philosophy.gmu.edu/programs/la-ma-phil

Students in the Master of Arts in Philosophy program can choose a master's degree with a focus on traditional and contemporary philosophy, or choose one of two concentrations: ethics and public affairs, or philosophy and cultural theory. Course offerings provide grounding in the history of philosophy, ethics, metaphysics, epistemology, contemporary continental thought, contemporary analytic philosophy, and philosophy of science. Students pursue the degree to satisfy intellectual interest and to further professional expertise. Graduates of the program move on to

careers in law, technology, health care, education, and public service, or use the program to prepare for doctoral studies in philosophy.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the MA in philosophy, see Application Requirements and Deadlines (http://philosophy.gmu.edu/programs/LA-MA-PHIL/application/).

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 31

Students pursuing this degree must successfully complete 31 credits, which may include a thesis. They may choose a course of study that focuses on traditional and contemporary philosophy or choose to complete one of three concentrations. Students need to identify an advisor on entering the program and meet regularly with that advisor during their course of study.

For policies governing all graduate degrees, see AP.6 Graduate Policies.

MA with a Focus on Traditional and Contemporary Philosophy

The focus in traditional and contemporary philosophy is for students who want to deepen their understanding of philosophical issues and for students who are preparing to pursue doctoral studies in philosophy or related fields, e.g. political theory, gender studies.

Students may apply up to 9 credits from other departments toward the degree with focus on traditional and contemporary philosophy with prior written approval of their advisor.

Code	Title	Credits
Proseminar		
PHIL 600	Proseminar in Philosophy [1]	1
Ancient or Medieval Philosophy		
Select one course from the following:		3
PHIL 603	Aristotle: Selected Works	
PHIL 681	Figures and Topics in Ancient Philosophy	
PHIL 721	Advanced Seminar in Philosophy [2]	
Modern Philosophy		
Select one course from the following:		3
PHIL 608	Hegel's Phenomenology of the Spirit	
PHIL 682	Figures and Topics in Early Modern Philosophy	
PHIL 721	Advanced Seminar in Philosophy [2]	
Contemporary Philosophy		
Select one course from the following:		3
PHIL 615	Postmodernist Thought	
PHIL 616	Phenomenology	
PHIL 683	Contemporary Philosophical Figures	
PHIL 694	Special Topics in Contemporary Philosophy	
PHIL 721	Advanced Seminar in Philosophy [2]	
Advanced Seminar		
Select one from the following:		3
PHIL 720	Nietzsche and his Readers	
PHIL 721	Advanced Seminar in Philosophy	
Electives in Philosophy		
Select four to six electives in philosophy [3]		12-18
Optional Thesis		
Three or six credits of		
PHIL 799	Thesis [4]	
Total Credits		31

1. This course should be completed in the first fall semester in which the student is enrolled in the MA program.
2. May be taken when the topic is relevant and with approval of advisor.
3. Students who choose to write a thesis (3 or 6 credits) will take correspondingly fewer electives.
4. Students must follow the thesis enrollment policy of the university and once enrolled in PHIL 799 Thesis, maintain continuous enrollment as specified in Academic Policies.

Concentration in Ethics and Public Affairs (ETPA)

The concentration in ethics and public affairs is designed for professionals who want to combine the study of ethics and the analysis of social and public policies in a variety of settings, including business, health care, biomedical technology, law, or government.

Code	Title	Credits
Proseminar		
PHIL 600	Proseminar in Philosophy [1]	1

PHIL 643	Environmental Ethics	
PHIL 644	Business and Organizational Ethics	
PHIL 645	Research Ethics	
Electives		
Select two to four electives from the following or from other relevant courses: [4]		6-12
PUAD 700	Ethics and Public Administration	
EVPP 635	Environment and Society	
Optional Thesis		
Three or six credits of		

PHIL 799	Thesis [5]	
Total Credits		31

1. This course should be completed in the first fall semester in which the student is enrolled in the MA program.
2. Depending on the topic, PHIL 681 Figures and Topics in Ancient Philosophy, PHIL 682 Figures and Topics in Early Modern Philosophy, or PHIL 721 Advanced Seminar in Philosophy may be applied to this concentration with prior written permission of the graduate director.
3. Other courses may be used to fulfill this requirement where appropriate and with prior written approval of the student's academic advisor.
4. Students who choose to write a thesis (3 or 6 credits) will take correspondingly fewer electives. Students are encouraged to use courses from around the university in disciplines relevant to their areas of interest, subject to the prior written approval of their academic advisor.
5. Students must follow the thesis enrollment policy of the university and once enrolled in PHIL 799 Thesis, maintain continuous enrollment as specified in Academic Policies.

Concentration in Philosophy and Cultural Theory (PHCT)

The concentration in philosophy and cultural theory is especially for students interested in pursuing a doctorate in cultural studies. Students may apply up to 9 credits from other departments toward this concentration with prior written approval of their advisor.

Code	Title	Credits

Dual Degree Options

Philosophy, MA and Interdisciplinary Studies, MAIS Dual Degree

Students interested in pursuing a dual master's program linking philosophy and another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master's Degree Programs. Students approved to pursue dual master's study linking the MA philosophy degree and the Interdisciplinary Studies, MAIS with a concentration in women and gender studies will complete WMST 630 Feminist Theories across the Disciplines/PHIL 658 Feminist Theory and 3 additional credits of WMST courses approved by the Department of Philosophy to apply to the philosophy degree as elective credit. Six credits of approved PHIL credits will apply to the MAIS degree as elective credit. Application to the second master's program should be pursued with consultation of the directors of both programs. Admission to the second master's program will require that the student has met the minimum prerequisites for admission to the second program. If a student lacks the minimum prerequisites and seeks to be admitted to a second master's program, the director of the second program may identify ways in which the prerequisite can be completed prior to admission.

Accelerated Master's

Philosophy, BA/Philosophy, Accelerated MA

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA in Philosophy and an MA in Philosophy in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate

degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://philosophy.gmu.edu/programs/la-ma-acel-phil/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits and after completing the following:

- 9 upper level credits in philosophy.
- At least two of the following with a grade of B or higher in each: PHIL 301 History of Western Philosophy: Ancient, PHIL 303 History of Western Philosophy: Modern, or PHIL 173 Logic and Critical Thinking

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Minimum grade of 3.00 in each advanced standing course

Political Philosophy Minor

Banner Code: PPHL

Academic Advising

6300 Horizon Hall
Fairfax Campus

Website: philosophy.gmu.edu/programs/la-minor-la-pphl

This minor provides students with an intensive study of political philosophy and political theory. Students take courses in the history of political philosophy; the moral evaluation of political institutions; the ethical, social, and political issues raised by globalization; and the conceptual foundations of democracy and human rights. Through this coursework, students are able to study this field from a variety of interdisciplinary perspectives. They develop a deeper philosophical perspective on political institutions and have a solid foundation for further graduate study in philosophy, government, or policy studies.

Faculty

Brandhorst, Cherubin, Fyfe, Mandaville, Miller (Director), Scherer

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
Select two courses from the following:		6
PHIL 323	Classical Western Political Theory	
or GOVT 323	Classical Western Political Theory	
PHIL 324	Modern Western Political Theory	
or GOVT 324	Modern Western Political Theory	
PHIL 327	Contemporary Western Political Theory	
or GOVT 327	Contemporary Western Political Theory	
Total Credits		6

Electives

Code	Title	Credits
Select two elective courses from the courses below or above (if not used to meet the core requirement): [1]		6
PHIL 325	Karl Marx's Social and Political Thought	
PHIL 329	Philosophy after Auschwitz	

PHIL 343	Topics in Environmental Philosophy (Mason Core)	
PHIL 344	Ethical Issues in Global Health	
PHIL 353	Theories of Justice	
PHIL 429	Advanced Topics in Social and Political Philosophy	
Select two elective courses from the courses below or above (if not used to meet the core requirement): [1]		6
GOVT 328	Global Political Theory	
GOVT 329	Issues in Political Theories and Values	
GOVT 420	American Political Thought	
GOVT 427	Feminist Political Thought	
GOVT 428	Advanced Democratic Theory	
GOVT 448	Ethics and International Politics	
Total Credits		12

[1] Special topics courses and independent studies courses, when relevant, may also be used to fulfill elective credits with prior written approval of the director.

Department of Psychology

2086 David King Hall
Fairfax Campus

Phone: 703-993-1384
Website: psychology.gmu.edu

Undergraduate Programs

The department offers a bachelor of arts degree and a bachelor of science degree in psychology. All psychology majors complete a broad range of courses from social and abnormal psychology to cognitive and biopsychology. Students can also choose from special topics courses such as forensic psychology and romantic relationships.

In addition to the general degree in psychology, students can choose a concentration in clinical psychology, cognitive and behavioral neuroscience, developmental psychology, educational psychology, forensic psychology, health psychology, human factors and applied cognition, or work and organizational psychology. These concentrations may be of interest to students who are planning to attend graduate school.

Students in psychology may have the opportunity to do research with a faculty member or do a service learning course, which allows them to put into practice what they've learned in the classroom.

Students interested in graduate study should be aware that undergraduate research experience and letters of recommendation are major factors for admission to graduate study. Such students should distribute courses across a number of areas in psychology and work closely with one or more professors on individual projects during their junior and senior years.

Minors

The department offers minors in psychology, brain, body, and behavior, clinical psychology, developmental psychology, forensic psychology, health psychology, and industrial/organizational psychology. These minors are available to students in any major in the university.

Bachelor's/Accelerated Master's Program

The department offers highly-qualified undergraduate majors the opportunity to apply to an accelerated master's degree program in psychology with a concentration in cognitive and behavioral neuroscience. If accepted, students will be able to earn both an undergraduate degree and the master's degree with a concentration in cognitive and behavioral neuroscience after satisfactory completion of 138 credits, generally within five years.

Graduate Programs

The graduate programs in psychology are distinguished by an emphasis on basic research and the application of research to solving practical problems in families, schools, industry, government, and health care settings.

The department offers master's and doctoral degrees with concentrations in applied developmental psychology, cognitive and behavioral neuroscience, human factors/applied cognition, and industrial/organizational psychology. It also offers a doctoral degree with a concentration in clinical psychology.

Funding

The department offers teaching and research assistantships, which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Certificates

The department offers graduate certificates in applied psychology, with concentrations in transportation human factors and usability, and cognitive neuroscience. These have been designed to meet the needs of students who desire to upgrade their skills and earn a certificate as evidence of their skill attainment. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the certificate course work may be able to be applied to the degree. Students must apply and be accepted to a graduate certificate program.

The certificate programs are open to all students who hold a bachelor's degree from an accredited university and meet the admissions requirements for the master's degree in psychology with a concentration in human factors and applied cognition.

Non-Degree Status

Applicants who have not been admitted to a graduate degree program or a certificate program may apply for non-degree status. Non-degree students must meet the same admission requirements as degree-seeking students. Non-degree status is not intended as a way to qualify for admission as a degree-seeking student.

While it may be possible to transfer the credits earned in non-degree status to a degree program, such transfers are not automatic. They require the approval of the graduate director and the dean. If approved, a maximum of 12 credits earned in non-degree status may be applied to a degree program. Non-degree students who intend to transfer their credits to a degree program should discuss this with the appropriate program director.

Faculty

Department Faculty

Professors

Cortina, Dalal, Denham, Esposito-Smythers, Helton, Kashdan, Klimoski, Mandes, Mehlenbeck (director, Center for Psychological Services), Pasnak, Renshaw (Chair), Riskind, Rupp, Tangney, Winsler (associate chair for graduate studies), Zaccaro

Research Professors

Olds

Associate Professors

Baldwin (director, Human Factors Program), Bitler, Buffardi, Cattaneo (director, Clinical Program), Chaplin, Curby (director, Applied Developmental Program), Fisher, Flinn (director, Cognitive and Behavioral Neuroscience Program), Goldstein, Kaplan, King, Kuykendall, McDonald, McKnight, Peterson, Rowe, Shaw, Short, J. Thompson

Research Associate Professors

Stuewig

Assistant Professors

Adams, Doebel, Jack, Kornienko, Le, P. Lee, Y. Lee, Phillips, Wiener,

Term Associate Professors

Brielmaier Sontag, Dumas, Hurley, Murdoch (associate chair for undergraduate studies), Ramsdell

Term Assistant Professors

Ahmad, Melley, Smith-Gray, Sontag

Email: szaccaro@gmu.edu
Website: https://masononline.gmu.edu/programs/master-of-professional-studies-in-applied-industrial-organizational-psychology/

George Mason University's online Master of Professional Studies in Applied Industrial and Organizational Psychology provides instruction in research-backed methods and understanding of data and analytics. It is intended to give HR professionals and business professionals the skills they need to foster a culture where each employee feels empowered and motivated to contribute new ideas, effect change, and do their best work every day. Students learn how to assess and evaluate candidates to determine their fit for the company and specific positions, identify employees' individual motivations, establish meaningful evaluations and reward systems, and improve training and performance programs. Main areas of study focus on understanding and applying concepts in: research and data analytic methods, evidence-based practices, and client communication skills.

Admissions & Policies

Admissions

The online master's in organizational psychology program accepts applications on a rolling basis and is currently accepting applications. You can apply here (https://apply-now.force.com/?acctid=0013200001GuY7C).

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Fundamentals of Industrial/Organizational Psychology

Code	Title	Credits
PSYC 598	Introduction to the Science and Practice of Industrial and Organizational Psychology	3
PSYC 641	Foundations of Organizational Psychology	3
PSYC 637	Foundations of Industrial Psychology	3

PSYC 616	Employee Selection	3
Total Credits		12

Principles of Research and Data Analysis in Psychology

Code	Title	Credits
PSYC 603	Psychological Research Methods	3
PSYC 601	Applied Data Analysis in Psychology I	3
PSYC 602	Applied Data Analysis in Psychology II	3
Total Credits		9

Application of Evidenced-Based Principles in Psychology

Code	Title	Credits
Complete one semester (3 credits) of the following:		
PSYC 730	Practicum in Applied Psychology	3
Total Credits		3

Electives

Code	Title	Credits
Select two courses from the following:		6
PSYC 618	Applied Leadership in the Workplace	
PSYC 620	Motivation and Well-Being	
PSYC 622	Applied Teamwork in the Workplace	
PSYC 626	Organizational Change and Development	
PSYC 627	Performance Management

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students pursuing this graduate certificate must choose either a concentration in transportation human factors or a concentration in usability.

Concentration in Transportation Human Factors (TRHF)

Core Courses

Code	Title	Credits
PSYC 530	Cognitive Engineering: Cognitive Science Applied to Human Factors	3
PSYC 645	Research Methods in Human Factors and Applied Cognition	3
PSYC 734	Seminar in Human Factors and Applied Cognition [1]	3
Total Credits		9

[1] Only when aviation-related topic is approved for this concentration by the program director.

Electives

Code	Title	Credits
Select two electives from the following:		6
PSYC 597	Directed Reading and Research [1]	
PSYC 768	Advanced Topics in Cognitive Science	
SYST 560	Introduction to Air Traffic Control	
SYST 671	Judgment and Choice Processing and Decision Making	
Total Credits		6

[1] Only when topic is approved for this concentration.

Concentration in Usability (UBTY)

Core Courses

Code	Title	Credits
PSYC 530	Cognitive Engineering: Cognitive Science Applied to Human Factors	3
PSYC 645	Research Methods in Human Factors and Applied Cognition	3
Total Credits		6

Electives

Code	Title	Credits
Select three electives from the following:		9
PSYC 597	Directed Reading and Research [1]	
PSYC 654	Naturalistic Methods in Psychology	
PSYC 734	Seminar in Human Factors and Applied Cognition [1]	
PSYC 768	Advanced Topics in Cognitive Science	
EDIT 526	Web Accessibility and Design	
EDIT 571	Visual Design and Applications	

EDIT 705	Instructional Design	
EDIT 773	Human Computer Interface Design for Teaching and Learning	
Total Credits		9

[1] Only when topic is approved for this concentration.

Brain, Body and Behavior Minor

Banner Code: BBB

Academic Advising

2086 David King Hall
Fairfax Campus

Email: upsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-minor-psyc-bbb/overview

The courses included in this minor emphasize the behavioral consequences of both normal and abnormal neuronal and physiological processes. These in-depth courses will broaden the students' knowledge in understanding brain and behavior, specifically, but not exclusively, the cognitive aspects.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.80. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 21

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Required Courses

Code	Title	Credits
PSYC 304	Principles of Learning	4
PSYC 373	Biopsychology Laboratory	2
PSYC 375	Brain and Sensory Processes	3
PSYC 376	Brain and Behavior	3
Total Credits		12

Electives

Code	Title	Credits
Select a minimum of 9 credits from the following: [1]		9
NEUR 327	Cellular, Neurophysiological, and Pharmacological Neuroscience	
NEUR 335	Molecular, Developmental, and Systems Neuroscience	
PSYC 309	Sensation, Perception, and Information Processing	
PSYC 460	Independent Study in Psychology [2]	
PSYC 461	Special Topics [3]	
PSYC 480	Biological Bases of Alzheimer's Disease	
PSYC 472	Current Topics in Brain and Behavior [4]	
Other course as approved by the undergraduate associate chair		
Total Credits		9

[1] Students who are accepted into and successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on cognitive and behavioral neuroscience may apply this coursework to the minor.

[2] With permission of CBN faculty member.

[3] When approved by the undergraduate associate chair and topic is *Music and the Brain*, *Neuronal Aspects of Cognitive Development*, *Animal Cognition*, or *Psychology of Stress and Health.*

[4] When approved by the undergraduate associate chair and topic is *Neuronal Bases of Learning and Memory*, *Drugs and the Brain*, or *Brain in Books and Film*.

Clinical Psychology Minor

Banner Code: CLPY

Academic Advising

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-minor-psyc-clpy

The required courses of the minor provide a foundation in psychology and focus on assessment and treatment of distress and dysfunction. The electives provide in-depth knowledge of normal development, psychological theories, psychological disorders, and treatment techniques.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete 19 credits of psychology with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 19

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
PSYC 301	Research Methods in Psychology	4
PSYC 321	Clinical Psychology	3
PSYC 325	Abnormal Psychology	3
Total Credits		13

Electives

Code	Title	Credits
Select at least two courses from the following:		6
PSYC 211	Developmental Psychology (Mason Core) (or PSYC 313 or PSYC 314)	
PSYC 231	Social Psychology (Mason Core)	
PSYC 322	Behavior Modification	
PSYC 324	Personality Theory	
PSYC 326	Therapeutic Communication Skills	
PSYC 414	Behavior Disorders of Childhood	
PSYC 423	Group Psychotherapy Techniques	
PSYC 430	Clinical Practicum in Psychology	
PSYC 460	Independent Study in Psychology	
PSYC 461	Special Topics [1]	
Total Credits		6

[1] When topic is related to clinical psychology approved by the psychology department.

Cognitive Neuroscience Graduate Certificate

Banner Code: LA-CERG-CNEU

Academic Advising

2086 David King Hall
Fairfax Campus

Email: psycgrad@gmu.edu
Website: psychology.gmu.edu/programs/la-cerg-cneu

The Department of Psychology offers a graduate certificate in cognitive neuroscience under the auspices of the program in Human Factors/ Applied Cognition.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the graduate certificate in cognitive neuroscience, see Application Requirements and Deadlines (http://psychology.gmu.edu/programs/LA-CERG-CNEU/application/).

Policies

For policies governing all graduate certificates, see AP.6 Graduate Policies.

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Core Courses

Code	Title	Credits
PSYC 530	Cognitive Engineering: Cognitive Science Applied to Human Factors	3
Six credits of		6
PSYC 768	Advanced Topics in Cognitive Science [1]	
Total Credits		9

[1] Topic must be relevant to cognitive neuroscience. This course is repeatable when the specific topic is different.

Additional Course

Code	Title	Credits
Select one course from the following:		3
PSYC 531	Mammalian Neurobiology	
PSYC 558	Neuronal Bases of Learning and Memory	
PSYC 559	Behavioral Chemistry	
Total Credits		3

Electives

Code	Title	Credits
Select two electives from the following:		6
PSYC 702	Biological Bases of Human Behavior	
PSYC 597	Directed Reading and Research [1]	
PSYC 768	Advanced Topics in Cognitive Science [1]	
Total Credits		6

[1] May be used to fulfill this requirement when the topic is relevant to the certificate with prior written approval of the program director.

Developmental Psychology Minor

Banner Code: DVLP

Academic Advising

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-minor-psyc-dvlp

This minor is designed to provide students with an understanding of the ways in which humans change over time. Coursework provides for a broad foundation in psychology across the lifespan while also allowing for students to focus on a developmental period (e.g. childhood).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Required Courses

Code	Title	Credits
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
PSYC 211	Developmental Psychology (Mason Core)	3
Total Credits		6

Electives

Code	Title	Credits
Select a minimum of 12 credits from the following:		12
PSYC 313	Child Development	
PSYC 314	Adolescent Development	
PSYC 379	Applied Cross-Cultural Psychology (Mason Core)	
PSYC 414	Behavior Disorders of Childhood	
PSYC 415	Psychological Factors in Aging	
PSYC 460	Independent Study in Psychology [1]	
PSYC 461	Special Topics [2]	
HDFS 200	Individual and Family Development (Mason Core)	
Total Credits		12

1 When content is developmental, with approval.

2 When topic is developmental, when approved by Psychology Associate Chair of Undergraduate Studies.

Forensic Psychology Minor

Banner Code: FPSY

Academic Advising

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-minor-psyc-fpsy

This minor is designed to supplement the study of psychology, criminology, or other justice-related areas with an overview of the intersection of psychology and the criminal justice system. The minor focuses specifically on mental illness in the criminal justice system, the psychological experiences of victims, psychological science in the courtroom, and psychological factors related to criminal behavior.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 15

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
PSYC 380	Introduction to Forensic Psychology	3
PSYC 381	Mental Illness and Criminal Justice	3
Total Credits		9

Electives

Code	Title	Credits
Select two courses from the following:		6
PSYC 382	Psychology of Crime Victims	
PSYC 440	Forensic Psychology: Science and Pseudoscience	
PSYC 441	Criminal Behavior: Psychological and Neurological Aspects	
CRIM 100	Introduction to Criminal Justice (Mason Core)	
PSYC 461	Special Topics [1]	
PSYC 462	Selected Topics in Forensic Psychology [1]	
Total Credits		6

1 with Undergraduate Associate Chair approval

Health Psychology Minor

Banner Code: HPSY

Academic Advising

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu

Website: psychology.gmu.edu/programs/la-minor-psyc-hpsy

This minor is designed to help students better understand psychological factors that influence overall health. The courses provide instruction on factors that have the potential to impact both physical and psychological health. These include the roles of cognitive processes, health beliefs and behaviors, emotions, psychosocial circumstances and personality traits, all factors that may influence overall health and well-being.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Electives

Code	Title	Credits
Select at least 8 credits from the following:		8
PSYC 320	Psychological Tests and Measurements	
PSYC 335	Psychology of Creativity and Innovation	
PSYC 435	Personnel Training and Development: A Psychological Perspective	
PSYC 461	Special Topics (when topic is Occupational Health Psychology or Work and Family with prior written approval)	

PSYC 467	The Psychology of Working in Groups and Teams	
MBUS 301	Managing People and Organizations in a Global Economy [1]	
MGMT 303	Principles of Management [1]	
Total Credits		8

[1] Students may take MGMT 303 or MBUS 301 for credit, but not both.

Psychology Minor

Banner Code: PSYC

Academic Advising

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: http://psychology.gmu.edu/programs/la-minor-psyc-psyc

Coursework in psychology can enhance many different majors, and the minor in psychology is available to students in any major at Mason. For a list of suggested courses for students who are majoring in specific disciplines that interact especially well with psychology, contact the Undergraduate Psychology Office (http://psychology.gmu.edu/contact/).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
Total Credits		3

Areas of Psychology

Code	Title	Credits
Select three courses in three of the following areas of Psychology: [1]		9-12
Abnormal:		
PSYC 325	Abnormal Psychology	
Cognition:		
PSYC 317	Cognitive Psychology	
Developmental:		
PSYC 211	Developmental Psychology (Mason Core)	
PSYC 313	Child Development	
Physiological:		
PSYC 372	Biopsychology	
or PSYC 375 & PSYC 376	Brain and Sensory Processes and Brain and Behavior	
Social/Personality:		
PSYC 231	Social Psychology (Mason Core)	
PSYC 324	Personality Theory	
Total Credits		9-12

[1] Students must choose cognition or physiological as one of the three areas, though they may choose both.

Electives

Code	Title	Credits
Select one or two PSYC courses [1]		3-6
Total Credits		3-6

[1] No more than three credits of PSYC 260, PSYC 350, and PSYC 460 (in total) may be used as elective credit toward the minor. Students who take PSYC 375 and PSYC 376 in the physiological area above will only take 3 elective credits.

Psychology, BA

Banner Code: LA-BA-PSYC

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-ba-psyc

Students study behavior as it relates to health and well-being, child and adolescent development, education, social situations, the workplace, and the use of technology. Due to Mason's proximity to Washington, D.C. the department is especially active in research that informs public policy and national defense. Students who graduate from this program go on to work in a wide range of fields and positions, including human resources, data analysis, user interface design, and social media and marketing.

The Bachelor of Arts in Psychology focuses on liberal arts and general education courses, including a foreign language requirement, within the psychology field.

Admissions & Policies

Policies

Students pursuing this degree must complete 37 credits within the major, with 24 credits at the 300 and 400 level.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students may choose to complete a concentration in forensic psychology, human factors and applied cognition, work and organizational psychology, clinical psychology, developmental psychology, educational psychology, or health psychology. Courses required for a concentration may simultaneously satisfy other degree requirements. The concentrations in forensic psychology, human factors and applied cognition, and work and organizational psychology meet the applied psychology requirement.

Students who have limited technology skills are encouraged to take IT 104 Introduction to Computing.

Core Courses in the Major

Basic Courses in Psychology

Students must have a minimum GPA of 2.00 in these courses with a minimum grade of 1.67 (C-) in each one. Courses taken to fulfill these requirements may simultaneously satisfy a concentration.

Code	Title	Credits
Introductory Course		
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
Foundational Courses		
PSYC 231	Social Psychology (Mason Core)	3
PSYC 317	Cognitive Psychology	3
Select one option from the following:		3-6
Option 1:		
PSYC 211	Developmental Psychology (Mason Core)	
Option 2:		
Select two from the following:		
PSYC 313	Child Development	
PSYC 314	Adolescent Development	
PSYC 415	Psychological Factors in Aging	
Research Methods Courses [1]		
PSYC 300	Statistics in Psychology	4
PSYC 301	Research Methods in Psychology	4
Biopsychology [2]		
Select one from the following: [3]		3-6
PSYC 372	Biopsychology	
PSYC 375 & PSYC 376	Brain and Sensory Processes and Brain and Behavior	
Professional Development		
Select one from the following:		3
PSYC 399	Psychology: College to Career	
PSYC 327	Psychology in the Community	
PSYC 427	Community Engagement for Social Change (Mason Core) [4]	
PSYC 430	Clinical Practicum in Psychology [4]	
PSYC 491	Psychology Honors II	
PSYC 492	RS: Psychology Honors III	
PSYC 461	Special Topics (with Undergraduate Associate Chair Approval)	
Total Credits		26-32

1. Students are strongly encouraged to complete PSYC 300 Statistics in Psychology and PSYC 301 Research Methods in Psychology by their junior year. PSYC 300 Statistics in Psychology is a prerequisite to several courses, and a background in research methods facilitates understanding empirical research discussed in all psychology courses.
2. It is strongly recommended that students fulfill the Mason Core natural science requirement by completing BIOL 103 Introductory Biology II-Survey of Cell and Molecular Biology (Mason Core) and BIOL 107 Intro Biology II Lecture (Mason Core)/BIOL 106 Introductory Biology II Laboratory (Mason Core) because these courses are prerequisites to the requirement of PSYC 372 Biopsychology or PSYC 375 Brain and Sensory Processes and PSYC 376 Brain and Behavior.
3. Only students who receive transfer credit for PSYC 372 Biopsychology may use it in place of PSYC 375 Brain and Sensory Processes as the prerequisite for PSYC 376 Brain and Behavior. Students taking PSYC 372 Biopsychology at Mason may not use it in place of PSYC 375 Brain and Sensory Processes.
4. PSYC 427 Community Engagement for Social Change (Mason Core) and PSYC 430 Clinical Practicum in Psychology may count for both the Professional Development and the Applied Psychology requirements.

Applied Psychology Courses or Optional Concentration

Alternatively, students may earn a concentration in forensic psychology, human factors and applied cognition, or work and organizational psychology to satisfy this requirement.

Applied Psychology

Code	Title	Credits
Students pursuing the BA without concentration complete two courses from the following with a minimum grade of C- in each:		6-7
PSYC 320	Psychological Tests and Measurements	
PSYC 325	Abnormal Psychology	
PSYC 333	Industrial and Organizational Psychology	
PSYC 340	Human Factors Psychology	
PSYC 379	Applied Cross-Cultural Psychology (Mason Core)	
PSYC 381	Mental Illness and Criminal Justice	
PSYC 427	Community Engagement for Social Change (Mason Core) [1]	
PSYC 430	Clinical Practicum in Psychology [1]	
Total Credits		6-7

1. PSYC 427 may count for both the Applied Psychology and the Professional Development requirements.

Concentrations Meeting Applied Psychology Requirement
Concentration in Forensic Psychology (FPSY)
Students pursuing the BA with concentration in forensic psychology take 15 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on forensic psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
PSYC 380	Introduction to Forensic Psychology	3
PSYC 381	Mental Illness and Criminal Justice	3
Select two courses from the following:		6
PSYC 382	Psychology of Crime Victims	
PSYC 440	Forensic Psychology: Science and Pseudoscience	
PSYC 441	Criminal Behavior: Psychological and Neurological Aspects	
CRIM 100	Introduction to Criminal Justice (Mason Core)	
PSYC 461	Special Topics [1]	
PSYC 462	Selected Topics in Forensic Psychology [1]	
Total Credits		15

1 Only with Undergraduate Associate Chair approval.

Concentration in Human Factors and Applied Cognition (HF)
Students pursuing the BA with concentration in human factors and applied cognition take 12-13 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on human factors or applied cognition may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 317	Cognitive Psychology	3
PSYC 340	Human Factors Psychology	3
Select two courses from the following:		6-7
PSYC 309	Sensation, Perception, and Information Processing	
PSYC 333	Industrial and Organizational Psychology	
PSYC 372	Biopsychology	
PSYC 460	Independent Study in Psychology [1]	
PSYC 461	Special Topics [3]	
PSYC 530	Cognitive Engineering: Cognitive Science Applied to Human Factors [2]	
Total Credits		12-13

1 Must be taken with human factors and applied cognition faculty member.
2 Note course prerequisite of PSYC 317 Cognitive Psychology.
3 Only with Undergraduate Associate Chair approval.

Concentration in Work and Organizational Psychology (WKOP)
Students pursuing the BS with concentration take 12-13 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on I/O psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute the honors work for one course in the concentration.

Code	Title	Credits
PSYC 333	Industrial and Organizational Psychology	3
Select three courses from the following:		9-10
PSYC 320	Psychological Tests and Measurements	
PSYC 335	Psychology of Creativity and Innovation	
PSYC 435	Personnel Training and Development: A Psychological Perspective	
PSYC 467	The Psychology of Working in Groups and Teams	
PSYC 461	Special Topics [1]	
MBUS 301	Managing People and Organizations in a Global Economy [2]	
or MGMT 303	Principles of Management	
Total Credits		12-13

1 Only when topic is Occupational Health Psychology or Work and Family with prior written approval.
2 Students may take MBUS 301 or MGMT 303 for credit, but not both.

Other Concentrations Available to Majors

Students may choose to complete a concentration in clinical psychology, developmental psychology, educational psychology, or health psychology.

Available Concentrations

- Concentration in Clinical Psychology (CLPY)
- Concentration in Cognitive and Behavioral Neuroscience (CBNR)
- Concentration in Developmental Psychology (DVLP)
- Concentration in Educational Psychology (EPSY)
- Concentration in Health Psychology (HPSY)

Concentration in Clinical Psychology (CLPY)

Students pursuing the BA with this concentration take 12 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on clinical psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 321	Clinical Psychology	3
PSYC 325	Abnormal Psychology	3
Select at least two psychology electives from the following		6
PSYC 211	Developmental Psychology (Mason Core)	
or PSYC 313	Child Development	
or PSYC 314	Adolescent Development	
PSYC 231	Social Psychology (Mason Core)	
PSYC 322	Behavior Modification	
PSYC 324	Personality Theory	
PSYC 326	Therapeutic Communication Skills	
PSYC 414	Behavior Disorders of Childhood	
PSYC 423	Group Psychotherapy Techniques	
PSYC 430	Clinical Practicum in Psychology	
PSYC 460	Independent Study in Psychology	
PSYC 461	Special Topics [1]	
PSYC 465	Pioneering Ideas in Psychology	

[1] Only when topic is related to clinical psychology approved by the psychology department.

Concentration in Cognitive and Behavioral Neuroscience (CBNR)

This concentration focuses on laboratory experience in cognitive and behavioral neuroscience and more in-depth courses of interest that will broaden the students' knowledge in understanding brain and behavior.

Students pursuing the BA with this concentration take 15 credits. Students must earn a minimum GPA of 3.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on cognitive and behavioral neuroscience may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 373	Biopsychology Laboratory	2
PSYC 304	Principles of Learning	4
Select a minimum of 9 credits from the following:		9
PSYC 309	Sensation, Perception, and Information Processing	
PSYC 460	Independent Study in Psychology [1]	
PSYC 480	Biological Bases of Alzheimer's Disease	
PSYC 472	Current Topics in Brain and Behavior [2]	
PSYC 461	Special Topics [3]	
Total Credits		15

[1] With permission of a CBN faculty member.

[2] When approved by the undergraduate associate chair and topic is Neuronal Bases of Learning and Memory, Drugs and the Brain, or Brain in Books and Film.

[3] When approved by undergraduate associate chair and topic is Music and the Brain, Neuronal Aspects of Cognitive Development, Animal Cognition, or Psychology of Stress and Health.

Concentration in Developmental Psychology (DVLP)

The concentration in developmental psychology may be of interest to students who are planning to attend graduate school in developmental psychology or a related field, such as human development and family studies, school psychology, or clinical child psychology. Students who are considering a career in school psychology or education may also find this concentration advantageous.

Students pursuing the BA with this concentration take 12 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on developmental psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 211	Developmental Psychology (Mason Core)	3
PSYC 313	Child Development	3
Select two courses from the following:		6
PSYC 314	Adolescent Development	
PSYC 379	Applied Cross-Cultural Psychology (Mason Core)	
PSYC 414	Behavior Disorders of Childhood	
PSYC 415	Psychological Factors in Aging	
PSYC 460	Independent Study in Psychology [1]	
PSYC 461	Special Topics [1]	
Total Credits		12

[1] Only when content is developmental, with prior written approval.

Concentration in Educational Psychology (EPSY)

Students pursuing the BA with concentration in educational psychology take 12 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on educational psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 312	Educational Psychology	3
PSYC 320	Psychological Tests and Measurements	4
Select two courses from the following:		6
PSYC 304	Principles of Learning	
PSYC 313	Child Development	
PSYC 314	Adolescent Development	
PSYC 322	Behavior Modification	
PSYC 460	Independent Study in Psychology [1]	
PSYC 461	Special Topics [1]	
PSYC 558	Neuronal Bases of Learning and Memory	
Total Credits		13

[1] Educational content only, with department approval.

Concentration in Health Psychology (HPSY)

Students pursuing the BA with concentration in health psychology take 12 credits. Students must earn a minimum GPA of 2.00 in all course workapplied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on health or well-being may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 417	Science of Well Being	3
Select three courses from the following:		9
PSYC 211	Developmental Psychology (Mason Core)	
PSYC 321	Clinical Psychology	
PSYC 325	Abnormal Psychology	
PSYC 408	Psychological Fitness	
PSYC 461	Special Topics [1]	
Total Credits		12

[1] Only when topic is related to health and well-being and approved by the psychology department.

Electives in the Major

Students complete the 37 required credits with electives in psychology (PSYC) with the following restrictions.

- A maximum of 6 credits of PSYC 327 Psychology in the Community and PSYC 328 Psychology in the Community Laboratory may be applied to required psychology credits.
- A maximum of 6 credits of PSYC 260 Basic Research Methods in Psychology, PSYC 350 Directed Reading and Research in Psychology, and PSYC 460 Independent Study in Psychology may be applied to required psychology credits.
- No more than 9 credits of PSYC 327 Psychology in the Community, PSYC 328 Psychology in the Community Laboratory, PSYC 260 Basic Research Methods in Psychology, PSYC 350 Directed Reading and Research in Psychology, and PSYC 460 Independent Study in Psychology can be taken without written permission of the department chair.
- No more than 6 credits of D may be applied toward this requirement.

PSYC 465 Pioneering Ideas in Psychology is strongly recommended for all students who plan to attend graduate school in psychology.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in psychology may fulfill this requirement by successfully completing PSYC 301 Research Methods in Psychology, PSYC 304 Principles of Learning, or PSYC 309 Sensation, Perception, and Information Processing. Students who receive transfer credit for a research methods course must take PSYC 304 Principles of Learning or PSYC 309 Sensation, Perception, and Information Processing unless the transfer course has been approved as writing intensive.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	

GGS 305	Economic Geography
GGS 306	Urban Geography
GGS 315	Geography of the United States
GGS 316	Geography of Latin America
GGS 320	Geography of Europe
GGS 325	Geography of North Africa and the Middle East
GGS 330	Geography of the Soviet Succession States
GGS 357	Urban Planning
GGS 380	Geography of Virginia

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	3
ANTH 381	Medical Anthropology	3
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core)	3
ARAB 360	Topics in Arabic Cultural Production	3
ARAB 420	Survey of Arabic Literature	3
ARAB 440	Topics in Arabic Religious Thought and Texts (Mason Core)	3
ARTH 203	Survey of Asian Art (Mason Core)	3
ARTH 204	Survey of Latin American Art (Mason Core)	3
ARTH 206	Survey of African Art (Mason Core)	3

RUSS 354	Contemporary Post-Soviet Life (Mason Core)	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7

Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in Psychology Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Honors

Honors in the Major

Highly-qualified students may apply to graduate with honors in the major. To be eligible for admission, psychology majors must have completed at least 50 credits and have a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

If accepted, students must take a sequence of three courses, which culminates in the successful completion and presentation of an independent honors thesis.

To graduate with honors, students must earn a minimum GPA of 3.50 in their honors courses and maintain a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

Accelerated Master's

The accelerated master's program in the list below specifies the BA in psychology as a feeder degree for its program. Many other accelerated master's programs are also available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Psychology, BA or BS/Psychology, Accelerated MA (Cognitive and Behavioral Neuroscience Concentration)

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in Psychology and an MA in Psychology, with a concentration in cognitive and behavioral neuroscience, in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6. Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://psychology.gmu.edu/programs/la-ma-acel-psyc/overview/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and completion of 12 hours of psychology coursework including one of the following combinations of courses:

PSYC 300 Statistics in Psychology
PSYC 372 Biopsychology

OR

PSYC 300 Statistics in Psychology
PSYC 375 Brain and Sensory Processes and PSYC 376 Brain and Behavior

Students are strongly encouraged to have obtained previous research lab experience and to have one reference letter from the faculty member who will serve as their advisor.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits) with a minimum grade of B in each

PSYC 531 Mammalian Neurobiology (3 credits)
PSYC 558 Neuronal Bases of Learning and Memory (3 credits)
PSYC 555 Neuroimaging (3 credits)
PSYC 559 Behavioral Chemistry (3 credits)
PSYC 592 Special Topics (3 credits) when the topic is Animal Behavior, Biological Bases of Alzheimer's Disease, Human Brain Stimulation, Cognitive Electrophysiology or Comparative Cognition. Can be repeated if the topic differs.

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

PSYC 531 Mammalian Neurobiology (3 credits)
PSYC 558 Neuronal Bases of Learning and Memory (3 credits)

PSYC 555 Neuroimaging (3 credits)
PSYC 559 Behavioral Chemistry (3 credits)
PSYC 592 Special Topics (3 credits) when the topic is Animal Behavior, Biological Bases of Alzheimer's Disease, Human Brain Stimulation, Cognitive Electrophysiology or Comparative Cognition. Can be repeated if the topic differs.
PSYC 611 Advanced Statistics (4 credits)

For more detailed information on coursework and timeline requirements, see AP.6.7.Bachelor's/Accelerated Master's Degree policies.

Psychology, BS

Banner Code: LA-BS-PSYC

2086 David King Hall
Fairfax Campus

Email: ugpsyc@gmu.edu
Website: psychology.gmu.edu/programs/la-bs-psyc

Students study behavior as it relates to health and well-being, child and adolescent development, education, social situations, the workplace, and the use of technology. Due to Mason's close proximity to Washington, D.C. the department is especially active in research that informs public policy and national defense. Students who graduate from this program go on to work in a wide range of fields and positions, including human resources, data analysis, user interface design, and social media and marketing.

The BS in Psychology focuses on math and science within the psychology field.

Admissions & Policies

Policies

Students pursuing this degree must complete at least 39 credits in psychology and 35 credits in supporting courses. Of the 39 credits earned through basic psychology courses, applied psychology courses and electives, 24 credits must be at the 300 and 400 level.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students may choose to complete a concentration in clinical psychology, cognitive and behavioral neuroscience, developmental psychology, educational psychology, forensic psychology, health psychology, human factors and applied cognition, or work and organizational psychology. Courses required for a concentration may simultaneously satisfy other degree requirements. The concentrations in forensic psychology, human factors and applied cognition, and work and organizational psychology meet the applied psychology requirement.

Students who have limited technology skills are encouraged to take IT 104 Introduction to Computing (Mason Core).

Core Courses in the Major

Basic Courses in Psychology

Students must have a minimum GPA of 2.00 in these courses with a minimum grade of 1.67 (C-) in each one. Courses taken to fulfill these requirements may simultaneously satisfy a concentration.

Code	Title	Credits
Introductory Course		
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
Foundational Courses		
PSYC 231	Social Psychology (Mason Core)	3
PSYC 317	Cognitive Psychology	3
Select one option from the following:		3-6
Option 1:		
PSYC 211	Developmental Psychology (Mason Core)	
Option 2:		
Select two from the following:		
PSYC 313	Child Development	
PSYC 314	Adolescent Development	
PSYC 415	Psychological Factors in Aging	
Research Methods Courses [1]		
PSYC 300	Statistics in Psychology	4
PSYC 301	Research Methods in Psychology	4
Psychology Lab Course		
Select one course from the following: [2]		1-4
PSYC 304	Principles of Learning	
PSYC 309	Sensation, Perception, and Information Processing	
PSYC 320	Psychological Tests and Measurements	
PSYC 373	Biopsychology Laboratory	
Biopsychology		
Select one from the following: [3]		3-6
PSYC 372	Biopsychology	
PSYC 375 & PSYC 376	Brain and Sensory Processes and Brain and Behavior	
Professional Development		
Select one course from the following:		3
PSYC 399	Psychology: College to Career	
PSYC 327	Psychology in the Community	
PSYC 427	Community Engagement for Social Change (Mason Core) [4]	
PSYC 430	Clinical Practicum in Psychology [4]	
PSYC 491	Psychology Honors II	
PSYC 492	RS: Psychology Honors III	
PSYC 461	Special Topics (with Undergraduate Associate Chair approval)	
Total Credits		27-36

1 Students are strongly encouraged to complete PSYC 300 Statistics in Psychology and PSYC 301 Research Methods in Psychology by their junior year. PSYC 300 Statistics in Psychology is a prerequisite to several courses, and a background in research methods facilitates understanding empirical research discussed in all psychology courses.

2 The course chosen to fulfill this requirement cannot be the same course used to fulfill the technical writing requirement below. PSYC 320 may count for both the Psychology Lab and the Applied Psychology requirements.

3 Students who have a strong interest in biopsychology or cognitive neuroscience are encouraged to take PSYC 375 Brain and Sensory Processes/PSYC 376 Brain and Behavior rather than PSYC 372 Biopsychology. Only students who receive transfer credit for PSYC 372 Biopsychology may use it in place of PSYC 375 Brain and Sensory Processes as the prerequisite for PSYC 376 Brain and Behavior. Students taking PSYC 372 Biopsychology at Mason may not use it in place of PSYC 375 Brain and Sensory Processes.

4 PSYC 427 Community Engagement for Social Change (Mason Core) and PSYC 430 Clinical Practicum in Psychology may count for both the Professional Development and the Applied Psychology requirements.

Applied Psychology Courses or Optional Concentration

Alternatively, students may earn a concentration in forensic psychology, human factors and applied cognition, or work and organizational psychology to satisfy this requirement.

Applied Psychology

Code	Title	Credits
Students pursuing the BA without concentration complete two courses from the following with a minimum grade of C- in each:		6-7
PSYC 320	Psychological Tests and Measurements [1]	
PSYC 325	Abnormal Psychology	
PSYC 333	Industrial and Organizational Psychology	
PSYC 340	Human Factors Psychology	
PSYC 379	Applied Cross-Cultural Psychology (Mason Core)	
PSYC 381	Mental Illness and Criminal Justice	
PSYC 427	Community Engagement for Social Change (Mason Core) [2]	
PSYC 430	Clinical Practicum in Psychology [2]	
Total Credits		6-7

1 PSYC 320 Psychological Tests and Measurements may count for both the Applied Psychology and the Psychology Lab requirements or for both the Applied Psychology and the Technical Writing requirements.

2 PSYC 427 Community Engagement for Social Change (Mason Core) and PSYC 430 Clinical Practicum in Psychology may count for both the Applied Psychology and the Professional Development requirements.

Concentrations Meeting Applied Psychology Requirement

Concentration in Forensic Psychology (FPSY)

Students pursuing the BS with concentration in forensic psychology take 15 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on forensic psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
PSYC 380	Introduction to Forensic Psychology	3
PSYC 381	Mental Illness and Criminal Justice	3
Select two courses from the following:		6
PSYC 382	Psychology of Crime Victims	
PSYC 440	Forensic Psychology: Science and Pseudoscience	
PSYC 441	Criminal Behavior: Psychological and Neurological Aspects	
CRIM 100	Introduction to Criminal Justice (Mason Core)	
PSYC 461	Special Topics [1]	
PSYC 462	Selected Topics in Forensic Psychology [1]	
Total Credits		15

1 Requires Undergraduate Associate Chair approval.

Concentration in Human Factors and Applied Cognition (HF)

Students pursuing the BS with concentration in human factors and applied cognition take 12-13 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on human factors or applied cognition may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 317	Cognitive Psychology	3
PSYC 340	Human Factors Psychology	3
Select two courses from the following:		6-7
PSYC 309	Sensation, Perception, and Information Processing	
PSYC 333	Industrial and Organizational Psychology	
PSYC 372	Biopsychology	
PSYC 460	Independent Study in Psychology [1]	
PSYC 461	Special Topics [3]	
PSYC 530	Cognitive Engineering: Cognitive Science Applied to Human Factors [2]	
Total Credits		12-13

1 Must be taken with a human factors and applied cognition faculty member.

2 Note course prerequisite of PSYC 317 Cognitive Psychology.

3 Only with Undergraduate Associate Chair approval.

Concentration in Work and Organizational Psychology (WKOP)

Students pursuing the BS with concentration take 12-13 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on I/O psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute the honors work for one course in the concentration.

Code	Title	Credits
Applied Psychology Course		
PSYC 333	Industrial and Organizational Psychology	3
Select three courses from the following:		9-10
PSYC 320	Psychological Tests and Measurements	
PSYC 335	Psychology of Creativity and Innovation	
PSYC 435	Personnel Training and Development: A Psychological Perspective	
PSYC 467	The Psychology of Working in Groups and Teams	
PSYC 461	Special Topics [1]	
MBUS 301	Managing People and Organizations in a Global Economy [2]	
or MGMT 303	Principles of Management	
Total Credits		12-13

1. Only when topic is Occupational Health Psychology or Work and Family with prior written approval.
2. Students may take MBUS 301 or MGMT 303 for credit, but not both.

Other Concentrations Available to Majors

Available Concentrations Available to Majors

- Concentration in Clinical Psychology (CLPY)
- Cognitive and Behavioral Neuroscience (CBNR)
- Concentration in Developmental Psychology (DVLP)
- Concentration in Educational Psychology (EPSY)
- Concentration in Health Psychology (HPSY)

Students may choose to complete a concentration in clinical psychology, cognitive and behavioral neuroscience, developmental psychology, educational psychology, or health psychology.

Concentration in Clinical Psychology (CLPY)

Students pursuing the BS with this concentration take 12 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on clinical psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 321	Clinical Psychology	3
PSYC 325	Abnormal Psychology	3
Select at least two psychology electives from the following		6
PSYC 211	Developmental Psychology (Mason Core)	
or PSYC 313	Child Development	
or PSYC 314	Adolescent Development	
PSYC 231	Social Psychology (Mason Core)	
PSYC 322	Behavior Modification	
PSYC 324	Personality Theory	
PSYC 326	Therapeutic Communication Skills	
PSYC 414	Behavior Disorders of Childhood	
PSYC 423	Group Psychotherapy Techniques	
PSYC 430	Clinical Practicum in Psychology	
PSYC 460	Independent Study in Psychology	
PSYC 461	Special Topics [1]	
PSYC 465	Pioneering Ideas in Psychology	

1. Only when topic is related to clinical psychology approved by the psychology department.

Concentration in Cognitive and Behavioral Neuroscience (CBNR)

This concentration focuses on laboratory experience in cognitive and behavioral neuroscience and more in-depth courses of interest that will broaden the students' knowledge in understanding brain and behavior.

Students pursuing the BS with this concentration take 15 credits. Students must earn a minimum GPA of 3.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on cognitive and behavioral neuroscience may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
Required courses		
PSYC 373	Biopsychology Laboratory	2
PSYC 304	Principles of Learning	4
Select a minimum of 9 credits from the following:		9
PSYC 309	Sensation, Perception, and Information Processing	
PSYC 460	Independent Study in Psychology [1]	
PSYC 480	Biological Bases of Alzheimer's Disease	
PSYC 472	Current Topics in Brain and Behavior [2]	
PSYC 461	Special Topics [3]	
Total Credits		15

1. With permission of a CBN faculty member.
2. With approval of the undergraduate associate chair when the topic is Neuronal Bases of Learning and Memory, Drugs and the Brain, or Brain in Books and Film.
3. With approval of the undergraduate associate chair when the topic is Music and the Brain, Neuronal Aspects of Cognitive Development, Animal Cognition, or Psychology of Stress and Health.

Concentration in Developmental Psychology (DVLP)

The concentration in developmental psychology may be of interest to students who are planning to attend graduate school in developmental

psychology or a related field, such as human development and family studies, school psychology, or clinical child psychology. Students who are considering a career in school psychology or education may also find this concentration advantageous.

Students pursuing the BS with this concentration take 12 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on developmental psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 211	Developmental Psychology (Mason Core)	3
PSYC 313	Child Development	3
Select two courses from the following:		6
PSYC 314	Adolescent Development	
PSYC 379	Applied Cross-Cultural Psychology (Mason Core)	
PSYC 414	Behavior Disorders of Childhood	
PSYC 415	Psychological Factors in Aging	
PSYC 460	Independent Study in Psychology [1]	
PSYC 461	Special Topics [1]	
Total Credits		12

[1] Only when content is developmental, with prior written approval.

Concentration in Educational Psychology (EPSY)

Students pursuing the BS with concentration in educational psychology take 13 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on educational psychology may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 312	Educational Psychology	3
PSYC 320	Psychological Tests and Measurements	4
Select two from the following:		6
PSYC 304	Principles of Learning	
PSYC 313	Child Development	
PSYC 314	Adolescent Development	
PSYC 322	Behavior Modification	
PSYC 460	Independent Study in Psychology [1]	
PSYC 461	Special Topics [1]	
PSYC 558	Neuronal Bases of Learning and Memory	
Total Credits		13

[1] Educational content only, with department approval.

Concentration in Health Psychology (HPSY)

Students pursuing the BS with concentration in health psychology take 12 credits. Students must earn a minimum GPA of 2.00 in all coursework applied to the concentration.

Students who successfully complete the Psychology Department Honors Program (PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III) with an honors thesis/project focused on health or well-being may, with approval of their thesis committees and the associate chair for undergraduate studies, substitute their honors work for one course in the concentration.

Code	Title	Credits
PSYC 417	Science of Well Being	3
Select three from the following:		9
PSYC 211	Developmental Psychology (Mason Core)	
PSYC 321	Clinical Psychology	
PSYC 325	Abnormal Psychology	
PSYC 408	Psychological Fitness	
PSYC 461	Special Topics [1]	
Total Credits		12

[1] Only when topic is related to health and well-being and approved by the psychology department.

Electives in the Major

Students complete the 39 required credits with electives in psychology (PSYC) with the following restrictions.

- A maximum of 6 credits of PSYC 327 Psychology in the Community and PSYC 328 Psychology in the Community Laboratory may be applied to required psychology credits.
- A maximum of 6 credits of PSYC 260 Basic Research Methods in Psychology, PSYC 350 Directed Reading and Research in Psychology, and PSYC 460 Independent Study in Psychology may be applied to required psychology credits.
- No more than 9 credits of PSYC 327 Psychology in the Community, PSYC 328 Psychology in the Community Laboratory, PSYC 260 Basic Research Methods in Psychology, PSYC 350 Directed Reading and Research in Psychology, and PSYC 460 Independent Study in Psychology can be taken without written permission of the department chair.
- No more than 6 credits of D may be applied toward this requirement.

PSYC 465 Pioneering Ideas in Psychology is strongly recommended for all students who plan to attend graduate school in psychology.

If an approved psychology course is used to meet the technical writing requirement, it may also be applied as a psychology elective.

Supporting Courses

These courses broaden the requirements to include humanities and strengthen the science, quantitative and writing components of the degree. Students who successfully complete the Honors College curriculum are required to complete only the quantitative reasoning and natural science support requirements described below. All other supporting requirements are considered met by successful completion of the Honors College curriculum.

Code	Title	Credits
Technical Writing		
Select one of the following: [1]		3-4
ENGH 388	Professional and Technical Writing	
PSYC 304	Principles of Learning	
PSYC 309	Sensation, Perception, and Information Processing	
PSYC 320	Psychological Tests and Measurements	
Successful completion of the psychology honors program: [2]		
Natural Science		
Choose one of the following sequences:		8
BIOL 103 & BIOL 213	Introductory Biology II-Survey of Cell and Molecular Biology (Mason Core) and Cell Structure and Function (Mason Core)	
BIOL 103 & BIOL 107 & BIOL 106	Introductory Biology II-Survey of Cell and Molecular Biology (Mason Core) and Intro Biology II Lecture (Mason Core) and Introductory Biology II Laboratory (Mason Core)	
Two elective courses in the natural sciences. [3]		6-8
Quantitative Reasoning		
Select two courses from the following:		6-8
CDS 292	Introduction to Social Network Analysis (Mason Core)	
MATH 106	Quantitative Reasoning (Mason Core)	
MATH 108	Introductory Calculus with Business Applications (Mason Core)	
MATH 110	Introductory Probability (Mason Core)	
MATH 111	Linear Mathematical Modeling (Mason Core)	
MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 114	Analytic Geometry and Calculus II	
MATH 115	Analytic Geometry and Calculus I (Honors) (Mason Core)	
MATH 123	Calculus with Algebra/Trigonometry, Part A	
MATH 124	Calculus with Algebra/Trigonometry, Part B (Mason Core)	
STAT 250	Introductory Statistics I (Mason Core)	
STAT 350	Introductory Statistics II	
Humanities		
Select one course from the following:		3
PHIL		
RELI		
ARTH		
AVT		
MUSI		
DANC		
THR		
Social and Behavioral Science		
Select two courses from the following: [4]		6
ANTH		
CRIM		
ECON		
GOVT		
HIST		
SOCI		
Any non-psychology course that has been approved to meet the Mason Core requirement in social and behavioral science		
One Additional Course in Humanities or Social and Behavioral Science [5]		**3**

1. The psychology classes in this list may also be applied as a psychology elective. PSYC 320 may count for both the Technical Writing and the Applied Psychology requirements.
2. PSYC 490 Psychology Honors I, PSYC 491 Psychology Honors II, and PSYC 492 RS: Psychology Honors III
3. Students fill the additional science requirement with any two courses in the natural sciences including any EVPP, NEUR, ASTR, BIOL, CHEM, GEOL, and PHYS courses, and any course from the list of approved Mason Core science courses.
4. Courses in psychology may not be used to fulfill this requirement.
5. Select an additional course from the lists under the requirements in humanities and social sciences above (and with the same restrictions).

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in psychology may fulfill this requirement by successfully completing PSYC 301 Research Methods in Psychology, PSYC 304 Principles of Learning, or PSYC 309 Sensation, Perception, and Information Processing. Students who receive transfer credit for a research methods course must take PSYC 304 Principles of Learning, or PSYC 309 Sensation, Perception, and Information Processing unless the transfer course has been approved as writing intensive.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	3
ANTH 381	Medical Anthropology	3
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core)	3
ARAB 360	Topics in Arabic Cultural Production	3
ARAB 420	Survey of Arabic Literature	3
ARAB 440	Topics in Arabic Religious Thought and Texts (Mason Core)	3
ARTH 203	Survey of Asian Art (Mason Core)	3
ARTH 204	Survey of Latin American Art (Mason Core)	3
ARTH 206	Survey of African Art (Mason Core)	3
ARTH 318	Art and Archaeology of Ancient Egypt	3
ARTH 319	Art and Archaeology of the Ancient Near East (Mason Core)	3

RUSS 354	Contemporary Post-Soviet Life (Mason Core)	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3

Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Science in Psychology Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Honors

Honors in the Major

Highly-qualified students may apply to graduate with honors in the major. To be eligible for admission, psychology majors must have completed at least 50 credits and have a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

If accepted, students must take a sequence of three courses, which culminates in the successful completion and presentation of an independent honors thesis.

Code	Title	Credits
PSYC 490	Psychology Honors I	3
PSYC 491	Psychology Honors II	3
PSYC 492	RS: Psychology Honors III	3
Total Credits		9

To graduate with honors, students must earn a minimum GPA of 3.50 in their honors courses and maintain a minimum cumulative GPA of 3.25 and a minimum GPA of 3.40 in psychology courses.

Accelerated Master's

The accelerated master's program listed below specifies the BS in psychology as a feeder degree for its program. Many other accelerated master's programs are available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Psychology, BA or BS/Psychology, Accelerated MA (Cognitive and Behavioral Neuroscience Concentration)

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in Psychology and an MA in Psychology, with a concentration in cognitive and behavioral neuroscience, in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6. Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://psychology.gmu.edu/programs/la-ma-acel-psyc/overview/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and completion of 12 hours of

psychology coursework including one of the following combinations of courses:

PSYC 300 Statistics in Psychology
PSYC 372 Biopsychology

OR

PSYC 300 Statistics in Psychology
PSYC 375 Brain and Sensory Processes and PSYC 376 Brain and Behavior

Students are strongly encouraged to have obtained previous research lab experience and to have one reference letter from the faculty member who will serve as their advisor.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits) with a minimum grade of B in each

PSYC 531 Mammalian Neurobiology (3 credits)
PSYC 558 Neuronal Bases of Learning and Memory (3 credits)
PSYC 555 Neuroimaging (3 credits)
PSYC 559 Behavioral Chemistry (3 credits)
PSYC 592 Special Topics (3 credits) when the topic is Animal Behavior, Biological Bases of Alzheimer's Disease, Human Brain Stimulation, Cognitive Electrophysiology or Comparative Cognition. Can be repeated if the topic differs.

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

PSYC 531 Mammalian Neurobiology (3 credits)
PSYC 558 Neuronal Bases of Learning and Memory (3 credits)
PSYC 555 Neuroimaging (3 credits)
PSYC 559 Behavioral Chemistry (3 credits)
PSYC 592 Special Topics (3 credits) when the topic is Animal Behavior, Biological Bases of Alzheimer's Disease, Human Brain Stimulation, Cognitive Electrophysiology or Comparative Cognition. Can be repeated if the topic differs.
PSYC 611 Advanced Statistics (4 credits)

For more detailed information on coursework and timeline requirements, see AP.6.7.Bachelor's/Accelerated Master's Degree policies.

Psychology, MA (CHSS)

Banner Code: LA-MA-PSYC

Academic Advising

2086 David King Hall
Fairfax Campus

Email: psycgrad@gmu.edu
Website: psychology.gmu.edu/programs/la-ma-psyc

The MA in psychology is distinguished by its emphasis on basic research and the application of research to solve practical problems in families, industry, government, and health care settings. Because of the program's proximity to Washington D.C., students have access to many employment and continuing education opportunities in research, academia, and consulting within government, public, and private settings.

The psychology MA offers the following concentrations:

- applied developmental psychology
- clinical psychology
- cognitive and behavioral neuroscience
- human factors/applied cognition
- industrial/organizational psychology

While the department does not offer a master's degree in clinical or counseling psychology, a master's degree in psychology with a concentration in clinical psychology is available for students who have been admitted to the doctoral program concentration in clinical psychology.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the MA in psychology, see Application Requirements and Deadlines (http://psychology.gmu.edu/programs/LA-MA-PSYC/application/).

Provisional Admission

Students who are admitted provisionally are required to take 12 credits in psychology and earn a minimum GPA of 3.25 in those courses to qualify for removal of the provisional qualifier. Programs may add other conditions to provisional admission. Individualized study courses cannot be used toward the 12 credits.

Policies

For policies governing all graduate degrees, see Graduate Policies.

In addition to satisfying the requirements for all master's degrees, students pursuing a master's degree in psychology must successfully complete 30-32 credits of required coursework. They complete this coursework in one of five concentrations.

A maximum of 6 credits of thesis proposal and thesis research (PSYC 798 Thesis Proposal, PSYC 799 Master's Thesis) may be applied to the master's degree. A maximum of 9 credits of thesis courses (PSYC 798 Thesis Proposal, PSYC 799 Master's Thesis), Directed Reading and

Research (PSYC 597 Directed Reading and Research), and Practicum (PSYC 792 Psychology Practicum) may be applied to the degree.

Requirements

Degree Requirements

Total credits: 30-32

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Choose one concentration and complete the requirements therein.

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Concentration in Applied Developmental Psychology (APD)

The concentration in applied developmental psychology focuses on child development. It provides basic knowledge about normal development, skills for assessing developmental level, and techniques for planning and evaluating programs that foster optimal development. Graduates are prepared for employment at agencies concerned with educational and health programs for children, enrichment programs for infants and preschoolers, and education programs for parents.

Core Courses

Code	Title	Credits
PSYC 704	Life-Span Development	3
Select one course from any of the following areas:		3
Social Psychology:		
PSYC 668	Personality: Theoretical and Empirical Approaches	
PSYC 703	Social Bases of Behavior	
PSYC 707	Emotional Bases of Behavior	
Biological Psychology:		
PSYC 702	Biological Bases of Human Behavior	
Cognitive Psychology:		
PSYC 701	Cognitive Bases of Behavior	
PSYC 592	Special Topics (with approval)	
PSYC 892	Special Topics in Psychology (with approval)	
Total Credits		6

Quantitative Methods

Code	Title	Credits
PSYC 611	Advanced Statistics	4
PSYC 754	Multiple Regression	3
Total Credits		7

Specialized Content

Code	Title	Credits
One to two courses selected from the following:		3-6
PSYC 566	Cognitive and Perceptual Development	
PSYC 615	Language Development	
PSYC 648	Developmental Psychopathology	
PSYC 669	Social and Emotional Development	
PSYC 780	Applied Developmental Psychology	
PSYC 592	Special Topics [1]	
Other developmental courses chosen with advisor approval		
Select a maximum of one course from:		0-3
PSYC 614	The Psychology of Aging	
PSYC 619	Applied Behavior Analysis: Principles, Procedures, and Philosophy	
Total Credits		6

[1] When content is developmental, with approval of advisor.

Thesis Research or Practicum Experience

Thesis

The thesis includes a combination of PSYC 798 Thesis Proposal/PSYC 799 Master's Thesis. Per the University Catalog, at least 3 hours must be PSYC 799 Master's Thesis; these 3 hours must be taken the first semester in which PSYC 799 Master's Thesis is registered. Thus, this is generally a combination of 1 credit of PSYC 798 Thesis Proposal and 3 of PSYC 799 Master's Thesis.

Students should be aware of the policies governing theses. They must follow the thesis enrollment policy of the university and once enrolled in PSYC 799 Master's Thesis, maintain continuous enrollment. See Academic Policies.

Code	Title	Credits
Select 4 credits from the following:		4
PSYC 798	Thesis Proposal	
PSYC 799	Master's Thesis (minimum of 3 credits)	
Total Credits		4

Practicum

Code	Title	Credits
Select 4 credits from the following:		4
PSYC 792	Psychology Practicum (take 3 credits)	
PSYC 597	Directed Reading and Research (take 1 credit)	
Total Credits		4

Professional Seminar

Code	Title	Credits

PSYC 890	Seminar in Professional Psychology	
Total Credits		2

[1] Students should take 1 credit in fall and 1 credit in spring of their first year.

Electives

Code	Title	Credits
Select 5 credits in consultation with your advisor		5
Total Credits		5

Students complete the 30 credits required for this degree through additional coursework, including courses not listed above, within or outside the department, with prior approval of the graduate advisor.

Concentration in Clinical Psychology (CLN)

The clinical psychology concentration trains students to have flexibility to fill the evolving functions of clinical psychologists, including research, direct provision of clinical services, supervision, program development and evaluation, and consultation.

The clinical psychology MA concentration is not a terminal degree. Students who have been admitted to the doctoral program with a concentration in clinical psychology may apply to receive the MA in psychology on completion of 30 credits of coursework. Students must also be in good standing in the program, as determined by the director of clinical training.

Foundation Courses

Code	Title	Credits
PSYC 810	Psychological Assessment I	4
PSYC 811	Psychological Assessment II	4
PSYC 822	Scientific Foundations of Clinical Psychology I	3
PSYC 860	Introductory Helping Skills and Motivational Interviewing	3
Total Credits		14

Practicum Courses

Code	Title	Credits
PSYC 861	Cognitive Behavioral Therapy for Youth	3
PSYC 862	Cognitive Behavioral Therapy for Adults	3
Total Credits		6

Advanced Statistics and Research Methods

Note: For doctoral quantitative emphases B and C, both PSYC 754 Multiple Regression and PSYC 756 Quantitative Methods IV: Multivariate Techniques in Psychology must be taken, but only one of these courses is required for the MA.

Code	Title	Credits
Select three or more courses from the following:		10-11
PSYC 644	Methods for Social Research	
PSYC 611	Advanced Statistics	
PSYC 612	Advanced Statistics	
or PSYC 754	Multiple Regression	
or PSYC 756	Quantitative Methods IV: Multivariate Techniques in Psychology	
Total Credits		10-11

Concentration in Cognitive and Behavioral Neuroscience (CBNR)

The concentration in cognitive and behavioral neuroscience focuses on studying biological substrates of behavior. Core and affiliated faculty study areas as diverse as neural control of behavioral development; animal models of learning and memory and their disorders (such as Alzheimer's); human brain systems involved in cognition, perception, human error, decision making, and movement; the relation of neural activity to human performance; and cognitive aging. A focus of the program is on translational neuroscience-complementary study of neural systems in humans and animals, including application of animal research to human behavior.

Specialized Content

Code	Title	Credits
PSYC 531	Mammalian Neurobiology	3
PSYC 558	Neuronal Bases of Learning and Memory	3

Electives

Students complete the 30 credits required for the degree through additional credits of coursework, including courses not listed above within or outside the department, with prior approval of the graduate advisor.

PSYC 592 Special Topics
PSYC 892 Special Topics in Psychology
NEUR 602 Cellular Neuroscience
NEUR 689 Topics in Neuroscience
BIOL 585 Eukaryotic Cell Biology Laboratory

Practicum or Thesis

Students may choose to do either a 6 credit Psychology Practicum or a Thesis. Both options require at least 6 credits total. Students should be aware of the policies governing theses. They must follow the thesis enrollment policy of the university and once enrolled in PSYC 799 Master's Thesis, maintain continuous enrollment. See Academic Policies.

Code	Title	Credits
Psychology Practicum		
PSYC 792	Psychology Practicum	6
Thesis		

Select 6 credits from the following:	
PSYC 798	Thesis Proposal
PSYC 799	Master's Thesis (minimum of 3 credits)

Concentration in Human Factors/Applied Cognition (HF)

The human factors/applied cognition concentration trains students in the application of cognitive science to real-world problems. Students gain expertise in such areas as human/computer interaction, cognitive system engineering, cognitive ergonomics, and transportation. Faculty members help place students who do not have real-world experience in a part- or full-time practicum before completing the degree.

Core Course

Code	Title	Credits
PSYC 701	Cognitive Bases of Behavior	3
or PSYC 768	Advanced Topics in Cognitive Science

Optional Practicum

Students need an advisor's approval to register for practicum.

Code	Title	Credits
Six credits of		6
PSYC 730	Practicum in Applied Psychology	
Total Credits		6

Optional Thesis

Students need the chair's approval to register for thesis. Students should be aware of the policies governing theses. They must follow the thesis enrollment policy of the university and once enrolled in PSYC 799 Master's Thesis, maintain continuous enrollment. See Academic Policies.

Code	Title	Credits
Select 6 credits from the following:		6
PSYC 798	Thesis Proposal	
PSYC 799	Master's Thesis	
Total Credits		6

Concentration in Industrial/Organizational Psychology (IO)

The industrial/organizational psychology concentration trains students in the conduct and application of psychological research in work settings. Expertise can be developed in a variety of areas, including personnel selection, training, leadership, motivation, and human performance assessment.

Statistics

Code	Title	Credits
Select at least 10 credits of the following:		10
PSYC 611	Advanced Statistics	
PSYC 754	Multiple Regression	
PSYC 557	Psychometric Methods	
or PSYC 633	Evaluative Research in Psychology	
Total Credits		10

Survey of Content

Code	Title	Credits
PSYC 636	Survey of Industrial-Organizational Psychology	3
Total Credits		3

Specialized Content

Code	Title	Credits
Select at least four courses from the following:		12
PSYC 626	Organizational Change and Development	
PSYC 631	Industrial and Personnel Testing and Evaluation	
PSYC 638	Training: Psychological Contributions to Theory, Design, and Evaluation	
PSYC 640	Techniques in Industrial/Organizational Psychology	
PSYC 667	Behavior in Small Groups and Teams	
PSYC 668	Personality: Theoretical and Empirical Approaches	
PSYC 703	Social Bases of Behavior	
PSYC 733	Issues in Personnel Psychology	
PSYC 741	Psychology of Work Motivation	
PSYC 742	Careers	

PSYC 743	Behavior and Performance at Work	
Other PSYC graduate courses with permission of I/O faculty		
Total Credits		12

Professional Development

Code	Title	Credits
Select at least 1 credit from the following:		1
PSYC 730	Practicum in Applied Psychology	
PSYC 892	Special Topics in Psychology [1]	
Total Credits		1

[1] When topic is IO Learning Series.

Electives

Code	Title	Credits
Students complete the 32 credits required for this degree through additional coursework, including courses not listed above, within or outside the department, with prior approval of the graduate advisor. These courses are typically within statistics or specialized content.		

Accelerated Master's

Psychology, BA or BS/Psychology, Accelerated MA (Cognitive and Behavioral Neuroscience Concentration)

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in Psychology and an MA in Psychology, with a concentration in cognitive and behavioral neuroscience, in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6. Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://psychology.gmu.edu/programs/la-ma-acel-psyc/overview/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and completion of 12 hours of psychology coursework including one of the following combinations of courses:

PSYC 300 Statistics in Psychology
PSYC 372 Biopsychology

OR

PSYC 300 Statistics in Psychology
PSYC 375 Brain and Sensory Processes and PSYC 376 Brain and Behavior

Students are strongly encouraged to have obtained previous research lab experience and to have one reference letter from the faculty member who will serve as their advisor.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits) with a minimum grade of B in each

PSYC 531 Mammalian Neurobiology (3 credits)
PSYC 558 Neuronal Bases of Learning and Memory (3 credits)
PSYC 555 Neuroimaging (3 credits)
PSYC 559 Behavioral Chemistry (3 credits)
PSYC 592 Special Topics (3 credits) when the topic is Animal Behavior, Biological Bases of Alzheimer's Disease, Human Brain Stimulation, Cognitive Electrophysiology or Comparative Cognition. Can be repeated if the topic differs.

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

PSYC 531 Mammalian Neurobiology (3 credits)
PSYC 558 Neuronal Bases of Learning and Memory (3 credits)
PSYC 555 Neuroimaging (3 credits)
PSYC 559 Behavioral Chemistry (3 credits)
PSYC 592 Special Topics (3 credits) when the topic is Animal Behavior, Biological Bases of Alzheimer's Disease, Human Brain Stimulation, Cognitive Electrophysiology or Comparative Cognition. Can be repeated if the topic differs.
PSYC 611 Advanced Statistics (4 credits)

For more detailed information on coursework and timeline requirements, see AP.6.7.Bachelor's/Accelerated Master's Degree policies.

Psychology, PhD

Banner Code: LA-PHD-PSYC

Academic Advising

2086 David King Hall
Fairfax Campus

Email: psycgrad@gmu.edu
Website: psychology.gmu.edu/programs/la-phd-psyc

The PhD in Psychology provides knowledge of the basic content areas in psychology and practical experience in applying this knowledge to solve human problems in relationships, work, and education. Core course requirements cover subject matter identified by the profession as essential to doctoral training. This includes biological, social, cognitive, and individual bases of behavior, as well as the history of psychology. The program offers the following concentrations: applied developmental psychology, clinical psychology, cognitive and behavioral neuroscience, human factors/applied cognition, and industrial/organizational psychology.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions.

For specific information, see Application Requirements and Deadlines (http://psychology.gmu.edu/programs/application/LA-PHD-PSYC/).

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Reduction of Credit

For students entering the doctoral program with a master's degree, the number of credits required may be reduced by a maximum of 30 credits subject to the approval of the program faculty and the dean. Requests for reduction of credit are reviewed by a committee only after acceptance to the PhD program.

Grading

Students in the doctoral program are evaluated on the basis of grades, comprehensive exams, research, and communication skills. In doctoral courses, a range of A to B- are the only acceptable grades. Students in the doctoral program must successfully complete comprehensive exams.

Requirements

Degree Requirements

Total credits: 72-79

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

In addition to satisfying the requirements for all doctoral degrees, students must successfully complete 72–76 credits of required coursework chosen in one of five concentrations. Each concentration consists of four educational components: core courses, upper-level specialty courses, supervised practica, and dissertation.

Psychology Concentrations

- Concentration in Applied Developmental Psychology (APD)
- Concentration in Clinical Psychology (CLN)
- Concentration in Cognitive and Behavioral Neuroscience (CBNR)
- Concentration in Human Factors/Applied Cognition (HF)
- Concentration in Industrial/Organizational Psychology (IO)

Concentration in Applied Developmental Psychology (APD)

Overview

The applied developmental psychology concentration is concerned with enhancing developmental processes and preventing developmental disorders in individuals and families across the life span. It uses the knowledge base and methodologies of developmental science to assist the development of individuals who vary in cultural and ethnic backgrounds; economic and social opportunities; physical, social, emotional, and cognitive abilities; and conditions of living (e.g., families, neighborhoods, communities, and physical settings). The program's emphasis is on child development (infancy, early childhood, middle childhood, and adolescence), and students may focus their studies on the cognitive, social, emotional, language, personality, or physiological aspects of development.

The applied developmental concentration has two goals: to train students to teach and do research on basic and applied issues in child development for employment in such settings as universities, research institutes, and organizations, and to train students to do applied work in developmental psychology (consultation, program evaluation, assessment and evaluation, developmental interventions, and parent training) in such settings as schools, hospitals, courts, child care facilities, and other organizations.

Students pursuing this concentration must complete 72 credits comprised of doctoral coursework and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master's degree as described above.

Doctoral Coursework

Developmental Core

Code	Title	Credits
PSYC 704	Life-Span Development	3

Students who take 6 credits of Advanced Specialized Methods must take 15 credits of Developmental Content.		12-15
Select at least two courses from the following:		
PSYC 669	Social and Emotional Development	
PSYC 566	Cognitive and Perceptual Development	
PSYC 615	Language Development	
PSYC 592	Special Topics (when topic is Peer Relationships and Development)	
PSYC 892	Special Topics in Psychology (when topic is Peer Relationships and Development)	
Select remaining credits from the following:		
PSYC 592	Special Topics (when topic is developmental in content)	
PSYC 614	The Psychology of Aging	
PSYC 648	Developmental Psychopathology	
PSYC 780	Applied Developmental Psychology	
Total Credits		12-15

Professional Seminar/Professional Ethics

Students take 1 credit in fall and 1 credit in spring of their first year and 1 additional credit at any other time (preferably in their second year).

Code	Title	Credits
PSYC 890	Seminar in Professional Psychology (3 credits)	1-3
Total Credits		3

Directed Reading and Research or Practicum

Students may fulfill this requirement with 8 credits of PSYC 897 Directed Reading and Research or a combination of PSYC 897 Directed Reading and Research and PSYC 792 Psychology Practicum.

Code	Title	Credits
Select 8 credits from the following:		8
PSYC 897	Directed Reading and Research (can be repeated for credit)	
PSYC 792	Psychology Practicum (A maximum of 6 credits may be applied to this requirement.)	
PSYC 850	Teaching Practicum in Psychology	
Total Credits		8

Elective Courses

Students complete the 72 credits required for the degree with additional coursework from within or outside the department, excluding PSYC 798 Thesis Proposal and PSYC 799 Master's Thesis, with prior approval of the advisor.

Advancement to Candidacy

To advance to candidacy, students must complete all courses required by the program. Students must also successfully complete and pass written and oral comprehensive exams.

Dissertation Research

The dissertation requirement is designed to demonstrate the student's ability to apply psychological principles to research problems. Once enrolled in PSYC 999 Doctoral Dissertation, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research. Students who defend in the summer must be registered for at least 1 credit of PSYC 999 Doctoral Dissertation.

Students complete a minimum of 3 credits of PSYC 998 Doctoral Dissertation Proposal and 3 credits of PSYC 999 Doctoral Dissertation. They must apply a minimum of 12 dissertation credits (PSYC 998 Doctoral Dissertation Proposal and PSYC 999 Doctoral Dissertation combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Code	Title	Credits
Select 12 credits from the following:		12
PSYC 998	Doctoral Dissertation Proposal	
PSYC 999	Doctoral Dissertation	
Total Credits		12

Concentration in Clinical Psychology (CLN)

Overview

The clinical psychology concentration is committed to the clinical science model. Our goal is to train clinical psychologists who are capable of integrating research and applied clinical activities. The program is unique in approaching clinical psychology from social psychological and contextual perspectives. A social psychological approach uses theory and research from social psychology to understand emotional, cognitive, behavioral, and interpersonal functioning. A contextual perspective stresses the impact of social and cultural factors on the individual and vice versa. Most of the faculty members employ cognitive-behavioral and interpersonal approaches to research and clinical practice, but students also receive exposure to humanistic, existential, and psychodynamic perspectives.

Students pursuing this concentration must complete 79 graduate credits comprised of doctoral coursework and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master's degree as described above.

Doctoral Coursework

Biological Bases of Behavior

PSYC 855	Social, Cognitive, and Affective Foundations of Behavior	3
PSYC 856	Diversity, History and Clinical Psychology	3
PSYC 890	Seminar in Professional Psychology	1
PSYC 792	Psychology Practicum	2
Total Credits		48

[1] Students take 3 credits in fall and 3 credits in spring of the second year.

[2] Students take 3 credits in fall and 3 credits in spring of the third year.

Electives

The choice of quantitative emphasis affects the number of credits available for electives. Those who choose Emphasis A take 3 credit hours of electives; students choosing Emphasis B or Emphasis C take 0 hours of electives.

Code	Title	Credits
Select 0-3 electives with the approval of the advisor.		0-3
Total Credits		0-3

Advancement to Candidacy

To advance to candidacy, students must complete all core courses required by the program. Students must also successfully complete and pass written and oral comprehensive exams.

Dissertation Research

The dissertation requirement is designed to demonstrate the student's ability to apply psychological principles to research problems. Once enrolled in PSYC 999 Doctoral Dissertation, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research. Students who defend in the summer must be registered for at least 1 credit of PSYC 999 Doctoral Dissertation.

Students complete a minimum of 3 credits of PSYC 998 Doctoral Dissertation Proposal and 3 credits of PSYC 999 Doctoral Dissertation. They must apply a minimum of 12 dissertation credits (PSYC 998 Doctoral Dissertation Proposal and PSYC 999 Doctoral Dissertation combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Code	Title	Credits
Select 12 credits from the following:		12
PSYC 998	Doctoral Dissertation Proposal	
PSYC 999	Doctoral Dissertation	
Total Credits		12

Internship

Students complete a full-time, 12-month clinical psychology internship at a site accredited by the American Psychological Association.

Externship (optional, but recommended)

Students complete a part-time clinical psychology externship in the fourth and/or fifth year of the program.

Concentration in Cognitive and Behavioral Neuroscience (CBNR)

Overview

This cognitive and behavioral neuroscience concentration focuses on studying biological substrates of behavior. Core and affiliated faculty study areas as diverse as neural control of behavioral development; animal models of learning and memory and their disorders (such as Alzheimer's); human brain systems involved in cognition, perception, human error, decision making, and movement; the relation of neural activity to human performance; and cognitive aging. A focus of the program is on translational neuroscience-complementary study of neural systems in humans and animals, including application of animal research to human behavior.

The program's core facilities have well-equipped behavioral testing and histological/histochemical facilities. The program's strong links to the Krasnow Institute for Advanced Study and the Center for Biomedical Genomics and Informatics allows opportunities for collaborative work as diverse as tissue slice preparations and molecular genetics. The doctoral program prepares students for research-based careers in academics, government, or industry.

Students pursuing this concentration must complete 72 graduate credits comprised of coursework and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master's degree as described above.

Doctoral Coursework

Cognitive and Behavioral Neuroscience Core

Code	Title	Credits
PSYC 531	Mammalian Neurobiology	3
PSYC 555	Neuroimaging	3
PSYC 559	Behavioral Chemistry	3
PSYC 558	Neuronal Bases of Learning and Memory	3
or PSYC 685	Cognitive Neuroscience	
Total Credits		12

Quantitative and Research Methods

Code	Title	Credits
Two required Courses		
PSYC 611	Advanced Statistics	4
Select one course from the following:		3
PSYC 652	Quantitative Methods II: Analysis of Variance	
or PSYC 754	Multiple Regression	
Elective Statistics and Methods		**6**
Students will choose from research methods and statistics courses in consultation with their advisor. May include but not limited to PSYC 563.		
PSYC 563	Laboratory Methods in Cognitive and Behavioral Neuroscience	
Total Credits		13

Teaching Practicum

Code	Title	Credits
Take two credits in teaching practicum, one each semester		2
PSYC 850	Teaching Practicum in Psychology	
Total Credits		2

Research Credits

The research credit requirement can be met through completion of a master's thesis (recommended) or other research course as approved by the program.

Code	Title	Credits
Select 6 credits in either a master's thesis or other research course [1]		6
Total Credits		6

Elective Credits

Students can complete the 72 credit requirement through credits of additional coursework, within or outside the department, with prior approval of the advisor.

Some options for fulfilling this requirement:

NEUR 602 Cellular Neuroscience
NEUR 689 Topics in Neuroscience
BIOL 585 Eukaryotic Cell Biology Laboratory

Advancement to Candidacy

To advance to candidacy, students must complete all core courses required by the program. Students must also successfully complete and pass written and oral comprehensive exams.

Dissertation Research

The dissertation requirement is designed to demonstrate the student's ability to apply psychological principles to research problems. Once enrolled in PSYC 999 Doctoral Dissertation, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research. Students who defend in the summer must be registered for at least 1 credit of PSYC 999 Doctoral Dissertation.

Students apply to this degree a minimum of 3 credits of PSYC 998 Doctoral Dissertation Proposal and 3 credits of PSYC 999 Doctoral Dissertation; they may apply a minimum 12 and a maximum of 24 dissertation credits (PSYC 998 Doctoral Dissertation Proposal and PSYC 999 Doctoral Dissertation combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Code	Title	Credits

PSYC 998	Doctoral Dissertation Proposal	
PSYC 999	Doctoral Dissertation	
Total Credits		12-24

Concentration in Human Factors/Applied Cognition (HF)

Overview

The human factors and applied cognition concentration covers basic theoretical and empirical issues and emphasizes research that applies cognitive science to real-world problems. The program builds bridges between human factors engineering and cognitive psychology. Many applications of cognitive science are in the domain of human factors, and many doctoral students who complete our program go on to be human factors professionals.

Students pursuing this concentration must complete 72 graduate credits comprised of coursework and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master's degree (up to 30 credits).

Doctoral Coursework

Cognitive Core

Special Topics in Professional Issues

Code	Title	Credits
PSYC 890	Seminar in Professional Psychology	1-3
Total Credits		3

Directed Reading and Research

Students are encouraged to take a minimum of 1 credit of this course each semester until they advance to candidacy.

Code	Title	Credits
PSYC 897	Directed Reading and Research	1-3
Total Credits		1-3

Elective Courses

Students have several options for completing the remaining 72 credits required for the degree. They may take additional content courses with permission of their advisor. Students who do not have work experience in applied cognition or human factors are encouraged to take up to 6 credits of practicum.

Students are strongly encouraged to develop competence in programming and computer science through coursework or independent study. Students are also encouraged to identify and take relevant courses within or outside the department with permission of their advisor.

Some options for fulfilling this requirement:

Code	Title	Credits
PSYC 734	Seminar in Human Factors and Applied Cognition	3
PSYC 768	Advanced Topics in Cognitive Science	3
PSYC 730	Practicum in Applied Psychology	1-6
or PSYC 592	Special Topics	

Advancement to Candidacy

To advance to candidacy, students must complete all core courses required by the program. Students must also successfully complete and pass written comprehensive exams.

Dissertation Research

The dissertation requirement is designed to demonstrate the student's ability to apply psychological principles to research problems. Once enrolled in PSYC 999 Doctoral Dissertation, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research. Students who defend in the summer must be registered for at least 1 credit of PSYC 999 Doctoral Dissertation.

Students complete a minimum of 3 credits of PSYC 998 Doctoral Dissertation Proposal and 3 credits of PSYC 999 Doctoral Dissertation. They must apply a minimum of 12 dissertation credits (PSYC 998 Doctoral Dissertation Proposal and PSYC 999 Doctoral Dissertation combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Code	Title	Credits

Concentration in Industrial/Organizational Psychology (IO)

Overview

The industrial/organizational psychology concentration focuses on multiple aspects of behavior in organizational settings, including personnel selection, quantitative analysis, teams, leadership, work and family issues, and organizational health issues. Mason's graduate work in this area emphasizes research as the key to knowledge in both academic and applied settings. The program fosters a peer-oriented environment whereby students collaborate on numerous projects in addition to working with faculty members, in many different areas of industrial/organizational psychology.

Students pursuing this concentration must complete 72 graduate credits comprised of coursework and at least 12 credits of dissertation research. The number of credits required may be reduced for a prior master's degree as described above.

Doctoral Coursework

Department of Religious Studies

3200 Horizon Hall
Fairfax Campus
Phone: 703-993-1290
Website: religious.gmu.edu

Undergraduate Program

The department offers a bachelor of arts degree in religious studies for students who are interested in learning more about the world's religious traditions. Majors explore the many dimensions of religion and study religion's spiritual, historical, cultural, and social aspects.

Areas of Study

Areas of study offered by the department include Asian religious traditions, Near (Middle) East religious traditions (Judaism, Islam, and Christianity), and comparative aspects of religion. Though the required coursework, majors in religious studies develop skills in reading and interpreting sacred texts. They explore the cultural and social dimensions of religion along with a consideration of religious values and ethics, from comparative and cross-cultural perspectives with relation to global issues.

Courses

The courses in the undergraduate program are writing intensive. They enable students to study and analyze religious ideas and symbols and give them the skills they need to present well-argued papers.

Minors

Students majoring in religious studies are encouraged to do one of the many minors offered by the college. See Minors and Interdisciplinary Minors on the College of Humanities and Social Sciences page.

The department also offers minors in religious studies and Judaic studies, both of which are available to students in all majors in the university.

Graduate Program

The department sponsors the concentration in religious studies in the interdisciplinary studies, MAIS. This concentration is designed for students who are interested in exploring the world's major religions at the graduate level. Students study the development and interaction of the global religious traditions that influence human identity, behavior, culture, and values. They investigate the effects that historical crises and the forces of change have on religion, placing contemporary religious pluralism and inter-religious dialog in a global context.

Religious Studies Minor

Banner Code: RELI

Academic Advising

3200 Horizon Hall
Fairfax Campus

Website: religious.gmu.edu/programs/la-minor-reli-reli

The religious studies minor introduces students to the world's religious traditions. Within the minor, students may focus on the religious traditions of Asia, those of the Near (Middle) East, or comparative aspects of religion.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in each course applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Course

Religious Studies, BA

Banner Code: LA-BA-RELI

3200 Horizon Hall
Fairfax Campus

Website: religious.gmu.edu/programs/la-ba-reli

Religious studies provides students an understanding of the traditions of religions across the globe. Areas of study offered by the department include Asian religious traditions, Near (Middle) East religious traditions (Judaism, Islam, and Christianity), and comparative aspects of religion. Students develop skills in reading and interpreting sacred texts. They explore the cultural and social dimensions of religion along with a consideration of religious values and ethics from comparative and cross-cultural perspectives, and with relation to global issues. Students go on to work in the government, service, or nonprofit sectors, as well as pursue graduate work in the humanities.

Admissions & Policies

Policies

Students in this major complete at least 33 credits within the major, earning a minimum grade of 2.00 in each course. No course applied to the major in religious studies may be used to fulfill more than one requirement.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses in the Major

Introductory Courses in the Main World Religions

Code	Title	Credits
RELI 211	Religions of the West (Mason Core)	3
RELI 212	Religions of Asia (Mason Core)	3
RELI 300	Theories and Methods in Religious Studies	3
Total Credits		9

Comparative or Methodological Aspects of the Study of Religion

Code	Title	Credits
Select one course from the following:		3
ANTH 313	Myth, Magic, and Mind (Mason Core)	
RELI 337	Mysticism: East and West	
RELI 341	Global Perspectives on Spirituality and Healing (Mason Core)	
RELI 490	Comparative Study of Religions (Mason Core)	
SOCI 385	Religion and Society	
RELI 376	Special Topics in Religious Thought [1]	
Total Credits		3

[1] Only when topic is relevant and with the prior written approval of the undergraduate director.

Religious Studies

Code	Title	Credits
Select four courses (12 credits) from any religious studies courses (RELI) at the 300 and 400 level other than those used to fulfill the requirements above. [1]		12
Total Credits		12

[1] Choose courses in a scriptural language (such as Arabic, Biblical Hebrew, Chinese, Classical Greek, Latin, or Sanskrit). Up to 6 credits of a scriptural language may be used to fulfill this requirement and the 6 credits of electives.

One Seminar

Students should take this course during their senior year.

Code	Title	Credits
RELI 420	Seminar	3
Total Credits		3

Electives in the Major

Code	Title	Credits
Select two electives in consultation with an advisor. [1]		6
Total Credits		6

[1] Choose from courses in religious studies, related disciplines (including anthropology, art history, and history), or a scriptural language (such as Arabic, Biblical Hebrew, Chinese, Classical Greek, Latin, or Sanskrit). Up to 6 credits of a scriptural language may be used to fulfill this requirement and the requirement of 12 credits in religious studies at 300 and 400 level.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in religious studies fulfill this requirement by successfully completing RELI 420 Seminar.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3

4-Year Plan

Bachelor of Arts in Religious Studies Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Accelerated Master's

Many accelerated master's programs are available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Department of Sociology and Anthropology

6300 Horizon Hall
Fairfax Campus

Phone: 703-993-1440
Website: soan.gmu.edu

Undergraduate Programs

Anthropology

The department offers a Bachelor of Arts degree in Anthropology. The program draws broadly from the social sciences, humanities, and natural sciences, making it a strong undergraduate major that provides a sound interdisciplinary preparation for a variety of careers.

Bachelor's/Accelerated Master's Program

The department offers highly-qualified majors in anthropology the opportunity to apply to an accelerated master's degree program in anthropology. If accepted, students will be able to earn both the undergraduate and graduate degrees after satisfactory completion of 138 credits, generally within five years.

Sociology

The department offers a Bachelor of Arts degree in Sociology. Sociology majors study how social movements emerge from the collective efforts of individuals and the role that social forces play in defining racial identities and gender roles. They take courses in the theories that explain social phenomena and develop strong research skills, learning how to conduct surveys, interviews, systematic observation as well as how to evaluate sources.

With the strong research skills, critical thinking, and effective writing that are the hallmark of sociology graduates, they are prepared for a variety of career paths from teaching, human service, and human resource occupations to work in the criminal justice system, marketing, and social research. The sociology major is also excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

Bachelor's/Accelerated Master's Program

The department offers highly-qualified majors in sociology the opportunity to apply to an accelerated master's degree program in sociology. If accepted, students will be able to earn both the

undergraduate and graduate degrees after satisfactory completion of 141 credits, generally within five years.

Minors

The department offers minors in anthropology and sociology available to students in any major. The department coordinates the interdisciplinary minor in immigration studies and the faculty participate in many other minors in the college.

Graduate Programs

Anthropology

The department offers a Master of Arts degree in Anthropology. Students can choose one of three emphases: advanced training in sociocultural anthropology; culture, health and bioethics; or transnational and global issues. They can chose from many courses that are richly interdisciplinary covering such diverse topics as nationalism and transnationalism; bioethics; social movements, ethnicity and identity; conflict and violence; migration, displacement, and refugees; regional ethnography; and political economy and globalization. Departmental specializations include the following regions: Africa, Asia, Central and South America, Europe, the Middle East, and the United States. Coursework progresses from core courses to more advanced courses and culminates in a thesis.

Sociology

The department offers master's and doctoral degrees in sociology. Students pursuing a master's degree in sociology take required courses in theory and methods and a host of electives.

The doctoral degree in sociology provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C., area. Graduates have the theoretical, analytical, and professional skills that prepare them for academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that rely on the expertise of sociologists including human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

Funding

The department has a limited number of teaching assistantships which are awarded on a competitive basis. Other sources of funding such as grants, loans, and employment on campus are also available. Students awarded assistantships must register for a minimum of six credits a semester and show satisfactory progress toward their degree.

Requirements & Policies

Policies

Non-Degree Status

Applicants who do not wish to pursue a degree may apply for non-degree status. Non-degree students must meet the same admission requirements as degree-seeking students (minimum undergraduate GPA of 3.00, among other criteria). Non-degree students may later apply for admission to a degree program. Up to nine credits earned in non-degree status may transferred to the master's degrees in anthropology or sociology, subject to the approval of the program director and dean.

Anthropology Minor

Banner Code: ANTH

Academic Advising

6300 Horizon Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-minor-soan-anth

A minor in anthropology enriches many majors with its holistic and cross-cultural perspective. It is a good fit for students majoring in biology, communication, English, history, psychology, sociology, and others. This

minor will be useful for anyone contemplating an international career or a future profession involving culturally-diverse populations.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Anthropology, BA

Banner Code: LA-BA-ANTH

6300 Horizon Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-ba-anth

Anthropology is the study of human beings and their cultures. Majors develop an eye for detail and careful observation, critical thinking, sensitivity to the unfamiliar, skills in research and writing, and an ability to describe and understand culture. The programs in archaeology and biological anthropology give hands-on research experience with faculty through fieldwork in bioarchaeology, archaeology, and museum-based data collection. The programs in cultural anthropology connect anthropological research to current social challenges such as health and disease, urbanization, and geopolitics. It is a strong undergraduate major that provides sound interdisciplinary preparation for a variety of careers.

Admissions & Policies

Policies

Students pursuing this degree must complete 36 credits within the major, with a minimum GPA of 2.00.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students are advised to consult with an advisor to learn how they can fulfill Mason Core requirements in global understanding, information technology, and synthesis, as well as the college-level requirement in non-Western culture.

Electives in the Major

Code	Title	Credits
Select 12 credits from the following:		12
ANTH courses 300-499		
Total Credits		12

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in anthropology may fulfill this requirement by successfully completing ANTH 490 Theories, Methods, and Issues II.

Additional Electives

Any remaining credits may be completed with electives to bring the degree total to 120.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:
- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]

4-Year Plan

Bachelor of Arts in Anthropology Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Honors

Honors in the Major

Highly-qualified students majoring in anthropology may apply to graduate with honors in the major.

Eligibility

To be eligible, students must have completed at least 60 credits, taken ENGH 302 Advanced Composition (Mason Core) for the social sciences, completed 15 credits of anthropology (including ANTH 114 Introduction to Cultural Anthropology (Mason Core)), and have a minimum cumulative GPA of 3.30 and a minimum grade of B+ in anthropology courses.

Requirements

If accepted, students complete two honors courses. The first course is an honors section of one of these courses: ANTH 496 Evolutionary Theory, ANTH 450 Qualitative Methods: Nonstatistical Approaches in Culture and Social Research, ANTH 495 Internship or another course chosen in consultation with the honors director. The second course is ANTH 499 Independent Research, in which students complete an honors paper written under the guidance of an anthropology faculty member. All candidates for honors in the major participate in an honors colloquium. To graduate with honors in the major, students must complete the honors coursework with a minimum GPA of 3.50.

Accelerated Master's

The accelerated master's program below specifies the BA in Anthropology as a feeder degree for its program. Many other accelerated master's programs are also available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at Mason.

Anthropology, BA/Anthropology, Accelerated MA

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA in Anthropology and a MA in Anthropology in an accelerated time-frame after satisfactory completion of a minimum of 138 credits. Students with both a BA and MA have a competitive advantage when applying to PhD programs in anthropology.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies. For information specific to the accelerated MA in Anthropology, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/LA-MA-ANTH/application/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM pathway will be admitted to the MA Anthropology, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Completion of ANTH 390 History of Anthropological Thought
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

ANTH 535 Anthropology and the Human Condition: Seminar I (3 credits)
ANTH 536 Anthropology and the Human Condition: Seminar II (3 credits)
ANTH 545 Ritual and Power in Social Life (3 credits)
ANTH 555 Policy and Culture (3 credits)
ANTH 556 Human Growth and Development (3 credits)
ANTH 557 Human Origins (3 credits)
ANTH 570 Andean Archaeology (3 credits)
ANTH 576 American Cultures (3 credits)
ANTH 577 Mortuary Archaeology (3 credits)
ANTH 578 Humans and Animals (3 credits)
ANTH 580 Environmental Anthropology (3 credits)
ANTH 582 Human Osteology (3 credits)
ANTH 583 Human Osteology Lab (2 credits)
ANTH 584 Paleopathology (3 credits)
ANTH 585 Bioarchaeology (3 credits)
ANTH 586 Quantitative Methods in Anthropology (3 credits)
ANTH 590 Forensic Anthropology (3 credits)
ANTH 591 Forensic Anthropology Lab (2 credits)
ANTH 587 Zooarchaeology
ANTH 616 Anthropology of the City (3 credits)
ANTH 631 Refugees in the Contemporary World (3 credits)
ANTH 635 Regional Ethnography (3 credits)
ANTH 640 Applied Anthropology (3 credits)
ANTH 650 Methods in Anthropology (3 credits)
ANTH 670 Regional Studies in Archaeology (3 credits)
ANTH 677 Anthropology and History (3 credits)
ANTH 684 Independent Study in Sociocultural Anthropology (1-6 credits)
ANTH 687 Medical Anthropology (3 credits)
ANTH 699 Contemporary Issues in Sociocultural Anthropology (3 credits)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

All courses listed as advanced standing credit can be used for reserve graduate credit.

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Anthropology, MA

Banner Code: LA-MA-ANTH

Academic Advising

6300 Horizon Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-ma-anth

Master of Arts in Anthropology students learn the history of critical inquiry in the discipline of anthropology and how to approach and develop a topic of research. Students are trained in fieldwork and ethnographic methods appropriate for their goals and are guided through the research and writing methods central to completion of a thesis or project. In the process, students learn about the ethics of conducting research. Students may focus on cultural anthropology or bioarchaeology. The program prepares students for careers in government, the private sector, non-governmental organizations, museums, and numerous other fields, or to pursue a doctorate in the field.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Admissions. For specific information, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/application/LA-MA-ANTH/).

Policies

For policies governing all graduate degrees, see Graduate Policies.

Reduction of Credit

Students with previously conferred graduate degrees may request a reduction of credit. Reductions of credit may not exceed six elective credits and no reductions will be given for required core courses. Evaluation of a previously conferred graduate degree for reduction of credit is not automatic and students must request this review in their first semester of matriculation in the master's program.

Satisfactory Progress

According to university policy, students may be terminated if they fail to achieve satisfactory progress toward their degree. Students in the program are judged as having failed to achieve satisfactory progress toward their degree for the following reasons:

- two consecutive semesters in which academic warnings appear on their transcript
- failure to successfully complete ANTH 535 Anthropology and the Human Condition: Seminar I, ANTH 536 Anthropology and the Human

Condition: Seminar II, and ANTH 650 Methods in Anthropology within 4 semesters of first enrolling as degree-seeking students in the MA in Anthropology program

- failure to enroll in graduate coursework in anthropology for 2 consecutive semesters, unless there are compelling reasons for not having done so

Like all academic policies, these provisions take effect with the publication of this catalog and apply to all graduate students in the MA in Anthropology program regardless of their catalog year.

Requirements

Degree Requirements

Total credits: 30

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
ANTH 535	Anthropology and the Human Condition: Seminar I	3
ANTH 536	Anthropology and the Human Condition: Seminar II	3
ANTH 650	Methods in Anthropology	3
ANTH 798	Thesis or Project Proposal	3
Total Credits		12

Electives

Code	Title	Credits
Select 15 credits from advanced courses in anthropology chosen in consultation with an advisor		15
Total Credits		15

Students can choose to focus their electives around an emphasis in these four areas: advanced training in sociocultural anthropology; culture, health and bioethics; museums and anthropology; or transnational and global issues. Up to six credits may be from other disciplines with the prior written approval of the graduate director.

Students may take ANTH 690 Internship as elective credit. An internship can serve as a primary field research site for the thesis.

Thesis or Research Project

Students should be aware of the policies governing theses. They must follow the thesis enrollment policy of the university and, once enrolled in ANTH 799, maintain continuous enrollment.

Code	Title	Credits
Three credits from one of the following:		3
ANTH 796	Master's Research Project	
ANTH 799	Master's Thesis	
Total Credits		3

Accelerated Master's

Anthropology, BA/Anthropology, Accelerated MA

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA in Anthropology and a MA in Anthropology in an accelerated time-frame after satisfactory completion of a minimum of 138 credits. Students with both a BA and MA have a competitive advantage when applying to PhD programs in anthropology.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies. For information specific to the accelerated MA in Anthropology, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/LA-MA-ANTH/application/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM pathway will be admitted to the MA Anthropology, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Completion of ANTH 390 History of Anthropological Thought
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

ANTH 535 Anthropology and the Human Condition: Seminar I (3 credits)
ANTH 536 Anthropology and the Human Condition: Seminar II (3 credits)
ANTH 545 Ritual and Power in Social Life (3 credits)

ANTH 555 Policy and Culture (3 credits)
ANTH 556 Human Growth and Development (3 credits)
ANTH 557 Human Origins (3 credits)
ANTH 570 Andean Archaeology (3 credits)
ANTH 576 American Cultures (3 credits)
ANTH 577 Mortuary Archaeology (3 credits)
ANTH 578 Humans and Animals (3 credits)
ANTH 580 Environmental Anthropology (3 credits)
ANTH 582 Human Osteology (3 credits)
ANTH 583 Human Osteology Lab (2 credits)
ANTH 584 Paleopathology (3 credits)
ANTH 585 Bioarchaeology (3 credits)
ANTH 586 Quantitative Methods in Anthropology (3 credits)
ANTH 590 Forensic Anthropology (3 credits)
ANTH 591 Forensic Anthropology Lab (2 credits)
ANTH 587 Zooarchaeology
ANTH 616 Anthropology of the City (3 credits)
ANTH 631 Refugees in the Contemporary World (3 credits)
ANTH 635 Regional Ethnography (3 credits)
ANTH 640 Applied Anthropology (3 credits)
ANTH 650 Methods in Anthropology (3 credits)
ANTH 670 Regional Studies in Archaeology (3 credits)
ANTH 677 Anthropology and History (3 credits)
ANTH 684 Independent Study in Sociocultural Anthropology (1-6 credits)
ANTH 687 Medical Anthropology (3 credits)
ANTH 699 Contemporary Issues in Sociocultural Anthropology (3 credits)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

All courses listed as advanced standing credit can be used for reserve graduate credit.

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Immigration Studies Minor

Banner Code: IMMS

Academic Advising

6300 Horizon Hall
Fairfax Campus

Phone: 703-993-1441
Website: soan.gmu.edu/programs/la-minor-la-imms

The minor combines perspectives from the humanities and social sciences to provide an interdisciplinary and comparative understanding of the immigrant experience, ethnic identity, assimilation, ethnic exclusion and conflict, and refugee situations.

Faculty

Cleaveland, Haines, Ihara, Kim (director), Leeman, Rabin, Ritchie, Shutika, Trencher

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 15

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

SOCI 311	Sociological Theory	3
Total Credits		6

Electives

Code	Title	Credits
Select four electives [1]		12
Total Credits		12

[1] Students may focus the coursework for their minor by choosing electives from one of the four concentrations offered as part of the BA in sociology.

Sociology, BA

Banner Code: LA-BA-SOCI

6300 Horizon Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-ba-soci

Sociology involves the systematic study of social structures, cultural patterns, and human relationships. It combines rigorous methods with theory and observation, yielding insights that challenge commonly held assumptions about the social world. Sociology also informs the practice of social and public service, aiding efforts to address important social problems. Sociology majors pursue a varied set of career paths, ranging from teaching, human service and human resource occupations, to positions in the criminal justice system, marketing, and social research. The major is excellent preparation for students considering law school or graduate training in the social and behavioral sciences.

Admissions & Policies

Policies

Students pursuing this degree must complete 34 credits of sociology courses with a minimum GPA of 2.00. No more than 6 credits of courses with unsatisfactory grades (C- or D) may be applied toward the degree.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses in the Major

The introductory course must be completed with a minimum grade of 2.00.

Code	Title	Credits
SOCI 101	Introductory Sociology (Mason Core)	3
Total Credits		3

Additional Core Courses

Each of these courses must be completed with a minimum grade of 2.00.

Code	Title	Credits
SOCI 303	Methods and Logic of Inquiry	3
SOCI 311	Sociological Theory	3
SOCI 313	Statistics for the Behavioral Sciences (Mason Core)	4
SOCI 412	Contemporary Sociological Theory	3
Total Credits		13

Capstone Experience Course

Code	Title	Credits
Select one from the following:		3
SOCI 485	RS: Sociological Analysis and Practice (Mason Core)	
SOCI 416	Internship in Sociology I (Mason Core)	
SOCI 481	RS: Honors Seminar in Sociology II	
Total Credits		3

Electives in the Major

Code	Title	Credits
Select 15 credits in SOCI at the 100 to 400 level [1]		15
SOCI 120	Globalization and Society (Mason Core)	
SOCI 208	Introduction to Race and Ethnicity	
SOCI 215	Gender and Society	
Any sociology (SOCI) course at the 300 - 400 level.		
Total Credits		15

[1] SOCI 101 Introductory Sociology (Mason Core) does not count toward this requirement. A maximum of 6 credits of SOCI 120 Globalization and Society (Mason Core), SOCI 208 Introduction to Race and Ethnicity, and SOCI 215 Gender and Society can be counted toward the major.

Students are strongly encouraged to focus four of their elective courses (12 credits) in one of the concentrations which follow, chosen to suit their interests and career objectives. Students who choose a concentration will complete one remaining elective.

Optional Concentrations in the Major

Students can focus 12 of their 15 elective credits to complete one of the following 12-credit concentrations.

Concentration in Childhood and Youth (CYC)
Concentration in Deviance, Crime, and Social Control (DCSC)
Concentration in Global Sociology (GSOC)
Concentration in Inequality and Social Change (INSC)

Students who graduate with honors in sociology may apply 3 credits of honors coursework to their selected concentration where appropriate and with prior written approval of the undergraduate director.

Concentration in Childhood and Youth (CYC)

This concentration focuses on the changing social realities, experiences, and identities of children and youth as they are formed in different social and historical contexts. It emphasizes children in peer groups, youth subcultural activities, youth and children and the media, schools, families, social movements, social policy, and the welfare state. This concentration is appropriate for students interested in working directly with children and youth or in organizations serving them in a broad range of fields, such as educational counseling, teaching, policy, advocacy or clinical work, family and community services, social work, early child development, and juvenile justice.

Code	Title	Credits
SOCI 360	Youth Culture and Society (Mason Core)	3
Select three from the following:		9
SOCI 302	Sociology of Delinquency	
SOCI 307	Social Movements and Political Protest	
SOCI 309	Marriage, Families, and Intimate Life	
SOCI 314	Sociology of Culture	
SOCI 315	Contemporary Gender Relations (Mason Core)	
SOCI 352	Social Problems and Solutions (Mason Core)	
SOCI 382	Education in Contemporary Society	
SOCI 395	Special Topics in Sociology	
SOCI 483	The Sociology of Higher Education (Mason Core)	
Total Credits		12

Concentration in Deviance, Crime, and Social Control (DCSC)

This concentration focuses on the social, legal, and political systems that underpin social control in Western societies and beyond. The emphasis is on how norms, values, and common sense regulate human action and the social forces that produce deviant behavior and societal responses to it. This concentration is appropriate for students interested in the criminal justice system and the law.

Code	Title	Credits
Select four from the following:		12
SOCI 301	Criminology	
SOCI 302	Sociology of Delinquency	
SOCI 307	Social Movements and Political Protest	
SOCI 308	Race and Ethnicity in a Changing World (Mason Core)	
SOCI 310	Sociology of Deviance	
SOCI 326	Conflict, Violence, and Peace	
SOCI 332	The Urban World (Mason Core)	
SOCI 340	Power, Politics, and Society	
SOCI 352	Social Problems and Solutions (Mason Core)	
SOCI 355	Social Inequality (Mason Core)	
SOCI 388	Violence and Religion	
SOCI 395	Special Topics in Sociology [1]	
Total Credits		12

[1] Depending on topic.

Concentration in Global Sociology (GSOC)

This concentration focuses on global interconnectedness and its effect on the nature of societies around the world. It emphasizes new technologies and social processes, migration, transnational communities, global cities, and social movements working across state borders. This concentration is appropriate for students interested in pursuing internationally oriented careers in social change, political reform, and international development.

Code	Title	Credits
SOCI 320	Globalization and Social Change (Mason Core)	3
Select three from the following:		9
SOCI 304	The Future of Work	
SOCI 307	Social Movements and Political Protest	
SOCI 308	Race and Ethnicity in a Changing World (Mason Core)	
SOCI 326	Conflict, Violence, and Peace	
SOCI 330	US Immigrants and Immigration (Mason Core)	
SOCI 332	The Urban World (Mason Core)	
SOCI 340	Power, Politics, and Society	
SOCI 352	Social Problems and Solutions (Mason Core)	
SOCI 388	Violence and Religion	

SOCI 395	Special Topics in Sociology [1]	
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	
Total Credits		12

[1] Depending on topic.

Concentration in Inequality and Social Change (INSC)

The focus is on inequalities, such as those of race, class, and sex, and on the manner in which such inequalities become structurally rooted in a society. The emphasis is on understanding the rise of the struggle for human rights, democracy, and various social movements that have sought to reverse these inequalities through protests, demonstrations, counterorganizations, and the ballot. This concentration is appropriate for students who seek careers in social justice organizations, social services, or teaching, and those who wish to participate in social and political movements.

Code	Title	Credits
SOCI 355	Social Inequality (Mason Core)	3
Select three from the following:		9
SOCI 304	The Future of Work	
SOCI 307	Social Movements and Political Protest	
SOCI 308	Race and Ethnicity in a Changing World (Mason Core)	
SOCI 310	Sociology of Deviance	
SOCI 315	Contemporary Gender Relations (Mason Core)	
SOCI 320	Globalization and Social Change (Mason Core)	
SOCI 330	US Immigrants and Immigration (Mason Core)	
SOCI 332	The Urban World (Mason Core)	
SOCI 340	Power, Politics, and Society	
SOCI 352	Social Problems and Solutions (Mason Core)	
SOCI 360	Youth Culture and Society (Mason Core)	
SOCI 382	Education in Contemporary Society	
SOCI 390	Sociology of Health, Illness, and Disability	
SOCI 395	Special Topics in Sociology [1]	
Total Credits		12

[1] Depending on topic.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in sociology may fulfill this requirement by successfully completing SOCI 412 Contemporary Sociological Theory.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	

GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

1 The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

2 HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

1 Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3

RELI 379	Islamic Law, Society, and Ethics	3
RELI 387	Islam, Democracy, and Human Rights	3
RELI 490	Comparative Study of Religions (Mason Core)	3
RUSS 353	Russian Civilization (Mason Core)	3
RUSS 354	Contemporary Post-Soviet Life (Mason Core)	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in Sociology Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://

academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Honors

Honors in the Major

Highly qualified students majoring in sociology may apply to graduate with honors in the major. To be eligible, students must have completed at least 75 credits, taken ENGH 302 Advanced Composition (Mason Core) for the social sciences, completed 21 credits of sociology, and have a minimum cumulative GPA of 3.30 and a minimum grade of B+ in sociology courses. Applicants must have completed SOCI 303 Methods and Logic of Inquiry and SOCI 311 Sociological Theory with a minimum grade of B in each.

If accepted, to graduate with honors in sociology, students must complete SOCI 480 Honors Seminar in Sociology I and SOCI 481 RS: Honors Seminar in Sociology II with a minimum grade of B+ in each of these courses and have an overall GPA of 3.50 in sociology courses presented for graduation. SOCI 481 RS: Honors Seminar in Sociology II includes completion of an honors thesis, which will be presented at a sociology colloquium.

Accelerated Master's

Many accelerated master's programs are available for any bachelor's degree at Mason, including this one. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Bachelor's Degree (any)/Sociology, Accelerated MA

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and an MA in Sociology in an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Polices and Bachelor's/Accelerated Master's Degree policies. For information specific to this accelerated program, see Application Requirements and Deadlines (https://soan.gmu.edu/programs/LA-MA-ACEL-soci/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with a minimum overall GPA of 3.25, and a minimum overall GPA of 3.50 in sociology courses.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

500- or 600-level SOCI courses (https://catalog.gmu.edu/courses/soci/) (up to 12 credits)
SOCI 620 Methods and Logic of Social Inquiry (will count for SOCI 303 Methods and Logic of Inquiry) and SOCI 636 Statistical Reasoning (will count for SOCI 313 Statistics for the Behavioral Sciences (Mason Core)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

500- or 600-level SOCI courses (up to 6 credits) (https://catalog.gmu.edu/courses/soci/)

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Sociology, MA

Banner Code: LA-MA-SOCI

Academic Advising

6300 Horizon Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-ma-soci

Students pursuing a Master of Arts in Sociology may pursue studies in a wide range of areas of sociological inquiry. Faculty in the program specialize in culture (including music, art, new media, and consumption); family, youth and aging; gender; globalization; immigration and migration; political economy, development and economic sociology; political sociology and social movements; race/ethnicity; religion; sociological theory; and urban sociology. The program is strongly connected to nonprofit and community groups, providing ample opportunity for research, internships, and employment.

Admissions & Policies

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the MA in sociology, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/LA-MA-SOCI/application/) on the departmental website.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Reduction of Credit

Students who enter the program with a previously conferred graduate degree may be allowed a reduction of up to 6 elective credits, subject to the approval of the graduate director and dean.

Satisfactory Progress

According to university policy, students may be terminated if they fail to achieve satisfactory progress toward their degree. In addition to the graduate policies on academic termination (see AP.6.6.2), students in the program are judged as having failed to achieve satisfactory progress if they have a plagiarism finding by the Office of Academic Integrity.

Requirements

Degree Requirements

Total credits: 33

For policies governing all graduate degrees, see AP.6 Graduate Policies. Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Foundation Courses

Code	Title	Credits
Public Sociology		
SOCI 601	Proseminar in Public and Applied Sociology	3
Social Theory		
SOCI 711	Classical Sociological Theory	3
SOCI 712	Contemporary Sociological Theory	3
Required Methodology and Analysis Course		
SOCI 620	Methods and Logic of Social Inquiry	3
Elective Methodology and Analysis Courses		**6**
Select two from the following:		
SOCI 631	Survey Research	
SOCI 632	Evaluation Research for Social Programs	
SOCI 633	Special Topics in Sociology	
SOCI 634	Qualitative Research Methods	
SOCI 636	Statistical Reasoning	
SOCI 638	Feminist Theory

Elective Courses

Code	Title	Credits
Select three to four electives from advanced courses (500-800 level) in sociology. [1]		9-12

[1] Students may take SOCI 616 Practicum in Sociology as 1-6 elective credits. With prior written approval of the MA advisor, up to two courses from outside the sociology program that are not currently listed as approved courses (inclusive of consortium courses) may count toward elective courses.

Thesis or MA Capstone Paper

Thesis

A master's thesis demonstrates the student's capacity to carry out independent research. The thesis consists of a substantial sociological research or theoretical project that will contribute to the advancement of knowledge in sociology.

Students must follow the thesis enrollment policy of the university and once enrolled in SOCI 799 Thesis, maintain continuous enrollment as specified in AP.6.9.3 Master's Thesis.

Code	Title	Credits
SOCI 799	Thesis	3-6
Total Credits		3-6

Master's Capstone Paper

As an alternative to the thesis, students can elect to complete an independent, 25-page research paper. Unlike the thesis, the master's capstone paper must be completed in one semester under the guidance of a faculty member who has been admitted to the graduate faculty.

Code	Title	Credits
SOCI 797	Master's Capstone Paper	3
Total Credits		3

Accelerated Master's

Bachelor's Degree (any)/Sociology, Accelerated MA

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and an MA in Sociology in an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Polices and Bachelor's/Accelerated Master's Degree policies. For information specific to this accelerated program, see Application Requirements and Deadlines (https://soan.gmu.edu/programs/LA-MA-ACEL-soci/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with a minimum overall GPA of 3.25, and a minimum overall GPA of 3.50 in sociology courses.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.25
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

500- or 600-level SOCI courses (https://catalog.gmu.edu/courses/soci/) (up to 12 credits)
SOCI 620 Methods and Logic of Social Inquiry (will count for SOCI 303 Methods and Logic of Inquiry) and SOCI 636 Statistical Reasoning (will count for SOCI 313 Statistics for the Behavioral Sciences (Mason Core)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

500- or 600-level SOCI courses (up to 6 credits) (https://catalog.gmu.edu/courses/soci/)

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Sociology, PhD

Banner Code: LA-PHD-SOCI

Academic Advising

6300 Horizon Hall
Fairfax Campus

Website: soan.gmu.edu/programs/la-phd-soci

The sociology doctoral degree provides rigorous training in public and applied social research, including skills in research design, data analysis, and substantive areas that are pertinent to various sectors in the Washington, D.C. area. Graduates have the theoretical, analytical, and professional skills that prepare them for academic positions in teaching or research. They are also well-qualified for nonacademic positions in the many settings that rely on the expertise of sociologists including human service agencies, marketing research firms, educational systems, nonprofit foundations, and law enforcement agencies.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For specific information, see Application Requirements and Deadlines (http://soan.gmu.edu/programs/application/LA-PHD-SOCI/) on the departmental web site.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Reduction of Credit

Students who enter the program with a previously conferred graduate degree may be allowed a reduction of credit up to 30 credits subject to the approval of the graduate director and the dean.

Satisfactory Progress

According to university policy, students may be terminated if they fail to achieve satisfactory progress toward their degree. In addition to the graduate policies on academic termination (see AP.6.6.2), students in the program are judged as having failed to achieve satisfactory progress if they have a plagiarism finding by the Office of Academic Integrity.

Requirements

Degree Requirements

Total credits: 72

For policies governing all graduate degrees, see AP.6 Graduate Policies. Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Following completion of all required coursework and passing a comprehensive exam, students are advanced to candidacy by the dean and complete a dissertation, an original and independent research project.

Elective Courses

Code	Title	Credits
Select seven elective courses from advanced courses (500-800 level) in sociology. [1]		21
Total Credits		21

[1] With prior written approval of the graduate director, up to two courses from outside the sociology program that are not currently listed as approved courses (inclusive of consortium courses) may count toward degree requirements.

Advancement to Candidacy

To advance to candidacy, students must complete all coursework required on their approved program of study. Students must also successfully pass one written comprehensive examination. The comprehensive exam tests students' mastery of the foundations of sociological inquiry, linking research methods and sociological theory to public concerns, as well as material in the student's area of concentration. It is administered by a faculty committee appointed by the graduate program director. Additionally, students must defend their dissertation proposal. Evidence of completed requirements must be on file in the Dean's Office before a student can advance to candidacy.

Dissertation

Once enrolled in SOCI 999 Doctoral Dissertation, students must maintain continuous registration each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in SOCI 999 Doctoral Dissertation, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research. Students who defend in the summer must be registered for at least 1 credit of SOCI 999 Doctoral Dissertation.

Students complete a minimum of 3 credits of SOCI 998 Doctoral Dissertation Proposal and 3 credits of SOCI 999 Doctoral Dissertation. They may apply a maximum of 12 dissertation credits (SOCI 998 Doctoral Dissertation Proposal and SOCI 999 Doctoral Dissertation combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of SOCI 999 Doctoral Dissertation. Because students cannot register for credits of SOCI 999 Doctoral Dissertation until they have advanced to PhD candidacy, they may choose (but are not required) to register for additional credits of SOCI 998 Doctoral Dissertation Proposal.

Code	Title	Credits

Global Affairs Program

Cortney Hughes Rinker, Director

6300 Horizon Hall
Fairfax Campus

Phone: 703-993-9185
Website: globalaffairs.gmu.edu

Undergraduate Program

Global Affairs is an interdisciplinary major that introduces students to the processes of globalization that affect all societies. Students gain a sophisticated understanding of complex issues such as terrorism, refugee crises, global inequality, and health and environmental challenges. Core courses in the major provide a knowledge foundation of the political, economic, cultural, and environmental processes in our global and globalizing world. The choice of a thematic or regional concentration helps students tailor the degree to their particular interests and career goals. Students in this program are encouraged to participate in study abroad opportunities and internships. They can complement their major with a second major or a minor.

Global Affairs with a Second Major or Minor

Students can complement their major in global affairs with a second major. Students interested in this option are encouraged to discuss their plans with advisors in both majors. See the section AP.5.3.7 Credit for More than One Undergraduate Major in Undergraduate Policies.

Students majoring in global affairs are encouraged to complement their major with one of the many minors offered by the college.

Minor

The undergraduate program in global affairs offers a minor in global affairs, which is available to students in any major in the university except those majoring in global affairs.

Graduate Program

The master's degree in global affairs is an interdisciplinary program that offers students the opportunity to engage in advanced study of a broad range of international global issues.

Bachelor's/Accelerated Master's Program

Highly qualified undergraduates in any major are invited to apply to the accelerated master's degree program in global affairs. If accepted, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in global affairs after satisfactory completion of 144 credits, generally within five years.

Faculty

Program Faculty

Ashley, Bockman, Boudreaux, Breglia, Burt, Copelman, Hughes Rinker (director), Hultin, Ipek, Kelly, Kim, Mandaville, McGlinchey, Mitcho (assistant director), Ngalabak, Platt, Smith, Son, West

Asia-Pacific and Northeast Asian Studies Minor

Banner Code: APNS

6300 Horizon Hall
Fairfax Campus

Email: gloa@gmu.edu
Website: global.gmu.edu/programs/la-minor-la-apns

This interdisciplinary minor is for students whose interests focus on the humanities and social sciences and Asia's role in global systems and the cultural mosaic of human experience.

Asia is the birthplace of many great religious and cultural traditions. It is a region in rapid and profound transformation. With half of the world's population and half of its land mass, Asia is destined to play an increasingly important role in the global economy and world politics. This minor will give students a better understanding of an important region of the world, broaden their perspective, and provide an edge in seeking jobs in various government agencies, international organizations, private businesses, law firms, and non-profit organizations that deal with Asia. It prepares students for graduate studies in the humanities or social sciences. This minor complements many majors including history, anthropology, communication, economics, and government and politics.

Faculty

Chang, Cuong, DeCaroli, Hinton, H. Nguyen, Lin, Paden, Platt, Ro, Son (director), Wan, Zhang

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and nine of the 18 credits required must be at the 300 and 400 level. Three credits of Chinese, Korean, or Japanese at the intermediate level (200-level) or above may be applied to the minor. Students must complete all coursework with a minimum GPA of 2.00.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

It is recommended that students interested in this minor take language courses in Chinese, Korean, or Japanese.

Core Courses

Code	Title	Credits
Select two courses from the following:		6
One course (3 credits) in a language relevant to the area such as Chinese, Korean, or Japanese at the 200-level (or higher)		
ARTH 203	Survey of Asian Art (Mason Core)	
GOVT 333	Government and Politics of Asia	
HIST 251	Survey of East Asian History (Mason Core)	
HIST 252	Survey of East Asian History (Mason Core)	
RELI 212	Religions of Asia (Mason Core)	
Total Credits		6

Electives

Code	Title	Credits
Select four courses from the following: [1]		12
ARTH 384	Arts of China (Mason Core)	
ARTH 385	Arts of Japan (Mason Core)	
ARTH 386	The Silk Road (Mason Core)	
CHIN 310	Survey of Chinese Literature (Mason Core)	
CHIN 311	Modern Chinese Literature in Translation (Mason Core)	
CHIN 320	Contemporary Chinese Film	
CHIN 325	Major Chinese Writers (Mason Core)	
CHIN 470	Special Topics in Chinese Studies	
GOVT 341	Chinese Foreign Policy	
GOVT 433	Political Economy of East Asia	
HIST 353	History of Traditional China	
HIST 354	Modern China (Mason Core)	
HIST 356	Modern Japan (Mason Core)	
HIST 357	Postwar Japan (Mason Core)	
RELI 314	Chinese Philosophies and Religious Traditions	
RELI 315	Buddhism (Mason Core)	
RELI 317	Daoism	
RELI 337	Mysticism: East and West	
Total Credits		12

[1] Any course from the list of core course options not used to fulfill that requirement may be used as an elective course. Other electives are possible, including special topics courses when focused on this region (e.g. GOVT 490 Synthesis Seminar (Mason Core), HIST 387 Topics in Global History (Mason Core), HNRS 122 Reading the Arts (Topic Varies), and approved study abroad courses or internships, when relevant, with prior written approval of the director.

Global affairs is an interdisciplinary major that introduces students to the processes of globalization that affect all societies. Students gain a sophisticated understanding of complex issues such as terrorism, refugee crises, global inequality, and health and environmental challenges. Core courses in the major provide a knowledge foundation of the political, economic, cultural, and environmental processes in our global and globalizing world. The choice of a thematic or regional concentration helps students tailor the degree to their particular interests and career goals. Students in this program are encouraged to participate in study abroad opportunities and internships. They can complement their major with a second major or a minor.

This is a Green Leaf program.

Admissions & Policies

Policies

Students pursuing this degree must complete 36-39 credits within the major, with a minimum cumulative GPA of 2.00. Students completing the Smithsonian-Mason semester program will have a total of 40-43 credits. Students must have a minimum grade of C in each of the core courses, including the capstone course (GLOA 400), and a minimum grade of C- in each of the courses used to fulfill the concentration and the language requirement for Global Affairs majors. Students who major in Global Affairs may not also earn the minor in Global Systems.

Global Affairs majors fulfill the Mason Core Capstone requirement by successfully completing GLOA 400.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses in the Major

Code	Title	Credits

GOVT 322	International Relations Theory [1]	3
Total Credits		18

[1] Note the prerequisite for this course: GOVT 132 Introduction to International Politics (Mason Core) or GOVT 133 Introduction to Comparative Politics (Mason Core)

Capstone Course

Code	Title	Credits
GLOA 400	Global Affairs Capstone (Mason Core)	3

Language Study Beyond Intermediate Proficiency

To fulfill this requirement, students can continue the study of one language beyond the intermediate proficiency level (required for all BA degrees in the college) or choose to study other languages. After a student has demonstrated intermediate proficiency in one language, the remainder of the requirement may be fulfilled by taking any courses taught in a foreign language, at any level.

Students are required to complete:
6 credits of foreign language coursework beyond the completion of 202, SPAN 212, SPAN 215, EDSE 219 or the receipt of proficiency waiver

Concentrations in the Major

Students select one concentration and complete the requirements therein. Courses applied to a global affairs concentration must come from at least two different departments. Concentration courses must be unique to the concentration: they cannot be simultaneously used to fulfill any Mason Core or college requirement for the bachelor's degree. They cannot be applied to any other major, minor, concentration, or certificate.

In addition to the courses listed with each concentration, other relevant courses, including special topics courses, study abroad, and internships (maximum 3 credits), may be applied to a concentration with prior written approval from the director.

Available Concentrations

- Concentration in the Environment (EVT)
- Concentration in Global Economy and Management (GEM)
- Concentration in Global Governance (GLGV)
- Concentration in Global Inequalities and Responses (GIR)
- Concentration in Human Security (HMSC)
- Concentration in International Development (IDEV)
- Concentration in Media, Communication, and Culture (MCC)
- Concentration in Africa (AFR)
- Concentration in Asia (ASA)
- Concentration in Europe (EU)
- Concentration in Latin America (LA)
- Concentration in Middle East and North Africa (MNA)
- Concentration in North America (NA)
- Concentration in Russia and Central Asia (RCA)
- Individualized Concentration (IND)

Concentration in the Environment (EVT)

Students may complete this concentration through 12 credits of regular coursework or through the Smithsonian-Mason Semester Program (15-16 credits).

Regular Coursework

Code	Title	Credits
Select 12 credits from the following:		12
ANTH 370	Environment and Culture	
BIOL 301	Biology and Society (Mason Core)	
ECON 335	Environmental Economics [1]	
ECON 435	Economics of Energy

Total Credits		12

[1] Note the prerequisites for this course: ECON 103 Contemporary Microeconomic Principles (Mason Core) and ECON 104 Contemporary Macroeconomic Principles (Mason Core)

Smithsonian-Mason Semester Program

Students complete 16 credits offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian National Zoo Smithsonian Conservation Biology Institute. Students may choose to focus their study on "Conservation, Biodiversity and Society", "Wildlife Ecology and Conservation", or "Endangered Species Conservation". Students take the courses in the selected focus area together in one semester, living on site at the institute in Front Royal, VA. Students who apply this coursework to the concentration cannot also apply it to the minor in Conservation Studies.

Code	Title	Credits
Select one of the following focus areas:		16
Conservation, Biodiversity and Society option (16 credits):		
CONS 320	Conservation in Practice	
CONS 401	Conservation Theory	
CONS 402	Applied Conservation	
CONS 410	Human Dimensions in Conservation (Mason Core)	
CONS 490	RS: Integrated Conservation Strategies (Mason Core)	
Wildlife Ecology and Conservation option (16 credits):		
Offered only in Fall semesters, students complete four required courses:		
CONS 400	Conservation Seminar	
CONS 404	Biodiversity Monitoring	
CONS 405	Landscape and Macrosystems Ecology	
CONS 496	Research in Conservation (Mason Core)	
Endangered Species and Conservation option (16 credits)		
Offered only in Spring semesters, students complete four required courses:		
CONS 400	Conservation Seminar	
CONS 406	Small Population Management	
CONS 491	RS: Conservation Management Planning (Mason Core)	
CONS 496	Research in Conservation (Mason Core)	
Total Credits		16

Concentration in Global Economy and Management (GEM)

In this concentration, students explore marketing, managing, financing, and networking dimensions of the globalizing world economy. Students will take classes on economic policies of national governments and international organizations as well as operations of non-government market actors.

Code	Title	Credits
Select 12 credits from the following:		12
ECON 310	Money and Banking	
ECON 360	Economics of Developing Areas (Mason Core)	
ECON 361	Economic Development of Latin America (Mason Core)	
ECON 362	African Economic Development (Mason Core)	

ECON 380	Economies in Transition (Mason Core)
ECON 390	International Economics
FNAN 440	International Financial Management
GOVT 343	International Political Economy
GOVT 367	Money, Markets and Economic Policy (Mason Core)
MGMT 461	Cross Cultural and Global Management
MKTG 407	Global Marketing
MBUS 301	Managing People and Organizations in a Global Economy
MBUS 303	Marketing in a Global Economy
MBUS 305	Introduction to International Business (Mason Core)
MBUS 491	Special Topics: Business Minor
MIS 303	Introduction to Business Information Systems
BULE 303	Legal Environment of Business [1]
BULE 402	Commercial Law [1]
Or other course approved by the program director	
Total Credits	12

[1] BULE courses require the approval of the director.

Concentration in Global Governance (GLGV)

In this concentration students explore how national governments, international organizations, and non-governmental organizations interact to identify, understand, and address global issues. Coursework covers such topics as transnational challenges, theories of international relations, global institutions, international law and ethics, international security, and conflict. Students are expected to garner theoretical and practical understanding of the ways in which national and transnational actors approach global problems.

Code	Title	Credits
Select 12 credits from the following:		12
ANTH 312	Political Anthropology (Mason Core)	
COMM 305	Foundations of Intercultural Communication (Mason Core)	
CRIM 405	Law and Justice around the World (Mason Core)

INTS 416	Refugee and Internal Displacement (Mason Core)	
INTS 422	An Experiential Approach to American Foreign Policy	
SOCI 340	Power, Politics, and Society	
Or other course approved by the program director		
Total Credits		12

Concentration in Global Inequalities and Responses (GIR)

This concentration addresses global social issues and the steps actors such as non-profits, social movements, and international organizations take to address these issues. Courses cover human rights, refugee crises, gender violence, racial discrimination, and economic inequality from both historical and contemporary perspectives and in different parts of the world. Students are expected to acquire the skills to analyze complex social problems and to be able to formulate effective strategies to address these.

Code	Title	Credits
Select 12 credits from the following:		12
ANTH 365	Scientific Racism and Human Variation	
ANTH 488	Gender, Sexuality, and Culture	
CONF 394	Human Rights and Inequality	
CRIM 405	Law and Justice around the World (Mason Core)

Individualized Concentration (IND)

Students who wish to design their own concentration must submit a one-page proposal and create a curriculum plan to be approved by the director.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in global affairs may fulfill this requirement by successfully completing EVPP 337 Environmental Policy Making in Developing Countries.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements in the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used

simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:
- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3

1 A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in Global Affairs Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Honors

Honors in the Major

Highly qualified students may pursue advanced work leading to graduation with honors in the major. Global affairs majors who have completed 75 credits with an overall GPA of 3.50 and a GPA of 3.50 in courses for the major are eligible to apply to graduate with honors.

Students pursuing honors in the major must complete the two-course honors sequence, GLOA 491 Honors Seminar in Global Affairs and GLOA 492 Honors Research Project in Global Affairs, with a minimum GPA of 3.50 in the sequence. Not all applicants who meet the minimum requirements are guaranteed acceptance.

Accelerated Master's

The accelerated master's program listed below specifies the BA in global affairs as a feeder degree for its program. Many other accelerated master's programs are also available for any bachelor's degree at Mason. See the full list of degrees (https://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason. In addition, as a student with a BA in global affairs you may be particularly interested in the accelerated (https://catalog.gmu.edu/colleges-schools/humanities-social-sciences/global-affairs/global-affairs-ma/#acceleratedmasterstext)MA in global affairs (https://catalog.gmu.edu/colleges-schools/humanities-social-sciences/global-affairs/global-affairs-ma/#acceleratedmasterstext).

Bachelor's Degree (any)/Global Affairs, Accelerated MA

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and an MA in Global Affairs in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Polices and Bachelor's/Accelerated Master's Degree policies. For information specific to the accelerated MA in global affairs, see Application Requirements and Deadlines (https://globalaffairs.gmu.edu/programs/LA-MA-ACEL-gloa/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and after meeting the following:

- Minimum overall GPA of 3.50
- Enrolled in or have completed a foreign language course 202 or higher with a minimum grade of C- prior to graduation with the BA (or other evidence of proficiency in foreign language).

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.50
- Minimum grade of B in each advanced standing course
- Successfully met Mason's requirements for undergraduate degree conferral (graduation) and completed the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

Required course

GLOA 600 Global Competencies (3 credits)

Additional Optional Courses

GLOA 605 Interdisciplinary Research Methods (3 credits)
GLOA 615 Case Studies in Globalization (3 credits) (first 3 credits taken to fulfill GLOA 615 requirement and may be repeated one time for another 3 credits as a specialization course, with permission of program)
GLOA 599 Issues in Global Affairs (1-6 credits) as a specialization course

Other specialization course after GLOA 600 and 605 have been completed with the permission of the program.

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

GLOA 599 Issues in Global Affairs (1-6 credits) as a specialization course

GLOA 615 Case Studies in Globalization (3 credits) if not taken as advanced standing

500- or 600-level courses approved for student's specialization

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Bachelor's Degree (selected)/ Environmental Science and Policy, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain a Green Leaf-designated bachelor's degree and the Environmental Science and Policy, MS (https://catalog.gmu.edu/colleges-schools/science/environmental-policy/environmental-science-policy-ms/) degrees within an accelerated timeframe. Upon completion of this 141 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

The GRE exam is not required for this accelerated master's program.

Students should submit three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor (see Graduate Advisor section below) stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated major or minor may apply to this accelerated master's program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) and CHEM 212 General Chemistry II (Mason Core) and three semesters of biology, including a course in ecology, or the equivalent, for example:

Code	Title	Credits
Select one of the following options:		13
Option 1:		
BIOL 213	Cell Structure and Function (Mason Core)	
BIOL 214	Biostatistics for Biology Majors	
BIOL 308	Foundations of Ecology and Evolution	
Option 2:		
EVPP 210	Environmental Biology: Molecules and Cells	
EVPP 301	Environmental Science: Biological Diversity and Ecosystems	
EVPP 302	Environmental Science: Biomes and Human Dimensions	
EVPP 305	Environmental Microbiology Essentials	

EVPP 306	Environmental Microbiology Essentials Laboratory
Option 3:	
CONS 401	Conservation Theory
CONS 402	Applied Conservation
6 credits of BIOL or CONS electives	

Graduate Advisor

By at least the beginning of their senior year, students should seek out a faculty member in the Department of Environmental Science and Policy who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason University (called "program faculty") can serve as master's advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
EVPP 518	Conservation Biology	3
EVPP 529	Environmental Science Communication	3
EVPP 621	Overview of Biodiversity Conservation	3
EVPP 635	Environment and Society	3

Global Affairs, MA

Banner Code: LA-MA-GLOA

Academic Advising

6300 Horizon Hall
Fairfax Campus

Email: globalma@gmu.edu
Website: globalaffairs.gmu.edu/programs/la-ma-gloa

The Global Affairs, MA is an interdisciplinary program offering students the opportunity to engage in advanced study of a broad range of global issues. Students complete a core curriculum that provides the knowledge and skills to think and act globally. Students also pursue specializations that include relevant courses from academic departments across the university. All students in the program take part in a residency abroad, typically two weeks in duration, and complete a capstone seminar. Graduates enter the workforce or move forward in their already-established international and domestic careers in the public sector, non-governmental organizations, and business.

This is a Green Leaf program.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For specific information, see Application Requirements and Deadlines (http://globalaffairs.gmu.edu/programs/application/LA-MA-GLOA/) on the departmental website.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Students who wish to pursue study abroad in addition to the required core course GLOA 710 Seminar Abroad must receive prior approval and may not use more than 3 credits earned while abroad towards their specialization. Students must maintain a 3.00 cumulative grade point average with no more than two grades below B.

Requirements

Degree Requirements

Total credits: 30

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
GLOA 600	Global Competencies	3
GLOA 605	Interdisciplinary Research Methods	3
GLOA 610	Economic Globalization and Development	3

GLOA 615	Case Studies in Globalization	3
GLOA 710	Seminar Abroad	3
Total Credits		15

Specialization

Students choose to specialize in one of eight fields by completing 12 credits in that field selected from the courses listed. The specialization is developed in consultation with an advisor. Students who wish to design their own specialization must submit a one-page proposal and receive written approval from the director. Specialization courses must come from at least two academic disciplines.

Global Conflict and Security

Code	Title	Credits
Select 12 credits from the following:		12
BIOD 610	Advanced Topics in Global Health Security (minimum of 3 credits)

Dual Degree Options

Foreign Languages, MA and Global Affairs, MA Dual Degree

Students interested in pursuing a dual master's program linking foreign languages or global affairs with another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master's Degree Programs.

Students approved to pursue a dual master's program linking the foreign languages MA with a concentration in French, Spanish, or Spanish bilingual/multicultural education with the global affairs MA can share 12 credits between the two programs. Application to the second master's program should be pursued with consultation of the directors of both programs. Admission to the second master's program will require that the student has met the minimum prerequisites for admissions to the second program.

Accelerated Master's

Bachelor's Degree (any)/Global Affairs, Accelerated MA

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and an MA in Global Affairs in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Polices and Bachelor's/Accelerated Master's Degree policies. For information specific to the accelerated MA in global affairs, see Application Requirements and Deadlines (https://globalaffairs.gmu.edu/programs/LA-MA-ACEL-gloa/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and after meeting the following:

- Minimum overall GPA of 3.50
- Enrolled in or have completed a foreign language course 202 or higher with a minimum grade of C- prior to graduation with the BA (or other evidence of proficiency in foreign language).

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.50
- Minimum grade of B in each advanced standing course
- Successfully met Mason's requirements for undergraduate degree conferral (graduation) and completed the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

Required course

GLOA 600 Global Competencies (3 credits)

Additional Optional Courses

GLOA 605 Interdisciplinary Research Methods (3 credits)
GLOA 615 Case Studies in Globalization (3 credits) (first 3 credits taken to fulfill GLOA 615 requirement and may be repeated one time for another 3 credits as a specialization course, with permission of program)
GLOA 599 Issues in Global Affairs (1-6 credits) as a specialization course

Other specialization course after GLOA 600 and 605 have been completed with the permission of the program.

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

GLOA 599 Issues in Global Affairs (1-6 credits) as a specialization course

GLOA 615 Case Studies in Globalization (3 credits) if not taken as advanced standing

500- or 600-level courses approved for student's specialization

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Higher Education Program

316 Enterprise Hall
Fairfax Campus

Phone: 703-993-2310
Website: highered.gmu.edu

The Higher Education Program prepares students for positions of leadership in teaching, research, and administration at community colleges, four-year colleges, and universities around the globe. The interdisciplinary curriculum focuses on leadership, the scholarship of teaching and learning, administration, and assessment. The program also prepares students for positions in academic and student affairs as well as in associations, government agencies, and industries whose activities relate to or impact higher education.

MA in Higher Education and Student Development

The program prepares students for positions in higher education administration, student development, non-profit higher education associations, and government organizations. Today's higher education professionals are required to address both the needs of incoming traditionally aged students, as well as those of older students returning for a degree and special populations. The wide range of student backgrounds in the current complex context requires a holistic approach to college student development.

Doctor of Philosophy in Education with Specialization in Higher Education

The doctor of philosophy in education with a specialization in higher education is offered jointly by the Higher Education Program and the College of Education and Human Development. This doctoral program prepares students for faculty positions and positions of leadership in administration and student services through core required coursework in higher education and through a secondary concentration that can further disciplinary expertise.

See the Education, PhD for more information.

Certificates

The program offers graduate certificates in college teaching with a concentration in higher education pedagogy and in higher education administration. Students may take these as stand-alone certificates or pursue them concurrently with a graduate degree program. Part of the certificate course work may be applied to the degree subject to the approval of the director of the graduate degree program. Students must apply and be accepted to a graduate certificate program.

Faculty

Program Faculty

Fairfax Campus

Email: hepadmin@gmu.edu
Website: highered.gmu.edu/programs/la-cerg-ctch-he

The certificate in College Teaching is designed for graduate students who are planning a career in undergraduate education. The program offers courses that enhance pedagogical skills and explore pedagogical assessment or scholarship with the use of technology in instruction.

This certificate program qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Concentration in English Pedagogy

This concentration in the graduate certificate in college teaching requires 18 credits. Students must achieve a minimum grade of 3.00 in each course.

Concentration in Higher Education Pedagogy

This concentration in the graduate certificate in college teaching requires 18 credits.

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students pursuing this graduate certificate must choose either a concentration in English pedagogy or a concentration in higher education pedagogy.

Concentration in English Pedagogy (EPGY)

Core Courses

Code	Title	Credits
ENGH 610	Proseminar in Teaching the Reading of Literature	3
ENGH 615	Proseminar in Composition Instruction	3
Pedagogy Courses		
Select two courses from the following:		6
ENGH 620	Topics in Pedagogy	
ENGH 695	Northern Virginia Writing Project Inservice Program [1]	
ENGH 697	Composition Theory	
ENGH 699	Visiting Writers [2]	
LING 521	Applied Linguistics: Teaching English to Speakers of Other Languages (TESOL)	
Total Credits		12

1 Offered only to full-time teachers through school district contracts.

2 Topic must be NVWP Summer Institute; open to full-time teachers on an invitation basis.

Electives

Code	Title	Credits
Select content-area coursework that supports their goals in developing pedagogical expertise. [1]		6
Total Credits		6

1 Electives should be selected in consultation with an advisor.

Concentration in Higher Education Pedagogy (HEDP)

Core Courses

Code	Title	Credits
Choose 9 credits from the following courses:		9
HE 602	College Teaching	
HE 605	Learning Assessment	

HE 703	Higher Education in the Digital Age	
HE 704	The Scholarship of Teaching and Learning	
HE 712	Assessment and Program Evaluation in Higher Education	
Practicum		
HE 685	Practicum	3
Total Credits		12

Electives

Code	Title	Credits
Choose 6 credits from the following courses:		6
HE 601	The Community College	
HE 606	Cultural Pluralism in Higher Education	
HE 610	Research Methods in Higher Education	
HE 641	Introduction to Helping Skills	
HE 645	The Contemporary College Student	
HE 646	Student Development Theory	
HE 706	Students in Postsecondary Education	
HE 721	History of Higher Education	
Other HE courses, when relevant, with approval of director or advisor		
Total Credits		6

Higher Education Administration Graduate Certificate

Banner Code: LA-CERG-HEDA

Academic Advising

316 Enterprise Hall
Fairfax Campus

Email: hepadmin@gmu.edu
Website: highered.gmu.edu/programs/la-cerg-heda

The certificate is designed for individuals who are planning or enhancing a career in a broad range of administrative positions in higher education institutions. The certificate will provide core knowledge for administrative processes in the context of higher education institutions.

This certificate program qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the graduate certificate in higher education administration, see Application Requirements and Deadlines (http://chss.gmu.edu/programs/LA-CERG-HEDA/application/).

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Core Courses

Code	Title	Credits
Choose 9 credits from the following:		9
HE 646	Student Development Theory	
HE 712	Assessment and Program Evaluation in Higher Education	
HE 721	History of Higher Education	
HE 722	Organization and Administration in Higher Education	
Total Credits		9

Higher Education and Student Development, MA

Banner Code: LA-MA-HESD

Academic Advising

316 Enterprise Hall
Fairfax Campus

Email: hepadmin@gmu.edu
Website: highered.gmu.edu/programs/la-ma-hesd

The program prepares students for positions in higher education administration, student development, non-profit higher education associations, and government organizations. Today's higher education professionals are required to address both the needs of incoming traditionally aged students, as well as those of older students returning

for a degree and special populations. The wide range of student backgrounds in the current complex context requires a holistic approach to college student development.

The Master of Arts degree in Higher Education and Student Development will prepare future higher education leaders who understand higher education in the digital age, student development, multicultural and diverse populations, program development, professionalism, and learning assessment. This multidisciplinary program offers both thesis and project capstone options and is full and part-time student friendly. Alumni hold positions in areas such as career development, academic advising, assessment, facilities management, admissions, and residence life.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For specific information, see Application Requirements and Deadlines on the departmental website.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Transfer Credit

Courses applied to the degree are subject to the following restrictions: a maximum of 6 credits may be taken through the Consortium of Universities of the Washington Metropolitan Area; a maximum of 9 credits may be transfer credits; a maximum of 6 of the transfer credits may be from other accredited institutions.

Transfer credits include credits taken before first enrolling as an admitted degree-seeking student (at another institution, in another Mason graduate program, or in Mason non-degree status) or credits taken at another institution after admission to the degree program through study abroad or study elsewhere (which requires prior written approval of the director and the dean). Additional information may be found in AP.6.5.3 Transfer of Credit.

Requirements

Degree Requirements

Total credits: 36

The program offers two distinct tracks: (a) Student Affairs Administration and (b) Higher Education Leadership. The Students Affairs Administration track is built on the Council for the Advancement of Standards in Higher Education's (CAS) standards and guidelines for Master's Level Student Affairs Professional Preparation Programs. The Higher Education Leadership track takes an interdisciplinary approach to offer the flexibility for students to select courses that meet their professional needs.

Students Affairs Administration track

The Students Affairs Administration track is built on the Council for the Advancement of Standards in Higher Education's (CAS) standards and guidelines for Master's Level Student Affairs Professional Preparation Programs. Graduates will have the knowledge, prospectives, and skills to serve in a wide variety of capacities within higher education.

Required Courses

Code	Title	Credits
HE 606	Cultural Pluralism in Higher Education	3
HE 610	Research Methods in Higher Education	3
HE 624	Finance and Fiscal Management in Higher Education	3
HE 644	Organization and Administration of Student Affairs	3
HE 645	The Contemporary College Student	3
HE 646	Student Development Theory	3
HE 685	Practicum [1]	6
HE 703	Higher Education in the Digital Age	3
HE 721	History of Higher Education	3
Total Credits		30

[1] CAS standard requires students to complete two practicums that provide distinct experiences. Students who are working full-time in higher education may substitute the 2nd practicum with an elective course.

Capstone Requirement

Students may choose the capstone course option or thesis option as described below.

Code	Title	Credits
Capstone Course Option		
Students who select the capstone course option will complete one elective course (3 credits) approved by the advisor in addition to the HE 797 Higher Education Capstone. Electives can be taken outside of the Higher Education Program and should be selected in consultation with the advisor.		
One elective course		3
HE 797	Higher Education Capstone	3
Total Credits		6

Code	Title	Credits
Thesis Option		
A thesis is a rigorous scholarly inquiry that requires the collection of original data and is presented in a traditional, formal, written format. It is informed by experience gained from the research apprenticeship. The guideline and deadlines for thesis submission are set by the University and administered by the University Dissertation and Thesis Service. Students selecting the thesis option must complete an extra research course approved by the student's thesis advisor in addition to HE 799 Higher Education Thesis.		
One elective research course		3
HE 799	Higher Education Thesis (3 credits required) [1]	3
Total Credits		6

[1] Students are required to enroll in a minimum of 3 credit hours of HE 799. If the thesis is not completed within the timeframe of a 3-credit-hour course, the student must continue to register and enroll in HE 799 until the thesis is completed.

Higher Education Leadership track

The Higher Education Leadership track takes an interdisciplinary approach to offer the flexibility for students to select courses that meet their professional needs.

Required Courses

Code	Title	Credits
HE 606	Cultural Pluralism in Higher Education	3
HE 610	Research Methods in Higher Education	3
HE 624	Finance and Fiscal Management in Higher Education	3
HE 645	The Contemporary College Student	3
HE 685	Practicum	3
HE 703	Higher Education in the Digital Age	3
HE 721	History of Higher Education	3
Total Credits		21

Specialization Courses

Code	Title	Credits
Students should work with their advisor to select three courses (9 credit hours) either in the Higher Education Program or in another discipline that fits the students' career goals.		9

Capstone Requirement

Students may choose the capstone course option or these option as described below.

Code	Title	Credits
Capstone Course Option		
Students who select the capstone course option will complete one elective course (3 credits) approved by the advisor in addition to the HE 797 Higher Education Capstone. Electives can be taken outside of the Higher Education Program and should be selected in consultation with the advisor.		
One elective course		3
HE 797	Higher Education Capstone	3
Total Credits		6

Code	Title	Credits
Thesis Option		
A thesis is a rigorous scholarly inquiry that requires the collection of original data and is presented in a traditional, formal, written format. It is informed by experience gained from the research apprenticeship. The guideline and deadlines for thesis submission are set by the University and administered by the University Dissertation and Thesis Service. Students selecting the thesis option must complete an extra research course approved by the student's thesis advisor in addition to HE 799 Higher Education Thesis.		
One elective research course		3
HE 799	Higher Education Thesis	3
Total Credits		6

Interdisciplinary Studies Program

Ben Gatling, Interim Director

5200 Horizon Hall
Fairfax Campus

Phone: 703-993-8762
Website: mais.gmu.edu

The master of arts degree program in interdisciplinary studies (MAIS) is designed for students who seek a degree that integrates knowledge from several disciplines. It addresses a rapidly evolving demand for specialized and individualized graduate study. Students choose one of seven structured concentrations or devise an individualized program of study when traditional degree programs do not meet their evolving careers or life goals.

The degree requires coursework from a home department and selected courses from other disciplines. Students complete their degrees with a project or thesis.

Concentrations

Students pursuing a master's degree program in interdisciplinary studies can choose established concentrations in these areas:

- Computational Social Science
- Energy and Sustainability
- Religious Studies
- Social Entrepreneurship
- Social Justice and Human Rights
- War and the Military in Society
- Women and Gender Studies

For a variety of reasons, traditional graduate programs are not able to meet the specific educational goals of some students. They can choose an individualized concentration. With the help of a faculty advisor, they design an individualized program of study that includes courses from several academic disciplines.

Website: mais.gmu.edu/programs/LA-MAIS-ISIN

The MA in interdisciplinary studies is for students who seek a master's degree that integrates knowledge from several disciplines. It addresses the rapidly evolving demand for unique graduate study by promoting advanced scholarship that transcends traditional disciplinary boundaries. Students can pursue one of the following structured interdisciplinary concentrations and also have the opportunity to design an individualized concentration to meet the special needs of their careers.

The MAIS in Interdisciplinary Studies with a concentration in Energy and Sustainability is a Green Leaf program.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the MA in Interdisciplinary Studies, see Application Requirements and Deadlines (http://mais.gmu.edu/programs/LA-MAIS-ISIN/application/).

Applicants must show a capacity for original thought in cross-disciplinary research. There may be additional skills required of students applying to specific concentrations. Students will be admitted to the Individualized Studies concentration only if the applicant identifies a Mason Faculty member appropriate for the intended course of study who is willing to serve as the student's advisor.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Credit Restrictions

Courses applied to the degree are subject to the following restrictions:

- a maximum of 6 credits may be earned through independent study or directed readings and research courses
- a maximum of 6 credits may be taken through the Consortium of Universities of the Washington Metropolitan Area
- a maximum of 15 credits may be transfer credits
- a maximum of 6 of the transfer credits may be from other accredited institutions

Transfer credits include credits taken before first enrolling as an admitted degree-seeking student (at another institution, in another Mason graduate program, or in Mason nondegree status) or credits taken at another institution after admission to the degree program through study abroad or study elsewhere (which requires prior written approval of the director and the dean). Additional information may be found in Academic Policies.

Requirements

Degree Requirements

Total credits: 36

This is a Green Leaf program.

The Green Leaf status for this program applies only to the concentration in Energy and Sustainability.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students pursuing this degree must successfully complete 36 credits of graduate coursework in one of the concentrations which follow. Students must submit a curriculum worksheet that has been approved by their concentration head and the director. All students complete their work in the program with a project or thesis.

Concentration in Computational Social Science (CSS)

Computational social science (CSS) is a relatively new interdisciplinary science in which social science questions are investigated with modern computational tools. Computational social scientists investigate complex social phenomena such as economic markets, traffic control, and political systems by simulating the interactions of the many actors in such systems on computers. They hope to gain insights which will lead to better management of the behavior of the larger social systems, i.e., prevention of market crashes, smoothed traffic flow, or maintenance of political stability. The intractability of many social problems calls for the new approaches provided by computational social science.

CSS is a highly interdisciplinary field that requires teams to plan and complete projects, be they undertaken by government, industry, or non-profit entities. Project managers of such teams, overseeing all elements of project design and execution, tend to hold PhDs. The MAIS concentration will train students to be members of these project teams, able to meaningfully contribute to background research and to project design, execution, and communication.

Prior background should include a bachelor's degree in one of the social sciences, in computer science, in engineering, or in a relevant discipline, as well as undergraduate courses in these and related areas. Bachelor's degrees in other areas are also eligible, but the student may be required to take additional courses in social science, mathematics, or computer science as prerequisites to admission.

Required Course of Proseminar

Code	Title	Credits
MAIS 696	MAIS ProSeminar	1
Total Credits		1

Core Courses

Code	Title	Credits
Required Courses [1]		
CSS 600	Introduction to Computational Social Science	3
CSS 605	Object-Oriented Modeling in Social Science	3
CSS 610	Agent-based Modeling and Simulation	3
Electives [2]		
Select three electives from the following:		9
CSS 620	Origins of Social Complexity	
CSS 625	Complexity Theory in the Social Sciences	
CSS 645	Spatial Agent-Based Models of Human-Environment Interactions	
CSS 692	Social Network Analysis	

CSS 739	Topics in Computational Social Science	
Total Credits		18

1 The required CSS courses provide an understanding of the conceptual, technical, and practical foundations of computational social science.

2 The electives provide an understanding of the technical foundations and current work in at least two subfields of computational social science.

Research Course

The research course provides students with exposure to the most current ongoing research in the field and allows them to further develop their computational research expertise.

Code	Title	Credits
Select one from the following:		3
CSS 796	Directed Reading and Research	
CSS 898	Research Colloquium in Computational Social Science	
CSS 899	Colloquium in Computational Social Science	
Total Credits		3

Electives

The electives allow students to acquire a substantive specialization as well as additional training in social and computational science. Because of the broad spectrum of social science phenomena, methodologies, and student backgrounds, there is a large pool of potential courses. Electives may include any Mason master's-level course in computational social science, social science, computer science, computational science and informatics, statistics, or other quantitative methods such as data visualization, information technology, and geographic information science. Electives should be selected in conjunction with and approval of the student's advisor and the Director of CSS Graduate Studies. If the student does not have prior coursework in multivariate statistical analysis, the electives should include at least one such course relevant for the student's chosen specialization.

Students who elect to complete a 4-credit thesis take 9 elective credits. Students who complete a 1-credit project take 12 elective credits.

Proposal

Code	Title	Credits
MAIS 797	Interdisciplinary Studies Proposal	1
Total Credits		1

Project or Thesis

Code	Title	Credits
Nine to twelve credits of electives		9-12
Select one from the following:		1-4
MAIS 798	Interdisciplinary Studies Project (take 1 credit)	
MAIS 799	Interdisciplinary Studies Thesis (take 4 credits)	
Total Credits		13

Concentration in Energy and Sustainability (EAS)

This concentration is designed for students interested in careers in energy and sustainability-related positions in the public, private, or non-profit sectors, including law, national and international policy, media, government, and business. As one of the University's Green Leaf academic programs, the concentration in energy and sustainability focuses on finding ways to meet present needs for energy and material goods without compromising the ability of future generations to meet their needs. A sustainability education lies at the intersection of environmental science, engineering, economics, business, public policy, social justice, and many other areas. Energy required to fuel all of these endeavors is a crucial component of sustainability.

Required Course of Interdisciplinary Studies Proseminar

Code	Title	Credits
MAIS 696	MAIS ProSeminar	1
Total Credits		1

Core Courses in Energy and Sustainability

Code	Title	Credits
Required Courses		
EVPP 533	Energy Policy	3
GGS 507	Geographic Approaches for Sustainable Development	3
Natural Science Course		
PHYS 581	Topics in Renewable Energy	3
or GEOL 521	Geology of Energy Resources	
Total Credits		9

Energy, Sustainability or Environmental Policy

Students choose from the following courses or other relevant courses chosen in consultation with an advisor.

Code	Title	Credits
Select two courses from the following:		6
BIOD 760	National Security Technology and Policy	
ECON 695	Special Topics in Economics [1]	
EVPP 505	Selected Topics in Environmental Science (take 3 credits) [2]	
EVPP 638	Corporate Environmental Management and Policy	
EVPP 642	Environmental Policy	
GGS 525	Economics of Human/Environment Interactions	
POGO 550	Topics in Policy and Government (when topic involves environmental or sustainability policy)	
PUBP 710	Topics in Public Policy [3]	
Total Credits		6

1 When the topic involves environmental or sustainability policy.

2 When the topic involves energy or sustainability policy.

3 When the topic involves environmental or sustainability issues.

Humanities or Social Science Approaches to Sustainability and Environmental Issues

Students choose from the following courses or other relevant courses chosen in consultation with an advisor.

Code	Title	Credits
Select two courses from the following:		6
COMM 660	Climate Change and Sustainability Communication Campaigns	
HIST 615	Problems in American History [1]	
ECON 695	Special Topics in Economics [2]	
INTS 540	Contemporary Issues in Social Justice Human Rights	
ITRN 760	International Environmental Politics	
PHIL 643	Environmental Ethics	
RELI 636	Religion and the Natural Environment	
Total Credits		6

1 When the topic involves environmental or sustainability issues.

2 When the topic involves environmental or sustainability policy.

Planning, Modeling, or Management

Students choose from the following courses or other relevant courses chosen in consultation with an advisor.

Code	Title	Credits
Select one from the following:		3-4
CEIE 601	Infrastructure Modeling	
EVPP 638	Corporate Environmental Management and Policy	
EVPP 650	Ecosystem Analysis and Modeling	
EVPP 693	Directed Studies in Environmental Science and Public Policy (take 3 credits)	
Total Credits		3-4

Natural Science

Students choose from the following courses or other relevant courses chosen in consultation with an advisor.

Code	Title	Credits
Select one from the following:		3
CLIM 690	Scientific Basis of Climate Change	
EVPP 607	Fundamentals of Ecology	
EVPP 677	Applied Ecology and Ecosystem Management	
Total Credits		3

Electives

Students who wish to take MAIS 798 Interdisciplinary Studies Project for their capstone research experience will take one course (3 credits) of electives from courses listed below or other relevant course chosen in consultation with an advisor. They may also fulfill this requirement with experiential learning. Students who wish to take MAIS 799 Interdisciplinary Studies Thesis will not take an elective course or pursue experiential learning credits.

Code	Title	Credits
Select 0-3 credits from the following:		0-3
BIOD 760	National Security Technology and Policy	
CEIE 601	Infrastructure Modeling	
CEIE 664	Transportation Engineering and the Environment	
CLIM 690	Scientific Basis of Climate Change	
COMM 660	Climate Change and Sustainability Communication Campaigns	
ECON 695	Special Topics in Economics [1]	
EVPP 505	Selected Topics in Environmental Science (take 3 credits) [1]	
EVPP 607	Fundamentals of Ecology	
EVPP 638	Corporate Environmental Management and Policy	
EVPP 642	Environmental Policy	
EVPP 650	Ecosystem Analysis and Modeling	
EVPP 677	Applied Ecology and Ecosystem Management	
EVPP 693	Directed Studies in Environmental Science and Public Policy (take 3 credits)	
GEOL 521	Geology of Energy Resources	
GGS 525	Economics of Human/Environment Interactions	
HIST 615	Problems in American History [2]	
INTS 540	Contemporary Issues in Social Justice Human Rights	
ITRN 760	International Environmental Politics	
MAIS 695	Experiential Learning	
PHIL 643	Environmental Ethics	
PHYS 581	Topics in Renewable Energy	
PUBP 710	Topics in Public Policy [2]	
PUBP 721	Transportation Economics	
RELI 636	Religion and the Natural Environment	
Total Credits		0-3

1 When the topic involves environmental or sustainability policy.

2 When the topic involves environmental or sustainability issues.

3 Students may fulfill their elective credits with experiential learning. Experiential learning opportunities can include internships, service-learning, consulting projects, and field studies or research (including overseas). Because the intention is to develop and apply newly acquired skills, students may not use work done previously or their current employment to fulfill this requirement. All experiential learning projects must be approved by the social entrepreneurship concentration head the semester before registering for the course.

Research Methods Course

Students choose one of the following courses or other relevant courses in consultation with an advisor.

Code	Title	Credits
Select one course from the following:		3
BINF 690	Numerical Methods for Bioinformatics	
EVPP 632	Qualitative Research Methods for Environmental Scientists	
EVPP 650	Ecosystem Analysis and Modeling	
EVPP 651	Multivariate Data Analysis for Ecology and Environmental Science	
GLOA 605	Interdisciplinary Research Methods	
OR 682	Computational Methods in Engineering and Statistics	

POGO 511	Introductory Data Analysis for Policy and Government	
PUBP 710	Topics in Public Policy [1]	
SOCI 620	Methods and Logic of Social Inquiry	
Total Credits		3

[1] When topic is Analytical Methods for Science, Technology and Innovation Policy.

Proposal

Code	Title	Credits
MAIS 797	Interdisciplinary Studies Proposal	1
Total Credits		1

Project or Thesis

Students who wish to do a project in lieu of a thesis will take 1 credit of MAIS 798 Interdisciplinary Studies Project and an additional 3 credit elective course from the courses listed under the electives requirement. Students who choose to write a thesis will take 4 credits of MAIS 799 Interdisciplinary Studies Thesis and no additional electives.

Code	Title	Credits
Zero to three credits of electives		0-3
Select one from the following:		1-4
MAIS 798	Interdisciplinary Studies Project (take 1 credit)	
MAIS 799	Interdisciplinary Studies Thesis (take 4 credits)	
Total Credits		4

Concentration in Religious Studies (RELI)

The concentration in religious studies is particularly relevant for students who are interested in careers in law, national and international government, print and media journalism, library sciences, archives and museums, public and social service, teaching, advanced graduate studies, and religious communities and institutions. The Washington, DC metropolitan area is rich in the presence of many major religious traditions and their places of worship.

The core courses introduce students to the study of religion as a unique and rigorous intellectual discipline. Students learn to evaluate a variety of perspectives on religion and gain a clear understanding of the dimension of the sacred in all aspects of human life including those commonly designated "secular". Students discover how religious perceptions of the sacred respond to an evolving world and relate to and influence cultures, institutions, and values.

Students also examine the effects of historical crises and the forces of change on religions including contemporary religious pluralism and inter-religious dialogue. Students gain a deeper knowledge of specific traditions and a more profound understanding of values and worldviews from the viewpoint of cultural diversity and religious pluralism.

RELI 600	Interdisciplinary Pathways in the Study of Religion	3
RELI 630	Theories and Methods in the Study of Religion	3
Total Credits		6

Interdisciplinary Competencies in Religious Studies (9 credits)

Students take three courses from the list of competencies below to complement their interests and the skills they have already acquired through formal education and professional experience, or other courses that are chosen in consultation with an advisor.

Code	Title	Credits
Religion, Philosophy, and Ethics		
PHIL 603	Aristotle: Selected Works	
PHIL 608	Hegel's Phenomenology of the Spirit	
PHIL 640	History of Ethical Theory	
PHIL 658	Feminist Theory	
RELI 633	Issues in Religious Ethics	
RELI 636	Religion and the Natural Environment	
RELI 637	Religion and Secularity in State and Society	
RELI 640	Religion and Law	
RELI 646	Islam and Human Rights	
RELI 660	Islamic Biomedical Ethics (Religion in the Americas)	
Religion in the Americas		
HIST 661	Religion in North America to 1870	
HIST 662	U.S. Religion since 1870	
HIST 663	Topics in U.S. Religious History	
RELI 634	Topics in American Religion	
RELI 640	Religion and Law	
Religions in Conflicl, Conversation, and Transition		
ANTH 545	Ritual and Power in Social Life	
CONF 653	World Religions, Diplomacy, and Conflict Resolution	
CONF 722	Conflict and Religion	
RELI 632	Interreligious Dialogue	
RELI 637	Religion and Secularity in State and Society	
RELI 644	Islamic Texts and Contexts	
RELI 645	Muslim Comparative Theologies: Sunni-Shi`i Religious Thought	

Electives

Elective courses should complement the student's competencies, and/or reflect the topic of their project or thesis. Students take 15-18 credits of electives chosen from the courses listed below, or other appropriate courses chosen in consultation with the concentration head. Students who do a project for their capstone will take 18 credits of electives. Students who do a thesis for their capstone will take 15 credits of electives.

Code	Title	Credits
Select 5-6 courses from the following:		
ANTH 535	Anthropology and the Human Condition: Seminar I

Concentration in Social Entrepreneurship (SOCE)

The concentration in social entrepreneurship will equip students with the subject matter expertise, strategic knowledge, technical support, and social networks needed to create, operate, develop, and accelerate startups; bring ideas to scale; and improve an existing program's effectiveness. These future leaders will learn about sustainability, ethical leadership, strategic management, and working effectively within complex networks made up of divergent groups of stakeholders. All students will complete a capstone research project and an experiential learning requirement that deliver practical knowledge and real-world experience. This degree is suitable for students seeking careers in government, business, or the non-profit sector.

Interdisciplinary Perspectives and Competencies in Social Entrepreneurship (9-12 credits)

Students take three or four courses from the list of competencies below to complement the skills they have already acquired through formal education and professional experience, or other courses to enhance their skills, including oral and written communication and research methods, that are chosen in consultation with an advisor. Students choosing the thesis option for their capstone take 9 credits including a research methods course. Students choosing the project option for their capstone take 12 credits total, with a research methods course being optional.

Research Methods

Code	Title	Credits
GLOA 605	Interdisciplinary Research Methods	
INTS 534	Research for Social Change	
Appropriate alternative chosen in consultation with the concentration head		

Subject Matter Expertise

Students must develop expertise in the social problem they seek to address through entrepreneurship. Possible areas of focus include global and/or local poverty, homelessness, human trafficking, conflict resolution, women's rights, racial inequality, educational and health-care access, climate change, environmental sustainability, and human rights, among other possible topics. The experiential learning requirement should be met through an opportunity that advances the student's understanding of their subject matter expertise.

Students take:

Code	Title	Credits
INTS 540	Contemporary Issues in Social Justice Human Rights [1]	3
6 credits of courses related to the student's chosen subject matter area of expertise, chosen in consultation with the concentration head.		6
Experiential learning		**3**
MAIS 695	Experiential Learning	
or other relevant experiential learning course chosen in consultation with the concentration head.		
Total Credits		12

[1] or other social justice and human rights course chosen in consultation with the concentration head.

[2] Students will seek out and/or create an opportunity for experiential learning that aligns with a social mission. Experiential learning opportunities can include internships, service-learning, consulting projects, and field studies or research (including overseas). Because the intention is to develop and apply newly acquired skills, students may not use work done previously or their current employment to fulfill this requirement. All experiential learning projects must be approved by the social entrepreneurship concentration head the semester before registering for the course.

Concentration in Social Justice and Human Rights (SJHR)

The social justice and human rights concentration is designed to cultivate a deep theoretical understanding of the social, political, cultural, historical, and economic implications of a wide array of social injustices and human rights issues. Students are engaged in the applied process of imagining and actualizing holistic and complex strategies for creating and sustaining a more equitable, just, and humane world.

Concentration in War and the Military in Society (WMS)

The concentration in war and the military in society equips students with skills and knowledge to evaluate, analyze, and solve problems related to the use of organized violence, including questions of national security and national strategy, international relations, defense policymaking, and domestic, fiscal, legal, and social policy surrounding the instruments of national defense. Students will engage in interdisciplinary coursework that provides a variety of methods and tools to frame and analyze these questions, using historical and contemporary case studies to better understand the dilemmas and opportunities facing policymakers and military professionals in their efforts to think strategically about a variety of challenges.

All students will complete a capstone research project that provides an opportunity to do deep research into an historic or contemporary case. In addition, students may also complete an experiential learning requirement that combines practical knowledge and real-world experience to engage in problems connected to war and society.

Required Course of Proseminar

Code	Title	Credits
MAIS 696	MAIS ProSeminar	1
Total Credits		1

Interdisciplinary Perspectives on War and the Military in Society (27-30 Credits)

Students take 9-10 courses from 2 or more interdisciplinary perspectives below to complement the skills and subject matter expertise they have already acquired through formal education and professional experience, or other courses to enhance their portfolio that are chosen in consultation with the concentration head. Students who do a project (1 credit) in lieu of a thesis (4 credits) for their capstone will take an additional 3-credit course.

Historical Perspectives

These courses draw upon conflicts from two thousand years of human experience, from ancient Rome to contemporary issues in civil-military relations. The historical perspective focuses upon the past and the way that problems related to war and society have changed over time.

Code	Title	Credits
HIST 615	Problems in American History (when topic is The Second World War or Civil Military Relations)	
HIST 617	Topics in the American Civil War Era (when the topic is The Civil War)	
HIST 631	Era of the American Revolution	
HIST 635	Problems in European History (when the topic is Fall of the Roman Empire, The First Global Wars, Revolutions in the Atlantic, The Second World War, or Technology and Power)	
HIST 677	The Vietnam War	
HIST 679	War and Remembrance	

Contemporary Policy Perspectives

These courses focus on the applied study of security and on concrete, modern-day issues related to the particular challenges of organized violence in the twenty-first century.

Code	Title	Credits
BIOD 609	Biodefense Strategy	
BIOD 709	Nonproliferation and Arms Control	
BIOD 722	Examining Terrorist Groups	
BIOD 725	Terrorism and Weapons of Mass Destruction

Concentration in Women and Gender Studies (WGST)

The concentration in women and gender studies promotes advanced scholarship that transcends traditional boundaries. Students combine required coursework in women and gender studies with courses in a discipline of interest such as history, literature, sociology, anthropology, health, education, philosophy, social work, conflict analysis and resolution, or the arts. The program accommodates both full-time and part-time students.

Of the coursework required for this concentration as described below, at least 24 credits must be in courses related to the study of women and gender and 12 credits in courses in a field focus. All courses related to the study of women and gender must be approved by the head of the concentration in women and gender studies. Students must earn a grade of B- or higher in the core courses.

Students interested in pursuing a dual master's program linking the MAIS degree and a master's degree in another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master's Degree Programs. Students approved to pursue dual master's study linking the MAIS degree with a concentration in women and gender studies and the MA philosophy degree will complete WMST 630 Feminist Theories /PHIL 658 Feminist Theory and 3 additional credits of WMST courses to apply to the philosophy degree as elective credit. Six credits of approved PHIL credits will apply to the MAIS degree as elective credit.

Individualized Concentration (IND)

This concentration is for students who wish to design a graduate program to meet the special needs of their careers and life plans. Students usually choose this option because traditional graduate programs do not meet their specific goals. Students, with help from their faculty advisor, design a unique program of study that includes courses from several academic departments.

Students have access to most graduate courses offered by Mason but must meet all course prerequisites. Each student must submit a curriculum worksheet approved by the student's advisor and director during the first semester enrolled. Any subsequent amendments must have the approval of the student's advisor and the director.

Dual Degree Options

Philosophy, MA and Interdisciplinary Studies, MAIS Dual Degree

Students interested in pursuing a dual master's program linking philosophy and another discipline should discuss their interest with the graduate program directors of both programs and review the university policies regarding Individualized Dual Master's Degree Programs. Students approved to pursue dual master's

study linking the MA philosophy degree and the Interdisciplinary Studies, MAIS with a concentration in women and gender studies will complete WMST 630 Feminist Theories across the Disciplines/PHIL 658 Feminist Theory and 3 additional credits of WMST courses approved by the Department of Philosophy to apply to the philosophy degree as elective credit. Six credits of approved PHIL credits will apply to the MAIS degree as elective credit. Application to the second master's program should be pursued with consultation of the directors of both programs. Admission to the second master's program will require that the student has met the minimum prerequisites for admission to the second program. If a student lacks the minimum prerequisites and seeks to be admitted to a second master's program, the director of the second program may identify ways in which the prerequisite can be completed prior to admission.

Accelerated Master's

Many accelerated master's programs are available for any bachelor's degree at Mason, including the ones below. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Bachelor's Degree (any)/Interdisciplinary Studies, Accelerated MAIS (Computational Social Science Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS/BA in a chosen major and a Master of Arts in Interdisciplinary Studies (MAIS) with a concentration in Computational Social Science in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to thie program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies. For information specific to this program, see Application Requirements and Deadlines (https://mais.gmu.edu/interdisciplinary-studies-accelerated-masters-application-process/) on the departmental website.

The accelerated MAIS with a concentration in Computational Social Science is appropriate for students in a variety of majors. Ideally applicants will have undergraduate backgrounds in both computer science/computational data science and the social sciences or humanities. Applicants pursuing an undergraduate degree in computer science/computational data science should have completed at least one upper-division course in communications, conflict analysis and resolution, criminology, economics, geography, government, history, psychology, or sociology. Applicants pursuing undergraduate degrees in these or other majors should have completed at least one upper-division computer science or computational data science course.Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and an overall minimum GPA of 3.50.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MAIS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.50
- Minimum grade of B in all advanced standing coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

- CSS 600 Introduction to Computational Social Science (3 credits)
- CSS 605 Object-Oriented Modeling in Social Science (3 credits)
- CSS 610 Agent-based Modeling and Simulation (3 credits)
- CSS 620 Origins of Social Complexity (3 credits)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

- CSS 600 Introduction to Computational Social Science (3 credits)
- CSS 605 Object-Oriented Modeling in Social Science (3 credits)
- CSS 610 Agent-based Modeling and Simulation (3 credits)
- CSS 620 Origins of Social Complexity (3 credits)
- CSS 625 Complexity Theory in the Social Sciences (3 credits)
- CSS 645 Spatial Agent-Based Models of Human-Environment Interactions (3 credits)
- CSS 692 Social Network Analysis (3 credits)
- MAIS 696 MAIS ProSeminar

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Bachelor's Degree (any)/Interdisciplinary Studies, Accelerated MAIS (Energy and Sustainability Concentration)

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and a Master of Arts in Interdisciplinary Studies (MAIS) with a concentration in energy and sustainability in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://mais.gmu.edu/interdisciplinary-studies-accelerated-masters-application-process/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, with a minimum overall GPA of 3.50.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MAIS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

Minimum overall GPA of 3.50

Minimum grade of B in each advanced standing course

Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

ECON 695 Special Topics in Economics (3 credits) (when the topic involves environmental or sustainability issues)
EVPP 533 Energy Policy (3 credits)
EVPP 642 Environmental Policy (3 credits)
GGS 507 Geographic Approaches for Sustainable Development (3 credits)
GLOA 605 Interdisciplinary Research Methods (3 credits)
PHIL 643 Environmental Ethics (3 credits)
PHYS 581 Topics in Renewable Energy (3 credits)

Reserve Graduate credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

ECON 695 Special Topics in Economics (3 credits)

EVPP 533 Energy Policy (3 credits)

EVPP 642 Environmental Policy (3 credits)

GGS 507 Geographic Approaches for Sustainable Development (3 credits)

GLOA 605 Interdisciplinary Research Methods (3 credits)

MAIS 696 MAIS ProSeminar

PHIL 643 Environmental Ethics (3 credits)

PHYS 581 Topics in Renewable Energy (3 credits)

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Bachelor's Degree (any)/Interdisciplinary Studies, Accelerated MAIS (Religious Studies Concentration)

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and a Master of Arts in Interdisciplinary Studies (MAIS) with a concentration in Religious Studies in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

If the students has not majored in religious studies it is preferred, thought not required, that the student have a minor in religious studies.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://mais.gmu.edu/interdisciplinary-studies-accelerated-masters-application-process/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, with a minimum overall GPA of 3.50.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MAIS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.50
- Minimum grade of B in each advanced standing course
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

- RELI 600 Interdisciplinary Pathways in the Study of Religion (3 credits)
- RELI 630 Theories and Methods in the Study of Religion (3 credits)
- RELI 632 Interreligious Dialogue (3 credits)
- RELI 633 Issues in Religious Ethics (3 credits)
- RELI 640 Religion and Law (3 credits)
- RELI 591 Special Topics in Religious Studies (3 credits)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

- RELI 600 Interdisciplinary Pathways in the Study of Religion (3 credits)
- RELI 630 Theories and Methods in the Study of Religion (3 credits)
- RELI 632 Interreligious Dialogue (3 credits)
- RELI 633 Issues in Religious Ethics (3 credits)
- RELI 640 Religion and Law (3 credits)
- RELI 591 Special Topics in Religious Studies (3 credits)
- MAIS 696 MAIS ProSeminar

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Bachelor's Degree (any)/Interdisciplinary Studies, Accelerated MAIS (Social Entrepreneurship Concentration)

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and a Master of Arts in Interdisciplinary Studies (MAIS) with a concentration in social entrepreneurship in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's Accelerated Master's Degree policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://mais.gmu.edu/interdisciplinary-studies-accelerated-masters-application-process/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with a minimum overall GPA of 3.50.

Students who are accepted in the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admissions Requirements

Students already admitted in the BAM Pathway will be admitted to the MAIS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.50
- Minimum grade of B in all advanced credit courses
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

- INTS 550 Social Innovation In Action (3 credits)
- INTS 535 Leadership in a Changing Environment (3 credits)
- INTS 540 Contemporary Issues in Social Justice Human Rights (3 credits)
- GBUS 540 Analysis of Financial Decisions (3 credits)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

- PUAD 505 Introduction to Management of Nonprofits (3 credits)
- PUAD 540 Public Policy Process (3 credits)
- MAIS 696 MAIS ProSeminar

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Bachelor's Degree (any)/Interdisciplinary Studies, Accelerated MAIS (Social Justice and Human Rights Concentration)

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and a Master of Arts in Interdisciplinary Studies (MAIS) with a concentration in social justice and human rights in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Programs

- Latin American Studies Minor

Latin American Studies Minor

Banner Code: LAS

Academic Advising

Email: las@gmu.edu
Website: las.gmu.edu/programs/la-minor-la-las/requirements/

Latin American studies focuses on the diverse and connected regions, societies, and cultures of Latin America. Students find that combining this minor with a major in another discipline is particularly attractive to employers. Latin American studies enhances a major in Spanish or anthropology for a career in teaching or human rights work; a major in communication for a career in journalism; and a major in business for a career in the U.S. Foreign Service, other government agencies, or international commerce.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
Select one course from the following:		3
HIST 271	Survey of Latin American History (Mason Core)	
HIST 272	Survey of Latin American History (Mason Core)	
GOVT 331	Government and Politics of Latin America	
Total Credits		3

Language Proficiency

Students minoring in Latin American studies must demonstrate reading, speaking, or writing knowledge of Spanish or Portuguese by exam or by achieving a minimum grade of 2.00 in a 300-level course in the language selected. Upper-level Latin American literature or culture courses taught in Spanish or Portuguese may be used to satisfy the electives requirement.

Electives

Code	Title	Credits
Select five electives [1]		15
Total Credits		15

[1] Students may satisfy the electives with any course that contains a significant emphasis on Latin America or the culture, politics, sociology, or history of Latinos living in the United States. Students choose electives from courses offered by at least three different departments in consultation with the program director. Upper-level Latin American literature or culture courses taught in Spanish or Portuguese may be used to satisfy the requirement.

Middle East and Islamic Studies Progam

Email: meis@gmu.edu
Website: meis.gmu.edu

The interdisciplinary program in Middle East and Islamic Studies offers a distinctive and innovative approach to the study of the Middle East, of Islam, and of Muslim societies across the globe. The program seeks to situate the study of the Middle East and Islam within a globalized world. Students develop a broad understanding of the region, its history and its contemporary complexities with respect to society, politics, culture, and economy.

The Middle East and Islamic Studies Program comprises four distinct curricula; a master's program in Middle East and Islamic studies (MEIS), a graduate certificate program, and two undergraduate minor programs (Middle East studies and Islamic studies). Because these programs are interdisciplinary, undergraduate and graduate students may take courses from a range of disciplines to fulfill minor, graduate degree or certificate requirements. Undergraduate students should consult the specific listing, Middle East Studies minor or Islamic Studies minor for more details. Graduate students should consult with the MEIS director.

Undergraduate Program

Minors

The Middle East and Islamic Studies Program offers two minors for undergraduates.

The Middle East Studies minor provides students with a firm grounding in the history, politics, and culture of this important region. Students develop an understanding of the diverse dynamics and complex forces that shape modern Middle East realities.

The Islamic Studies minor introduces students to the diverse and dynamic experience of Muslims globally and locally. Through interdisciplinary course offerings, students acquire an understanding of Islamic religious traditions, history, politics, society and culture. A three-credit course is also required in a language spoken in a Muslim majority country (Arabic, Persian, Turkish).

Graduate Program

Master's Degree

The program offers a master's degree in Middle East and Islamic studies. Students study historical and contemporary topics - as well as theory and methodology - from regional and global perspectives. The unique interdisciplinary nature of the program provides students with a thorough foundation in the major debates and issues in the study of the Middle East, of Islam, and of Muslim societies across the globe.

Graduate Certificate

The graduate certificate in Middle East and Islamic studies allows students to examine the complex issues involved in understanding the

Middle East and the broader Islamic world from a variety of perspectives. Students study both contemporary and historical developments in these regions; they take courses in various disciplines, including political science, history, and religious studies, and have the opportunity to take elective courses in an even broader set of disciplines, including sociology, anthropology, literature, and art history.

Bachelor's/Accelerated Master's Program

Highly qualified undergraduates in any major may apply to the accelerated master's degree program in Middle East and Islamic studies. If accepted, students will be able to earn an undergraduate degree in their chosen major and a graduate degree in Middle East and Islamic studies after satisfactory completion of 138 credits, generally within five years. Credit limits and course requirements require advanced planning and consultation with the student's undergraduate advisor and MEIS director.

Ali Vural Ak Center for Global Islamic Studies

web: islamicstudiescenter.gmu.edu (http://islamicstudiescenter.gmu.edu/)

The Ali Vural Ak Center for Global Islamic Studies is an interdisciplinary research center whose goal is to provide a sound and nuanced understanding of Muslim societies and the Islamic faith, its role in world history and patterns of globalization. The center regularly sponsors lectures and conferences, runs major research projects and hosts international scholars. The center supports the academic curriculum through its on-campus and off-campus activities.

Middle East Studies

web: meis.gmu.edu (http://meis.gmu.edu/)

The interdisciplinary Middle East Studies program at George Mason provides students with a firm grounding in the history, politics, and culture of this important region. Under the guidance of internationally recognized faculty, students develop an understanding of the diverse dynamics and complex forces that shape modern Middle East realities. Students have the opportunity to examine new Middle East diasporas and transnational communities in the West, as well as the role of the Middle East in a changing geopolitical environment marked by the rise of China, India and the re-emergence of Russia.

Islamic Studies Minor

Banner Code: ISLM

Academic Advising

3200 Horizon Hall
Fairfax Campus

Email: mes@gmu.edu
Website: meis.gmu.edu/programs/la-minor-la-islm

This minor is designed for students interested in the societies, cultures, history, and politics of the Islamic world. It offers students the opportunity to study the many societies that have significant Muslim populations. These societies are not just in the Middle East. They stretch from North Africa to Southeast Asia and beyond, including Europe as well as North America. To fulfill the requirements for the minor, students take a wide variety of courses from a range of departments. These courses provide students with a broad and well-rounded understanding of Islam.

The minor will enhance students' opportunities for future study and employment, especially in the Washington, D.C. area.

Banner Code: LA-MA-MEIS

Academic Advising

6300 Horizon Hall
Fairfax Campus

Email: meis@gmu.edu
Website: meis.gmu.edu/programs/la-ma-meis

The Master of Arts in Middle East and Islamic Studies introduces students to the major methodological and theoretical issues and debates in the study of the Islamic tradition and of Middle Eastern societies. The program situates the study of the Middle East and Islam within a globalized world. The curriculum covers topics of recent scholarly significance including political Islam, the political economy of business-government networks, the relationship between "resource wars" and the "war on terrorism," new diasporas and transnational Muslim communities in the “West,” and the changed geopolitical environments of Muslim and Middle Eastern countries. The degree prepares students for a variety of post-graduate opportunities in academia, government, and an expanding job market for people with this expertise.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For specific information, see Application Requirements and Deadlines (https://meis.gmu.edu/programs/la-ma-meis/application/) on the departmental website.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Core Courses

Code	Title	Credits

Total Credits		15

Language Proficiency

Prior to graduating, students must demonstrate professional competency in one of five major languages of the Middle East and Muslim world: Arabic, Persian, Turkish, Hebrew, or Urdu.

A waiver for this requirement may be received either through 1) documentation verifying primary language of instruction at either the high school or university level in respective foreign language; transcripts showing coursework at the advanced level in respective foreign language or 2) an examination with an appropriate faculty/examiner designated by the director in consultation with the program's steering committee.

Electives

In addition to the following list, electives may include special topics courses when relevant, directed readings and research, study abroad courses, internships, and other courses with the approval of the program director. Students who choose to complete a research project or write a thesis take 3 or 6 fewer elective credits.

Code	Title	Credits
Select five electives from the following:		15
ANTH 635	Regional Ethnography (when topic is Middle East and North Africa)

RELI 645	Muslim Comparative Theologies: Sunni-Shi`i Religious Thought
RELI 646	Islam and Human Rights
RELI 660	Islamic Biomedical Ethics
Total Credits	15

Optional Research Project or Thesis

Research Project

Students choosing to complete a research project take one of the following courses, and one less elective.

Code	Title	Credits
Select one from the following:		3
GOVT 798	Political Science Research Project	
HIST 798	Directed Research and Writing in History	
SOCI 696	Independent Study	
ANTH 796	Master's Research Project	
MEIS 798	Research Project in Middle East and Islamic Studies	
Total Credits		3

Thesis

Students who choose to write a thesis should be aware of the policies governing theses as stated in AP.6.9.3 Master's Thesis. They must follow the thesis enrollment policy of the university and once enrolled in MEIS 799 Thesis Research and Writing in Middle East and Islamic Studies, maintain continuous enrollment.

Students choosing to complete a thesis take 6 fewer credits of electives.

Code	Title	Credits
Six credits of		6
MEIS 799	Thesis Research and Writing in Middle East and Islamic Studies	
Total Credits		6

Accelerated Master's

Bachelor's Degree (any)/Middle East and Islamic Studies, Accelerated MA

Overview

Highly qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA/BS in a chosen major and an MA in Middle East and Islamic Studies in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Polices and Bachelor's/Accelerated Master's Degree policies. For information specific to this accelerated program, see Application Requirements and Deadlines (http://meis.gmu.edu/programs/la-ma-acel-meis/) on the departmental website.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits and with a minimum overall GPA of 3.50.

Students who are accepted in the BAM Pathway will be allowed to register for graduate courses after successful completion of a minimum of 75 undergraduate credits.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MA program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Minimum overall GPA of 3.50
- Completion of at least one core course in the MA in Middle East and Islamic Studies with a minimum grade of B
- Minimum grade of B in each advanced standing course
- Successfully met Mason's requirements for undergraduate degree conferral (graduation) and completed the application for graduation

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing courses (up to 12 credits with a minimum grade of B in each)

MEIS 500 Critical Issues and Debates in Middle East and Islamic Studies (3 credits)
HIST 575 Approaches to Middle East and Islamic History (3 credits)
RELI 644 Islamic Texts and Contexts (3 credits)
GOVT 632 Politics and Societies of the Middle East (3 credits)
ANTH 650 Methods in Anthropology (3 credits)
GLOA 605 Interdisciplinary Research Methods (3 credits)
GOVT 500 The Scientific Method and Research Design (3 credits)
HIST 610 The Study and Writing of History (3 credits)
SOCI 620 Methods and Logic of Social Inquiry (3 credits)
RELI 630 Theories and Methods in the Study of Religion (3 credits)

Reserve Graduate Credit courses (up to 6 credits) taken while an undergraduate and will only count for the graduate degree program

ANTH 635 Regional Ethnography (3 credits) (when topic is Middle East and North Africa)
ARTH 599 Special Topics in Art History (1-6 credits) (when topic is Middle Eastern or Islamic art)
ARTH 699 Topics in Art History (3 credits) (when topic is Middle East or Islamic art)
CONF 653 World Religions, Diplomacy, and Conflict Resolution (3 credits)
ENGH 591 Topics in Folklore Studies (3 credits)
ENGH 665 Seminar in Global Culture (3 credits) (when topic is Middle East or Muslim world)
FREN 553 Topics in North African Francophone Literature and Culture (3 credits)
FRLN 550 Special Topics (3 credits) (when topic is a language of the Middle East or Muslim world)
FRLN 551 Special Topics (3 credits) (when topic is a language of the Middle East or Muslim world)
GGS 533 Issues in Regional Geography (1-6 credits) (when topic is Middle East)
HIST 535 Problems in Comparative World History (3 credits)
HIST 585 Problems in Middle Eastern History (3 credits)
MEIS 599 Issues in Middle East and Islamic Studies (3 credits)
RELI 591 Special Topics in Religious Studies (3 credits) (when topic is Islam or Muslim communities)
RELI 645 Muslim Comparative Theologies: Sunni-Shi`i Religious Thought (3 credits)
RELI 646 Islam and Human Rights (3 credits)
RELI 660 Islamic Biomedical Ethics (3 credits)

For more detailed information on coursework and timeline requirements see AP.6.7 Bachelor's Accelerated Master's Degree policies.

Middle East Studies Minor

Banner Code: MES

Academic Advising

347 Research Hall
Fairfax Campus

Email: mes@gmu.edu
Website: meis.gmu.edu/programs/la-minor-la-mes

Today, more than ever before, Middle East politics have become intertwined with American politics and the lives of many Americans. This minor is designed to equip undergraduates with a firm multidisciplinary grounding in the region, its history, and its international relations.

Faculty

Amireh, Bakhash, Bryant, Dakake, Gopin, Haddad (director), Hamdani, Katz, Lukacs, Mandaville, Paczynska, Rouhana, Salawdeh

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

In partial fulfillment of coursework for the minor, students are strongly encouraged to participate in a study abroad program in the Middle East.

Core Courses

Code	Title	Credits
HIST 282	Survey of Middle Eastern Civilization (Mason Core)	3
GOVT 332	Government and Politics of the Middle East and North Africa	3
Total Credits		6

Electives

Code	Title	Credits
Select four electives from the following: [1]		12
ARAB 325	Major Arab Writers/Stories (Mason Core)	
ARAB 330	Reading and Conversation I	
ARAB 331	Reading and Conversation II	
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western (if region studied is relevant to Middle East studies)	
ARTH 319	Art and Archaeology of the Ancient Near East (Mason Core)	
ARTH 320	Art of the Islamic World (Mason Core)	
CONF 340	Global Conflict Analysis and Resolution (Mason Core)	
ENGH 362	Global Voices (Mason Core) (if literatures studied are relevant to Middle East studies)	
GGS 325	Geography of North Africa and the Middle East	
GOVT 328	Global Political Theory	
GOVT 345	Islam and Politics	
GOVT 445	Human Rights	
HIST 281	Survey of Middle Eastern Civilization (Mason Core)	

HIST 387	Topics in Global History (Mason Core) (if region studied is relevant to Middle East studies)
HIST 460	Modern Iran (Mason Core)
HIST 461	Arab-Israeli Conflict
HIST 462	Women in Islamic Society (Mason Core)
HIST 465	The Middle East in the 20th Century
RELI 211	Religions of the West (Mason Core)
RELI 272	Islam
RELI 374	Islamic Thought (Mason Core)
RELI 375	Qur'an and Hadith
Total Credits	12

[1] One course in a relevant language may be used as an elective. Other courses including ANTH 399 Issues in Anthropology or CONF 399 Special Topics in Conflict Analysis and Resolution, when topic is relevant to the Middle East, may be used as electives with the prior written approval of the director.

Russian and Eurasian Studies Program

Phone: 703-993-1233
Website: russianstudies.gmu.edu

The Russian and Eurasian Studies program brings together experienced Mason faculty who will guide your exploration of this region's culture, gender, class, ethnicity, economy, government, and politics. All majors have the opportunity to study abroad in Moscow or St. Petersburg. They acquire the language skills needed to function successfully in social settings and a variety of careers.

The bachelor of arts degree in Russian and Eurasian studies allows students to choose a concentration in one of three areas:

- Russian language and culture
- Russia studies
- Eurasia studies

Faculty

Program Faculty

Barnes (History and Art History, director), Bockman (Global Affairs), Boettke (Economics), Guglielmi (Modern and Classical Languages), Katz (Schar School of Policy and Government), Kelly (History and Art History), Korostelina (Jimmy and Rosalynn Carter School for Peace and Conflict Resolution), McGlinchey (Schar School of Policy and Government)

Programs

- Russian and Eurasian Studies, BA

Russian and Eurasian Studies, BA

Banner Code: LA-BA-REST

Website: russianstudies.gmu.edu/programs/LA-BA-REST

Russian and Eurasian studies majors study the Russian language, spoken worldwide by some 250 million people, while also acquiring a foundational knowledge of the history, culture, literature, politics, sociology, economics, and geography of the region. This degree program is flexible, enabling students to focus their interests in one of three concentrations: Russia studies, Russian language and culture, and Eurasia studies. Russian and Eurasian studies prepares students for a wide range of career options in the private sector, government, and education. All students have opportunities for research, global-engagement, public service, and career preparation.

Admissions & Policies

Policies

Students pursuing this degree must complete 33 credits in one of the concentrations available with a minimum GPA of 2.00.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students pursuing this degree complete the requirements for one of the available concentrations.

Concentrations in the Major

Available Concentrations

- Concentration in Eurasia Studies (EURS)
- Concentration in Russia Studies (RUSS)
- Concentration in Russian Language and Culture (RULC)

Concentration in Eurasia Studies (EURS)

The Eurasia studies concentration is designed to provide students with interdisciplinary training in the study of Eurasia, with special focus on Central Asia and secondarily on Russia/the Soviet Union and Eastern Europe. Students will develop a high degree of competence in the history, politics, and culture of Eurasia and a basic competence in a relevant language.

Russian or Other Eurasian-Related Language

Code	Title	Credits
Select two courses of Russian or other Eurasian-related language		6
Total Credits		6

Courses used to meet this requirement may be in the same language that is used to meet the college language requirement, in which case the student needs to complete 6 credits beyond intermediate proficiency (beyond courses numbered 210 at Mason). With the approval of the director, courses used to meet this requirement may be in a Eurasian-

related language that was not used to meet the college language requirement at a level approved by the director.

Social Science Courses at the 300- and 400-Level

Code	Title	Credits
Select two social science courses at the 300- and 400-level		6
Total Credits		6

Courses used to fulfill this requirement must focus primarily on Central Asia and Eurasia and may be in any social science discipline (ANTH, ECON, GGS, GOVT, SOCI).

History Courses at the 300- and 400-Level

Code	Title	Credits
Select two history courses at the 300- and 400-level		6
Total Credits		6

Courses used to fulfill this requirement must focus primarily on Central Asia and Eurasia.

Literature or Film Courses at the 300- and 400-Level

Code	Title	Credits
Select two literature or film courses at the 300- and 400-level		6
Total Credits		6

Courses used to fulfill this requirement must be related to Eurasia.

Courses at the 300- and 400-Level

Students choose from courses that focus predominantly on Eurasia. The courses used to meet this requirement may be in any field of study including special topics courses and other courses that deal primarily with the geographic areas covered in the Russian and Eurasian studies major. To use a special topics course or other course with variable content to meet this requirement, students should seek the advanced written approval of the director. (Special topics courses may be repeated for credit when the topic is different.) The following courses when the topic is relevant, among others, may be used to meet this requirement.

Code	Title	Credits
Select three courses at the 300- and 400-level from the following:		9
ARTH 386	The Silk Road (Mason Core)	
HIST 328	Rise of Russia (Mason Core)	
HIST 329	Modern Russia and the Soviet Union (Mason Core)	
HIST 387	Topics in Global History (Mason Core)	
HIST 388	Topics in European History	
HIST 460	Modern Iran (Mason Core)	
HIST 462	Women in Islamic Society (Mason Core)	
HIST 499	RS: Senior Seminar in History (Mason Core)	
GOVT 338	Government and Politics of Russia	
GOVT 340	Central Asian Politics	
GOVT 345	Islam and Politics	
GOVT 444	Issues in International Studies	
GOVT 447	Revolution and International Politics	
RUSS 470	Topics in (Post) Soviet Film	
GGS 330	Geography of the Soviet Succession States	
ECON 380	Economies in Transition (Mason Core)	
Any 300- or 400-level CONF course		
Total Credits		9

Concentration in Russia Studies (RUSS)

The Russia studies concentration is designed to provide students with in-depth interdisciplinary training in Russia and the Soviet Union. Students will develop a high degree of competence in Russian history, politics, society, and culture as well as a basic competence in the Russian language and the broader Eurasian context.

Required Language Courses

Other relevant advanced language courses may be used to fulfill this requirement with the prior written approval of the director. Majors are encouraged to take additional advanced Russian language courses.

Code	Title	Credits
RUSS 202	Intermediate Russian II	3
RUSS 380	Advanced Russian I	3
Total Credits		6

Russian or Soviet History

When the topic is relevant, HIST 300 Introduction to Historical Method (Mason Core), HIST 388 Topics in European History, or HIST 499 RS: Senior Seminar in History (Mason Core) may be used to fulfill this requirement with the prior written approval of the director.

Code	Title	Credits
Select two courses from the following:		6
HIST 326	Stalinism	
HIST 327	The Soviet Union and Russia Since World War II	
HIST 328	Rise of Russia (Mason Core)	
HIST 329	Modern Russia and the Soviet Union (Mason Core)	
HIST 426	The Russian Revolution	
Total Credits		6

Social Sciences Dealing Primarily with Russia

Any topically appropriate courses in any social science discipline (ANTH, ECON, GGS, GOVT, SOCI) may be used to fulfill this requirement with the prior written approval of the director.

Code	Title	Credits
Select two courses from the following:		6
GOVT 338	Government and Politics of Russia	
GGS 330	Geography of the Soviet Succession States	
ECON 380	Economies in Transition (Mason Core)	
Total Credits		6

Russian Literature or Culture

Other relevant courses may be used to fulfill this requirement with the prior written approval of the director.

Code	Title	Credits
Select two courses from the following:		6
RUSS 310	Readings in Russian Literature	
RUSS 311	Contemporary Russian Short Fiction	

RUSS 325	Major Russian Writers (Mason Core)	
RUSS 326	A Survey of Russian Literature (Mason Core)	
RUSS 327	A Survey of Russian Literature (Mason Core)	
RUSS 353	Russian Civilization (Mason Core)	
RUSS 354	Contemporary Post-Soviet Life (Mason Core)	
Total Credits		6

Courses at the 300 and 400 Level

Students choose from courses that focus predominantly on Eastern Europe, Russia, or Central Asia. Courses used to meet this requirement may be in any field of study including special topics courses and other courses that deal primarily with the geographic areas covered in the Russian and Eurasian studies major. To use a special topics course or other course with variable content to meet this requirement, students should seek the advanced written approval of the director. (Special topics courses may be repeated for credit when the topic is different.) Examples of courses that may meet this requirement:

Code	Title	Credits
Select three courses from the following:		9
RUSS 302	Russian Conversation and Composition	
RUSS 303	Russian Advanced Conversation	
RUSS 310	Readings in Russian Literature	
RUSS 311	Contemporary Russian Short Fiction	
RUSS 325	Major Russian Writers (Mason Core)	
RUSS 326	A Survey of Russian Literature (Mason Core)	
RUSS 327	A Survey of Russian Literature (Mason Core)	
RUSS 353	Russian Civilization (Mason Core)	
RUSS 354	Contemporary Post-Soviet Life (Mason Core)	
RUSS 381	Advanced Russian II	
RUSS 401	Readings in the Social Sciences	
RUSS 407	Russian Drama and Theater	
RUSS 410	Russian Poetry	
RUSS 470	Topics in (Post) Soviet Film	
RUSS 480	Fourth-Year Russian	
RUSS 481	Fourth-Year Russian	
HIST 300	Introduction to Historical Method (Mason Core)	
HIST 312	Nationalism in Eastern Europe	
HIST 328	Rise of Russia (Mason Core)	
HIST 329	Modern Russia and the Soviet Union (Mason Core)	
HIST 387	Topics in Global History (Mason Core)	
HIST 388	Topics in European History	
HIST 426	The Russian Revolution	
HIST 499	RS: Senior Seminar in History (Mason Core)	
THR 352	Dramatic Literature Seminar	
ECON 380	Economies in Transition (Mason Core)	
GGS 330	Geography of the Soviet Succession States	
GOVT 338	Government and Politics of Russia	
GOVT 340	Central Asian Politics	
GOVT 444	Issues in International Studies	
GOVT 447	Revolution and International Politics	
Total Credits		9

Concentration in Russian Language and Culture (RULC)

Students in the Russian language and culture concentration develop a high degree of competence in Russian language and culture and a basic familiarity with Russian and Eurasian history and politics.

Required Courses in Advanced Russian

Code	Title	Credits
RUSS 380	Advanced Russian I	3
RUSS 381	Advanced Russian II	3
RUSS 480	Fourth-Year Russian	3
or RUSS 481	Fourth-Year Russian	
Total Credits		9

Russian Culture or History

Code	Title	Credits
RUSS 353	Russian Civilization (Mason Core)	3
or HIST 328	Rise of Russia (Mason Core)	
RUSS 354	Contemporary Post-Soviet Life (Mason Core)	3
or HIST 329	Modern Russia and the Soviet Union (Mason Core)	
Total Credits		6

Russian Literature or Cinema in Translation

Code	Title	Credits
Select two courses from the following:		6
RUSS 325	Major Russian Writers (Mason Core)	
RUSS 326	A Survey of Russian Literature (Mason Core)	
RUSS 327	A Survey of Russian Literature (Mason Core)	
RUSS 470	Topics in (Post) Soviet Film	
Total Credits		6

Courses Taught in Russian

Code	Title	Credits
Select three courses from the following:		9
RUSS 302	Russian Conversation and Composition	
RUSS 303	Russian Advanced Conversation	
RUSS 310	Readings in Russian Literature	
RUSS 311	Contemporary Russian Short Fiction	
RUSS 401	Readings in the Social Sciences	
RUSS 410	Russian Poetry	
RUSS 481	Fourth-Year Russian	
Total Credits		9

Social Sciences

Students choose from courses dealing with Russia. Any other topically appropriate course in a social science discipline (ANTH, ECON, GGS,

GOVT, SOCI) may be used to fulfill this requirement with the prior written approval of the director.

Code	Title	Credits
Select one course from the following:		3
GOVT 338	Government and Politics of Russia	
ECON 380	Economies in Transition (Mason Core)	
GGS 330	Geography of the Soviet Succession States	
Total Credits		3

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students majoring in Russian and Eurasian studies may fulfill this requirement by successfully completing RUSS 302 Russian Conversation and Composition, RUSS 325 Major Russian Writers (Mason Core), or RUSS 407 Russian Drama and Theater.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3

RUSS 353	Russian Civilization (Mason Core)	3
RUSS 354	Contemporary Post-Soviet Life (Mason Core)	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in Russian and Eurasian Studies Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

School of Integrative Studies

Phone: 703-993-1436
Website: integrative.gmu.edu

About the School

The School of Integrative Studies (SIS) offers a distinctive experience that addresses contemporary social, global, and environmental challenges. Students connect academic interests with hands-on learning to prepare for a life and career with meaning and impact. Based in the College of Humanities and Social Sciences, SIS focuses on critical and creative thinking, engaged scholarship and diversity in thought. Graduates will lead the way as a new brand of professionals whose understanding of the liberal arts and commitment to a just world can build the cross-sector approaches necessary to solve pressing global, social, and environmental problems.

An integrative, interdisciplinary learning environment, SIS offers the benefits of small, discussion-based courses while providing access to the academic resources of a large public research university. Drawing on its award-winning faculty, SIS provides students with transformative experiential learning opportunities including internships, field and international study, and independent research and service. Both the structure and curriculum of SIS prepare graduates who are engaged, well-rounded scholars who consistently assume leadership roles in the fields

of business, law, government, healthcare, education, and the non-profit sector, among others.

Undergraduate Programs

The School of Integrative Studies offers a bachelor of arts and a bachelor of science degree in integrative studies, and a bachelor of arts in environmental and sustainability studies (joint degree with Environmental Science and Policy in the College of Science). The school also houses the Bachelor of Individualized Study Program.

The integrative studies curriculum is based on intensive, interdisciplinary learning communities, coordinated with traditional academic programs. The result is an integrated program of study that emphasizes collaboration, experiential learning, and self-reflection. All students complete their degree programs with an interdisciplinary concentration.

The environmental and sustainability studies degree provides students with theoretical and practical knowledge of three aspects of environmental and sustainability studies: people, prosperity, and planet. In addition to required core courses, students develop more in-depth knowledge in one of six concentrations. This degree prepares students for employment and graduate study in fields related to social justice, business and public policy, and environmental protection as they relate to the environment and sustainability.

The bachelor of individualized study (BIS) program is a degree completion program for adult learners. BIS offers students transfer credit options and a distinctive educational opportunity to integrate other college-level learning, such as professional or military experience, into university coursework. Students create interdisciplinary concentrations to meet their own educational needs including to advance professionally, to prepare for graduate or professional programs, or to plan a path toward a career change.

Transfer Students

The School of Integrative Studies welcomes transfer students from other four-year institutions or community colleges, as well as from other academic units within Mason. Academic advisors work with students to utilize transfer credits and create a plan for timely completion of the bachelor's degree. All transfer students are required to take INTS 391 Understanding Integrative Studies within their first two semesters and meet with an academic advisor as soon as possible.

Minor Programs

The School of Integrative Studies offers minors in childhood studies, leadership, non-profit studies, social justice and human rights, social innovation, and well-being. All are available to students in any major in the university.

The Sustainability Studies Minor is offered jointly by the Department of Environmental Science and Policy and the School of Integrative Studies.

Centers

The School of Integrative Studies houses Social Action and Integrative Learning (SAIL), which serves all students and faculty in the university.

Childhood Studies Minor

Banner Code: CHDS

Academic Advising

402 Enterprise Hall

Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-minor-nc-chds

The interdisciplinary minor is designed for students who have a child-related focus in their major and for those who want to explore the topic of childhood. This minor focuses on the study of issues concerning children and their representations, including their experiences in society within historical and contemporary cultures and global contexts. The curriculum fosters thinking about childhood theory, research, policy and the practical applications of this knowledge to decisions regarding children and youth. The minor provides enough flexibility for students to choose relevant courses in keeping with their primary interests.

Faculty

Dunne, Garcia-Gomez, Garner (director), Shadur

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 16-17

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Core Courses

Code	Title	Credits
Three to four credits of		3-4
INTS 312	Images and Experiences of Childhood: Social Construct, Literature, and Film [1]	
INTS 316	Introduction to Childhood Studies (Mason Core)	4
Total Credits		7-8

[1] A maximum of 4 credits may be applied to the minor.

Electives

Code	Title	Credits
Select three courses from the following:		9
COMM 367	Children and Media	
CONF 392	Youth and Conflict	
CRIM 302	Delinquency and the Juvenile Justice System	
CRIM 406	Family Law and the Justice System	
ECED 201	Introduction to Early Childhood Education for Diverse Learners	
ECED 405	Introduction to Early Childhood Special Education	
EDSE 469	Individualized Supports and Specialized Care of Students with Severe Disabilities	
EDUC 302	Human Growth and Development	
EDUC 372	Human Development, Learning, and Teaching	
ELED 358	(Mason Core)	
ELED 443	Children, Family, Culture, and Schools, 4-12 Year Olds	
HDFS 301	The Hospitalized Child and Family

Conservation Studies Minor (CHSS)

Banner Code: CNST

Academic Advising

Sharon Spradling, Academic Program Coordinator and Advisor

Email: sspradli@gmu.edu
Website: smconservation.gmu.edu

This minor is designed for undergraduate students who wish to augment their primary academic program with conservation studies taught in an experiential manner. There are three semester-long options by which students can complete the minor including topics such as: "Conservation, Biodiversity and Society", "Wildlife Ecology and Conservation", or "Endangered Species Conservation." These semesters are grounded in natural science and offer a collection of interdisciplinary courses that combine public policy, sociology, conflict resolution, and global awareness with hands-on experience. Students are in residence at the Smithsonian Conservation Biology Institute (https://nationalzoo.si.edu/conservation/) in Front Royal, Virginia, and are taught by Mason faculty, Smithsonian scientists and practitioners.

The minor is available only to students who enroll in any of the Smithsonian Mason Semesters (https://smconservation.gmu.edu/), semester-long residential programs held at the Smithsonian Conservation Biology Institute (https://nationalzoo.si.edu/conservation/) in Front Royal, VA. The semesters are offered jointly by the College of Humanities and Social Sciences and the College of Science under the auspices of the Smithsonian-Mason School of Conservation (http://smconservation.gmu.edu/).

This is a Green Leaf program.

Admissions & Policies

Admissions

The minor is available only to students who enroll in either of the Smithsonian Mason Semesters, semester-long residential programs held at the Smithsonian Conservation Biology Institute in Front Royal, VA.

Policies

Eight credits of coursework must be unique to the minor and students pursuing this minor must complete one of the options with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 16

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Conservation, Biodiversity and Society Option

Environmental and Sustainability Studies, BA (CHSS)

Banner Code: LA-BA-EVSS

402 Enterprise Hall
Fairfax Campus

Website: https://ess.gmu.edu/

The BA in Environmental and Sustainability Studies is a joint program between the College of Humanities and Social Sciences and the College of Science.

This degree provides students with theoretical and practical knowledge of three aspects of environmental and sustainability studies: people, prosperity, and planet. In addition to required core courses, students develop more in-depth knowledge in their choice of concentration. This degree prepares students for employment and graduate study in fields related to social justice, business and public policy, and environmental protection as they relate to the environment and sustainability.

This is a Green Leaf program.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students pursuing this degree must complete a minimum of 60 credits within the major, with a minimum grade of 2.00 in each course.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Of the credits required for this degree, 14 credits simultaneously fulfill core requirements for the major and Mason Core requirements, and, depending on the concentration and electives chosen, up to 9 credits may simultaneously fulfill Mason Core requirements and college BA requirements.

Core Courses in the Major

Code	Title	Credits
Environmental Science and Society		
EVPP 377	Applied Ecology	3
And completion of one of the following sequences:		11-12
EVPP 108 & EVPP 109 & EVPP 112 & EVPP 113 & EVPP 336	Ecosphere - Introduction to Environmental Science I-Lecture (Mason Core) and Ecosphere- Introduction to Environmental Science I- Lab (Mason Core) and Ecosphere: Introduction to Environmental Science II-Lecture (Mason Core) and Ecosphere: Introduction to Environmental Science II–Lab (Mason Core) and Human Dimensions of the Environment	
or		
EVPP 210 & EVPP 301 & EVPP 302	Environmental Biology: Molecules and Cells and Environmental Science: Biological Diversity and Ecosystems and Environmental Science: Biomes and Human Dimensions	
Individual and Group Behavior		
INTS 334	Environmental Justice (Mason Core)	4
Business and Public Policy		
Select one course from the following:		3
ECON 100	Economics for the Citizen (Mason Core)	
ECON 103	Contemporary Microeconomic Principles (Mason Core)	
ECON 105	Environmental Economics for the Citizen (Mason Core)	
EVPP 322	Business and Sustainability	3
EVPP 361	Introduction to Environmental Policy [1]	3
or GOVT 361	Introduction to Environmental Policy	
Statistics		
Select one course from the following:		3-4
SOCI 313	Statistics for the Behavioral Sciences (Mason Core)	
BIOL 214	Biostatistics for Biology Majors	
STAT 250	Introductory Statistics I (Mason Core)	
Integration, Analysis, Innovation		
INTS 210	Sustainable World (Mason Core)	4
EVPP 480	Sustainability in Action (Mason Core)	4
Select one course from the following:		3
INTS 390	International Internship (Mason Core) (minimum of 3 credits required)	
INTS 398	Experiential Learning (minimum of 3 credits required)	
INTS 498	Experiential Learning (minimum of 3 credits required)	
INTS 490	Internship (minimum of 3 credits required)	
EVPP 395	Undergraduate Research in Environmental Science and Policy (minimum of 3 credits required)	
EVPP 494	Internship (minimum of 3 credits required)	
Total Credits		41-43

[1] Satisfies the college BA requirement for social and behavioral science.

Concentration in the Major

Available Concentrations

- Concentration in Business and Sustainability (BUSU)
- Concentration in Climate Change and Society (CCSO)
- Concentration in Conservation and Sustainability (CSUS)
- Concentration in Environmental Policy and Economics (EVPE)
- Concentration in Equity and Environmental Justice (EQEJ)
- Concentration in Sustainable Food and Agriculture (SFG)

Concentration in Business and Sustainability (BUSU)

The requirements for this concentration, depending on the electives chosen, may satisfy the college BA requirement in philosophy and religious studies (PHIL 243 Global Environmental Ethics (Mason Core), PHIL 305 Business Ethics).

Students who have already taken and received credit for MGMT 303 Principles of Management or OM 303 Operations Management shall substitute MGMT 303 Principles of Management for MBUS 301 Managing People and Organizations in a Global Economy and OM 303 Operations Management for MBUS 306 Managing Projects and Operations. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 Survey of Accounting and FNAN 303 Financial Management shall substitute the combination for MBUS 300 Accounting in a Global Economy. All three courses cannot be taken for credit.

Core Courses

Code	Title	Credits
Required Courses		
MBUS 300	Accounting in a Global Economy	3
MBUS 301	Managing People and Organizations in a Global Economy	3
MBUS 306	Managing Projects and Operations	3
Additional Course		
Select one course (3 credits) from the following:		3
GOVT 353	Social Entrepreneurship	
EVPP 434	Food-Energy-Water Nexus	
INTS 375	Special Topics (when topic is relevant with approval)	
INTS 450	Social Innovation in Action	
INTS 475	Special Topics (when topic is relevant with approval)	
MBUS 304	Entrepreneurship: Starting and Managing a New Enterprise	
MGMT 451	Introduction to Entrepreneurship	
EVPP 490	Special Topics in Environmental Science and Policy (when topic is relevant with approval)	

EVPP 505	Selected Topics in Environmental Science (when topic is relevant with approval)	
Total Credits		12

Two Courses

Code	Title	Credits
Select two courses (6 credits) from the following:		6
ECON 335	Environmental Economics	
EVPP 338	Economics of Environmental Policy	
EVPP 362	Intermediate Environmental Policy	
GGS 307	Geographic Approaches for Sustainable Development	
INTS 204	Leadership Theory and Practice	
PHIL 243	Global Environmental Ethics (Mason Core)	
PHIL 305	Business Ethics	
Other course work with advisor approval		
Total Credits		6

Concentration in Climate Change and Society (CCSO)

The requirements for this concentration, depending on the electives chosen, may satisfy the college BA requirement in philosophy and religious studies (PHIL 243 Global Environmental Ethics (Mason Core), PHIL 343 Topics in Environmental Philosophy (Mason Core)).

Required Courses

Code	Title	Credits
CLIM 101	Global Warming: Weather, Climate, and Society (Mason Core)	3-4
or GGS 121	Dynamic Atmosphere and Hydrosphere (Mason Core)	
EVPP 432	Energy Policy	3
EVPP 436	The Human Dimensions of Global Climate Change	3
Total Credits		9-10

Three Courses

Code	Title	Credits
Select three courses (9 credits) from the following:		9
CLIM 102	Introduction to Global Climate Change Science (Mason Core)	
CLIM 314	Severe and Extreme Weather	
CLIM 319	Air Pollution	
EVPP 362	Intermediate Environmental Policy	
EVPP 378	RS: Ecological Sustainability (Mason Core)	
EVPP 434	Food-Energy-Water Nexus	
EVPP 442	Urban Ecosystems and Processes	
EVPP 490	Special Topics in Environmental Science and Policy (when topic is relevant with approval)	
EVPP 505	Selected Topics in Environmental Science (when topic is relevant with approval)	
GGS 302	Global Environmental Hazards	
GGS 304	Population Geography (Mason Core)	
GGS 306	Urban Geography	
GGS 309	Introduction to Weather and Climate	
GGS 312	Physical Climatology	
GGS 314	Severe and Extreme Weather	
INTS 375	Special Topics (when topic is relevant with approval)	
INTS 475	Special Topics (when topic is relevant with approval)	
PHIL 243	Global Environmental Ethics (Mason Core) [1]	
PHIL 343	Topics in Environmental Philosophy (Mason Core) [1]	
Other course work with advisor approval		
Total Credits		9

[1] Satisfies the college BA requirement in philosophy and religious studies.

Concentration in Conservation and Sustainability (CSUS)

Smithsonian-Mason Program

Students complete one of the programs offered through the Smithsonian-Mason School of Conservation in cooperation with the Smithsonian Conservation Biology Institute.

Conservation, Biodiversity and Society Option (16 credits)

Code	Title	Credits
CONS 320	Conservation in Practice	3
CONS 401	Conservation Theory	3
CONS 402	Applied Conservation	4
CONS 410	Human Dimensions in Conservation (Mason Core)	3
CONS 490	RS: Integrated Conservation Strategies (Mason Core)	3
Total Credits		16

Wildlife, Ecology, and Conservation Option (16 credits)

Offered only in Fall semesters, students complete four required courses:

Code	Title	Credits
CONS 400	Conservation Seminar	2
CONS 404	Biodiversity Monitoring	4
CONS 405	Landscape and Macrosystems Ecology	4
CONS 496	Research in Conservation (Mason Core)	6
Total Credits		16

Endangered Species and Conservation Option (16 credits)

Offered only in Spring semesters, students complete four required courses:

Code	Title	Credits
CONS 400	Conservation Seminar	2
CONS 406	Small Population Management	4
CONS 491	RS: Conservation Management Planning (Mason Core)	4
CONS 496	Research in Conservation (Mason Core)	6
Total Credits		16

Three Credits

Code	Title	Credits
Select a minimum of three credits from the following:		3

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as "writing intensive" in their major at the 300 level or above.

Students majoring in environmental and sustainability studies should consult an advisor to learn how to fulfill this requirement.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

College Level Requirements for the BA Degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3

ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	3
ANTH 381	Medical Anthropology	3
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core)	3
ARAB 360	Topics in Arabic Cultural Production	3
ARAB 420	Survey of Arabic Literature	3
ARAB 440	Topics in Arabic Religious Thought and Texts (Mason Core)	3
ARTH 203	Survey of Asian Art (Mason Core)	3
ARTH 204	Survey of Latin American Art (Mason Core)	3
ARTH 206	Survey of African Art (Mason Core)	3
ARTH 318	Art and Archaeology of Ancient Egypt	3
ARTH 319	Art and Archaeology of the Ancient Near East (Mason Core)	3
ARTH 320	Art of the Islamic World (Mason Core)	3
ARTH 382	Arts of India (Mason Core)	3

RUSS 354	Contemporary Post-Soviet Life (Mason Core)	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3

Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in Environmental and Sustainability Studies Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Accelerated Master's

The accelerated master's program below specifies the BA in environmental and sustainability studies as a feeder degree for its program. Many other accelerated master's programs are available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Bachelor's Degree (selected)/ Environmental Science and Policy, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain a Green Leaf-designated bachelor's degree and the Environmental Science and Policy, MS (https://catalog.gmu.edu/colleges-schools/science/environmental-policy/environmental-science-policy-ms/) degrees within an accelerated timeframe. Upon completion of this 141 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate

study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

The GRE exam is not required for this accelerated master's program.

Students should submit three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor (see Graduate Advisor section below) stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated major or minor may apply to this accelerated master's program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) and CHEM 212 General Chemistry II (Mason Core) and three semesters of biology, including a course in ecology, or the equivalent, for example:

Code	Title	Credits
Select one of the following options:		13
Option 1:		
BIOL 213	Cell Structure and Function (Mason Core)	
BIOL 214	Biostatistics for Biology Majors	
BIOL 308	Foundations of Ecology and Evolution	
Option 2:		
EVPP 210	Environmental Biology: Molecules and Cells	
EVPP 301	Environmental Science: Biological Diversity and Ecosystems	
EVPP 302	Environmental Science: Biomes and Human Dimensions	
EVPP 305	Environmental Microbiology Essentials	
EVPP 306	Environmental Microbiology Essentials Laboratory	
Option 3:		
CONS 401	Conservation Theory	
CONS 402	Applied Conservation	
6 credits of BIOL or CONS electives		

Graduate Advisor

By at least the beginning of their senior year, students should seek out a faculty member in the Department of Environmental Science and Policy who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason University (called "program faculty") can serve as master's advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
EVPP 518	Conservation Biology	3
EVPP 529	Environmental Science Communication	3
EVPP 621	Overview of Biodiversity Conservation	3

Human Development and Family Science Minor (CHSS)

Banner Code: HDFS

Academic Advising

Email: HDFS@gmu.edu
Website: hdfs.gmu.edu/human-development-family-science/minor

This highly relevant and contemporary minor is a 15-credit interdisciplinary program designed especially for students who are interested in how individuals develop and how to improve the quality of life for families and communities. You'll explore the psychological, social, cultural, and biological development of individuals from conception through adulthood and aging, within the contexts of their families, communities, and the broader society.

The minor is an excellent complement to many majors at Mason. Due to it being offered as a collaboration between the College of Education and Human Development (CEHD) and the College of Humanities and Social

Sciences (CHSS), you'll have the opportunity to learn from outstanding faculty from both colleges who are dedicated to teaching and involved in cutting-edge research.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 15

Core Course

Code	Title	Credits
HDFS 200	Individual and Family Development (Mason Core)	3
HDFS 400	Advanced Family Processes (Mason Core)	3
Total Credits		6

Electives

Code	Title	Credits
Select at least one course from each of the two component areas (development and diversity) below		6
A third elective may be selected from any component or with permission of an HDFS advisor		3
Total Credits		9

To reflect the interdisciplinary nature of the HDFS minor, two courses must have prefixes from disciplines outside of your major area of study (e.g., for PSYC majors, two courses must come from CEHD prefixes: ATEP, ECED, EDUC, HEAL, PHED; for ECED majors, two courses must come from CHSS prefixes: ANTH, INTS, PSYC, SOCI).

Development

Code	Title	Credits
Select at least one from the following:		
ECED 401	Developmental Pathways of Diverse Learners, Birth-Adolescence	
EDUC 302	Human Growth and Development	
INTS 312	Images and Experiences of Childhood: Social Construct, Literature, and Film	
INTS 316	Introduction to Childhood Studies (Mason Core)	
INTS 319	Contemporary Youth Studies (Mason Core)	
PSYC 211	Developmental Psychology (Mason Core)	
PSYC 313	Child Development	
PSYC 314	Adolescent Development	
PSYC 415	Psychological Factors in Aging	
SOCI 360	Youth Culture and Society (Mason Core)	

Diversity

Code	Title	Credits
Select at least one from the following:		
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	
ATEP 205	Cultural Competence	
ECED 405	Introduction to Early Childhood Special Education	
EDUC 203	Disability in American Culture (Mason Core)	
HEAL 350	Interventions for Populations and Communities at Risk	
HDFS 301	The Hospitalized Child and Family	
INTS 320	Construction of Differences: Race, Class, and Gender (Mason Core)	
INTS 336	Poverty, Wealth and Inequality in the US (Mason Core)	
INTS 362	Social Justice and Human Rights (Mason Core)	
PSYC 379	Applied Cross-Cultural Psychology (Mason Core)	
SOCI 308	Race and Ethnicity in a Changing World (Mason Core)	
SOCI 355	Social Inequality (Mason Core)	

Human Development and Family Science, BA (CHSS)

Academic Advising

Phone: 703-993-5856
Email: HDFS@gmu.edu
Website: hdfs.gmu.edu/

This degree prepares its graduates to use family-centered and strengths-based approaches to support the health and well-being of individuals and families in diverse communities. Graduates will have a strong interdisciplinary foundation in the HDFS field and competencies in 10 areas as established by the National Council on Family Relations, including:

- internal dynamics of relationships and families
- human growth and development
- family-and community-based program planning, implementation, and evaluation
- social policies and laws affecting families
- family diversity
- research methodology
- professional ethics as related to the HDFS field

The HDFS curriculum prepares students to effectively engage with families across the lifespan and in a variety of service settings and professions, from early childhood education and care to family law and policy advocacy.

Our program prepares students to critically analyze complex family issues, advocate for families in schools, communities, and in the policy arena, and address social-structural factors contributing to and influencing family functioning, health, and well-being (e.g., poverty and wealth inequality, immigration and illegalization, family homelessness, incarceration, family violence, and discrimination and structural violence such as racism, nationalism, or heterosexism). Students are required to complete a 6-credit internship and integrate research training with service fieldwork. Such an experience is a critical component of HDFS student development and will further prepare our students for graduate education and diverse careers in the human development and family science field.

The HDFS program is a joint academic degree program sponsored by the College of Education and Human Development (CEHD) and the College of Humanities and Social Sciences (CHSS).

Individualized Study, BIS

Banner Code: LA-BIS-INDV

300 Enterprise Hall
Fairfax Campus

Website: http://integrative.gmu.edu/programs/la-bis-indv

The Bachelor of Individualized Study (BIS) Program in the School of Integrative Studies is an undergraduate degree completion program with a 42-year history of serving adult students. It offers students a distinctive educational opportunity that allows them to integrate previous experiences into university coursework. Recognizing that college-level learning may be acquired through varied professional, military, and personal experience, the BIS program provides mechanisms for translating experiential learning into academic credit. The program combines an interdisciplinary academic framework and a writing-intensive, research-based curriculum to provide students with individualized degree plans.

In this degree program, most students design their own individualized interdisciplinary program of study. Other students who are interested in early childhood education and who meet specific eligibility requirements can pursue a more prescribed curriculum that leads to a concentration in early childhood education studies.

Admissions & Policies

Admissions

Students who are interested in the bachelor of individualized study degree must attend an information session. In addition to applying to Mason through the Office of Admissions, they need to apply separately to the BIS Program. The schedule of BIS information sessions and the BIS application are available on the BIS Program website (http://bis.gmu.edu/).

Eligibility

Adult transfer applicants, age 25 or older may be considered for the BIS only with the following minimum criteria:

1. 12 credits of transferable college coursework as determined by the Office of Admissions
2. Cumulative collegiate grade point average of 2.00+

Admission is directly to BIS with no change to another major without reapplying. The concentration in early childhood education studies is an exception to the age requirement.

Policies

Students pursuing a bachelor of individualized study must meet the baccalaureate degree requirements for all undergraduates: they need to complete 120 credits with 45 credits at or above the 300 level and at least 30 credits at Mason.

BIS students may elect to take a minor in addition to their BIS concentration. 15 credits of the minor must be applied uniquely to the minor and not to the concentration. For students pursuing the concentration in early childhood studies, the minor is required for the degree.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Credit for Nontraditional Modes of Learning

The BIS program allows students to receive college credit for learning acquired through a variety of nontraditional methods indicated below. The maximum allowable credits are indicated for each category.

- Nationally recognized exam programs such as the College Level Examination Program (CLEP) when the particular exam has been approved for Mason credit: See CLEP Examination for an approved list. A maximum of 45 maximum credits can be earned through exams. After matriculation, students are limited to taking and applying credits for the CLEP exam in "Information Systems and Computer Applications". Students with a qualifying score on this exam will be awarded credit for IT 104T. Students receiving credit for IT 104T must still meet the university information technology ethics requirement (see Mason Core section of this catalog). Credit for other CLEP exams awarded after matriculation may not be applied.
- Certain university approved industry, government, or military training credits if such credits are indexed and recommended as college-level credit by the American Council on Education (ACE). To be eligible for Mason credit, training and course specifics must exactly match what is in the ACE guide and be approved for Mason credit. The specific credits must also be approved by the program director and the dean. A maximum of 45 credits can be earned through ACE-approved

training. A maximum of 60 total combined credits can be accepted for exams and ACE-approved training. For example, if 45 credits are accepted by ACE-approved training, a maximum of 15 credits can be accepted for exams. Students may not take these courses for credit once they have matriculated at Mason.

- Experiential learning demonstrated by portfolios subject to approval by the program director and the dean (30 maximum credits).
- College-level credit earned at institutions accredited by Mason-recognized U.S. institutional accrediting agencies subject to approval by the program director and the dean. These credits can only be considered if the institution is listed in *Accredited Institutions of Postsecondary Education* published by ACE (30 maximum credits) and only if they are taken before the student matriculates at Mason.

Students may not pursue credit for options 1, 2, and 4 once they have matriculated at Mason. Although the types of credit noted above may be applied to a bachelor of individualized study degree, if a BIS student changes majors, credit awarded in these ways cannot be used toward other majors. These nontraditional credits are not transferable to other degree programs at Mason.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Students pursuing a bachelor of individualized study degree must complete four required courses and one concentration.

Core Courses in the Major

Students must complete each of the four core courses with a minimum grade of 2.00.

In BIS 390 The Research Process (or BIS 391 The Research Process for Honors for students pursuing honors in the major), students develop a project proposal. An approved proposal from BIS 390 The Research Process or BIS 391 The Research Process for Honors is a prerequisite to enroll in BIS 490 RS: Senior Project (Mason Core).

In BIS 490 RS: Senior Project (Mason Core), students complete a senior capstone project that varies according to the individual program of study. It may be an investigative or creative project, and must be appropriate to the student's interdisciplinary concentration. This course requires significant writing and fulfills the Mason Core synthesis requirement. It is a research intensive course designated RS by OSCAR. The project is evaluated by the BIS 490 RS: Senior Project (Mason Core) instructor in consultation with the student's faculty mentor and others as determined by the BIS director.

BIS 490 RS: Senior Project (Mason Core) is taken when no more than 6 credits remain in the concentration.

Code	Title	Credits
BIS 300	Understanding Interdisciplinary Studies	3
BIS 304	Adult Student Transitions	1
BIS 390	The Research Process	3
or BIS 391	The Research Process for Honors	
BIS 490	RS: Senior Project (Mason Core)	4
Total Credits		11

Concentrations in the Major

Students must complete one concentration of 24-42 credits. Of the credits applied to the concentration, at least 15 credits must be at the 300 level or above and a maximum of 6 credits can have grades of C- or D (grades below 2.00). The total credits applied to the concentration must represent a minimum GPA of 2.00.

Courses applied to a concentration may not also be used to fulfill Mason Core requirements.

Individualized Concentration (IND)

Students may do an individualized concentration to meet their own academic needs and interests. The concentration is developed in close consultation with BIS staff and a faculty mentor. Students may incorporate into their individualized concentrations up to 9 credits of previously earned college course work or previously earned nontraditional credit from other institutions. In addition to the 4 core courses, students complete between 24 and 36 credits, depending on the topic and the student's preparation.

Code	Title	Credits
Select 24 to 36 credits from a minimum of two disciplines		24-36
Total Credits		24-36

Students are also encouraged to include BIS 489 Directed Readings and Research and complete it before taking BIS 490 RS: Senior Project (Mason Core).

Concentration in Early Childhood Education Studies (ECES)

This concentration offers students holding a Northern Virginia Community College associate's degree in applied science in early childhood development the opportunity to obtain a BIS in early childhood education studies and a minor in business or other relevant minor. This concentration does not lead to teacher licensure in early childhood education.

To receive this concentration, students complete a minimum of 34 credits beyond the associate's degree in addition to the four core BIS courses, electives, and Mason Core requirements needed to reach at least 120 credits.

Admission Requirements

Students are eligible for this concentration if they have an associate's degree in applied science in early childhood development. Unlike the individualized concentration, there is no age restriction regarding admission into this BIS concentration.

Interdisciplinary Courses

Code	Title	Credits
Human Growth and Development		
EDUC 302	Human Growth and Development	3
Course Focused on Diverse Young Learners		
ECED 402	Foundations of Language and Literacy for Diverse Prekindergarten and Kindergarten Learners	3

Additional Electives

Any remaining credits may be completed with electives to bring the degree total to 120.

Honors

Honors in the Major

Highly-qualified students may apply to graduate with honors in the major. Students should apply the semester before they intend to enroll in BIS 390 The Research Process. If accepted, students must complete BIS 391 The Research Process for Honors in place of BIS 390 The Research Process, in addition to an individualized section of BIS 490 RS: Senior Project (Mason Core). To graduate with honors in the major, students must complete these two courses with a minimum GPA of 3.50, maintain a minimum cumulative GPA of 3.75, and successfully present their research during the Senior Project presentations (by earning a grade of 2.0 or better in BIS 490 RS: Senior Project (Mason Core))

Accelerated Master's

The accelerated master's programs below specify the individualized study BIS as a feeder degree for their programs. Many other accelerated master's programs are also available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at Mason.

Individualized Study, BIS/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Individualized Study, BIS have the option of obtaining an accelerated Applied Information Technology, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Mason undergraduate students in the BIS Program can apply in the semester in which they will have completed 90 or more credits (including 15 Mason resident credits) applicable toward the BIS. Students must have an overall GPA of at least 3.30 to apply to the program.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form (http://registrar.gmu.edu/forms/).

Accelerated Option Requirements

Students in the accelerated master's option must maintain a minimum 3.30 GPA in the undergraduate segment until they have satisfied all requirements for the BIS degree. On completion and conferral of the undergraduate degree they submit the Bachelor's/Accelerated Master's Transition Form (http://registrar.gmu.edu/forms/) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. Students must complete all credits that satisfy requirements of the BIS program and those of the MSAIT program, with two courses overlapping from the courses necessary to earn the BIS with a concentration IND (individualized), applied information technology emphasis as listed below.

Code	Title	Credits
AIT 524	Database Management Systems	3
AIT 542	Fundamentals of Computing Platforms	3
Total Credits		6

Individualized Study, BIS/ Telecommunications, Accelerated MS

Overview

Highly-qualified students in the Individualized Study, BIS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Individualized Study, BIS program may apply for this option if they have earned 75 undergraduate credits (including 15 Mason resident credits) with an overall GPA of at least 3.00.

Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

Accelerated Option Requirements

Students must complete all requirements for the BIS and MS programs, with 6 credits overlap.

Students select TCOM courses from the list below to meet the requirements of the accelerated program. Six credits of TCOM courses will be applied to meet the requirements of both the BIS and MS TCOM programs. An additional three credits of TCOM courses is required for the BIS Individualized Concentration (IND) with emphasis on telecommunication. Note that accelerated students can only take the courses in the list below if they passed the listed prerequisite course with a B or higher.

BIS Concentration

Total credits: 34-46

Students who are pursuing the Individualized Study, BIS, Individualized concentration (IND) with an emphasis on telecommunications must take:

Code	Title	Credits
Select an additional 500-level TCOM course(s) from the list below		3
BIS 300	Understanding Interdisciplinary Studies	3
BIS 390	The Research Process	3
BIS 490	RS: Senior Project (Mason Core)	4
ECE 301	Digital Electronics	3
IT 341	Data Communications and Network Principles	3
TCOM 500	Modern Telecommunications	3
Select additional courses related to telecommunication [1]		9-21
Total Credits		31-43

[1] Required to reach the necessary number of credits for the BIS Individualized concentration.

Telecommunications Courses

Code	Title	Credits
TCOM 500	Modern Telecommunications	3
TCOM 535	The TCP/IP Suite of Internet Protocols	3
TCOM 608	Optical Communications Systems	3
TCOM 631	Voice Over IP	3

Note:

Accelerated students who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 535 in the Telecommunications, MS core. Other TCOM courses may be approved on a case-by-case basis.

See each course for individual prerequisite requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BIS requirements to have the BIS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Integrative Studies, BA

Banner Code: LA-BA-INTS

Academic Advising

402 Enterprise Hall

Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-ba-ints

The Bachelor of Arts in Integrative Studies brings together research, theory and practice across numerous disciplines. Integrative studies majors select a multidisciplinary concentration or work with student services staff to develop their own concentration, uniquely suited to their academic and career goals. Integrative studies majors explore new topics and experiences while gaining the knowledge and skills needed to enter the workforce. Required coursework is offered in small classes with ample room for discussion, collaborative learning, and experiential learning, including in-community projects, volunteer opportunities, field work, internships and work with faculty on research that directly engages current social and global challenges.

Admissions & Policies

Policies

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. Integrative studies students may fulfill lower level Mason Core requirements through approved integrative studies (INTS) coursework. Students pursuing a BA in integrative studies must complete a minimum of 30 credits of (INTS) coursework, with at least 15 credits at the 300 and 400 levels. These 30 INTS credits fulfill the writing intensive and synthesis Mason Core requirements.

Students must complete ENGH 302 Advanced Composition (Mason Core). A maximum of 15 credits of INTS 299 Study Abroad or INTS 399 Study Abroad can be applied to the major. Students must have a minimum GPA of 2.00 in courses applied to the major. Before registering, students should see an advisor to help plan their degree program to meet Mason requirements. The advisor also can help students choose electives or a minor.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Integrative studies students complete INTS 391 Understanding Integrative Studies and choose a concentration from the options below. Before registering, students should see an advisor to help plan their

degree program to meet Mason requirements. The advisor also can help students choose electives or a minor.

Required Course

Code	Title	Credits
INTS 391	Understanding Integrative Studies	3

Concentration in the Major

A concentration is the equivalent of a major in a traditional degree program. Students choose from an established multidisciplinary concentration below or create with faculty an individualized program of study to fit their interests and needs. Concentration coursework combines integrative studies (INTS) classes with coursework from other Mason units (departments, schools, and colleges). While fulfilling the concentration requirements, students are also responsible for completing a minimum of 30 credits of INTS coursework. Any INTS courses required for the concentration will apply. Students must present a minimum GPA of 2.00 in courses applied to the concentration.

Available Concentrations

- Childhood Studies (CHDS)
- International Studies (INST)
- Leadership and Organizational Development (LODV)
- Legal Studies (LGLS)
- Education Studies (ESTU)
- Social Innovation (SINN)
- Social Justice and Human Rights (SJHR)
- Social Science for Education (SSED)
- Women and Gender Studies Concentration (WGST)
- Individualized Concentration (IND)

Concentration in Childhood Studies (CHDS)

Students complete the following coursework:

Seven Required Courses (minimum of 22 credits)

Code	Title	Credits
INTS 312	Images and Experiences of Childhood: Social Construct, Literature, and Film	3-6
INTS 316	Introduction to Childhood Studies (Mason Core)	4
INTS 317	Issues in Family Relationships (Mason Core)	3-4
or INTS 321	Parent-Child Relations (Mason Core)	
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
PSYC 211	Developmental Psychology (Mason Core)	3

Concentration in Education Studies (ESTU)

Examines the foundations of formal education, the nature of learning, and contemporary issues & opportunities in education. This concentration prepares students for:

- *post-baccalaureate or graduate teacher licensure programs (including accelerated master's programs)*
- *graduate studies in fields such as higher education, educational psychology, school psychology, guidance counseling*
- *careers in educational policy & funding*
- *nonprofit leadership (museums, child-care centers, environmental centers, recreational centers, Boys & Girls Club)*

Core Courses

Code	Title	Credits
Choose two courses from the following:		6-7
INTS 322	Teacher: A Historical Perspective	
INTS 336	Poverty, Wealth and Inequality in the US (Mason Core)	
INTS 436	Social Justice Education (Mason Core)	
SOCI 382	Education in Contemporary Society	
Total Credits		6-7

Emphasis

Students complete one of the following emphases (pre-licensure or non-licensure).

Pre-Licensure Emphasis

Code	Title	Credits
9 credits of ENGH, including ENGH 101 or ENGH 302 and one literature course		9
3 credits of oral communication		3
9 credits of natural science (must include a lab science and coursework from at least two scientific disciplines)		9
9 credits of mathematics or statistics (only 3 credits of statistics or probability can be accepted)		9
3 credits of ECON coursework		3
3 credits of U.S. history		3
3 credits of any GGS course		3
3 credits of American government (GOVT 103 or 304)		3
3 credits of HIST 100 or HIST 125		3
3 credits of ARTH, AVT, MUSI, or THR coursework		3
3 credits of PHIL, RELI, or FRLN coursework		3
Minimum of 9 credits of EDCI, ECED, EDUC, EDLE, EDSE, EDRD, EDIT, EDEP, EDPO, or ELED coursework		9
Total Credits		60

Non-Licensure Emphasis

Code	Title	Credits
Complete 24 credits chosen from the following:		24
DSGN 101	Introduction to Design Thinking	
EDIT 401	Introduction to Learning Technologies	
EDLE 412	Schools and the Law

Total Credits	33-41

1 Various special topics courses with the approval of the undergraduate advisor.

2 Six credits of WMST 600 Special Topics, WMST 610 Feminist Approaches to Social Research, WMST 630 Feminist Theories , or WMST 640 Transnational Issues of Gender and Race may apply to elective requirement for students accepted into the accelerated master's degree in interdisciplinary studies (MAIS) with a concentration in women and gender studes.

Individualized Concentration (IND)

Code	Title	Credits
With approval of the executive director, students may construct an individualized concentration.		30
Total Credits		30

Additional Electives

Any remaining credits may be completed with electives to bring the degree total to 120.

4-Year Plan

Bachelor of Arts in Integrative Studies Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Accelerated Master's

The accelerated master's program below specifies the BA in integrative studies as a feeder degree for its program. Many other accelerated master's programs are also available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Integrative Studies, BA (Social Science for Education Concentration)/Curriculum and Instruction, Accelerated MEd (Secondary Education History and Social Science Concentration)

Overview

Highly-qualified Mason undergraduates may be admitted to the bachelor's/accelerated master's option and obtain a BA in Integrative Studies (concentration in social science for education) and an MEd in Curriculum and Instruction (Secondary Education History and Social Science concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/)in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered jointly by the School of Integrative Studies and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 567	Teaching Social Studies in the Secondary School	3
SEED 667	Advanced Methods of Teaching Social Sciences in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Integrative Studies, BS

Banner Code: LA-BS-INTS

Academic Advising

402 Enterprise Hall
Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-bs-ints

The Bachelor of Science in Integrative Studies brings together research, theory and practice across numerous disciplines. Integrative studies majors select a multidisciplinary concentration or work with student services staff to develop their own concentration, uniquely suited to their academic and career goals. Integrative studies majors explore new topics and experiences while gaining the knowledge and skills needed to enter the workforce. Required coursework is offered in small classes with ample room for discussion, collaborative learning, and experiential learning, including in-community projects, volunteer opportunities, field work, internships and work with faculty on research that directly engages current social and global challenges.

The BS in Integrative Studies with a concentration in Applied Global Conservation is a Green Leaf Program.

Admissions & Policies

Policies

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. Integrative studies students may fulfill lower level Mason Core requirements through approved integrative studies (INTS) coursework. Students pursuing a BS in Integrative Studies must complete a minimum of 30 credits of (INTS) coursework, with at least 15 credits at the 300 and 400 levels. These 30 INTS credits fulfill the writing intensive and synthesis Mason Core requirements.

Students must complete ENGH 302 Advanced Composition (Mason Core). A maximum of 15 credits of INTS 299 Study Abroad or INTS 399 Study Abroad can be applied to the major. Students must have a

minimum GPA of 2.00 in courses applied to the major. Before registering, students should see an advisor to help plan their degree program to meet Mason requirements. The advisor also can help students choose electives or a minor.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Integrative studies students complete INTS 391 Understanding Integrative Studies and choose a concentration from the options below. Before registering, students should see an advisor to help plan their degree program to meet Mason requirements. The advisor also can help students choose electives or a minor.

Required Course

Code	Title	Credits
INTS 391	Understanding Integrative Studies	3

Concentration in the Major

A concentration is the equivalent of a major in a traditional degree program. Students choose from an established multidisciplinary concentration below or create with faculty an individualized program of study to fit their interests and needs. Concentration coursework combines integrative studies (INTS) classes with coursework from other Mason units (departments, schools, and colleges). While fulfilling the concentration requirements, students are also responsible for completing a minimum of 30 credits of INTS coursework. Any INTS courses required for the concentration will apply. Students must present a minimum GPA of 2.00 in courses applied to the concentration.

Concentrations

- Applied Global Conservation (AGCN)
- Life Sciences (LIFS)
- Individualized Concentration (IND)

Applied Global Conservation (AGCN)

Total credits: 40-44

Core Courses in Global Conservation

Code	Title	Credits
INTS 210	Sustainable World (Mason Core)	4
or INTS 211	Introduction to Conservation Studies (Mason Core)	
INTS 401	Conservation Biology (Mason Core)	6
INTS 402	Plants and People - Sustenance, Ceremony, and Sustainability	6
or INTS 403	Conservation Behavior (Mason Core)	
Total Credits		16

Additional Global Environmental Course

Code	Title	Credits
Select one course from the following:		3
ANTH 370	Environment and Culture	
EVPP 337	Environmental Policy Making in Developing Countries	
EVPP 436	The Human Dimensions of Global Climate Change	
GGS 302	Global Environmental Hazards	
EVPP 475	Global Biodiversity Governance	
GGS 303	Geography of Resource Conservation (Mason Core)	
Total Credits		3

Statistics

Code	Title	Credits
Choose one of the following:		3
STAT 250	Introductory Statistics I (Mason Core)	
or BIOL 312	Biostatistics for Bioinformatics	
or BIOL 214	Biostatistics for Biology Majors	
or CONS 460	Statistics and Study Design in Ecology and Conservation	
Total Credits		3

Additional Learning Community

In addition to the courses below, INTS 375 Special Topics, INTS 395 Field-Based Work, and INTS 398 Experiential Learning may be applied to the concentration when the topic is relevant to conservation studies.

Code	Title	Credits
Select one course from the following:		3-6
INTS 204	Leadership Theory and Practice	
INTS 305	Conflict Resolution and Transformation	
INTS 311	The Mysteries of Migration: Consequences for Conservation (Mason Core)	
INTS 331	The Nonprofit Sector (Mason Core)	
INTS 334	Environmental Justice (Mason Core)	
INTS 375	Special Topics	
INTS 395	Field-Based Work	
INTS 398	Experiential Learning	

Natural Science and Policy

Students may complete this requirement through regular coursework or through either option of the Smithsonian-Mason Semester Program.

Code	Title	Credits
Regular Coursework		
Three credits from the following:		3
INTS 390	International Internship (Mason Core)	
INTS 395	Field-Based Work	
INTS 490	Internship	
BIOL 308	Foundations of Ecology and Evolution	5
BIOL 300	BioDiversity	4
BIOL 377	Applied Ecology	3

or EVPP 361	Introduction to Environmental Policy	
Total Credits		15

Smithsonian-Mason Semester Program
Students complete one of the options offered through the Mason Center for Conservation Studies in cooperation with the Smithsonian Conservation Biology Institute. In this integrated series of courses, taken together in one semester, students live on site at the institute in Front Royal, VA. Students who apply this coursework to the concentration cannot also apply it to the minor in Conservation Studies.

Conservation, Biodiversity and Society Option (16 credits)

Code	Title	Credits
CONS 320	Conservation in Practice	3
CONS 401	Conservation Theory	3
CONS 402	Applied Conservation	4
CONS 410	Human Dimensions in Conservation (Mason Core)	3
CONS 490	RS: Integrated Conservation Strategies (Mason Core)	3
Total Credits		16

Wildlife Ecology and Conservation Option (16 credits)
Offered only in Fall semesters, students complete four required courses:

Code	Title	Credits
CONS 400	Conservation Seminar	2
CONS 404	Biodiversity Monitoring	4
CONS 405	Landscape and Macrosystems Ecology	4
CONS 496	Research in Conservation (Mason Core)	6
Total Credits		16

Endangered Species and Conservation Option (16 credits)
Offered only in Spring semesters, students complete four required courses:

Code	Title	Credits
CONS 400	Conservation Seminar	2
CONS 406	Small Population Management	4
CONS 491	RS: Conservation Management Planning (Mason Core)	4
CONS 496	Research in Conservation (Mason Core)	6

4-Year Plan

Bachelor of Science in Integrative Studies Sample Plan of Study

A sample four year graduation plan and degree planning worksheet can be found at https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets (https://academicaffairs.chss.gmu.edu/undergraduate-students/advising/advising-sheets/). The plan is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor each semester and with their PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Accelerated Master's

Many accelerated master's programs are available for any bachelor's degree at Mason. See the full list of degrees (http://catalog.gmu.edu/programs/#filter=filter_24) with accelerated programs at George Mason.

Leadership Minor

Banner Code: LSHP

Academic Advising

402 Enterprise Hall
Fairfax Campus

Website: integrative.gmu.edu/programs/la-minor-nc-lshp

This minor prepares students for transformative leadership in campus, local, national, and global contexts. Interdisciplinary and integrative classes examine leadership from multiple perspectives and disciplines, offering an understanding of socially-responsible leadership with an emphasis on community action. Through the required coursework and experiential learning, students critically examine diverse theories, research, and perspectives on leadership and are encouraged to explore topics such as social change and globalization, creative conflict resolution, the nature of power, oppression and influence, innovation, and systemic leadership. Civic engagement and multicultural competence are viewed as necessary requirements for leadership.

This minor is open to students in all academic programs, schools, and majors.

Faculty

Lennon, McCarron, Owen (director)

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: minimum of 15

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Nonprofit Studies Minor

Banner Code: NPS

Academic Advising

402 Enterprise Hall
Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-minor-ncc-nps

Nonprofit organizations significantly contribute to the provision of human services, access to the arts, education, recreation and health care, and protection of the environment. Effective nonprofit organizations provide direct services, influence public policy and build a civil society. This minor is designed to introduce students to the theoretical foundations and practical skills needed to be successful in this sector. Through heavy emphasis on experiential learning with the many excellent nonprofit organizations in our region, students learn to apply theory within the context of today's complex and rapidly changing environment.

Social Innovation Minor

Banner Code: SINN

Academic Advising

402 Enterprise Hall
Fairfax Campus

Website: integrative.gmu.edu/programs/la-minor-nc-sinn

Many approaches to addressing social and environmental issues start from a single professional perspective. Engineers, for example, will pursue a technical solution whereas a businessperson might employ an entrepreneurial approach. While professional avenues like these are powerful, a novel method is emerging known as *social innovation*. Social innovators develop solutions by integrating across the professional sectors of government, business, and nonprofit in ways that open new opportunities for addressing social and environmental challenges. This interdisciplinary minor in social innovation is designed to introduce students to the foundations of social innovation and the practical techniques social innovators employ to create solutions that balance people, profit, and the planet (i.e. the triple-bottom line). Through an emphasis on experiential learning in team-based innovation projects, students will integrate theory and practice as they develop the knowledge and skills of social innovators.

Social Justice and Human Rights Minor

Banner Code: SJHR

Academic Advising

402 Enterprise Hall
Fairfax Campus

Email: sisinfo@gmu.edu
Website: https://integrative.gmu.edu/programs/la-minor-nc-sjhr

The minor engages students in both a critical examination of various forms of injustice (such as poverty, racism, and speciesism, and environmental degradation) and an exploration of strategies for creating and sustaining an equitable and just world. This minor is interdisciplinary in nature, drawing on disciplines as distinct as critical race studies, critical animal studies, and environmental science. It is designed particularly to help students consider the intersectional nature of all types of exploitation and their related movements for liberation.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Well-Being Minor

Banner Code: WELB

Academic Advising

402 Enterprise Hall
Fairfax Campus

Email: sisinfo@gmu.edu
Website: integrative.gmu.edu/programs/la-minor-nc-welb

This minor provides students with a well-grounded understanding of the nature of human well-being, including both the historical foundations and modern research findings. Through the required coursework, students develop an ability to implement personal practices that foster deeper self-awareness, resilience, mind-body wellness, the regulation of stress factors in his or her life, and an emerging sense of meaning for his or her life. Students will learn to creatively and effectively apply principles from the exploration of the science of well-being to his or her own field of study.

Faculty

Fuertes, Thurston, Weinstein

Women and Gender Studies Program

Phone: 703-993-2896
Website: wmst.gmu.edu

By choosing to pursue work in women and gender studies, students at all levels engage in an interdisciplinary exploration of gender in social, political, cultural, and economic life; gender in history; women and the media; feminist theory; the relationship between sex and gender; the impact of sex, race, class, disability, and sexual orientation on people's lives; and the ways in which gender stereotypes influence the self in relationship to others. Students in many courses have the opportunity to investigate these issues in a cross-cultural and global perspective.

Undergraduate Programs

The Women and Gender Studies Program offers two interdisciplinary minors. The minor in women and gender studies and the minor in LGBTQ studies are open to students from any major. Students have the opportunity to earn credit toward the minor while doing an internship that helps prepare them for the work place, a service learning course that combines work in a specific course with a service project, or research on gender issues on Mason's campus. Students pursuing these minors can take advantage of the many activities and resources provided by the Women and Gender Studies Center.

The program also sponsors the concentration in women and gender studies in the BA in integrative studies.

Graduate Programs

The program sponsors the concentration in women and gender studies in the master's degree in interdisciplinary studies (MAIS). This concentration promotes advanced scholarship that transcends traditional boundaries. Students combine required coursework in women and gender studies with courses in a discipline of interest such as history, literature, sociology, anthropology, health, education, philosophy, social work, conflict analysis and resolution, or the arts.

The program also offers a graduate certificate in women and gender studies. Students may take this as a stand-alone certificate or pursue it concurrently with any graduate degree program. A portion of the certificate coursework may be applied to the degree with the approval of the director of the graduate degree and dean. Students must apply and be accepted to a graduate certificate program.

Women and Gender Studies Center

The academic program in women and gender studies is integrated with the Women and Gender Studies Center (https://wgstcenter.gmu.edu/). The center organizes a wide variety of lectures, conferences, workshops, and other public events throughout the year. The center houses a library and functions as a community space for students and faculty.

LGBTQ Studies Minor

Banner Code: LGBT

240K Johnson Center
Fairfax Campus

Email: wmst@gmu.edu
Website: wmst.gmu.edu/

Overview

The LGBTQ Studies minor is designed to engage students in the interdisciplinary field of LGBTQ studies through an intersectional framework. The courses will draw from the history of the LGBTQ movement in the United States as well as transnational movements on debates around gender and sexuality. Courses will also focus on theoretical frameworks important in LGBTQ studies such as queer theory, crip theory, feminist theory, and critical race theory. In addition to this focus, courses will also draw from activist frameworks to discuss LGBTQ issues. With these frameworks, students will explore issues of policy, legislation, media representation, theoretical debates, and activism within LGBTQ communities. This minor will prepare them to construct arguments and apply theory to practice in LGBTQ related coursework and professional organizations.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Women and Gender Studies Graduate Certificate

Banner Code: LA-CERG-WGST

Academic Advising

240K Johnson Center
Fairfax Campus

Email: wmst@gmu.edu
Website: wmst.gmu.edu/programs/la-cerg-wgst/

The graduate certificate may be taken alone or in conjunction with another graduate program. Courses applied to the certificate may be applied to a degree program, subject to approval of the director of the respective program.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. For information specific to the graduate certificate in women and gender studies, see Application Requirements and Deadlines (http://wmst.gmu.edu/programs/LA-CERG-WGST/application/).

Policies

In accordance with university policy, students may transfer up to 3 graduate credits earned at another accredited institution to the certificate program with the approval of the director of the program and the dean. They may transfer up to 6 graduate credits earned at Mason in non-

degree status toward the certificate, subject to approval of the director and the dean in accordance with university policy.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Total Credits		9

Capstone Portfolio

Students synthesize their work in the certificate program by reflecting on how issues, ideas, and theories raised in the core courses inform their understanding of gender issues within their area of interest. The portfolio includes three to five items produced in previous coursework and a 7-10 page essay discussing them. The portfolio may include course papers, performance videos, photos of exhibits, music, or other items as agreed on by the student and advisor. The portfolio must be approved by the graduate advisor and submitted to the Women and Gender Studies Program, where it will be presented, displayed, and archived.

Women and Gender Studies Minor

Banner Code: WGST

Academic Advising

240K Johnson Center
Fairfax Campus

Email: wmst@gmu.edu
Website: wmst.gmu.edu/programs/la-minor-wgst-wgst/

This minor is for students who are interested in gender, sexuality, and feminist perspectives. While it is an especially good complement to a major in the humanities, social sciences, health and human services, or natural sciences, it is open to students in any major in the university.

The interdisciplinary minor consists of two required courses and four electives. Students interested in feminist and gender issues choose their elective courses from a broad range of offerings.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see the Undergraduate Policies section of this catalog.

Requirements

Minor Requirements

Total credits: 18

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

College Code: SC

The College of Science at George Mason University is a leader in scientific discovery and the creation of innovative solutions for the rapidly-changing needs of today's world. The college prides itself in being home to a diverse population of students from across the U.S. and around the world. Here in our college, we are a magnet for minds interested in scientific disciplines and we offer enhanced undergraduate and graduate research opportunities to our students. The college is also one of Mason's leaders in entrepreneurship and is home to the NSF I-Corp Site grant. With new discoveries, we are adding to Mason's portfolio of patents, licenses, and spin-off companies.

The College of Science blends traditional science education with sought-after programs in disciplines as diverse as personalized medicine, infectious diseases, drug discovery, geoinformatics, chemistry, climate dynamics, environmental conservation, materials science, astronomy, forensic science, computational science, and applied mathematics. We encourage meaningful research at all levels of learning, pairing high

achieving undergraduate students with faculty mentors to undertake original projects. Many of our undergraduates go on to pursue advanced degrees in the sciences or medical professions, while others pursue careers in public service, nonprofit organizations, and the private sector. We also offer innovative minors, certificates, and graduate degree opportunities, as well as global, transfer-focused, and online or hybrid programs that allow professionals the opportunity to reskill or change careers.

The College of Science serves the university through teaching Mason Core courses in a variety of scientific disciplines and is a leader in the development of creative STEM initiatives to challenge and engage students at all levels. The college also serves the community and region as a resource for science education for K–12 students, teacher training, and community outreach programs. Our faculty strive to impart creativity, rigorous, analytical thinking, and clear communication as they help students explore new ideas and develop novel approaches to problem-solving. Students are thus prepared for their role as informed citizens in a complex, global society and are able to adapt to an ever-changing world.

Requirements & Policies

College Policies

The students of the college are governed by the policies and procedures of the university. Areas where the college provides additional guidance will be found in the Undergraduate Education and Graduate Education sections below.

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (http://ds.gmu.edu/) (703-993-2474) to learn more about accommodations that may be available to them.

Undergraduate Education

The college offers numerous certificates, Bachelor of Arts, and Bachelor of Science degrees. These undergraduate degrees consist of coursework in the Mason Core, in a major area of study, and in elective courses. To earn a bachelor's degree, students must at a minimum:

- Complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above).
- Complete at least one course designated as "writing intensive" (at the 300 or 400-level).
- All entering students who have not yet satisfied the Mason Core requirement in 'Quantitative Reasoning' are required to take the Math Placement Test (http://math.gmu.edu/placement_test.php) prior to enrollment.
- Students should also consult AP.5 Undergraduate Policies for information concerning university-wide requirements for undergraduate degrees.

All students are responsible for meeting with their academic advisor and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes in order to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of the requirements.

More information regarding the undergraduate programs administered by the college is available on the college's website (https://science.gmu.edu).

College-level Degree Requirements

The baccalaureate degree is designed to provide a broad knowledge of the world, develop in students the ability to think conceptually and critically, acquaint them with many different methods of inquiry, and provide skills to continue intellectual growth throughout life.

Bachelor of Arts

The Bachelor of Arts (BA) degree provides students with a breadth of knowledge as well as the necessary skills to make in-depth study of a major truly meaningful. In addition to the Requirements for Bachelor's Degrees and the Mason Core, students pursuing a BA degree must also complete the College Requirements for the BA Degree, and the degree program's requirements, both listed in the specific degree program's catalog page.

Bachelor of Science

The Bachelor of Science (BS) degree provides students with a more intensive approach to the technical core knowledge and concepts in their major field of study. Therefore, this curriculum has a reduced number of courses in humanities and social sciences in comparison with the BA degree in order to allow students to achieve greater depth in their majors. Students pursuing a BS degree must complete the Requirements for Bachelor's Degrees, including the Mason Core, and the requirements for their major. Requirements for each BS major are listed on the specific degree program's catalog page.

Minors

Students may elect to take a minor in addition to their major field of study. For policies governing all minors, see AP.5.3.4 Minors. Students interested in earning a minor should complete the Minor Declaration form (http://registrar.gmu.edu/forms/).

Teacher Licensure

Degree programs that help to prepare students for teaching careers are available in the following programs:

- Biology, BA
- Biology, BS
- Chemistry, BA
- Chemistry, BS
- Geology, BS
- Mathematics, BA
- Mathematics, BS
- Physics, BS

Students who wish to become teachers and who plan to seek teacher licensure should also consult the College of Education and Human Development and attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education's website (http://gse.gmu.edu/).

Undergraduate Policies

Students should become familiar with the university's general academic policies in addition to those specific to each department. Please see AP.5 Undergraduate Policies.

Students with questions regarding exceptions to undergraduate academic policies and college-level requirements should contact the college's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) (email: ugradCOS@gmu.edu). Additional academic information (https://science.gmu.edu/academics/advising-student-support/) and forms (https://science.gmu.edu/academics/undergraduate-academic-affairs-forms/) are available online from the college's webpage.

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the official add period. Calendars are available on the Office of the University Registrar's website (http://registrar.gmu.edu/calendars/).

Academic Load

Students should review the university policies regarding academic load in AP.1.2 Academic Load.

In order to be considered for an overload, students must fulfill all of the following criteria:

- Be in good academic standing,
- Have completed the prior semester with a GPA of 2.75 or higher,
- Have a cumulative GPA of 2.75 or higher,
- No grades of 'C-' or lower in the previous semester,
- Have demonstrated in prior semesters at George Mason the ability to handle an increased and demanding course load while maintaining high performance, and
- Have no remaining incompletes ('IN') from a previous semester

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at Mason.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition and fees by the official university deadlines. Calendars are available on the Office of the University Registrar's website (http://registrar.gmu.edu/calendars/).

Excluded Courses

The college's students are limited to 3 credits of coursework in Recreation (RECR) activity courses which may be taken to satisfy degree requirements and applied as general elective credits toward a degree in the college.

Military Science courses MLSC 400 Leadership and Management and MLSC 402 Leadership and Ethics can be used for credit toward a degree in the college, but credit from other MLSC courses may not be applied toward the college's degrees.

Once matriculated at Mason, students may not take CLEP exams and apply credits from those exams toward the college's degrees. Students may apply credits from CLEP exams to the college's degrees only if those credits were awarded and reported prior to admission.

University Consortium Registration

Students should review the university policies in AP.1.4 Special Registration Procedures, including the University Consortium listing.

In addition, students who have failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) at least three weeks prior to the first day of classes for the relevant semester at Mason.

Permission to Study Elsewhere

Once enrolled in degree status at Mason, students with less than 60 hours of earned transfer credits (excluding any credits earned through the Consortium of Universities of the Washington Metropolitan Area (https://www.consortium.org/) or through Mason Abroad (http://studyabroad.gmu.edu/)) may take no more than 9 credits of coursework in the college's disciplines at another institution.

Students with 60 or more hours of transfer credits are prohibited from taking additional coursework in the college's disciplines at another institution. Students may request special permission for additional credits beyond these listed limits for summer registration if their permanent residence is more than 50 miles from Mason's Fairfax campus. See AP.1.4.2 Permission to Study Elsewhere for more information.

Study Abroad

In order to be considered for study through Mason Abroad (http://studyabroad.gmu.edu/), students must plan well in advance and receive prior, written permission from the college's associate dean for student affairs. Students must also meet all of the following criteria:

- Meet all eligibility criteria for their program as specified by Mason Abroad (http://studyabroad.gmu.edu/), including minimum GPA requirements,
- Completed the immediately preceding semester at Mason with a GPA of 2.00 or higher, and
- Completed the necessary forms and obtained all required signatures and course equivalencies.

Mason Abroad (http://studyabroad.gmu.edu/) may have higher academic standards and students must meet all eligibility requirements.

Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

Leave of Absence

Please consult AP.1.8 Undergraduate Leave of Absence regarding the leave of absence policy.

Withdrawals

Courses for which a withdrawal is approved receive a grade of 'W'.

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended. Please review the applicable academic calendar (http://registrar.gmu.edu/calendars/) for pertinent dates.

Instructors do not have the authority to withdraw students from classes. Withdrawals require the approval of the college's associate dean for student affairs, are typically allowed only for full semesters at a

time (all enrolled courses), and are only permitted for non-academic reasons. Withdrawals cannot be approved for academic reasons. When submitting a withdrawal request, students must provide verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Credits graded 'W' do not affect a student's GPA, but do count as attempted hours. The total attempted hours and cumulative GPA determine a student's academic standing. If the cumulative GPA is below 2.00, withdrawals may affect whether a student will be on warning, probation, suspension, or dismissal. Students should be familiar with AP.5.2.3 Student Retention Categories.

Academic Clemency

Students should review the university policies regarding academic clemency in AP.5.2.9 Academic Clemency.

In extraordinary cases, students who (a) have been absent from Mason for a minimum of three consecutive calendar years, and (b) are currently in their first semester back at the university may request that the college's associate dean for student affairs consider allowing clemency from up to 16 hours of coursework from previous semesters.

To be considered for this clemency, students must meet all of the following criteria:

- Be absent from Mason for a minimum of three consecutive calendar years,
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return,
- Submit their request within 12 months of the first day of the re-enrollment term,
- In order to make this request, students should
  a. Enroll in at least 6 hours during their first 12 months back at Mason and
  b. Earn a minimum GPA of 2.50 each semester back prior to making the clemency request, with no grade below 2.00.

If these minimum academic requirements are not met during the first semester of return, then clemency will not be allowed under any circumstances.

Appeals Process

Students may appeal departmental decisions concerning academic actions to Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). They may further appeal the decisions of Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) to the Dean's Council, a committee composed of college deans and faculty members. These levels of appeal are subject to the limits below concerning the final level of appeal for each type of academic action. Students who feel that the college appeal process was conducted unfairly may appeal to the Office of the Provost as specified in Student Rights and Responsibilities.

Grade appeals should first be made to the department or program, following the process specified in AP.3.9 Grade Appeals. If they are resolved within the department or program, that is the final level of appeal. The departmental decision may be appealed to the college's associate dean for student affairs only on the basis of procedural irregularity. Such appeals should be made through the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). If the grade appeal is not resolved within the department or program, the chair makes a recommendation to the college's associate dean for student affairs, who makes the final determination. The decision of the associate dean is not subject to review or further appeal.

Departments set the requirements for the majors and minors that they administer. Substitutions and waivers of requirements require the approval of Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). When a department denies a substitution or waiver of a requirement, this decision may be appealed to the Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) on the basis of procedural irregularity only, and is the final level of approval.

The Dean's Council is the final level of appeal for course overloads, consortium registration, study elsewhere, and withdrawals after the drop deadline within the semester.

The college's associate dean for student affairs is the final level of appeal for college-level requirements, retroactive adds, withdrawals, graduation, and return from suspension and dismissal.

There is no waiver or appeal of satisfactory performance standards (minimum grades or grade point average, GPA) that have been set by the department or program faculty for the courses in their major or minor.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes in the following semester.

Grievances

Grievances should be directed in writing to the college's associate dean for student affairs. The Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) may also provide guidance to students on how to resolve their concerns.

Transfer Students

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions (https://www2.gmu.edu/admissions-aid/) may be eligible for a waiver of all of Mason's lower level Mason Core requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 Advanced Composition (Mason Core) and a synthesis course. Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a degree in the college are considered to have met all college requirements except for proficiency in a foreign language (required of BA students).

Students with a bachelor's degree from an accredited institution who are pursuing a BA degree in the college are also considered to have met all college requirements except for proficiency in a foreign language.

Graduate Education

Mason's College of Science offers numerous graduate certificates, master's programs, and doctoral programs; the requirements for each can be found in the program's description in this catalog. More information regarding the college's graduate programs is available on the college's website (https://cos.gmu.edu/academics/graduate-academics/).

Graduate Admission

Admissions decisions are made by the faculty committee in the respective graduate program. Denial of admission is not subject to appeal. Further information can be found in Graduate Admission Policies.

Provisional and Conditional Admission

Provisionally admitted students are not eligible to participate in any consortium coursework, studying at another institution, or study abroad programs until the conditions of the provisional contract have been met. Transfer of credit requests for coursework taken in non-degree status at Mason or another institution will not be considered until the provisional contact has been fulfilled. Further information on provisional admission can be found in Graduate Admissions Policies.

Details on conditional admission, the need for additional requirements to be met before enrollment, can be found in Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/#text).

Non-degree Enrollment

The college gladly admits qualified students for non-degree studies. Some of the factors that are considered by the college while making non-degree admissions decisions include: previous academic performance, professional experience, and academic fit. To apply, applicants are to complete the non-degree George Mason University Graduate Application (https://www2.gmu.edu/admissions-aid/apply-now/) and provide official transcripts from all institutions attended. Further information can be found in Non-degree Enrollment and on the Office of Admissions' website (http://admissions.gmu.edu/nonDegree/).

Upon admission to graduate non-degree studies, students are considered graduate students and are charged tuition accordingly (regardless of the course's level). The college permits up to 12 credits of relevant graduate coursework earned in non-degree status to be considered for transfer into many of its graduate programs.

Reduction of Credits

Students accepted into a master's or doctoral program who have earned a degree in a relevant field from a regionally accredited institution may be eligible for a credit reduction. Students must request a reduction of credit from the graduate program director of their graduate program; reductions must be approved by both the graduate program director and the college's associate dean for student affairs. Further details and related restrictions can be found in AP.6.5.2 Reduction of Credits.

Transfer of Credit

Graduate credit earned prior to admission may be eligible to apply toward a graduate certificate or degree program. Details and related restrictions can be found in AP.6.5.3 Transfer of Credit. Additionally, courses with grades of 'P' or 'S' are not accepted for transfer unless the official transcript indicates that the grade is equivalent to a 3.00 ('B') or better. Some programs have more stringent standards regarding a transfer of credit; students should contact their graduate program for specific information.

Credit from Other Institutions (Permission to Study Elsewhere)

Students enrolled in a degree program may take graduate courses at another regionally accredited institution and apply these credits to a master's or doctoral degree with prior approval. Details and related restrictions can be found in AP.6.5.4 Permission to Study Elsewhere. Students enrolling in courses at other institutions with different drop/add timetables must still abide by Mason's drop/add deadlines in terms of acquiring necessary approvals.

Academic Load

Graduate students can enroll in up to 12 credits each semester; non-degree graduate students can enroll in up to 10 credits each semester. Students should review the university's policies in AP.1.2 Academic Load.

University Consortium

Students should review university policies regarding the University Consortium under AP.1.4.9 University Consortium.

In addition, in order to register for a consortium course, students must have an overall GPA of at least 3.00 and be in good academic standing. Students with grades of 'IN' on their record or who earned grades of 'C' or 'F' in the most recent semester are not eligible to register for a consortium course. Students who have received a grade less than 3.00 in a consortium course are not permitted to enroll in additional consortium courses. Newly admitted graduate students are not permitted to enroll in consortium courses during their first semester of graduate study. Students who wish to enroll in consortium courses during their second semester of study must wait until the grades for the previous semester have been posted.

Dissertation Committee

The college follows university policies regarding dissertation committees. Please see AP.6.10.5 Dissertation Committee. Please note that some programs within the college may have a more stringent policy.

Dissertation (998/999) Registration

Most programs within the college follow university policies regarding dissertation registration; please see AP.6.10.6 Dissertation Registration (998, 999). Some departments may require additional requirements.

Time Limit for Doctoral Students

The college follows university policies regarding doctoral time limits. Please see AP.6.10.1 Time Limit. If your catalog term was before this current catalog, please visit the archived catalogs page (http://catalog.gmu.edu/archives/) and find your catalog term's policy on time limits.

Requests for extension of time limits must be submitted in writing to the college's associate dean for student affairs. The request should explain the extenuating circumstances that prevented timely completion of the degree, corrective action that has been taken to address those circumstances, and a time line for completing the work within the limits of the extension. The request should include a letter from the student's graduate program director indicating the program's support for the extension and confirmation that the work can be completed within the limits of the extension.

Graduate Appeals of Termination

All graduate students should be familiar with the university's polices on termination; please see AP.6.6.2 Academic Termination. Students who meet the criteria for academic termination may submit a written appeal to the college's associate dean for student affairs. Appeals should include all relevant information on the basis for appeal, as well as any appropriate documentation and a letter of support from the graduate program.

Appeals of termination are reviewed by the college's associate dean for student affairs with input from appropriate faculty within the student's department. The ruling represents the college's final decision.

Academic Units

- Department of Atmospheric, Oceanic and Earth Sciences
- Department of Biology
- Department of Chemistry and Biochemistry
- Department of Computational and Data Sciences
- Department of Environmental Science and Policy
- Department of Geography and Geoinformation Science
- Department of Mathematical Sciences
- Department of Physics and Astronomy
- Forensic Science Program
- Interdisciplinary Program in Neuroscience
- School of Systems Biology

Programs

- Advanced Biomedical Sciences Graduate Certificate
- Pre-Medical Undergraduate Certificate
- STEM in Society Minor (COS)
- Scientific Leadership and Practice Minor

Note:

See individual academic units within the college for additional program offerings.

The Advanced Biomedical Sciences (ABS) graduate certificate is a program offered jointly by George Mason University and Georgetown University Medical Center (GUMC) (http://gumc.georgetown.edu/). This program is designed for students who have all of their core coursework and extracurricular prerequisites for medical, dental or other health-related fields, but otherwise have a comparatively limited science background (non-science majors with only the pre-health curricular core, for example), modest grades in the sciences as undergraduates, and/or also need to improve their Medical College Admission Test, Dental Admission Test, or other pre-professional scores. This is a 9-month full-time program that begins each fall semester. Most classes are held at George Mason University's Science and Technology Campus in Manassas, Virginia with cadaveric anatomy labs held at GUMC.

The graduate certificate may be pursued on a full-time basis in either a lecture-based format or a hybrid format using recorded lectures and a discussion-based classroom experience. The program is premium-priced with no tuition distinction between the in-state or out-of-state residency status.

This certificate program qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants are expected to have a bachelor's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the desire to pursue a career in medicine, dentistry, or other health-related career, completion of all of the prerequisite courses for medical or dental school (one year each of biology, chemistry, organic chemistry, physics and math), and overall credentials suitable for acceptance to graduate programs in the College of Science at George Mason University and the Georgetown University Graduate School of Arts and Sciences.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Certificate Requirements

Total credits: 20

This certificate may be pursued on a full-time basis only.

Students should refer to the Admissions & Policies tab for specific policies related to this certificate.

Pre-Medical Undergraduate Certificate

Banner Code: SC-CERB-PMCL

Donna M. Fox, Ph.D.

Phone: 703-993-9532

The Pre-Medical Undergraduate Certificate is a premium program offered to enlisted members of the U.S. military who are chosen specifically from a federal program referred to as EMDP2 (Enlisted to Medical Degree Preparatory Program). This is a post-baccalaureate program aimed at active duty military enlisted members who have earned a bachelor's degree from a regionally accredited institution with a minimum cumulative GPA of 3.0, who have experience working in a health-related position in the military, and who meet all other requirements specified by the Uniformed Services University of the Health Sciences (USU) (https://www.usuhs.mil/), and who are interested in matriculating at the Uniformed Services University (military medical school) or another US accredited medical school. Only those individuals who are supported by EMDP2 are eligible to enroll in the Pre-Medical Undergraduate Certificate.

The Pre-Medical Undergraduate Certificate will provide a one-year undergraduate program that will allow qualified individuals to complete undergraduate pre-medical admissions requirements as currently specified by the American Association of Medical Colleges (https://www.aamc.org/) (AAMC).

This is a full-time program offered during the day and located at the Science and Technology Campus of George Mason University. Students are selected by the US military and are admitted as a cohort in the fall semester only.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

Applicants must be active duty military and selected by the EMDP2. Students are expected to have a bachelor's degree from a regionally accredited university and the desire to pursue a career in military medicine.

Applicants who do not meet the admissions requirements for this certificate may be interested in learning about the Career Changer's Biological Sciences Undergraduate Certificate.

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Certificate Requirements

Total credits: minimum 42

This certificate may be pursued on a full-time basis only.

Scientific Leadership and Practice Minor

Banner Code: SCLP

Academic Advising

Phone: 703-993-4594
Email: aacos@gmu.edu

This minor has been designed to build scientific communication, engagement, and leadership practices so that students are (i) equipped to communicate effectively about the science they undertake and the challenges they face in ways that are meaningful in relation to their field of study, and (ii) equipped with the skills to participate and lead others in scientific ventures.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 16-20

Students should refer to the Admissions & Policies tab for specific policies related to this program.

STEM in Society Minor (COS)

Banner Code: STEM

The STEM in Society minor develops strategic and critical thinking capabilities to better understand how science, technology, engineering, and mathematics (STEM), as well as medicine, impact the human experience - past, present, and future. It provides a broad perspective of the STEM fields, to include how advances are developed, how they fit into the wider context of society and culture, and how historical contexts have in turn shaped advances in these fields.

The skills and competencies gained from this minor are useful to those seeking work in the tech and health care industries, as well as fields like international development and public policy or in non-profits, the government, or think tanks.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Administration

- Jim Kinter, Chair (through May 2021)
- Geoff Gilleaudeau, Graduate Program Director for Geology
- Stacey Verardo, Undergraduate Program Director for Geology
- Cristiana Stan, Undergraduate Program Director for Climate
- Barry Klinger, Graduate Coordinator for Climate

Scientists and students in the Department of Atmospheric, Oceanic, and Earth Sciences (AOES) are working to better understand our planet in myriad ways, from improving numerical model predictions of next year's atmospheric temperature to explaining geological strata laid down in previous eras, from monitoring water transport through the atmosphere to modeling water movement at the bottom of the ocean.

AOES is home to active research programs and to a doctoral program in Climate Dynamics, a master's degree in Earth Systems Science, undergraduate degrees in Atmospheric Science and Geology (BA and BS), and undergraduate minors in Atmospheric Science, Earth Science, Ocean and Estuarine Science, and Paleontology. The department has close ties to the Center for Ocean-Land-Atmosphere Studies (COLA) (http://cola.gmu.edu/).

Dr. Cristiana Stan, Undergraduate Coordinator and Associate Professor

267 Research Hall
Fairfax Campus

Phone: 703-993-5391
Email: cstan@gmu.edu
Website: science.gmu.edu/academics/departments-units/atmospheric-oceanic-earth-sciences/majors-minors

Topics of study in this minor include weather forecasting, climate change, and the predictability of coupled ocean-atmosphere-land-variations. Students in physics, math, engineering, and computational sciences may be particularly attracted to this minor because it provides a compelling application of the fundamental methods of analysis learned in their major. Such students are ideal candidates for research in atmospheric science and climate dynamics; the minor will facilitate entry into graduate studies in these fields.

Students in Earth science, geography and geoinformation science, and environmental science may find this minor useful because the atmosphere is an important influence on geography, ecosystems, geological strata, and plays an important role in global change.

This is a Green Leaf program.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

The undergraduate program in atmospheric sciences gives students a strong quantitative undergraduate education in atmospheric, climate, and related sciences to understand the basic principles behind current and emerging issues in weather, climate variability, and climate change. Students completing the atmospheric sciences degree will be prepared for a full range of career paths including forecast and analysis, operations and research support in meteorology, numerical weather prediction, data analytics, and climate. The curriculum meets the American Meteorological Society's (https://www.ametsoc.org/ams/) recommendations for a bachelor's degree in atmospheric sciences.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

The university's writing intensive requirement for the major will be met upon successful completion of CLIM 408 Senior Research.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

A GPA of at least 2.00 is required for all core courses, with an overall GPA of at least 2.50.

Atmospheric Sciences Core

Total Credits		8

Options

Students in the atmospheric sciences major will select one of the following options in addition to the required courses above. These options reflect faculty expertise and provide two areas of research emphasis. The options will help in creating educated professionals who have the requisite training to support future weather and climate research, enabling the graduate's potential for providing substantial societal benefits.

Meteorology Option

This option is designed for students who are primarily interested in weather and weather forecasting. The required classes in this option emphasize atmospheric phenomena, especially those that have the greatest impact on society.

Code	Title	Credits
CLIM 312	Physical Climatology	3
or GGS 312	Physical Climatology	
or CLIM 440	Climate Dynamics	
CLIM 314	Severe and Extreme Weather	3
or GGS 314	Severe and Extreme Weather	
CLIM 319	Air Pollution	3
or GGS 319	Air Pollution	
Total Credits		9

Computational Atmospheric Sciences Option

The computational atmospheric sciences option gives students preparation in computational science, mathematics, and elements of numerical modeling in order to undertake quantitative research or operational work in a professional or graduate setting.

Code	Title	Credits
CLIM 470	Numerical Weather Prediction	3
MATH 214	Elementary Differential Equations	3

Select one from the following:		3
CDS 251	Introduction to Scientific Programming	
CDS 301	Scientific Information and Data Visualization	
CDS 302	Scientific Data and Databases	
CDS 303	Scientific Data Mining	
Total Credits		9

Required Electives

The required electives must be chosen from this list and be independent of courses taken in the selected option (Meteorology or Computational Atmospheric Sciences):

Code	Title	Credits
Select 9 credits from the following:		9
CDS 251	Introduction to Scientific Programming	
CDS 301	Scientific Information and Data Visualization	
CLIM 312	Physical Climatology	
or GGS 312	Physical Climatology	
CLIM 314	Severe and Extreme Weather	
or GGS 314	Severe and Extreme Weather	
CLIM 319	Air Pollution	
or GGS 319	Air Pollution	
CLIM 409	Research Internship	
CLIM 412	Physical Oceanography	
CLIM 438	Atmospheric Chemistry	
CLIM 440	Climate Dynamics	
CLIM 456	Introduction to Atmospheric Radiation	
or GGS 456	Introduction to Atmospheric Radiation	
CLIM 470	Numerical Weather Prediction	
GEOL 420	Earth Science and Policy (Mason Core)	
GGS 354	Data Analysis and Global Change Detection Techniques	
MATH 214	Elementary Differential Equations	
Total Credits		9

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 48-49 credits (dependent upon the course chosen for the Computer Science requirement), which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3

Synthesis/Capstone [2]		3
Total Credits		40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Climate Dynamics, PhD

Banner Code: SC-PHD-CLIM

Dr. Barry Klinger, Graduate Coordinator

116 Research Hall
Fairfax Campus

Phone: 703-993-9227
Email: bklinger@gmu.edu
Website: science.gmu.edu/academics/departments-units/atmospheric-oceanic-earth-sciences/climate-dynamics-phd

The mission of this program is to train the next generation of scientists in climate dynamics and related fields. Through a comprehensive grounding in coursework, our students learn about how the atmosphere, ocean, and land surface work together to determine the climate. In collaboration with internationally-known scientists, students conduct independent work to further our understanding of climate, how it varies, and how much of it we can predict. Tools in the program include cutting-edge climate models, superb computing facilities, sophisticated statistical techniques, and comprehensive data sets. Our graduates have gone on to work at top laboratories and universities.

Understanding climate variability and predictability poses difficult mathematical, computational, and observational questions that have generated increasing intellectual excitement in recent years. Climate variability has important ramifications for society, from planning for next year's electrical demand and forecasting agricultural production to answering complex questions involving long-term change in global climate, sea level, and biodiversity. While it is impossible to predict day-to-day weather more than a few weeks in advance, progress in predicting El Niño supports the idea that seasonal averages of temperature, rainfall, and other factors may be at least partly predictable months or even years in advance. Likewise, there is a strong scientific basis for predicting long-term changes in global climate due to changing greenhouse gas concentrations.

Climate dynamics faculty members have a blend of expertise in dynamics, statistics, and computational methods. They are heavily involved with national and international collaborations. Faculty members and students work closely with scientists at the Center for Ocean-Land-Atmosphere Studies (COLA) (http://cola.gmu.edu/cola.html), a national leader in climate modeling.

Faculty research focuses on the areas of climate prediction and predictability, climate variability, coupled ocean-atmosphere-land dynamics, and dynamical systems and retrospective analysis. Recent research topics include predictability of weather and climate; modeling of the complex climate system; El Niño dynamics; monsoons; atmosphere-ocean interaction; land-climate interaction; decadal climate variability; ocean circulation theory; and climate change.

This has been designated a Green Leaf program.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants should have demonstrated a high aptitude for quantitative reasoning, applied mathematics, and physical science. Applicants should have an undergraduate degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a GPA of at least 3.00 in undergraduate work, and a GRE verbal plus quantitative score of 301 (1,100 on the old scale). To apply, prospective students should submit a completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), a current résumé, three letters of recommendation, an expanded goals statement, and two copies of official transcripts from each college and graduate institution attended. An official report of scores obtained on the GRE-GEN should also be officially reported by ETS (https://www.ets.org/). The GRE requirement for admission to the doctoral programs can be waived if the student holds a master's degree from a regionally accredited U.S. institution. TOEFL scores are required of all international applicants who have not completed a master's degree in the United States.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See AP.6.5.2 Reduction of Credits for more information.

Select 21 credits of graduate-level electives, including CLIM courses and other relevant courses as approved by the graduate coordinator[1].

Code	Title	Credits
CLIM courses		21
Total Credits		21

[1] Including up to 6 credits of CLIM 796 or CLIM 996.

Eligibility for Qualifying Exams

Satisfactory progress in the program is demonstrated by adequate research progress (as attested by the advisor) and by the student attaining a B- or higher in all CLIM courses and on the final exams of the “Core Climate” courses (CLIM 610 Introduction to the Physical Climate System, CLIM 614 Land-Climate Interactions, CLIM 711 Introduction to Atmospheric Dynamics, CLIM 712 Physical and Dynamical Oceanography). If any of these conditions are not met, the director of the Climate Dynamics program convenes a faculty committee to recommend whether the student should continue in the program. The director makes the final decision based upon input from the committee. A student who

is allowed to continue in the program may, in a later semester, retake any Core Climate final exam in which the student's score was below B-.

To be eligible for CLIM 997 Doctoral Qualification, students must have received a B- or higher on the final exam of each of the four Core Climate courses. Students who have taken the equivalent of any of these courses must take the Core course's final exam even if they do not take the course.

Qualifying Exams

Students take a qualifying exam by enrolling in CLIM 997 Doctoral Qualification. Students pass the exam by demonstrating an ability to analyze scientific problems, identify an open scientific question in climate dynamics, and outline a methodology to answer the question.

Students take CLIM 997 in their second spring semester in the program. Students who enter in the spring have the option of taking it in their 2nd or 3rd spring semester.

Code	Title	Credits
CLIM 997	Doctoral Qualification	3
Total Credits		3

Advancement to Candidacy

After the student has completed all coursework in CLIM 997 Doctoral Qualification, the Climate Dynamics Director decides whether the student continues in the doctoral program, based on performance in CLIM 997 and consultation with student's advisor and the instructors of CLIM 997 and Core Climate courses. To continue, the student forms a dissertation committee by the end of the following summer and thereafter enrolls in CLIM 998 Doctoral Dissertation Proposal.

Students who continue in the doctoral program are expected to submit a paper to a peer-reviewed journal, and to the dissertation committee, before the start of the Spring semester following the qualifier. If this deadline is not met, then the student submits a progress report to the thesis committee at the end of each semester until the paper is submitted. In all cases, student must satisfy the submission requirement before submitting and defending a dissertation proposal.

By the end of the student's third year, the student is expected to present a Dissertation Proposal to their thesis committee. The dissertation proposal will generally be an extension of the CLIM 997 proposal.

Once a dissertation committee approves the dissertation proposal and the student completes all non-dissertation program requirements, the student is formally advanced to doctoral candidacy.

Dissertation Research and Defense

After approval of the dissertation proposal, students are formally advanced to doctoral candidacy and produce the dissertation while taking CLIM 999 Doctoral Dissertation. The degree's requirements will be fulfilled upon completion of the required coursework and approval of a dissertation that makes an original and significant contribution to the field.

No more than 21 combined credits from CLIM 998 Doctoral Dissertation Proposal and CLIM 999 may be applied toward satisfying doctoral degree requirements, with no more than 18 credits of CLIM 998.

Code	Title	Credits
Choose credits for the following courses in consultation with an advisor:		21
CLIM 998	Doctoral Dissertation Proposal	
CLIM 999	Doctoral Dissertation (minimum 3 credits)	
Total Credits		21

Climate Science, MS

Banner Code: SC-MS-CLIS

Dr. Barry Klinger, Graduate Coordinator

109 Research Hall
Fairfax Campus

Phone: 703-993-9227
Email: bklinger@gmu.edu
Website: aoes.gmu.edu

The understanding of climate science is essential to the interpretation of modern climate variations and the measurement of their impact. Climate data must be analyzed and interpreted in order to formulate useful responses and plan actions to meet specific climate challenges. The MS in Climate Science educates students to be climate professionals who can analyze and model advanced climate data. Students in the program learn to solve quantitative problems about atmospheric properties and variability, fluid dynamics, and the role of the ocean and land surface in climate. Students choose a concentration in either Climate Modeling or Climate Data to gain specific skills to understand and predict climate variations.

The program encourages applications from students with diverse backgrounds in physical science, mathematics, and engineering. Students with atmospheric science or meteorology degrees can deepen their understanding, enhance relevant computer skills, and gain insight into climate as a multi-component system. Students with physics, math, or other degrees will find that climate provides compelling applications of their mathematical and computational skills. All students will be taught by faculty of the Atmospheric, Oceanic, and Earth Sciences Department (https://catalog.gmu.edu/colleges-schools/science/atmospheric-oceanic-earth-sciences/) and the Center for Ocean-Land-Atmosphere Studies (http://cola.gmu.edu/), which includes scientists doing pioneering work in climate dynamics, climate modeling, predictability, and statistical analysis of climate data.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Admission requirements include:

- An earned baccalaureate degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, verified from official transcripts.

- A minimum 3.00 GPA on a 4.00 scale in baccalaureate study.
- Complete the online application and submit all required materials.

Program admission decisions give preference to students with an undergraduate degree in physical science, mathematics, or engineering. Students with other undergraduate degrees should consult with the program's administration regarding the suitability of their undergraduate preparation.

Requirements

Degree Requirements

Total Credits: 33

Students must complete the Core Courses, Seminar, and Thesis or Non-thesis sections, and in addition, choose one concentration:

Core Courses

Code	Title	Credits
CLIM 511	Atmospheric Dynamics [1]	3
or CLIM 711	Introduction to Atmospheric Dynamics	
CLIM 512	Physical Oceanography [1]	3
or CLIM 712	Physical and Dynamical Oceanography	
CLIM 610	Introduction to the Physical Climate System	3
CLIM 614	Land-Climate Interactions	3
CLIM 690	Scientific Basis of Climate Change	3
Total Credits		15

[1] Students who wish to continue with the Climate Dynamics, PhD (https://catalog.gmu.edu/colleges-schools/science/atmospheric-oceanic-earth-sciences/climate-dynamics-phd/) should note that CLIM 711 Introduction to Atmospheric Dynamics and CLIM 712 Physical and Dynamical Oceanography are required for the PhD.

Seminar

Code	Title	Credits
CLIM 991	Climate Dynamics Seminar (1 credit, repeated three times)	3
Total Credits		3

Thesis or Non-thesis Options

Code	Title	Credits
Choose one of the following options:		3
Thesis Option		
CLIM 799	Master's Thesis in Climate	
Non-thesis Option		
Choose one unrestricted, graduate-level elective course [1]		
Total Credits		3

[1] Unrestricted, graduate-level elective courses may be chosen from the following prefixes: Climate Dynamics (CLIM) (https://catalog.gmu.edu/courses/clim/), Mathematics (MATH) (https://catalog.gmu.edu/courses/math/), Computational and Data Sciences (CDS) (https://catalog.gmu.edu/courses/cds/), Computational Science and Informatics (CSI) (https://catalog.gmu.edu/courses/csi/), Computational Social Science (CSS) (https://catalog.gmu.edu/courses/css/), Geography and Geoinformation Science (GGS) (https://catalog.gmu.edu/courses/ggs/), or chosen from the Climate-Relevant elective list (below).
Other courses can be approved by the graduate coordinator.

Concentrations

Concentration in Climate Modeling (CM)

Code	Title	Credits
CLIM 670	Earth System Modeling	3
CLIM 715	Numerical Methods for Climate Modeling	3
CLIM 751	Predictability and Prediction of Weather and Climate	3
Choose one course from the elective lists (below)		3
Total Credits		12

Concentration in Climate Data (CD)

Code	Title	Credits
CLIM 680	Climate Data	3
CLIM 762	Statistical Methods in Climate Research	3
Choose two courses from the Mathematical, Computational, or Geographical elective list (below)		6
Total Credits		12

Electives

Code	Title	Credits
Please pay close attention to course credit values and consider how they will work into your degree program.		
Climate Science		
CLIM 631	Urban Climate	
CLIM 680	Climate Data	
CLIM 690	Scientific Basis of Climate Change	
CLIM 713	Atmosphere-Ocean Interactions	
CLIM 750	Geophysical Fluid Dynamics	
CLIM 751	Predictability and Prediction of Weather and Climate	
CLIM 752	Ocean General Circulation	
CLIM 753	General Circulation of the Atmosphere	
CLIM 754	Elements of the Tropical Climate System	
CLIM 759	Topics in Climate Dynamics (when the topic is "Advanced Predictability" or "Convection") [2]	
GEOL 532	Paleoclimatology	
GEOL 535	Quantitative Stratigraphy	
GEOL 565	Paleoceanography	
GGS 670	Introduction to Atmosphere and Weather	
Mathematical, Computational, or Geographical		
CLIM 715	Numerical Methods for Climate Modeling	
CLIM 759	Topics in Climate Dynamics (when the topic is "Earth System Modeling") [2]	

CLIM 762	Statistical Methods in Climate Research
CLIM 763	Advanced Statistical Methods in Climate Research
GEOL 525	Modeling Earth Signals and Systems
GEOL 553	Field Mapping Techniques
CDS 501	Scientific Information and Data Visualization
CSI 501	Introduction to Scientific Programming
CSI 690	Numerical Methods
GGS 553	Geographic Information Systems
GGS 563	Advanced Geographic Information Systems
GGS 650	Introduction to GIS Algorithms and Programming
GGS 680	Earth Image Processing
GGS 692	Web-based Geographic Information Systems
PHYS 510	Computational Physics I
Climate-Relevant	
GEOL 506	Soil Science
GEOL 513	Hydrogeology
GEOL 563	Coastal Morphology and Processes
BIOL 650	Environment Analysis and Modeling
CDS 502	Introduction to Scientific Data and Databases
CSI 600	Quantitative Foundations for Computational Sciences
CSI 662	Introduction to Space Weather
EVPP 506	Science of the Environment I
EVPP 507	Science of the Environment II
EVPP 529	Environmental Science Communication
EVPP 542	Urban Ecosystems Processes
EVPP 543	Tropical Ecosystems
EVPP 550	Waterscape Ecology and Management
EVPP 607	Fundamentals of Ecology
EVPP 637	Human Dimensions of Climate Change (when the topic is "Climate Change Policy & Politics" or "Climate Change, Public Administration, and Management")
GGS 507	Geographic Approaches for Sustainable Development
GGS 531	Land-Use Modeling Techniques and Applications
GGS 550	Geospatial Science Fundamentals
GGS 579	Remote Sensing
GGS 656	The Hydrosphere
AIT 580	Analytics: Big Data to Information
AIT 582	Metadata Analytics for Big Data
COMM 660	Climate Change and Sustainability Communication Campaigns
CS 504	Principles of Data Management and Mining
PUBP 710	Topics in Public Policy (when the topic is "Climate Policy & Politics" or "Climate Change, Public Administration and Management")

[2] CLIM 759 Topics in Climate Dynamics is a special topics course in which different sections can address different subjects.

Earth Science Minor

Banner Code: ESCI

Dr. Stacey Verardo, Undergraduate Coordinator and Professor

3451 Exploratory Hall
Fairfax Campus

Phone: 703-993-1045
Email: sverardo@gmu.edu
Website: science.gmu.edu/academics/departments-units/atmospheric-oceanic-earth-sciences/majors-minors

Students taking this minor complete coursework in the solid Earth, oceanography, and the atmosphere. This minor pairs well with other degrees in the sciences such as chemistry or biology.

This has been designated a Green Leaf program.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor.

For policies governing all minors, see AP.5.3.4 Minors.

Students may not receive both the Geology Minor and the Earth Science Minor.

Requirements

Minor Requirements

Total credits: 18-19

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must successfully complete the following coursework with a minimum GPA of 2.00.

Core Courses

Code	Title	Credits
GEOL 101	Introductory Geology I (Mason Core)	4
GEOL 309	Oceanography	3
or BIOL 309	Oceanography	
Select one of the following options:		3-4
Option One:		
CLIM 111	Introduction to the Fundamentals of Atmospheric Science (Mason Core)	

CLIM 112	Introduction to the Fundamentals of Atmospheric Science Lab (Mason Core)	
Option Two:		
GGS 309	Introduction to Weather and Climate	
Total Credits		10-11

Earth Systems Science, MS (AOES)

Banner Code: SC-MS-ESSC

Geoff Gilleaudeau, Assistant Professor

3452 Exploratory Hall
Fairfax Campus

Phone: 703-993-3289
Email: ggilleau@gmu.edu
Website: science.gmu.edu/academics/departments-units/atmospheric-oceanic-earth-sciences/graduate-programs

This is a shared program between the Department of Atmospheric, Oceanic, and Earth Sciences and the Department of Geography and Geoinformation Science.

The program addresses the growing demand for trained professionals in the Earth sciences. The degree emphasizes a research-oriented, global systems approach to studying the Earth and its systems- the atmosphere, the hydrosphere, and the lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation, measurement, and analysis of Earth's systems.

Most student research projects and theses will relate to geologic and geographic topics, however studies of related topics in Earth science are welcome. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools, specifically pertaining to the area of Earth science that they choose to investigate. Students are encouraged to undertake a master's thesis but may choose a research project. In the latter case, students must pass a comprehensive exam.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Applicants should have earned a BS degree in atmospheric, Earth, environmental, geological, geographical, ocean, or physical science. Previous coursework should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. Applicants should have a minimum GPA of 3.00 in their undergraduate degree.

Application Requirements

Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement are required. Applicants also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. TOEFL scores are required of all international applicants.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Candidates must complete 10 credits of GGS courses and 10 credits of GEOL/CLIM courses toward their requirements. ("Culminating Experience" credits do not count towards this requirement).

Earth Science Core

Code	Title	Credits
Select one course from each of the following groups:		9
Atmosphere:		
CLIM 610	Introduction to the Physical Climate System	
CLIM 614	Land-Climate Interactions	
GEOL 532	Paleoclimatology	
GGS 670	Introduction to Atmosphere and Weather	
PHYS 575	Atmospheric Physics I	
Hydrosphere:		
CLIM 512	Physical Oceanography	
CLIM 712	Physical and Dynamical Oceanography	
GEOL 513	Hydrogeology	
GGS 656	The Hydrosphere	
Lithosphere:		
GEOL 506	Soil Science	
GGS 657	The Lithosphere	
or GEOL 601	The Lithosphere	
Total Credits		9

Techniques [1]

Select one from the following:		1
GGS 700	Comprehensive Exam	
GEOL 700	Comprehensive Exam	
CLIM 700	Climate Comprehensive Exam	
Select one from the following:		2
GGS 798	Master's Research Project	
GEOL 798	Master's Research Project in Earth Systems Science	
CLIM 798	Master's Climate Research Project	
Total Credits		3

Accelerated Master's

Geology, BS/Earth Systems Science, Accelerated MS

Overview

Geology, and Earth sciences more broadly, are extremely important to society and our economy as they deal with our planet, our oceans, and our climate. Degrees in Earth science are broadly useful in industry, government, conservation, and many other areas of our economy. While there are many positions in the field that only require a bachelor's degree, many employers either prefer a Master's degree, or a Master's degree can be the key to further promotion within a particular organization. This Accelerated Master's degree is designed to give students the skills and the degrees that they need to be both initially successful, and to ensure long-term advancement in their chosen professions.

Application Requirements

Applicants should be enrolled in the Geology, BS degree at Mason and have earned at least 60 credits. Previous coursework should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. Applicants should have a minimum GPA of 3.00.

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/) section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals (including information on the applicant's proposed MS research), and a letter from their advisor. This letter should state that the advisor agrees to take on the candidate as an MS student, addresses how the candidate would be a good fit for them, and indicate why the applicant's research topic would be suitable for study.

Accelerated Option Requirements

Students admitted to this program may take graduate courses after completing 75 undergraduate credits, and up to 12 credits of appropriate graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 24 credits to receive the master's degree. All other requirements for the Earth Systems Science, MS, must be met.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition form found on the Office of the University Registrar's website (https://registrar.gmu.edu/forms/).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Reserve Graduate Credit

Undergraduate students may also take up to 6 additional and appropriate graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master's degree credits accordingly (e.g., with 12 credits counted toward the undergraduate and graduate degrees plus the maximum 6 reserve credits for the master's, an MS could be completed with 12 post-bachelor's credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

Graduate Course Suggestions

Students should consult with an advisor before registering for graduate credits.

Code	Title	Credits
GEOL 504	Sedimentary Geology	4
GEOL 506	Soil Science	3
GEOL 513	Hydrogeology	3
GEOL 521	Geology of Energy Resources	3
GEOL 532	Paleoclimatology	3
GEOL 534	Vertebrate Paleontology	4
GEOL 536	Paleontology Seminar	1-2
GEOL 553	Field Mapping Techniques	3

Geology Minor

Banner Code: GEOL

Dr. Stacey Verardo, Undergraduate Coordinator and Professor

3451 Exploratory Hall
Fairfax Campus

Phone: 703-993-1045
Email: sverardo@gmu.edu
Website: science.gmu.edu/academics/departments-units/atmospheric-oceanic-earth-sciences/majors-minors

The Geology, BA program aims to provide students with both high-quality conceptual knowledge and hands-on training in geology in preparation for careers within the earth-science field or for graduate studies in geology.

This is a Green Leaf program.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core.

GEOL 317 Geomorphology fulfills the writing intensive requirement for this major.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Candidates for a degree in geology must complete all courses with a minimum GPA of 2.50.

Geology Core

Code	Title	Credits
GEOL 101	Introductory Geology I (Mason Core)	4
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	4
GEOL 302	Mineralogy	4
GEOL 304	Sedimentary Geology	4
GEOL 308	Igneous and Metamorphic Petrology	4
GEOL 312	Invertebrate Paleontology	4
GEOL 317	Geomorphology [2]	4
GEOL 401	Structural Geology	4
Six credits of		6
GEOL 404	Geological Field Techniques [3]	
Total Credits		38

[2] Fulfills writing-intensive requirement.

[3] A 6-credit geology field camp may be substituted for this requirement; see advisor for details.

Chemistry

Code	Title	Credits

Program Courses

Code	Title	Credits
Students must take 9 credits of degree-related coursework in a coherent program designed in coordination with advisor and approved by department chair		9
Total Credits		9

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 58-59 credits, which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3

Oral Communication	3
Quantitative Reasoning	3
Information Technology and Computing	3
Exploration Requirements	
Arts	3
Global Understanding	3
Literature	3
Natural Science	7
Social and Behavioral Sciences	3
Western Civilization/World History	3
Integration Requirements	
Written Communications (ENGH 302)	3
Writing-Intensive [1]	3
Synthesis/Capstone [2]	3
Total Credits	40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

College Requirements for the BA Degree

In addition to the program requirements and the Mason Core requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

1 PHIL 323 Classical Western Political Theory and PHIL 324 Modern Western Political Theory may not be used to fulfill this requirement.

Social and Behavioral Sciences

Choose one approved Mason Core: Social and Behavioral Sciences course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST[1], LING, PSYC, or SOCI, and the following GGS courses:

Code	Title	Credits
Select any course from the disciplines above or select from the following GGS courses:		3
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	
Total Credits		3

1 HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core)may not be used to fulfill this requirement.

Natural Science

Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits[1]. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience[2].

Code	Title	Credits
Select an additional Mason Core Natural Science course		1

1 For Geography, BA majors, this extra credit is not required.

2 BIOL 124 Human Anatomy and Physiology and BIOL 125 Human Anatomy and Physiology may not be used to fulfill this requirement.

Foreign Language

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202 (https://catalog.gmu.edu/colleges-schools/humanities-social-sciences/modern-classical-languages/) (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. A three course sequence in American Sign Language (EDSE 115 (https://catalog.gmu.edu/search/?P=EDSE%20115) American Sign Language (ASL) I, EDSE 116 (https://catalog.gmu.edu/search/?P=EDSE%20116) American Sign Language (ASL) II, and EDSE 219 (https://catalog.gmu.edu/search/?P=EDSE%20219) American Sign Language (ASL) III) will also meet the foreign language requirement. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Academic and Student Affairs (http://cosundergrad.gmu.edu/).

Non-Western Culture

Choose one approved Non-Western Culture Requirement[1] course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill

any *other* requirements (Mason Core requirements, college-level requirements, or requirements for the major).

Code	Title	Credits
Select 3 credits from approved Non-Western Culture courses if a waiver isn't applicable:		0-3
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	3
ANTH 381	Medical Anthropology	3
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core)	3
ARAB 360	Topics in Arabic Cultural Production	3
ARAB 420	Survey of Arabic Literature	3
ARAB 440	Topics in Arabic Religious Thought and Texts (Mason Core)	3
ARTH 203	Survey of Asian Art (Mason Core)	3
ARTH 204	Survey of Latin American Art (Mason Core)	3
ARTH 206	Survey of African Art (Mason Core)	3
ARTH 318	Art and Archaeology of Ancient Egypt	3
ARTH 319	Art and Archaeology of the Ancient Near East (Mason Core)	3

[1] Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office (http://chssundergrad.gmu.edu/).

Honors

Honors in the Major

Earth science and geology majors who have completed 16 credits of math and science, including GEOL 302 Mineralogy with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a grade of 'B' or better in GEOL 302 Mineralogy are also eligible. To graduate with honors in Earth Science, students are required to maintain a minimum GPA of 3.00 in math and science courses and complete one of the two following sets of courses with an average GPA of 3.50 or better.

Code	Title	Credits
First Set of Courses		
GEOL 410	Research Proposal Preparation	1
GEOL 411	Geological Research	3
GEOL 420	Earth Science and Policy (Mason Core)	3
Second Set of Courses		
CLIM 408	Senior Research	3
CLIM 409	Research Internship	3
GEOL 420	Earth Science and Policy (Mason Core)	3

Accelerated Master's

Bachelor's Degree (selected)/ Environmental Science and Policy, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain a Green Leaf-designated bachelor's degree and the Environmental Science and Policy, MS (https://catalog.gmu.edu/colleges-schools/science/environmental-policy/environmental-science-policy-ms/) degrees within an accelerated timeframe. Upon completion of this 141 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

The GRE exam is not required for this accelerated master's program.

Students should submit three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor (see Graduate Advisor section below) stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated major or minor may apply to this accelerated master's program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) and CHEM 212 General Chemistry II (Mason Core) and three semesters of biology, including a course in ecology, or the equivalent, for example:

Code	Title	Credits
Select one of the following options:		13
Option 1:		
BIOL 213	Cell Structure and Function (Mason Core)	
BIOL 214	Biostatistics for Biology Majors	
BIOL 308	Foundations of Ecology and Evolution	
Option 2:		
EVPP 210	Environmental Biology: Molecules and Cells	
EVPP 301	Environmental Science: Biological Diversity and Ecosystems	
EVPP 302	Environmental Science: Biomes and Human Dimensions	
EVPP 305	Environmental Microbiology Essentials	
EVPP 306	Environmental Microbiology Essentials Laboratory	
Option 3:		
CONS 401	Conservation Theory	
CONS 402	Applied Conservation	
6 credits of BIOL or CONS electives		

Graduate Advisor

By at least the beginning of their senior year, students should seek out a faculty member in the Department of Environmental Science and Policy who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason University (called "program faculty") can serve as master's advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
EVPP 518	Conservation Biology	3
EVPP 529	Environmental Science Communication	3
EVPP 621	Overview of Biodiversity Conservation	3
EVPP 635	Environment and Society	3

Ocean and Estuarine Science Minor

Banner Code: OES

Dr. Stacey Verardo, Undergraduate Coordinator and Professor

3451 Exploratory Hall
Fairfax Campus

Phone: 703-993-1045
Email: sverardo@gmu.edu
Website: science.gmu.edu/academics/departments-units/atmospheric-oceanic-earth-sciences/majors-minors

This minor is designed for students interested in oceans and coastlines. The fundamental courses include topics in oceanography, physical oceanography, coastal morphology and processes, marine geology, chemical oceanography, and marine ecology.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18-22

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must successfully complete the following coursework with a minimum GPA of 2.00.

Core Requirements

Code	Title	Credits
GEOL 309	Oceanography	3
Select two courses from the following:		6-7
CLIM 412	Physical Oceanography	
GEOL 363	Coastal Morphology and Processes	

or EVPP 363	Coastal Morphology and Processes	
GEOL 364	Marine Geology	
GEOL 458	Chemical Oceanography	
or CHEM 458	Chemical Oceanography	
BIOL 449	Marine Ecology	
Total Credits		9-10

Additional Courses

Code	Title	Credits
Select 9-12 credits from the following: [1]		9-12
CLIM 101	Global Warming: Weather, Climate, and Society (Mason Core)	
CLIM 412	Physical Oceanography	
GEOL 304	Sedimentary Geology	
GEOL 308	Igneous and Metamorphic Petrology	
GEOL 312	Invertebrate Paleontology	
GEOL 363	Coastal Morphology and Processes	
or EVPP 363	Coastal Morphology and Processes	
GEOL 364	Marine Geology	
GEOL 458	Chemical Oceanography	
or CHEM 458	Chemical Oceanography	
BIOL 440	Field Biology (up to 4 credits of only marine or estuarine-oriented field courses)	
BIOL 449	Marine Ecology	
BIOL 450	Marine Conservation	
or EVPP 421	Marine Conservation	
BIOL 454 & BIOL 455	Marine Mammal Biology and Conservation and Marine Mammal Biology and Conservation Field Course [2]	
or EVPP 419 & EVPP 420	Marine Mammal Biology and Conservation and Marine Mammal Biology and Conservation Field Course	
EVPP 350	Freshwater Ecosystems	
EVPP 419 & EVPP 420	Marine Mammal Biology and Conservation and Marine Mammal Biology and Conservation Field Course [2]	
EVPP 536	The Diversity of Fishes	
EVPP 581 & EVPP 582	Estuarine and Coastal Ecology and Estuarine and Coastal Ecology Laboratory [2]	
INTS 495	Field-Based Work (up to 4 credits of only marine or estuarine-oriented field courses)	
Total Credits		9-12

1 Courses taken to satisfy the core requirements above cannot be repeated to count toward the additional courses requirement.

2 If chosen, students must take both the lecture and lab for a total of 4 credits.

Notes

RECR 161 Scuba Diving: Basic is strongly recommended, but is not required.

Paleontology Minor

Banner Code: PLEO

Dr. Stacey Verardo, Undergraduate Coordinator and Professor

3451 Exploratory Hall
Fairfax Campus

Phone: 703-993-1045
Email: sverardo@gmu.edu
Website: science.gmu.edu/academics/departments-units/atmospheric-oceanic-earth-sciences/majors-minors

Students interested in the evolution of life on Earth can take this minor in association with degrees from any field of study across the university. Fundamental courses include historical geology, invertebrate paleontology and vertebrate paleontology.

This has been designated a Green Leaf program.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18-21

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must successfully complete the following coursework with a minimum GPA of 2.00.

Required Core

Code	Title	Credits
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	4
GEOL 312	Invertebrate Paleontology	4
GEOL 334	Vertebrate Paleontology	4
or BIOL 334	Vertebrate Paleontology	
Total Credits		12

Electives

Many of the courses below have additional prerequisites beyond the required core courses above; please check the individual courses carefully.

Code	Title	Credits
Select two courses from the following:		6-9
GEOL 304	Sedimentary Geology	
GEOL 309	Oceanography	
or BIOL 309	Oceanography	
GEOL 332	Paleoclimatology	
GEOL 364	Marine Geology	
BIOL 300	BioDiversity	
BIOL 308	Foundations of Ecology and Evolution	
BIOL 320	Comparative Chordate Anatomy	
BIOL 331	Invertebrate Zoology	
BIOL 377	Applied Ecology	
BIOL 470	Dinosaur Biology	
BIOL 471	Evolution	
EVPP 419	Marine Mammal Biology and Conservation	
GGS 321	Biogeography	
or BIOL 374	Biogeography: Space, Time, and Life	
Total Credits		6-9

Department of Biology

Geraldine Grant, Chair

Phone: 703-993-1050
Website: biology.gmu.edu

Administration

- Geraldine Grant, Chair
- Charles Madden, Assistant Chair
- Deborah Polayes, Director of Undergraduate Studies
- Anne Verhoeven, Director of Medical Laboratory Sciences

The faculty in the Department of Biology is known for teaching excellence. Drs. Madden, Kocache, Forkner, Tondi, and Rockwood have all received teaching awards within the past several years, the latest being a university award presented to Dr. Kocache in May of 2017. Biology is the largest program in the College of Science; there are more than 1,300 students in the major and the department grants degrees to almost 300 students per year. Biology offers a broad spectrum of coursework in the biological sciences to both biology majors and to students in other departments, schools, and colleges.

Undergraduate Programs

The bachelor's degree programs in biology provide a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for a related profession. In addition to ensuring the strong background necessary for graduate study in the many fields of biological science, the broad range of courses available at Mason allow students to develop careers in many areas, including secondary school teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, and natural history. Alternatively, students may prepare for postgraduate studies in medicine, dentistry, veterinary medicine, wildlife management, fisheries biology, or marine science.

The department also offers the Medical Laboratory Science, BS, please visit the program's catalog entry for details.

Additional information can be found at the Department of Biology's website (http://biology.gmu.edu/) or by visiting the department in Exploratory Hall, Suite 1200.

Graduate Programs

The Biology, MS is offered by the School of Systems Biology.
The Department of Biology supports the concentration in Evolutionary Biology within the MS degree. Students interested in this concentration should consult the Department of Biology's website (http://biology.gmu.edu/) for a list of faculty and their research interests.

Student Clubs

A variety of biologically-oriented student clubs are available for students. Each club has its own website; for more information visit the Department of Biology's website (http://biology.gmu.edu/).

Faculty

Department Faculty

Professors

Gillevet, Kocache, Lawrey, Madden, Polayes

Associate Professors

Edwards, Forkner, Grant, Laemmerzahl, Olmo, Tondi, Verhoeven, Weeks

Assistant Professors

Chiari, Crerar, Davis, Epstein, Fondufe, Froelich, Hanley, Hunt, Lim, Luther, Masterson, Scherer

Instructor

Tomson

Adjunct Faculty

Beck, Brown, Buckley-Beason, Einhorn, Hermoso, Holbeck, Hunnell, Jones, Kaushik, Munse, Radosavljevic, Rodriguez, Shirazi, Skacel, Starolis, van der Ham, Veerareddy, Wellner

Affiliate Faculty

Brown, Christacos, Clark, Coggins, Crosier, Dove, Drovetski, Elsheikh, Firmani, Fisher, Gostel, Ito, Karrar, Kiso, Kolowski, Lamoreaux, Lawton, Leimgruber, Lowe, Maldonado, Marra, Master, McKenna, McShea, Mehta, Muletz-Wolz, Pitt, Prado-Oviedo, Pukazhenthi, Shier, Shoemaker, Smith, Songsasen, Spence, Tupper, Valdez, Vandenburg, Vandercone

Affiliated Faculty

Andalibi, Couch, Deluycker, Fox, Lee, Lewis, Freeman, Gilmore, Lessard-Pilon, McNeil, Nix, Perilla, Verardo

Requirements & Policies

Requirements

Advising

All biology majors are strongly encouraged to see an academic advisor regularly to help in planning their schedule so that they can graduate on time. Biology majors should see an advisor for permission to register

prior to their first semester, again after completing 60 credits, and lastly after completing 90 credits.

Medical Laboratory Science, BS majors must see the director of the medical laboratory science program to obtain permission to register each semester.

Students returning from suspension are required to meet with the director of undergraduate studies or designee prior to being allowed to register.

For more information on advising or to set up an appointment, visit the Department of Biology's website (http://biology.gmu.edu/).

Residency Requirement for Transfer Students

Students majoring in biology are required to complete 16 credits in the major at the 300 and 400 levels at Mason in addition to meeting the university residency requirement of at least 30 credits at Mason.

Policies

Policy on Using Biology Program Laboratories

Only authorized experiments and exercises may be carried out in any research or teaching laboratory and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Policy on Using Organisms in Classes

Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated as “writing intensive” in their majors at the 300-level or above. Students majoring in biology fulfill this requirement by successfully completing BIOL 308 Foundations of Ecology and Evolution. Medical laboratory science majors fulfill the requirement by completing MLAB 300 Science Writing.

Minor in Biology

Information about this minor can be found in the Biology Minor’s catalog entry.

Premedical, Predental, Prepharmacy, and Preveterinary Students

Web: prehealth.gmu.edu (http://prehealth.gmu.edu/)

Many students planning to enter medical, dental, pharmacy, veterinary, optometry, or other health professional schools choose to pursue a major in biology. These students should consult the health professions advising web site on required coursework and overall preparation.

Teacher Licensure

Students who wish to become teachers should pursue either the Biology, BA or the Biology, BS in addition to obtaining teaching certificates through the College of Education and Human Development. For more information, visit the Graduate School of Education’s website (https://gse.gmu.edu/).

Biology for Non-majors

Students who are not majoring in science or mathematics and wish to fulfill their natural science requirement may enroll in the biology classes listed in the Mason Core Natural Science section. Chemistry, physics, and mathematics majors should consult with their faculty advisor to determine which biology courses to take.

Academic Advising

1200 Exploratory Hall
Fairfax Campus

Website: biology.gmu.edu/academics/degree-programs/

The Bachelor of Arts in Biology provides a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for related professions. The program provides the strong background necessary for not only for graduate study in the life sciences, but also enables students to develop careers in a wide variety of disciplines, including teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, wildlife management, fisheries biology, and marine science. Furthermore, our curriculum prepares students for careers in the health sciences including medicine, dentistry, veterinary science, and related allied health disciplines.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core. Students in this bachelor's program must also complete the additional College Requirements for the BA Degree (see Requirements).

The writing intensive requirement is fulfilled by BIOL 308 Foundations of Ecology and Evolution. Transfer students who have transferred in BIOL 308 Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take MLAB 300 Science Writing to meet the writing intensive requirement.

Important information and departmental policies are listed with the Department of Biology.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Important Program Requirements

Students must complete the degree requirements with:

- A minimum GPA of 2.00 in the BIOL courses listed in the degree program
- A minimum GPA of 2.00 in the supporting courses listed in the degree program

Additionally:

- Students may apply no more than 4 credits of BIOL 103 Introductory Biology II-Survey of Cell and Molecular Biology (Mason Core) or BIOL 107 Intro Biology II Lecture (Mason Core) and BIOL 106 Introductory Biology II Laboratory (Mason Core) toward elective credit (or equivalent transfer credit at the 100 to 200-level) if taken before the successful completion of BIOL 213 Cell Structure and Function (Mason Core).
- Biology majors must earn a minimum grade of 'C' in all of the biology core courses. A grade of 'C' or better must be earned in BIOL 213 Cell Structure and Function (Mason Core) in order to advance to other core requirements.
- Students may repeat BIOL 213 Cell Structure and Function (Mason Core) once, but a second time only with permission of the Department of Biology.
- Students may **not** count BIOL 124 Human Anatomy and Physiology and/or BIOL 125 Human Anatomy and Physiology toward any biology major requirement.
- Students who take BIOL 300 BioDiversity may **not** count BIOL 303 Animal Biology and/or BIOL 304 Plant Biology toward any biology major requirement.
- BIOL 308 Foundations of Ecology and Evolution meets the writing intensive requirement for this major. Transfer students who have transferred in BIOL 308 Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take MLAB 300 Science Writing to meet the writing intensive requirement.
- BIOL 493 Honors Research in Biology, BIOL 495 Directed Studies in Biology, and BIOL 497 Special Problems in Biology do not satisfy the requirements of the BA degree which state that students must complete at least one upper division course that includes a laboratory. The courses do, however, count as non-laboratory electives. The total limit for BIOL 493 Honors Research in Biology, BIOL 495 Directed Studies in Biology and BIOL 497 Special Problems in Biology combined is 3 credits toward 32 credits for the BA.

Teacher Licensure

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the Secondary Education - Biology (6-12) Undergraduate Certificate offered by the College of Education and Human Development as an option in seeking an initial Virginia teaching license.

Other routes to licensure include the Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Biology Concentration) or select traditional Master's programs. Please contact the undergraduate advisor in the College of Education and Human Development for more information.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Biology, BA majors are required to complete the following coursework with the option of also completing the Biological Illustration Concentration.

Biology Core Courses

Code	Title	Credits
BIOL 213	Cell Structure and Function (Mason Core)	4
BIOL 214	Biostatistics for Biology Majors	4
BIOL 300	BioDiversity	4
BIOL 308	Foundations of Ecology and Evolution [1]	5
BIOL 311	General Genetics	4
Total Credits		21

[1] Fulfills the writing intensive requirement.
Transfer students who have transferred in BIOL 308 Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take MLAB 300 Science Writing to meet the writing intensive requirement.

Biology Electives

Code	Title	Credits
Complete 11 credits of additional biology courses [1]		11

[1] Of which, at least 7 credits must be upper division, and at least one of these upper division courses must include a laboratory.

Chemistry

Code	Title	Credits
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core) (Natural Science course)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core) (Natural Science course)	4
Total Credits		8

Math

Code	Title	Credits
Select one from the following:		3-6
MATH 111	Linear Mathematical Modeling (Mason Core) (Quantitative Reasoning courses)	
or MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 123 & MATH 124	Calculus with Algebra/Trigonometry, Part A and Calculus with Algebra/Trigonometry, Part B (Mason Core)	
Total Credits		3-6

Computer Science

Code	Title	Credits
Select one from the following:		3
CDS 130	Computing for Scientists [1]	
Any course(s) that fulfills the Mason Core: Information Technology requirement

[1] Recommended by the Department of Biology

Natural Science

Code	Title	Credits
Select 6-7 credits from the following Mason Core: Natural Science courses:		6-7
ASTR 103	Astronomy (Mason Core)	
ASTR 111	The Solar System (Mason Core)	
ASTR 113	Stars, Galaxies, and the Universe (Mason Core)	
GEOL 101	Introductory Geology I (Mason Core)	
GEOL 102	Historical Geology (Mason Core)	
PHYS 160	University Physics I (Mason Core)	
PHYS 243	College Physics I (Mason Core)	
PHYS 245	College Physics II (Mason Core)	
PHYS 260	University Physics II (Mason Core)	
Total Credits		6-7

Concentration in Biological Illustration (BIOI)

This optional concentration consists of a selection of courses designed to address the needs and interests of students who wish to study biology and simultaneously have the aptitude to draw, animate, or design art for textbooks, videos, papers, etc. This concentration has significant biology, chemistry, and physics components like all biology majors, and includes art classes that will prepare students for the opportunity to use their love of biology and art in one degree.

Code	Title	Credits
AVT 180	New Media in the Creative Arts	3
AVT 222	Drawing I (Mason Core)	3
AVT 385	EcoArt (Mason Core)	3
or AVT 497	Senior Project (Mason Core)	
Choose 12 additional art credits from the following courses:		12
AVT 323	Drawing II	
AVT 324	Figure Drawing	
AVT 327	Illustration	
AVT 328	Mixed Media	
AVT 382	2D Experimental Animation	
AVT 383	3D Experimental Animation	
AVT 422	Drawing III	
Total Credits		21

Note for Students Expecting to Enter Graduate or Professional School

Students expecting to enter graduate or professional school are strongly encouraged to complete:

Code	Title	Credits
MATH 113 & MATH 114	Analytic Geometry and Calculus I (Mason Core) and Analytic Geometry and Calculus II	8

CHEM 313 & CHEM 315	Organic Chemistry I and Organic Chemistry Lab I	5
CHEM 314 & CHEM 318	Organic Chemistry II and Organic Chemistry Lab II	5
PHYS 243 & PHYS 244	College Physics I (Mason Core) and College Physics I Lab (Mason Core)	4
PHYS 245 & PHYS 246	College Physics II (Mason Core) and College Physics II Lab (Mason Core)	4

Mason Core and Elective Requirements

In order to meet a minimum of 120 credits, this degree requires an additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees (refer to AP.5.3.2), College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 64-68 credits
- BIOI concentration: 43-47 credits

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

College Requirements for the BA Degree

In addition to the program requirements and the Mason Core requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

1. PHIL 323 Classical Western Political Theory and PHIL 324 Modern Western Political Theory may not be used to fulfill this requirement.

Social and Behavioral Sciences

Choose one approved Mason Core: Social and Behavioral Sciences course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST[1], LING, PSYC, or SOCI, and the following GGS courses:

Code	Title	Credits
Select any course from the disciplines above or select from the following GGS courses:		3
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	
Total Credits		3

1. HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core)may not be used to fulfill this requirement.

Natural Science

Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits[1]. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience[2].

Code	Title	Credits
Select an additional Mason Core Natural Science course		1

1 For Geography, BA majors, this extra credit is not required.

2 BIOL 124 Human Anatomy and Physiology and BIOL 125 Human Anatomy and Physiology may not be used to fulfill this requirement.

Foreign Language

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202 (https://catalog.gmu.edu/colleges-schools/humanities-social-sciences/modern-classical-languages/) (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. A three course sequence in American Sign Language (EDSE 115 (https://catalog.gmu.edu/search/?P=EDSE%20115) American Sign Language (ASL) I, EDSE 116 (https://catalog.gmu.edu/search/?P=EDSE%20116) American Sign Language (ASL) II, and EDSE 219 (https://catalog.gmu.edu/search/?P=EDSE%20219) American Sign Language (ASL) III) will also meet the foreign language requirement. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Academic and Student Affairs (http://cosundergrad.gmu.edu/).

Non-Western Culture

Choose one approved Non-Western Culture Requirement[1] course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any *other* requirements (Mason Core requirements, college-level requirements, or requirements for the major).

Code	Title	Credits
Select 3 credits from approved Non-Western Culture courses if a waiver isn't applicable:		0-3
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	3
ANTH 381	Medical Anthropology	3
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core)	3
ARAB 360	Topics in Arabic Cultural Production	3
ARAB 420	Survey of Arabic Literature	3
ARAB 440	Topics in Arabic Religious Thought and Texts (Mason Core)	3
ARTH 203	Survey of Asian Art (Mason Core)	3
ARTH 204	Survey of Latin American Art (Mason Core)	3
ARTH 206	Survey of African Art (Mason Core)	3
ARTH 318	Art and Archaeology of Ancient Egypt	3
ARTH 319	Art and Archaeology of the Ancient Near East (Mason Core)	3
ARTH 320	Art of the Islamic World (Mason Core)	3
ARTH 382	Arts of India (Mason Core)	3
ARTH 383	Arts of Southeast Asia (Mason Core)	3
ARTH 384	Arts of China (Mason Core)	3
ARTH 385	Arts of Japan (Mason Core)	3
ARTH 386	The Silk Road (Mason Core)	3
ARTH 482	RS: Advanced Studies in Asian Art	3
CHIN 318	Introduction to Classical Chinese (Mason Core)	3
CHIN 320	Contemporary Chinese Film	3
CHIN 325	Major Chinese Writers (Mason Core)	3
CHIN 470	Special Topics in Chinese Studies	3
DANC 118	World Dance (Mason Core)	3
ECON 361	Economic Development of Latin America (Mason Core)	3
ECON 362	African Economic Development (Mason Core)	3
FREN 451	Topics in Sub-Saharan Francophone Literature and Culture	3
FREN 454	Topics in Caribbean Francophone Literature and Culture	3

RELI 379	Islamic Law, Society, and Ethics	3
RELI 387	Islam, Democracy, and Human Rights	3
RELI 490	Comparative Study of Religions (Mason Core)	3
RUSS 353	Russian Civilization (Mason Core)	3
RUSS 354	Contemporary Post-Soviet Life (Mason Core)	3

[1] Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office (http://chssundergrad.gmu.edu/).

Honors

Honors in the Major

Admissions

Minimum requirements for invitation:

- GPA in biology courses must be 3.33 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of 'B' or better in BIOL 213 Cell Structure and Function (Mason Core)

Students should apply for admission to the Honors Program during their first or second year at the university. Contact the Department of Biology for information on applying.

Retention Requirements

Students in honors biology must maintain a biology GPA of 3.33 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

Requirements to Graduate with Biology Honors

Students are required to take 6 to 8 credits in honors courses in BIOL including three semesters of BIOL 494 Honors Seminar in Biology or two semesters of BIOL 494 Honors Seminar in Biology and one semester of BIOL 493 Honors Research in Biology. BIOL 498 Research Seminar may count toward one of the semester requirements of BIOL 494 Honors Seminar in Biology. The GPA requirements are as follows:

- Minimum 3.33 GPA in honors biology courses
- Minimum 3.33 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
- Minimum 3.00 GPA overall

Accelerated Master's

Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Biology Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA or BS in Biology (degree without concentration) and an MEd in Curriculum and Instruction

(Secondary Education Biology concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/) in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered jointly by the Biology Undergraduate Program and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
EDUC 547	Scientific Inquiry and the Nature of Science	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 573	Teaching Science in the Secondary School	3
SEED 673	Advanced Methods of Teaching Science in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Biology, BS

Banner Code: SC-BS-BIOL

Academic Advising

1200 Exploratory Hall
Fairfax Campus

Website: biology.gmu.edu/academics/degree-programs/

The Bachelor of Science in Biology provides a sound liberal arts education with substantial experience in quantitative and analytical thought, along with preparation for related professions. The program provides the strong background necessary for not only graduate study in the life sciences, but also enables students to develop careers in a wide variety of disciplines, including teaching, environmental management, microbiology, molecular biology, biotechnology, genetics, wildlife management, fisheries biology, and marine science. Furthermore, our curriculum prepares students for careers in the health sciences including medicine, dentistry, veterinary science, and related allied health disciplines.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Undergraduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

Important information and departmental policies are listed in the Department of Biology.

BIOL 308 Foundations of Ecology and Evolution meets the writing intensive requirement for this major. Transfer students who have transferred in BIOL 308 Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take MLAB 300 Science Writing to meet the writing intensive requirement.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Important Program Requirements

- Students may apply no more than 8 credits of BIOL 103 Introductory Biology II-Survey of Cell and Molecular Biology (Mason Core) or BIOL 107 Intro Biology II Lecture (Mason Core) and BIOL 106

Introductory Biology II Laboratory (Mason Core) toward elective credit (or equivalent transfer credit at the 100 to 200-level) if taken before successful completion of BIOL 213 Cell Structure and Function (Mason Core).

- Biology majors must earn a minimum grade of 'C' in all biology core courses. A grade of 'C' or better must be earned in BIOL 213 Cell Structure and Function (Mason Core) in order to advance to other core requirements.
- Students may repeat BIOL 213 Cell Structure and Function (Mason Core) once, but a second time only with permission from the Department of Biology.
- Students may **not** count BIOL 124 Human Anatomy and Physiology and/or BIOL 125 Human Anatomy and Physiology toward any biology major requirement.
- Students who take BIOL 300 BioDiversity may **not** count BIOL 303 Animal Biology and/or BIOL 304 Plant Biology toward any biology major requirement.
- 44 credits must be in biology coursework.
- BIOL 493 Honors Research in Biology, BIOL 495 Directed Studies in Biology, and BIOL 497 Special Problems in Biology do not satisfy the requirements of the BS degree which state that students must complete at least two upper division courses that include a laboratory. The courses do, however, count as non-laboratory electives. The total limit for BIOL 493 Honors Research in Biology, BIOL 495 Directed Studies in Biology, and BIOL 497 Special Problems in Biology combined is 6 credits toward the 44 credits required for the BS.

Several optional concentrations are available; details on each can be found in the Requirements tab.

Teacher Licensure

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the Secondary Education - Biology (6-12) Undergraduate Certificate offered by the College of Education and Human Development as an option in seeking an initial Virginia teaching license.

Other routes to licensure include the Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Biology Concentration) or select traditional Master's programs. Please contact the College of Education and Human Development for more information.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete their biology coursework and the supporting requirements which follow with a minimum GPA of 2.00.

All students must complete the Core Courses listed below. Students then elect to complete the BS degree either with a concentration or without a concentration.

Core Courses

Code	Title	Credits
Biology		
BIOL 213	Cell Structure and Function (Mason Core)	4
BIOL 214	Biostatistics for Biology Majors	4
BIOL 300	BioDiversity	4
BIOL 308	Foundations of Ecology and Evolution [1]	5
BIOL 311	General Genetics	4
Chemistry		
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	4
CHEM 313 & CHEM 315	Organic Chemistry I and Organic Chemistry Lab I	5
Physics		
Select from one of the following Mason Core Natural Science sequences:		8
PHYS 160 & PHYS 161 & PHYS 260 & PHYS 261	University Physics I (Mason Core) and University Physics I Laboratory (Mason Core) and University Physics II (Mason Core) and University Physics II Laboratory (Mason Core)	
PHYS 243 & PHYS 244 & PHYS 245 & PHYS 246	College Physics I (Mason Core) and College Physics I Lab (Mason Core) and College Physics II (Mason Core) and College Physics II Lab (Mason Core)	
Mathematics		
Select one from the following:		3-6
MATH 111	Linear Mathematical Modeling (Mason Core)	
or MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 123 & MATH 124	Calculus with Algebra/Trigonometry, Part A and Calculus with Algebra/Trigonometry, Part B (Mason Core)	
Computer Science		
Select one from the following:		3
CDS 130	Computing for Scientists [2]	
Any course(s) that fulfills the Mason Core: Information Technology requirement		
Total Credits		48-51

[1] Fulfills writing intensive requirement.
Transfer students who have transferred in BIOL 308 Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take MLAB 300 Science Writing to meet the writing intensive requirement.

[2] Recommended by the Department of Biology.

BS without Concentration

Students who do not select an optional concentration must complete the biology core and shared courses shown above in addition to the curriculum requirements listed below.

Code	Title	Credits
Biology Electives		
Complete 23 credits of additional biology courses [1]		23
Additional Science Courses		
Students are encouraged to consult with a biology faculty advisor to determine which option (A, B, or C) best meets their career goals. Select one from the following options:		3-8
Option A:		
CHEM 314 & CHEM 318	Organic Chemistry II and Organic Chemistry Lab II	
Option B:		
One 3 credit chemistry course at the 300 or 400-level (not CHEM 314)		
Option C:		
GEOL 101	Introductory Geology I (Mason Core) (Natural Science courses)	
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	
Total Credits		26-31

Note:
Students expecting to enter a professional school are strongly encouraged to complete MATH 113 Analytic Geometry and Calculus I (Mason Core).

[1] Of which, at least 15 credits must be upper division, and at least two of the upper division courses must include a laboratory.

Concentration in Bioinformatics (BNF)

The highly interdisciplinary field of bioinformatics has emerged as a powerful modern science. There is a great demand for undergraduate and graduate-level trained individuals with a background in bioinformatics in industry as well as in academia.

Code	Title	Credits
Computer Science		**3**
Please note: CDS 130 is recommended to fulfill the Computer Science requirement in the shared core above.		
CDS 230	Modeling and Simulation I	
Bioinformatics		**6**
BINF 401	Bioinformatics and Computational Biology I	
BINF 402	Bioinformatics and Computational Biology II	
Biology		**14-16**
BIOL 312	Biostatistics for Bioinformatics	
BIOL 401	Phage Discovery	
BIOL 412	Phage Genomics	
Biology Lab Elective		
Select one from the following:		
BIOL 305 & BIOL 306	Biology of Microorganisms and Biology of Microorganisms Laboratory	
BIOL 320	Comparative Chordate Anatomy	
BIOL 322 & BIOL 323	Developmental Biology and Lab for Developmental Biology	
BIOL 331	Invertebrate Zoology	
BIOL 332	Insect Biology	
BIOL 334	Vertebrate Paleontology	
BIOL 336	Invertebrate Paleontology	
BIOL 344	Plant Diversity and Evolution	
BIOL 345	Plant Ecology	
BIOL 350	Freshwater Ecosystems	
BIOL 355	Ecological Engineering and Ecosystem Restoration	
BIOL 379	RS: Ecological Sustainability (Mason Core)	
BIOL 385 & BIOL 486	Biotechnology and Genetic Engineering and Molecular Biology and Biotechnology Laboratory	
BIOL 405	Microbial Genetics	
BIOL 407	Microbial Diversity	
BIOL 430	Advanced Human Anatomy and Physiology I	
BIOL 431	Advanced Human Anatomy and Physiology II	
BIOL 437	Orinthology	
BIOL 438	Mammalogy	
BIOL 439	Herpetology	
BIOL 452 & BIOL 453	Immunology and Immunology Laboratory	
BIOL 454 & BIOL 455	Marine Mammal Biology and Conservation and Marine Mammal Biology and Conservation Field Course	
BIOL 465	Histology	
BIOL 468	Vertebrate Natural History	
BIOL 472 & BIOL 473	Introductory Animal Behavior and Introductory Laboratory in Animal Behavior	
BIOL 484 & BIOL 485	Cell Signaling and Disease and Cell Signaling Laboratory	
BIOL 509 & BIOL 510	DNA Analysis of Biological Evidence and Forensic DNA Analysis Laboratory	
BIOL 543	Tropical Ecosystems	
Additional Science Courses		
Select one from the following options: [1]		3-8
Option A:		
CHEM 314	Organic Chemistry II	
CHEM 318	Organic Chemistry Lab II	
Option B:		
One 3 credit chemistry course at the 300 or 400-level [2]		
Option C:		
GEOL 101	Introductory Geology I (Mason Core)	

GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	
Total Credits		26-33

[1] Students are encouraged to consult with a biology advisor to determine which option (A, B, or C) best meets their career goals.

[2] CHEM 314 Organic Chemistry II does not fulfill this requirement.

Concentration in Biopsychology (BP)

The biopsychology concentration consists of a selection of courses designed to address the needs and interest of students who wish to study biology in more depth while simultaneously exploring psychology and neurobiology. This concentration will help prepare students for the MCAT section related to psychology and provide veterinary students with a background in animal learning/behavior.

Code	Title	Credits
Biopsychology Courses		
BIOL 430	Advanced Human Anatomy and Physiology I	4
BIOL 431	Advanced Human Anatomy and Physiology II	4
PSYC 372	Biopsychology	3
PSYC 373	Biopsychology Laboratory	2
Additional Psychology/Neuroscience Course		
Select 3-4 credits from the following:		3-4
PSYC 304	Principles of Learning	
PSYC 376	Brain and Behavior	
PSYC 406	Psychology of Communication (Mason Core)	
NEUR 327	Cellular, Neurophysiological, and Pharmacological Neuroscience	
NEUR 335	Molecular, Developmental, and Systems Neuroscience	
Additional Biology Courses		
Select 7-8 credits from the following:		7-8
BIOL 305	Biology of Microorganisms	
BIOL 306	Biology of Microorganisms Laboratory	
BIOL 314	Introduction to Research Design and Analysis	
BIOL 322	Developmental Biology	
BIOL 323	Lab for Developmental Biology	
BIOL 437	Orinthology	
BIOL 438	Mammalogy	
BIOL 472	Introductory Animal Behavior	
BIOL 473	Introductory Laboratory in Animal Behavior	
BIOL 483	General Biochemistry	
Additional Chemistry Courses		
Select one from the following options: [1]		3-5
Option A:		
CHEM 314 & CHEM 318	Organic Chemistry II and Organic Chemistry Lab II	
Option B:		
One chemistry course at the 300 or 400-level [2]		
Total Credits		26-30

[1] Students are encouraged to consult with a biology faculty advisor to determine which option best meets their career goals.

[2] CHEM 314 Organic Chemistry II alone does not fulfill this requirement.

Concentration in Biotechnology and Molecular Biology (BTMB)

The biotechnology and molecular biology concentration consists of a selection of courses that provide essential skills to students who seek employment in the field or wish to include an applied component in their undergraduate training in biology.

Code	Title	Credits
Biotechnology Courses		
BIOL 305	Biology of Microorganisms	3
BIOL 306	Biology of Microorganisms Laboratory	1
BIOL 385	Biotechnology and Genetic Engineering	3
BIOL 483	General Biochemistry	4
Additional Biology Courses		
Select 12 credits from the following, at least one of the courses must include a laboratory:		12
Laboratory Courses:		
BIOL 402 & BIOL 403	Applied and Industrial Microbiology and Techniques in Applied and Industrial Microbiology	
BIOL 405	Microbial Genetics	
BIOL 452 & BIOL 453	Immunology and Immunology Laboratory	
BIOL 465	Histology	
BIOL 486	Molecular Biology and Biotechnology Laboratory	
Non-laboratory Courses:		
BIOL 314	Introduction to Research Design and Analysis	
BIOL 382	Introduction to Virology	
BIOL 401	Phage Discovery	
BIOL 411	Advanced General Genetics	
BIOL 412	Phage Genomics	
BIOL 417	Selected Topics in Molecular and Cellular Biology [1]	
BIOL 418	Current Topics in Microbiology [1]	
BIOL 420	Vaccines	
BIOL 421	Genetics of Human Diseases	
BIOL 422	Stem Cell Biology and Regenerative Medicine	
BIOL 482	Introduction to Molecular Genetics	
BIOL 484	Cell Signaling and Disease	
BIOL 497	Special Problems in Biology [1]	
Additional Chemistry Courses		
CHEM 314	Organic Chemistry II	3

CHEM 318	Organic Chemistry Lab II	2
Total Credits		28

[1] Registration for BIOL 417 Selected Topics in Molecular and Cellular Biology, BIOL 418 Current Topics in Microbiology, or BIOL 497 Special Problems in Biology is subject to approval by the Director of Undergraduate Studies and the Chair of the Department of Biology.

Concentration in Environmental and Conservation Biology (ESCB)

This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology. The concentration is staffed and supported by the Department of Environmental Science and Policy.

Code	Title	Credits
Environmental and Conservation Biology		
BIOL 318	Conservation Biology	3
BIOL 377	Applied Ecology	3
Biology Electives		
Select 17 credits from the following: [1]		17
BIOL 309	Oceanography	
BIOL 314	Introduction to Research Design and Analysis	
BIOL 326	Animal Physiology	
BIOL 331	Invertebrate Zoology	
BIOL 332	Insect Biology	
BIOL 344	Plant Diversity and Evolution	
BIOL 345	Plant Ecology	
BIOL 350	Freshwater Ecosystems	
BIOL 355	Ecological Engineering and Ecosystem Restoration	
BIOL 378	Applied Ecology Laboratory	
BIOL 379	RS: Ecological Sustainability (Mason Core)	
BIOL 437	Orinthology	
BIOL 438	Mammalogy	
BIOL 439	Herpetology	
BIOL 440	Field Biology	
BIOL 446	Ecological and Evolutionary Physiology	
BIOL 449	Marine Ecology	
BIOL 450	Marine Conservation	
BIOL 454	Marine Mammal Biology and Conservation	
BIOL 455	Marine Mammal Biology and Conservation Field Course	
BIOL 457	Reproductive Strategies	
BIOL 459	Fungi and Ecosystems	
BIOL 468	Vertebrate Natural History	
BIOL 472 & BIOL 473	Introductory Animal Behavior and Introductory Laboratory in Animal Behavior	
BIOL 480	The Diversity of Fishes	
BIOL 497	Special Problems in Biology [4]	
Additional Science Courses		
Select one from the following options: [2]		3-8
Option A:		
CHEM 314 & CHEM 318	Organic Chemistry II and Organic Chemistry Lab II	
Option B:		
One chemistry course at the 300 or 400-level [3]		
Option C:		
GEOL 101	Introductory Geology I (Mason Core)	
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	
Total Credits		26-31

[1] Of which, two courses must be selected from the list above and must have either: 2 laboratory courses or 1 laboratory course and 1 field course (consult with an advisor for guidance).

[2] Students are encouraged to consult with a biology faculty advisor to determine which option best meets their career goals.

[3] CHEM 314 Organic Chemistry II alone does not fulfill this requirement.

[4] Registration in BIOL 497 Special Problems in Biology is subject to approval by the Director of Undergraduate Studies and the Chairman of the Department of Biology.

Concentration in Microbiology (MIB)

This concentration offers lecture and laboratory courses in microbiology to prepare students for employment or advanced study in microbial genetics, physiology, diversity, and related fields.

Code	Title	Credits
Microbiology Courses		
BIOL 305	Biology of Microorganisms	3
BIOL 306	Biology of Microorganisms Laboratory	1
BIOL 405	Microbial Genetics	4
BIOL 407	Microbial Diversity	4
Biology Electives		
Select 11 credits from the following:		11
BIOL 314	Introduction to Research Design and Analysis	
BIOL 382	Introduction to Virology	
BIOL 385	Biotechnology and Genetic Engineering	
BIOL 401	Phage Discovery	
BIOL 402	Applied and Industrial Microbiology	
BIOL 403	Techniques in Applied and Industrial Microbiology	
BIOL 404	Medical Microbiology	
BIOL 412	Phage Genomics	
BIOL 418	Current Topics in Microbiology	
BIOL 420	Vaccines	
BIOL 452	Immunology	
BIOL 453	Immunology Laboratory	
BIOL 459	Fungi and Ecosystems	
BIOL 483	General Biochemistry	

Additional Chemistry Courses		
CHEM 314	Organic Chemistry II	3
CHEM 318	Organic Chemistry Lab II	2
Total Credits		28

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-3-2), and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 38-46 credits
- BNF concentration: 36-46 credits
- BP concentration: 39-46 credits
- BTMB concentration: 41-44 credits
- ESCB concentration: 38-46 credits
- MIB concentration: 41-44 credits

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

Honors

Honors in the Major

Admissions

Minimum requirements for invitation:

- GPA in biology courses must be 3.33 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of 'B' or better in BIOL 213 Cell Structure and Function (Mason Core)

Students should apply for admission to the Honors Program during their first or second year at the university. Contact the Department of Biology for information on applying.

Retention Requirements

Students in honors biology must maintain a biology GPA of 3.33 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

Requirements to Graduate with Biology Honors

Students are required to take 6 to 8 credits in honors courses in BIOL including three semesters of BIOL 494 Honors Seminar in Biology or two semesters of BIOL 494 Honors Seminar in Biology and one semester of BIOL 493 Honors Research in Biology. BIOL 498 Research Seminar may count towards one of the semester requirements of BIOL 494 Honors Seminar in Biology. The GPA requirements are as follows:

- Minimum 3.33 GPA in honors biology courses
- Minimum 3.33 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
- Minimum 3.00 GPA overall

Accelerated Master's

Biology, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Biology Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA or BS in Biology (degree without concentration) and an MEd in Curriculum and Instruction (Secondary Education Biology concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/) in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered jointly by the Biology Undergraduate Program and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
EDUC 547	Scientific Inquiry and the Nature of Science	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 573	Teaching Science in the Secondary School	3
SEED 673	Advanced Methods of Teaching Science in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Biology, BS/Biology, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Biology, BS and the Biology, MS degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

GRE scores are not required for students in this accelerated program.

Successful applicants will have an overall undergraduate GPA of at least 3.10. Additionally, they will have completed the following courses with a GPA of 3.00 or higher[2]:

Code	Title	Credits
BIOL 213	Cell Structure and Function (Mason Core)	4
BIOL 214	Biostatistics for Biology Majors	4
BIOL 300	BioDiversity [1]	4
or BIOL 311	General Genetics	
CHEM 313 & CHEM 315	Organic Chemistry I and Organic Chemistry Lab I [2]	5

1. Students should speak with an advisor to choose the course most appropriate for their post-graduation goals.
2. Grades of 2.50 in CHEM 313 Organic Chemistry I and CHEM 315 Organic Chemistry Lab I are acceptable for admission into this accelerated pathway.

Accelerated Option Requirements

After the completion of 60 undergraduate credits, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/).

At the completion of 75 undergraduate credits, students may begin completing up to 12 credits of graduate coursework that will count toward their bachelor's and master's.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
BIOL 508	Selected Topics in Animal Biology (When the topic is "Research and Development in a Biotechnological Company")	1-4
BIOL 682	Advanced Eukaryotic Cell Biology	3
BIOL 689	Interdisciplinary Tools in the Biosciences	3
BIOL 690	Introduction to Graduate Studies in Biology	1-2
BIOL 695	Seminar in Molecular, Microbial, and Cellular Biology	1

Bachelor's Degree (selected), Bioinformatics Management, Accelerated PSM

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/), or the Chemistry, BS, or the Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/), or the Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/), or the Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/) and the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students in the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/); Chemistry, BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/); Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/); Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/); or Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) with an overall GPA of at least 3.00 in their last 60 credits are welcome to apply to the Bioinformatics Management, PSM accelerated master's program. Applicants to this accelerated master's should have previously taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

The GRE requirement is waived for students accepted into this accelerated program.

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following

conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
BINF 630	Bioinformatics Methods	3
BINF 631	Molecular Cell Biology for Bioinformatics	3
BINF 702	Biological Data Analysis	3
GBUS 738	Data Mining for Business Analytics	3
or MBA 738	Data Mining for Business Analytics	

Career Changer's Biological Sciences Undergraduate Certificate

Banner Code: SC-CERB-CCBS

Academic Advising

1200 Exploratory Hall
Fairfax Campus

Website: biology.gmu.edu/academics/degree-programs/

Post-baccalaureate students are invited to enroll in this unique certificate opportunity. By completing this certificate, students will be qualified to apply for most graduate programs in the biological sciences including medical, dental, optometry, podiatry, pharmacy, and veterinary schools. However, undergraduate coursework requirements for admission into graduate and professional schools can vary; it is prudent to check the coursework requirements for each individual school.

This certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Additionally, admission into this certificate requires:

- The desire to pursue a career in biological sciences or the health professions (research, medicine, dentistry, teaching, law, etc.)
- A conferred bachelor's degree from a regionally accredited institution with a GPA of 3.00 or higher
- A completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/) along with a the appropriate application fee
- Two sets of official transcripts from each institution attended

Standardized test scores are not required.

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Some courses can be waived if previously taken during undergraduate training. Substitutions will be recommended where appropriate.

Certificate Fees

In addition to tuition and the usual laboratory and College of Science fees, a fee of $500 per semester will be assessed to defray the costs of the outside speakers and the additional administrative work associated with this certificate.

Notes

- Each student must see an advisor in the Department of Biology prior to registration each semester.
- The program will normally take four semesters to complete for a full-time student.
- It is recommended that students interested in healthcare professions do the following:
  - Register for the HEALTHPROFESSIONSADVISOR listserv (http://prehealth.gmu.edu/listserv/);
  - Attend at least one group advising session conducted by the Health Professions Advisor (http://prehealth.gmu.edu/); and
  - Consider participating in Health Professions Advising (http://prehealth.gmu.edu/) activities designed for students in a relevant application cycle

Requirements

Certificate Requirements

Total credits: 63-64

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

To earn this certificate, a student must pass all of the courses listed below with a grade no lower than 'B-' and achieve a GPA of at least 3.40.

Cell Biology, Biostatistics, and Genetics

Code	Title	Credits
BIOL 213	Cell Structure and Function (Mason Core)	4
BIOL 214	Biostatistics for Biology Majors	4

BIOL 311	General Genetics	4
Total Credits		12

Additional Upper-level Biology

Code	Title	Credits
Select three additional 300, 400, or 500-level BIOL courses (with the exception of BIOL 300) in consultation with an academic advisor.		12
Total Credits		12

General Chemistry

Code	Title	Credits
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	4
Total Credits		8

Organic Chemistry and Biochemistry

Code	Title	Credits
BIOL 483	General Biochemistry	4
CHEM 313 & CHEM 315	Organic Chemistry I and Organic Chemistry Lab I	5
CHEM 314 & CHEM 318	Organic Chemistry II and Organic Chemistry Lab II	5
Total Credits		14

Physics

Code	Title	Credits
PHYS 243 & PHYS 244	College Physics I (Mason Core) and College Physics I Lab (Mason Core)	4
PHYS 245 & PHYS 246	College Physics II (Mason Core) and College Physics II Lab (Mason Core)	4
Total Credits		8

Psychology and Sociology

Code	Title	Credits
Select 6 credits of psychology and/or sociology courses in consultation with the biology advisor.		6
Total Credits		6

Mathematics

Code	Title	Credits
MATH 111	Linear Mathematical Modeling (Mason Core) [1]	3-4
or MATH 113	Analytic Geometry and Calculus I (Mason Core)	
Total Credits		3-4

[1] Calculus is recommended, but not required.

Career Seminars

These seminars will be organized each semester and will feature outside speakers from a wide variety of biologically-oriented professions.

Medical Laboratory Science, BS

Banner Code: SC-BS-MLAB

Academic Advising

1200 Exploratory Hall
Fairfax Campus

Website: biology.gmu.edu/academics/degree-programs/

The BS in Medical Laboratory Science prepares students for careers in hospitals and clinics as well as in biotechnology and industrial laboratories. Medical Laboratory Science (MLS) is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on blood, other body fluids, or tissue samples. This is a critical part of health care, as the results obtained by these laboratory tests are vital tools for physicians in the diagnosis, treatment, and prevention of disease.

People trained as medical laboratory scientists may work in a variety of settings. Many work in clinical laboratories in large medical centers, hospitals, or clinics. Some do research in industrial, public health, or medical laboratories. Others teach in hospitals, colleges, or universities. An MLS may practice as a generalist, using knowledge in several of the scientific disciplines, or may specialize in one scientific area in larger hospitals. A successful MLS is an individual who enjoys studying the biological, chemical, and physical sciences. He or she may also find personal satisfaction and intellectual reward in applying scientific methods to the diagnosis and evaluation of disease.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core[1].

MLAB 300 Science Writing fulfills this major's writing intensive requirement.

Important information and departmental policies are available with the Department of Biology.

This program requires the equivalent of three years of full-time pre-professional study at the college level preceding a senior year of professional education in an affiliated program of medical laboratory science. Affiliated schools (see below) are accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) (http://www.naacls.org/Home.aspx). Quest Diagnostics (http://www.questdiagnostics.com/home.html) in Chantilly, Virginia also provides professional education for this program.

[1] Note: Because of the extensive pre-professional education requirements stipulated by NAACLS, students majoring in medical laboratory science are exempt from the Mason Core 'Arts' requirement.

Important Program Requirements

- Students must complete MLAB 200 Introduction to Medical Laboratory Science and present their biology coursework and supporting requirements with a minimum GPA of 2.00.
- A grade of 'C' or better must be earned in BIOL 213 Cell Structure and Function (Mason Core) in order to advance to other major requirements. Students may repeat BIOL 213 Cell Structure and Function (Mason Core) once and a second time only with permission of the Department of Biology.
- Medical laboratory science majors must earn a minimum of 'C' in all biology core courses.

Major in Medical Laboratory Science as a Second Bachelor's Degree

While the standard program for medical laboratory sciences is three years on campus followed by a fourth year at a clinical affiliate (3+1), many students elect to complete a bachelor's degree before entering the clinical program (4+1). Students who have completed the Biology, BS or Chemistry, BS at Mason and then undertake a fifth year at a clinical affiliate may be eligible for a second bachelor's degree with a major in medical laboratory science. Students wishing to receive the second degree must apply before entering their fifth year. For further information, contact a laboratory sciences advisor.

Applying to Medical Laboratory Sciences Schools

Responsibility for applying to schools of medical laboratory sciences and gaining admission rests with the student; however, guidance is provided by the medical laboratory sciences program director. Admission to medical laboratory sciences schools is selective, so candidates should strive for strong academic standing (2.5 science GPA or higher). Students who fail to gain admission to a NAACLS-approved school are unable to complete this degree program. Such students may transfer to Biology, BA or the Biology, BS without loss of credits.

Application to medical laboratory sciences schools should be initiated about a year before the desired entrance date. This fact, coupled with the large number of required courses in the pre-professional curriculum, makes it imperative that students in the program consult regularly with their faculty advisor. All medical laboratory sciences majors and prospective majors are urged to enroll in MLAB 200 Introduction to Medical Laboratory Science as early as possible. This course provides information on the profession, as well as the educational demands placed on candidates.

Senior Year

Students should be aware that the senior year spent off campus requires the following special interpretation of university policies:

- Students may present no more than 6 credits of 'D' grades in biology and chemistry courses required in three years of pre-professional study.
- No unsatisfactory grades (less than 'C') may be presented for courses in the senior year of professional study.
- Transfer students must present at least 16 credits of 300 to 400-level biology or chemistry coursework taken at Mason.
- Transfer students entering with more than 45 transfer credits are often unable to complete the pre-professional phase of their program in the usual three years of full-time study.

Senior students are registered at the university through special procedures. For details, consult the program director.

Affiliated NAACLS-Approved Schools

This program requires the equivalent of three years of full time professional study at the college level preceding a senior year of professional education in an affiliated school of medical laboratory sciences. All affiliated schools are accredited by the NAACLS:

- Augusta Health- School of Clinical Laboratory Science (https://www.augustahealth.com/cls/)
- George Washington University- School of Medicine and Health Sciences: The Medical Laboratory Sciences Program (http://smhs.gwu.edu/medical-laboratory-sciences/)
- INOVA Fairfax Hospital- Medical Laboratory Science Program (https://www.inova.org/education/medical-laboratory-science/)
- Sentara Rockingham Memorial Hospital- School of Medical Laboratory Science (https://www.sentara.com/harrisonburg-virginia/hospitalslocations/locations/school-of-medical-laboratory-science.aspx)

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete the requirements outlined below, choosing one Professional Study/Concentration option:

- Not choosing a concentration ("Professional Study: Generalist Option") will provide students generalist training. Upon graduation, the board certification test may be taken and would allow graduates to practice in any area of a hospital or laboratory.
- Choosing a concentration will allow students to complete their clinical rotations in that specific area. Upon graduation, the Molecular Biology or Microbiology (depending upon the concentration chosen) board certification test may be taken.

Biology Core

Code	Title	Credits
BIOL 213	Cell Structure and Function (Mason Core)	4
BIOL 214	Biostatistics for Biology Majors	4
BIOL 311	General Genetics	4
Total Credits		12

MLAB and BIOL Additional Courses

Code	Title	Credits
MLAB 200	Introduction to Medical Laboratory Science	1
MLAB 300	Science Writing [1]	2
BIOL 305	Biology of Microorganisms	3
BIOL 306	Biology of Microorganisms Laboratory	1

BIOL 430	Advanced Human Anatomy and Physiology I	4
BIOL 431	Advanced Human Anatomy and Physiology II	4
BIOL 452	Immunology	3
BIOL 453	Immunology Laboratory	1
Total Credits		19

[1] Fulfills writing intensive requirement.

Chemistry

Code	Title	Credits
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	4
CHEM 313	Organic Chemistry I	3
CHEM 315	Organic Chemistry Lab I	2
Select one from the following:		4-5
BIOL 483	General Biochemistry	
CHEM 314 & CHEM 318	Organic Chemistry II and Organic Chemistry Lab II	
Total Credits		17-18

Mathematics

Code	Title	Credits
Select one from the following:		3-6
MATH 111	Linear Mathematical Modeling (Mason Core)	
or MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 123 & MATH 124	Calculus with Algebra/Trigonometry, Part A and Calculus with Algebra/Trigonometry, Part B (Mason Core)	
Total Credits		3-6

Information Technology

Code	Title	Credits
Select one from the following:		3
CDS 130	Computing for Scientists [1]	
Any course(s) which fulfills the Mason Core: Information Technology requirement		
Total Credits		3

[1] Recommended course for this major

Professional Study: Generalist Option

Senior students are registered at the university through special procedures. For details, consult the medical laboratory science program director.

The senior year spent off campus requires the following special interpretation of university policies:

- Transfer students must present at least 16 credits of 300 to 400-level biology or chemistry coursework taken at Mason.
- No unsatisfactory grades (less than 'C') may be presented for courses in the senior year of professional study.
- Transfer students entering with more than 45 transfer credits are often unable to complete the pre-professional phase of their program in the usual three years of full-time study.

Students may have up to 30 credits of professional study during the senior year awarded for clinical education at an affiliated school of medical technology. No more than 30 professional credits may be applied toward the degree.

Code	Title	Credits
The distribution of credits in these courses varies with the school of medical technology. In consultation with the advisor, select from the following:		30
MLAB 401	Orientation to the Problems and Practices of the Clinical Laboratory	
MLAB 402	Clinical Hematology and Coagulation	
MLAB 403	Clinical Microscopy	
MLAB 404	Serology and Immunohematology	
MLAB 405	Clinical Microbiology	
MLAB 406	Clinical Chemistry	
MLAB 407	Clinical Molecular Biology	
Total Credits		30

Notes:

Students are encouraged to elect additional basic science courses during their pre-professional years. Recommended courses include:

Code	Title	Credits
BIOL 465	Histology	4
BIOL 483	General Biochemistry	4
BIOL 484	Cell Signaling and Disease	3
BIOL 485	Cell Signaling Laboratory	2-3
CHEM 321	Quantitative Chemical Analysis	4
PHYS 243	College Physics I (Mason Core)	3
PHYS 244	College Physics I Lab (Mason Core)	1
PHYS 245	College Physics II (Mason Core)	3
PHYS 246	College Physics II Lab (Mason Core)	1

Professional Study: Molecular Biology Concentration (MOB)

Senior students are registered at the university through special procedures. For details, consult the medical laboratory science program director.

The senior year spent off campus requires the following special interpretation of university policies:

- Transfer students must present at least 16 credits of 300 to 400-level biology or chemistry coursework taken at Mason.
- No unsatisfactory grades (less than 'C') may be presented for courses in the senior year of professional study.

- Transfer students entering with more than 45 transfer credits are often unable to complete the pre-professional phase of their program in the usual three years of full-time study.

Students may have up to 30 credits of professional study during the senior year awarded for clinical education at an affiliated school of medical technology. No more than 30 professional credits may be applied toward the degree.

This concentration is a pathway leading to eligibility for categorical certification as a Certified Technologist by the American Society for Clinical Pathology (ASCP) (https://www.ascp.org/content/) Board of Certification (BOC) (https://www.ascp.org/content/board-of-certification/). The concentration is one year long, consisting of about 20% classroom and 80% hands-on laboratory experience. Instructors include the expert clinical scientists and technologists of Quest Diagnostics (http://www.questdiagnostics.com/home.html) in Chantilly, Virginia.

Code	Title	Credits
In addition to the courses required for all Medical Laboratory Science students, the following are required:		30
MLAB 401	Orientation to the Problems and Practices of the Clinical Laboratory	
MLAB 407	Clinical Molecular Biology	
Total Credits		30

Notes:

Students are encouraged to elect additional basic science courses during their pre-professional years. Recommended courses include:

Code	Title	Credits
BIOL 465	Histology	4
BIOL 483	General Biochemistry	4
BIOL 484	Cell Signaling and Disease	3
BIOL 485	Cell Signaling Laboratory	2-3
CHEM 321	Quantitative Chemical Analysis	4
PHYS 243	College Physics I (Mason Core)	3
PHYS 244	College Physics I Lab (Mason Core)	1
PHYS 245	College Physics II (Mason Core)	3
PHYS 246	College Physics II Lab (Mason Core)	1

Professional Study: Microbiology Concentration (MIB)

Senior students are registered at the university through special procedures. For details, consult the medical laboratory science program director.

The senior year spent off campus requires the following special interpretation of university policies:

- Transfer students must present at least 16 credits of 300 to 400-level biology or chemistry coursework taken at Mason.
- No unsatisfactory grades (less than 'C') may be presented for courses in the senior year of professional study.
- Transfer students entering with more than 45 transfer credits are often unable to complete the pre-professional phase of their program in the usual three years of full-time study.

Students may have up to 30 credits of professional study during the senior year awarded for clinical education at an affiliated school of medical technology. No more than 30 professional credits may be applied toward the degree.

This concentration is a pathway leading to eligibility for categorical certification as a Certified Technologist by the American Society for Clinical Pathology (ASCP) (https://www.ascp.org/content/) Board of Certification (BOC) (https://www.ascp.org/content/board-of-certification/). The concentration is one year long, consisting of about 20% classroom and 80% hands-on laboratory experience. Instructors include the expert clinical scientists and technologists of Quest Diagnostics (http://www.questdiagnostics.com/home.html) in Chantilly, Virginia.

Code	Title	Credits
In addition to the courses required for all Medical Laboratory Science students, the following are required:		30
MLAB 401	Orientation to the Problems and Practices of the Clinical Laboratory	
MLAB 405	Clinical Microbiology	
Total Credits		30

Notes:

Students are encouraged to elect additional basic science courses during their pre-professional years. Recommended courses include:

PHYS 246	College Physics II Lab (Mason Core)	1

Professional Study: Histotechnology Concentration (HISO)

Code	Title	Credits
In addition to the courses required for all Medical Laboratory Science students, the following are required:		30
MLAB 401	Orientation to the Problems and Practices of the Clinical Laboratory	
MLAB 408	Clinical Histology	
MLAB 409	Clinical Histology Practicum	
Total Credits		30

MLAB 401 Topics

The following topics will be covered under MLAB 401 Orientation to the Problems and Practices of the Clinical Laboratory:

1. Introduction to CLS and Laboratory Operations

This course is a brief introduction to the Clinical Laboratory Science professions and Laboratory Operations. Topics include: Introduction to Laboratory Operations, Pre-analytics and Specimen Types, Quality Management Concepts, Quality Control, Laboratory Professions,

Professional Ethics, Laboratory Mathematics, Proper use of Laboratory Equipment, Introduction to Laboratory Instrumentation.

2. Board Exam Preparation
This course is a structured review and practice in preparation for the American Society for Clinical Pathology (https://www.ascp.org/content/) Technologist in Molecular Biology Board of Certification Exam. Practice tests and questions from a variety of published and authoritative sources are used to reinforce the content of the Technologist in Molecular Biology program.

MLAB 405 Topics
The following topics are covered under MLAB 405 Clinical Microbiology:

1. Introduction to Clinical Microbiology
This course is a brief introduction to the discipline of Clinical Microbiology, and laboratory diagnostic techniques. Topics include: Overview of Microbiology Theory, Methods and Applications, Instrumentation, Staining, and Media, Immunology, Serology, and Molecular Diagnostics.

2. Medical Virology
This course is a survey of the characteristics, pathogenicity, and laboratory diagnosis of important human viruses. Topics include viral taxonomy and classical virology. Special emphasis is placed on the epidemiology and the laboratory's role in influenza pandemics.

3. Medical Mycology
This course is a comprehensive presentation of medically important fungi. Emphasis is placed on clinical presentation and laboratory identification of pathogenic species and opportunistic pathogens. Topics include general mycology methods, yeasts, susceptibility testing, molds (Hyaline, Mucor, Dematiaceous), Dermatophytes, Systemic infections, and Pneumocystis.

4. Medical Parasitology
This course is a comprehensive presentation of human parasites. Emphasis is placed on clinical presentation and laboratory identification. Topics include Flagellates, Ciliates, Coccidians, Malaria and Babesia, Other Blood Born and Tissue Born parasites, Nematodes, Cestodes, Trematodes, and Arthropods.

5. Molecular Detection of Infectious Disease
This course examines the advances in using molecular methods to detect human infectious disease. Careful attention is given to the comparison of molecular technologies with traditional microbiology methods. Topics include molecular methods and applications, including PCR, sequencing, TMA, and PEGE, specimens of choice, sample preparation, Quality Control, primer selection, Molecular methods in selecting antimicrobial agents, molecular epidemiology, and target organisms: fungi, bacteria, parasites, and viruses.

6. Medical Bacteriology
This course is a comprehensive presentation of bacteria isolated in the clinical laboratory. Emphasis is placed on the laboratory identification of isolates from a variety of specimen sources, and pathogenic species. Topics include Instrumentation and MALDI, Gram Positive Cocci, Gram Positive Baccili, Enterics, non-fermenters, *Moraxella, Neisseria, Pasteurella, Haemophilus and HACEK, Camphylobacter, Helicobacter, Legionella*, CDC Select Agents, *Chlamdydia, Mycoplasm, Ureaplasm*, Spirochetes, Anaerobes, Antibiotics and Susceptibility testing, and Acid Fast Bacilli.

7. Microbiology Clinical Correlations
Designed as the capstone for the Technologist in Microbiology program, this course takes a body system view of the pathogenicity of infectious disease. Attention is given to integrating clinical presentation and case history to laboratory investigation and diagnosis. Topics include UTI/Genital, Food Borne/GI, Cystic Fibrosis, Blood, CSF, Body Fluids, and Wounds.

MLAB 407 Topics
The following topics will be covered under MLAB 407 Clinical Molecular Biology:

1. Introduction to Clinical Molecular Biology
This course presents the fundamentals of nucleic acid testing in the clinical laboratory and the underlying human genetics. Topics include: Fundamentals of Nucleic Acid Biochemistry, Common Techniques in Molecular Biology (Extraction, Resolution and Detection of Nucleic Acids, Analysis and Characterization, Amplification, Chromosomal Structure and Mutations, Gene Mutations, and DNA Sequencing).

2. Advanced Methods in Clinical Molecular Biology
This course applies the fundamentals of nucleic acid testing to advanced methods commonly used in the contemporary clinical and research laboratory. Topics include: PCR, Transcription-Based Amplification, Probe Amplification, Branched DNA, Hybrid Capture, Amplification: Signal, Cleavage-Based, Cycling Probe, Sequencing: Direct, Next Gen, Pyrosequencing, Bisulfite, RNA Sequencing, Bioinformatics, Human Genome Project.

3. Molecular Detection of Infectious Disease
This course examines the advances in using molecular methods to detect human infectious disease. Careful attention is given to the comparison of molecular technologies with traditional microbiology methods. Topics include: Molecular methods and applications, including PCR, sequencing, TMA, and PEGE, specimens of choice, sample preparation, Quality Control, primer selection, Molecular methods in selecting antimicrobial agents, molecular epidemiology, and target organisms: fungi, bacteria, parasites, and viruses.

4. Human Molecular and Chromosomal Applications and Pathology
This course presents advanced methods in nucleic acid testing to human medico-legal, forensic, and pathology applications. Topics include: Polymorphisms, RFLP, Paternity Testing, Linkage, Single Nucleotide Polymorphisms, Bone Marrow Engraftment, Mitochondrial DNA Polymorphisms and Disorders, Chromosomal Abnormalities, Patterns of Inheritance, Single Gene Disorders, Lysosomal Storage Disorders, Cystic Fibrosis, Trinucleotide Repeats, Genomic Imprinting, Array CGH, Molecular Oncology, HLA and Transplantation.

Mason Core and Electives
In order to meet a minimum of 120 credits, this degree requires an additional 32-36 credits, which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core
Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Department of Chemistry and Biochemistry

303 Planetary Hall
Fairfax Campus

Email: chem@gmu.edu
Website: chemistry.gmu.edu

Administration

- Gerald Weatherspoon, Chair
- Megan Erb, Associate Chair
- Mikell Paige, Associate Chair for Research
- Benoit Van Aken, Graduate Coordinator

Undergraduate Programs

The Department of Chemistry and Biochemistry offers undergraduate programs leading to the BA (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-ba/) and BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/) degree in Chemistry, with optional concentrations in Analytical Chemistry, Biochemistry, and Environmental Chemistry, as well as a five-year BS/Accelerated MS degree (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/#acceleratedmasterstextcontainer). Our comprehensive undergraduate education in chemistry is designed to prepare students for professional careers in chemistry and for advanced studies in chemistry and chemistry-related areas such as environmental science, material science, biochemistry, medicinal chemistry, geochemistry, chemical waste management, pharmacy, forensic chemistry, and chemical engineering. Students planning medical, dental, or veterinary careers may meet the requirements of these professional schools by majoring in chemistry.

Pre-Medical, Pre-Dental, Pre-Pharmacy, and Pre-Veterinary Students

Web: prehealth.gmu.edu (http://prehealth.gmu.edu)

Many students planning medical, dental, pharmacy, veterinary, optometry, or other health professional careers choose to pursue a major in chemistry. These students should consult the health professions advising web site on required coursework and overall preparation.

Pre-Pharmacy Society

Mason students who are interested in pursuing careers in pharmacy are encouraged to participate in the Pre-Pharmacy Society. This student organization organizes supplemental programming focused toward pharmacy as a career.

Chemistry Club

The Chemistry Club provides a social and informational network for students. It serves the Department of Chemistry and Biochemistry by sponsoring informational programs and allowing students to work at university events.

Graduate Programs

The department's graduate programs (MS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-ms/) and PhD (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-biochemistry-phd/)) provide advanced training for students who are recent college graduates, professionals in teaching, or technical workers in local research organizations. Students select a specialization from the fields of analytical, biological, environmental, inorganic, organic, physical, or computational chemistry. The graduate chemistry courses for these programs are usually offered during the late afternoon or evening hours for the convenience of students who are employed full-time. Graduate fellowships and teaching/research assistantships are available to the most qualified students.

The department offers a Chemistry, MS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-ms/) with a research project (thesis option) or an all coursework program (non-thesis option). Within the MS, students may pursue a concentration in biochemistry. The PhD in all branches of chemistry is available through the Chemistry and Biochemistry, PhD. Students may also pursue Chemistry-related PhD research through the Environmental Science and Public Policy, PhD and the Biosciences, PhD. An area of emphasis in computational chemistry is available through the Computational Sciences and Informatics, PhD, offered in conjunction with the Department of Computational and Data Sciences.

Emeriti

Cozzens, Davies

Requirements & Policies

Requirements

Writing Intensive Requirement

Mason requires all undergraduate students to complete at least one course designated as "writing intensive" in their majors at the 300 level or above. Students majoring in chemistry fulfill this requirement by successfully completing CHEM 336 Physical Chemistry Lab I or CHEM 465 Biochemistry Lab.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development and attend an information session early in their studies. For more information, visit gse.gmu.edu (http://gse.gmu.edu).

Academic Advising

Email: cbgrad@gmu.edu
Website: science.gmu.edu/academics/departments-units/chemistry-biochemistry/graduate-programs

The program is intended to prepare students for advanced work in the chemical sciences and related areas. Graduates with the PhD in this field can seek employment in research and development, process control, or higher education. In addition to these traditional science career paths, graduates are also positioned to pursue careers in non-traditional areas such as the intellectual property and regulatory fields. The program is designed to provide students with a firm foundation in advanced coursework, which is followed by an independent research project completed under the guidance of a faculty advisor. The culmination of the program is a dissertation representing original research that is publishable in a peer-reviewed scientific journal.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

To be considered for admission to degree status, students must have a bachelor's and/or master's degree in chemistry, biochemistry, or a related field and must meet general admission requirements for graduate study as specified in Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/). Applicants with a bachelor's degree in other fields of study who have at least three years of chemistry or biochemistry coursework may be accepted into the program. In some cases, students may be accepted provisionally and will be required to successfully complete the selected remedial courses, some of which may not be applicable toward the doctoral requirements.

Admission is based upon a departmental evaluation of the applicant's background as evidenced by transcripts, résumés, and letters of recommendation.

The GRE requirement for the PhD program is waived for students with a master's degree in chemistry, biochemistry, or a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent degree.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Academic Advising

Upon acceptance into the Chemistry and Biochemistry, PhD, a student will be assigned an academic advisor. Prior to registering for classes, students are required to meet with their academic advisor who will provide guidance in selecting courses that are consistent with the student's area of interest. Once a student has selected a research/dissertation advisor, that person then assumes the role of providing academic advisement to the student.

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student affairs. See AP.6.5.2 Reduction of Credits for more information.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Doctoral Coursework

Code	Title	Credits
Core Courses		
CHEM 817	Organic Structural Spectroscopy	3
CHEM 833	Physical Chemistry and Biochemistry	3
Seminar		**3**
CHEM 790	Graduate Seminar (taken three times)	
Electives		
Select 39 credits of approved elective courses in consultation with the student's advisor		39
Total Credits		48

Dissertation Committee and Supervisor

By the end of the first year, a student in the program is expected to have selected a dissertation/research supervisor and to have formed the dissertation committee. This committee will consist of at least four graduate faculty members (including the dissertation supervisor), with at least two members from the Department of Chemistry and Biochemistry. At least one member must be from outside the department. Qualified individuals who are not members of the graduate faculty, including faculty at other universities or government laboratories, may serve on the committee with the approval of the department chair and the college's associate dean.

Candidacy Examinations

The student must successfully complete separate written and oral candidacy examinations prepared and administered by the Dissertation Committee. The written exam consists of questions submitted by the Dissertation Committee. Successful completion of the written exam should be followed by the oral portion within one month. The oral exam consists of questions submitted by each member of the Dissertation Committee. Either or both portions of the qualifying exam may be repeated once at the discretion of the Dissertation Committee. A student must satisfactorily pass the two portions of the exam by the end of the third year from the date of enrollment in the PhD program.

Dissertation Proposal and Advancement to Candidacy

Prior to completing the sixth semester in the program, a student is expected to have advanced to candidacy. The student's committee will determine whether a candidate is ready to begin preparation of the research proposal and approve enrollment in CHEM 998 Doctoral Dissertation Proposal based upon their familiarity with the student's progress.

In order to advance to candidacy in a given semester, a student is required to fulfill the following requirements:

- The student will prepare and submit a research proposal (based on the thesis research) for approval by the dissertation committee.
- The student must pass a written qualifying exam prepared by the dissertation committee. The exam can be based on the student's research and/or completed coursework, with the composition of the exam being determined by the student's dissertation committee.
- The final stage is an oral defense of the student's research proposal. Questions at the proposal defense may also be drawn from material covered in the written qualifying exam.

In order the advance to candidacy in a given semester and register for CHEM 999 in the following semester, students must submit the requested documentation to the Department Graduate Coordinator by the following deadlines:

- To advance in the fall and register for CHEM 999 Doctoral Dissertation Research in the spring, November 8.
- To advance in the spring and register for CHEM 999 Doctoral Dissertation Research in the summer, March 8.
- To advance in the summer and register for CHEM 999 Doctoral Dissertation Research in the fall, May 25.

Dissertation Research

No more than 24 combined credits from CHEM 998 Doctoral Dissertation Proposal and CHEM 999 Doctoral Dissertation Research may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of CHEM 998 Doctoral Dissertation Proposal.

Code	Title	Credits
Select 24 credits from the following:		24
CHEM 998	Doctoral Dissertation Proposal (maximum of 12 credits)	
CHEM 999	Doctoral Dissertation Research	
Total Credits		24

Exit Seminar

Each PhD candidate presents his or her research in a seminar in the Department of Chemistry and Biochemistry (a departmental seminar), which takes place in the same semester as the final defense of the dissertation (below).

Dissertation Research and Defense

With the approval of the dissertation committee, the student will enroll in CHEM 998 Doctoral Dissertation Proposal and CHEM 999 Doctoral Dissertation Research. The dissertation research should represent a significant contribution to the appropriate scientific field(s), and it should be deemed to represent a body of work that is publishable in a refereed scientific journal. The dissertation must be presented and defended in a public forum consisting of the dissertation committee and other interested members of the George Mason University community.

Chemistry Minor

Banner Code: CHEM

Academic Advising

Phone: 703-993-1070
Website: science.gmu.edu/academics/departments-units/chemistry-biochemistry/majors-minors

This minor provides a firm foundation in chemical science. It is designed to be as flexible as possible so students can choose courses to complement their interests in areas such as biochemistry or environmental chemistry.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor.

A minimum GPA of 2.00 is required for all coursework applied to the minor.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 16

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Chemistry, BA

Banner Code: SC-BA-CHEM

Academic Advising

Phone: 703-993-1070
Website: science.gmu.edu/academics/departments-units/chemistry-biochemistry/majors-minors

This program, when coordinated with the necessary courses in education, meets requirements for teacher licensure. It also meets requirements for entrance to medical and other professional schools.

Teacher Licensure

Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Chemistry, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry concentration)
- Secondary Education - Chemistry (6-12) Undergraduate Certificate

Interested students should attend an information session early in their studies. For more information, visit the School of Education's website (http://gse.gmu.edu/).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core. As outlined in the Requirements section, students in this bachelor's program must also complete the additional College Requirements for the BA Degree.

CHEM 336 Physical Chemistry Lab I or CHEM 465 Biochemistry Lab will fulfill the writing intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Termination from the Major

To ensure the academic integrity of the Chemistry and Biochemistry undergraduate major program, students are expected to maintain a satisfactory level of academic performance.

No chemistry, math, or science course that is required for the major may be attempted more than three times. Students who do not successfully complete such a course with a grade of C or better by the third attempt may be terminated from the major.

Students who have been terminated from the chemistry major may not register for a chemistry course without the permission of the Department of Chemistry and Biochemistry.

A student may not declare a major in chemistry if the student has previously met the termination criteria for the major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete the chemistry program requirements with a minimum GPA of 2.30 and present no more than two courses with a grade of 'D' (1.00) in CHEM coursework at graduation.

BA without Concentration

Students who do not select the optional concentration complete the curriculum requirements listed below.

Chemistry Courses

Code	Title	Credits
CHEM 211	General Chemistry I (Mason Core)	3
CHEM 213	General Chemistry Laboratory I (Mason Core)	1
CHEM 212	General Chemistry II (Mason Core)	3

Concentration in Biochemistry (BC)

The concentration in biochemistry is designed for students interested in studying chemistry at its interface with the biological sciences. Those interested in health science careers can obtain an excellent science background through this concentration.

Students majoring in chemistry with a concentration in biochemistry will complete the coursework below:

Chemistry Courses

Code	Title	Credits
CHEM 211	General Chemistry I (Mason Core)	3
CHEM 213	General Chemistry Laboratory I (Mason Core)	1
CHEM 212	General Chemistry II (Mason Core)	3
CHEM 214	General Chemistry Laboratory II (Mason Core)	1
CHEM 313	Organic Chemistry I	3
CHEM 314	Organic Chemistry II	3
CHEM 315	Organic Chemistry Lab I	2
CHEM 318	Organic Chemistry Lab II	2
CHEM 321	Quantitative Chemical Analysis	4
CHEM 331	Physical Chemistry I	3
CHEM 336	Physical Chemistry Lab I [1]	2
CHEM 446	Bioinorganic Chemistry	3
CHEM 463	General Biochemistry I	4
CHEM 464	General Biochemistry II	3
CHEM 465	Biochemistry Lab [1]	2
Total Credits		39

[1] Fulfills the writing intensive requirement.

Mathematics and Statistics Courses

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
STAT 250	Introductory Statistics I (Mason Core)	3
Total Credits		11

Physics Courses

PHYS 243	College Physics I (Mason Core)	3
PHYS 244	College Physics I Lab (Mason Core)	1
PHYS 245	College Physics II (Mason Core)	3
PHYS 246	College Physics II Lab (Mason Core)	1
Total Credits		8

Biology Courses

Code	Title	Credits
BIOL 213	Cell Structure and Function (Mason Core)	4
Total Credits		4

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 64 credits
- BC concentration: 58 credits

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3

Integration Requirements	
Written Communications (ENGH 302)	3
Writing-Intensive [1]	3
Synthesis/Capstone [2]	3
Total Credits	40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

College Requirements for the BA Degree

In addition to the program requirements and the Mason Core requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] PHIL 323 Classical Western Political Theory and PHIL 324 Modern Western Political Theory may not be used to fulfill this requirement.

Social and Behavioral Sciences

Choose one approved Mason Core: Social and Behavioral Sciences course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST[1], LING, PSYC, or SOCI, and the following GGS courses:

Code	Title	Credits
Select any course from the disciplines above or select from the following GGS courses:		3
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	
Total Credits		3

[1] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core)may not be used to fulfill this requirement.

Natural Science

Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits[1]. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience[2].

Code	Title	Credits
Select an additional Mason Core Natural Science course		1

[1] For Geography, BA majors, this extra credit is not required.

[2] BIOL 124 Human Anatomy and Physiology and BIOL 125 Human Anatomy and Physiology may not be used to fulfill this requirement.

Foreign Language

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202 (https://catalog.gmu.edu/colleges-schools/humanities-social-sciences/modern-classical-languages/) (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. A three course sequence in American Sign Language (EDSE 115 (https://catalog.gmu.edu/search/?P=EDSE%20115) American Sign Language (ASL) I, EDSE 116 (https://catalog.gmu.edu/search/?P=EDSE%20116) American Sign Language (ASL) II, and EDSE 219 (https://catalog.gmu.edu/search/?P=EDSE%20219) American Sign Language (ASL) III) will also meet the foreign language requirement. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Academic and Student Affairs (http://cosundergrad.gmu.edu/).

Non-Western Culture

Choose one approved Non-Western Culture Requirement[1] course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any *other* requirements (Mason Core requirements, college-level requirements, or requirements for the major).

Code	Title	Credits
Select 3 credits from approved Non-Western Culture courses if a waiver isn't applicable:		0-3
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3

ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	3
ANTH 381	Medical Anthropology	3
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core)	3
ARAB 360	Topics in Arabic Cultural Production	3
ARAB 420	Survey of Arabic Literature	3
ARAB 440	Topics in Arabic Religious Thought and Texts (Mason Core)	3
ARTH 203	Survey of Asian Art (Mason Core)	3
ARTH 204	Survey of Latin American Art (Mason Core)	3
ARTH 206	Survey of African Art (Mason Core)	3
ARTH 318	Art and Archaeology of Ancient Egypt	3
ARTH 319	Art and Archaeology of the Ancient Near East (Mason Core)	3
ARTH 320	Art of the Islamic World (Mason Core)	3
ARTH 382	Arts of India (Mason Core)	3
ARTH 383	Arts of Southeast Asia (Mason Core)	3
ARTH 384	Arts of China (Mason Core)	3
ARTH 385	Arts of Japan (Mason Core)	3
ARTH 386	The Silk Road (Mason Core)	3
ARTH 482	RS: Advanced Studies in Asian Art	3
CHIN 318	Introduction to Classical Chinese (Mason Core)	3
CHIN 320	Contemporary Chinese Film	3
CHIN 325	Major Chinese Writers (Mason Core)	3
CHIN 470	Special Topics in Chinese Studies	3
DANC 118	World Dance (Mason Core)	3

RUSS 354	Contemporary Post-Soviet Life (Mason Core)	3

[1] Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office (http://chssundergrad.gmu.edu/).

Honors

Honors in the Major

Chemistry majors who have completed prerequisites for CHEM 455 Honors Research in Chemistry and CHEM 456 Honors Research in Chemistry and have maintained an overall GPA of at least 3.00 in mathematics and science courses are eligible to enter the departmental honors program. To graduate with honors in chemistry, a student is required to maintain a minimum GPA of 3.00 in mathematics and science courses and successfully complete the two semesters of CHEM 455 Honors Research in Chemistry and CHEM 456 Honors Research in Chemistry with a minimum GPA of 3.50.

In order to apply for Chemistry Honors, please complete the application (https://cos.gmu.edu/chemistry/wp-content/uploads/sites/7/2015/08/form-honors-program-application-2016.pdf) and submit it to the undergraduate coordinator.

Accelerated Master's

Chemistry, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's option and obtain a BA or BS in Chemistry (degree without concentration) and an MEd in Curriculum and Instruction (Secondary Education Chemistry concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/) in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered jointly by the Department of Chemistry and Biochemistry and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
EDUC 547	Scientific Inquiry and the Nature of Science	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 573	Teaching Science in the Secondary School	3

SEED 673	Advanced Methods of Teaching Science in the Secondary School	3

SEED approved elective

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Chemistry, BS

Banner Code: SC-BS-CHEM

Academic Advising

Phone: 703-993-1070
Website: science.gmu.edu/academics/departments-units/chemistry-biochemistry/majors-minors

This program is approved by the American Chemical Society (https://www.acs.org/content/acs/en.html). Upon completion, students who choose either the BS in Chemistry with no concentration or with the Analytical Chemistry concentration are certified to the society. Students that have a keen interest in sustainability should choose the Environmental Chemistry concentration. Students planning professional careers in chemistry should choose this degree.

Teacher Licensure

Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Chemistry, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry concentration)
- Secondary Education - Chemistry (6-12) Undergraduate Certificate

Interested students should attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education's website (http://gse.gmu.edu/).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

CHEM 336 Physical Chemistry Lab I or CHEM 465 Biochemistry Lab will fulfill the writing intensive requirement for students majoring in chemistry.

Termination from the Major

To ensure the academic integrity of the Chemistry and Biochemistry undergraduate major program, students are expected to maintain a satisfactory level of academic performance.

No chemistry, math, or science course that is required for the major may be attempted more than three times. Students who do not successfully complete such a course with a grade of C or better by the third attempt may be terminated from the major.

Students who have been terminated from the Chemistry major may not register for a chemistry course without the permission of the Department of Chemistry and Biochemistry.

A student may not declare a major in chemistry if the student has previously met the termination criteria for the major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students majoring in chemistry must complete the chemistry program requirements with a minimum GPA of 2.30 and present no more than two courses with a grade of 'D' (1.00) in CHEM coursework at graduation.

BS without Concentration

Students who do not select an optional concentration complete the curriculum requirements listed below.

Chemistry Courses

Code	Title	Credits
CHEM 211	General Chemistry I (Mason Core)	3
CHEM 212	General Chemistry II (Mason Core)	3
CHEM 213	General Chemistry Laboratory I (Mason Core)	1
CHEM 214	General Chemistry Laboratory II (Mason Core)	1
CHEM 313	Organic Chemistry I	3
CHEM 314	Organic Chemistry II	3
CHEM 315	Organic Chemistry Lab I	2
CHEM 318	Organic Chemistry Lab II	2
CHEM 321	Quantitative Chemical Analysis	4
CHEM 331	Physical Chemistry I	3
CHEM 332	Physical Chemistry II	3
CHEM 336	Physical Chemistry Lab I [1]	2
CHEM 337	Physical Chemistry Lab II	2
CHEM 422	Instrumental Methods of Chemical Analysis	3
CHEM 423	Instrumental Methods of Chemical Analysis Laboratory	2
CHEM 441	Properties and Bonding of Inorganic Compounds	3
CHEM 445	Inorganic Preparations and Techniques	2
CHEM 463	General Biochemistry I	4
Select 3 credits of chemistry electives [2]		3
In Depth Electives		
Select one from the following:		3

CHEM 413	Synthetic and Mechanistic Organic Chemistry	
CHEM 427	Aquatic Environmental Chemistry	
CHEM 438	Atmospheric Chemistry	
CHEM 458	Chemical Oceanography	
CHEM 464	General Biochemistry II	
CHEM 467	The Chemistry of Enzyme-Catalyzed Reactions	
CHEM 468	Bioorganic Chemistry	
Total Credits		52

[1] Fulfills the writing intensive requirement.

[2] Any lecture, lab or research course(s)

Mathematics Courses

Code	Title	Credits

Total Credits		8

Concentration in Environmental Chemistry (EVCH)

Students who choose this concentration will have a broad knowledge of chemistry and a firm foundation in the environmental sciences covering atmospheric, aquatic, and soil. The major prepares students to work in the public or private sector as environmental chemists as well as to pursue an advanced degree.

Chemistry Courses

Code	Title	Credits
CHEM 211	General Chemistry I (Mason Core)	3
CHEM 213	General Chemistry Laboratory I (Mason Core)	1

GGS 302	Global Environmental Hazards
Total Credits	6-8

[1] The discipline sequences may be interchanged only with approval by the program coordinator.

The remaining credits are fulfilled by Mason Core requirements or general electives.

Concentration in Analytical Chemistry (ANAC)

The Analytical Chemistry concentration is designed to introduce and train students in modern aspects of analytical chemistry. Students who choose this program will be well prepared to run sophisticated analytical instruments in industry and research laboratories and to pursue an advanced degree specializing in analytical chemistry.

Chemistry Courses

Code	Title	Credits
CHEM 211	General Chemistry I (Mason Core)	3
CHEM 213	General Chemistry Laboratory I (Mason Core)	1

Select 6 credits from the following:		6
BENG 101	Introduction to Bioengineering	
or STAT 250	Introductory Statistics I (Mason Core)	
ECE 101	Introduction to Electrical and Computer Engineering	
or CHEM 620	Modern Instrumentation	
Total Credits		6

The remaining hours are used to fulfill the Mason Core requirements and general elective courses.

CDS 130 Computing for Scientists is required to fulfill the Mason Core IT requirement.

Concentration in Biochemistry (BC)

Students planning professional careers in biochemistry, the pharmaceutical industry, medicine, biotechnology, or related fields with a chemistry emphasis should choose this program instead of the Chemistry, BS without a concentration. This concentration provides students with a focus on biochemistry while retaining a strong chemistry foundation. Students are allowed to tailor the concentration to their interests with 9 credits of biology or chemistry elective credits.

Chemistry Courses

Code	Title	Credits

Total Credits		9

[1] Other science or math courses may be approved as electives, subject to prior approval of the undergraduate coordinator.

Concentration in Materials Chemistry (MATC)

Students in the Materials Chemistry concentration explore nanostructures and how they relate to the macroscale physical and chemical properties of a material. Students interested in a career specializing in the synthesis and characterization of materials, as well as applied areas of materials chemistry, obtain a firm foundation in this subfield of chemistry.

Chemistry Courses

Code	Title	Credits
CHEM 211	General Chemistry I (Mason Core)	3
CHEM 213	General Chemistry Laboratory I (Mason Core)	1
CHEM 212	General Chemistry II (Mason Core)	3
CHEM 214	General Chemistry Laboratory II (Mason Core)	1
CHEM 313	Organic Chemistry I	3
CHEM 314	Organic Chemistry II	3
CHEM 315	Organic Chemistry Lab I	2
CHEM 318	Organic Chemistry Lab II	2
CHEM 321	Quantitative Chemical Analysis	4
CHEM 331	Physical Chemistry I	3
CHEM 332	Physical Chemistry II	3
CHEM 336	Physical Chemistry Lab I [1]	2
CHEM 337	Physical Chemistry Lab II	2
CHEM 441	Properties and Bonding of Inorganic Compounds	3
CHEM 445	Inorganic Preparations and Techniques	2
CHEM 472	Modern Polymer Chemistry	3
Total Credits		40

Mathematics Courses

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 213	Analytic Geometry and Calculus III	3
Total Credits		11

Physics Courses

Code	Title	Credits
Choose 12 credits from the following:		12
CHEM 355	Undergraduate Research	

CHEM 413	Synthetic and Mechanistic Organic Chemistry
CHEM 422	Instrumental Methods of Chemical Analysis
CHEM 423	Instrumental Methods of Chemical Analysis Laboratory
CHEM 451	Special Projects in Chemistry
CHEM 463	General Biochemistry I
CHEM 465	Biochemistry Lab
CHEM 471	Solid State Chemistry
CHEM 480	Fundamentals of Nanoscience and Nanomaterials
BENG 240	Biomaterials
ME 313	Material Science
Total Credits	12

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 49 credits
- Environmental concentration: 33-35 credits
- Analytical concentration: 43 credits
- Biochemistry concentration: 48 credits
- Materials Chemistry concentration: 49 credits

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Honors

Honors in the Major

Chemistry majors who have completed prerequisites for CHEM 455 Honors Research in Chemistry and CHEM 456 Honors Research in Chemistry and have maintained an overall GPA of at least 3.00 in mathematics and science courses are eligible to enter the departmental honors program. To graduate with honors in chemistry, a student is required to maintain a minimum GPA of 3.00 in mathematics and science courses and successfully complete the two semesters of CHEM 455 Honors Research in Chemistry and CHEM 456 Honors Research in Chemistry with a minimum GPA of 3.50.

In order to apply for Chemistry Honors, please complete the application (https://cos.gmu.edu/chemistry/wp-content/uploads/sites/7/2015/08/form-honors-program-application-2016.pdf) and submit it to the undergraduate coordinator.

Accelerated Master's

Chemistry, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Chemistry Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's option and obtain a BA or BS in Chemistry (degree without concentration) and an MEd in Curriculum and Instruction (Secondary Education Chemistry concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/) in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered jointly by the Department of Chemistry and Biochemistry and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
EDUC 547	Scientific Inquiry and the Nature of Science	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 573	Teaching Science in the Secondary School	3
SEED 673	Advanced Methods of Teaching Science in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Chemistry, BS/Chemistry, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Chemistry, BS and the Chemistry, MS degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits. They will be able to enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Successful applicants will have earned 60 undergraduate credits and have an overall GPA of at least 3.00. Additionally, they will have completed 36 credits of CHEM courses with a GPA of at least 3.00.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
CHEM 633	Chemical Thermodynamics and Kinetics [1]	
For Students Interested in the Environmental Sciences		

CHEM 627	Aquatic Environmental Chemistry
CHEM 651	Environmental Chemistry of Organic Substances
For Students Interested in Biochemistry	
CHEM 567	The Chemistry of Enzyme-Catalyzed Reactions
CHEM 660	Protein Biochemistry
For Students Interested in Organic Chemistry	
CHEM 568	Bioorganic Chemistry
CHEM 613	Modern Polymer Chemistry
CHEM 614	Physical Organic Chemistry
For Students Interested in Inorganic Chemistry	
CHEM 641	Solid State Chemistry
CHEM 646	Bioinorganic Chemistry
For Students Interested in Analytical Chemistry	
CHEM 624	Principles of Chemical Separation
CHEM 625	Electroanalytical Chemistry
For Students Interested in Materials Science	
CHEM 680	Fundamentals of Nanoscience and Nanomaterials

[1] This course covers the advanced concepts necessary to understand the mechanism and kinetics of chemical reactions.

Bachelor's Degree (selected), Bioinformatics Management, Accelerated PSM

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/), or the Chemistry, BS, or the Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/), or the Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/), or the Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/) and the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students in the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/); Chemistry, BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/); Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/); Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/); or Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) with an overall GPA of at least 3.00 in their last 60 credits are welcome to apply to the Bioinformatics Management, PSM accelerated master's program. Applicants to this accelerated master's should have previously taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

The GRE requirement is waived for students accepted into this accelerated program.

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the

maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Academic Advising

Email: cbgrad@gmu.edu
Website: science.gmu.edu/academics/departments-units/chemistry-biochemistry/graduate-programs

This master's degree provides advanced training for recent college graduates, professionals in teaching, and technical workers in research organizations who have an interest in chemistry or biochemistry. With a Thesis Option Master's in Chemistry, the serious student will perform original research and write an MS thesis under the direction of a faculty member. This option is for students planning to continue with a PhD, or to work in industry, academia, or a national laboratory. The Non Thesis Option is often used by those going on to a professional degree or to teach chemistry at the secondary school level.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

To be considered for admission to degree status, students must have a bachelor's degree in chemistry, biochemistry, or a related field and must meet general admission requirements for graduate study as specified in Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/). Applicants with a bachelor's degree in other fields of study who have at least three years of chemistry or biochemistry coursework may be accepted into the program. In some cases, students may be accepted provisionally and will be required to successfully complete the selected remedial courses, some of which may not be applicable toward the master's requirements.

Admission is based upon a departmental evaluation of the applicant's background as evidenced by transcripts, résumés, and letters of recommendation.

GRE scores are not required for admission into this program.

Policies

CHEM 500 Selected Topics in Modern Chemistry may not be applied toward the MS degree.

CHEM courses numbered 502 through 510 may be applied toward the degree only with prior written approval of the department.

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Code	Title	Credits
Select three of the following core courses. Courses must be selected from three different core areas shown below: [1]		9
Analytical:		
CHEM 624	Principles of Chemical Separation	
Biochemistry:		
CHEM 660	Protein Biochemistry	
CHEM 662	Modern Methods of Drug Discovery	
Environmental:		
CHEM 651	Environmental Chemistry of Organic Substances	
Inorganic:		
CHEM 641	Solid State Chemistry	
CHEM 646	Bioinorganic Chemistry	
Organic:		
CHEM 613	Modern Polymer Chemistry	
CHEM 614	Physical Organic Chemistry	
Total Credits		9

[1] These listed courses may also be taken as electives beyond the stated credit requirement for each option.

MS without Concentration

General chemistry students who do not wish to pursue a concentration complete the core courses above, the following requirements, and choose either the Thesis Option or the Non Thesis Option:

Code	Title	Credits
Additional Core Course		**3**
CHEM 633	Chemical Thermodynamics and Kinetics	
Chemistry Electives		**9**
Select 3 credits of CHEM designated courses		
Select 6 credits of courses in chemistry or related fields, approved by the graduate committee prior to registration		
Seminar		**3**
CHEM 790	Graduate Seminar	

Thesis or Non Thesis		**6**
Select the Thesis Option or the Non Thesis Option		
Total Credits		21

Thesis Option

The Thesis Option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries.

Students must choose a research laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799 Master's Thesis. Students must complete CHEM 799 Master's Thesis and present a seminar, followed by an oral defense.

Code	Title	Credits
Thesis Option		**6**
CHEM 799	Master's Thesis	
Total Credits		6

Non Thesis Option

The Non Thesis Option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

Students selecting this option are not required to complete a laboratory-based thesis. Instead, they must complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

Any combination of CHEM 670 Teaching Practicum and CHEM 796 Directed Reading and Research may be used to fulfill this requirement. However, CHEM 796 Directed Reading and Research may only be used to fulfill this requirement with prior written approval of the department and must be used to complete a laboratory or library-based research project, or must otherwise enhance the student's teaching skills.

Code	Title	Credits
Non Thesis Option		
Select 3 credits of the following:		3
CHEM 670	Teaching Practicum	
CHEM 796	Directed Reading and Research	
Additional Chemistry Electives		3
Select 3 credits of CHEM designated courses		
Total Credits		6

MS with Concentration in Biochemistry (BC)

Students who wish to pursue an optional concentration in biochemistry complete the core courses above, the following requirements, and choose either Thesis Option or the Non Thesis Option:

Code	Title	Credits
Additional Core Course		**3**
CHEM 633	Chemical Thermodynamics and Kinetics	
Chemistry Electives		**3**
Select 3 credits of CHEM designated courses		
Seminar		**3**
CHEM 790	Graduate Seminar	
Thesis or Non Thesis		**12**
Select the Thesis Option or the Non Thesis Option		
Total Credits		21

Thesis Option

The Thesis Option is designed for students planning to pursue a doctoral degree or a career involving research in the chemical, biochemical, environmental, or pharmaceutical industries.

Students must choose a research laboratory advisor during their first semester in the program and begin working on their thesis project no later than the second semester. The thesis is based on research that must be preapproved by the thesis or advisory committee, which is appointed prior to the first semester of registration in CHEM 799 Master's Thesis. Students must complete CHEM 799 Master's Thesis and present a seminar, followed by an oral defense.

Code	Title	Credits
Biochemistry Electives		**6**
Select 6 credits of electives in biochemistry or related fields with approval from the department		
Thesis		**6**
CHEM 799	Master's Thesis	
Total Credits		12

Non Thesis Option

The Non Thesis Option is designed for those seeking to go on to professional school, teach chemistry in secondary schools, or pursue other careers in which advanced work in chemistry is necessary or advantageous.

Students selecting this option are not required to complete a laboratory-based thesis. Instead, they must complete a research project or gain teaching experience in undergraduate chemistry labs, as described below.

Any combination of CHEM 670 Teaching Practicum and CHEM 796 Directed Reading and Research may be used to fulfill this requirement. However, CHEM 796 Directed Reading and Research may only be used to fulfill this requirement with prior written approval of the department and must be used to complete a laboratory or library-based research project, or must otherwise enhance the student's teaching skills.

Code	Title	Credits
Non Thesis Option		
Select 3 credits of the following:		3
CHEM 670	Teaching Practicum	
CHEM 796	Directed Reading and Research [1]	
Biochemistry Electives		9
Electives in biochemistry or related fields with approval from department		
Total Credits		12

Accelerated Master's

Chemistry, BS/Chemistry, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Chemistry, BS and the Chemistry, MS degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits. They will be able to enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Successful applicants will have earned 60 undergraduate credits and have an overall GPA of at least 3.00. Additionally, they will have completed 36 credits of CHEM courses with a GPA of at least 3.00.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Administration

- Jason Kinser, Chair
- Eduardo Lopez, Graduate Coordinator CSI, COMP, Data Science Certificate
- Anamaria Berea, Graduate Coordinator CSS
- Zachary Henderson, Undergraduate Advisor

The mission of the Department of Computational and Data Sciences (CDS) is comprised of two objectives:

- The first is the systematic development and application of computational techniques for modeling and simulation of scientific and social phenomena or social processes.
- The second objective is the systematic development and application of techniques for mining, managing, and analyzing large sets of data.

The resulting interdisciplinary approach leads to understanding, interpretation, and prediction of phenomena that traditional theory or experiment cannot provide alone. CDS's mission aims toward excellence in faculty and graduate student state-of-the-art research activities, as well as providing modern approaches to student education at both the graduate and undergraduate levels. The educational and research directions pursued in CDS are focused to reflect the interests of neighboring federal laboratories, scientific institutions, and high-technology firms to provide the students opportunities for continued or new employment. Graduate courses are also designed to accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening.

The research and teaching activities associated with CDS's programs are a reflection of the present central role of computation in the arenas of "big data" and of modeling and simulation.

Undergraduate Programs

This department offers the Computational and Data Sciences, BS, the Computational and Data Sciences Minor, and the Government Analytics Minor (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/government-analytics-minor/) in cooperation with the Schar School of Policy and Government (https://catalog.gmu.edu/colleges-schools/policy-government/). Accelerated master's options are also available for undergraduate students interested in the Computational Science, MS or the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/).

Many opportunities exist for undergraduate students to become involved with research. Students should consult with faculty working on research topics of interest to them based on their exploration of the departmental website (https://cos.gmu.edu/cds/).

Graduate Programs

This department offers the Data Science Graduate Certificate, the Computational Social Science Graduate Certificate, the Computational Science, MS, the Computational Sciences and Informatics, PhD, and the Computational Social Science, PhD. An accelerated master's option is also available for undergraduate students interested in the Computational Science, MS. The department also supports the Computational Social Science Concentration in the Interdisciplinary Studies, MAIS. These graduate programs are strongly supported by the extensive research activities of the faculty, including their collaborations with scientists and engineers at regional government laboratories.

Computational and Data Sciences Minor

Banner Code: CDS

Academic Programs Administrator

Email: cds@gmu.edu
Website: science.gmu.edu/academics/departments-units/computational-data-sciences/computational-data-sciences-minor

The minor provides an attractive option for students majoring in science, technology, engineering, or mathematics (STEM) who wish to augment their major degree program with additional courses in modeling, simulation, data science, and scientific computing. The combination of computer science, numerical methods, science, and computational and data sciences (CDS) synthesis courses will significantly enhance

the practical knowledge and computational skills of the students when compared with the major field alone. Students will acquire the knowledge, skills, and techniques commonly used across scientific disciplines, which will allow them to apply their George Mason University education in a practical way in industrial, government, and academic settings. Computational and data sciences skills are highly sought after in today's marketplace.

For additional information, please contact the CDS undergraduate coordinator/advisor.

Admissions & Policies

Policies

At least 8 credits must be unique to this minor and may not be used to fulfill requirements of the student's major, concentration, or another minor or undergraduate certificate. Students must complete at least 6 credits in their minor at George Mason and achieve a minimum GPA of 2.00 in courses applied to the minor.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 15

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students should note that many of the required courses have prerequisites. Nonetheless, this minor is within efficient reach of most students majoring in science, mathematics, engineering, or computer science. It is very likely that students with these backgrounds will already have the prerequisites completed.

CDS Courses

Computational and Data Sciences, BS

Banner Code: SC-BS-CDS

Academic Programs Administrator

Email: cds@gmu.edu
Website: science.gmu.edu/academics/departments-units/computational-data-sciences/computational-and-data-science-bs

The aim of this degree is to provide students with technical skills and knowledge for rigorously investigating physical and social phenomena. The BS is a transformative approach that integrates science at George Mason University based on the combination of real-world computer science skills, data acquisition and analysis, scientific modeling, applied mathematics, and simulation. As an interdisciplinary STEM-designated program, this degree addresses the current central role of computation in the areas of "big data," modeling, and simulation. Graduates of the program will possess the computational, scientific, and mathematical skills necessary for participating effectively as members of the scientific simulation and data analysis groups that are of increasing importance in the federal and public sectors, and in high technology firms. Additionally, graduates of the program will be well prepared to pursue graduate studies.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

The university's writing intensive requirement for the major will be met upon successful completion of CDS 302 Scientific Data and Databases.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Required Courses

Code	Title	Credits
CDS 130	Computing for Scientists	3
CDS 151	Data Ethics in an Information Society (Mason Core)	1
CDS 230	Modeling and Simulation I	3
CDS 301	Scientific Information and Data Visualization	3
CDS 302	Scientific Data and Databases [1]	3
CDS 303	Scientific Data Mining	3
Total Credits		16

[1] Fulfills the writing intensive requirement.

Extended Core Courses

Code	Title	Credits
Select 18 credits from the following:		18
CDS 101 & CDS 102	Introduction to Computational and Data Sciences (Mason Core) and Introduction to Computational and Data Sciences Lab (Mason Core)	
CDS 201	Introduction to Computational Social Science	
CDS 205	Introduction to Agent-based Modeling and Simulation	
CDS 251	Introduction to Scientific Programming	
CDS 290	Topics in Computational and Data Sciences	
CDS 292	Introduction to Social Network Analysis (Mason Core)	
CDS 403	Machine Learning Applications in Science	
CDS 411	Modeling and Simulation II	
CDS 486	Topics in Computational and Data Sciences	
CSI 500	Computational Science Tools	
CSI 501	Introduction to Scientific Programming	
Total Credits		18

Mathematics Courses

Code	Title	Credits
Select 10-11 credits from the following:		10-11
MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 114	Analytic Geometry and Calculus II	
MATH 125	Discrete Mathematics I (Mason Core)	
MATH 203	Linear Algebra	
MATH 446	Numerical Analysis I	
Total Credits		10-11

Statistics Courses

Code	Title	Credits
Select 6 credits from the following:		6
STAT 250	Introductory Statistics I (Mason Core)	
STAT 350	Introductory Statistics II	
STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	
Total Credits		6

Science and Engineering Courses

Code	Title	Credits
Select 6 credits from either one of the following:		6
	Additional Mason Core: Natural Science or Mason Core: Information Technology courses.	
	Any course offered by the College of Science or the Volgenau School of Engineering.	
Total Credits		6

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 63-64 credits, which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Elective Course Suggestions

Code	Title	Credits
CDS 410	Numerical Analysis II	3
or MATH 447	Numerical Analysis II	
CDS 421	Computational Data Science	3
CDS 461	Molecular Dynamics and Monte Carlo Simulations	3
CDS 487	Electronic Structure Computations	3
CDS 490	Directed Study and Research	1-3
CDS 491	Internship	1-3
CDS 492	Capstone in Data Science (Mason Core)	3

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3

Synthesis/Capstone [2]	3
Total Credits	40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Accelerated Master's

Computational and Data Sciences, BS/ Computational Science, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Computational and Data Sciences, BS and the Computational Science, MS degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

GRE-general scores are waived for graduates of BS degrees from any program in the College of Science or in the Volgenau School of Engineering at George Mason University.

Applicants must have an overall undergraduate GPA of at least 3.00. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better:

Code	Title	Credits
CDS 205	Introduction to Agent-based Modeling and Simulation	3
or CDS 251	Introduction to Scientific Programming	
CDS 230	Modeling and Simulation I	3
CDS 301	Scientific Information and Data Visualization	3
CDS 302	Scientific Data and Databases	3
CDS 303	Scientific Data Mining	3
CDS 411	Modeling and Simulation II	3
Select one from the following:		3
CDS 461	Molecular Dynamics and Monte Carlo Simulations	
CDS 490	Directed Study and Research	
CSI 500	Computational Science Tools	
Total Credits		21

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
For students focusing on Data Science, the following courses are suggested:		
CSI 501	Introduction to Scientific Programming	3
CSI 672	Statistical Inference	3
CSI 695	Scientific Databases	3
STAT 544	Applied Probability	3
For students focusing on Modeling, the following courses are suggested:		
CSI 500	Computational Science Tools	3
CSI 501	Introduction to Scientific Programming	3
CSI 600	Quantitative Foundations for Computational Sciences	3
CSI 690	Numerical Methods	3

Bachelor's Degree (selected), Bioinformatics Management, Accelerated PSM

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/), or the Chemistry, BS, or the Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/), or the Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/), or the Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-

program/neuroscience-bs/) and the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students in the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/); Chemistry, BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/); Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/); Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/); or Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) with an overall GPA of at least 3.00 in their last 60 credits are welcome to apply to the Bioinformatics Management, PSM accelerated master's program. Applicants to this accelerated master's should have previously taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

The GRE requirement is waived for students accepted into this accelerated program.

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
BINF 630	Bioinformatics Methods	3
BINF 631	Molecular Cell Biology for Bioinformatics	3
BINF 702	Biological Data Analysis	3
GBUS 738	Data Mining for Business Analytics	3
or MBA 738	Data Mining for Business Analytics	

Computational Science, MS

Banner Code: SC-MS-COMP

Academic Programs Administrator

227 Research Hall
Fairfax Campus

Phone: 703-993-9298
Email: cds@gmu.edu
Website: science.gmu.edu/academics/departments-units/computational-data-sciences/computational-science-ms

The Master of Science in Computational Science addresses the growing demand for trained computational scientists and engineers, and data scientists. It combines a solid foundation in computational science skills with courses in a variety of scientific and engineering computer-intensive areas where modeling and simulation, data analysis, and high performance computing play a central role.

Working with an advisor, a student may choose to pursue an area of emphasis. The areas of emphasis are:

- Computer Modeling and Simulation: Intended for students who wish to learn computational solution techniques for modeling and simulation of scientific and engineering phenomena.
- Data Science: Intended for students who wish to learn computational methods for acquiring, extracting, and analyzing large-scale data

obtained by observations, experiments, modeling, and database searches.

Students may also combine areas of emphasis to create their own customized curriculum under the guidance of the graduate coordinator.

Most of the courses are offered in the late afternoon or early evening to accommodate students with full-time employment outside of the university.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies section of this catalog. Applicants to the Computational Science, MS should have academic backgrounds in the following appropriate fields: physical or biological sciences, engineering, mathematics, or computer science. They should have an undergraduate degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have taken at least one course in differential equations and have facility in using a high-level computer programming language.

Application Requirements

To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply two copies of official transcripts from each university attended, a current résumé, and an expanded goals statement. Applicants should also provide two letters of recommendation and an official report of scores on the GRE-GEN. The GRE-SUB is recommended if it is given in the student's undergraduate major. The GRE requirement will be waived if the student holds a bachelor's or a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent in the appropriate fields listed above. Acceptable TOEFL scores (as determined by university policy) are required of all international applicants; for more information visit Admission of International Students. The ETS code for Mason is 5827.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Code	Title	Credits

Total Credits		9

1 Typically chosen from computational sciences and informatics, chemistry, mathematics, physics, engineering, information technology, and statistics courses.

2 Students should create a curriculum plan for an area of emphasis or combined areas of emphases in consultation with their academic advisor.

3 No more than 6 credits may be chosen from areas outside of CSI.

Elective credits may also include:

Code	Title	Credits
CSI 796	Directed Reading and Research	1-6
CSI 798	Research Project	1-3
CSI 799	Master's Thesis	1-6

Accelerated Master's

Computational and Data Sciences, BS/ Computational Science, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their

education to obtain both the Computational and Data Sciences, BS and the Computational Science, MS degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

GRE-general scores are waived for graduates of BS degrees from any program in the College of Science or in the Volgenau School of Engineering at George Mason University.

Applicants must have an overall undergraduate GPA of at least 3.00. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better:

Code	Title	Credits
CDS 205	Introduction to Agent-based Modeling and Simulation	3
or CDS 251	Introduction to Scientific Programming	
CDS 230	Modeling and Simulation I	3
CDS 301	Scientific Information and Data Visualization	3
CDS 302	Scientific Data and Databases	3
CDS 303	Scientific Data Mining	3
CDS 411	Modeling and Simulation II	3
Select one from the following:		3
CDS 461	Molecular Dynamics and Monte Carlo Simulations	
CDS 490	Directed Study and Research	
CSI 500	Computational Science Tools	
Total Credits		21

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
For students focusing on Data Science, the following courses are suggested:		
CSI 501	Introduction to Scientific Programming	3
CSI 672	Statistical Inference	3
CSI 695	Scientific Databases	3
STAT 544	Applied Probability	3
For students focusing on Modeling, the following courses are suggested:		
CSI 500	Computational Science Tools	3
CSI 501	Introduction to Scientific Programming	3
CSI 600	Quantitative Foundations for Computational Sciences	3
CSI 690	Numerical Methods	3

Mechanical Engineering, BS/ Computational Science, Accelerated MS

Overview

This option enables enthusiastic, highly qualified, undergraduates to obtain the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) and the Computational Science, MS within the accelerated time frame of five years. The program requires 139 credits total, allowing students to undertake graduate coursework during their final year in the bachelor's degree. Upon completion of this 139 credit BS/MS combined program, students are exceptionally well prepared for undertaking doctoral studies or entering the professional workforce.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog[1]. Application information for this Accelerated Master's program can be found on the Department of Computational and Data Sciences (http://cos.gmu.edu/cds/academic-programs/) website. Applicants must have an overall undergraduate GPA of at least 3.00 and have completed at least 60 credits. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better:

Code	Title	Credits
CS 112	Introduction to Computer Programming	4
ME 212	Solid Mechanics	3
ME 231	Dynamics	3

ME 313	Material Science	3
ME 322	Fluid Mechanics	3
ME 323	Heat Transfer	3
ME 351	Analytical Methods in Engineering	3
Total Credits		22

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the modeling and simulation or data science emphases of the Computational Science, MS.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites

[1] GRE-general scores are waived for graduates of BS degrees from any program in the College of Science or the Volgenau School of Engineering at George Mason University.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs, with up to twelve credits overlap chosen from the following courses:

Code	Title	Credits
CSI 500	Computational Science Tools	3
CSI 501	Introduction to Scientific Programming	3
CSI 600	Quantitative Foundations for Computational Sciences	3
Select one course from the following options:		3
Any CDS, CSI, or CSS-prefixed courses numbered 500-689, or		
STAT 544	Applied Probability	
STAT 554	Applied Statistics I	
Total Credits		12

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Computational Sciences and Informatics, PhD

Banner Code: SC-PHD-CSI

Academic Programs Administrator

227 Research Hall
Fairfax Campus

Phone: 703-993-9298
Email: cds@gmu.edu
Website: science.gmu.edu/academics/departments-units/computational-data-sciences/computational-sciences-and-informatics-phd

Founded in 1992, the program addresses the role of computation in science, mathematics, and engineering, and is designed around the emphases of Computer Modeling and Simulation and of Data Science. Computational science, focused on modeling and simulation, is defined as the systematic development and application of computing systems and computational solution techniques for modeling and simulation of scientific and engineering phenomena. Informatics, focused on data science, is defined as the systematic development and application of computing systems and computational solution techniques for analyzing data obtained through experiments, modeling, database searches, and instrumentation. The resulting interdisciplinary approach leads to an understanding that traditional theory or experimentation alone cannot provide. The close relationship of the PhD to the research and development activities in federal laboratories, scientific institutions, and high-technology firms affords students opportunities for continued or new employment. Scheduled courses and sequences accommodate part-time students, with most courses meeting once a week in the late afternoon or early evening. The research and teaching activities associated with the program reflect the recognized role of computation and data analysis as part of a triad with theory and experiment, leading to a better understanding of nature. The program is designed to be completed in four to five years.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Students interested in applying for admission should have a bachelor's degree in computational science, any natural science, mathematics, engineering, or computer science with a minimum GPA of 3.00 in their last 60 credits of study. Applicants to the PhD program should have a mathematics background up to and including differential equations and should also have knowledge of a computer programming language such as C, C++, Fortran, Python, etc.

Application Requirements

The GRE is required, unless the applicant holds a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. An acceptable TOEFL score (as determined by the university) is required for international students; for more information visit the Admission of International Students (https://catalog.gmu.edu/admissions/international-students/) section of the catalog. The ETS code for Mason is 5827.

Students should submit a completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/) along with three letters of recommendation, an expanded goals statement, and application fee in addition to the items listed above.

Application deadlines can be found on the Office of Admissions website (https://www2.gmu.edu/admissions-aid/apply-now/how-apply/graduate/). Applications requesting financial support must be received by

February 1 for the fall semester. Applications from local applicants may be accepted after these general deadlines.

For additional information, please contact the CSI graduate coordinator.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Reduction of Credit

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the required coursework may be reduced up to 24 credits, subject to approval of the graduate coordinator and the college's associate dean. Research-based courses and seminar courses are not eligible for reduction.

Transfer of Credit

Students who have prior graduate coursework that has not been applied to any degree may request to have a maximum of 30 of those graduate credits transferred, with approval of the graduate coordinator, the college's associate dean, and in accord with university policy. Research-based courses and seminar courses are not eligible for transfer.

Requirements

Degree Requirements

Total: 72 credits

Students should refer to the Admissions & Policies tab for specific policies related to this program.

General Core Courses

Code	Title	Credits
Select two courses (6 credits) from the following:		6
CSI 690	Numerical Methods	
CSI 695	Scientific Databases	
CSI 702	High-Performance Computing	
CSI 703	Scientific and Statistical Visualization	
Total Credits		6

Areas of Emphasis Courses

From the list below, students are advised to select six courses that correspond to areas of emphasis in:

- *Computer Modeling and Simulation*- Including applications to the natural sciences
- *Data Science*- Including computational learning, statistics, and data analytics

Code	Title	Credits
Select six courses (18 credits) from the following: [1]		18
CSI 500	Computational Science Tools	
CSI 501	Introduction to Scientific Programming	
CSI 672	Statistical Inference	
CSI 674	Bayesian Inference and Decision Theory	
CSI 676	Regression Analysis	
CSI 678	Times Series Analysis and Forecasting	
CSI 685	Fundamentals of Materials Science	
CSI 690	Numerical Methods	
CSI 695	Scientific Databases	
CSI 701	Foundations of Computational Science	
CSI 702	High-Performance Computing	
CSI 703	Scientific and Statistical Visualization	
CSI 709	Topics in Computational Sciences and Informatics	
CSI 721	Computational Fluid Dynamics I	
CSI 739	Topics in Bioinformatics	
CSI 740	Numerical Linear Algebra	
CSI 742	The Mathematics of the Finite Element Method	
CSI 744	Linear and Nonlinear Modeling in the Natural Sciences	
CSI 747	Nonlinear Optimization and Applications	
CSI 754	Earth Science Data and Advanced Data Analysis	
CSI 758	Visualization and Modeling of Complex Systems	
CSI 771	Computational Statistics	
CSI 772	Statistical Learning	
CSI 773	Statistical Graphics and Data Exploration	
CSI 777	Principles of Knowledge Mining	
CSI 780	Principles of Modeling and Simulation in Science	
CSI 782	Statistical Mechanics for Modeling and Simulation	
CSI 783	Computational Quantum Mechanics	
CSI 786	Molecular Dynamics Modeling

CSI 788	Simulation of Large Scale Systems	
CSI 873	Computational Learning and Discovery	
CSI 876	Measure and Linear Spaces	
CSI 877	Geometric Methods in Statistics	
Total Credits		18

[1] When choosing courses, avoid courses previously taken to fulfill the 'General Core Courses' requirement and only choose one 500-level course.

Colloquium/Seminar

The department offers weekly colloquia and seminar series to ensure that students are exposed to the latest developments at area research institutions. One credit may be chosen from:

Code	Title	Credits
CSI 898	Research Colloquium in Computational Sciences and Informatics	1
or CSI 899	Colloquium in Computational and Data Sciences	
or CSI 991	Seminar in Scientific Computing	
Total Credits		1

Electives

Electives should be chosen to bring the total number of credits to 72. Courses must be approved by the student's advisor and the graduate coordinator. Additionally,

- A maximum of 2 credits of CSI 898 Research Colloquium in Computational Sciences and Informatics, CSI 899 Colloquium in Computational and Data Sciences, and/or CSI 991 Seminar in Scientific Computing may be applied as electives.
- A maximum of two 500-level courses may be applied between both the 'Areas of Emphasis Courses' requirement and the 'Electives' requirement.
- CSI 796 Directed Reading and Research and CSI 996 Doctoral Reading and Research are the only allowable research-based courses that can be used as electives.
- The following courses may not be used as electives: CSI 798 Research Project, CSI 799 Master's Thesis, CSI 998 Doctoral Dissertation Proposal, and CSI 999 Doctoral Dissertation.
- Students may pursue interdisciplinary research that supplements the 'Areas of Emphasis Courses' and 'Electives' requirements with each other and also with bioinformatics, climate dynamics, computational chemistry, computational social science, geoinformation sciences, and several other autonomous PhD program areas within the College of Science.

Doctoral Research

No more than 24 combined credits from CSI 998 Doctoral Dissertation Proposal and CSI 999 Doctoral Dissertation may be applied toward satisfying doctoral degree requirements, with a minimum of 6 credits of CSI 999 Doctoral Dissertation.

Students become eligible to register for CSI 998 Doctoral Dissertation Proposal upon having an approved dissertation committee. Upon advancement to candidacy, students will be eligible to register for CSI 999 Doctoral Dissertation.

Code	Title	Credits
Select 24 credits from the following:		24
CSI 998	Doctoral Dissertation Proposal	
CSI 999	Doctoral Dissertation	
Total Credits		24

Candidacy Examination

The student must successfully complete separate written, computational, and oral candidacy examinations prepared and administered by the student's dissertation committee.

Dissertation Proposal and Advancement to Candidacy

Students advance to doctoral candidacy by fulfilling the following requirements:

- The student must successfully complete all coursework and candidacy examinations as stated above.
- The student prepares a dissertation proposal describing in detail the planned dissertation research. The proposal must be approved by the dissertation committee.
- Following successful completion of the research proposal and candidacy exams, the committee will recommend the student for advancement to doctoral candidacy to the graduate coordinator and the college's associate dean.

Dissertation Research and Defense

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in CSI 999 Doctoral Dissertation. The dissertation is a written piece of original contribution that demonstrates a doctoral candidate's mastery of the subject matter. A student is expected to produce new and original research worthy of publication in peer-reviewed journals. After the dissertation is completed, the committee will review the dissertation and examine the student in a public oral dissertation defense.

Computational Social Science Graduate Certificate

Banner Code: SC-CERG-CSS

Academic Programs Administrator

227 Research Hall
Fairfax Campus

Phone: 703-993-9298
Email: cds@gmu.edu
Website: science.gmu.edu/academics/departments-units/computational-data-sciences/computational-social-science-graduate

This program is designed for students who seek training in computer simulation and related computational methods for analyzing social systems and processes. The program is open to all students with graduate standing at George Mason University and all students who hold a bachelor's degree from a regionally accredited university. The Computational Social Science (CSS) certificate allows students with social science or computational backgrounds to acquire new knowledge and modeling skills to improve their qualifications and attractiveness to employers in government, academia, or industry. The core courses provide a common foundation; additional elective courses allow for a variety of student interests across diverse social domains.

This graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants should have an undergraduate degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a GPA of at least 3.00. To apply, prospective students should forward a completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), one copy of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required of all international applicants. International

applicants should see information regarding the admission of international students.

Students intending to obtain the CSS certificate must apply to the CSS certificate program before beginning any CSS coursework intended to satisfy requirements. They must also have their coursework plan approved by the director.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Code	Title	Credits
CSS 600	Introduction to Computational Social Science	3
CSS 610	Agent-based Modeling and Simulation	3
Total Credits		6

Electives

Code	Title	Credits
Nine credits of electives, selected from:		9
CSS 605	Object-Oriented Modeling in Social Science	
CSS 620	Origins of Social Complexity	
CSS 692	Social Network Analysis	
Other graduate courses in the fields of computational social science, social science, computer science, statistics, and other quantitative methods such as data visualization, information technology, and geographic information science. [1]		
Total Credits		9

[1] These courses should be selected in conjunction with, and approved by, the student's advisor. Students may include a maximum of 3 credits of programming courses to meet the elective requirements. Procedural, object-oriented languages, or other approved programming approaches may be used with permission of the director. Some courses on computational techniques, modeling, or statistics, such as visualization, graphics, and statistical and database packages may also be used to meet the requirements with prior approval of the director.

Computational Social Science, PhD

Banner Code: SC-PHD-CSS

Academic Programs Administrator

227 Research Hall

Fairfax Campus

Phone: 703-993-9298
Email: cds@gmu.edu
Website: science.gmu.edu/academics/departments-units/computational-data-sciences/computational-social-science-phd

The core objective of the program is to train graduate students to be professional computational social scientists in academia, government, or business. The program offers a unique and innovative interdisciplinary academic environment for systematically exploring, discovering, and developing skills to successfully follow careers in one of the areas of computational social science.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Applicants should have as background a bachelor's degree in one of the social sciences; computer science, engineering, or a relevant discipline; and undergraduate courses in these and related areas. Bachelor's degrees in the physical or biological sciences are also eligible, but applicants may be advised to take additional courses in social science or computer science as prerequisites to admission. Minimal requirements also include one undergraduate course in calculus and knowledge of a computer programming language, preferably object-based.

Application Requirements

Applicants should have an undergraduate degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a GPA of at least 3.25. To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), copies of official transcripts from each college and graduate institution attended, a current résumé, an expanded goals statement not to exceed 2,000 words, and the names of two Mason faculty members who may be suitable advisors. Applicants should also include three letters of recommendation from faculty members or individuals with direct knowledge of the student's academic or professional capabilities. The letters must arrive directly from the senders. Applicants should also submit an official report of scores obtained on the GRE-GEN. TOEFL scores are required for all international applicants.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Reduction of Credit

Students entering the doctoral program with a master's degree in a related discipline may request that the required credits for the doctoral degree be reduced by a maximum of 30 credits with approval of the director of graduate studies and the associate dean and in accordance with university policy. More information can be found in AP.6.5.2

Reduction of Credits (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-5-2).

Transfer of Credit

Students who have prior graduate coursework that has not been applied to another degree may request to have a maximum of 24 of these graduate credits transferred, with approval of the director of graduate studies and the associate dean and in accord with university policy. More information can be found in AP.6.5.3 Transfer of Credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-5-3).

Academic Advising

During the first year, each student will form a graduate studies committee, called the first-year committee, consisting of the student's advisor plus two or three appropriately qualified individuals. The committee assists the student in designing a specific plan of study and evaluating the student's progress by the end of the first year. During the second year, the student forms a doctoral committee, with membership approved by the CSS program director. The committee will advise the student on preparing for the doctoral candidacy exams and preparing, developing, and defending the doctoral dissertation.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Code	Title	Credits
CSS 600	Introduction to Computational Social Science	3
CSS 605	Object-Oriented Modeling in Social Science	3
CSS 610	Agent-based Modeling and Simulation	3
CSS 620	Origins of Social Complexity	3
Total Credits		12

Extended Core Courses

Code	Title	Credits
Select 6 credits from the following:		6
CSS 625	Complexity Theory in the Social Sciences	
CSS 645	Spatial Agent-Based Models of Human-Environment Interactions	
CSS 692	Social Network Analysis	
Total Credits		6

Discipline-based Courses

Code	Title	Credits
Select 15 credits of discipline-based social science courses in a specific area such as anthropology, economics, geography, history, linguistics, political science, or sociology, as approved by the student's advisor, to provide domain-specific knowledge.		15
Total Credits		15

Electives

Code	Title	Credits
Select 15 credits of electives or independent research, as approved by the student's advisor, to provide further substantive or methodological specialization as needed.		15
Total Credits		15

Students with a strong background in computing, for example, a prior MS in computer science, but weaker social science training will be required to use all or most of these electives in a substantive social science. Conversely, students with a strong background in social science, for example, a BS in economics, will be required to use most or all of these electives in computing courses.

Candidacy Examination

The candidacy exam is taken after students have completed all core requirements and a majority of additional coursework (18 plus 15 credits), which typically corresponds to the fifth semester in the program. The purpose of the candidacy exam is to assess the student's substantive and methodological knowledge in CSS as a whole and in the chosen focus area, the ability to integrate materials from different courses, and the potential for a successful dissertation. The exam consists of written and oral parts.

Dissertation Proposal

Upon passing the candidacy examination, each student shall prepare and, within a year, defend a dissertation proposal, written in the form of an extramural research grant proposal. The student shall develop the dissertation proposal in consultation with the dissertation committee. With successful defense of the proposal, a student becomes a PhD candidate.

Dissertation Research

Dissertation research credits are required in order to demonstrate doctoral-level originality and research excellence:

Code	Title	Credits
Select 24 credits from the following:		24
CSS 998	Doctoral Dissertation Proposal	
CSS 999	Doctoral Dissertation	
Total Credits		24

Example Dissertation Areas

Areas for dissertation research include, but are not limited to, the following:

- Agent-based computational economics: trade, finance, decision making under risk
- Computational political economy: voting, institutions, norms, inequality

- Computational linguistics: generative grammars, parsing, classifiers, inference
- Social network analysis: connectivity, structure, evolution of the Internet, social media, cyber warfare
- Computational anthropology: emergence of hierarchy, settlement patterns
- Computational political science: systems of government, conflict and war, cooperation
- Computational sociology: segregation, collective action, leadership, trust
- Complexity theory: power laws, potential theory, criticality, bifurcation
- Computational methodology: multiagent systems, evolutionary computation
- Agent-based computational geography: land use change, humanitarian assistance, urban modeling

Doctoral Dissertation Defense

The PhD dissertation is the detailed written report of an original and significant research contribution to computational social science. It is defended before the dissertation committee in a forum open to fellow students and interested faculty and staff. The dissertation committee recommends that the graduate faculty of George Mason University accept the student candidate for the PhD degree upon a successful defense and completion of any final revisions.

Data Science Graduate Certificate

Banner Code: SC-CERG-DSCI

Website: science.gmu.edu/academics/departments-units/computational-data-sciences/data-science-graduate-certificate

This certificate program focuses on mastering a variety of basic computational skills to manage and analyze data. The certificate is designed primarily for professionals in technical fields who seek to upgrade their expertise in data science. This program is also available as an option for prospective or currently enrolled master's degree students.

The coursework in this program provides an accelerated introduction to concepts in the modern analysis of data. Topics include computer packages, graphics, databases, data analytics, and their applications.

This certificate may be pursued on a part-time basis or full-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Applicants to this certificate should have an academic background in science, engineering, mathematics, or computer science. They should have an undergraduate degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a GPA of at least 3.00 in their last 60 credits of study. In addition, applicants should have facility in using a high-level computer programming language.

To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply two copies of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required for all international applicants.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Tools Courses

Code	Title	Credits
CSI 500	Computational Science Tools	3
CSI 501	Introduction to Scientific Programming	3
CDS 501	Scientific Information and Data Visualization	3
CDS 502	Introduction to Scientific Data and Databases	3
Total Credits		12

Applications Courses

The applications courses provide content from a specific scientific domain and demonstrate the utilization of techniques within its context.

Government Analytics Minor (COS)

Banner Code: GVAN

Dr. Robert McGrath

Research Hall, Room 344
Fairfax Campus

Phone: 703-993-4567
Email: rmcgrat2@gmu.edu

Government analytics involves the use of cutting-edge tools of data science and analysis to address political, policy, and governance

problems at federal, state, local, and organizational levels. This minor introduces students to the tools and context that are now commonly employed by government entities and agencies, as well as by the non-profit and private sectors. In particular, students will work with canonical programming languages (R and Python) and apply these tools to substantive issues in political science, public administration, and international relations. The minor integrates a technical curriculum with real-world applicability and gives students the flexibility and independence to develop unique expertise and hone research skills. The curriculum also introduces students to issues of copyright and privacy that are integral to ethical government analytics.

Admissions & Policies

Admissions

This minor is available to all Mason undergraduate students.

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 19-20

Of the total of 19 credits, 9 credits must be unique to minor

Required Courses

Code	Title	Credits
CDS 101	Introduction to Computational and Data Sciences (Mason Core)	3
CDS 102	Introduction to Computational and Data Sciences Lab (Mason Core)	1
CDS 230	Modeling and Simulation I	3
Select one of the following:		**3**
CDS 301	Scientific Information and Data Visualization	
CDS 302	Scientific Data and Databases	
CDS 303	Scientific Data Mining	
STAT 463	Introduction to Exploratory Data Analysis	
Select two of the following: [1]		**6-7**
GOVT 300	Research Methods and Analysis	
GOVT 307	Legislative Behavior	
GOVT 308	The American Presidency	
GOVT 311	Public Opinion and Electoral Behavior	
GOVT 312	Political Parties and Campaigns	
GOVT 313	Political Psychology	
GOVT 318	Interest Groups, Lobbying, and the Political Process	
GOVT 343	International Political Economy	
GOVT 351	Administration in the Political System	
GOVT 354	Nonprofit Sector in Society	
GOVT 355	Public Personnel Administration	
GOVT 356	Public Budgeting and Finance	
GOVT 357	Urban Planning	
GOVT 358	Nonprofit Financial Planning	
GOVT 361	Introduction to Environmental Policy	
GOVT 362	Intermediate Environmental Policy	
GOVT 364	Public Policy Making	
GOVT 365	State and Regional Public Policy	
GOVT 366	Public Policy Analysis	
GOVT 367	Money, Markets and Economic Policy (Mason Core)	
GOVT 368	Tools for Economic Policy Analysis	
GOVT 400	Issues in Political Analysis	
Seminar Requirement		
GOVT 490	Synthesis Seminar (Mason Core) [2]	3
Total Credits		19-20

1 An alternative 300-level GOVT course, especially including GOVT 319, or any 400-level GOVT course, may be substituted for any other GOVT course with the permission of the minor director, depending on the topic.

2 This Government Analytics capstone seminar will be offered annually and covers:
i) Open Government Data, in theory and practice
ii) Supervision of individual capstone projects
Enrollment in the capstone section is limited to Government Analytics minors and requires permission of the instructor.

Department of Environmental Science and Policy

Website: esp.gmu.edu

Administration

- A. Alonso Aguirre, Chair
- Changwoo Ahn, Graduate Program Director
- Younsung Kim, Undergraduate Program Director

The research and development of multiple disciplines have contributed to remarkable gains in human and animal health, conservation and sustainability. However, dense human populations, habitat loss and fragmentation, over-exploitation of wild aquatic and terrestrial animals and plants, human-wildlife conflict, invasive species, biodiversity loss, emerging infectious diseases, environmental contaminants, and climate change have produced interacting challenges that call for broader-based and more integrated teaching, research and intervention. The Department of Environmental Science and Policy (ESP) at George Mason University believes that addressing these challenges requires diverse knowledge and expertise in natural science, social science, and public policy. Our

faculty and programs reflect the need for a transdisciplinary approach to environmental science, conservation, and sustainability.

In addition to faculty who are involved in cutting edge research, ESP has one of the largest graduate programs in the university conducting groundbreaking studies in the environmental field. The department also has increasing number of undergraduates conducting their own individual research projects or gaining experience by helping with established studies.

The proximity of George Mason to Washington, DC, gives ESP the unique opportunity to partner with governmental agencies, environmental and conservation groups and environmental-focused companies. Students can even be involved in practical study and training at the Smithsonian-Mason School of Conservation (http://smconservation.gmu.edu/) (SMSC) and the Potomac Environmental Research Education Center (https://cos.gmu.edu/perec/) (PEREC).

Research conducted in ESP ranges from terrestrial and marine mammal conservation to molecular and microbial ecology; from corporate environmental management and policy to the environmental perceptions and practices of indigenous peoples.

Conservation Biology Minor

Banner Code: CBIO

Younsung Kim, Undergraduate Program Director

Email: espug@gmu.edu
Website: esp.gmu.edu

This minor is intended for non-biology majors with an interest in wildlife and habitat conservation issues. The minor may particularly suit Environmental Science, BS, Environmental and Sustainability Studies, BA, and Geology, BS majors, as well as School of Integrative Studies students wishing to increase their understanding and qualifications in the field of conservation biology. The minor may also be of interest to non-science majors, for example, students taking leisure studies classes with an interest in ecotourism.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and not counted toward the student's major. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Minor Requirements

Total credits: 19

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete the following courses with a minimum GPA of 2.00.

Many courses below have prerequisites that need to be met; see advisor for details.

Core Biology Courses

Code	Title	Credits
BIOL 308	Foundations of Ecology and Evolution	5
BIOL 300	BioDiversity	4
Select one from the following:		3-6
EVPP 318	Conservation Biology	
or BIOL 318	Conservation Biology	
INTS 401	Conservation Biology (Mason Core) [1]	
Total Credits		12-15

[1] 3 of 6 credits count toward the Core Biology requirement. The remaining 3 credits may apply toward minor electives.

Electives

Code	Title	Credits
Select 4-7 credits from the following to meet a total of 19 credits for the minor: [1]		4-7
EVPP 336	Human Dimensions of the Environment	
EVPP 361	Introduction to Environmental Policy	
EVPP 377	Applied Ecology	
EVPP 419	Marine Mammal Biology and Conservation	
EVPP 420	Marine Mammal Biology and Conservation Field Course	
EVPP 421	Marine Conservation	
EVPP 440	Field Environmental Science [2]	
EVPP 490	Special Topics in Environmental Science and Policy [2]	
INTS 401	Conservation Biology (Mason Core) [3]	
Total Credits		4-7

[1] Other conservation-oriented classes may also be applicable as electives for this minor if approved by the faculty coordinator for the minor.

[2] Conservation-oriented topics only.

[3] 3 of 6 credits count toward electives if the course is taken to satisfy Core Biology requirement above.

Conservation Studies Minor (COS)

Banner Code: CNST

Younsung Kim, Undergraduate Program Director

Email: espug@gmu.edu
Website: smconservation.gmu.edu

This minor is designed for undergraduate students who wish to augment their primary academic program with conservation studies taught in an experiential manner. There are three semester-long options by which students can complete the minor including topics such as: "Conservation, Biodiversity and Society", "Wildlife Ecology and Conservation", or "Endangered Species Conservation." These semesters are grounded in natural science and offer a collection of interdisciplinary courses that combine public policy, sociology, conflict resolution, and global awareness with hands-on experience. Students are in residence at the Smithsonian Conservation Biology Institute (https://nationalzoo.si.edu/conservation/) in Front Royal, Virginia, and are taught by Mason faculty, Smithsonian scientists and practitioners.

The minor is available only to students who enroll in any of the Smithsonian Mason Semesters (https://smconservation.gmu.edu/), semester-long residential programs held at the Smithsonian Conservation Biology Institute (https://nationalzoo.si.edu/conservation/) in Front Royal, VA. The semesters are offered jointly by the College of Humanities and Social Sciences and the College of Science under the auspices of the Smithsonian-Mason School of Conservation (http://smconservation.gmu.edu/).

This is a Green Leaf program.

Admissions & Policies

Admissions

The minor is available only to students who enroll in either of the Smithsonian Mason Semesters, semester-long residential programs held at the Smithsonian Conservation Biology Institute in Front Royal, VA.

Policies

Eight credits of coursework must be unique to the minor and students pursuing this minor must complete one of the options with a minimum grade of 2.00 in each course. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 16

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Environmental and Sustainability Management Graduate Certificate

Banner Code: SC-CERG-ESMG

Younsung Kim

Email: espgrad@gmu.edu
Website: esp.gmu.edu

The purpose of the Environmental and Sustainability Management Graduate Certificate is to prepare students to develop and manage environmental and sustainability initiatives and practices that will reduce, remove, and redress environmental impacts in various types of organizations. With courses offered by the College of Science (https://catalog.gmu.edu/colleges-schools/science/), the Schar School of Policy and Government (https://catalog.gmu.edu/colleges-schools/policy-government/), the School of Business (https://catalog.gmu.edu/colleges-schools/business/), and the Volgenau School of Engineering (https://catalog.gmu.edu/colleges-schools/engineering/), the proposed certificate provides students with a transdisciplinary perspective on environmental and sustainability challenges. Upon completion of the certificate program, graduates will be able to: 1) Identify environmental and sustainability management challenges in the private and public sector; 2) Recognize the mechanisms of public policy making that influence environmental and sustainability management decisions; and 3) Apply fundamental concepts in management science, environmental science, public administration, and management to craft and execute sustainability solutions.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants should have an undergraduate degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a minimum GPA of 3.00 (on a 4.00 scale). No specific undergraduate degree is required.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Requirements

Certificate Requirements

Total credits: 12-13

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Required Courses

Code	Title	Credits
EVPP 638	Corporate Environmental Management and Policy	3

Environmental and Sustainability Studies, BA (COS)

Banner Code: LA-BA-EVSS

Younsung Kim, Undergraduate Program Director

Email: espug@gmu.edu
Website: esp.gmu.edu

The BA in Environmental and Sustainability Studies is a joint program between the College of Humanities and Social Sciences and the College of Science.

This degree provides students with theoretical and practical knowledge of three aspects of environmental and sustainability studies: people, prosperity, and planet. In addition to required core courses, students develop more in-depth knowledge in their choice of concentration. This degree prepares students for employment and graduate study in fields related to social justice, business and public policy, and environmental protection as they relate to the environment and sustainability.

This is a Green Leaf program.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students pursuing this degree must complete a minimum of 60 credits within the major, with a minimum grade of 2.00 in each course.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

This is a Green Leaf program.

Students should be aware of the specific policies associated with this program, located on the Admissions & Policies tab.

Of the credits required for this degree, 14 credits simultaneously fulfill core requirements for the major and Mason Core requirements, and, depending on the concentration and electives chosen, up to 9 credits may simultaneously fulfill Mason Core requirements and college BA requirements.

Core Courses in the Major

Code	Title	Credits
Environmental Science and Society		
EVPP 377	Applied Ecology	3
And completion of one of the following sequences:		11-12
EVPP 108 & EVPP 109 & EVPP 112 & EVPP 113 & EVPP 336	Ecosphere - Introduction to Environmental Science I-Lecture (Mason Core) and Ecosphere- Introduction to Environmental Science I- Lab (Mason Core) and Ecosphere: Introduction to Environmental Science II-Lecture (Mason Core) and Ecosphere: Introduction to Environmental Science II–Lab (Mason Core) and Human Dimensions of the Environment	
or		
EVPP 210 & EVPP 301 & EVPP 302	Environmental Biology: Molecules and Cells and Environmental Science: Biological Diversity and Ecosystems and Environmental Science: Biomes and Human Dimensions	
Individual and Group Behavior		
INTS 334	Environmental Justice (Mason Core)	4
Business and Public Policy		
Select one course from the following:		3
ECON 100	Economics for the Citizen (Mason Core)	
ECON 103	Contemporary Microeconomic Principles (Mason Core)	
ECON 105	Environmental Economics for the Citizen (Mason Core)	
EVPP 322	Business and Sustainability	3
EVPP 361	Introduction to Environmental Policy [1]	3
or GOVT 361	Introduction to Environmental Policy	
Statistics		
Select one course from the following:		3-4
SOCI 313	Statistics for the Behavioral Sciences (Mason Core)	
BIOL 214	Biostatistics for Biology Majors	
STAT 250	Introductory Statistics I (Mason Core)	
Integration, Analysis, Innovation		
INTS 210	Sustainable World (Mason Core)	4
EVPP 480	Sustainability in Action (Mason Core)	4
Select one course from the following:		3
INTS 390	International Internship (Mason Core) (minimum of 3 credits required)	
INTS 398	Experiential Learning (minimum of 3 credits required)	
INTS 498	Experiential Learning (minimum of 3 credits required)	
INTS 490	Internship (minimum of 3 credits required)	
EVPP 395	Undergraduate Research in Environmental Science and Policy (minimum of 3 credits required)	
EVPP 494	Internship (minimum of 3 credits required)	
Total Credits		41-43

[1] Satisfies the college BA requirement for social and behavioral science.

Concentration in the Major

Available Concentrations

- Concentration in Business and Sustainability (BUSU)
- Concentration in Climate Change and Society (CCSO)
- Concentration in Conservation and Sustainability (CSUS)
- Concentration in Environmental Policy and Economics (EVPE)
- Concentration in Equity and Environmental Justice (EQEJ)
- Concentration in Sustainable Food and Agriculture (SFG)

Concentration in Business and Sustainability (BUSU)

The requirements for this concentration, depending on the electives chosen, may satisfy the college BA requirement in philosophy and religious studies (PHIL 243 Global Environmental Ethics (Mason Core), PHIL 305 Business Ethics).

Students who have already taken and received credit for MGMT 303 Principles of Management or OM 303 Operations Management shall substitute MGMT 303 Principles of Management for MBUS 301 Managing People and Organizations in a Global Economy and OM 303 Operations Management for MBUS 306 Managing Projects and Operations. Both courses cannot be taken for credit. Students who have taken and received credit for both ACCT 203 Survey of Accounting and FNAN 303 Financial Management shall substitute the combination for MBUS 300 Accounting in a Global Economy. All three courses cannot be taken for credit.

Core Courses

Code	Title	Credits
Required Courses		
MBUS 300	Accounting in a Global Economy	3
MBUS 301	Managing People and Organizations in a Global Economy	3
MBUS 306	Managing Projects and Operations	3
Additional Course		
Select one course (3 credits) from the following:		3
GOVT 353	Social Entrepreneurship	
EVPP 434	Food-Energy-Water Nexus	
INTS 375	Special Topics (when topic is relevant with approval)	
INTS 450	Social Innovation in Action	
INTS 475	Special Topics (when topic is relevant with approval)	
MBUS 304	Entrepreneurship: Starting and Managing a New Enterprise	
MGMT 451	Introduction to Entrepreneurship	
EVPP 490	Special Topics in Environmental Science and Policy (when topic is relevant with approval)	
EVPP 505	Selected Topics in Environmental Science (when topic is relevant with approval)	
Total Credits		12

Two Courses

Code	Title	Credits
Select two courses (6 credits) from the following:		6
ECON 335	Environmental Economics	
EVPP 338	Economics of Environmental Policy	
EVPP 362	Intermediate Environmental Policy	
GGS 307	Geographic Approaches for Sustainable Development	
INTS 204	Leadership Theory and Practice	
PHIL 243	Global Environmental Ethics (Mason Core)	
PHIL 305	Business Ethics	
Other course work with advisor approval		
Total Credits		6

Concentration in Climate Change and Society (CCSO)

The requirements for this concentration, depending on the electives chosen, may satisfy the college BA requirement in philosophy and religious studies (PHIL 243 Global Environmental Ethics (Mason Core), PHIL 343 Topics in Environmental Philosophy (Mason Core)).

Required Courses

Code	Title	Credits
CLIM 101	Global Warming: Weather, Climate, and Society (Mason Core)	3-4
or GGS 121	Dynamic Atmosphere and Hydrosphere (Mason Core)	
EVPP 432	Energy Policy	3
EVPP 436	The Human Dimensions of Global Climate Change	3
Total Credits		9-10

Three Courses

Code	Title	Credits
Select three courses (9 credits) from the following:		9
CLIM 102	Introduction to Global Climate Change Science (Mason Core)	
CLIM 314	Severe and Extreme Weather	
CLIM 319	Air Pollution	
EVPP 362	Intermediate Environmental Policy	
EVPP 378	RS: Ecological Sustainability (Mason Core)	
EVPP 434	Food-Energy-Water Nexus	
EVPP 442	Urban Ecosystems and Processes	
EVPP 490	Special Topics in Environmental Science and Policy (when topic is relevant with approval)	
EVPP 505	Selected Topics in Environmental Science (when topic is relevant with approval)	
GGS 302	Global Environmental Hazards	
GGS 304	Population Geography (Mason Core)	
GGS 306	Urban Geography	
GGS 309	Introduction to Weather and Climate	
GGS 312	Physical Climatology	
GGS 314	Severe and Extreme Weather	
INTS 375	Special Topics (when topic is relevant with approval)	

INTS 475	Special Topics (when topic is relevant with approval)
PHIL 243	Global Environmental Ethics (Mason Core) [1]
PHIL 343	Topics in Environmental Philosophy (Mason Core) [1]
Other course work with advisor approval	
Total Credits	9

[1] Satisfies the college BA requirement in philosophy and religious studies.

Concentration in Conservation and Sustainability (CSUS)

Smithsonian-Mason Program

Students complete one of the programs offered through the Smithsonian-Mason School of Conservation in cooperation with the Smithsonian Conservation Biology Institute.

Conservation, Biodiversity and Society Option (16 credits)

Code	Title	Credits
CONS 320	Conservation in Practice	3
CONS 401	Conservation Theory	3
CONS 402	Applied Conservation	4
CONS 410	Human Dimensions in Conservation (Mason Core)	3
CONS 490	RS: Integrated Conservation Strategies (Mason Core)	3
Total Credits		16

Wildlife, Ecology, and Conservation Option (16 credits)

Offered only in Fall semesters, students complete four required courses:

Code	Title	Credits
CONS 400	Conservation Seminar	2
CONS 404	Biodiversity Monitoring	4
CONS 405	Landscape and Macrosystems Ecology	4
CONS 496	Research in Conservation (Mason Core)	6
Total Credits		16

Endangered Species and Conservation Option (16 credits)

Offered only in Spring semesters, students complete four required courses:

Code	Title	Credits
CONS 400	Conservation Seminar	2
CONS 406	Small Population Management	4
CONS 491	RS: Conservation Management Planning (Mason Core)	4
CONS 496	Research in Conservation (Mason Core)	6
Total Credits		16

Three Credits

Code	Title	Credits
Select a minimum of three credits from the following:		3
BIOL 332	Insect Biology (when topic is relevant with approval)	
BIOL 472	Introductory Animal Behavior	
EVPP 337	Environmental Policy Making in Developing Countries	
EVPP/BIOL 350	Freshwater Ecosystems	
EVPP 355	Ecological Engineering and Ecosystem Restoration	
EVPP 401	Integrated Environmental Assessment	
EVPP 408	Mushrooms, Molds and Society	
EVPP 419	Marine Mammal Biology and Conservation	
EVPP 421	Marine Conservation	
EVPP 423	Beekeeping and Sustainability	
EVPP/BIOL 427	Conservation Medicine	
EVPP 430	Fundamentals of Environmental Geographic Information Systems	
EVPP 432	Energy Policy	
EVPP 434	Food-Energy-Water Nexus	
EVPP 436	The Human Dimensions of Global Climate Change	
EVPP/BIOL 437	Orinthology	
EVPP/BIOL 438	Mammalogy	
EVPP/BIOL 439	Herpetology	
EVPP/BIOL 449	Marine Ecology	
EVPP 451	Fungi and Ecosystems	
EVPP 460	Infectious Diseases of Wildlife	
EVPP 475	Global Biodiversity Governance	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 307	Geographic Approaches for Sustainable Development	
GGS 321/ BIOL 374	Biogeography	
INTS 211	Introduction to Conservation Studies (Mason Core)	
INTS 301	Science in the News (Mason Core)	
INTS 304	Social Movements and Community Activism (Mason Core)	
INTS 311	The Mysteries of Migration: Consequences for Conservation (Mason Core)	
INTS 331	The Nonprofit Sector (Mason Core)	
INTS 370	Sustainable Food Systems	
INTS 371	Food Systems and Policy (Mason Core)	
INTS 401	Conservation Biology (Mason Core)	
INTS 403	Conservation Behavior (Mason Core)	
INTS 375	Special Topics (when topic is relevant with approval)	
INTS 475	Special Topics (when topic is relevant with approval)	
EVPP 490	Special Topics in Environmental Science and Policy (when topic is relevant with approval)	
EVPP 505	Selected Topics in Environmental Science (when topic is relevant with approval)	

Other course work with advisor approval	
Total Credits	3

Concentration in Environmental Policy and Economics (EVPE)

The requirements for this concentration satisfy the Mason Core requirement in social and behavioral science (ECON 104 Contemporary Macroeconomic Principles (Mason Core)) and, depending on the elective chosen, may fulfill the college BA requirement in non-Western culture (ECON 362 African Economic Development (Mason Core)).

Required Courses

Completion of these courses will satisfy the Mason Core social and behavioral science requirement.

Code	Title	Credits
EVPP 338	Economics of Environmental Policy	3
EVPP 362	Intermediate Environmental Policy	3
or GOVT 362	Intermediate Environmental Policy	
GOVT 351	Administration in the Political System	3
Total Credits		9

Nine Credits

Code	Title	Credits
Select a minimum of nine credits from the following:		9
COMM 412	Politics and the Mass Media	
CONF 340	Global Conflict Analysis and Resolution (Mason Core)	
ECON 103	Contemporary Microeconomic Principles (Mason Core) (if not used to meet the Business and Public Policy core requirement)	
ECON 104	Contemporary Macroeconomic Principles (Mason Core)	
ECON 306	Intermediate Microeconomics	
ECON 311	Intermediate Macroeconomics	
ECON 330	Public Finance	
ECON 345	Introduction to Econometrics	
ECON 360	Economics of Developing Areas (Mason Core)	
ECON 412	Game Theory and Economics of Institutions	
EVPP 337	Environmental Policy Making in Developing Countries	
EVPP 396	Directed Topic in Environmental Science and Policy	
EVPP 401	Integrated Environmental Assessment	
EVPP 432	Energy Policy	
GEOL 420	Earth Science and Policy (Mason Core)	
GGS 305	Economic Geography	
GGS 307	Geographic Approaches for Sustainable Development	
GOVT 307	Legislative Behavior	
GOVT 343	International Political Economy	
GOVT 357	Urban Planning	
GOVT 364	Public Policy Making	
GOVT 452	Administrative Law and Procedures	
GOVT 464	Issues in Public Policy and Administration	
INTS 331	The Nonprofit Sector (Mason Core)	
INTS 371	Food Systems and Policy (Mason Core)	
USST 301	Urban Growth in a Shrinking World	
EVPP 490	Special Topics in Environmental Science and Policy (when topic is relevant with approval)	
EVPP 505	Selected Topics in Environmental Science (when topic is relevant with approval)	
INTS 375	Special Topics (when topic is relevant with approval)	
INTS 475	Special Topics (when topic is relevant with approval)	
Other course work with advisor approval		
Total Credits		9

Concentration in Equity and Environmental Justice (EQEJ)

Required Courses

Code	Title	Credits
EVPP 362	Intermediate Environmental Policy	3
EVPP 436	The Human Dimensions of Global Climate Change	3
INTS 336	Poverty, Wealth and Inequality in the US (Mason Core)	3
INTS 337	Social Justice Consciousness and Action	3
Total Credits		12

Six Credits

Code	Title	Credits
Select a minimum of six credits from the following:		6
CONF 394	Human Rights and Inequality	
GGS 304	Population Geography (Mason Core)	
GGS 307	Geographic Approaches for Sustainable Development	
GOVT 445	Human Rights	
INTS 304	Social Movements and Community Activism (Mason Core)	
INTS 331	The Nonprofit Sector (Mason Core)	
INTS 362	Social Justice and Human Rights (Mason Core)	
INTS 402	Plants and People - Sustenance, Ceremony, and Sustainability	
INTS 450	Social Innovation in Action	
SOCI 320	Globalization and Social Change (Mason Core)	
SOCI 355	Social Inequality (Mason Core)	
INTS 375	Special Topics (when topic is relevant with approval)	
INTS 475	Special Topics (when topic is relevant with approval)	
EVPP 490	Special Topics in Environmental Science and Policy (when topic is relevant with approval)	
EVPP 505	Selected Topics in Environmental Science (when topic is relevant with approval)	

Other course work with advisor approval	
Total Credits	6

Concentration in Sustainable Food and Agriculture (SFG)

Required Courses

Code	Title	Credits
INTS 370	Sustainable Food Systems	6
INTS 371	Food Systems and Policy (Mason Core)	3
INTS 470	Professional Pathways in Sustainable Food Systems	1
Total Credits		10

Eight Credits

Code	Title	Credits
Select a minimum of eight credits from the following:		8
ANTH 366	Food and Human Evolution	
ANTH 376	Food and Culture	
BIOL 344	Plant Diversity and Evolution	
BIOL 345	Plant Ecology	
EVPP 423	Beekeeping and Sustainability	
EVPP 434	Food-Energy-Water Nexus	
EVPP 436	The Human Dimensions of Global Climate Change	
GGS 303	Geography of Resource Conservation (Mason Core)	
INTS 331	The Nonprofit Sector (Mason Core)	
INTS 402	Plants and People - Sustenance, Ceremony, and Sustainability	
NUTR 295	Introduction to Nutrition (Mason Core)	
NUTR 318	Global Nutrition and Food Security	
NUTR 383	Taste and Place	
NUTR 408	Food Security	
NUTR 421	Community Nutrition	
NUTR 435	Urban Agriculture	
INTS 375	Special Topics (when topic is relevant with approval)	
INTS 475	Special Topics (when topic is relevant with approval)	
EVPP 490	Special Topics in Environmental Science and Policy (when topic is relevant with approval)	
EVPP 505	Selected Topics in Environmental Science (when topic is relevant with approval)	
Other course work with advisor approval		
Total Credits		8

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as "writing intensive" in their major at the 300 level or above. Students majoring in environmental and sustainability studies should consult an advisor to learn how to fulfill this requirement.

Upper Level Requirement

Students seeking a bachelor's degree must apply at least 45 credits of upper-level courses (numbered 300 or above) toward graduation requirements.

Additional Electives

Any remaining credits may be completed with elective courses to bring the degree total to 120.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

College Level Requirements for the BA degree

In addition to the Mason Core program, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill a college level requirement may also be used simultaneously to satisfy other requirements (Mason Core requirements or requirements for the major).

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] Note that the following courses may not be used to fulfill this requirement:

- PHIL 323 Classical Western Political Theory
- PHIL 324 Modern Western Political Theory
- PHIL 327 Contemporary Western Political Theory
- PHIL 393 Humanities College to Career
- PHIL 460 Senior Seminar in Philosophy, Politics, and Economics

Additionally, PHIL 253 Philosophy and Literature (Mason Core), RELI 235 Religion and Literature (Mason Core), and RELI 333 Spiritual Autobiography (Mason Core) cannot be used to fulfill both the philosophy/religious studies requirement and the Mason Core literature requirement.

Social and Behavioral Sciences

Code	Title	Credits
Select 3 credits of social and behavioral sciences from the following (additional to the Mason Core social and behavioral sciences requirement) [1]		3
ANTH		
CRIM		
ECON		
GOVT		
HIST [2]		
LING		
PSYC		
SOCI		
Or choose from the following GGS courses:		
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	

[1] The two courses used to fulfill the combined college and Mason Core requirements must be from different disciplines in the social and behavioral sciences.

[2] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core) may not be used to fulfill this requirement.

Foreign Language

Code	Title	Credits
Intermediate-level proficiency in one foreign language, fulfilled by: [1]		
Completing 3 credits in a foreign language numbered 202 (or higher level courses taught in the language)		
Or achieving a satisfactory score on an approved proficiency test		
Or completing the following ASL three course sequence:		
EDSE 115	American Sign Language (ASL) I	
EDSE 116	American Sign Language (ASL) II	
EDSE 219	American Sign Language (ASL) III	

[1] Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Non-Western Culture

Select 3 credits of an approved course in the study of a non-Western culture (additional to the Mason Core requirement in global understanding)

Code	Title	Credits
Select 3 credits (additional to Mason Core Global Understanding requirement) [1]		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	3
ANTH 381	Medical Anthropology	3
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core)	3
ARAB 360	Topics in Arabic Cultural Production	3
ARAB 420	Survey of Arabic Literature	3
ARAB 440	Topics in Arabic Religious Thought and Texts (Mason Core)	3
ARTH 203	Survey of Asian Art (Mason Core)	3
ARTH 204	Survey of Latin American Art (Mason Core)	3
ARTH 206	Survey of African Art (Mason Core)	3
ARTH 318	Art and Archaeology of Ancient Egypt	3

[1] A course used to fulfill the Mason Core global understanding requirement may not be simultaneously used to satisfy this college-level requirement. A course used to fulfill this requirement may be used simultaneously to fulfill any other requirements (Mason Core requirements, college-level requirements, or requirements for the major). Additional information on waivers can be found at the Office of Undergraduate Academic Affairs (http://chssundergrad.gmu.edu/).

Environmental Consulting Minor

Banner Code: ENCO

Younsung Kim, Undergraduate Program Director

Email: espug@gmu.edu
Website: esp.gmu.edu

Many students who pursue natural or social science majors find their first employment in Environmental Consulting. To be competitive in this field, applicants require an interdisciplinary background (e.g., communication, policy, management) and professional consulting experience. To better prepare Mason's graduates for this career field and to streamline the transition from the classroom into the workforce, the Department of Environmental Science and Policy offers a minor in Environmental Consulting. This minor includes classes in communication, technical writing, applied environmental science, environmental law, and business management and is finalized with a capstone course and an internship with local consulting companies.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00.

For policies governing all minors, see AP.5.3.4 Minors (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-3-4).

Requirements

Minor Requirements

Total credits: 19

Required Courses

Code	Title	Credits
EVPP 377	Applied Ecology	3
EVPP 490	Special Topics in Environmental Science and Policy (when the topic is "Principles of Environmental Law")	3
or EVPP 362	Intermediate Environmental Policy	
COMM 320	Business and Professional Communication	3
or COMM 335	Organizational Communication	
ENGH 388	Professional and Technical Writing	3
MBUS 306	Managing Projects and Operations	3
Total Credits		15

Capstone and Internship Requirement

Code	Title	Credits
Capstone		
EVPP 490	Special Topics in Environmental Science and Policy (when the topic is "Environmental Consulting")	1
Internship		
EVPP 494	Internship	3
or COMM 450	Internship in Communication	
Total Credits		4

Environmental Policy Minor

Banner Code: EVP

Younsung Kim, Undergraduate Program Director

Email: espug@gmu.edu
Website: esp.gmu.edu

Students pursuing the Environmental Policy Minor will study aspects of human interactions with the natural world. This minor will provide students with a broad overview of ecology, the environmental consequences of human action, and conceptual and practical sustainability efforts. This includes relationships between social and biological sciences and environmental law. The minor complements majors in natural science but is also suitable for non-science majors.

This is a Green Leaf program.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Minor Requirements

Total credits: 21

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must successfully complete the following courses with a minimum 2.00 GPA.

Core Courses

Code	Title	Credits
EVPP 336	Human Dimensions of the Environment	3
EVPP 361	Introduction to Environmental Policy	3
EVPP 377	Applied Ecology	3
or BIOL 377	Applied Ecology	

PHIL 343	Topics in Environmental Philosophy (Mason Core)	3
Total Credits		12

Additional Courses

Code	Title	Credits
Select 9 credits from the following: [1]		9
EVPP 318	Conservation Biology	
EVPP 337	Environmental Policy Making in Developing Countries	
EVPP 338	Economics of Environmental Policy	
EVPP 419	Marine Mammal Biology and Conservation	
EVPP 421	Marine Conservation	
EVPP 440	Field Environmental Science [2]	
EVPP 490	Special Topics in Environmental Science and Policy [2]	
EVPP 505	Selected Topics in Environmental Science [2]	
EVPP 543	Tropical Ecosystems	
GEOL 420	Earth Science and Policy (Mason Core)	
ANTH 370	Environment and Culture	
ANTH 399	Issues in Anthropology	
PRLS 300	People with Nature	
PRLS 402	Human Behavior in Natural Environments	
PRLS 526	Environmental Education and Resource Interpretation	
SOCI 320	Globalization and Social Change (Mason Core)	
SOCI 332	The Urban World (Mason Core)	
TOUR 340	Sustainable Tourism	
TOUR 362	Cultural and Environmental Interpretation	
Total Credits		9

[1] Other appropriate courses may be approved by the coordinator of the minor.

[2] Relevant topics only.

Environmental Science and Policy, MS

Banner Code: SC-MS-EVSP

Stephanie Lister, Graduate and Undergraduate Program Coordinator

Email: espgrad@gmu.edu
Website: esp.gmu.edu

This master's program meets the increasing need for trained environmental professionals who can address the problems of land and water management, land use and urbanization, wetland loss, microbial ecology, bioremediation, conservation biology, and ecosystem preservation. These professionals will also contribute to the analysis and resolution of global problems such as deforestation, insufficient world food supplies, population growth, planetary health, and global climate change/warming. Areas of specific departmental focus include ecosystems, conservation, environmental biocomplexity, molecular ecology, sustainability science, environmental policy and management, and human/environmental interactions.

Environmental problems are defined in the real world and do not necessarily conform to traditional academic disciplines. As such, solutions require creative combinations of diverse interests and subjects. Effective training requires rigorous, problem-focused transdisciplinary action in a setting in which research is an essential element supporting instruction.

This has been designated a Green Leaf program.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies. Additionally, information on the admission of international students can be found in Admission of International Students.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Applicants should hold a bachelor's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a GPA of 3.00 in natural or Earth sciences, engineering, resource planning, environmental studies, or a field that leads to an environmental focus.

Applicants should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology. Applicants who lack this coursework should contact the graduate coordinator's office for advice. Successful completion of a two-semester sequence of introductory graduate-level environmental chemistry and biology courses can be used to satisfy the biology and chemistry prerequisites for admission. These introductory courses would be in addition to the requirements for the degree.

Application Requirements

Applicants should submit the following:

- Completed George Mason University George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).
- Three letters of recommendation, including at least one from a former professor or, if not available, from someone with a PhD.
- The GRE is required.
- Statement of interest indicating: Desired concentration, potential areas of environmental focus/research interest, interactions with potential faculty advisors, and career goals.
- Contact a potential George Mason faculty advisor (appropriate for research interests). An endorsement letter from the potential advisor must be sent to the Department of Environmental Science and Policy's graduate office; the availability of an advisor in the student's area of interest is a prerequisite for admission.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Course Selections

Some program requirements may be fulfilled by completing courses from a variety of academic units at Mason. A student's course selections should reflect a coherent individual program focus, which is stated and briefly described in the program of study. Course selections should also support the research component of the student's degree program (if applicable) and should be developed in close consultation with the supervisory committee. The supervisory committee approves a coursework program (the program of study) individually for each student.

In special cases, the graduate program director may permit the substitution of an alternative course in place of a required one.

Supervisory Committee

Students must form a supervisory committee and submit a program of study to the graduate coordinator for approval within the first 9 credits of coursework or by the end of the second semester, whichever comes first.

The supervisory committee consists of the advisor and at least two other members, chosen in consultation with the advisor, and must conform to AP.6.9 Requirements for Master's Degrees.

Requirements

Degree Requirements

Total credits: 33

This is a Green Leaf program.

Students should refer to Admissions & Policies for specific policies related to this program.

Students may select for their degree to culminate in either a research project (3 credits) or a thesis (3-6 credits). The concentration credit amount requirements below are directly related to this selection of either a research project or thesis.

Students in all of the concentrations will complete the concentration's requirements and the research requirement with a minimum of 33 credits.

Core Courses

Code	Title	Credits
Science Courses		
Choose 3 credits from the following:		3
EVPP 518	Conservation Biology	
EVPP 607	Fundamentals of Ecology	
EVPP 648	Population Ecology	
Statistics Courses		
Choose 3 credits from the following:		3
EVPP 632	Qualitative Research Methods for Environmental Scientists	
EVPP 651	Multivariate Data Analysis for Ecology and Environmental Science	
SOCI 620	Methods and Logic of Social Inquiry	
STAT 554	Applied Statistics I	
Policy Courses		
Choose 3 credits from the following:		3
EVPP 524	Introduction to Environmental and Resource Economics	
EVPP 608	Introduction to Environmental Social Science	
EVPP 635	Environment and Society	
EVPP 642	Environmental Policy	
Science and Policy Courses		
Choose 3 credits from the following:		3
EVPP 505	Selected Topics in Environmental Science (When the topic is "Evidence-based Policymaking: Using the Environmental Sciences for Governance")	
EVPP 670	Environmental Law	
Seminar Courses		
EVPP 692	Master's Seminar in Environmental Science and Public Policy	1
EVPP 991	Advanced Seminar in Environmental Science (When the topic is: Experimental Design for Environmental Scientists)	2
Research Requirement		**3-6**
The research requirement may be satisfied in one of two ways: A research project or a formal thesis. The depth and sophistication of the research differs between the two options. The thesis normally involves original research with independent acquisition and interpretation of data, with the goal of peer-reviewed publication. Projects are generally less extensive and can include a broader range of activities. Choose from one of the following:		
Research Project Option		
Students fulfilling the research requirement with the project option register for EVPP 798 Master's Research Project in Environmental Science and Public Policy and are required to take a comprehensive examination covering knowledge mastered throughout the program of study. This examination includes both a written and an oral component and is administered by the student's supervisory committee.		
EVPP 798	Master's Research Project in Environmental Science and Public Policy (3 credits)	
Thesis Option		
Students fulfilling the research requirement with the thesis option register for EVPP 799 Master's Thesis in Environmental Science and Public Policy, present their results in a public seminar, and defend their thesis before their supervisory committee. Students will be graded "Satisfactory/No Credit" on the research requirement.		
EVPP 799	Master's Thesis in Environmental Science and Public Policy (3-6 credits)	
Electives		
If necessary, students must take additional electives or concentration courses to bring the degree total to 33 credits. These courses must be approved by the student's supervisory committee and outlined on the student's program of study.		
Total Credits		18-21

Aquatic Ecology Concentration (AQEC)

This concentration will provide students with a well-grounded master's in the study of aquatic environments such as lakes, streams, watersheds, and estuaries. Emphasis is placed on food webs, biogeochemical cycles, water quality, habitat characteristics, and life histories of aquatic organisms. Students will become proficient with research tools including literature review, field and laboratory methods, and analytical tools as well as applications to management issues.

Aquatic Science

Code	Title	Credits
EVPP 550	Waterscape Ecology and Management	3
EVPP 581	Estuarine and Coastal Ecology	3
Choose 3-6 credits from the following:		3-6
EVPP 519	Marine Mammal Biology and Conservation	
EVPP 521	Marine Conservation	
EVPP 536	The Diversity of Fishes	
EVPP 545	Principles of Environmental Toxicology	
EVPP 549	Marine Ecology	
EVPP 563	Coastal Morphology and Processes	
EVPP 608	Introduction to Environmental Social Science	
EVPP 619	The Challenge of Biodiversity	
EVPP 623	Translating Environmental Policy into Action	
EVPP 635	Environment and Society	
EVPP 641	Environmental Science and Public Policy	
EVPP 642	Environmental Policy	
EVPP 643	Microbial Ecology	
EVPP 646	Wetland Ecology and Management	
EVPP 648	Population Ecology	
CLIM 512	Physical Oceanography	
Choose 3 credits from the following:		3
EVPP 515	Molecular Environmental Biology I	
EVPP 555	Lab in Waterscape Ecology	
EVPP 582	Estuarine and Coastal Ecology Laboratory	
EVPP 615	Molecular Environmental Biology II	
EVPP 647	Wetland Ecology Lab and Field	
EVPP 651	Multivariate Data Analysis for Ecology and Environmental Science	
GGS 653	GIS Analysis and Application	
STAT 554	Applied Statistics I	
Total Credits		12-15

Conservation Science and Policy Concentration (COSP)

This concentration is designed to foster an interdisciplinary, research-oriented degree focusing on the conservation of threatened species and habitats, integrating biological sciences and the human dimensions of conservation practice.

Students may take courses offered by the Department of Environmental Science and Policy and other departments, including CONS courses which are offered through the Smithsonian Mason School of Conservation. This unique partnership with the Smithsonian-Mason School of Conservation (SMSC) in Front Royal, Virginia offers students hands-on education in cutting-edge conservation science and human dimensions through residential, intensive classes. SMSC is renowned for its conservation research and training of conservation practitioners around the world and instructors for these classes are drawn from SMSC's conservation scientists and other experts from around the world.

Code	Title	Credits
EVPP 637	Human Dimensions of Climate Change	3
Choose 3 credits from the following:		3
EVPP 518	Conservation Biology	
EVPP 619	The Challenge of Biodiversity	
EVPP 621	Overview of Biodiversity Conservation	
Choose 3 credits from the following:		3
EVPP 505	Selected Topics in Environmental Science (When the topic is "Evidence-based Policymaking: Using the Environmental Sciences for Governance")	
EVPP 529	Environmental Science Communication	
Choose 3-6 credits from the following:		3-6
EVPP 515	Molecular Environmental Biology I	
EVPP 527	Conservation Medicine	
EVPP 560	Infectious Diseases of Wildlife	
EVPP 607	Fundamentals of Ecology	
EVPP 615	Molecular Environmental Biology II	
EVPP 620	Development of U.S. Environmental Policies	
EVPP 623	Translating Environmental Policy into Action	
EVPP 648	Population Ecology	
GGS 553	Geographic Information Systems	
Total Credits		12-15

Environmental Science and Policy Concentration (EVSP)

The Environmental Science and Policy concentration is the largest within the master's and serves as a home for a broad array of research foci. It encourages an independent and creative approach to the development of curricula that reside in the general field of environmental science and policy.

Code	Title	Credits
Choose at least 3 credits from the following:		3
EVPP 527	Conservation Medicine	
EVPP 532	Animal Behavior	
EVPP 543	Tropical Ecosystems	
EVPP 648	Population Ecology	
Choose at least 3 credits from the following:		3
EVPP 531	Land-use Modeling Techniques and Applications	
EVPP 650	Ecosystem Analysis and Modeling	
STAT 525	Nonparametric Statistics and Categorical Data Analysis	
STAT 535	Analysis of Experimental Data	
Choose 6-9 credits from the following:		6-9
EVPP 521	Marine Conservation	
EVPP 533	Energy Policy	
EVPP 542	Urban Ecosystems Processes	

EVPP 550	Waterscape Ecology and Management	
EVPP 560	Infectious Diseases of Wildlife	
EVPP 619	The Challenge of Biodiversity	
EVPP 622	Management of Wild Living Resources	
EVPP 623	Translating Environmental Policy into Action	
EVPP 641	Environmental Science and Public Policy	
EVPP 677	Applied Ecology and Ecosystem Management	
Total Credits		12-15

Communication for Environmental Science, Policy, and Human Behavior (CESP)

The ability to communicate underlies all successful human cooperation. With the growth of anthropogenic global threats such as biodiversity loss and climate change, communication that supports environmental knowledge formation, policy, and behavior change is needed more than ever. Two courses in the concentration from the department, supplemented by those across the university, will allow students to focus on one of these topics. Other classes aside from the core courses may be substituted as needed.

Code	Title	Credits
EVPP 505	Selected Topics in Environmental Science (When the topic is "Evidence-based Policymaking: Using the Environmental Sciences for Governance")	3
EVPP 529	Environmental Science Communication	3
Choose 3-6 credits from one of the following groupings:		3-6
Policy and Governance Grouping		
EVPP 575	Global Biodiversity Governance	
COMM 637	Risk Communication	
GOVT 510	American Government and Politics	
PUAD 540	Public Policy Process	
Behavior Change Grouping		
COMM 637	Risk Communication	
COMM 660	Climate Change and Sustainability Communication Campaigns	
COMM 670	Social Marketing	
COMM 706	Strategic Communication	
Science in Society Grouping		
COMM 602	Theories and Research of Mass Communication	
COMM 639	Science Communication	
COMM 642	Science and the Public	
COMM 735	Crisis Communication	
Choose at least 3 credits from the following:		3
GGS 553	Geographic Information Systems	
GGS 681	Social Media Analysis	
COMM 650	Research Methodologies in Communication	
COMM 775	Media Content Analysis	
EDRS 811	Quantitative Methods in Educational Research	
EDRS 827	Introduction to Measurement and Survey Development	
POGO 511	Introductory Data Analysis for Policy and Government	
POGO 646	Policy and Program Evaluation	
PSYC 557	Psychometric Methods	
PSYC 611	Advanced Statistics	
PUBP 704	Statistical Methods in Policy Analysis	
SOCI 620	Methods and Logic of Social Inquiry	
SOCI 631	Survey Research	
Total Credits		12-15

Environment and Management Concentration (EVM)

This concentration combines the managerial and administrative skills developed in a traditional master of public administration degree program with the scientific knowledge and understanding normally found in a master of science degree. It is especially meant for individuals working in or aspiring to work as managers in the environmental field in government or private industry.

Code	Title	Credits
EVPP 641	Environmental Science and Public Policy	3
EVPP 677	Applied Ecology and Ecosystem Management	3
Choose 3 credits from the following:		3
EVPP 638	Corporate Environmental Management and Policy	
PUAD 502	Administration in Public and Nonprofit Organizations	
Choose 3-6 credits from the following:		3-6
EVPP 505	Selected Topics in Environmental Science (When the topic is "Evidence-based Policymaking: Using the Environmental Sciences for Governance")	
EVPP 524	Introduction to Environmental and Resource Economics	
EVPP 525	Economics of Human/Environment Interactions	
EVPP 529	Environmental Science Communication	
EVPP 533	Energy Policy	
EVPP 542	Urban Ecosystems Processes	
EVPP 545	Principles of Environmental Toxicology	
EVPP 550	Waterscape Ecology and Management	
EVPP 560	Infectious Diseases of Wildlife	
EVPP 620	Development of U.S. Environmental Policies	
EVPP 646	Wetland Ecology and Management	
GGS 553	Geographic Information Systems	
Total Credits		12-15

Energy and Sustainability Policy and Science (ESPS)

Many mid-level energy and sustainability positions in the public and private sectors require multidisciplinary grounding in science, policy, and methods. To provide such a foundation, this concentration combines the scientific knowledge normally acquired through a Master of Science degree with development of relevant policy and methods skills.

Code	Title	Credits
Required Foundation		
EVPP 533	Energy Policy	3
Choose one from the following:		3
EVPP 534	Food-Energy-Water Nexus	
GGS 507	Geographic Approaches for Sustainable Development	
Science		
Choose one from the following:		3
EVPP 542	Urban Ecosystems Processes	
EVPP 677	Applied Ecology and Ecosystem Management	
GEOL 521	Geology of Energy Resources	
PHYS 581	Topics in Renewable Energy	
CEIE 501	Sustainable Development	
CEIE 550	Environmental Engineering Systems	
CEIE 634	Geoenvironmental Design	
CEIE 690	Topics in Civil Engineering	
Policy and Methods Electives		
Choose 1 or 2 from the following: [1]		3-6
EVPP 505	Selected Topics in Environmental Science (When the topic is "Energy Law & Regulation," or "Fundamentals of Environmental GIS" (EVPP 505 can be taken twice if these two topics are taken separately))	
EVPP 534	Food-Energy-Water Nexus	
EVPP 503	Field Mapping Techniques	
or GEOL 553	Field Mapping Techniques	
EVPP 638	Corporate Environmental Management and Policy	
EVPP 650	Ecosystem Analysis and Modeling	
CSS 645	Spatial Agent-Based Models of Human-Environment Interactions	
GGS 507	Geographic Approaches for Sustainable Development	
ECON 695	Special Topics in Economics	
NUTR 608	Perspectives on Food Security	
NUTR 630	Global Nutrition	
Total Credits		12-15

[1] Choose courses that have not already been taken.

Conservation Medicine & Planetary Health Concentration (CMPH)

Conservation Medicine and Planetary Health (CMPH) are emerging disciplines that address complex health problems that follow disturbances to the Earth's natural systems requiring transdisciplinary collaborations, systems thinking, and adaptive management approaches to health and ecology. Conservation Medicine evolved from the singular key principle that *health connects all species in the planet.* Planetary Health is focused on characterizing the human health impacts of anthropogenic disruptions of Earth's natural systems. The CMPH concentration will provide training in quantitative and qualitative research methods and expand the student's ability to think outside of the box and work beyond traditional disciplinary silos to address complex health issues rooted in ecological principles.

Code	Title	Credits
Students should complete the Required Foundation and choose either the Conservation Medicine or the Planetary Health areas of focus.		
Required Foundation		
EVPP 505	Selected Topics in Environmental Science (When the topic is "Planetary Health")	3
EVPP 527	Conservation Medicine	3
EVPP 677	Applied Ecology and Ecosystem Management	3
Areas of Focus		**3-6**
Conservation Medicine		
Choose 3-6 credits from the following:		
EVPP 545	Principles of Environmental Toxicology	
EVPP 560	Infectious Diseases of Wildlife	
EVPP 651	Multivariate Data Analysis for Ecology and Environmental Science	
EVPP 575	Global Biodiversity Governance	
BIOD 609	Biodefense Strategy	
GGS 540	Health Geography	
GCH 604	Fundamentals of Epidemiology and Biostatistics	
CLIM 690	Scientific Basis of Climate Change	
PUAD 630	Emergency Planning and Preparedness	
Planetary Health		
Choose 3-6 credits from the following:		
EVPP 525	Economics of Human/Environment Interactions	
EVPP 529	Environmental Science Communication	
EVPP 542	Urban Ecosystems Processes	
EVPP 610	Bioremediation: Theory and Applications	
EVPP 637	Human Dimensions of Climate Change

GCH 543	Global Health	
NUTR 630	Global Nutrition	
Total Credits		12-15

Accelerated Master's

Bachelor's Degree (selected)/ Environmental Science and Policy, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain a Green Leaf-designated bachelor's degree and the Environmental Science and Policy, MS (https://catalog.gmu.edu/colleges-schools/science/environmental-policy/environmental-science-policy-ms/) degrees within an accelerated timeframe. Upon completion of this 141 credit accelerated program, students will be exceptionally well

prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

The GRE exam is not required for this accelerated master's program.

Students should submit three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor (see Graduate Advisor section below) stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated major or minor may apply to this accelerated master's program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) and CHEM 212 General Chemistry II (Mason Core) and three semesters of biology, including a course in ecology, or the equivalent, for example:

Code	Title	Credits
Select one of the following options:		13
Option 1:		
BIOL 213	Cell Structure and Function (Mason Core)	
BIOL 214	Biostatistics for Biology Majors	
BIOL 308	Foundations of Ecology and Evolution	
Option 2:		
EVPP 210	Environmental Biology: Molecules and Cells	
EVPP 301	Environmental Science: Biological Diversity and Ecosystems	
EVPP 302	Environmental Science: Biomes and Human Dimensions	
EVPP 305	Environmental Microbiology Essentials	
EVPP 306	Environmental Microbiology Essentials Laboratory	
Option 3:		
CONS 401	Conservation Theory	
CONS 402	Applied Conservation	
6 credits of BIOL or CONS electives		

Graduate Advisor

By at least the beginning of their senior year, students should seek out a faculty member in the Department of Environmental Science and Policy who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason University (called "program faculty") can serve as master's advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
EVPP 518	Conservation Biology	3
EVPP 529	Environmental Science Communication	3
EVPP 621	Overview of Biodiversity Conservation	3
EVPP 635	Environment and Society	3

Environmental Science and Public Policy, PhD

Banner Code: SC-PHD-EVPP

Stephanie Lister, Graduate and Undergraduate Program Coordinator

Email: espgrad@gmu.edu
Website: esp.gmu.edu

Our graduates contribute to the solution of complex environmental problems, which require the development of knowledge and skills in the collection, analysis, and interpretation of scientific data, as well as in the integration of scientific understanding into the public policy process.

Advisors/Committee Chairs are drawn from faculty in the Department of Environmental Science and Policy as well as other departments in the College of Science and from the School of Integrative Studies.

This has been designated a Green Leaf program.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog. Additionally, information on the admission of international students can be found in the Admission of International Students section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility and Application Requirements

Applicants should also have a bachelor's degree with an overall GPA of at least 3.00. They should have taken at least two semesters of chemistry and three semesters of biology, including a course in ecology.

Applicants to the PhD program should have an advanced degree (e.g. MA, MS, veterinary, or law) in a relevant field. For applicants who fulfill this requirement, the GRE is waived.

For applicants who apply with a Bachelor's Degree or Licentiate (i.e. *Licenciatura*), they should possess exceptional undergraduate academic and research accomplishments. For these applicants, the GRE will be required, with a combined verbal and quantitative score of 310 or higher.

Applicants should submit the following:

- Transcripts from previous university coursework including degrees awarded.
- Three letters of recommendation with at least two from individuals with doctorates.
- Current résumé.
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, the potential focus (environmental science or environmental public policy), contacts that have been made with potential faculty advisors, and an explanation of career and research goals.
- Letter of endorsement from a prospective advisor to include how your research interests coincide with that of your advisor. Information on faculty members eligible to serve as advisors/committee chairs can be found by contacting the department via phone (703-993-3187) or via email (espgrad@gmu.edu).

All students must obtain the consent of a faculty member willing to serve as an advisor prior to being fully admitted to the program. Admission decisions are based on the student's qualifications and the availability of a faculty advisor. An advisor may be changed by mutual consent of student and advisor, or by petition to the graduate program director and the associate dean for student affairs in the College of Science.

Applicants with questions should contact the ESP Graduate Programs Office via phone (703-993-3187) or via email (espgrad@gmu.edu).

Science, Ecology, and Social Science Background

Science Background

Applicants who lack college-level coursework in biology and chemistry (two semesters of each) should complete a two semester sequence of introductory graduate-level environmental chemistry and biology courses as follows:

Code	Title	Credits
EVPP 506	Science of the Environment I	3
EVPP 507	Science of the Environment II	3
Total Credits		6

These introductory courses cannot be added to the graduate program of study, they will be additional credits to the degree's 72 credit total.

Ecology Background

Students without previous coursework in general ecology will be required to take the following introductory graduate course, which may be included in the graduate program of study.

Code	Title	Credits
EVPP 607	Fundamentals of Ecology	3

Social Science Background

Students with little previous coursework in the social sciences will be required to take the following introductory course, which may be included in the graduate program of study.

Code	Title	Credits
EVPP 608	Introduction to Environmental Social Science	3

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credits

For students entering the doctoral program with a master's degree in an academically related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See AP.6.5.2 Reduction of Credits for more information.

Requirements

Degree Requirements

Total credits: 72

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Doctoral Coursework

Students are required to complete a coursework proposal by the end of their second semester. The coursework proposal must be approved by the student's advisor and the graduate program director. In keeping with the general philosophy inherent in a PhD degree, students adopt an individual program that focuses on a specific area of research. The student's coursework must provide the knowledge base from which an original research project in their specific areas of interest can be successfully completed.

Natural Sciences

Code	Title	Credits
Select at least 12 credits in biology, chemistry, environmental science, geology, geography, or environmental engineering		12
Total Credits		12

Public Policy

Code	Title	Credits
Select at least 12 credits in public affairs, economics, sociology, and/or business. A course in environmental law is also required as part of this category		12
Total Credits		12

Research Methods and Technology

Code	Title	Credits
Select at least 6 credits in statistics, remote sensing, geographic information systems, analytical chemistry, molecular biology, modeling, or information technology [1]		6
Total Credits		6

[1] Students should carefully choose coursework to ensure they have the necessary skills to support dissertation research.

Doctoral Seminar

Students must present a total of 4 graduate seminar credits, with EVPP 991 Advanced Seminar in Environmental Science taken at least once.

Code	Title	Credits
Four credits from		4
EVPP 692	Master's Seminar in Environmental Science and Public Policy	
EVPP 991	Advanced Seminar in Environmental Science	
Total Credits		4

Coursework Focus

Code	Title	Credits
Students select a program of study emphasis with one of two focuses.		12
Environmental Science		
Select 12 credits in natural science coursework [1]		
Environmental Public Policy		
Select 12 credits of public policy coursework [1]		
Total Credits		12

[1] Previous thesis research courses may not be applied to fulfill the coursework focus described here. See advisor for further details.

Electives

Code	Title	Credits
If necessary after doctoral coursework and dissertation research, students take additional electives to bring the total number of credits to 72.		2-14
Total Credits		2-14

Dissertation Committee

Before the end of the fourth semester of coursework, in consultation with their advisor, the student forms a dissertation committee of at least four members. Three of the committee members must be from the Mason graduate faculty. The fourth member may be from Mason or may be from outside the university provided that they hold a terminal degree in an appropriate field. The dissertation committee must be approved by the college's associate dean for student affairs.

Program of Study

After reviewing the student's coursework proposal, progress to date, and area of research, the committee makes final recommendations concerning coursework that will be codified in the program of study to be signed by all committee members and the graduate program director. Students are advised to work closely with their advisor and committee to develop the coursework program in order to facilitate the process of course selection. During the duration of graduate study, a student must meet with the full dissertation committee at least once a year.

Qualifying Exams

On completion of all or nearly all coursework, students may request to take the qualifying or candidacy exam. The qualifying exam has both written and oral components. The written portion consists of questions submitted by each member of the dissertation committee. Successful completion of the written exam should be followed by the oral portion within one month. The qualifying exam may be repeated once at the discretion of the student's committee.

Advancement to Candidacy

Upon approval of the program of study, completion of all or nearly all coursework, successful completion of the qualifying exam, and the approval of the dissertation proposal by the dissertation committee, the student is recommended for advancement to candidacy by the graduate program director. Students must advance to candidacy within six years of admission to the program.

Dissertation Research, Dissertation Defense, and Graduation

Students must complete a dissertation. The dissertation is an original written work, demonstrating mastery of subject matter, methodologies, and conceptual foundations on a specific problem in the general field of environmental science and public policy. The dissertation generally involves collection and analysis of original data or the substantially new analysis and reinterpretation of existing data.

Dissertation completion may be accomplished by taking EVPP 999 Doctoral Dissertation Research alone, or in combination with EVPP 998

Doctoral Dissertation Proposal. However, at least six of these credits must be taken as EVPP 999 Doctoral Dissertation Research.

Before students may enroll in EVPP 999 Doctoral Dissertation Research, they must have advanced to candidacy and have a dissertation proposal approved by the dissertation committee, graduate program director, department chairperson, and the dean of the College of Science. Students working on dissertation research must register for a minimum of 3 credits of EVPP 999 Doctoral Dissertation Research per semester (excluding summers) until they have completed the minimum number of dissertation research credits. Then, they must register for 1 credit of EVPP 999 Doctoral Dissertation Research until the dissertation is complete and has been officially submitted to the library.

Students must present the completed dissertation in a public seminar and defend the work before the dissertation committee and others who wish to attend. Awarding of the degree is contingent on approval of the dissertation by the dissertation committee, graduate program director, department chairperson, and the dean of the College of Science. The dissertation and defense must be completed a total of nine years from the date of first enrollment in the doctoral program.

Code	Title	Credits
Select 12-24 credits from the following:		12-24
EVPP 998	Doctoral Dissertation Proposal	
EVPP 999	Doctoral Dissertation Research (at least 6 credits)	
Total Credits		12-24

Environmental Science Minor

Banner Code: EVSC

Younsung Kim, Undergraduate Program Director

Email: espug@gmu.edu
Website: esp.gmu.edu

Students pursuing the Environmental Science Minor will identify and study the interactions between organic and inorganic elements in a wide variety of ecosystems. This insight will provide students with a broad overview of the workings of the natural world and develop an increased awareness of major environmental issues effecting modern society.

The minor complements majors in natural science but is also suitable for non-science majors. This minor is not intended to be taken in conjunction with majors that focus on environmental science, including the Geology, BS (concentration in Environmental Geoscience) or the Environmental Science, BS.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Minor Requirements

Total credits: 19-23

Students should refer to the Admissions & Policies tab for specific policies related to this program.

EVPP or BIOL Sequence

Code	Title	Credits
Select one of the following sequences:		8-12
EVPP 108 & EVPP 109 & EVPP 112 & EVPP 113	Ecosphere - Introduction to Environmental Science I-Lecture (Mason Core) and Ecosphere- Introduction to Environmental Science I- Lab (Mason Core) and Ecosphere: Introduction to Environmental Science II-Lecture (Mason Core) and Ecosphere: Introduction to Environmental Science II—Lab (Mason Core)	
BIOL 103 & BIOL 106 & BIOL 107 & GEOL 101	Introductory Biology II-Survey of Cell and Molecular Biology (Mason Core) and Introductory Biology II Laboratory (Mason Core) and Intro Biology II Lecture (Mason Core) and Introductory Geology I (Mason Core)	
Total Credits		8-12

Applied Ecology Course

Environmental Science, BS

Banner Code: SC-BS-EVSC

Younsung Kim, Undergraduate Program Director

Email: espug@gmu.edu
Website: esp.gmu.edu

The Environmental Science, BS provides students with rigorous training in the fundamental science of the environment and in the application of key scientific principles to the analysis of environmental processes and problems. Subsequently, the program introduces students to the development of practical responses to those problems. The program covers ecological systems, environmental policy, fundamental techniques

of environmental science and engineering, protection and improvement of environmental quality, and public and private decision-making processes. Graduates of the program are prepared to undertake careers in a variety of environmental science fields, and are also qualified to pursue advanced scientific/professional education.

This is a Green Leaf program.

Concentrations

Students select a concentration in:

- Conservation
- Ecological Science
- Environmental Health
- Human and Ecosystem Response to Climate Change
- Marine, Estuarine and Freshwater Ecology
- Wildlife

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

Students can fulfill the writing intensive requirement for this major by taking EVPP 337 Environmental Policy Making in Developing Countries.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Please note that all CONS courses are offered through the Smithsonian-Mason Semester.

Core Requirements

All students complete the following core courses:

Environmental Science

Code	Title	Credits
EVPP 210	Environmental Biology: Molecules and Cells	4
EVPP 301	Environmental Science: Biological Diversity and Ecosystems	4
EVPP 302	Environmental Science: Biomes and Human Dimensions	4
EVPP 305	Environmental Microbiology Essentials	3
EVPP 306	Environmental Microbiology Essentials Laboratory	1
EVPP 337	Environmental Policy Making in Developing Countries [1]	3
EVPP 361	Introduction to Environmental Policy	3
EVPP 377	Applied Ecology	3
EVPP 430	Fundamentals of Environmental Geographic Information Systems	3
BIOL 214	Biostatistics for Biology Majors	4
Select one from the following:		3
EVPP 336	Human Dimensions of the Environment	
EVPP 338	Economics of Environmental Policy	
EVPP 362	Intermediate Environmental Policy	
EVPP 475	Global Biodiversity Governance	
Select one from the following:		3-4
EVPP 378	RS: Ecological Sustainability (Mason Core)	
EVPP 401	Integrated Environmental Assessment	
EVPP 480	Sustainability in Action (Mason Core)	
CONS 490	RS: Integrated Conservation Strategies (Mason Core)	
Total Credits		38-39

[1] Fulfills the writing intensive requirement.

Chemistry

Code	Title	Credits
CHEM 211	General Chemistry I (Mason Core)	3
CHEM 213	General Chemistry Laboratory I (Mason Core)	1
CHEM 212	General Chemistry II (Mason Core)	3
CHEM 214	General Chemistry Laboratory II (Mason Core)	1
Total Credits		8

Mathematics

Code	Title	Credits
Select two from the following:		7-8
MATH 111	Linear Mathematical Modeling (Mason Core)	
MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 114	Analytic Geometry and Calculus II	
Total Credits		7-8

Geology

Code	Title	Credits
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	4
Total Credits		4

Information Technology

Code	Title	Credits
CDS 130	Computing for Scientists	3
Total Credits		3

Experiential Learning

Code	Title	Credits
Select at least one from the following:		1-6
EVPP 395	Undergraduate Research in Environmental Science and Policy	
EVPP 494	Internship	
CONS 496	Research in Conservation (Mason Core)	
CONS 498	Internship	
Total Credits		1-6

Concentration in Conservation (CNSV)

Code	Title	Credits
Select at least 21 credits from the following:		21
EVPP 318	Conservation Biology	
EVPP 378	RS: Ecological Sustainability (Mason Core)	
EVPP 395	Undergraduate Research in Environmental Science and Policy	
EVPP 396	Directed Topic in Environmental Science and Policy [1]

Total Credits		21

[1] In a relevant topic.

Concentration in Wildlife (WILD)

Code	Title	Credits
Wildlife Courses		
EVPP 318	Conservation Biology	3
BIOL 460	Infectious Diseases Wildlife	3
Choose one course from the following:		3-4
EVPP 395	Undergraduate Research in Environmental Science and Policy [1]	
EVPP 396	Directed Topic in Environmental Science and Policy [1]	
EVPP 419	Marine Mammal Biology and Conservation	
EVPP 494	Internship [1]	
BIOL 437	Orinthology	
BIOL 438	Mammalogy	
BIOL 439	Herpetology	
Zoology Courses		
Choose one course from the following:		3-4
EVPP 395	Undergraduate Research in Environmental Science and Policy [2]	
EVPP 396	Directed Topic in Environmental Science and Policy [2]	
EVPP 427	Conservation Medicine	
EVPP 494	Internship [2]	
BIOL 311	General Genetics	
BIOL 331	Invertebrate Zoology	
BIOL 332	Insect Biology	
Botany Courses		
Choose from the following courses:		9
EVPP 395	Undergraduate Research in Environmental Science and Policy [3]	
EVPP 396	Directed Topic in Environmental Science and Policy [3]	
EVPP 494	Internship [3]	
BIOL 140	Plants and People (Mason Core)	
BIOL 304	Plant Biology	
BIOL 344	Plant Diversity and Evolution	
BIOL 345	Plant Ecology	
INTS 402	Plants and People - Sustenance, Ceremony, and Sustainability	
Total Credits		21-23

[1] In a topic relevant to wildlife.

[2] In a topic relevant to zoology.

[3] In a topic relevant to botany.

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- CNSV Concentration: 31-38 credits
- ESCI Concentration: 31-38 credits
- EVHL Concentration: 31-38 credits
- HERC Concentration: 31-38 credits
- MEFC Concentration: 31-38 credits
- WILD Concentration: 29-38 credits

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3

Synthesis/Capstone [2]	3
Total Credits	40

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

Accelerated Master's

Bachelor's Degree (selected)/ Environmental Science and Policy, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain a Green Leaf-designated bachelor's degree and the Environmental Science and Policy, MS (https://catalog.gmu.edu/colleges-schools/science/environmental-policy/environmental-science-policy-ms/) degrees within an accelerated timeframe. Upon completion of this 141 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

The GRE exam is not required for this accelerated master's program.

Students should submit three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor (see Graduate Advisor section below) stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated major or minor may apply to this accelerated master's program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) and CHEM 212 General Chemistry II (Mason Core) and three semesters of biology, including a course in ecology, or the equivalent, for example:

Code	Title	Credits
Select one of the following options:		13
Option 1:		
BIOL 213	Cell Structure and Function (Mason Core)	
BIOL 214	Biostatistics for Biology Majors	
BIOL 308	Foundations of Ecology and Evolution	
Option 2:		
EVPP 210	Environmental Biology: Molecules and Cells	
EVPP 301	Environmental Science: Biological Diversity and Ecosystems	
EVPP 302	Environmental Science: Biomes and Human Dimensions	
EVPP 305	Environmental Microbiology Essentials	
EVPP 306	Environmental Microbiology Essentials Laboratory	
Option 3:		
CONS 401	Conservation Theory	
CONS 402	Applied Conservation	
6 credits of BIOL or CONS electives		

Graduate Advisor

By at least the beginning of their senior year, students should seek out a faculty member in the Department of Environmental Science and Policy who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason University (called "program faculty") can serve as master's advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
EVPP 518	Conservation Biology	3
EVPP 529	Environmental Science Communication	3
EVPP 621	Overview of Biodiversity Conservation	3
EVPP 635	Environment and Society	3

Sustainability Studies Minor

Banner Code: SSTS

Younsung Kim, Undergraduate Program Director

Email: espug@gmu.edu
Website: esp.gmu.edu

The core principle of sustainability is the desire to meet the basic material needs of the current generation without compromising the ability of future generations to meet their needs. In order to achieve this goal, we must recognize and address the conflicts and trade-offs involved in balancing environmental integrity, social equity, and economic stability. Such complex work necessarily involves contributions from a wide range of disciplines and it also requires a re-examination of the relationship between human value systems, cultural practices, and the associated long-term implications for the ecosystem.

This is a Green Leaf program.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Minor Requirements

Total credits: 16

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Candidates for the minor must complete coursework with a minimum GPA of 2.00.

Total Credits		8

Electives

A maximum of two courses from a single department or program can be counted for elective credit. Preapproved courses are listed here and others may be substituted. See the undergraduate coordinator for additional electives.

Code	Title	Credits
Select 8 credits from the following:		8
EVPP 108 & EVPP 109	Ecosphere - Introduction to Environmental Science I-Lecture (Mason Core) and Ecosphere- Introduction to Environmental Science I- Lab (Mason Core)	
EVPP 201	Environment and You: Issues for the Twenty-First Century (Mason Core)	
EVPP 322	Business and Sustainability	
EVPP 336	Human Dimensions of the Environment	
EVPP 337	Environmental Policy Making in Developing Countries	
EVPP 338	Economics of Environmental Policy	
EVPP 355	Ecological Engineering and Ecosystem Restoration	
EVPP 361	Introduction to Environmental Policy	
EVPP 362	Intermediate Environmental Policy	
EVPP 378	RS: Ecological Sustainability (Mason Core)	
EVPP 421	Marine Conservation	
BIOL 379	RS: Ecological Sustainability (Mason Core)	
CHEM 155	Introduction to Environmental Chemistry I (Mason Core)	
CLIM 101	Global Warming: Weather, Climate, and Society (Mason Core)	
GEOL 305	Environmental Geology	
GGS 102	Physical Geography (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 121	Dynamic Atmosphere and Hydrosphere (Mason Core)	
GGS 122	Dynamic Geosphere and Ecosphere	
GGS 302	Global Environmental Hazards	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 307	Geographic Approaches for Sustainable Development	

GGS 312	Physical Climatology
or CLIM 312	Physical Climatology
GGS 314	Severe and Extreme Weather
or CLIM 314	Severe and Extreme Weather
GGS 319	Air Pollution
or CLIM 319	Air Pollution
PHYS 331	Physics of Renewable Energy
PHYS 385	Materials Science with Applications to Renewable Energy
ANTH 370	Environment and Culture
AVT 385	EcoArt (Mason Core)
CEIE 355	Environmental Engineering and Science
CEIE 401	Sustainable Land Development
CEIE 450	Environmental Engineering Systems
CONS 401	Conservation Theory
CONS 404	Biodiversity Monitoring
CONS 410	Human Dimensions in Conservation (Mason Core)
ECON 105	Environmental Economics for the Citizen (Mason Core)
ECON 335	Environmental Economics
INTS 102	Global Networks and Communities (Mason Core)
INTS 211	Introduction to Conservation Studies (Mason Core)
INTS 311	The Mysteries of Migration: Consequences for Conservation (Mason Core)
INTS 334	Environmental Justice (Mason Core)
INTS 401	Conservation Biology (Mason Core)
INTS 402	Plants and People - Sustenance, Ceremony, and Sustainability
PHIL 343	Topics in Environmental Philosophy (Mason Core)
PRLS 250	Wilderness Travel and Sustainability
PRLS 300	People with Nature
PRLS 402	Human Behavior in Natural Environments
PRLS 501	Introduction to Natural Resources Law
SOCI 320	Globalization and Social Change (Mason Core)
TOUR 340	Sustainable Tourism
USST 301	Urban Growth in a Shrinking World
Total Credits	8

Sustainable Enterprise Minor

Banner Code: SSTE

Younsung Kim, Undergraduate Program Director

Email: espug@gmu.edu
Website: esp.gmu.edu

Sustainable enterprises are businesses that are financially prosperous and seek to benefit the environment and society. They measure success in terms of a "triple bottom line" that focuses on three "P"s:

- Prosperity - Business profitability/value
- Planet - Ecological integrity
- People - Social equity

Sustainable enterprises balance all three P's simultaneously, and view solutions to environmental and social problems as investments and business opportunities. Therefore, developing sustainable business strategies requires innovation and the identification of solutions that frequently "leapfrog" existing products, technologies, and best management practices.

The minor emphasizes the private sector as a critical player in helping to solve pressing environmental and social problems, while capitalizing on market mechanisms and competitive opportunities. Students who obtain the sustainable enterprise minor will obtain a business understanding of sustainability innovation, ethical foundations, and regulatory framework to pursue private sector triple bottom line strategies.

This is a Green Leaf program.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Minor Requirements

Total credits: 17-20

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must successfully complete the following courses with a minimum GPA of 2.00.

Core Courses

Code	Title	Credits
EVPP 322	Business and Sustainability	3
EVPP 480	Sustainability in Action (Mason Core)	4
Total Credits		7

Electives

Code	Title	Credits
Environmental Policy and Economics		
Select at least 3 credits from the following:		3
EVPP 361	Introduction to Environmental Policy	
EVPP 362	Intermediate Environmental Policy	
EVPP 432	Energy Policy	

EVPP 490	Special Topics in Environmental Science and Policy (if the topic is applicable-consult an advisor for guidance)	
ECON 335	Environmental Economics	
Business and Innovation [1]		
Select at least 3-4 credits from the following:		3-4
MBUS 300	Accounting in a Global Economy	
MBUS 301	Managing People and Organizations in a Global Economy	
MBUS 305	Introduction to International Business (Mason Core)	
MBUS 306	Managing Projects and Operations	
PSYC 335	Psychology of Creativity and Innovation	
Social Responsibility and Ethics		
Select 3 credits from the following:		3
PHIL 305	Business Ethics	
PHIL 343	Topics in Environmental Philosophy (Mason Core) (if the topic is applicable-consult an advisor for guidance)	
Total Credits		9-10

[1] School of Business students should consult with their advisors regarding MBUS coursework.

Internship

The plan of work for this internship must be approved by the undergraduate coordinator.

Students who are currently employed may request that the internship requirement be waived on the basis of their job experience. Instead of the internship, these students will be required to complete a 3-credit independent study with the minor's director or another faculty member. This alternative will entail independent research by applying sustainable enterprise principles and practices in an analysis of the student's work place, and will culminate in a final project.

Code	Title	Credits
EVPP 395	Undergraduate Research in Environmental Science and Policy	1-3
or EVPP 494	Internship	
Total Credits		1-3

Department of Geography and Geoinformation Science

Phone: 703-993-1210
703-993-1212
Email: ggs@gmu.edu
Website: ggs.gmu.edu

Administration

- Dieter Pfoser, Chair
- Ruixin Yang, Graduate Program Director
- Nathan R. Burtch, Undergraduate Program Director

Located in the heart of Fairfax, just a few miles from Washington DC, the Department of Geography and Geoinformation Science (GGS) offers an outstanding environment to study and perform cutting-edge research in remote sensing, geography, geoinformatics, Earth systems science, and their various sub-disciplines.

With a variety of educational offerings, ranging from undergraduate programs to graduate certificates and M.S. and Ph.D. programs, a strong and broad research agenda, and superb name recognition within the leading agencies and companies in our field, our department is a premier choice for academic education.

Undergraduate Programs

The Department of Geography and Geoinformation Science offers a Geography, BA and a Geography, BS. The department also offers accelerated master's program opportunities for the Geographic and Cartographic Sciences, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geographic-cartographic-sciences-ms/) and the Geoinformatics and Geospatial Intelligence, MS (https://catalog.gmu.edu/colleges-schools/science/geography-geoinformation-science/geoinformatics-geospatial-intelligence-ms/). Additionally, the department offers the GeoManagement Undergraduate Certificate.

Undergraduate Certificates

The GeoManagement Undergraduate Certificate accommodates students who are pursuing a degree in the Department of Geography and Geoinformation Science who also wish to acquire more knowledge on how to manage people and organizations dealing with GIS in a global economy. By understanding marketing terms, financial matters, and also having a good understanding of how to manage people, students will be well prepared to face challenges in multidisciplinary GIS-oriented environments. All courses are available online.

Minors

For students pursuing any major in the university, the department offers a Geography Minor (fully available online), a Geographic Information Systems Minor (research and scholarship intensive), as well as an Urban Informatics Minor.

Graduate Degrees

Graduate programs are distinguished by an emphasis on cutting-edge research and their applications toward solving practical problems in human and environmental realms. Degree options include three master's degrees and one doctoral program.

Graduate Certificates

For students wishing to pursue graduate-level specialization and skill advancement in specific, focused application areas the department offers the following graduate-level certificates: Data Journalism Graduate Certificate, Environmental GIS and Biodiversity Conservation Graduate Certificate, Geographic Information Science Graduate Certificate, Geospatial Intelligence Graduate Certificate, and Remote Sensing and Image Processing Graduate Certificate. Students may take these as stand-alone certificates or, under certain circumstances, pursue them concurrently with another graduate degree program. Certificate coursework may be applicable toward other graduate degree requirements. In order to gain admission into a graduate certificate program, students must hold a bachelor's degree from a regionally

accredited institution and must apply for and be admitted into the corresponding program.

Master's Programs

The Earth Systems Science, MS (offered jointly with the Department of Atmospheric, Oceanic and Earth Sciences) provides a global systems approach to the study of the atmosphere, hydrosphere and lithosphere. The degree's emphasis is on the observation and quantitative analysis of earth systems. The Geographic and Cartographic Sciences, MS focuses on techniques to compile, display and analyze spatial data. The Geoinformatics and Geospatial Intelligence, MS focuses primarily on computational approaches that support the synthesis and analysis of diverse data types in order to identify and monitor complex events and phenomena that manifest themselves over space and time.

Earth Systems and Geoinformation Sciences, PhD

The Earth Systems and Geoinformation Sciences, PhD combines and extends the three scientific avenues mapped by our master's programs to provide a thorough and interdisciplinary approach to doctoral studies.

Distance Education

While all courses and programs listed are offered in traditional face-to-face on campus teaching, the department offers select programs through fully online modules. These online programs include an online version of our Geography Minor, GeoManagement Undergraduate Certificate, and an online version of the Geospatial Intelligence Graduate Certificate.

Courses Available Online

Individual courses which are currently available online (in addition to their traditional delivery modes) are:

Code	Title	Credits
GGS 101	Major World Regions (Mason Core)	3
GGS 102	Physical Geography (Mason Core)	3
GGS 103	Human Geography (Mason Core)	3
GGS 110	Introduction to Geoinformation Technologies	3
GGS 121	Dynamic Atmosphere and Hydrosphere (Mason Core)	4
GGS 122	Dynamic Geosphere and Ecosphere	4
GGS 210	Introduction to Spatial Computing	3
GGS 300	Quantitative Methods for Geographical Analysis	3
GGS 302	Global Environmental Hazards	3
GGS 303	Geography of Resource Conservation (Mason Core)	3
GGS 310	Cartographic Design	3
GGS 311	Geographic Information Systems	3
GGS 312	Physical Climatology	3
GGS 315	Geography of the United States	3
GGS 317	Geography of China (Mason Core)	3
GGS 379	Remote Sensing	3
GGS 380	Geography of Virginia	3
GGS 416	Satellite Image Analysis	3
GGS 462	Web-based Geographic Information Systems	3
GGS 553	Geographic Information Systems	3
GGS 650	Introduction to GIS Algorithms and Programming	3
GGS 680	Earth Image Processing	3
GGS 681	Social Media Analysis	3
GGS 692	Web-based Geographic Information Systems	3

Faculty

Department Faculty

Professors

Di, Houser, Pfoser (chair), Qu, Wong, C. Yang

Associate Professors

Croitoru (online coordinator), Leslie, Rice, D. Sun, R. Yang (graduate coordinator)

Assistant Professors

Anderson, Burtch (undergraduate coordinator), Komwa, Oughton, Rosenfeld, Wessels, Züfle

Adjunct Faculty

Dillon, Grymes, Jackson, McGlone, Resmini, Rockwell, Ward, Weaver

Requirements & Policies

Requirements

Writing-Intensive Requirement

The university requires all students to complete at least one course designated as "writing intensive" in their majors at the 300 level or above. Students majoring in geography fulfill this requirement by successfully completing GGS 415 Seminar in Geographic Thought and Methodology.

Policies

Students are governed by the university's policies.

GGS Lab Use

Access to GGS lab space is contingent upon active student status and registration in GGS courses. Labs are key card accessible and only authorized students may use the labs for academic work.

Non-degree Status

Applicants who have not been admitted to a specific graduate degree or certificate program and still wish to attend courses may apply for non-degree studies. This is intended for students who do not seek a specific degree. These students must apply for non-degree status and be admitted through a process comparable to the one followed by degree-seeking students.

While it may be possible to transfer some of the credits earned in non-degree status to a degree program, such transfers are not automatic. Non-degree students who intend to transfer their credits to a degree program should discuss this in a timely manner with the appropriate department coordinator. Further information can be found in the Non-degree Enrollment section of this catalog.

Programs

- Data Journalism Graduate Certificate
- Earth Systems Science, MS (GGS)
- Earth Systems and Geoinformation Sciences, PhD
- Environmental GIS and Biodiversity Conservation Graduate Certificate
- GeoManagement Undergraduate Certificate
- Geographic Information Science Graduate Certificate
- Geographic Information Systems Minor
- Geographic and Cartographic Sciences, MS
- Geography Minor
- Geography, BA
- Geography, BS
- Geoinformatics and Geospatial Intelligence, MS

Data Journalism Graduate Certificate

Banner Code: SC-CERG-DJNL

Ruixin Yang, Graduate Coordinator

2409 Exploratory Hall
Fairfax Campus

Phone: 703-993-3615
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science

This certificate is designed for students and professionals wishing to advance their knowledge and careers in the emerging field of Data Journalism. Data-driven journalism is about obtaining, reporting on, curating, and publishing (storifying) data in the public interest. Maps and data infographics are some of the best ways to publish data in order to inform the public and raise awareness.

Principles of journalism, methods and tools for information visualization, social media analysis, and scientific data communication topics are visited in this program.

This certificate may be pursued on a part-time and full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog. TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Earth Systems and Geoinformation Sciences, PhD

Banner Code: SC-PHD-ESGS

Ruixin Yang, Graduate Coordinator

2409 Exploratory Hall
Fairfax Campus

Phone: 703-993-3615
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science

The Earth Systems and Geoinformation Sciences (ESGS) doctoral program is based upon the integration of the scientific disciplines in geosystems, geography, geosciences, and geoinformatics. Students receive broad-based training in systematic geosciences and geography, as well as technical courses in computation and geoinformation sciences. The ESGS doctoral program represents a gateway to an academic career for some students; for others, it facilitates career advancement in the public sector or private industry. Graduates are equipped to participate in interdisciplinary research, which is the norm in today's research arena.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

This program is intended for graduates who hold a MS or MA degree in atmospheric science, climatology, meteorology, Earth science, geology, environmental science, remote sensing, hydrology, oceanography, geography, or a related field. Highly-qualified students with a BS or BA in applicable fields are also encouraged to apply. Knowledge of mathematics through calculus is preferred. Interested applicants should contact the program degree coordinator or the GGS director of academic programs for more specific advice.

Application Requirements

To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/). Official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement will be required.

Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission to the doctoral program may be waived if the student holds a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. TOEFL scores are required of all international applicants. GRE-GEN scores are required of students wishing to be considered for the Office of the Provost's Presidential Scholarship. A minimum combined math and verbal GRE score of 270/340 are needed to qualify for the Presidential Scholarship.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the associate dean for student affairs. See AP.6.5.2 Reduction of Credits for more information.

Secondary Program Options

Students enrolled in this doctoral program have the option of adding a secondary graduate certificate or master's program. Depending upon the secondary program chosen, many courses may be applicable to both programs. Before adding a secondary program, students are advised to carefully review AP.6.8 Requirements for Graduate Certificates or AP.6.9 Requirements for Master's Degrees and AP.6.10 Requirements for Doctoral Degrees. Faculty advisors should be contacted for further guidance and for secondary program suggestions.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Students are required to choose from the following courses in the core areas below. Of the cores, students must complete at least one course in five of the cores and two courses in at least three of those five cores.

Code	Title	Credits
The core areas from which to choose these credits are:		24
Quantitative Core:		
GGS 560	Spatial Quantitative Methods	
GGS 754	Earth Science Data and Advanced Data Analysis	
GGS 791	Advanced Spatial Statistics	
Geoinformatics Core:		
GGS 650	Introduction to GIS Algorithms and Programming	
GGS 664	Spatial Data Structures	
GGS 675	Location Science	
GGS 692	Web-based Geographic Information Systems	
GGS 787	Scientific Data Mining for Geoinformatics	
Geosciences and Physical Geography Core:		
GGS 656	The Hydrosphere	
GGS 657	The Lithosphere	
GGS 670	Introduction to Atmosphere and Weather	
GGS 721	Biogeography	
PHYS 575	Atmospheric Physics I	
Human Geography Core:		
GGS 505	Transportation Geography	
GGS 533	Issues in Regional Geography	
GGS 540	Health Geography	
GGS 704	Spatial Demography	
Geographic Information Science Core:		
GGS 553	Geographic Information Systems	
GGS 563	Advanced Geographic Information Systems	

GGS 671	Algorithms and Modeling in GIS	
Remote Sensing Core:		
GGS 579	Remote Sensing	
GGS 680	Earth Image Processing	
GGS 756	Physical Principles of Remote Sensing	
GGS 760	Advanced Topics in Remote Sensing	
GGS 777	Remote Sensing Natural Hazards	
Total Credits		24

Research Synthesis and Colloquium

Code	Title	Credits
Research Synthesis		
Select one from the following:		3
GGS 684	Selected Topics in Geospatial Intelligence	
GGS 689	Seminar in Geographic Thought and Methodology	
GGS 795	Seminar in Regional Analysis	
Colloquium		**2**
GGS 900	Geography and Geoinformation Science Colloquium (complete twice)	
Total Credits		5

Electives

Code	Title	Credits
In consultation with the advisor, students select credits necessary to reach 72 total credits [1]		19-31

[1] At least half of the elective credits taken at Mason must be from GGS courses.

Dissertation Research

Students take 12-24 credits, with at least 6 credits in GGS 999 Dissertation. After reaching candidacy, students must stay continuously enrolled GGS 999 Dissertation until defending their dissertation.

Code	Title	Credits
Select 12-24 credits from the following:		12-24
GGS 998	Dissertation Proposal	
GGS 999	Dissertation	
Total Credits		12-24

Dissertation Committee

All students will be assigned a temporary academic advisor when they first enroll in the program. No later than the end of the second year, each student should identify a dissertation advisor and form a doctoral committee. The committee will be chaired by a GGS tenure or tenure-track professor and be composed of at least four members. GGS tenure or tenure-track faculty should be at least 50% and have larger committee membership than any other Mason department/academic unit or external organization. At least one member should be a tenure or tenure-track faculty member from another Mason department or program outside of GGS. All members of the committee must be Mason Graduate Faculty and approved by the department's chair.

Candidacy Examination

After completing all required courses, each student must take a candidacy exam administered by the dissertation committee. The exam will have written and oral components. Its purpose is to determine whether the student has acquired adequate general knowledge in the selected subject area, as well as much more detailed knowledge of the specific research topic planned for the dissertation.

Dissertation Proposal and Advancement to Candidacy

After students have completed all required courses and passed the candidacy exam, they should prepare an acceptable dissertation proposal. After the dissertation proposal is approved and the appropriate paperwork is completed, the student will be advanced to candidacy.

Doctoral Dissertation

The degree will be awarded upon completion of the required coursework and successful defense of a PhD dissertation that makes an original and significant contribution to the field.

Earth Systems Science, MS (GGS)

Banner Code: SC-MS-ESSC

Ruixin Yang, Graduate Coordinator

2409 Exploratory Hall
Fairfax Campus

Phone: 703-993-3615
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science

This is a shared program between the Department of Atmospheric, Oceanic, and Earth Sciences and the Department of Geography and Geoinformation Science.

The program addresses the growing demand for trained professionals in the Earth sciences. The degree emphasizes a research-oriented, global systems approach to studying the Earth and its systems- the atmosphere, the hydrosphere, and the lithosphere, including their interrelationships and interactions with the biosphere. Emphasis is on the observation, measurement, and analysis of Earth's systems.

Most student research projects and theses will relate to geologic and geographic topics, however studies of related topics in Earth science are welcome. Students completing the program are qualified to pursue careers that require knowledge of the basics of Earth systems science and the requisite tools, specifically pertaining to the area of Earth science that they choose to investigate. Students are encouraged to undertake a master's thesis but may choose a research project. In the latter case, students must pass a comprehensive exam.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Applicants should have earned a BS degree in atmospheric, Earth, environmental, geological, geographical, ocean, or physical science. Previous coursework should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. Applicants should have a minimum GPA of 3.00 in their undergraduate degree.

Application Requirements

Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement are required. Applicants also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. TOEFL scores are required of all international applicants.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Candidates must complete 10 credits of GGS courses and 10 credits of GEOL/CLIM courses toward their requirements. ("Culminating Experience" credits do not count towards this requirement).

Earth Science Core

Code	Title	Credits
Select one course from each of the following groups:		9
Atmosphere:		
CLIM 610	Introduction to the Physical Climate System	
CLIM 614	Land-Climate Interactions	
GEOL 532	Paleoclimatology	
GGS 670	Introduction to Atmosphere and Weather	
PHYS 575	Atmospheric Physics I	
Hydrosphere:		
CLIM 512	Physical Oceanography	
CLIM 712	Physical and Dynamical Oceanography	
GEOL 513	Hydrogeology	
GGS 656	The Hydrosphere	
Lithosphere:		
GEOL 506	Soil Science	
GGS 657	The Lithosphere	
or GEOL 601	The Lithosphere	
Total Credits		9

Techniques [1]

GGS 553	Geographic Information Systems	
GGS 560	Spatial Quantitative Methods	
GGS 579	Remote Sensing	
GGS 680	Earth Image Processing	
GGS 754	Earth Science Data and Advanced Data Analysis	
Total Credits		6

[1] Other courses can be substituted with advisor approval.

Colloquium

Code	Title	Credits
GGS 900	Geography and Geoinformation Science Colloquium	1
Select one from the following:		1
GEOL 536	Paleontology Seminar	
GEOL 792	Seminar in Earth Systems Science, Geology, Earth Science	
CLIM 991	Climate Dynamics Seminar	
Total Credits		2

Electives

Code	Title	Credits
Select 10 credits from courses at the 500 to 900-level (excluding 700, 798, and 799 courses)		10
CLIM Courses		
GEOL Courses		
GGS Courses		
EVPP Courses		
Total Credits		10

Culminating Experience

Choose the culminating experience of either a thesis or a project (either must total 3 credits):

Thesis

Code	Title	Credits
Select 3 credits from the following:		3
GGS 799	Thesis	
GEOL 799	Master's Thesis in Earth Systems Science	
CLIM 799	Master's Thesis in Climate	
Total Credits		3

Project

Code	Title	Credits
Select one from the following:		1
GGS 700	Comprehensive Exam	
GEOL 700	Comprehensive Exam	
CLIM 700	Climate Comprehensive Exam	
Select one from the following:		2
GGS 798	Master's Research Project	
GEOL 798	Master's Research Project in Earth Systems Science	
CLIM 798	Master's Climate Research Project	
Total Credits		3

Accelerated Master's

Geology, BS/Earth Systems Science, Accelerated MS

Overview

Geology, and Earth sciences more broadly, are extremely important to society and our economy as they deal with our planet, our oceans, and our climate. Degrees in Earth science are broadly useful in industry, government, conservation, and many other areas of our economy. While there are many positions in the field that only require a bachelor's degree, many employers either prefer a Master's degree, or a Master's degree can be the key to further promotion within a particular organization. This Accelerated Master's degree is designed to give students the skills and the degrees that they need to be both initially successful, and to ensure long-term advancement in their chosen professions.

Application Requirements

Applicants should be enrolled in the Geology, BS degree at Mason and have earned at least 60 credits. Previous coursework should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. Applicants should have a minimum GPA of 3.00.

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/) section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals (including information on the applicant's proposed MS research), and a letter from their advisor. This letter should state that the advisor agrees to take on the candidate as an MS student, addresses how the candidate would be a good fit for them, and indicate why the applicant's research topic would be suitable for study.

Accelerated Option Requirements

Students admitted to this program may take graduate courses after completing 75 undergraduate credits, and up to 12 credits of appropriate graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 24 credits to receive the master's degree. All other requirements for the Earth Systems Science, MS, must be met.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition form found on the Office of the University Registrar's website (https://registrar.gmu.edu/forms/).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Reserve Graduate Credit

Undergraduate students may also take up to 6 additional and appropriate graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master's degree credits accordingly (e.g., with 12 credits counted toward the undergraduate and graduate degrees plus the maximum 6 reserve credits for the master's, an MS could be completed with 12 post-bachelor's credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

Graduate Course Suggestions

Students should consult with an advisor before registering for graduate credits.

Code	Title	Credits
GEOL 504	Sedimentary Geology	4
GEOL 506	Soil Science	3
GEOL 513	Hydrogeology	3
GEOL 521	Geology of Energy Resources	3
GEOL 532	Paleoclimatology	3
GEOL 534	Vertebrate Paleontology	4
GEOL 536	Paleontology Seminar	1-2
GEOL 553	Field Mapping Techniques	3

Environmental GIS and Biodiversity Conservation Graduate Certificate

Banner Code: SC-CERG-EGBC

Ruixin Yang, Graduate Coordinator

2409 Exploratory Hall
Fairfax Campus

Phone: 703-993-3615
Email: ryang@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science/environmental-gis-and-biodiversity

As biodiversity is the life support system of our planet, it is important to prepare students for careers that require knowledge of both ecology and public policy. This certificate focuses in the fields of conservation biology, land use policy, conservation planning, and modern tools and approaches used in GIS to prepare students to tackle complex environmental challenges in a changing world.

This certificate is suitable for traditional students as well as for student-professionals (such as environmental scientists, managers, practitioners in government, and experts in non-governmental organizations) who wish to acquire further knowledge to advance their careers.

This certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants for this certificate should hold a BA or BS in a related discipline from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

Refer to the Admissions & Policies for policies specific to this program.

Core Courses

Geographic and Cartographic Sciences, MS

Banner Code: SC-MS-GECA

Ruixin Yang, Graduate Coordinator

2409 Exploratory Hall
Fairfax Campus

Phone: 703-993-3615
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science/geographic-and-cartographic-science-ms

The Geographic and Cartographic Sciences, MS (GECA) focuses on the growing demand for scientists and professionals in the field of geographic information science, who use geographical approaches and tools such as geographic information systems (GIS), remote sensing, cartography, and geovisualization to address and solve geographic problems. This expertise is useful to a wide variety of employers in the federal, state, and local government sectors, as well as in business, industry, and non-profit organizations. The degree's coursework concentrates on the collection, analysis, and display of geographic data, in concert with the use of emerging geospatial technologies to address problems in the human and environmental geographic domains. Students in this program benefit from a large and diverse local employment market, as well as a network of more than 700 program alumni (1978-present) who live and work in the local area.

Research Facilities

The Department of Geography and Geoinformation Science has extensive research and teaching facilities, including several labs equipped with GIS, remote sensing, cartographic, and analytical software from leading industry vendors and open source groups. Specialized instructional space for geographic information science is housed in newly renovated labs in Exploratory Hall on the Fairfax Campus.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility and Application Requirements

Applicants for this master's should have a bachelor's degree in geography, cartography, or a closely related field. Applicants without an undergraduate degree in geography may be required to take one course in each of the following: physical geography, human geography, and cartography. All applicants must have a course in statistics. The program also requires GRE test scores, three letters of recommendation, transcripts of all college coursework, and a statement of interest in the degree. The GRE requirement will be waived if the student holds a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. TOEFL scores are required for all foreign applicants. Credit

from courses taken at other departments and other universities may be applied to the program with prior approval.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies

Secondary Program Options

Students enrolled in this master's program have the option of adding a secondary graduate certificate program. Depending upon the secondary program chosen, many courses may be applicable to both the certificate and the master's. Before adding a secondary program, students are advised to carefully review the Requirements for Graduate Certificates and the Requirements for Master's Degrees in AP.6 Graduate Policies. Faculty advisors should be contacted for further guidance and for graduate certificate program suggestions.

Requirements

Degree Requirements

Total credits: 30 or 37

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete either 30 graduate credits (with a thesis) or 37 graduate credits (without a thesis). If the non-thesis option is selected, students are required to pass a comprehensive exam.

Core Courses

Code	Title	Credits
GGS 551	Cartographic Design	3
GGS 553	Geographic Information Systems	3
GGS 560	Spatial Quantitative Methods	3
GGS 579	Remote Sensing	3
GGS 689	Seminar in Geographic Thought and Methodology	3
Total Credits		15

Thesis or Non-thesis Options

Thesis Option

Students selecting the thesis option must complete:

Code	Title	Credits
Three credits of		3
GGS 799	Thesis	
Select 12 credits of electives in 500 to 798-level GGS courses. [1]		12
Total Credits		15

[1] Electives should be selected in consultation with an advisor. With departmental approval, up to 9 credits from closely related disciplines may be applied to the degree.

Non-thesis Option

Students selecting the non-thesis option must complete the following:

Code	Title	Credits
Choose one Systematic course		3
GGS 505	Transportation Geography	
GGS 507	Geographic Approaches for Sustainable Development	
GGS 540	Health Geography	
GGS 544	Military Geography	
GGS 581	World Food and Population	
GGS 615	Economic Geography	
GGS 656	The Hydrosphere	
GGS 657	The Lithosphere	
GGS 670	Introduction to Atmosphere and Weather	
GGS 704	Spatial Demography	
Choose one Regional course		3
GGS 516	Geography of Latin America	
GGS 517	Geography of China	
GGS 518	Geography of North Africa and the Middle East	
GGS 526	Geography of Eastern Europe and Russia	
GGS 533	Issues in Regional Geography	
GGS 700	Comprehensive Exam	1
Select an additional 15 credits of electives in 500 to 798-level GGS courses. [1]		15
Total Credits		22

[1] Electives should be selected in consultation with an advisor. With departmental approval, up to 9 credits from closely related disciplines may be applied to the degree.

Accelerated Master's

Bachelor's Degree (any)/Geographic and Cartographic Sciences, Accelerated MS

Overview

Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor's/accelerated master's degree program enables highly qualified undergraduates to obtain any Mason bachelor's degree and the Geographic and Cartographic Sciences, MS degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor's degree. In the case of a 120 credit bachelor's program, this accelerated master's option can be completed as a 138 credit program (thesis option) or 145 credit program (comprehensive exam option). This accelerated pathway prepares students for professional careers where geoinformation management, geographic analysis, and geospatial visualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the bachelor's program and the Geographic and Cartographic Sciences, MS. While the information below is largely comprehensive, students are strongly encouraged to also review AP.6.7 Bachelor's/Accelerated Master's Degrees.

Application Requirements

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master's program after completing

at least 60 undergraduate credits. Additionally, students they must have completed the following courses with a combined GPA of 3.0 or better: GGS 300 Spatial Quantitative Methods, GGS 311 Geographic Information Systems, and any one upper level GGS-prefixed course.

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. However, this accelerated master's does not require GRE test scores, letters of recommendation, or a statement of interest.

While being undergraduate students, accelerated master's students must complete the graduate courses indicated on their Accelerated Master's Program Application (obtained from the Office of Academic and Student Affairs) with a minimum grade of B in each course. They must maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor's/Accelerated Master's Transition Form (found on the Office of the University Registrar website). Students must begin their master's program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.

Accelerated Option Requirements

Students admitted to this program may start taking graduate courses after completing 75 undergraduate credits. It is recommended that students register for one of the following courses in their first semester of accelerated coursework:

Code	Title	Credits
GGS 551	Cartographic Design	3
GGS 553	Geographic Information Systems	3
GGS 560	Spatial Quantitative Methods	3
GGS 579	Remote Sensing	3

Including the course chosen above, up to 12 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a B in these classes, they are granted advanced standing in the master's program and must then complete 18 (thesis option) or 25 (comprehensive exam option) additional credits to receive the master's degree. All other master's degree requirements must be met.

Reserve Graduate Credit

During the bachelor's degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master's degree credits accordingly. With 12 credits counted toward the undergraduate degree plus the maximum 6 reserve credits, the credits necessary for the graduate degree can be reduced by up to 18. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master's degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor's/Accelerated Master's Transition Form found on the Office of the University Registrar website.

Geographic Information Science Graduate Certificate

Banner Code: SC-CERG-GISC

Ruixin Yang, Graduate Coordinator

2409 Exploratory Hall
Fairfax Campus

Phone: 703-993-3615
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science/geographic-information-science

This graduate certificate prepares students for employment in federal, state, and local government positions that require GIS skills. The certificate has been found suitable for the needs of business and industry, including those corporations that serve as contractors to governments in the United States and overseas.

The Geographic Information Science Graduate Certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants to this certificate program must submit a current résumé. GRE scores and letters of recommendation are not required but will strengthen an application, if available. TOEFL scores are required of all international applicants.

All applicants should have a working knowledge of, or prior education or training in, computer technology. Knowledge of GIS, remote sensing technology, and cartography are preferred. Students from any discipline are welcome to apply.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates

Premium Tuition Rate

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Geographic Information Systems Minor

Banner Code: GIS

Nathan R. Burtch, Undergraduate Coordinator

2413 Exploratory Hall
Fairfax Campus

Phone: 703-993-1207
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science

The Geographic Information Systems Minor is designed to prepare students with the basic training necessary to enter the rapidly expanding field of geographic information science. The curriculum in the minor is multidisciplinary in content and interdisciplinary in approach, drawing on a variety of geographic and computational science components. A Geographic Information System (GIS) is an integrative approach to help solving complex spatial problems in most professional fields and at different scales. GIS has irrevocably altered the way we capture, store, analyze, and visualize spatial information. Although it has its roots in cartography and the graphical display of information, its breadth spans from geographic data acquisition, geospatial database construction and management, spatial analysis, and geovisualization. Public and private sector organizations work with an overwhelming amount of spatial data in their day-to-day operations. With so much spatial information, GIS has become essential to the effective operation of both public and private organizations.

Employment opportunities are limitless for students who are proficient in this interdisciplinary field. GIS professionals work in places like government agencies, utility companies, marketing firms, non-profit organizations, and publishing companies. Federal government agencies such as NGA, FEMA, USGS, DOD, EPA, and NASA routinely recruit individuals with strong GIS backgrounds.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18-20

Students should refer to the Admissions & Policies tab for specific policies related to this program.

All coursework must be completed with a minimum GPA of 2.00.

Required Courses

Code	Title	Credits
GGS 110	Introduction to Geoinformation Technologies	3

GGS 300	Spatial Quantitative Methods	3
GGS 311	Geographic Information Systems	3
GGS 463	RS: GIS Analysis and Application	3
Total Credits		12

Electives

Code	Title	Credits
Select 6-8 credits from the following: [1]		6-8
GGS 210	Introduction to Spatial Computing	
GGS 308	Field Mapping Techniques	
GGS 310	Cartographic Design	
GGS 354	Data Analysis and Global Change Detection Techniques	
GGS 379	Remote Sensing	
GGS 410	Introduction to Hyperspectral Imaging	
GGS 411	Geovisualization	
GGS 412	Air Photography Interpretation	
GGS 416	Satellite Image Analysis	
GGS 422	Drone Remote Sensing

GGS 470	Special Topics in Geographic Techniques	
GGS 480	GGS Internship	
CS 112	Introduction to Computer Programming	
CDS 130	Computing for Scientists	
Total Credits		6-8

[1] With departmental permission, one course with significant geographic information systems (GIS) content may be used as an elective.

Geography Minor

Banner Code: GEOG

Nathan R. Burtch, Undergraduate Coordinator

2413 Exploratory Hall
Fairfax Campus

Phone: 703-993-1207
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science/geography-minor

A minor in geography is a natural complement to an array of careers, including engineering, government and international politics, environmental science, transportation, business, marketing, and public health. Any Mason undergraduate student is eligible to earn a minor in geography by completing 18-20 credits as outlined in the Requirements tab above; many qualifying courses also fulfill Mason Core requirements.

If desired, this minor can be pursued fully online; details can be found with Mason Online (http://masononline.gmu.edu/).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Students must complete all coursework with a minimum GPA of 2.00.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Minor Requirements

Total credits: 18-20

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Geography, BA

Banner Code: SC-BA-GEOG

Nathan R. Burtch, Undergraduate Coordinator

2413 Exploratory Hall
Fairfax Campus

Phone: 703-993-1207
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science/geography-ba

The Geography, BA is designed to offer students the opportunity to study the integrated social and environmental processes that continuously shape and reshape the world we live in. This major provides students with broad training across the core subdisciplines of geography (human, physical, and GIScience), while also offering the requisite flexibility for those students seeking a multidisciplinary educational experience. Students will find numerous opportunities for employment in both the private and public sectors, as well as in academia. Given their interdisciplinary approach and uniquely spatial perspective, geographers are well suited to address important local, regional, and global challenges in today's world.

The Department of Geography and Geoinformation Science fosters a supportive, active learning environment in which students are encouraged to work closely with both faculty and peers. The curriculum in this major provides students with the synthesis skills and broad base of knowledge that prepares them to be successful in an ever-evolving job market. For students who wish to pursue their interest in geography with a more technical curriculum, the department also offers a Geography, BS.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. As outlined in the Requirements tab, students in this bachelor's program must also complete the additional College Requirements for the BA Degree.

GGS 415 Seminar in Geographic Thought and Methodology fulfills the writing intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Candidates for a degree in geography must complete the approved GGS geography courses with a minimum GPA of 2.00.

Students must complete the Core, Systematic and Regional Geography, and GGS electives, then select one concentration or an additional program, and lastly complete the College Requirements for the BA Degree and the Mason Core and Elective Credits.

Core Courses

Code	Title	Credits
GGS 102	Physical Geography (Mason Core)	3-4
or GGS 121	Dynamic Atmosphere and Hydrosphere (Mason Core)	
or GGS 122	Dynamic Geosphere and Ecosphere	
GGS 103	Human Geography (Mason Core)	3
GGS 110	Introduction to Geoinformation Technologies	3
or GGS 210	Introduction to Spatial Computing	
GGS 300	Spatial Quantitative Methods	3
GGS 310	Cartographic Design	3
GGS 311	Geographic Information Systems	3
GGS 415	Seminar in Geographic Thought and Methodology [1]	3
Total Credits		21-22

[1] Fulfills writing intensive requirement.

Systematic and Regional Geography

Students must take one systematic course and one regional course from the list below:

Code	Title	Credits
Systematic Courses		
Select one from the following:		3
GGS 301	Political Geography (Mason Core)	
GGS 302	Global Environmental Hazards	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	

GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 307	Geographic Approaches for Sustainable Development	
GGS 309	Introduction to Weather and Climate	
GGS 312	Physical Climatology	
GGS 314	Severe and Extreme Weather	
GGS 319	Air Pollution	
GGS 321	Biogeography	
GGS 322	Issues in Global Change	
GGS 340	Health Geography	
GGS 344	Military Geography	
GGS 357	Urban Planning	
GGS 398	Selected Topics in Global Change	
GGS 399	Select Topics in GGS	
GGS 456	Introduction to Atmospheric Radiation	
Regional Courses		
Select one from the following:		3
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 317	Geography of China (Mason Core)	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 326	Geography of Eastern Europe and Russia	
GGS 330	Geography of the Soviet Succession States	
GGS 333	Issues in Regional Geography	
GGS 380	Geography of Virginia	
Total Credits		6

GGS Electives

Code	Title	Credits
Select 9-10 credits of electives. [1]		9-10
Total Credits		9-10

[1] Two of the three courses must be upper-level GGS courses.

Environmental Geography Concentration (EGEO)

The Environmental Geography concentration for the BA in Geography provides a unique opportunity for majors to take a broader, integrative science approach to studies of the environment. In collaboration with the Department of Environmental Science and Policy, BA in Geography majors have the opportunity to focus their studies on geographic approaches to climatology and global changes, environmental issues, policy matters, and sustainability topics.

Some courses may have prerequisite requirements:

Code	Title	Credits
Core Courses		
GGS 303	Geography of Resource Conservation (Mason Core)	3
EVPP 336	Human Dimensions of the Environment	3
or EVPP 337	Environmental Policy Making in Developing Countries	
or EVPP 377	Applied Ecology	
Methods Course		
GGS 354	Data Analysis and Global Change Detection Techniques	3
or GGS 412	Air Photography Interpretation	
Electives		**6-7**
Select two courses from the following:		
GGS 302	Global Environmental Hazards	
GGS 307	Geographic Approaches for Sustainable Development	
GGS 309	Introduction to Weather and Climate	
GGS 312	Physical Climatology	
GGS 314	Severe and Extreme Weather	
GGS 319	Air Pollution	
GGS 322	Issues in Global Change	
GGS 354	Data Analysis and Global Change Detection Techniques [1]	
GGS 412	Air Photography Interpretation [1]	
EVPP 336	Human Dimensions of the Environment [1]	
EVPP 337	Environmental Policy Making in Developing Countries [1]	
EVPP 361	Introduction to Environmental Policy	
EVPP 362	Intermediate Environmental Policy	
EVPP 377	Applied Ecology [1]	
EVPP 421	Marine Conservation	
EVPP 440	Field Environmental Science	
EVPP 480	Sustainability in Action (Mason Core)	
GEOL 305	Environmental Geology	
Total Credits		15-16

[1] Course cannot be selected if previously selected as a core or methods course.

Health Geography Concentration (HGEO)

The field of Health Geography addresses the role of place, location dynamics and geography in health, well-being, and disease. Public health patterns can vary significantly by physical and social characteristics of places both within and between regions, states, or countries. In collaboration with the Department of Global and Community Health, BA in Geography majors get introduced to local and global health issues and develop their skill set in spatial and statistical analysis of diverse health outcomes in populations.

Some courses may have prerequisite requirements:

Code	Title	Credits
Core Courses		
GGS 340	Health Geography	3
GCH 300	Introduction to Public Health	3
Electives		
Select 9 credits from the following courses. Choose at least one GGS elective and at least one GCH elective:		9
GGS 302	Global Environmental Hazards	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	

GGS 306	Urban Geography
GGS 319	Air Pollution
GGS 321	Biogeography
GGS 322	Issues in Global Change
GGS 354	Data Analysis and Global Change Detection Techniques
GGS 463	RS: GIS Analysis and Application
GCH 205	Global Health (Mason Core)
GCH 332	Health and Disease
GCH 360	Health and Environment
GCH 412	Fundamentals of Epidemiology
GCH 445	Social Determinants of Health
GCH 450	Culture, Sexuality and the Global AIDS Epidemic
Total Credits	15

Geoanthropology Concentration (GEA)

Anthropology, a social science, focuses on human activities—past, present, and future. Geography, positioned in the social science and STEM field, studies the physical features of the Earth and its atmosphere, and human activities as they affect and are affected by these, including the distribution of populations and resources, land use, urbanization and other topics. Just as anthropologists use insights from other disciplines to understand humans, geographers cross disciplinary boundaries to collect, store, analyze, model and visualize data. Such broad and inclusive disciplines and definitions yield a large number of possible themes in Geoanthropology. This concentration enables BA in Geography majors, versed in systematic techniques and regional geography, to become better versed in the theoretical constructs of anthropology that situate the environment as part of a global cultural system.

Code	Title	Credits
Core Courses		
GGS 304	Population Geography (Mason Core)	3
Select one core track:		**3**
Cultural Track		
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	
Archaeology Track		
ANTH 120	Unearthing the Past: Prehistory, Culture and Evolution (Mason Core)	
Biological Track		
ANTH 135	Introduction to Biological Anthropology (Mason Core)	
Electives		
Select 9 credits from the following courses. Choose at least one GGS elective and at least one ANTH elective: [1]		9
GGS 301	Political Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 307	Geographic Approaches for Sustainable Development	
GGS 309	Introduction to Weather and Climate	
GGS 319	Air Pollution	
GGS 321	Biogeography	
GGS 322	Issues in Global Change	
GGS 357	Urban Planning	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 333	Issues in Regional Geography	
GGS 380	Geography of Virginia	
Cultural Track		
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	
ANTH 309	Peoples and Cultures of India (Mason Core)	
ANTH 376	Food and Culture	
ANTH 381	Medical Anthropology	
ANTH 382	Urban Anthropology (Mason Core)	
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core) (Cultural Topic)	
ANTH 499	Independent Research (Cultural Topic)	
Archaeology Track		
ANTH 307	Ancient Mesoamerica (Mason Core)	
ANTH 325	Field Techniques in Archaeology	
ANTH 357	Bioarchaeology	
ANTH 370	Environment and Culture	
ANTH 377	Mortuary Archaeology	
ANTH 379	Andean Archaeology	
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core) (Archaeological Topic)	
ANTH 499	Independent Research (Archaeological Topic)	
Biological Track		
ANTH 355	Human Origins	
ANTH 357	Bioarchaeology	
ANTH 366	Food and Human Evolution	
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core) (Biological Topic)	
ANTH 499	Independent Research (Biological Topic)	
Total Credits		15

[1] Students must select ANTH electives that are associated with the chosen core course track (Cultural, Archaeology, or Biology).

Additional Program

Students who are not selecting a concentration may choose 15 or more credits consisting of an established minor, concentration, second major, or other coherent selection of courses approved by the advisor and the department chair.

Code	Title	Credits
Select 15 or more credits as outlined above.		15
Total Credits		15

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, College Requirements for the BA Degree (outlined below), and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- EGEO Concentration: 66-69 credits
- HGEO Concentration: 66-67 credits
- GEA Concentration: 66-67 credits

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1. Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.
2. Minimum 3 credits required.

College Requirements for the BA Degree

In addition to the program requirements and the Mason Core requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

1. PHIL 323 Classical Western Political Theory and PHIL 324 Modern Western Political Theory may not be used to fulfill this requirement.

Social and Behavioral Sciences

Choose one approved Mason Core: Social and Behavioral Sciences course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST[1], LING, PSYC, or SOCI, and the following GGS courses:

Code	Title	Credits
Select any course from the disciplines above or select from the following GGS courses:		3
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	
GGS 110	Introduction to Geoinformation Technologies	
GGS 301	Political Geography (Mason Core)	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	
GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 330	Geography of the Soviet Succession States	
GGS 357	Urban Planning	
GGS 380	Geography of Virginia	
Total Credits		3

1. HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core)may not be used to fulfill this requirement.

Natural Science

Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits[1]. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience[2].

Code	Title	Credits
Select an additional Mason Core Natural Science course		1

[1] For Geography, BA majors, this extra credit is not required.

[2] BIOL 124 Human Anatomy and Physiology and BIOL 125 Human Anatomy and Physiology may not be used to fulfill this requirement.

Foreign Language

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202 (https://catalog.gmu.edu/colleges-schools/humanities-social-sciences/modern-classical-languages/) (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. A three course sequence in American Sign Language (EDSE 115 (https://catalog.gmu.edu/search/?P=EDSE%20115) American Sign Language (ASL) I, EDSE 116 (https://catalog.gmu.edu/search/?P=EDSE%20116) American Sign Language (ASL) II, and EDSE 219 (https://catalog.gmu.edu/search/?P=EDSE%20219) American Sign Language (ASL) III) will also meet the foreign language requirement. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Academic and Student Affairs (http://cosundergrad.gmu.edu/).

Non-Western Culture

Choose one approved Non-Western Culture Requirement[1] course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any *other* requirements (Mason Core requirements, college-level requirements, or requirements for the major).

Code	Title	Credits
Select 3 credits from approved Non-Western Culture courses if a waiver isn't applicable:		0-3
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3

[1] Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office (http://chssundergrad.gmu.edu/).

Accelerated Master's

Bachelor's Degree (any)/Geographic and Cartographic Sciences, Accelerated MS

Overview

Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor's/accelerated master's degree program enables highly qualified undergraduates to obtain any Mason bachelor's degree and the Geographic and Cartographic Sciences, MS degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor's degree. In the case of a 120 credit bachelor's program, this accelerated master's option can be completed as a 138 credit program (thesis option) or 145 credit program (comprehensive exam option). This accelerated pathway prepares students for professional careers where geoinformation management, geographic analysis, and geospatial visualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the bachelor's program and the Geographic and Cartographic Sciences, MS. While the information below is largely comprehensive, students are strongly encouraged to also review AP.6.7 Bachelor's/Accelerated Master's Degrees.

Application Requirements

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master's program after completing at least 60 undergraduate credits. Additionally, students they must have completed the following courses with a combined GPA of 3.0 or better: GGS 300 Spatial Quantitative Methods, GGS 311 Geographic Information Systems, and any one upper level GGS-prefixed course.

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. However, this accelerated master's does not require GRE test scores, letters of recommendation, or a statement of interest.

While being undergraduate students, accelerated master's students must complete the graduate courses indicated on their Accelerated Master's Program Application (obtained from the Office of Academic and Student Affairs) with a minimum grade of B in each course. They must maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor's/Accelerated Master's Transition Form (found on the Office of the University Registrar website). Students must begin their master's program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation

Science and the Office of Academic and Student Affairs to obtain further guidance.

Accelerated Option Requirements

Students admitted to this program may start taking graduate courses after completing 75 undergraduate credits. It is recommended that students register for one of the following courses in their first semester of accelerated coursework:

Code	Title	Credits
GGS 551	Cartographic Design	3
GGS 553	Geographic Information Systems	3
GGS 560	Spatial Quantitative Methods	3
GGS 579	Remote Sensing	3

Including the course chosen above, up to 12 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a B in these classes, they are granted advanced standing in the master's program and must then complete 18 (thesis option) or 25 (comprehensive exam option) additional credits to receive the master's degree. All other master's degree requirements must be met.

Reserve Graduate Credit

During the bachelor's degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master's degree credits accordingly. With 12 credits counted toward the undergraduate degree plus the maximum 6 reserve credits, the credits necessary for the graduate degree can be reduced by up to 18. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master's degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor's/Accelerated Master's Transition Form found on the Office of the University Registrar website.

Bachelor's Degree (any)/Geoinformatics and Geospatial Intelligence, Accelerated MS

Overview

Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor's/accelerated master's degree program enables highly qualified undergraduates to obtain any Mason bachelor's degree and the Geoinformatics and Geospatial Intelligence, MS degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor's degree. In the case of a 120 credit bachelor's program, this accelerated master's option can be completed as a 141 credit program. This accelerated pathway prepares students for professional careers where geoinformation management, geographic analysis, and geointelligence and geovisualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the bachelor's program and the Geoinformatics and Geospatial Intelligence, MS. While the information below is largely comprehensive, students are strongly encouraged to also review AP.6.7 Bachelor's/Accelerated Master's Degrees.

Application Requirements

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master's program after completing at least 60 undergraduate credits. Additionally, students must have completed the following courses with a combined GPA of 3.0 or better: GGS 300 Spatial Quantitative Methods, GGS 311 Geographic Information Systems, and any one upper level GGS-prefixed course.

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. However, this accelerated master's does not require GRE test scores, letters of recommendation, or a statement of interest.

While being undergraduate students, accelerated master's students must complete the graduate courses indicated on their Accelerated Master's Program Application (obtained from the Office of Academic and Student Affairs) with a minimum grade of B in each course. They must maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor's/Accelerated Master's Transition Form (found on the Office of the University Registrar website). Students must begin their master's program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.

Accelerated Option Requirements

Students admitted to this program may start taking graduate courses after completing 75 undergraduate credits. It is recommended that students register for one of the following courses in their first semester of accelerated coursework:

Code	Title	Credits
GGS 550	Geospatial Science Fundamentals	3
GGS 553	Geographic Information Systems	3
GGS 579	Remote Sensing	3
GGS 684	Selected Topics in Geospatial Intelligence	3

Including the course chosen above, up to 12 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a B in these classes, they are granted advanced standing in the master's program and must then complete 21 additional credits to receive the master's degree. All other master's degree requirements must be met.

Reserve Graduate Credit

During the bachelor's degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master's degree credits accordingly. With 12 credits counted toward the undergraduate degree plus the maximum 6 reserve credits, the credits necessary for the graduate degree can be reduced by up to 18. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master's degree, students must request their transfer from the undergraduate degree to the graduate degree via the

Bachelor's/Accelerated Master's Transition Form found on the Office of the University Registrar website.

Geography, BS

Banner Code: SC-BS-GEOG

Nathan R. Burtch, Undergraduate Coordinator

2413 Exploratory Hall
Fairfax Campus

Phone: 703-993-1207
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science/geography-bs

The Geography, BS is designed to offer students the opportunity to study the integrated social and environmental processes that continuously shape and reshape the world we live in. This major provides students with broad training across the core subdisciplines of geography (human, physical, and GIScience), emphasizing application and technique-driven coursework, in addition to a rigorous science and mathematics curriculum. Students will find numerous opportunities for employment in both the private and public sectors, as well as in academia. Given their interdisciplinary approach and uniquely spatial perspective, geographers are well suited to address important local, regional, and global challenges in today's world.

The Department of Geography and Geoinformation Science fosters a supportive, active learning environment in which students are encouraged to work closely with both faculty and peers. The curriculum in this major provides students with the analytical, technical, and practical training that prepares them to be successful in an ever-evolving job market. For students who wish to pursue their interest in geography via a more flexible degree program, the department also offers a Geography, BA.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core.

GGS 415 Seminar in Geographic Thought and Methodology fulfills the writing intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Geography

Candidates for the Geography, BS degree must complete the following Core, Breadth and Experience, and Geography Elective courses with a minimum GPA of 2.00:

Core Courses

Code	Title	Credits
GGS 102	Physical Geography (Mason Core)	3-4
or GGS 121	Dynamic Atmosphere and Hydrosphere (Mason Core)	
GGS 103	Human Geography (Mason Core)	3
GGS 110	Introduction to Geoinformation Technologies	3
or GGS 210	Introduction to Spatial Computing	
GGS 300	Spatial Quantitative Methods	3
GGS 310	Cartographic Design	3
GGS 311	Geographic Information Systems	3
GGS 379	Remote Sensing	3
GGS 400	Colloquium in Geoinformation Science	1
GGS 415	Seminar in Geographic Thought and Methodology [1]	3
Total Credits		25-26

[1] Fulfills the writing intensive requirement.

Breadth and Experience Courses

Code	Title	Credits
Advanced Technique Courses		
Select three from the following:		9
GGS 308	Field Mapping Techniques	
GGS 354	Data Analysis and Global Change Detection Techniques	
GGS 410	Introduction to Hyperspectral Imaging	
GGS 411	Geovisualization	
GGS 412	Air Photography Interpretation	
GGS 416	Satellite Image Analysis	
GGS 422	Drone Remote Sensing	
GGS 462	Web-based Geographic Information Systems	
GGS 463	RS: GIS Analysis and Application	
GGS 470	Special Topics in Geographic Techniques	
Systematic Courses		
Select one from the following:		3
GGS 301	Political Geography (Mason Core)	
GGS 302	Global Environmental Hazards	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 304	Population Geography (Mason Core)	

GGS 305	Economic Geography	
GGS 306	Urban Geography	
GGS 307	Geographic Approaches for Sustainable Development	
GGS 309	Introduction to Weather and Climate	
GGS 312	Physical Climatology	
GGS 314	Severe and Extreme Weather	
GGS 319	Air Pollution	
GGS 321	Biogeography	
GGS 322	Issues in Global Change	
GGS 340	Health Geography	
GGS 344	Military Geography	
GGS 357	Urban Planning	
GGS 398	Selected Topics in Global Change	
GGS 399	Select Topics in GGS	
GGS 456	Introduction to Atmospheric Radiation	
Regional Courses		
Select one from the following:		3
GGS 315	Geography of the United States	
GGS 316	Geography of Latin America	
GGS 317	Geography of China (Mason Core)	
GGS 320	Geography of Europe	
GGS 325	Geography of North Africa and the Middle East	
GGS 326	Geography of Eastern Europe and Russia	
GGS 330	Geography of the Soviet Succession States	
GGS 333	Issues in Regional Geography	
GGS 380	Geography of Virginia	
Total Credits		15

Geography Electives

Code	Title	Credits
Select 3 credits of undergraduate-level GGS courses		3
Select 6 credits of 300 or 400-level GGS courses		6
Total Credits		9

Outside Requirements

Candidates for the Geography, BS degree must complete the following courses from outside of Geography and Geoinformation Science:

Code	Title	Credits
CDS 130	Computing for Scientists	3
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	3-4
or IT 207	Applied IT Programming	
or STAT 250	Introductory Statistics I (Mason Core)	
Total Credits		10-11

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 59-61 credits, which may be applied toward any remaining Mason Core requirements, Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Geology, BS

Banner Code: SC-BS-GEOL

Dr. Stacey Verardo, Undergraduate Coordinator and Professor

3451 Exploratory Hall
Fairfax Campus

Phone: 703-993-1045
Email: sverardo@gmu.edu
Website: science.gmu.edu/academics/departments-units/atmospheric-oceanic-earth-sciences/majors-minors

This degree is intended for students interested in studying the Earth and its processes. Students receive a broad background in the Earth sciences and select one of five specialty concentrations. The concentrations in Earth Surface Processes, Environmental Geoscience, Geology, and Paleontology are solely offered by the Department of Atmospheric, Oceanic and Earth Sciences. The concentration in Oceanography and Estuarine science is offered jointly with the Department of Environmental Science and Policy, where specific advising is also available.

This is a Green Leaf program.

Teacher Licensure

Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Secondary Education - Earth Science (6-12) Undergraduate Certificate
- Geology, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Earth Science Concentration)

Interested students should attend an information session early in their undergraduate career. For more information, visit the School of Education's website (https://education.gmu.edu/).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Writing Intensive Requirement

GEOL 317 Geomorphology fulfills the writing intensive requirement for this major, with the exception of:

- The Environmental Geoscience Concentration, whereby GEOL 305 Environmental Geology fulfills the writing intensive requirement.
- The Paleontology Concentration, whereby GEOL 334 Vertebrate Paleontology fulfills the writing intensive requirement.

Requirements

formerly (SC-BS-ESCI)

Degree Requirements

Total credits: minimum 120

This is a Green Leaf program.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete all coursework with a minimum GPA of 2.00.

Core Science and Mathematics

Code	Title	Credits
GEOL 101	Introductory Geology I (Mason Core)	4
GEOL 309	Oceanography	3
or BIOL 309	Oceanography	
GEOL 420	Earth Science and Policy (Mason Core)	3
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	4
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
STAT 250	Introductory Statistics I (Mason Core)	3
Select one of the following options:		3-4
Option A:		
CLIM 111	Introduction to the Fundamentals of Atmospheric Science (Mason Core)	
CLIM 112	Introduction to the Fundamentals of Atmospheric Science Lab (Mason Core)	
Option B:		
PHYS 111	Introduction to the Fundamentals of Atmospheric Science (Mason Core)	
PHYS 112	Introduction to the Fundamentals of Atmospheric Science Lab (Mason Core)	
Option C:		
GGS 309	Introduction to Weather and Climate	
Total Credits		32-33

Physics

Code	Title	Credits
Select one 8-credit sequence from the following:		8
PHYS 160 & PHYS 161 & PHYS 260 & PHYS 261	University Physics I (Mason Core) and University Physics I Laboratory (Mason Core) and University Physics II (Mason Core) and University Physics II Laboratory (Mason Core)	
PHYS 243 & PHYS 244 & PHYS 245 & PHYS 246	College Physics I (Mason Core) and College Physics I Lab (Mason Core) and College Physics II (Mason Core) and College Physics II Lab (Mason Core)	
Total Credits		8

Concentration in Earth Surface Processes (EP)

This concentration focuses on a broad understanding of the physical processes and natural materials found at or near the Earth's surface that have produced the primary landforms and landscapes observed today. Fundamental concepts, methods and techniques of landscape analysis are also examined. Students choosing this concentration must complete the following coursework:

Code	Title	Credits
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	4
or EVPP 108 & EVPP 109	Ecosphere - Introduction to Environmental Science I-Lecture (Mason Core) and Ecosphere- Introduction to Environmental Science I- Lab (Mason Core)	
GEOL 302	Mineralogy	4

GEOL 303	Field Mapping Techniques	3
GEOL 306	Soil Science	3
GEOL 317	Geomorphology [1]	4
GGS 311	Geographic Information Systems	3
Select 10-15 credits from the following:		10-15
GEOL 304	Sedimentary Geology	
GEOL 305	Environmental Geology	
GEOL 313	Hydrogeology	
GEOL 315	Topics in Geology II	
GEOL 363	Coastal Morphology and Processes	
GEOL 401	Structural Geology	
GEOL 403	Geochemistry	
GEOL 417	Geophysics	
Total Credits		31-36

[1] Fulfills writing intensive requirement.

Concentration in Environmental Geoscience (EVGS)

This concentration provides the tools for applying geologic information (on soils, rocks, water, weather, and landscapes) to contemporary environmental problems (including: pollution, waste management, resource extraction, natural hazards, land-use, habitat restoration, species preservation, and human health). Environmental geoscience studies the physical environment in which biological interactions take place, whereby aiding the understanding of ecology. Students choosing this concentration must complete the following coursework:

Code	Title	Credits
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	4
GEOL 302	Mineralogy	4
GEOL 305	Environmental Geology [1]	3
GEOL 306	Soil Science	3
GEOL 313	Hydrogeology	3
GEOL 320	Geology of Earth Resources	3
GEOL 321	Geology of Energy Resources	3
GEOL 403	Geochemistry	3
or CHEM 427	Aquatic Environmental Chemistry	
EVPP 336	Human Dimensions of the Environment	3
or EVPP 361	Introduction to Environmental Policy	
Select 6-12 credits from the following:		6-12
CLIM 101	Global Warming: Weather, Climate, and Society (Mason Core)	
CLIM 412	Physical Oceanography	
GEOL 304	Sedimentary Geology	
EVPP 201	Environment and You: Issues for the Twenty-First Century (Mason Core)	
EVPP 336	Human Dimensions of the Environment	
EVPP 361	Introduction to Environmental Policy	
EVPP 432	Energy Policy	
EVPP 436	The Human Dimensions of Global Climate Change	
GGS 302	Global Environmental Hazards	
GGS 311	Geographic Information Systems	
GGS 322	Issues in Global Change	
PHYS 331	Physics of Renewable Energy	
CONF 101	Conflict and Our World (Mason Core)	
INTS 211	Introduction to Conservation Studies (Mason Core)	
PRLS 300	People with Nature	
PRLS 402	Human Behavior in Natural Environments	
Total Credits		35-41

[1] Fulfills writing intensive requirement for this concentration only.

Concentration in Geology (GEOL)

This concentration is fashioned after traditional geology bachelor's degrees. It allows graduates to be employed as geologists in the field or to pursue graduate studies in geology. Students choosing this concentration must complete the following coursework:

Code	Title	Credits
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	4
GEOL 302	Mineralogy	4
GEOL 304	Sedimentary Geology	4
GEOL 308	Igneous and Metamorphic Petrology	4
GEOL 312	Invertebrate Paleontology	4
GEOL 317	Geomorphology [1]	4
GEOL 401	Structural Geology	4
Six credits of		6
GEOL 404	Geological Field Techniques [2]	
Total Credits		34

[1] Fulfills writing intensive requirement.

[2] A 6-credit geology field camp may be substituted for this requirement, see advisor for details.

Concentration in Oceanography and Estuarine Science (OEST)

This concentration provides students with a comprehensive knowledge of oceanography. Additional coursework in physical and chemical oceanography give insight into the aquatic environment and its link to both ecosystems and climate. Within the concentration, students can choose an Open Ocean or Coastal Ocean option. The curriculum will emphasize local and regional case studies, in particular the Chesapeake Bay. The program will provide students with the basic training required to allow them to obtain entry level positions in oceanographic and estuarine career tracks or an appropriate graduate degree program. Students choosing this concentration must complete the following coursework:

Code	Title	Credits
CLIM 412	Physical Oceanography	3
or GEOL 412	Physical Oceanography	
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	4
GEOL 458	Chemical Oceanography	3
or CHEM 458	Chemical Oceanography	
Select one of the following 8-credit sequences:		8

BIOL 103 & BIOL 107 & BIOL 106	Introductory Biology II-Survey of Cell and Molecular Biology (Mason Core) and Intro Biology II Lecture (Mason Core) and Introductory Biology II Laboratory (Mason Core)	
BIOL 213 & BIOL 300	Cell Structure and Function (Mason Core) and BioDiversity	
EVPP 108 & EVPP 109 & EVPP 112 & EVPP 113	Ecosphere - Introduction to Environmental Science I-Lecture (Mason Core) and Ecosphere- Introduction to Environmental Science I- Lab (Mason Core) and Ecosphere: Introduction to Environmental Science II-Lecture (Mason Core) and Ecosphere: Introduction to Environmental Science II–Lab (Mason Core)	
Select one of the following options:		15-16
Open Ocean Option:		
GEOL 364	Marine Geology	
BIOL 449	Marine Ecology	
Three additional courses from the electives list below (minimum of 9 credits)		
Coastal Ocean Option		
GEOL 363	Coastal Morphology and Processes	
EVPP 581	Estuarine and Coastal Ecology	
Three additional courses from the electives list below (minimum of 9 credits)		
Total Credits		33-34

Electives

Code	Title	Credits
GEOL 302	Mineralogy	4
GEOL 304	Sedimentary Geology	4
GEOL 308	Igneous and Metamorphic Petrology	4
GEOL 312	Invertebrate Paleontology	4
GEOL 363	Coastal Morphology and Processes	4
GEOL 364	Marine Geology	3
GEOL 565	Paleoceanography	3
BIOL 440	Field Biology [1]	4
BIOL 449	Marine Ecology	3
EVPP 350	Freshwater Ecosystems	4
EVPP 377	Applied Ecology	3
EVPP 419	Marine Mammal Biology and Conservation	3
EVPP 581	Estuarine and Coastal Ecology	3
EVPP 582	Estuarine and Coastal Ecology Laboratory	1
INTS 395	Field-Based Work [2]	1-18
Additional recommended course:		
RECR 161	Scuba Diving: Basic	2

1 When topic is Coral Reef Ecology

2 When topic is Exploring Underwater Ecology

Concentration in Paleontology (PLEO)

This concentration focuses on a broad understanding of Earth's history and the evolution of life on Earth as revealed through the fossil record. Fundamental concepts, methods and techniques of historical geology and paleontological data and analysis are also examined. This concentration may not be taken in conjunction with the Paleontology Minor. Students choosing this concentration must complete the following coursework:

Code	Title	Credits
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	4
GEOL 302	Mineralogy	4
GEOL 304	Sedimentary Geology	4
GEOL 312	Invertebrate Paleontology	4
GEOL 334	Vertebrate Paleontology [1]	4
BIOL 103	Introductory Biology II-Survey of Cell and Molecular Biology (Mason Core)	4
or BIOL 213	Cell Structure and Function (Mason Core)	
Select 9-10 credits from the following additional courses:		9-10
GEOL 306	Soil Science	
GEOL 317	Geomorphology	
GEOL 332	Paleoclimatology	
GEOL 364	Marine Geology	
GEOL 403	Geochemistry	
GEOL 412	Physical Oceanography	
GEOL 458	Chemical Oceanography	
GEOL 565	Paleoceanography	
Select 3-4 credits from the following:		3-4
BIOL 300	BioDiversity	
BIOL 320	Comparative Chordate Anatomy	
BIOL 331	Invertebrate Zoology	
BIOL 374	Biogeography: Space, Time, and Life	
or GGS 321	Biogeography	
BIOL 468	Vertebrate Natural History	
BIOL 470	Dinosaur Biology	
BIOL 471	Evolution	
Total Credits		36-38

1 Fulfills writing intensive requirement for this concentration only.

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core (https://catalog.gmu.edu/mason-core/) requirements, Requirements for Bachelor's Degrees (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-3-2), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- EP concentration: 43-49 credits
- EVGS concentration: 38-45 credits
- GEOL concentration: 45-46 credits

- OEST concentration: 45-47 credits
- PLEO concentration: 41-44 credits

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

Honors

Honors in the Major

Geology majors who have completed 16 credits of math and science, including GEOL 302 Mineralogy, with a GPA of 3.00 or higher are eligible to enter the departmental honors program. Transfer students who have an incoming GPA of 3.10 or higher in math and science and a grade of 'B' or better in GEOL 302 Mineralogy are also eligible. To graduate with honors in Geology, students are required to maintain a minimum GPA of 3.00 in math and science courses and complete one of the two following sets of courses with an average GPA of 3.50 or better:

Code	Title	Credits
First Set of Courses		
GEOL 410	Research Proposal Preparation	1
GEOL 411	Geological Research	3
GEOL 420	Earth Science and Policy (Mason Core)	3
Second Set of Courses		
CLIM 408	Senior Research	3
CLIM 409	Research Internship	3
GEOL 420	Earth Science and Policy (Mason Core)	3

Accelerated Master's

Bachelor's Degree (selected)/ Environmental Science and Policy, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain a Green Leaf-designated bachelor's degree and the Environmental Science and Policy, MS (https://catalog.gmu.edu/colleges-schools/science/environmental-policy/environmental-science-policy-ms/) degrees within an accelerated timeframe. Upon completion of this 141 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

The GRE exam is not required for this accelerated master's program.

Students should submit three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor (see Graduate Advisor section below) stating that the advisor agrees to take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated major or minor may apply to this accelerated master's program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) and CHEM 212 General Chemistry II (Mason Core) and three semesters of biology, including a course in ecology, or the equivalent, for example:

Code	Title	Credits
Select one of the following options:		13
Option 1:		
BIOL 213	Cell Structure and Function (Mason Core)	

BIOL 214	Biostatistics for Biology Majors
BIOL 308	Foundations of Ecology and Evolution
Option 2:	
EVPP 210	Environmental Biology: Molecules and Cells
EVPP 301	Environmental Science: Biological Diversity and Ecosystems
EVPP 302	Environmental Science: Biomes and Human Dimensions
EVPP 305	Environmental Microbiology Essentials
EVPP 306	Environmental Microbiology Essentials Laboratory
Option 3:	
CONS 401	Conservation Theory
CONS 402	Applied Conservation
6 credits of BIOL or CONS electives	

Graduate Advisor

By at least the beginning of their senior year, students should seek out a faculty member in the Department of Environmental Science and Policy who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason University (called "program faculty") can serve as master's advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
EVPP 518	Conservation Biology	3
EVPP 529	Environmental Science Communication	3
EVPP 621	Overview of Biodiversity Conservation	3
EVPP 635	Environment and Society	3

Geology, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Earth Science Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Geology (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) and an MEd in Curriculum and Instruction (Secondary Education Earth Science concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/)in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/) for policies related to this program.

This accelerated option is offered jointly by the Department of Atmospheric, Oceanic, and Earth Sciences (https://catalog.gmu.edu/colleges-schools/science/atmospheric-oceanic-earth-sciences/) and the School of Education (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
EDUC 547	Scientific Inquiry and the Nature of Science	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 573	Teaching Science in the Secondary School	3
SEED 673	Advanced Methods of Teaching Science in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Geology, BS/Earth Systems Science, Accelerated MS

Overview

Geology, and Earth sciences more broadly, are extremely important to society and our economy as they deal with our planet, our oceans, and our climate. Degrees in Earth science are broadly useful in industry, government, conservation, and many other areas of our economy. While there are many positions in the field that only require a bachelor's degree, many employers either prefer a Master's degree, or a Master's degree can be the key to further promotion within a particular organization. This Accelerated Master's degree is designed to give students the skills and the degrees that they need to be both initially successful, and to ensure long-term advancement in their chosen professions.

Application Requirements

Applicants should be enrolled in the Geology, BS degree at Mason and have earned at least 60 credits. Previous coursework should include two semesters each of calculus, chemistry, and physics, and one semester of statistics. Applicants should have a minimum GPA of 3.00.

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/) section of this catalog, excluding the GRE exam requirement (which is not required for those enrolled in the accelerated program). This includes three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals (including information on the applicant's proposed MS research), and a letter from their advisor. This letter should state that the advisor agrees to take on the candidate as an MS student, addresses how the candidate would be a good fit for them, and indicate why the applicant's research topic would be suitable for study.

Accelerated Option Requirements

Students admitted to this program may take graduate courses after completing 75 undergraduate credits, and up to 12 credits of appropriate graduate coursework may be used in partial satisfaction of the requirements for the undergraduate degree. If students earn at least a 3.00 GPA in these classes, they are granted advanced standing in the master's program and must then complete an additional 24 credits to receive the master's degree. All other requirements for the Earth Systems Science, MS, must be met.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition form found on the Office of the University Registrar's website (https://registrar.gmu.edu/forms/).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Reserve Graduate Credit

Undergraduate students may also take up to 6 additional and appropriate graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master's degree credits accordingly (e.g., with 12 credits counted toward the undergraduate and graduate degrees plus the maximum 6 reserve credits for the master's, an MS could be completed with 12 post-bachelor's credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department.

Graduate Course Suggestions

Students should consult with an advisor before registering for graduate credits.

Geoinformatics and Geospatial Intelligence, MS

Banner Code: SC-MS-GEOI

Ruixin Yang, Graduate Coordinator

2409 Exploratory Hall
Fairfax Campus

Phone: 703-993-3615
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science

The program addresses the emerging demand for scientists trained in the collection, organization, analysis, and dissemination of information about physical features, man-made structures, moving objects, people, and events that are geo-referenced or geo-located. This program focuses primarily on the computational approaches that support the synthesis and analysis of diverse types of data in order to identify and monitor complex events and phenomena that manifest over space and time. While geospatial intelligence has a strong Department of Defense connotation, the principles behind it have a significant dual use potential, addressing the needs of a broader audience, ranging for example from intelligent navigation in urban spaces to emergency response systems for natural and man-made disasters.

The MS is designed to expose students to fundamental theoretical principles and practical applications involving:

- Geographic Information Science
- Digital image analysis as it applies to geoinformatics and geospatial intelligence
- Computational principles for geoinformatics and intelligence

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility and Application Requirements

Applicants for this master's should hold a BA or BS degree in a discipline related to the program's theme from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a minimum GPA of 3.00, including courses in differential and integral calculus. A working knowledge of a computer programming language is a plus. When the background of an individual student does not meet the program's requirements, remedial or preparatory courses tailored to student's needs may be recommended. To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/). Official transcripts from each college and graduate institution attended, a current résumé, and a goals statement will be required.

Applicants will also need three letters of recommendation and an official report of scores obtained on the GRE-GEN. The GRE requirement for admission may be waived if the student holds a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. TOEFL scores are required of all international applicants.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Secondary Program Options

Students enrolled in this master's program have the option of adding a secondary graduate certificate program. Depending upon the secondary program chosen, many courses may be applicable to both the certificate and the master's. Before adding a secondary program, students are advised to carefully review AP.6.8 Requirements for Graduate Certificates and AP.6.9 Requirements for Master's Degrees. Faculty advisors should be contacted for further guidance and for graduate certificate program suggestions.

Requirements

Degree Requirements

Total credits: 33

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Select three courses from the groupings below, with no more than two courses from a single group (courses must be taken from at least two groups): [1]		9
Image Analysis:		
GGS 562	Photogrammetry	
GGS 622	Drone Remote Sensing	
GGS 626	Physical Fundamentals of Remote Sensing	
GGS 629	Remote Sensing of the Environment and Earth System	
GGS 680	Earth Image Processing	
GGS 740	Hyperspectral Imaging Systems	
GGS 760	Advanced Topics in Remote Sensing	
GGS 840	Hyperspectral Imaging Applications	
Geographic Information Science:		
GGS 550	Geospatial Science Fundamentals	
GGS 563	Advanced Geographic Information Systems	
GGS 653	GIS Analysis and Application	
GGS 675	Location Science	
GGS 772	Cloud Geographic Information Systems	
GGS 791	Advanced Spatial Statistics	
Computational Geoinformatics:		
GGS 650	Introduction to GIS Algorithms and Programming	
GGS 671	Algorithms and Modeling in GIS	
GGS 681	Social Media Analysis	
GGS 692	Web-based Geographic Information Systems	
GGS 754	Earth Science Data and Advanced Data Analysis	
GGS 773	Interoperability of Geographic Information Systems	
Total Credits		9

[1] Course selections must be approved by the program coordinator.

Accelerated Master's

Bachelor's Degree (any)/Geoinformatics and Geospatial Intelligence, Accelerated MS

Overview

Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor's/accelerated master's degree program enables highly qualified undergraduates to obtain any Mason bachelor's degree and the Geoinformatics and Geospatial Intelligence, MS degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor's degree. In the case of a 120 credit bachelor's program, this accelerated master's option can be completed as a 141 credit program. This accelerated pathway prepares students for professional careers where geoinformation management, geographic analysis, and geointelligence and geovisualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the bachelor's program and the Geoinformatics and Geospatial Intelligence, MS. While the information below is largely comprehensive, students are strongly encouraged to also review AP.6.7 Bachelor's/Accelerated Master's Degrees.

Application Requirements

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master's program after completing at least 60 undergraduate credits. Additionally, students must have completed the following courses with a combined GPA of 3.0 or better: GGS 300 Spatial Quantitative Methods, GGS 311 Geographic Information Systems, and any one upper level GGS-prefixed course.

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. However, this accelerated master's does not require GRE test scores, letters of recommendation, or a statement of interest.

While being undergraduate students, accelerated master's students must complete the graduate courses indicated on their Accelerated Master's Program Application (obtained from the Office of Academic and Student Affairs) with a minimum grade of B in each course. They must maintain a minimum GPA of 3.0 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor's/Accelerated Master's Transition Form (found on the Office of the University Registrar website). Students must begin their master's program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.

Accelerated Option Requirements

Students admitted to this program may start taking graduate courses after completing 75 undergraduate credits. It is recommended that students register for one of the following courses in their first semester of accelerated coursework:

Code	Title	Credits
GGS 550	Geospatial Science Fundamentals	3
GGS 553	Geographic Information Systems	3
GGS 579	Remote Sensing	3
GGS 684	Selected Topics in Geospatial Intelligence	3

Including the course chosen above, up to 12 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a B in these classes, they are granted advanced standing in the master's program and must then complete 21 additional credits to receive the master's degree. All other master's degree requirements must be met.

Reserve Graduate Credit

During the bachelor's degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master's degree

credits accordingly. With 12 credits counted toward the undergraduate degree plus the maximum 6 reserve credits, the credits necessary for the graduate degree can be reduced by up to 18. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master's degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor's/Accelerated Master's Transition Form found on the Office of the University Registrar website.

GeoManagement Undergraduate Certificate

Banner Code: SC-CERB-GEOM

Nathan R. Burtch, Undergraduate Coordinator

2413 Exploratory Hall
Fairfax Campus

Phone: 703-993-1207
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science/geomanagement-undergraduate

Considering our global environment, professionals working on large-scale GIS projects often find it only natural to couple management and marketing topics with geography. This certificate accommodates students who are pursuing a degree in the Department of Geography and Geoinformation Science who also wish to acquire more knowledge on how to manage people and organizations dealing with GIS in a global economy. By understanding marketing terms, financial matters, and also having a good understanding of how to manage people, students will be well prepared to face challenges in multidisciplinary GIS-oriented environments.

All courses are available online; further information can be found with Mason Online (http://masononline.gmu.edu/).

This certificate may be pursued on a full-time or part-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Undergraduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Certificate Requirements

Total credits: 24-25

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Management

Students in this certificate can take the following MBUS courses for certificate credit without sophomore standing (listed as a course prerequisite):

Code	Title	Credits
Select two courses from the following:		6
MBUS 300	Accounting in a Global Economy	
MBUS 301	Managing People and Organizations in a Global Economy	
MBUS 303	Marketing in a Global Economy	
Total Credits		6

Geoinformation Science

Code	Title	Credits
GGS 101	Major World Regions (Mason Core)	3
or GGS 103	Human Geography (Mason Core)	
GGS 102	Physical Geography (Mason Core)	3-4
or GGS 121	Dynamic Atmosphere and Hydrosphere (Mason Core)	
GGS 311	Geographic Information Systems	3
GGS 312	Physical Climatology	3
GGS 315	Geography of the United States	3
GGS 380	Geography of Virginia	3
Total Credits		18-19

Geospatial Intelligence Graduate Certificate

Banner Code: SC-CERG-GI

Ruixin Yang, Graduate Coordinator

2409 Exploratory Hall
Fairfax Campus

Phone: 703-993-3615
Email: ggs@gmu.edu
Website: science.gmu.edu/academics/departments-units/geography-geoinformation-science/geospatial-intelligence-graduate

This graduate certificate is for persons employed in geospatial intelligence applications (i.e., federal agency and/ or corporate or association personnel) or those interested in entering this field. Our program offers fundamental knowledge on geospatial intelligence and the ability to apply this knowledge to a diverse range of constantly

evolving geospatial intelligence situations. This graduate certificate has been accredited by the United States Geospatial Intelligence Foundation.

The majority of courses required for this certificate are also available online. For more information visit Mason Online (http://masononline.gmu.edu/).

The graduate certificate in geospatial intelligence may be pursued on a part-time or full-time basis, and qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

Applicants to this graduate certificate program should hold a BA or BS degree in a discipline related to the certificate's theme from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a minimum GPA of 3.00. To apply, prospective students should complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/). In addition, applicants to this certificate program must submit a current résumé, and GRE scores. Letters of recommendation are not required but will considerably strengthen an application, if available. TOEFL scores are required of all international applicants.

Applicants should have undergraduate backgrounds that include courses in differential and integral calculus, and they should possess working knowledge of a computer programming language. Depending on the background of the individual student, the coordinator may recommend remedial or preparatory courses tailored to the student's needs.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Premium Tuition Rate

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Transfer of Credit

Students may transfer no more than 3 credits into the certificate program with the approval of the academic director.

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

The mandatory core courses reflect the three key science emphases of this program: geospatial image analysis, spatial analysis, and information technology:

Code	Title	Credits
GGS 553	Geographic Information Systems	3
GGS 680	Earth Image Processing	3
GGS 684	Selected Topics in Geospatial Intelligence	3
GGS 685	Capstone Course in Geoinformatics	3
Select one from the following:		3
GGS 650	Introduction to GIS Algorithms and Programming	
GGS 664	Spatial Data Structures	
GGS 692	Web-based Geographic Information Systems	
Total Credits		15

Elective

Code	Title	Credits
Select one additional elective course from the following:		3
GGS 563	Advanced Geographic Information Systems	
GGS 579	Remote Sensing	
GGS 631	Spatial Agent-Based Models of Human-Environment Interactions	
GGS 650	Introduction to GIS Algorithms and Programming	
GGS 658	Terrain Mapping	
GGS 664	Spatial Data Structures	
GGS 671	Algorithms and Modeling in GIS	
GGS 675	Location Science	
GGS 681	Social Media Analysis	
GGS 692	Web-based Geographic Information Systems	
GGS 740	Hyperspectral Imaging Systems	
GGS 772	Cloud Geographic Information Systems	
GGS 787	Scientific Data Mining for Geoinformatics	
Total Credits		3

Remote Sensing and Image Processing Graduate Certificate

Banner Code: SC-CERG-RSIP

Ruixin Yang, Graduate Coordinator

2409 Exploratory Hall
Fairfax Campus

Phone: 703-993-3615
Email: ggs@gmu.edu

This certificate program focuses on the skills needed to take advantage of the enormous increase in the availability and use of remotely sensed data related to the Earth. Ideal candidates for this certificate are those who have a background in Earth and environmental sciences and are working in or planning to enter into the field of remote sensing, Earth observing, or image processing.

The Remote Sensing and Image Processing Graduate Certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants to this certificate program must submit a current résumé. TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent.

Applicants should hold a BA or BS degree in a discipline related to the science and applications of remote sensing from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a minimum GPA of 3.00. Applicants should have some prior education or training in remote sensing or image processing. Students with a background in one of the physical sciences (physics, chemistry, atmospheric science, hydrology, or geology), geography, or environmental science will be particularly well-suited to undertake this program. Applicants should have an undergraduate background that includes courses in differential and integral calculus, and they should possess working knowledge of a computer programming language.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Premium Tuition Rate

This professional certificate program charges students at a differential (premium) tuition rate. This rate applies to all students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition will be used to fund continuing improvements in the departmental computational facilities used to support the certificate program.

Fairfax Campus

Phone: 703-993-1207
Email: ggs@gmu.edu
Website: ggs.gmu.edu

With urban spaces becoming data-rich environments, the goal of this minor is to provide students with the ability to use large-scale data from a variety of sources to understand and address real-world challenges in the urban context. In combining courses that address spatial analysis and mapping, data science, and social sciences, this minor provides the background necessary to investigate data-driven problems in relation to urban scenarios. A capstone project will provide students with the opportunity to address a real-world issue through focused study and applied research under the direction of a faculty member and in collaboration with stakeholders.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Students must complete all coursework with a minimum GPA of 2.00.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Minor Requirements

Total credits: 18

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Department of Mathematical Sciences

Phone: 703-993-1460
Website: math.gmu.edu

Administration

- David Walnut, Chair
- Joanna Jauchen, Associate Chair for Teaching and Equity
- Maria Emelianenko, Director of Graduate Studies
- Catherine Sausville, Director of Undergraduate Studies

The Department of Mathematical Sciences offers undergraduate and graduate degree programs in mathematics for students with various interests and career goals. Students may pursue the standard program or a program focused on actuarial mathematics, applied mathematics, mathematics education, or mathematical statistics. Students may complement other interests by taking a double major in mathematics and a related field, such as chemistry, economics, physics, computer science, or engineering.

Math Tutorial

The department offers a Tutorial Program (http://math.gmu.edu/tutorial-registration.php) for students who do not place into the math course they need. Successful completion of the relevant program enables students to enroll in MATH 105 Precalculus Mathematics, MATH 108 Introductory Calculus with Business Applications (Mason Core), or MATH 125 Discrete Mathematics I (Mason Core).

Math Tutoring Center

The department manages the Math Tutoring Center (http://math.gmu.edu/tutor-center.php?_ga=1.265621830.873783809.1452007880), which offers free tutoring for first- and second-year math courses. Tutoring is given by advanced mathematics students and is available on a drop-in basis with daytime and evening hours throughout the semester.

Certificate in College Teaching

A student enrolled in the Mathematics, MS or Mathematics, PhD who is primarily interested in pursuing a career in undergraduate education at the college level is encouraged to consider enrolling in the College Teaching Graduate Certificate offered through the College of Humanities and Social Sciences.

Credit can be earned for HE 685 Practicum by working one semester as a graduate teaching assistant in the Department of Mathematical Sciences.

Assistant Professors

Berry, Bray, Carchedi, De la Pena, Eckley, Khankan, Lukyanenko, Macrina, Rautenberg, Rebhuhn-Glanz (R-G)

Instructors

Andreani, Coleson, Crossin, Jauchen, O'Brien, Sausville

Affiliates

Nash

Emeriti

Alligood, Cabell, Levy, Lin, Polyak, Saperstone, Shapiro, Singman

Requirements & Policies

Policies

Writing-Intensive Requirement

Mason policy requires all students to complete at least one course designated as "writing intensive" in their major. Students majoring in mathematics fulfill this requirement by successfully completing MATH 300 Introduction to Advanced Mathematics.

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development section of this catalog and attend an information session early in their studies. For more information, visit the Graduate School of Education (http://gse.gmu.edu/).

Information on Undergraduate MATH Courses

Admissions & Policies

- For Mathematics Majors
- For Non-mathematics Majors
- For Both Mathematics and Non-mathematics Majors

For Mathematics Majors

The following cannot be used as substitutes for any requirements of the major in mathematics:

Code	Title	Credits
MATH 104	Trigonometry and Transcendental Functions	2
MATH 105	Precalculus Mathematics	4
MATH 106	Quantitative Reasoning (Mason Core)	3
MATH 108	Introductory Calculus with Business Applications (Mason Core)	3
MATH 110	Introductory Probability (Mason Core)	3
MATH 111	Linear Mathematical Modeling (Mason Core)	3
MATH 112	Discrete Mathematics for IT	3
MATH 271	Mathematics for the Elementary School Teachers I	3
MATH 272	Mathematics for the Elementary School Teachers II (Mason Core)	3

For Non-mathematics Majors

- MATH 108 Introductory Calculus with Business Applications (Mason Core), MATH 110 Introductory Probability (Mason Core), and MATH 111 Linear Mathematical Modeling (Mason Core) are designed for students in the social and behavioral sciences.
- Liberal arts majors are advised to take MATH 106 Quantitative Reasoning (Mason Core), MATH 110 Introductory Probability (Mason Core), or MATH 111 Linear Mathematical Modeling (Mason Core).
- Students in the natural sciences who plan to do graduate work are advised to add courses from:

Code	Title	Credits
MATH 313	Introduction to Applied Analysis	3
MATH 314	Introduction to Applied Mathematics	3
MATH 351	Probability	3
MATH 352	Statistics	3
MATH 441	Deterministic Operations Research	3
MATH 442	Stochastic Operations Research	3
MATH 446	Numerical Analysis I	3
MATH 447	Numerical Analysis II	3

For Both Mathematics and Non-mathematics Majors

- MATH 105 Precalculus Mathematics, MATH 108 Introductory Calculus with Business Applications (Mason Core), MATH 113 Analytic Geometry and Calculus I (Mason Core), MATH 123 Calculus with Algebra/Trigonometry, Part A, MATH 125 Discrete Mathematics I (Mason Core) have a qualifying score on the Math Placement Test (http://math.gmu.edu/placement_test.php) as a prerequisite. The Math Placement Test (http://math.gmu.edu/placement_test.php) is given frequently; for the schedule, check the Department of Mathematical Sciences website (http://math.gmu.edu/).
- The sequence MATH 123 Calculus with Algebra/Trigonometry, Part A and MATH 124 Calculus with Algebra/Trigonometry, Part B (Mason Core) is an option for students who need MATH 113 Analytic Geometry and Calculus I (Mason Core) but believe they are not prepared for that course. In these two 3-credit courses, students will learn fundamental algebra and calculus so that upon completion of the sequence, students will be prepared for MATH 114 Analytic Geometry and Calculus II.
- Students who do not achieve the necessary test score needed to take a math course may enroll in the Tutorial Program (http://math.gmu.edu/tutorial-registration.php), or they may study and retake the test on their own. A student who does not complete the Tutorial Program (http://math.gmu.edu/tutorial-registration.php) or does not achieve the necessary score on the Math Placement Test (http://math.gmu.edu/placement_test.php) will not be able to enroll in the class. Depending on their test scores, students who do not place into MATH 113 Analytic Geometry and Calculus I (Mason Core) will be advised to take MATH 105 Precalculus Mathematics or MATH 123 Calculus with Algebra/Trigonometry, Part A , or enroll in the Tutorial Program to prepare for MATH 105.
- MATH 104 Trigonometry and Transcendental Functions and MATH 105 Precalculus Mathematics do not fulfill the Mason Core 'Quantitative Reasoning' requirement.
- Students may not receive credit for both MATH 214 Elementary Differential Equations and MATH 216 Theory of Differential Equations; both MATH 213 Analytic Geometry and Calculus III and MATH 215 Analytic Geometry and Calculus III (Honors); both MATH 351 Probability and STAT 344 Probability

and Statistics for Engineers and Scientists I; and
both MATH 352 Statistics and STAT 354 Probability and Statistics for Engineers and Scientists II.

- After receiving a grade of 'C' or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:

Course	May Not Receive Credit for
MATH 113 or MATH 123	MATH 105 or MATH 108
MATH 351 or STAT 344	MATH 110
MATH 441	MATH 111
MATH 125	MATH 112

- Mathematics, PhD

Actuarial Sciences Graduate Certificate

Banner Code: SC-CERG-ACTS

Douglas Eckley

Exploratory Hall, Room 4451
Fairfax Campus

Phone: 703-993-1682
Email: deckley2@gmu.edu
Website: science.gmu.edu/academics/departments-units/mathematical-sciences/actuarial-sciences-graduate-certificate

The Actuarial Sciences Graduate Certificate is designed to serve students and professionals who are interested in pursuing careers as actuaries. The course content provides students with specific training related to the following exams administered by the Society of Actuaries (SOA):

• Financial Mathematics Exam
• Long-Term Actuarial Mathematics Exam
• Short-Term Actuarial Mathematics Exam
• Statistics for Risk Modeling Exam
• Investment and Financial Markets Exam

The courses also provide a solid foundation for the corresponding Casualty Actuary Society (CAS) exams. Passing the first professional exam, i.e. the SOA Probability Exam, is equivalent to meeting the prerequisites for the certificate courses in the area of probability and statistics.

The Actuarial Sciences Graduate Certificate may only be pursued on a part-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Interested applicants must submit three letters of recommendation. GRE scores are not required.

Students intending to pursue the Actuarial Sciences Graduate Certificate must have three semesters of calculus, a course in linear algebra (equivalent to MATH 203 Linear Algebra), a calculus-based course in probability (equivalent to MATH 351 Probability), and statistics (equivalent to MATH 352 Statistics). Passing the first professional exam, i.e. the SOA Probability Exam, is also sufficient preparation for the certificate program.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a part-time basis only.

Core Courses

Code	Title	Credits
MATH 551	Regression and Time Series	3
MATH 553	Advanced Mathematical Statistics in Actuarial Sciences	3
MATH 554	Financial Mathematics	3
MATH 555	Actuarial Modeling I	3
MATH 557	Financial Derivatives	3
MATH 653	Construction and Evaluation of Actuarial Models I	3
Total Credits		18

Preparation for the SOA Exams

The graduate certificate coursework provides preparation for the SOA exams as follows:

MATH 551 Regression and Time Series and MATH 553 Advanced Mathematical Statistics in Actuarial Sciences combined: Statistics for Risk Modeling Exam

MATH 554 Financial Mathematics: Financial Mathematics Exam

MATH 555 Actuarial Modeling I: Long-Term Actuarial Mathematics Exam

MATH 557 Financial Derivatives: Investment and Financial Markets Exam

MATH 653 Construction and Evaluation of Actuarial Models I: Short-Term Actuarial Mathematics Exam

The SOA exams overlap significantly with the Casualty Actuarial Society ("CAS") exams.

Counting Actuarial Courses for Other Mathematics Degrees

A student enrolled in the Actuarial Sciences Graduate Certificate and another graduate degree program in mathematics can count actuarial mathematics courses toward the master's or doctoral degree according to the following rules:

- None of the core actuarial mathematics courses can count toward the Mathematics, PhD (https://catalog.gmu.edu/colleges-schools/science/mathematical-sciences/mathematics-phd/)
- None of the actuarial mathematics courses MATH 551 Regression and Time Series, MATH 554 Financial Mathematics and MATH 655 Pension Valuation can count toward the Mathematics, MS (https://catalog.gmu.edu/colleges-schools/science/mathematical-sciences/mathematics-ms/)
- The two actuarial mathematics courses MATH 555 Actuarial Modeling I and MATH 653 Construction and Evaluation of Actuarial Models I, can count toward the Mathematics, MS (https://catalog.gmu.edu/colleges-schools/science/mathematical-sciences/mathematics-ms/) provided that all other courses counted toward that degree are MATH courses. An exception can be made if the student wishes to count only one of these two courses toward the Mathematics, MS (https://catalog.gmu.edu/colleges-schools/science/mathematical-sciences/mathematics-ms/). In this case, at most one other non-MATH course can be counted toward the degree with approval of the graduate coordinator. An additional exception is made if the student has completed the actuarial sciences certificate before being admitted to the MS degree program: in this case, any 4 of the 6 core courses can count toward the MS degree.

Counting Actuarial Courses toward the Statistical Science, MS Degree

A student enrolled in this certificate and in the Statistical Science, MS (https://catalog.gmu.edu/colleges-schools/engineering/statistics/statistical-science-ms/) can count MATH 555 Actuarial Modeling I as an approved non-STAT elective course and can count MATH 653 Construction and Evaluation of Actuarial Models I as a STAT elective when designing a curriculum for this degree. The full curriculum should be designed in consultation with the student's Statistics Department advisor.

Academic Advising

Website: science.gmu.edu/academics/departments-units/mathematical-sciences/advising-and-student-support

This bachelor's program provides exciting opportunities for students interested in mathematics.

Teacher Licensure

Interested students should attend an information session early in their studies. For more information, visit the Graduate School of Education's website (http://gse.gmu.edu/).

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the Secondary Education - Mathematics (6-12) Undergraduate Certificate offered by the College of Education and Human Development as an option in seeking an initial Virginia teaching license.

Other routes to licensure include the Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Mathematics concentration) or select traditional Master's programs. Please contact the undergraduate advisor in the College of Education and Human Development for more information.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core. As outlined in the Requirements tab, students in this bachelor's program must also complete the additional College Requirements for the BA Degree.

MATH 300 Introduction to Advanced Mathematics meets the writing intensive requirement for this major.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Graduating seniors are required to have an exit interview.

Course Recommendations and Policies

Students intending to enter graduate school in mathematics are strongly advised to take MATH 315 Advanced Calculus I and MATH 321 Abstract Algebra.

Students may not receive credit for both MATH 214 Elementary Differential Equations and MATH 216 Theory of Differential Equations; both MATH 213 Analytic Geometry and Calculus III and MATH 215 Analytic Geometry and Calculus III (Honors); both MATH 351 Probability and STAT 344 Probability and Statistics for Engineers and Scientists I; and both MATH 352 Statistics and STAT 354 Probability and Statistics for Engineers and Scientists II.

After receiving a grade of 'C' or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:

Course	May Not Receive Credit for
MATH 113 or MATH 123	MATH 105 or MATH 108
MATH 351 or STAT 344	MATH 110

MATH 441	MATH 111
MATH 125	MATH 112

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

A maximum of 6 credits of grades below 2.00 in coursework designated MATH or STAT may be applied toward the major.

Required Courses

Code	Title	Credits
Core Courses		
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 125	Discrete Mathematics I (Mason Core)	3
MATH 203	Linear Algebra	3
MATH 213	Analytic Geometry and Calculus III	3
or MATH 215	Analytic Geometry and Calculus III (Honors)	
MATH 214	Elementary Differential Equations	3
or MATH 216	Theory of Differential Equations	
MATH 300	Introduction to Advanced Mathematics [1]	3
MATH 322	Advanced Linear Algebra	3
Total Credits		26

[1] Fulfills the writing intensive requirement.

In addition to completing the core courses above, students must complete 12 additional traditional mathematics credits in MATH courses numbered above 300.

Code	Title	Credits
Select 12 credits in MATH 300-level or higher [1]		12
Total Credits		12

[1] Excluding MATH 400 History of Math (Topic Varies) (Mason Core)

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 82 credits which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, College Requirements for the BA Degree (outlined below), and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

College Requirements for the BA Degree

In addition to the program requirements and the Mason Core requirements, students pursuing a BA degree must complete the coursework below. Except where expressly prohibited, a course used to fulfill this college-level requirement may also be used simultaneously to satisfy other requirements such as Mason Core requirements, other college-level requirements, or requirements for the major. In some cases, the requirements listed below may be superseded by requirements of the degree program and the Mason Core.

Philosophy or Religious Studies

Code	Title	Credits
Select 3 credits from the following:		3
PHIL [1]		
RELI		

[1] PHIL 323 Classical Western Political Theory and PHIL 324 Modern Western Political Theory may not be used to fulfill this requirement.

Social and Behavioral Sciences

Choose one approved Mason Core: Social and Behavioral Sciences course in addition to the Mason Core-required course for a total of 6 credits. The two courses used to fulfill the combined college-level and university requirements must be from different disciplines.

This requirement may be fulfilled by completing any course in ANTH, CRIM, ECON, GOVT, HIST[1], LING, PSYC, or SOCI, and the following GGS courses:

Code	Title	Credits
Select any course from the disciplines above or select from the following GGS courses:		3
GGS 101	Major World Regions (Mason Core)	
GGS 103	Human Geography (Mason Core)	

GGS 110	Introduction to Geoinformation Technologies
GGS 301	Political Geography (Mason Core)
GGS 303	Geography of Resource Conservation (Mason Core)
GGS 304	Population Geography (Mason Core)
GGS 305	Economic Geography
GGS 306	Urban Geography
GGS 315	Geography of the United States
GGS 316	Geography of Latin America
GGS 320	Geography of Europe
GGS 325	Geography of North Africa and the Middle East
GGS 330	Geography of the Soviet Succession States
GGS 357	Urban Planning
GGS 380	Geography of Virginia
Total Credits	3

[1] HIST 100 History of Western Civilization (Mason Core) and HIST 125 Introduction to World History (Mason Core)may not be used to fulfill this requirement.

Natural Science

Choose one credit in addition to the Mason Core: Natural Science requirement for a total of 8 credits[1]. This combined college-level and university requirement must be fulfilled by completing two of any approved Mason Core: Natural Science courses that include a laboratory experience[2].

Code	Title	Credits
Select an additional Mason Core Natural Science course		1

[1] For Geography, BA majors, this extra credit is not required.

[2] BIOL 124 Human Anatomy and Physiology and BIOL 125 Human Anatomy and Physiology may not be used to fulfill this requirement.

Foreign Language

Intermediate-level proficiency in one foreign language is required. This requirement may be fulfilled by completing a course in a foreign language numbered 202 (https://catalog.gmu.edu/colleges-schools/humanities-social-sciences/modern-classical-languages/) (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. A three course sequence in American Sign Language (EDSE 115 (https://catalog.gmu.edu/search/?P=EDSE%20115) American Sign Language (ASL) I, EDSE 116 (https://catalog.gmu.edu/search/?P=EDSE%20116) American Sign Language (ASL) II, and EDSE 219 (https://catalog.gmu.edu/search/?P=EDSE%20219) American Sign Language (ASL) III) will also meet the foreign language requirement. Students who are already proficient in a second language may be eligible for a waiver of this requirement. Additional information on waivers can be found at the Office of Academic and Student Affairs (http://cosundergrad.gmu.edu/).

Non-Western Culture

Choose one approved Non-Western Culture Requirement[1] course in addition to the course used to fulfill the Mason Core: Global Understanding requirement. A course used to fulfill the Mason Core: Global Understanding requirement may not be simultaneously used to satisfy this college-level requirement. However, a course used to fulfill this requirement may be used simultaneously to fulfill any *other* requirements (Mason Core requirements, college-level requirements, or requirements for the major).

Code	Title	Credits
Select 3 credits from approved Non-Western Culture courses if a waiver isn't applicable:		0-3
ANTH 114	Introduction to Cultural Anthropology (Mason Core)	3
ANTH 300	Civilizations	3
ANTH 302	Peoples and Cultures of Latin America (Mason Core)	3
ANTH 307	Ancient Mesoamerica (Mason Core)	3
ANTH 308	Peoples and Cultures of the Middle East (Mason Core)	3
ANTH 309	Peoples and Cultures of India (Mason Core)	3
ANTH 313	Myth, Magic, and Mind (Mason Core)	3
ANTH 314	Zombies	3
ANTH 330	Peoples and Cultures of Selected Regions: Non-Western	3
ANTH 332	Cross-Cultural Perspectives on Globalization (Mason Core)	3
ANTH 381	Medical Anthropology	3
ANTH 396	Issues in Anthropology: Social Sciences (Mason Core)	3
ARAB 360	Topics in Arabic Cultural Production	3
ARAB 420	Survey of Arabic Literature	3
ARAB 440	Topics in Arabic Religious Thought and Texts (Mason Core)	3
ARTH 203	Survey of Asian Art (Mason Core)	3
ARTH 204	Survey of Latin American Art (Mason Core)	3
ARTH 206	Survey of African Art (Mason Core)	3
ARTH 318	Art and Archaeology of Ancient Egypt	3
ARTH 319	Art and Archaeology of the Ancient Near East (Mason Core)	3
ARTH 320	Art of the Islamic World (Mason Core)	3
ARTH 382	Arts of India (Mason Core)	3
ARTH 383	Arts of Southeast Asia (Mason Core)	3
ARTH 384	Arts of China (Mason Core)	3
ARTH 385	Arts of Japan (Mason Core)	3
ARTH 386	The Silk Road (Mason Core)	3
ARTH 482	RS: Advanced Studies in Asian Art	3
CHIN 318	Introduction to Classical Chinese (Mason Core)	3
CHIN 320	Contemporary Chinese Film	3
CHIN 325	Major Chinese Writers (Mason Core)	3
CHIN 470	Special Topics in Chinese Studies	3

[1] Students who can document attendance at a native school in a non-western country for at least four years may request a waiver from this requirement through the CHSS Undergraduate Academic Affairs Office (http://chssundergrad.gmu.edu/).

Honors

Honors in the Major

Eligibility

Mathematics majors who have maintained a GPA of at least 3.50 in mathematics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the departmental honors program upon completion of two MATH courses at the 300+ level (excluding MATH 400 History of Math (Topic Varies) (Mason Core)), at least one of which has MATH 300 Introduction to Advanced Mathematics as a prerequisite. Admission to the program will be monitored by the undergraduate committee.

Honors Requirements

To graduate with honors in mathematics, a student is required to maintain a minimum GPA of 3.50 in mathematics courses and successfully complete MATH 405 Honors Thesis in Mathematics

I and MATH 406 RS: Honors Thesis in Mathematics II with an average GPA of at least 3.50 in these two courses.

Accelerated Master's

Mathematics, BA or BS/Mathematics, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Mathematics, BA and Mathematics, BS and the Mathematics, MS degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

Code	Title	Credits
MATH 315	Advanced Calculus I	3
MATH 321	Abstract Algebra	3
MATH 322	Advanced Linear Algebra	3

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
MATH 621	Algebra I	3
MATH 631	Topology I: Topology of Metric Spaces	3
MATH 675	Linear Analysis	3
MATH 677	Ordinary Differential Equations	3
MATH 685	Numerical Analysis	3

Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd, (Secondary Education Mathematics Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA or BS in Mathematics and an MEd in Curriculum and Instruction (Secondary Education Mathematics concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/)in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered jointly by the Department of Mathematical Sciences and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/

Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 572	Teaching Mathematics in the Secondary School	3
SEED 672	Advanced Methods of Teaching Mathematics in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Mathematics, BS

Banner Code: SC-BS-MATH

Academic Advising

Website: science.gmu.edu/academics/departments-units/mathematical-sciences/advising-and-student-support

This program provides exciting opportunities for students interested in mathematics. Students are encouraged to select an optional concentration in Actuarial Mathematics (ACTM), Applied Mathematics (AMT), or Mathematical Statistics (MTHS). Students who do not select a concentration study traditional mathematics.

Teacher Licensure

Interested students should attend an information session early in their studies. For more information, visit the Graduate School of Education's website (http://gse.gmu.edu/).

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the Secondary Education - Mathematics (6-12) Undergraduate Certificate offered by the College of Education and Human Development as an option in seeking an initial Virginia teaching license.

Other routes to licensure include the Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Mathematics concentration) or select traditional Master's programs. Please contact the undergraduate advisor in the College of Education and Human Development for more information.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

MATH 300 Introduction to Advanced Mathematics meets the writing intensive requirement for this major.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Graduating seniors are required to have an exit interview.

Language Proficiency Recommendation

The department recommends proficiency in French, German, or Russian.

Course Recommendations and Policies

A maximum of 6 credits of grades below 2.00 in coursework designated MATH or STAT may be applied toward the major.

Students intending to enter graduate school in mathematics are strongly advised to take MATH 315 Advanced Calculus I and MATH 321 Abstract Algebra.

Students may not receive credit for both MATH 214 Elementary Differential Equations and MATH 216 Theory of Differential Equations; both MATH 213 Analytic Geometry and Calculus III and MATH 215 Analytic Geometry and Calculus III (Honors); both MATH 351 Probability and STAT 344 Probability and Statistics for Engineers and Scientists I; and both MATH 352 Statistics and STAT 354 Probability and Statistics for Engineers and Scientists II.

After receiving a grade of 'C' or better in one of the courses listed below on the left, students may not receive credit for the corresponding course on the right:

Course	May Not Receive Credit for
MATH 113 or MATH 123	MATH 105 or MATH 108
MATH 351 or STAT 344	MATH 110
MATH 441	MATH 111
MATH 125	MATH 112

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

In addition to the mathematics core, science, and computational skills requirements, students may select an optional concentration in Actuarial Mathematics (ACTM), Applied Mathematics (AMT) or Mathematical Statistics (MTHS).

Mathematics Core

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 125	Discrete Mathematics I (Mason Core)	3
MATH 203	Linear Algebra	3
MATH 213	Analytic Geometry and Calculus III	3
or MATH 215	Analytic Geometry and Calculus III (Honors)	
MATH 214	Elementary Differential Equations	3
or MATH 216	Theory of Differential Equations	
MATH 300	Introduction to Advanced Mathematics [1]	3
MATH 322	Advanced Linear Algebra	3
Total Credits		26

[1] Fulfills the writing intensive requirement.

Science

Code	Title	Credits
Select a one-year sequence of a laboratory science from the following courses:		8-9
Biology Sequence:		
BIOL 213	Cell Structure and Function (Mason Core)	
Choose one from the following:		
BIOL 300	BioDiversity	
BIOL 308	Foundations of Ecology and Evolution	
BIOL 311	General Genetics	
Chemistry Sequence:		
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	
Geology Sequence:		
GEOL 101	Introductory Geology I (Mason Core)	
GEOL 102	Historical Geology (Mason Core)	
Physics Sequence:		
PHYS 160 & PHYS 161	University Physics I (Mason Core) and University Physics I Laboratory (Mason Core)	
PHYS 260 & PHYS 261	University Physics II (Mason Core) and University Physics II Laboratory (Mason Core)	
Total Credits		8-9

Computational Skills

Code	Title	Credits
CS 112	Introduction to Computer Programming	4
Total Credits		4

BS without Concentration

In addition to the mathematics core, science, and computational skills requirements listed above, students who are not choosing a concentration must complete the following coursework:

Code	Title	Credits
Traditional Mathematics		
MATH 315	Advanced Calculus I	3
MATH 316	Advanced Calculus II	3
MATH 321	Abstract Algebra	3
or MATH 431	Topology	
Select 12 additional credits of MATH courses numbered above 300 [1]		12
Additional Science		
Select additional science credits from one of the following three options:		4-9
A second sequence from the choices under "Science" above		
6 credits from more advanced courses in biology, chemistry, geology, or physics [2]		
The 4-credit option of PHYS 262 and PHYS 263		
Total Credits		25-30

[1] Excluding MATH 400 History of Math (Topic Varies) (Mason Core).

[2] Only refers to courses acceptable for credit toward a natural science major. Suggested courses include: CHEM 313 Organic Chemistry I through CHEM 332 Physical Chemistry II; CHEM 463 General Biochemistry I; GEOL 302 Mineralogy through GEOL 364 Marine Geology; and PHYS 266 Introduction to Thermodynamics.

Concentration in Actuarial Mathematics (ACTM)

This concentration provides exciting opportunities for students interested in studying actuarial mathematics. Expertise in this field leads directly into a career as a practicing actuary with an insurance company, consulting firm, or in government employment.

Code	Title	Credits
ACTM Courses		
MATH 351	Probability	3
MATH 352	Statistics	3
MATH 551	Regression and Time Series	3
MATH 554	Financial Mathematics	3
MATH 555	Actuarial Modeling I	3
MATH 557	Financial Derivatives	3
ACCT 203	Survey of Accounting	3
ECON 103	Contemporary Microeconomic Principles (Mason Core)	3
ECON 306	Intermediate Microeconomics [1]	3
or ECON 310	Money and Banking	
or FNAN 321	Financial Institutions	
STAT 362	Introduction to Computer Statistical Packages	3
Select two from the following:		6
MATH 441	Deterministic Operations Research	
MATH 442	Stochastic Operations Research	
MATH 446	Numerical Analysis I	
MATH 453	Advanced Mathematical Statistics	
Total Credits		36

1 For mathematics majors, the Department of Economics has agreed to waive the ECON 104 Contemporary Macroeconomic Principles (Mason Core) prerequisite.

Concentration in Applied Mathematics (AMT)

This concentration provides exciting opportunities for students interested in taking additional classes on applied mathematics. The concentration prepares numerical analysts able to deal with real world applications in science and engineering.

Code	Title	Credits
AMT Courses		
MATH 315	Advanced Calculus I	3
MATH 351	Probability	3
MATH 413	Modern Applied Mathematics I	3
MATH 414	Modern Applied Mathematics II	3
MATH 446	Numerical Analysis I	3
Select 6 credits of MATH courses numbered above 300 [1]		6
Additional Science Courses		
Select additional science credits from one of the following three options:		4-9
A second sequence from the choices under "Science" above		
6 credits from more advanced courses in biology, chemistry, geology, or physics [2]		
The 4-credit option of PHYS 262 and PHYS 263		
Total Credits		25-30

1 Excluding MATH 400 History of Math (Topic Varies) (Mason Core).

2 Only refers to courses acceptable for credit toward a natural science major). Suggested courses include: CHEM 313 Organic Chemistry I through CHEM 332 Physical Chemistry II; CHEM 463 General Biochemistry I; GEOL 302 Mineralogy through GEOL 364 Marine Geology; and PHYS 266 Introduction to Thermodynamics.

Concentration in Mathematical Statistics (MTHS)

This concentration provides exciting opportunities for students interested in taking additional classes on statistics and data analysis. The concentration prepares data analysts able to deal with real world applications in science and engineering.

Code	Title	Credits
MTHS Courses		
MATH 315	Advanced Calculus I	3
MATH 351	Probability	3
MATH 352	Statistics	3
MATH 453	Advanced Mathematical Statistics	3
MATH 551	Regression and Time Series	3
STAT 362	Introduction to Computer Statistical Packages	3
Select one from:		3
STAT 260	Introduction to Statistical Practice I	
STAT 350	Introductory Statistics II	
STAT 360	Introduction to Statistical Practice II	
Select two from the following:		6
STAT 455	Experimental Design	
STAT 460	Introduction to Biostatistics	
STAT 462	Applied Multivariate Statistics	
STAT 463	Introduction to Exploratory Data Analysis	
STAT 465	Nonparametric Statistics and Categorical Data Analysis	
STAT 472	Introduction to Statistical Learning	
STAT 474	Introduction to Survey Sampling	
Additional Science Courses		
Select additional science credits from one of the following options:		3-4
Choose 3 credits from more advanced courses in biology, chemistry, geology, or physics [1]		
Choose the 4 credit option of PHYS 262 and PHYS 263		
Total Credits		30-31

1 Only refers to courses acceptable for credit toward a natural science major. Suggested courses include: CHEM 313 Organic Chemistry I through CHEM 332 Physical Chemistry II; GEOL 302 Mineralogy through GEOL 364 Marine Geology; and PHYS 266 Introduction to Thermodynamics.

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 51-57 credits
- ACTM concentration: 45-46 credits
- AMT concentration: 51-57 credits
- MTHS concentration: 50-52 credits

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Honors

Honors in the Major

Eligibility

Mathematics majors who have maintained a GPA of at least 3.50 in mathematics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the departmental honors program upon completion of two MATH courses at the 300+ level (excluding MATH 400 History of Math (Topic Varies) (Mason Core)), at least one of which has MATH 300 Introduction to Advanced Mathematics as a prerequisite. Admission to the program will be monitored by the undergraduate committee.

Honors Requirements

To graduate with honors in mathematics, a student is required to maintain a minimum GPA of 3.50 in mathematics courses and successfully complete MATH 405 Honors Thesis in Mathematics I and MATH 406 RS: Honors Thesis in Mathematics II with an average GPA of at least 3.50 in these two courses.

Accelerated Master's

Mathematics, BA or BS/Curriculum and Instruction, Accelerated MEd, (Secondary Education Mathematics Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BA or BS in Mathematics and an MEd in Curriculum and Instruction (Secondary Education Mathematics concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/)in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered jointly by the Department of Mathematical Sciences and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://

catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 572	Teaching Mathematics in the Secondary School	3
SEED 672	Advanced Methods of Teaching Mathematics in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Mathematics, BA or BS/Mathematics, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Mathematics, BA and Mathematics, BS and the Mathematics, MS degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

Code	Title	Credits
MATH 315	Advanced Calculus I	3
MATH 321	Abstract Algebra	3
MATH 322	Advanced Linear Algebra	3

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
MATH 621	Algebra I	3
MATH 631	Topology I: Topology of Metric Spaces	3
MATH 675	Linear Analysis	3
MATH 677	Ordinary Differential Equations	3
MATH 685	Numerical Analysis	3

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain an undergraduate BS degree and the Statistical Science, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program **if such an accelerated** Statistical Science, MS **pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs.**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Statistical Science, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00.
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 213	Analytic Geometry and Calculus III	3
MATH 203	Linear Algebra	3
or MATH 321	Abstract Algebra	
STAT 250	Introductory Statistics I (Mason Core)	3
or STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	3
or MATH 351	Probability	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits satisfying degree requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 560	Biostatistical Methods	3
STAT 574	Survey Sampling I	3
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Mathematics, MS

Banner Code: SC-MS-MATH

Academic Advising

Email: gradmath@gmu.edu
Website: science.gmu.edu/academics/departments-units/mathematical-sciences/mathematics-ms

This program provides exciting opportunities for students interested in studying advanced mathematics.

Assistantships

A limited number of merit-based teaching assistantships are available for students taking at least 6 graduate credits each semester. Other sources of support, such as research assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center (http://math.gmu.edu/tutor-center.php).

Admissions & Policies

Admissions

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants interested in this program must submit three letters of recommendation. GRE scores are not required.

Students must have taken an upper-division course in advanced calculus (equivalent to MATH 315 Advanced Calculus I), an abstract algebra course (equivalent to MATH 321 Abstract Algebra) and an upper-division

course in linear algebra (equivalent to MATH 322 Advanced Linear Algebra). Students should have some computer knowledge.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

MATH 500 through MATH 614 cannot be used for credit, with the exception of MATH 555 Actuarial Modeling I and MATH 556 Actuarial Modeling II.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Coursework

Code	Title	Credits
Required Courses		
MATH 675	Linear Analysis	3
Coursework Options		
Select three from the following:		9
MATH 621	Algebra I	
MATH 631	Topology I: Topology of Metric Spaces	
MATH 677	Ordinary Differential Equations	
MATH 685	Numerical Analysis	
Additional Approved Coursework		
Select four approved graduate courses, at least two of which are MATH courses. [1]		12
Total Credits		24

[1] All four courses must be approved by the student's advisor. Courses not listed as MATH courses must be approved by the graduate committee.
Different rules apply if the student wishes to count graduate actuarial courses toward his or her degree (consult the graduate coordinator).

Research and Creative Component

A student may fulfill the research and creative component in one of three ways: Thesis Option, Paper Presentation Option, or Preliminary Exams for the PhD.

Code	Title	Credits
Select one of the Research and Creative Component options outlined below		6
Total Credits		6

Thesis Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the Department of Mathematical Sciences, one member may be from a related field.

The student completes a thesis under the direction of the committee chair. The thesis work is typically completed while students are registered for 6 credits of MATH 799 MS Thesis. A thesis proposal and thesis are submitted in accordance with AP.6 Graduate Policies. The student must give an oral defense of the thesis to the committee and the George Mason University community at large. Students are expected to respond to questions on the thesis and related material. The committee determines whether the defense is satisfactory.

Code	Title	Credits
Thesis Option		6
MATH 799	MS Thesis	
Total Credits		6

Paper Presentation Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members. The chair and at least one other member must be from the Department of Mathematical Sciences, one member may be from a related field. The student gives an oral presentation of a paper (or series of papers or book chapter) chosen in consultation with the chair of the committee and approved by the full committee. The chosen material must be distinct from work completed in fulfillment of course requirements. The oral presentation is given to the committee and the Mason community at large. Students are expected to respond to questions on the paper and related material. The committee determines whether the defense is satisfactory.

Code	Title	Credits
Select 6 additional credits of electives		6
Total Credits		6

Preliminary Exams for the PhD

The research and creative component can also be fulfilled by passing three preliminary written examinations, as required for the Mathematics, PhD degree.

Dual Degree Options

Mathematics and Statistical Science Dual-Degree MS

This program allows students to earn an MS in Mathematics and an MS in Statistical Science by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for both the MS in Mathematics and the MS in Statistical Science programs. A joint faculty committee from the Department of Mathematical Sciences and the Department of Statistics make final admission decisions into the dual-degree program.

MS-MATH/STAT Dual-Degree Requirements

Total credits: 48

Code	Title	Credits
MATH 621	Algebra I	3
MATH 675	Linear Analysis	3
MATH 677	Ordinary Differential Equations	3
or MATH 678	Partial Differential Equations	
MATH 685	Numerical Analysis	3

STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 634	Case Studies in Data Analysis	3
STAT 652	Statistical Inference	3
STAT 654	Applied Statistics II	3
Total Credits		27

Electives

Code	Title	Credits
Select 12 elective credits in MATH courses numbered 615 or higher [1]		12
Select any STAT courses numbered 540-775		9
Total Credits		21

[1] Excluding MATH 653 Construction and Evaluation of Actuarial Models I, MATH 654 Construction and Evaluation of Actuarial Models II, MATH 655 Pension Valuation, and MATH 799 MS Thesis

Notes:

- Students in either the BS/Accelerated MS in Mathematics program or the BS(selected)/Accelerated MS in Statistical Science program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the MS in Mathematics or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Accelerated Master's

Mathematics, BA or BS/Mathematics, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Mathematics, BA and Mathematics, BS and the Mathematics, MS degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Successful applicants will have an overall undergraduate GPA of at least 3.00. Additionally, they will have completed the following courses with a GPA of 3.00 or higher:

Code	Title	Credits
MATH 315	Advanced Calculus I	3
MATH 321	Abstract Algebra	3
MATH 322	Advanced Linear Algebra	3

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
MATH 621	Algebra I	3
MATH 631	Topology I: Topology of Metric Spaces	3
MATH 675	Linear Analysis	3
MATH 677	Ordinary Differential Equations	3
MATH 685	Numerical Analysis	3

Mathematics, PhD

Banner Code: SC-PHD-MATH

Email: gradmath@gmu.edu
Website: science.gmu.edu/academics/departments-units/mathematical-sciences/mathematics-phd

The doctoral program provides exciting opportunities for students interested in studying advanced mathematics and conducting independent research.

This program begins with graduate coursework and advanced seminars and culminates in a dissertation consisting of original research in mathematics. The PhD is designed to train students as research mathematicians for careers in academia, government, and private industry.

Fellowships and Assistantships

The Department of Mathematical Sciences offers a limited number of merit-based teaching assistantships. Other sources of support, such as research fellowships and assistantships, are available as funding permits. Graduate students also have the opportunity to work in the Math Tutoring Center (http://math.gmu.edu/tutor-center.php).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

It is expected that all applicants have a recent bachelor's degree in mathematics or an equivalent amount of undergraduate mathematics preparation, with a GPA of at least 3.00 in their last 60 credits of study. Students without this background who have had an upper-division course in linear algebra (equivalent to MATH 322 Advanced Linear Algebra), an upper-division course in advanced calculus (equivalent to MATH 315 Advanced Calculus I), and an upper-division course in group theory (equivalent to MATH 321 Abstract Algebra) are encouraged to apply to the Mathematics, MS. Such students may subsequently apply to the PhD when all background issues have been addressed. It is recommended that all applicants have some familiarity with mathematical software.

Application Requirements

To apply, prospective students should provide the completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), two copies of official transcripts from each college and graduate institution attended, three letters of recommendation, and a goals statement. GRE scores are recommended but not required.

TOEFL scores are required for all international applicants; find additional information in the Admission of International Students section of this catalog.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See AP.6.5.2 Reduction of Credits for more information.

Transfer of Credit

Graduate mathematics courses taken elsewhere without being applied to degree conferral may be counted toward the degree as transfer credit. See AP 6.5.3 Transfer of Credit for additional information.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Students must earn a grade of 'B' or better in each core course that counts toward the core requirement.

Code	Title	Credits
MATH 675	Linear Analysis	3
Select any three of the following:		9
MATH 621	Algebra I	
MATH 631	Topology I: Topology of Metric Spaces	
MATH 677	Ordinary Differential Equations	
MATH 685	Numerical Analysis	
Total Credits		12

Preliminary Written Exam

Students are required to pass three preliminary written exams and complete four core courses by the end of their second year. Preliminary exams are offered twice a year and students may take each exam up to three times.

Dissertation Advisor and Examination Committee

After passing the preliminary written exams, the student chooses a dissertation advisor and a three person examination committee. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics).

Seminar

Code	Title	Credits
Students must register for a 1 credit seminar each semester until they advance to candidacy or have acquired at least 6 credits [1]		6
MATH 795	Graduate Seminar	
Total Credits		9

[1] A student entering without a master's degree in mathematics should expect to take a total of 6 to 9 credits of MATH 795 Graduate Seminar.

Electives

Code	Title	Credits
Students complete 27-42 credits of approved MATH electives [1]		27-42
Total Credits		27-42

[1] Courses not designated as MATH courses must be approved by the graduate committee.
Classes at the 500 level, MATH 600 Special Topics in Mathematics - MATH 614 Rational Numbers and Proportional Reasoning for K-8 Teachers, and actuarial classes MATH 653 Construction and Evaluation of Actuarial Models I, MATH 654 Construction and Evaluation of Actuarial Models II and MATH 655 Pension Valuation cannot be used for credit.

Qualifying Examinations

Students are required to take a qualifying exam after passing the preliminary written exams. The qualifying exam may have oral and written components. In consultation with the advisor and committee, the student chooses a major and a minor area of study (the major and minor areas are presumed to be in two different branches of mathematics). The qualifying exam typically covers the equivalent of approximately four courses of material from the major area and three courses from the minor area.

Dissertation Proposal and Advancement to Candidacy

After passing the qualifying exam, each doctoral student prepares a written dissertation proposal while taking MATH 998 Doctoral Dissertation Proposal. The proposal must be approved by the dissertation committee, which consists of the three qualifying exam committee members, plus a fourth member from outside the Department of Mathematical Sciences. After successfully completing this requirement, the student advances to doctoral candidacy.

Dissertation Research

Code	Title	Credits
Select 12-24 credits from the following:		12-24
MATH 998	Doctoral Dissertation Proposal	
MATH 999	Doctoral Dissertation	
Total Credits		12-24

Doctoral Dissertation

After advancing to candidacy, the student will work on a doctoral dissertation while enrolled in MATH 999 Doctoral Dissertation. The dissertation is a written piece of original mathematics that demonstrates a doctoral candidate's mastery of the subject matter. A student is expected to produce new and original research worthy of publication in a peer-reviewed journal. After the dissertation is completed, the committee will review the dissertation and examine the student in a public oral thesis defense.

Department of Physics and Astronomy

Phone: 703-993-1280

Website: physics.gmu.edu

Administration

- Paul So, Chair
- Jie Zhang, Associate Chair for Research
- John Cressman, Associate Chair for Laboratory Instruction
- Ernest Barreto, Graduate Advisor (Physics)
- Chi Yang, Graduate Advisor (Engineering Physics)
- Joseph Weingartner, Undergraduate Advisor (Physics, Astronomy & Astrophysics)
- Fernando Camelli, Undergraduate Advisor (Computational & Engineering Physics)
- Erhai Zhao, Undergraduate Advisor (Physics)
- Phil Rubin, Undergraduate Advisor (Incoming, First-years, and Transfers)

The Department of Physics and Astronomy is dedicated to the dissemination and advancement of physics and astronomy through instruction, research, and outreach.

The department provides rigorous training for physics and astronomy students and prepares them to be successful, confident, and versatile in their ability to apply physics and astronomy principles within any chosen field. The department also aims to deliver and instill a broad-based understanding of general physics and astronomy principles and practices to the wider university community through our Mason Core (general education) courses. Our student-centric curriculum and instruction use a mixture of traditional and current pedagogical techniques informed by on-going educational research. It is our goal to help students to develop versatility and creativity through repeated analytical practices and problem-solving training in their coursework and faculty-led research projects.

Research in the department focuses on pushing the frontiers of physics and astronomy in a broad range of topics using theoretical, experimental, observational, and computational approaches. The department maintains many active collaborations with scientists across different disciplines within the university community and with other national and international institutions. The department believes strongly in incorporating both graduate as well as undergraduate students in our research programs. It is our goal to see students arriving with an enthusiasm and curiosity for physics and astronomy and leaving as true scientists ready to conduct their own scientific investigations.

Undergraduate Programs

The department offers the Physics, BS and the Astronomy, BS. Also available are the Physics Minor, the Astronomy Minor, and the Renewable Energy Interdisciplinary Minor.

Undergraduate Research Opportunities

The department offers many opportunities for undergraduate students to become involved with research. Students should consult with faculty working on research topics of interest to them, based on their exploration of the department's website (http://physics.gmu.edu/).

Bachelor's/Accelerated Master's Degree

Information regarding this program can be found in the Physics, BS/Accelerated Masters section of this catalog.

Graduate Programs

This department offers the Applied and Engineering Physics, MS. The department also supports the Energy and Sustainability concentration in the Interdisciplinary Studies, MAIS. Additionally, the department offers a Physics, PhD. These graduate programs are strongly supported by the extensive research activities of the faculty, including many collaborations with scientists and engineers at regional government laboratories.

Faculty

Department Faculty

Professors

Barreto, Becker, Kan, Lohner, Mishin, Rubin, Satija, Satyapal, Sauer, So, Summers, Trefil, Yang, Zhang

Associate Professors

Camelli, Cressman, Djordjevic, Dreyfus, Gliozzi, Marzougui, Nikolic, Oerter, Plavchan, Rosenberg, Sheng, Tian, Vora, Weigel, Weingartner, Wyczalkowski, Yigit, Zhao

Assistant Professors

Belle, Ericson, Ghahari, Ghirmire, Parks

Emeriti

Ceperley, Dworzecka, Ehrlich, Ellsworth, Lieb

Research Faculty

Attie, Balmacdea, Bilitza, Braga, Deneva, Dhadly, Duxbury, Fischer, Johnson, Mariska, Mazin, Meier, Mut, Odstrcil, Prescott, Poland, Purja Pun

Requirements & Policies

Requirements

Writing Intensive Requirement

George Mason requires all undergraduate students to complete at least one course designated as "writing intensive" in their majors at the 300-level or above. Students majoring in physics fulfill this requirement by successfully completing PHYS 407 Senior Laboratory in Modern Physics (Mason Core), PHYS 410 Computational Physics Capstone (Mason Core), or ASTR 402 RS: Methods of Observational Astronomy (Mason Core) depending upon their concentration (see program requirements (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/)). Astronomy majors fulfill the requirement by completing ASTR 402 RS: Methods of Observational Astronomy (Mason Core).

Teacher Licensure

Students who wish to become teachers should consult the College of Education and Human Development section of this catalog and attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education's website (https://gse.gmu.edu/).

Physics for Non-majors

Recommended for biology, geology, and premedical students, and mathematics students who seek a BA degree:

Code	Title	Credits
PHYS 243	College Physics I (Mason Core)	3
PHYS 244	College Physics I Lab (Mason Core)	1
PHYS 245	College Physics II (Mason Core)	3
PHYS 246	College Physics II Lab (Mason Core)	1

Recommended for non-science majors:

Code	Title	Credits
PHYS 106	The Quantum World: A Continuous Revolution in What We Know and How We Live (Mason Core)	3
PHYS 111	Introduction to the Fundamentals of Atmospheric Science (Mason Core)	3
PHYS 112	Introduction to the Fundamentals of Atmospheric Science Lab (Mason Core)	1
PHYS 103	Physics and Everyday Phenomena I (Mason Core)	4
PHYS 104	Physics and Everyday Phenomena II (Mason Core)	4

The following courses constitute a calculus-based sequence in general physics to be taken by physics and engineering majors, chemistry, computer science, and mathematics students who are pursuing a BS degree:

Code	Title	Credits
PHYS 160 & PHYS 161 & PHYS 260 & PHYS 261	University Physics I (Mason Core) and University Physics I Laboratory (Mason Core) and University Physics II (Mason Core) and University Physics II Laboratory (Mason Core)	
or		
PHYS 325 & PHYS 262 & PHYS 263	Intermediate Methods of Experimental Physics and University Physics III (Mason Core) and University Physics III Laboratory (Mason Core)	

Students may receive credit for only one of the following three sequences:

Code	Title	Credits
PHYS 103 & PHYS 104	Physics and Everyday Phenomena I (Mason Core) and Physics and Everyday Phenomena II (Mason Core)	8
PHYS 243 & PHYS 244 & PHYS 245 & PHYS 246	College Physics I (Mason Core) and College Physics I Lab (Mason Core) and College Physics II (Mason Core) and College Physics II Lab (Mason Core)	8
PHYS 160 & PHYS 161 & PHYS 260 & PHYS 262 & PHYS 263	University Physics I (Mason Core) and University Physics I Laboratory (Mason Core) and University Physics II (Mason Core) and University Physics III (Mason Core) and University Physics III Laboratory (Mason Core)	11

Email: gadvphys@gmu.edu
Website: physics.gmu.edu

This degree contains elements of traditional physics programs and the application of physics to a diversity of critical societal problems. The program is divided into concentrations; see the Requirements tab for details.

Many courses are offered during late afternoon or evening hours to allow students with full-time employment to easily attend. Students employed at area high-technology organizations may take up to 6 credits (out of 30) for work done on the job under the guidance of a faculty member. This employment-related research may be conducted under an optional 3-credit research project or an optional 6-credit master's thesis. Master's students who are not employed full time may apply for financial aid or a limited number of research assistantships.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Individuals holding a baccalaureate degree in physics or a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent and who have earned a GPA of 3.00 (out of 4.00) in their last 60 credits are invited to apply for admission. Applicants may be required to make up one or two course deficiencies, based on a graduate physics advisor's assessment, and be provisionally admitted into the program. Three letters of recommendation must be submitted, preferably from former professors. The general GRE and the GRE subject test in physics are recommended for applicants who received their baccalaureate degrees within the past five years.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students should complete the core courses and select one concentration, completing all of the requirements therein.

Plan of Study

Before the beginning of their first semester, students are advised to meet with their academic advisor and develop a preliminary plan of study for the concentration they are interested in pursuing. A final plan of study must be approved by the graduate coordinator at the start of the semester in which the student graduates.

Core Courses

Students should choose their core courses in consultation with an advisor.

Choose one course from each grouping:

Code	Title	Credits
Group One: Computational Physics/Astrophysics		**3**
ASTR 601	Computer Simulation in Astronomy	
PHYS 510	Computational Physics I	
PHYS 534	Introduction to Quantum Computation and Quantum Information	
Group Two: Mechanics		**3**
PHYS 502	Introduction to Quantum Mechanics and Atomic Physics	

PHYS 620	Continuum Mechanics	
PHYS 684	Quantum Mechanics I	
Group Three: Electricity and Magnetism		**3**
PHYS 513	Applied Electromagnetic Theory	
PHYS 685	Classical Electrodynamics I	
Group Four: Statistical and Thermal Mechanics		**3**
PHYS 690	Engineering Thermodynamics	
PHYS 711	Statistical Mechanics	
Group Five: Methods in Physics		**3**
PHYS 591	Systems for Quantum Scientists	
PHYS 613	Computational Physics II	
PHYS 683	Mathematical Methods in Physics	
Total Credits		15

Standard Physics Concentration (STDP)

This concentration is intended for students who may wish to pursue further graduate study in physics or astrophysics or pursue graduate study following the Standard Physics concentration of the Physics PhD.

Code	Title	Credits
Core Course		**3**
PHYS 705	Classical Mechanics	
Concentration Electives		**3**
In consultation with an advisor, select 3 credits of graduate-level courses from the following course prefixes: [1]		
ASTR		
PHYS		
General Electives		**9**
In consultation with an advisor, select 9 credits of graduate-level science courses. [2]		
Total Credits		15

1
- Courses must be approved by an advisor.
- Courses cannot be directed reading, research, or thesis credits.

2
- Courses must be approved by an advisor.
- Students may take PHYS 796 Directed Reading and Research and up to 6 credits of PHYS 798 Research Project as general electives. PHYS 798 Research Project is conducted under the supervision of a faculty research advisor and may be based on work done as an intern. Up to 6 credits of PHYS 799 Master's Thesis may be taken as general electives by students pursuing the thesis option and may also be based on work completed as an intern.

Engineering Physics Concentration (ENGP)

This concentration is intended for students who may wish to pursue employment in an engineering-related field or pursue graduate study following the Engineering Physics concentration of the Physics PhD.

Code	Title	Credits
Core Course		**3**
PHYS 640	Finite Element Analysis of Solids and Fluids	
Concentration Electives		**3**
In consultation with an advisor, select 3 credits of graduate-level courses from the following course prefixes: [1]		
PHYS		
MATH		
BENG		
CEIE		
ECE		
ME		
General Electives		**9**
In consultation with an advisor, select 9 credits of graduate-level science and engineering courses. [2]		
Total Credits		15

1
- Courses must be approved by an advisor.
- These must be regular courses and not directed reading, research, or thesis credits.

2
- Courses must be approved by an advisor.
- Students may take PHYS 796 Directed Reading and Research and up to 6 credits of PHYS 798 Research Project as general electives. PHYS 798 Research Project is conducted under the supervision of a faculty research advisor and may be based on work done as an intern. Up to 6 credits of PHYS 799 Master's Thesis may be taken as general electives by students pursuing the thesis option and may also be based on work done as an intern.

Applied Physics Concentration (APLP)

This concentration is intended for students who wish to pursue employment in an applied physics or engineering-related field.

Code	Title	Credits
Core Course		**3**
PHYS 533	Modern Instrumentation	
Concentration Electives		**3**
In consultation with an advisor, select 3 credits of graduate-level courses from the following course prefixes: [1]		
PHYS		
BINF		
CHEM		
CLIM		
MATH		
CSI		
STAT		
General Electives		**9**
In consultation with an advisor, select 9 credits of graduate-level science and engineering courses. [2]		
Total Credits		15

1
- Courses must be approved by an advisor.
- These must be regular courses and not directed reading, research, or thesis credits.

2
- Courses must be approved by an advisor.
- Students may take PHYS 796 Directed Reading and Research and up to 6 credits of PHYS 798 Research Project as general electives. PHYS 798 Research Project is conducted under the supervision of a faculty research advisor and may be based on work done as an intern. Up to 6 credits of PHYS 799 Master's Thesis may be taken as general electives by students pursuing the thesis option and may also be based on work done as an intern.

Quantum Information Science and Engineering Concentration (QISE)

This concentration prepares students for the quantum information workforce through study of physics and courses across mathematics, computer science, electrical engineering, and mechanical engineering as appropriate for their career plans in this multidisciplinary field.

Code	Title	Credits
Core Course		**3**
Select a focus area and choose one course therein:		
Focus Area: Software		
PHYS 736	Computational Quantum Mechanics	
MATH 621	Algebra I	
MATH 641	Combinatorics and Graph Theory	
MATH 674	Stochastic Differential Equations	
CS 583	Analysis of Algorithms	
CS 587	Introduction to Cryptography	
CS 600	Theory of Computation	
CS 630	Advanced Algorithms	
CS 747	Deep Learning	
ECE 508	Internet of Things	
ECE 646	Applied Cryptography	
ECE 699	Advanced Topics in Electrical and Computer Engineering	
ECE 746	Advanced Applied Cryptography	
ECE 747	Cryptographic Engineering	
Focus Area: Hardware		
PHYS 512	Solid State Physics and Applications	
PHYS 533	Modern Instrumentation	
PHYS 611	Electro-optics	
PHYS 784	Quantum Mechanics II	
CHEM 579	Special Topics	
CHEM 736	Computational Quantum Mechanics	
ECE 685	Nanoelectronics	
ME 754	Introduction to Nano-Materials	
Research Project		**3**
Students in the QISE concentration are expected to gain hands-on experience either through an industry internship, externship research experience in a collaborating research laboratory, or research experience in a Mason research laboratory.		
PHYS 798	Research Project	
General Electives		**9**
Select 9 credits of graduate-level science and engineering courses approved by an academic advisor. [1]		
Total Credits		15

[1]
- Courses must be approved by an advisor.
- Students may take PHYS 796 (https://catalog.gmu.edu/search/?P=PHYS%20796) Directed Reading as a general elective. Up to 6 credits of PHYS 799 (https://catalog.gmu.edu/search/?P=PHYS%20799) Master's Thesis may be taken as general electives by students who would like a thesis option in addition to the research project.

Thesis Option

In preparation for this option, the student must form a committee comprising a chair and two other faculty members.

The student completes a thesis under the direction of the committee chair. The thesis work is typically completed while students are registered for 6 credits of PHYS 799 Master's Thesis. A thesis proposal and thesis are submitted in accordance with AP.6 Graduate Policies. The student must give an oral defense of the thesis to the committee and the George Mason University community at large. Students are expected to respond to questions on the thesis and related material. The committee determines whether the defense is satisfactory.

Accelerated Master's

Physics, BS/Applied and Engineering Physics, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to research to obtain both the Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) and the Applied and Engineering Physics, MS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/applied-engineering-physics-ms/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into a professional school, or a physics doctoral program, or a related discipline's doctoral program.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Additionally, interested applicants should submit a letter to the undergraduate physics coordinator requesting admission along with the aforementioned recommendation letter(s). Contact the physics undergraduate or graduate coordinator for further details.

Successful applicants will have earned 60 undergraduate credits and have an overall GPA of at least 3.00. Additionally, they will have

completed 45 credits in physics-major coursework. The physics major GPA must be at least 3.50.

One or more recommendation letters from one or more research supervisors are also required.

Interested applicants should submit a letter to the undergraduate physics coordinator requesting admission along with the aforementioned recommendation letter(s). Contact the physics undergraduate or graduate coordinator for further details.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
PHYS 684	Quantum Mechanics I	3
PHYS 685	Classical Electrodynamics I	3
PHYS 705	Classical Mechanics	3
PHYS 711	Statistical Mechanics	3

Mechanical Engineering, BS/Applied and Engineering Physics, Accelerated MS

Overview

This program allows academically strong undergraduates with a demonstrable commitment to research to obtain the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) and Applied and Engineering Physics, MS degrees by successfully completing 139 credits. Upon completion, students are well-prepared for entering into the professional workforce, or a PhD program in physics or a related engineering discipline.

Admitted students take selected graduate courses during their senior year and are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program and complete an additional 18 credits to receive the master's degree.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Successful applicants majoring in Mechanical Engineering will have completed at least 60 credits toward their undergraduate degree with an overall GPA of at least 3.00, and the following courses with a GPA of 3.00 or better.

Code	Title	Credits
CS 112	Introduction to Computer Programming	4
ME 212	Solid Mechanics	3
ME 231	Dynamics	3
ME 313	Material Science	3
ME 322	Fluid Mechanics	3
ME 323	Heat Transfer	3
ME 351	Analytical Methods in Engineering	3

One or more recommendation letters from one or more research supervisors are also required. Interested applicants majoring in Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) should submit a letter to the undergraduate Mechanical Engineering coordinator and the Physics Graduate Coordinator, respectively, requesting admission along with the aforementioned recommendation letter(s). Contact the Mechanical Engineering undergraduate and the Physics graduate coordinator for further details.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites

Accelerated Option Requirements

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (http://registrar.gmu.edu/forms/) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and career-readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
PHYS 510	Computational Physics I	3
PHYS 620	Continuum Mechanics	3

Website: physics.gmu.edu

This minor expands upon a student's understanding of both astronomy beyond the introductory level and of fundamental principles, and further develops analytical skills.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 16

Students should refer to the Admissions & Policies tab for specific policies related to this program.

The minor requires completion of all coursework with a minimum GPA of 2.00.

Code	Title	Credits
Select 16 credits of astronomy courses as follows:		**16**
Select one or more courses from the following:		
ASTR 103	Astronomy (Mason Core)	
ASTR 111	The Solar System (Mason Core)	
ASTR 113	Stars, Galaxies, and the Universe (Mason Core)	
ASTR 210	Introduction to Astrophysics	
Select one or more courses from the following:		
ASTR 112	The Solar System Lab (Mason Core)	
ASTR 114	Stars, Galaxies, and the Universe Lab (Mason Core)	
ASTR 115	Finding New Worlds (Mason Core)	
ASTR 124	Introduction to Observational Astronomy	
Select two or more courses from the following:		
ASTR 301	Astrobiology	
ASTR 302	Foundations of Cosmological Thought (Mason Core)	
ASTR 328	Stars	
ASTR 401	Computer Simulation in Astronomy	
ASTR 402	RS: Methods of Observational Astronomy (Mason Core)	
ASTR 403	Planetary Science	
ASTR 404	Galaxies and Cosmology	
ASTR 420	Exoplanets	
ASTR 480	The Interstellar Medium

This program prepares students for graduate school, a career in research or teaching, or employment in industry, business, or education fields where analytical skills and a scientific background are advantageous. Students who are considering a double major should talk to the undergraduate coordinator.

Admissions & Policies

Admissions

University-wide admissions policies can be found in Undergraduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core.

At least 18 credits used to fulfill an Astronomy, BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, subject to approval from the Department of Physics and Astronomy.

By taking ASTR 402 RS: Methods of Observational Astronomy (Mason Core), astronomy majors satisfy the university's writing-intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete a total of 59 credits in physics and astronomy and 14 credits in mathematics with a minimum GPA of 2.00.

Required Astronomy Courses

Code	Title	Credits
ASTR 124	Introduction to Observational Astronomy	1
ASTR 210	Introduction to Astrophysics	3
ASTR 328	Stars	3
ASTR 401	Computer Simulation in Astronomy	3
ASTR 402	RS: Methods of Observational Astronomy (Mason Core) [1]	4
Total Credits		14

[1] Fulfills the writing intensive requirement.

Required Physics Courses

Code	Title	Credits
PHYS 160	University Physics I (Mason Core)	3
PHYS 161	University Physics I Laboratory (Mason Core)	1
PHYS 260	University Physics II (Mason Core)	3
PHYS 261	University Physics II Laboratory (Mason Core)	1
PHYS 251	Introduction to Computer Techniques in Physics	3
PHYS 301	Analytical Methods of Physics	3
PHYS 303	Classical Mechanics	3
PHYS 305	Electromagnetic Theory	3
PHYS 308	Modern Physics	3
PHYS 416	Undergraduate Physics Review	1
Total Credits		24

Required Math Courses

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 213	Analytic Geometry and Calculus III	3
MATH 214	Elementary Differential Equations	3
Total Credits		14

Additional Coursework

Code	Title	Credits
Select 21 credits from the following:		21
ASTR 301	Astrobiology	
ASTR 403	Planetary Science	
ASTR 404	Galaxies and Cosmology	
ASTR 408	Senior Research	
or ASTR 409	Astronomy Internship	
ASTR 420	Exoplanets	
ASTR 480	The Interstellar Medium	
PHYS 306	Wave Motion and Electromagnetic Radiation	
PHYS 307	Thermal Physics	
PHYS 311	Instrumentation	
PHYS 312	Waves and Optics	
PHYS 325	Intermediate Methods of Experimental Physics	
PHYS 402	Introduction to Quantum Mechanics and Atomic Physics	
PHYS 403	Quantum Mechanics II	
PHYS 428	Relativity	
PHYS 440	Nuclear and Particle Physics	
PHYS 465	Planetary Atmospheres and Ionospheres	
PHYS 475	Atmospheric Physics	
Total Credits		21

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 47 credits, which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3

Written Communications (ENGH 302)	3
Writing-Intensive [1]	3
Synthesis/Capstone [2]	3
Total Credits	40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

Honors

Honors in the Major

Eligibility

Astronomy majors who have completed the prerequisites for ASTR 405 Honors Thesis in Astronomy I, have a GPA of at least 3.50 in ASTR and PHYS courses taken at Mason, and have a GPA of at least 3.50 in all courses taken at Mason may apply for admission to the astronomy honors program. Please visit the department for details.

Honors Requirements

To graduate with honors in astronomy, a student must maintain a GPA of at least 3.50 in their ASTR/PHYS courses. Students accepted into the honors program must complete ASTR 405 Honors Thesis in Astronomy I and ASTR 406 Honors Thesis in Astronomy II with a GPA of at least 3.50 and a grade of 'A-' or better in ASTR 406 Honors Thesis in Astronomy II. Students in ASTR 405 Honors Thesis in Astronomy I/ASTR 406 Honors Thesis in Astronomy II will complete a research project and write a thesis working under the supervision of a faculty member. At the end of ASTR 406 Honors Thesis in Astronomy II, the student will write a substantial thesis paper and make a presentation of results to their honors committee.

Physics Minor

Banner Code: PHYS

Undergraduate Physics Advisor

203 Planetary Hall
Fairfax Campus

Phone: 703-993-5356
Email: uadvastr@gmu.edu
Website: physics.gmu.edu

The physics minor will expand your understanding of physics beyond the introductory level and help to deepen your understanding of fundamental principles and further develop your analytical skills. The minor will be an attractive option for students majoring in science, technology, engineering, or mathematics (STEM).

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 17

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Coursework

Code	Title	Credits
PHYS 160	University Physics I (Mason Core)	3
PHYS 161	University Physics I Laboratory (Mason Core)	1
PHYS 260	University Physics II (Mason Core)	3
PHYS 261	University Physics II Laboratory (Mason Core)	1
PHYS 308	Modern Physics	3
Total Credits		11

Additional Coursework

Code	Title	Credits
Select two from the following:		6
PHYS 303	Classical Mechanics	
PHYS 305	Electromagnetic Theory	
PHYS 306	Wave Motion and Electromagnetic Radiation	
PHYS 307	Thermal Physics	
PHYS 402	Introduction to Quantum Mechanics and Atomic Physics	
PHYS 428	Relativity	
Total Credits		6

Physics, BS

Banner Code: SC-BS-PHYS

Undergraduate Physics Advisor

203 Planetary Hall
Fairfax Campus

Phone: 703-993-5356
Email: uadvstr@gmu.edu
Website: physics.gmu.edu

The Physics, BS program prepares students for graduate school and careers in education, business, or industry.

Teacher Licensure

Students who wish to become teachers and plan to seek teacher licensure should consider the following options:

- Secondary Education - Physics (6-12) Undergraduate Certificate
- Physics, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Physics concentration)

Interested students should attend an information session early in their undergraduate career. For more information, visit the Graduate School of Education's website (http://gse.gmu.edu/).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core.

The intensive writing requirement is fulfilled by taking PHYS 407 Senior Laboratory in Modern Physics (Mason Core), PHYS 410 Computational Physics Capstone (Mason Core), or ASTR 402 RS: Methods of Observational Astronomy (Mason Core), which are also capstone courses for the major.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Double Majors

Students considering a double major with physics should discuss this option with the respective undergraduate coordinators.

Note that at least 18 credits used to fulfill the Physics, BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these should be discussed with a physics advisor in advance.

Alternative Introductory Sequence

Normally, students who intend to major in physics should take the physics introductory sequence:

Code	Title	Credits
PHYS 160	University Physics I (Mason Core)	3
PHYS 161	University Physics I Laboratory (Mason Core)	1

PHYS 260	University Physics II (Mason Core)	3
PHYS 261	University Physics II Laboratory (Mason Core)	1

Students who decide to major in physics after completing PHYS 243 College Physics I (Mason Core), PHYS 244 College Physics I Lab (Mason Core), PHYS 245 College Physics II (Mason Core) and PHYS 246 College Physics II Lab (Mason Core) are welcome, but are required to obtain written permission from the Department of Physics and Astronomy before a change of major can be approved.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete a total of 75 credits in the major (69 credits if completing a second major), including at least 11 credits in mathematics, with a minimum GPA of 2.00.

Students must complete the coursework described below and either select a concentration or select the "BS without Concentration" option:

Physics Core Courses

Code	Title	Credits
PHYS 160	University Physics I (Mason Core)	3
PHYS 161	University Physics I Laboratory (Mason Core)	1
PHYS 251	Introduction to Computer Techniques in Physics	3
PHYS 260	University Physics II (Mason Core)	3
PHYS 261	University Physics II Laboratory (Mason Core)	1
PHYS 301	Analytical Methods of Physics	3
PHYS 303	Classical Mechanics	3
PHYS 305	Electromagnetic Theory [1]	3
PHYS 307	Thermal Physics	3
PHYS 308	Modern Physics	3
PHYS 402	Introduction to Quantum Mechanics and Atomic Physics	3
PHYS 416	Undergraduate Physics Review	1
Total Credits		30

[1] Students double majoring in engineering and physics may substitute ECE 305 Electromagnetic Theory for PHYS 305 Electromagnetic Theory.

Mathematics

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 213	Analytic Geometry and Calculus III	3
Total Credits		11

BS without Concentration

Code	Title	Credits
Mathematics/Computational Physics		**6**
Select 6 credits from the following:		
MATH 203	Linear Algebra	
MATH 214	Elementary Differential Equations	
PHYS 325	Intermediate Methods of Experimental Physics	
Intermediate Laboratory		**6**
PHYS 311	Instrumentation	
PHYS 312	Waves and Optics	
Research, Internship, or Independent Study		**3**
Select 3 credits from the following:		
PHYS 326	Problems in Physics II	
PHYS 405	Honors Thesis in Physics I	
PHYS 406	Honors Thesis in Physics II	
PHYS 408	Senior Research	
PHYS 409	Physics Internship	
Capstone		**4**
PHYS 407	Senior Laboratory in Modern Physics (Mason Core) [1]	
PHYS 410	Computational Physics Capstone (Mason Core) [1]	
Physics Theory		**9-15**
All students complete the following 9 credits:		
PHYS 306	Wave Motion and Electromagnetic Radiation	
PHYS 403	Quantum Mechanics II	
PHYS 428	Relativity	
Only students who are not completing a second major must select 6 additional credits from the following:		
ASTR 210	Introduction to Astrophysics	
ASTR 328	Stars	
ASTR 403	Planetary Science	
ASTR 404	Galaxies and Cosmology	
PHYS 331	Physics of Renewable Energy	
PHYS 370	Molecular Biophysics	
PHYS 412	Solid State Physics and Applications	
PHYS 440	Nuclear and Particle Physics	
PHYS 465	Planetary Atmospheres and Ionospheres	
PHYS 475	Atmospheric Physics	
Total Credits		28-34

[1] Fulfills the writing intensive requirement.

Applied and Engineering Physics Concentration (PHAE)

Code	Title	Credits
Mathematics/Computational Physics		**3**
PHYS 325	Intermediate Methods of Experimental Physics	
Intermediate Laboratory		**6**

PHYS 311	Instrumentation	
PHYS 312	Waves and Optics	
Physics Theory		**9**
PHYS 306	Wave Motion and Electromagnetic Radiation	
Select 6 credits from the following:		
PHYS 331	Physics of Renewable Energy	
PHYS 370	Molecular Biophysics	
PHYS 403	Quantum Mechanics II	
PHYS 412	Solid State Physics and Applications	
Capstone		**4**
Select 4 credits from the following:		
PHYS 407	Senior Laboratory in Modern Physics (Mason Core) [1]	
PHYS 410	Computational Physics Capstone (Mason Core) [1]	
Practical Work		**6-12**
Students who are not completing a second major should select 12 credits from the following. Students who are completing a second major should select 6 credits:		
PHYS 405	Honors Thesis in Physics I	
PHYS 406	Honors Thesis in Physics II	
PHYS 408	Senior Research	
PHYS 409	Physics Internship	
BENG 320	Bioengineering Signals and Systems	
ECE 415	Power System Analysis	
ECE 416	Electric Machinery and Modern Applications	
Or other approved 300 or 400-level Volgenau School of Engineering courses		
Total Credits		28-34

[1] Fulfills the writing intensive requirement.

Astrophysics Concentration (PHAP)

Code	Title	Credits
Mathematics/Computational Physics		**6**
ASTR 401	Computer Simulation in Astronomy	
MATH 214	Elementary Differential Equations	
Intermediate Laboratory		**6**
PHYS 311	Instrumentation	
PHYS 312	Waves and Optics	
Research, Internship, or Independent Study		**3**
Select 3 credits from the following:		
ASTR 405	Honors Thesis in Astronomy I	
ASTR 406	Honors Thesis in Astronomy II	
ASTR 408	Senior Research	
ASTR 409	Astronomy Internship	
PHYS 326	Problems in Physics II	
PHYS 405	Honors Thesis in Physics I	
PHYS 406	Honors Thesis in Physics II	
PHYS 408	Senior Research	
PHYS 409	Physics Internship	
Capstone		**4**
Select 4 credits from the following:		
ASTR 402	RS: Methods of Observational Astronomy (Mason Core) [1]	
PHYS 407	Senior Laboratory in Modern Physics (Mason Core) [1]	
PHYS 410	Computational Physics Capstone (Mason Core) [1]	
Physics and Astronomy Theory		**12-18**
Students who are not completing a second major must complete the following:		
ASTR 210	Introduction to Astrophysics	
ASTR 328	Stars	
PHYS 306	Wave Motion and Electromagnetic Radiation	
PHYS 428	Relativity	
Select two courses from the following:		
ASTR 403	Planetary Science	
ASTR 404	Galaxies and Cosmology	
ASTR 420	Exoplanets	
ASTR 480	The Interstellar Medium	
Students who are completing a second major must complete the following:		
ASTR 210	Introduction to Astrophysics	
ASTR 328	Stars	
Select 3 credits from the following:		
PHYS 306	Wave Motion and Electromagnetic Radiation	
PHYS 428	Relativity	
Select 3 credits from the following:		
ASTR 403	Planetary Science	
ASTR 404	Galaxies and Cosmology	
ASTR 420	Exoplanets	
ASTR 480	The Interstellar Medium	
Total Credits		31-37

[1] Fulfills the writing intensive requirement.

Computational Physics Concentration (PHCP)

Code	Title	Credits
Mathematics/Computational Physics		**15**
PHYS 325	Intermediate Methods of Experimental Physics	
MATH 203	Linear Algebra	
MATH 214	Elementary Differential Equations	
Select 6 credits from the following:		
ASTR 401	Computer Simulation in Astronomy	
CDS 302	Scientific Data and Databases	
CDS 303	Scientific Data Mining	
MATH 446	Numerical Analysis I	
MATH 447	Numerical Analysis II	
Intermediate Laboratory		**3**
PHYS 311	Instrumentation	
Research, Internship, or Independent Study		**3**
Select 3 credits from the following:		

PHYS 326	Problems in Physics II	
PHYS 405	Honors Thesis in Physics I	
PHYS 406	Honors Thesis in Physics II	
PHYS 408	Senior Research	
PHYS 409	Physics Internship	
Capstone		**4**
PHYS 410	Computational Physics Capstone (Mason Core) [1]	
Physics and Astronomy Theory		**3-9**
Students who are not completing a second major must select 9 credits of the following. Students who are completing a second major must select 3 credits from the following:		
ASTR 210	Introduction to Astrophysics	
ASTR 328	Stars	
ASTR 403	Planetary Science	
PHYS 306	Wave Motion and Electromagnetic Radiation	
PHYS 412	Solid State Physics and Applications	
Total Credits		28-34

[1] Fulfills the writing intensive requirement.

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core (https://catalog.gmu.edu/mason-core/) requirements (outlined below), Requirements for Bachelor's Degrees (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-3-2), and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Without concentration: 45 (or 51 if completing a second major)
- PHAE concentration: 45 (or 51 if completing a second major)
- PHAP concentration: 42 (or 48 if completing a second major)
- PHCP concentration: 45 (or 51 if completing a second major)

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

Honors

Honors in the Major

Physics majors who have maintained an overall GPA of at least 3.50 in physics courses and a GPA of 3.50 in all courses taken at George Mason University may apply to the physics honors program when they complete the first semester of their junior year.

To graduate with honors in physics, a student is required to maintain a minimum GPA of 3.00 in physics courses and successfully complete PHYS 405 Honors Thesis in Physics I and PHYS 406 Honors Thesis in Physics II with a GPA of at least 3.50 and a grade of at least 'A-' in PHYS 406 Honors Thesis in Physics II. Please visit the department for details.

Accelerated Master's

Physics, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Physics Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Physics and an MEd in Curriculum and Instruction (Secondary Education Physics concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/)in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

This accelerated option is offered jointly by the department of Physics and Astronomy and the School of Education.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements

and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
EDUC 547	Scientific Inquiry and the Nature of Science	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 573	Teaching Science in the Secondary School	3
SEED 673	Advanced Methods of Teaching Science in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Physics, BS/Applied and Engineering Physics, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to research to obtain both the Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) and the Applied and Engineering Physics, MS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/applied-engineering-physics-ms/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into a professional school, or a physics doctoral program, or a related discipline's doctoral program.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Additionally, interested applicants should submit a letter to the undergraduate physics coordinator requesting admission along with the aforementioned recommendation letter(s). Contact the physics undergraduate or graduate coordinator for further details.

Successful applicants will have earned 60 undergraduate credits and have an overall GPA of at least 3.00. Additionally, they will have completed 45 credits in physics-major coursework. The physics major GPA must be at least 3.50.

One or more recommendation letters from one or more research supervisors are also required.

Interested applicants should submit a letter to the undergraduate physics coordinator requesting admission along with the aforementioned recommendation letter(s). Contact the physics undergraduate or graduate coordinator for further details.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
PHYS 684	Quantum Mechanics I	3
PHYS 685	Classical Electrodynamics I	3
PHYS 705	Classical Mechanics	3
PHYS 711	Statistical Mechanics	3

Bachelor's Degree (selected), Bioinformatics Management, Accelerated PSM

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/), or the Chemistry, BS, or the Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/), or the Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/), or the Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/) and the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students in the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/); Chemistry, BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/); Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/); Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/); or Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) with an overall GPA of at least 3.00 in their last 60 credits are welcome to apply to the Bioinformatics Management, PSM accelerated master's program. Applicants to this accelerated master's should have previously taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

The GRE requirement is waived for students accepted into this accelerated program.

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness,

students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Physics, PhD

Banner Code: SC-PHD-PHYS

Graduate Advisor

203 Planetary Hall
Fairfax Campus

Phone: 703-993-5356
Email: gadvphys@gmu.edu
Website: physics.gmu.edu

The degree program contains a Standard concentration for traditional physics programs that focus on Astrophysics, Condensed Matter Theory, Dynamical Systems/Biological Physics, High Energy Physics, Materials Physics, Space Sciences, and an Engineering Physics concentration that combines the disciplines of physics, mathematics, and engineering. The doctoral students accepted into each concentration of the Physics PhD program take a required set of core courses for the given concentration (see Requirements tab).

By working with the dissertation committee, a student in the Standard concentration may choose to specialize in an emphasis area such as Astrophysics, Atomic Molecular and Optical Physics, Condensed Matter Experiment, Condensed Matter Theory, Dynamical Systems/Biological Physics, High Energy Physics, Materials Physics, Space Sciences, or others according to his or her particular interests. A student in the Engineering Physics concentration may choose to specialize in Applied Mechanics (Fluids and Solids), or other applied and engineering physics areas. By the end of their first year, all students should pair with a faculty advisor who will guide them toward doctoral candidacy.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Those holding a baccalaureate degree in physics, astronomy, or engineering from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent who earned a GPA of 3.00 (out of 4.00) or higher in their last 60 credits and have received acceptable scores on the GRE-GEN are invited to apply for admission. Three letters of recommendation must be submitted, preferably from former professors. The GRE subject test in physics is highly recommended for all interested applicants in the standard concentration who received their baccalaureate degrees within the past five years. The GRE requirement can be waived if the student has received a master's degree from a regionally accredited U.S. institution.

A degree-seeking graduate applicant with a baccalaureate degree who has not met all admission requirements may be offered provisional admission if sufficient evidence is presented to suggest that the applicant has the ability to pursue graduate work. For more details concerning admission requirements to George Mason University please refer to Graduate Admission Policies.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean. See AP.6.5.2 Reduction of Credits for more information.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must first choose one concentration, then continue with the additional sections:

Standard Concentration (STND)

Code	Title	Credits
Core Courses		**12**
PHYS 684	Quantum Mechanics I	
PHYS 685	Classical Electrodynamics I	
PHYS 705	Classical Mechanics	
PHYS 711	Statistical Mechanics	
Specialty Science Courses [1]		**6**
Select two of the following courses:		
ASTR 680	Physics of Interstellar Media	
ASTR 730	Stellar Astrophysics	
PHYS 784	Quantum Mechanics II	
PHYS 785	Classical Electrodynamics II	
Seminar Course		**3**
PHYS 703	Seminar in Physics (must be taken three times)	
Total Credits		21

Engineering Physics Concentration (ENGP)

Code	Title	Credits
Core Courses		**12**
PHYS 510	Computational Physics I	
PHYS 613	Computational Physics II	
PHYS 620	Continuum Mechanics	

PHYS 690	Engineering Thermodynamics	
Specialty Science Courses [1]		**6**
Select two of the following courses:		
PHYS 640	Finite Element Analysis of Solids and Fluids	
PHYS 694	Applied Mechanics of Solids	
PHYS 695	Applied Fluid Mechanics	
PHYS 684	Quantum Mechanics I	
PHYS 685	Classical Electrodynamics I	
Seminar Courses		**3**
PHYS 703	Seminar in Physics (at least one credit required)	
And any other graduate-level PHYS/CEIE/MECH/MATH/CSI seminar		
Total Credits		21

[1] These electives must be approved by the student's advisor or the graduate coordinator.

General Science Electives

Code	Title	Credits
Students in both the Standard Concentration and Engineering Physics Concentration must complete 27 credits of approved general electives and preliminary research credits: [2]		27
ASTR 796	Directed Reading and Research	
ASTR 798	Research Project	
PHYS 796	Directed Reading and Research	
PHYS 798	Research Project	
Any graduate-level course chosen from PHYS/ASTR courses [3]		
Total Credits		27

[2] PHYS 796 Directed Reading and Research/ASTR 796 Directed Reading and Research may be repeated as needed.

[3] General elective courses may be chosen from PHYS/ASTR courses, and/or other related disciplines as approved by the student's advisor or dissertation committee.

Qualifying Examination

All students must successfully pass the four individual sections required for each concentration of a qualifying examination. For the Standard Concentration, the four topics on the qualifying exam are covered in the four core courses (PHYS 684 Quantum Mechanics I, PHYS 685 Classical Electrodynamics I, PHYS 705 Classical Mechanics, and PHYS 711 Statistical Mechanics). For the Engineering Physics Concentration, the four topics on the qualifying exam are covered in the four core courses (PHYS 690 Engineering Thermodynamics or PHYS 711 Statistical Mechanics, PHYS 620 Continuum Mechanics or PHYS 705 Classical Mechanics, PHYS 510 Computational Physics I and PHYS 613 Computational Physics II) and in one of the specialty science courses (PHYS 694 Applied Mechanics of Solids or PHYS 695 Applied Fluid Mechanics).

All four sections of the qualifying exam will be offered twice a year, typically in the week before the start of the fall and spring semesters. A student can choose to take a particular section or a combination of sections at one sitting. Grades of "pass" or "unsatisfactory" will be given individually for each of the four sections of the exam. If a student receives a grade of "unsatisfactory" in a given section of the exam, he/she is allowed to retake that section in the next cycle, but a student must satisfactorily pass all sections of the exam by the end of the third year from the date of enrollment in the PhD program. Students entering the program with equivalent courses taken at another institution can satisfy a core course requirement by taking the associated qualifying exam without taking the course.

At the beginning of each academic year, the program director will appoint members to the qualifying examination committee. This committee is responsible for creating, administering, and grading the qualifying exams offered that year. Additional information and previous qualifying exams can be found on the departmental web page.

Dissertation Committee and Program of Study

Upon successful completion of the qualifying examinations, a dissertation committee should be formed by the student as soon as possible. The chair of this committee must be a graduate faculty member from the Department of Physics and Astronomy. The committee must include at least two additional members from the graduate faculty, one of whom must be from outside the Department of Physics and Astronomy. The composition of the committee must be approved by the program director. The dissertation committee is responsible for directing the student in their chosen field of research. The student should work closely with their committee to select specialty courses and electives that form a cohesive program of study. The student's program of study must be approved by the dean before advancement to candidacy.

Advancement to Candidacy

Before a student may be advanced to doctoral candidacy, he/she needs to complete all required coursework, pass the qualifying examination, have the program of study and dissertation proposal approved by the dean, and be recommended by the dissertation committee. Advancement to doctoral candidacy implies that the student has demonstrated adequate breadth and depth of knowledge in the field of study and is capable of conducting research on the boundaries of knowledge.

Dissertation Research

Note: No more than 24 combined credits from PHYS 998 Doctoral Dissertation Proposal/ASTR 998 Doctoral Dissertation Proposal and PHYS 999 Doctoral Dissertation/ASTR 999 Doctoral Dissertation may be applied toward satisfying the doctoral degree requirements, with no more than 21 credits of PHYS 998 Doctoral Dissertation Proposal/ASTR 998 Doctoral Dissertation Proposal.

Code	Title	Credits
Select 24 credits from the following:		24
ASTR 998	Doctoral Dissertation Proposal	
ASTR 999	Doctoral Dissertation	
PHYS 998	Doctoral Dissertation Proposal	
PHYS 999	Doctoral Dissertation	
Total Credits		24

Doctoral Dissertation

After advancing to doctoral candidacy, the student works with their dissertation committee to develop their preliminary research into a doctoral dissertation. The dissertation research should represent a significant contribution to its scientific field and should be deemed publishable in a refereed scientific journal. The dissertation must be

defended in a public forum before the dissertation committee and other interested faculty.

Renewable Energy Interdisciplinary Minor

Banner Code: RNRG

Undergraduate Physics Advisor

203 Planetary Hall
Fairfax Campus

Phone: 703-993-5356
Email: uadvphys@gmu.edu
Website: physics.gmu.edu

This college-wide interdisciplinary minor is designed for students considering a career in the field of renewable energy, or as preparation for graduate work in a wide range of academic disciplines.

Renewable energy, as normally understood, includes a variety of methods of energy generation, such as solar, wind, hydro, tidal, and geothermal, as well as energy storage methods and energy conservation. Jobs related to renewable energy lie in a wide range of areas including engineering, business, marketing, finance, installation, software, legal affairs, and research. Projections suggest that employment opportunities in the renewable energy field will increase dramatically in the near future. The renewable energy interdisciplinary minor is therefore ideally suited for students with majors in engineering, business, policy, and science.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 15-17

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Core Courses

Code	Title	Credits
Complete the following core courses:		
PHYS 131	Introduction to Renewable Energy	3
PHYS 411	Renewable Energy Internship	3
Total Credits		6

Minor Options

Code	Title	Credits
Choose three courses, including:		9 - 11
One (1) course (3 credits) from Category A		
One (1) course (3-4 credits) from Category B		
One (1) course (3-4 credits) from Category C or one (1) 300-400 level course (3-4 credits) from Category A or Category B		
Category A: Economics and Policy		
ECON 100	Economics for the Citizen (Mason Core)	
or ECON 103	Contemporary Microeconomic Principles (Mason Core)	
or ECON 104	Contemporary Macroeconomic Principles (Mason Core)	
or ECON 105	Environmental Economics for the Citizen (Mason Core)	
ECON 309	Economic Problems and Public Policies	
ECON 335	Environmental Economics	
ECON 435	Economics of Energy	
EVPP 338	Economics of Environmental Policy	
EVPP/GOVT 361	Introduction to Environmental Policy	
EVPP 432	Energy Policy	
GGS 303	Geography of Resource Conservation (Mason Core)	
GGS 307	Geographic Approaches for Sustainable Development	
GOVT 304	American State and Local Government	
GOVT 364	Public Policy Making	
Category B: Science and Technology		
CEIE 100	Environmental Engineering around the World (Mason Core)	
CHEM 101	Introduction to Modern Chemistry (Mason Core)	
or CHEM 102	Chemistry for Changing Times (Mason Core)	
or CHEM 103	Chemical Science in a Modern Society (Mason Core)	
or CHEM 104	Chemistry for Changing Times (Mason Core)	
or CHEM 155	Introduction to Environmental Chemistry I (Mason Core)	
or CHEM 211	General Chemistry I (Mason Core)	
or CHEM 271	General Chemistry for Engineers Lecture (Mason Core)	
CHEM 156	Introduction to Environmental Chemistry II (Mason Core)	
or CHEM 212	General Chemistry II (Mason Core)	
CHEM 331	Physical Chemistry I	
CHEM 332	Physical Chemistry II	
CLIM 101	Global Warming: Weather, Climate, and Society (Mason Core)	
or CLIM 102	Introduction to Global Climate Change Science (Mason Core)	
GGS 102	Physical Geography (Mason Core)	
GGS 121	Dynamic Atmosphere and Hydrosphere (Mason Core)	
GGS 122	Dynamic Geosphere and Ecosphere	
GEOL 321	Geology of Energy Resources	
PHYS 331	Physics of Renewable Energy	
PHYS 332	Solar Cells	
PHYS 385	Materials Science with Applications to Renewable Energy	

STAT 250	Introductory Statistics I (Mason Core)
or STAT 344	Probability and Statistics for Engineers and Scientists I
or STAT 346	Probability for Engineers
Category C: Business and Communication	
ACCT 203	Survey of Accounting
or ACCT 204	Honors Survey of Accounting
BULE 303	Legal Environment of Business
BUS 200	Global Environment of Business (Mason Core)
BUS 210	Business Analytics I
BUS 310	Business Analytics II
COMM 303	Writing across the Media
COMM 330	Principles of Public Relations
EVPP 322	Business and Sustainability
EVPP 401	Integrated Environmental Assessment
EVPP 472	Tools and Techniques for International Development
GOVT 358	Nonprofit Financial Planning
MBUS 300	Accounting in a Global Economy
MBUS 306	Managing Projects and Operations
MGMT 303	Principles of Management
Total Credits	9-11

Website: forensicscience.gmu.edu

Administration

- Mary Ellen O'Toole, Director

George Mason University is home to one of the premiere forensic science programs in the country. Forensic science is the application of scientific principles and techniques to the legal process. It is a blanket term for many fields and disciples, all related to the application of science to the law. The mission of the Forensic Science Program (FSP) is to provide outstanding scholarship to graduate and undergraduate students, seeking a career in forensic science, with both an in-depth theoretical as well as operational foundation.

As the field of forensic science is growing rapidly and new technology is being developed on a regular basis, our FSP specializes in providing the most current, accepted practices and methodologies in the application of forensic science techniques. The program also provides specialized learning experiences through select internship possibilities and research opportunities.

Our two-pronged theoretical-operational programs, prepare both undergraduate and graduate students with the skills and scientific knowledge to work in entry level and advanced positions. Depending on their degree and areas of interest, students are prepared to work in a wide range of forensic settings: from the laboratory to a homicide scene to the battle field as an intelligence analyst/officer, tasked with using biometrics to identify the next lone wolf or terrorist cell.

The FSP is an interdisciplinary academic program with its own dedicated teaching faculty who all have operational experience in forensic science. The program is administered by the Forensic Science Program Director, and is governed by the Forensic Science Program Committee.

This minor addresses the growing national and regional interest in forensic science by introducing students to the technical, scientific, and legal aspects of the field. The minor provides an attractive option for students with majors in the natural sciences, criminology, psychology, or computer science, and the curriculum structure makes it particularly suitable for students with majors in biology and chemistry.

Admissions & Policies

Policies

At least 8 credits must be applied only to this minor and may not be used to fulfill requirements of the student's major, concentration, or another minor or undergraduate certificate.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 20-21

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete at least 6 credits in their minor at George Mason University and achieve a minimum GPA of 2.00 in courses applied to the minor.

Please pay attention to the prerequisites for each course in the curriculum below.

Foundation Science Courses

Code	Title	Credits
Select two courses or course/lab pairings from the courses below:		8
BIOL 213	Cell Structure and Function (Mason Core)	
BIOL 305 & BIOL 306	Biology of Microorganisms and Biology of Microorganisms Laboratory	
BIOL 311	General Genetics	
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	
PHYS 160 & PHYS 161	University Physics I (Mason Core) and University Physics I Laboratory (Mason Core)	
PHYS 243 & PHYS 244	College Physics I (Mason Core) and College Physics I Lab (Mason Core)	
PHYS 245 & PHYS 246	College Physics II (Mason Core) and College Physics II Lab (Mason Core)	
PHYS 260 & PHYS 261	University Physics II (Mason Core) and University Physics II Laboratory (Mason Core)	
Total Credits		8

Forensic Science Core Courses

Code	Title	Credits
FRSC 200	Survey of Forensic Science	3
FRSC 201	Introduction to Criminalistics	3
Total Credits		6

Forensic Science Electives

Code	Title	Credits
Select one course from the following:		3
FRSC 302	Forensic Trace Analysis	
FRSC 303	Forensic Evidence and Ethics	
FRSC 304	Forensic Chemistry	
FRSC 460	Forensic DNA Analysis	
Total Credits		3

Supporting Courses

Code	Title	Credits
Select one course from the following;		3-4
FRSC 302	Forensic Trace Analysis [1]	
or FRSC 303	Forensic Evidence and Ethics	
or FRSC 304	Forensic Chemistry	
or FRSC 460	Forensic DNA Analysis	
GEOL 302	Mineralogy	
GEOL 306	Soil Science	
CRIM 400	Applied Criminal Psychology	
CRIM 410	Criminal Investigations	
PSYC 380	Introduction to Forensic Psychology	
PSYC 441	Criminal Behavior: Psychological and Neurological Aspects	
Total Credits		3-4

[1] If a FRSC course is chosen, select a different course than the one chosen to fulfill the Forensic Science Electives section.

Forensic Science, BS

Website: science.gmu.edu/academics/departments-units/forensic-science

The Bachelor of Science in Forensic Science is a general forensic science degree that covers various fields within forensic science including field and laboratory applications. These topics include areas such as crime scene investigation, forensic DNA, forensic chemistry, trace evidence, firearms examination, questioned document, fingerprints, arson, and drug analysis.

This degree is intended to provide students with a well-rounded, hands-on forensic science education in order to prepare students for entrance into a graduate-level educational program, and/or entry-level professional careers in public and private forensic laboratories, federal, state, or local government/law enforcement, defense, homeland security and intelligence agencies.

The Forensic Science undergraduate program provides a strong scientific foundation while simultaneously enabling students to individualize their educational experience toward specific career goals or post-graduate degrees by taking specialized forensic science and natural science courses. This degree offers concentrations in Forensic Biology and Forensic Chemistry to prepare students who desire a career within these specialties.

Unique features of this program include an innovative curriculum that offers hands-on training with crime scene techniques and crime

laboratory methodologies, an outdoor forensic excavation research and training facility, and courses taught by professional and distinguished faculty from various forensic agencies and laboratories.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

FRSC 302 Forensic Trace Analysis **and** FRSC 304 Forensic Chemistry will satisfy the writing intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students majoring in forensic science must complete the core courses and choose one concentration. Students cannot declare the concentration upon admission; it can be declared once the student has earned a minimum of 60 credits.

All coursework must be completed with a minimum GPA of 2.30. No more than three courses with a grade of 'D' (1.00) may be applied to the major.

Students are advised to be aware of any prerequisites that may be required for each course in the curriculum.

Students are only permitted three attempts for all major courses; following a third unsuccessful attempt the student will no longer be able to pursue the major.

Forensic Science Core Courses

Students in each concentration should complete the following courses:

Code	Title	Credits
Forensic Science Courses		
FRSC 200	Survey of Forensic Science	3
FRSC 201	Introduction to Criminalistics	3
FRSC 302	Forensic Trace Analysis [1]	3
FRSC 303	Forensic Evidence and Ethics	3
FRSC 304 & FRSC 305	Forensic Chemistry and Forensic Chemistry Laboratory [1]	4
FRSC 401	Crime Scene Investigations	3
FRSC 405 or FRSC 406	Independent Research Methods Forensic Internship	3
FRSC 460 & FRSC 461	Forensic DNA Analysis and Forensic DNA Analysis Laboratory	4
FRSC 499	Comprehensive Examination	0
CRIM 100	Introduction to Criminal Justice (Mason Core)	3
Natural Science Core Courses		
BIOL 213	Cell Structure and Function (Mason Core)	4
BIOL 214 or STAT 250	Biostatistics for Biology Majors Introductory Statistics I (Mason Core)	3-4
BIOL 311	General Genetics	4
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	4
CHEM 313 & CHEM 315	Organic Chemistry I and Organic Chemistry Lab I	5
CHEM 314 & CHEM 318	Organic Chemistry II and Organic Chemistry Lab II	5
MATH 113 or MATH 123 & MATH 124	Analytic Geometry and Calculus I (Mason Core) Calculus with Algebra/Trigonometry, Part A and Calculus with Algebra/Trigonometry, Part B (Mason Core)	4-6
PHYS 243 & PHYS 244	College Physics I (Mason Core) and College Physics I Lab (Mason Core) [2]	4
PHYS 245 & PHYS 246	College Physics II (Mason Core) and College Physics II Lab (Mason Core) [2]	4
Total Credits		70-73

1 FRSC 302 Forensic Trace Analysis **and** FRSC 304 Forensic Chemistry will satisfy this major's writing-intensive requirement.

2 Students in the Forensic Chemistry Concentration may instead choose the following physics sequence:
PHYS 160 University Physics I (Mason Core) (3 credits) **&** PHYS 161 University Physics I Laboratory (Mason Core) (1 credits) **&** PHYS 260 University Physics II (Mason Core) (3 credits) **&** PHYS 261 University Physics II Laboratory (Mason Core) (1 credits)

- Please note that PHYS 260/261 requires a prerequisite of MATH 213 Analytic Geometry and Calculus III.

Standard Concentration

Code	Title	Credits
Required Course		
BIOL 430	Advanced Human Anatomy and Physiology I	4
Supporting Science Courses		
Select a minimum of 8 credits from the following courses:		8
FRSC 450	Practical Forensic Skeletal Biology	
BINF 401	Bioinformatics and Computational Biology I	
BINF 402	Bioinformatics and Computational Biology II	

BIOL 305 & BIOL 306	Biology of Microorganisms and Biology of Microorganisms Laboratory
BIOL 404	Medical Microbiology
BIOL 405	Microbial Genetics
BIOL 412	Phage Genomics
BIOL 417	Selected Topics in Molecular and Cellular Biology (When the topic is "Illumina Sequencing")
BIOL 431	Advanced Human Anatomy and Physiology II
BIOL 452 & BIOL 453	Immunology and Immunology Laboratory
BIOL 482	Introduction to Molecular Genetics
BIOL 484	Cell Signaling and Disease
CHEM 331 & CHEM 336	Physical Chemistry I and Physical Chemistry Lab I
CHEM 427	Aquatic Environmental Chemistry
CHEM 446	Bioinorganic Chemistry
CHEM 463 & CHEM 465	General Biochemistry I and Biochemistry Lab
CHEM 464	General Biochemistry II
Total Credits	12

Forensic Biology Concentration

Code	Title	Credits
Required Courses		
FRSC 325 & FRSC 326	Molecular Biology and Molecular Biology Laboratory	4
FRSC 470	Forensic Genomics	4
BIOL 483	General Biochemistry	4
Supporting Science Courses		
Select a minimum of 3 credits from the following courses:		3
FRSC 450	Practical Forensic Skeletal Biology	
BINF 401	Bioinformatics and Computational Biology I	
BINF 402	Bioinformatics and Computational Biology II	
BIOL 305 & BIOL 306	Biology of Microorganisms and Biology of Microorganisms Laboratory	
BIOL 404	Medical Microbiology	
BIOL 405	Microbial Genetics	
BIOL 412	Phage Genomics	
BIOL 417	Selected Topics in Molecular and Cellular Biology (When the topic is "Illumina Sequencing")	
BIOL 430	Advanced Human Anatomy and Physiology I	
BIOL 431	Advanced Human Anatomy and Physiology II	
BIOL 452 & BIOL 453	Immunology and Immunology Laboratory	
BIOL 482	Introduction to Molecular Genetics	
BIOL 484	Cell Signaling and Disease	
Total Credits		15

Forensic Chemistry Concentration

Code	Title	Credits
Required Courses		
FRSC 404	Advanced Instrumentation in Forensic Chemistry	4
CHEM 321	Quantitative Chemical Analysis	4
MATH 114	Analytic Geometry and Calculus II	4
Supporting Science Courses		
Select a minimum of 7 credits from the following courses:		7
CHEM 331 & CHEM 336	Physical Chemistry I and Physical Chemistry Lab I	
CHEM 332 & CHEM 337	Physical Chemistry II and Physical Chemistry Lab II [1]	
CHEM 422 & CHEM 423	Instrumental Methods of Chemical Analysis and Instrumental Methods of Chemical Analysis Laboratory [1]	
CHEM 427	Aquatic Environmental Chemistry	
CHEM 441	Properties and Bonding of Inorganic Compounds [1]	
CHEM 446	Bioinorganic Chemistry	
CHEM 463 & CHEM 465	General Biochemistry I and Biochemistry Lab	
CHEM 464	General Biochemistry II	
Total Credits		19

[1] These course selections recommend the University Physics sequence.

Mason Core and Electives

In order to meet a minimum of 120 credits, this degree requires additional credits (specific credit counts by concentration are shown below), which may be applied toward any remaining Mason Core (https://catalog.gmu.edu/mason-core/) requirements (outlined below), Requirements for Bachelor's Degrees (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-3-2), and electives. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

- Standard concentration: 35-38 credits
- Forensic Biology concentration: 32-35 credits
- Forensic Chemistry concentration: 28-31 credits

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3

Information Technology and Computing	3
Exploration Requirements	
Arts	3
Global Understanding	3
Literature	3
Natural Science	7
Social and Behavioral Sciences	3
Western Civilization/World History	3
Integration Requirements	
Written Communications (ENGH 302)	3
Writing-Intensive [1]	3
Synthesis/Capstone [2]	3
Total Credits	40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Accelerated Master's

Forensic Science, BS/Forensic Science, Accelerated MS Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/) Science, BS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs/) and the Forensic Science, MS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-ms/) degrees within an accelerated timeframe. Upon completion of this 144 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in an accelerated timeframe.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text)

Concentration Declaration

Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Application requirements for this accelerated master's program include one letter of recommendation from a Forensic Science Program faculty member or advisor. Additionally, a detailed goal statement is required to include why you are interested in the MS in forensic science degree, career goals and professional aspirations, and proposed area of interest of your final Research Project.

The GRE and a resume are not required for admission into this program.

Successful applicants will have an overall GPA of at least 3.00. Additionally, they will have completed each of the following courses or equivalent with a GPA of 3.00 or higher.

Code	Title	Credits
FRSC 200	Survey of Forensic Science	3
FRSC 201	Introduction to Criminalistics	3
FRSC 302	Forensic Trace Analysis	3
FRSC 303	Forensic Evidence and Ethics	3
BIOL 213	Cell Structure and Function (Mason Core)	4
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	4

Forensic Biology Analysis Concentration Applicants:

In order to obtain a career as a DNA Analyst, the student should have undergraduate coursework in Statistics, Molecular Biology, Genetics, and Biochemistry.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students shall enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Premium Tuition

Students enrolled in this professional MS program are charged at a differential (premium) tuition rate after the bachelor's degree has been conferred. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensics Graduate Certificate (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensics-graduate-certificate/) has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

Criminal Background Check

The successful passing of a Virginia Department of Forensic Sciences background check is required prior to gaining access to FRSC 540 Advanced Forensic Chemistry, FRSC 541 Forensic Chemistry Laboratory, FRSC 560 Advanced Forensic DNA Sciences, and FRSC 561 Forensic DNA Laboratory.

Course Notes

- FRSC 560 Advanced Forensic DNA Sciences **and** FRSC 561 Forensic DNA Laboratory

Students shall have completed undergraduate coursework in molecular and/or cell biology, as well as genetics, or students must obtain permission of the instructor prior to taking FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory.

- FRSC 540 Advanced Forensic Chemistry **and** FRSC 541 Forensic Chemistry Laboratory.

Students shall have completed undergraduate coursework in general chemistry including polarity and acid/base chemistry. Students shall also have completed Organic Chemistry and be able to identify functional groups and other chemistry structures that make up a molecule. Exposure to instrumental techniques such as gas chromatography, mass spectrometry and infrared spectroscopy is recommended or permission of instructor.

Graduate Course Suggestions

Upon acceptance, students must meet with a master's accelerated program advisor to complete a Plan of Study form in order to approve eligible graduate coursework prior to registering for any graduate courses. Failure to do so may result in the removal of the course(s). Approval does not guarantee availability in a course. The following are suggested graduate courses:

Code	Title	Credits
FRSC 500	Introduction to Forensic Science	3
FRSC 510	Basic Crime Analysis [1]	3
FRSC 514	Survey of Forensic Chemistry, Biology, and DNA Analysis [2]	3
FRSC 530	Law and Forensic Science	3
FRSC 570	Trace and Physical Evidence Concepts [3]	3

1. Can only be selected if FRSC 401 has been completed.
2. Can only be selected if FRSC 304 Forensic Chemistry and FRSC 460 Forensic DNA Analysis have been completed. This course is suggested for the Forensic Biology Analysis, the Forensic Chemistry Analysis, or the Forensic/Biometric Identity Analysis concentrations.
3. Suggested for the Crime Scene Investigation, the Forensic Biology Analysis, or the Forensic Chemistry Analysis concentrations.

The Forensic Science Program offers a master's degree in Forensic Science with four concentrations to best suit the student's future career goals- Crime Scene Investigation, Forensic Biology Analysis, Forensic Chemistry Analysis, and Forensic/Biometric Identity Analysis. This graduate degree will prepare students for a rewarding career in federal, state and local laboratories, investigative or intelligence agencies, private companies, or allow professionals currently working in the field an opportunity to improve their education and optimize career advancement.

Located in Northern Virginia within the Washington DC Metro area, our students are afforded the opportunity to study in close proximity to a plethora of federal, state and local crime laboratories, investigative and intelligence agencies. These facilities provide unique access to forensic science experts and offer students competitive internships and job opportunities.

Available concentrations include:

- Crime Scene Investigation
- Forensic Biology Analysis
- Forensic Chemistry Analysis
- Forensic/Biometric Identity Analysis

Admissions & Policies

Admissions

Application Requirements

University-wide admissions policies can be found in Graduate Admissions Policies.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

In addition to fulfilling Mason's admission requirements for graduate study, applicants must provide:

- Three letters of recommendation from academic references or references in the industry or government who are familiar with the applicant's academic and/or professional accomplishments.
- Resume
- Detailed goal statement to include why you are interested in coming into Mason's Forensic Science Master's program, career goals, and professional aspirations, and proposed area of interest for your final research project.
- Two copies of official transcripts from each institution of higher education attended.
- A Virginia Domicile Classification Form.

TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. The TOEFL score has to at least be a total of 88, with a minimum of 20 in each section.

The GRE is not required for admission into this program. Additional requirements for each specific concentration are listed below.

Concentration-Specific Requirements

Forensic Biology Analysis and Forensic Chemistry Analysis Concentrations

A bachelor's degree in a forensic or natural science.

Forensic/Biometric Identity Analysis Concentration

A bachelor of science or bachelor of arts degree in a forensic or natural science, computer science, computer electronic or electrical engineering, information systems or information technology (or its equivalent coursework in a relevant field).

Crime Scene Investigation Concentration

A bachelor of science or bachelor of arts degree in a related field.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Premium Tuition

Students enrolled in this professional MS program are charged at a differential (premium) tuition rate. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensics Graduate Certificate has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

Concentration Declaration

Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

Criminal Background Check

The successful passing of a Virginia Department of Forensic Sciences (http://www.dfs.virginia.gov/) background check is required prior to gaining access to FRSC 540 Advanced Forensic Chemistry, FRSC 541 Forensic Chemistry Laboratory, FRSC 560 Advanced Forensic DNA Sciences, and FRSC 561 Forensic DNA Laboratory.

Course Notes

FRSC 560 Advanced Forensic DNA Sciences and **FRSC 561 Forensic DNA Laboratory**

Students shall have completed undergraduate coursework in molecular and/or cell biology, as well as genetics, or students must obtain permission of the instructor prior to taking FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory.

FRSC 540 Advanced Forensic Chemistry and FRSC 541 Forensic Chemistry Laboratory

Students shall have completed undergraduate coursework in general chemistry including polarity and acid/base chemistry. Students shall also have completed Organic Chemistry and be able to identify functional groups and other chemistry structures that make up a molecule. Exposure to instrumental techniques such as gas chromatography, mass spectrometry and infrared spectroscopy is recommended or permission of instructor.

Requirements

Degree Requirements

Total credits: 36

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Select one concentration from the following:

Concentration in Crime Scene Investigation (CSIN)

This concentration educates students for a career as a crime scene investigator.

Code	Title	Credits
Core Courses		
FRSC 500	Introduction to Forensic Science	3
FRSC 510	Basic Crime Analysis	3
FRSC 511	Advanced Crime Scene Analysis	3
FRSC 530	Law and Forensic Science	3
FRSC 570	Trace and Physical Evidence Concepts	3
Research Project or Non-Research Project		**5**
Research Project Option		

The Research Project Option is designed for students planning to pursue a doctoral degree or a career involving research in the field of forensic science or other related disciplines. The research project is based on laboratory research that must be preapproved by the advisory committee, which is appointed during the first semester of registration in FRSC 610 (1 credit) Forensic Research Project. Students are responsible for selecting research advisors who can commit as an advisor during the semesters that the student indicates that they will be conducting their research and enrolled in FRSC 610. Students must then complete their written research project and present their research during an oral defense during the semester of registration in FRSC 610 (3 credit) Forensic Research Project.

FRSC 600	Forensics Seminar
FRSC 610	Forensic Research Project

Non-Research Project Option

Students selecting this option are not required to complete a laboratory-based research project. Instead, they must successfully pass FRSC 699 (0 credits) Forensic Comprehensive Examination to demonstrate thorough comprehension of the curriculum and must select 5 credits of additional elective coursework.

FRSC 699	Comprehensive Examination

Select 5 credits of additional FRSC elective courses

Electives

Select 16 credits from the following courses: 16

FRSC 512	Physical Evidence Laboratory
FRSC 513	Forensic Photography
FRSC 514	Survey of Forensic Chemistry, Biology, and DNA Analysis
FRSC 515	Selected Topics in Forensic Science
FRSC 516	Forensic Drone Photography
FRSC 517	Questioned Document Examination
FRSC 518	Analytical Thinking Violent Crime Profiling
FRSC 520	Toxicology
FRSC 550	Issues in Forensic Anthropology
FRSC 580	Facial Reconstruction
FRSC 590	Medicolegal Death Investigation and Pathology
FRSC 600	Forensics Seminar
FRSC 620	Face and Biometric Pattern Analysis
FRSC 630	Fingerprint Identification
FRSC 640	Legal, Privacy and Ethical Issues in Identity Analysis
FRSC 650	Identity Analysis Applications
FRSC 690	Capstone - Moot Court Expert Testimony
FRSC 790	Internship in Forensic Science (Credits: 1-6)

Total Credits 36

Concentration in Forensic Biology Analysis (FRSB)

This concentration educates students for a career as a forensic biology laboratory analyst.

The successful passing of a Virginia Department of Forensic Sciences background check is required prior to gaining access to FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory. In order to obtain a career as a DNA Analyst, the student should have undergraduate coursework in Statistics, Molecular Biology, Genetics, and Biochemistry.

Code	Title	Credits
Core Courses		
FRSC 500	Introduction to Forensic Science	3
FRSC 510	Basic Crime Analysis	3
FRSC 512	Physical Evidence Laboratory	3
or FRSC 630	Fingerprint Identification	
FRSC 514	Survey of Forensic Chemistry, Biology, and DNA Analysis	3
FRSC 530	Law and Forensic Science	3
FRSC 560 & FRSC 561	Advanced Forensic DNA Sciences and Forensic DNA Laboratory	4
FRSC 570	Trace and Physical Evidence Concepts	3
FRSC 600	Forensics Seminar	1
FRSC 610	Forensic Research Project	4
Electives		
Select 9 credits from the following courses:		9
FRSC 511	Advanced Crime Scene Analysis	
FRSC 512	Physical Evidence Laboratory	
FRSC 513	Forensic Photography	
FRSC 515	Selected Topics in Forensic Science	
FRSC 516	Forensic Drone Photography	
FRSC 517	Questioned Document Examination	
FRSC 518	Analytical Thinking Violent Crime Profiling	
FRSC 520	Toxicology	
FRSC 550	Issues in Forensic Anthropology

Accelerated Master's

Forensic Science, BS/Forensic Science, Accelerated MS Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Forensic (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/) Science, BS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-bs/) and the Forensic Science, MS (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensic-science-ms/) degrees within an accelerated timeframe. Upon completion of this 144 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in an accelerated timeframe.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text)

Concentration Declaration

Students must declare their intended concentration upon application. In the event that a student wishes to change their concentration, students may request to change their concentration by submitting a letter to the Forensic Science Program Director detailing the request and providing justification. These requests and possible substitutions/waivers will be considered on a case-by-case basis and only when the appropriate admissions requirements are met.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Application requirements for this accelerated master's program include one letter of recommendation from a Forensic Science Program faculty member or advisor. Additionally, a detailed goal statement is required to include why you are interested in the MS in forensic science degree, career goals and professional aspirations, and proposed area of interest of your final Research Project.

The GRE and a resume are not required for admission into this program.

Successful applicants will have an overall GPA of at least 3.00. Additionally, they will have completed each of the following courses or equivalent with a GPA of 3.00 or higher.

Code	Title	Credits
FRSC 200	Survey of Forensic Science	3
FRSC 201	Introduction to Criminalistics	3
FRSC 302	Forensic Trace Analysis	3
FRSC 303	Forensic Evidence and Ethics	3
BIOL 213	Cell Structure and Function (Mason Core)	4
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	4

Forensic Biology Analysis Concentration Applicants:

In order to obtain a career as a DNA Analyst, the student should have undergraduate coursework in Statistics, Molecular Biology, Genetics, and Biochemistry.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students shall enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Premium Tuition

Students enrolled in this professional MS program are charged at a differential (premium) tuition rate after the bachelor's degree has been conferred. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensics Graduate Certificate (https://catalog.gmu.edu/colleges-schools/science/forensic-program/forensics-graduate-certificate/) has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

Criminal Background Check

The successful passing of a Virginia Department of Forensic Sciences background check is required prior to gaining access to FRSC 540 Advanced Forensic Chemistry, FRSC 541 Forensic Chemistry Laboratory, FRSC 560 Advanced Forensic DNA Sciences, and FRSC 561 Forensic DNA Laboratory.

Course Notes

- FRSC 560 Advanced Forensic DNA Sciences **and** FRSC 561 Forensic DNA Laboratory

Students shall have completed undergraduate coursework in molecular and/or cell biology, as well as genetics, or students must obtain permission of the instructor prior to taking FRSC 560 Advanced Forensic DNA Sciences and FRSC 561 Forensic DNA Laboratory.

- FRSC 540 Advanced Forensic Chemistry **and** FRSC 541 Forensic Chemistry Laboratory.

Students shall have completed undergraduate coursework in general chemistry including polarity and acid/base chemistry. Students shall also have completed Organic Chemistry and be able to identify functional groups and other chemistry structures that make up a molecule. Exposure to instrumental techniques such as gas chromatography, mass spectrometry and infrared spectroscopy is recommended or permission of instructor.

Graduate Course Suggestions

Upon acceptance, students must meet with a master's accelerated program advisor to complete a Plan of Study form in order to approve eligible graduate coursework prior to registering for any graduate courses. Failure to do so may result in the removal of the course(s). Approval does not guarantee availability in a course. The following are suggested graduate courses:

Code	Title	Credits
FRSC 500	Introduction to Forensic Science	3
FRSC 510	Basic Crime Analysis [1]	3
FRSC 514	Survey of Forensic Chemistry, Biology, and DNA Analysis [2]	3
FRSC 530	Law and Forensic Science	3
FRSC 570	Trace and Physical Evidence Concepts [3]	3

1. Can only be selected if FRSC 401 has been completed.
2. Can only be selected if FRSC 304 Forensic Chemistry and FRSC 460 Forensic DNA Analysis have been completed. This course is suggested for the Forensic Biology Analysis, the Forensic Chemistry Analysis, or the Forensic/Biometric Identity Analysis concentrations.
3. Suggested for the Crime Scene Investigation, the Forensic Biology Analysis, or the Forensic Chemistry Analysis concentrations.

Forensics Graduate Certificate

Banner Code: SC-CERG-FORS

Academic Advising

3400 Exploratory Hall
Fairfax Campus

Phone: 703-993-5071
Email: fscience@gmu.edu

Website: science.gmu.edu/academics/departments-units/forensic-science

This interdisciplinary graduate certificate program is designed for students seeking training in forensic science, as well as for current professionals employed by the federal government, local law enforcement, and private security corporations. Forensics refers to the application of scientific methodologies to the analysis of crime scenes, the collection of evidence, and the laboratory analysis of that evidence in support of criminal investigations. Related legal aspects are also considered as part of a comprehensive approach to forensics.

At the time of completion, depending on the concentration, students will be able to understand the basic principles of forensics and perform a general crime scene analysis. Available concentrations include: Crime Scene Investigation, Forensic Biometric Identity Analysis, and General Forensic Science; curriculum requirements for each concentration are listed in the Requirements tab.

This certificate may be pursued on a part-time or full-time basis.

This certificate program qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

Applicants to the general forensics concentration should hold a BA or BS degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a minimum GPA of 3.00.

To apply, prospective students should submit a completed George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), two copies of official transcripts from all institutions attended, and a current résumé. TOEFL scores are required of all international applicants who do not hold at least a bachelor's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent.

Pursuing the Forensic Science, MS

Students who wish to continue their studies may apply to the Forensic Science, MS. Please see AP.6.9 Requirements for Master's Degrees and contact an advisor for details.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Premium Tuition

Students enrolled in this professional program are charged at a differential (premium) tuition rate. Therefore, any courses or secondary programs that they may enroll in are subject to the differential tuition rate. The Forensic Science, MS has the same premium tuition rate, making it the ideal program for concurrent enrollment (if desired).

Requirements

Certificate Requirements

Total credits: 18

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students must complete all core courses and select one concentration.

Interdisciplinary Program in Neuroscience (IPN)

Phone: 703-993-4334
Website: neuroscience.gmu.edu

Administration

- Saleet Jafri, Director
- Ted Dumas, PhD Program Director and Associate Director
- Wendy Lewis, Undergraduate Coordinator

The Interdisciplinary Program in Neuroscience (IPN) at George Mason University is grounded in systems biology, biochemistry, bioengineering, and psychology. Research and education within the IPN is coordinated under the efforts of faculty participating from a number of colleges across the university.

The IPN administers the Neuroscience Minor, Neuroscience BS, and the Neuroscience PhD. Participating neuroscience faculty comprise a unique blend of traditional, experimental, and computational scientists with research spanning a spectrum of key topics in neuroscience including: behavior, anatomy, physiology, neuropharmacology, computational modeling, and informatics. Key research initiatives currently underway within the IPN are:

- Plasticity mechanisms underlying neurological development
- Identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain
- Biochemical dynamics in disorders of the basal ganglia
- Computational methods for simulation of complex biological systems
- Description and generation of neuronal morphology
- Adaptive control for stabilization of epilepsy
- Role of metals in memory and Alzheimer's disease
- Biochemical/metabolic simulations at the organism level
- Cellular and sub-cellular models of associative learning
- Experimental and computational models in calcium signaling
- Synaptic plasticity

Website: neuroscience.gmu.edu

Neuroscience is one of the most rapidly growing disciplines in science and society today. Due to its interdisciplinary nature, it draws on skills from anatomy, chemistry, electrical engineering, genetics, math, psychology, economics, and philosophy among others. Students in diverse fields can benefit from neuroscience through this minor.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Minor Requirements

Total credits: 21-22

Students should refer to the Admissions & Policies tab for specific policies related to this minor.

Students must complete at least 21 credits of coursework with a minimum GPA of 2.00.

The Bachelor of Science in Neuroscience is an interdisciplinary program emphasizing the relationship between the biology and chemistry of the nervous system and the behavior of an organism. The BS prepares students for graduate level study in both medical school and doctoral and

master's level programs in neuroscience and other health-related fields, and work in the neuroscience field.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Policies

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core.

NEUR 410 Current Topics in Neuroscience or NEUR 411 Seminar in Neuroscience fulfill the writing intensive requirement.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students should refer to the Admissions & Policies tab for specific policies related to this program.

BIOL 326	Animal Physiology	
BIOL 425	Human Physiology	
BIOL 430	Advanced Human Anatomy and Physiology I	
Chemistry		
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	4
Mathematics		
Select one option (4 or 6 credits) from the following:		4-6
MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 123 & MATH 124	Calculus with Algebra/Trigonometry, Part A and Calculus with Algebra/Trigonometry, Part B (Mason Core)	
Statistics		
Select one course (3 or 4 credits) from the following:		3-4
BIOL 214	Biostatistics for Biology Majors	
STAT 250	Introductory Statistics I (Mason Core)	
PSYC 300	Statistics in Psychology	
MATH 352	Statistics	
Physics		
Select one of the following sequences:		8
PHYS 243 & PHYS 244 & PHYS 245 & PHYS 246	College Physics I (Mason Core) and College Physics I Lab (Mason Core) and College Physics II (Mason Core) and College Physics II Lab (Mason Core)	
PHYS 160 & PHYS 161 & PHYS 260 & PHYS 261	University Physics I (Mason Core) and University Physics I Laboratory (Mason Core) and University Physics II (Mason Core) and University Physics II Laboratory (Mason Core)	
Psychology [1,3]		
PSYC 100	Basic Concepts in Psychology (Mason Core)	3
PSYC 375	Brain and Sensory Processes	3
PSYC 376	Brain and Behavior	3
Computer Science		
CDS 130	Computing for Scientists	3
Core Courses in Neuroscience [1]		
NEUR 327	Cellular, Neurophysiological, and Pharmacological Neuroscience	3
NEUR 335	Molecular, Developmental, and Systems Neuroscience	3
Technical Writing [1,2,4]		
NEUR 410	Current Topics in Neuroscience	3
or NEUR 411	Seminar in Neuroscience	
Required Psychology Lab Course [1]		
PSYC 373	Biopsychology Laboratory	2
Total Credits		54-57

1. Students must earn a minimum grade of 1.67 (C-) in these courses.
2. The course chosen to fulfill this requirement cannot be applied to the 24 credits of approved neuroscience electives.
3. Transfer students who have earned transfer credit for PSYC 372 Biopsychology may substitute this course for PSYC 375 Brain and Sensory Processes.
4. Either course fulfills the writing intensive requirement.

Electives

Students should consult with an advisor to choose appropriate elective courses, which must be approved by the director of the program. A sample of possible electives is given below. Only courses not already taken in the degree will apply as electives, with the exception of seminar and topics courses; a different topic must be addressed in the second instance of a seminar or topics course. Students may apply no more than 6 credits of courses with a grade of 'D' to this requirement.

Students intending to pursue a doctorate in neuroscience or a medical degree are advised to take CHEM 313 Organic Chemistry I and CHEM 315 Organic Chemistry Lab I.

Code	Title	Credits
Select 24 credits from the following:		24
BENG 101	Introduction to Bioengineering	
BENG 313	Physiology for Engineers	
BENG 434	Computational Modelling of Neurons and Networks	
BIOL 305	Biology of Microorganisms	
BIOL 306	Biology of Microorganisms Laboratory	
BIOL 311	General Genetics	
BIOL 322	Developmental Biology	
BIOL 323	Lab for Developmental Biology	
BIOL 326	Animal Physiology	
BIOL 417	Selected Topics in Molecular and Cellular Biology (when topic is Foundations of the Mammalian Brain)	
BIOL 420	Vaccines	
BIOL 425	Human Physiology	
BIOL 426	Mechanisms of Aging	
BIOL 429	Biological Foundations of Pharmacology	
BIOL 430	Advanced Human Anatomy and Physiology I	
BIOL 431	Advanced Human Anatomy and Physiology II	
BIOL 432	Clinical Applications in Human Physiology	
BIOL 452	Immunology

PHYS 263	University Physics III Laboratory (Mason Core)	
PSYC 304	Principles of Learning	
PSYC 309	Sensation, Perception, and Information Processing	
PSYC 317	Cognitive Psychology	
PSYC 441	Criminal Behavior: Psychological and Neurological Aspects	
PSYC 472	Current Topics in Brain and Behavior	
Total Credits		24

[1] Fulfills the writing intensive requirement.

Mason Core and Elective Credits

In order to meet a minimum of 120 credits, this degree requires an additional 39-42 credits which may be applied toward any remaining Mason Core requirements (outlined below), Requirements for Bachelor's Degrees, and elective courses. Students are strongly encouraged to consult with their advisors to ensure that they fulfill all requirements.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3

Synthesis/Capstone [2]	3
Total Credits	40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Honors

Honors in the Major

Highly-qualified students may apply to graduate with honors in the major.

Eligibility

To be eligible for admission, neuroscience majors must have completed at least 60 credits and have a minimum cumulative GPA of 3.25 and a minimum GPA of 3.25 in neuroscience courses.

Honors Requirements

If accepted, students must take a sequence of three courses, which culminates in the successful completion and presentation of an independent honors thesis.

Code	Title	Credits
NEUR 410	Current Topics in Neuroscience	3
or NEUR 411	Seminar in Neuroscience	
NEUR 450	Honors Thesis Proposal	2-3
NEUR 451	Honors Thesis	3-4
Total Credits		8-10

To graduate with honors, students must earn a minimum GPA of 3.50 in their honors courses, maintain a minimum cumulative GPA of 3.25, and complete an honors thesis.

Accelerated Master's

Neuroscience, BS/Biology, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Neuroscience, BS and the Biology, MS (https://catalog.gmu.edu/colleges-schools/science/systems-biology/biology-ms/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

GRE scores are not required for students in this accelerated program.

Students must obtain a graduate faculty advisor prior to beginning graduate coursework.

Successful applicants will have an overall undergraduate GPA of at least 3.10. Three letters of recommendation, including one from a prospective thesis or project advisor, are required. Additionally, they will have completed[2] the following courses with a GPA of 3.00[1] or higher.

Code	Title	Credits
BIOL 213	Cell Structure and Function (Mason Core)	4
One Course in Statistics:		3-4
BIOL 214	Biostatistics for Biology Majors	
or STAT 250	Introductory Statistics I (Mason Core)	
or PSYC 300	Statistics in Psychology	
or MATH 352	Statistics	
BIOL 311	General Genetics	4
CHEM 313 & CHEM 315	Organic Chemistry I and Organic Chemistry Lab I [1]	5
NEUR 327	Cellular, Neurophysiological, and Pharmacological Neuroscience [2]	3

1 Grades of 2.50 in CHEM 313 Organic Chemistry I and CHEM 315 Organic Chemistry Lab I are acceptable for admission into this accelerated pathway.

2 Registration in, as opposed to completion of, NEUR 327 Cellular, Neurophysiological, and Pharmacological Neuroscience is sufficient.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following

conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
BIOL 682	Advanced Eukaryotic Cell Biology	3
BIOL 689	Interdisciplinary Tools in the Biosciences	3
BIOL 690	Introduction to Graduate Studies in Biology	1-2
BIOL 695	Seminar in Molecular, Microbial, and Cellular Biology	1
NEUR 612	Neuroethics	3
NEUR 601	Developmental Neuroscience	3
NEUR 602	Cellular Neuroscience	3
NEUR 603	Mammalian Neuroanatomy	3
NEUR 634	Neural Modeling	3
NEUR 651	Molecular Neuropharmacology	3

Bachelor's Degree (selected), Bioinformatics Management, Accelerated PSM

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/), or the Chemistry, BS, or the Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/), or the Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/), or the Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/) and the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students in the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/); Chemistry, BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/); Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/); Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/); or Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) with an overall GPA of at least 3.00 in their last 60 credits are welcome to apply to the Bioinformatics Management, PSM accelerated master's program. Applicants to this accelerated master's should have previously taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

The GRE requirement is waived for students accepted into this accelerated program.

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

Neuroscience, PhD

Banner Code: SC-PHD-NEUR

Academic Advising

204 Krasnow Institute
Fairfax Campus

Phone: 703-993-4334
Email: neurosci@gmu.edu
Website: neuroscience.gmu.edu

The Neuroscience, PhD program focuses on the study of the brain and addresses the challenge of developing an integrative understanding of cognition and higher brain function. In response to this challenge, the rapidly developing field of neuroscience has produced an exponential increase in the amount of data available to investigators as they develop new theories of brain function and new hypotheses to test. The main objective of the program is to prepare students to participate at the cutting edge of this exciting field in academia, industry, and government. The program provides students with a rich interdisciplinary intellectual environment that fosters the development of the skills they will need to successfully pursue research careers.

Current faculty research focuses on the broad areas of behavior, anatomy, physiology, neuropharmacology, molecular biology, computational modeling, and informatics. External research collaborations exist with federal agencies, private and not-for-profit corporations, and other universities. The scope of research ranges from the subcellular and molecular level (in the context of such phenomena as drug addiction and the biological basis of schizophrenia) to the systems and behavioral level.

Current research projects include plasticity mechanisms supporting development, network formation and information processing, cellular and subcellular models of associative learning, biochemical dynamics in disorders of the basal ganglia, computational methods for simulation of complex biological systems, role of metals in memory and Alzheimer's disease, and dynamical behavior of neurons and networks of neurons, and identifying and characterizing protein interactions for the dopamine and nicotinic acetylcholine receptors in the brain.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants should have a bachelor's degree in a relevant field and undergraduate courses in organic chemistry, cell biology, and calculus. Coursework in biochemistry (e.g. BIOL 483 General Biochemistry), cell biology (e.g. BIOL 484 Cell Signaling and Disease), and molecular genetics (e.g. BIOL 482 Introduction to Molecular Genetics) is highly recommended. Admission requires a minimum GPA of 3.25 in undergraduate work and acceptable GRE scores. The GRE exam is waived if applicants hold a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent at the time of their application. In addition, the applicant's goal statement should relate to the research interests of at least one faculty member in the program and include the names of two faculty members who may be suitable as advisors or supervisory committee members.

To apply, complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply a goal statement, two copies of official transcripts from each college and graduate institution attended, three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant's academic or research capabilities, and an official report of scores obtained on the GRE-GEN. The GRE-SUB is optional. TOEFL scores are required of all international applicants.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs. See AP.6.5.2 Reduction of Credits for more information.

Transfer of Credit

An alternative to the reduction of credit is a transfer of credit. With this option, up to 24 credits of previous, relevant graduate coursework may be transferred into the program, provided those credits have not been applied toward a previous degree.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Doctoral Coursework

Code	Title	Credits
Core Science		
NEUR 702	Research Methods	3
Select one statistics course from the following:		3-4
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
PSYC 611	Advanced Statistics	
STAT 535	Analysis of Experimental Data	
STAT 544	Applied Probability	
STAT 554	Applied Statistics I	
Core Neuroscience		
NEUR 601	Developmental Neuroscience	3
NEUR 602	Cellular Neuroscience	3
NEUR 603	Mammalian Neuroanatomy	3
NEUR 701	Neuroscience Laboratory	3

NEUR 703	Laboratory Rotation and Readings (This course will be taken three times)	
Electives		
Select 20-21 credits of electives		20-21
Elective course options for students interested in attaining professional skills include:		
COS 600	Multidisciplinary Problem Solving and Leadership	
Complete the Business Fundamentals Graduate Certificate and receive both the graduate certificate and the Neuroscience PhD upon completion of both programs' requirements.		
Total Credits		47-49

Publication

An additional requirement for graduation calls for students to have at least one publication (in print or in press) in a refereed journal.

Doctoral Committee and Proposal

When coursework is nearing completion, the student should form a doctoral committee of at least three graduate faculty members and start preparing their dissertation proposal. Students in consultation with their advisor identify which faculty are appropriate to be a part of their committee. The dissertation committee administers the qualifying exam and evaluates the dissertation proposal as well as the dissertation itself. At least one of the committee members must be outside of the dissertation advisor's department.

Candidacy Examination and Advancement to Candidacy

The doctoral candidacy examination includes written and oral components. After passing the candidacy exam and receiving committee approval for the dissertation proposal, the student is advanced to doctoral candidacy.

Dissertation Research

Note: No more than 24 combined credits from NEUR 998 Dissertation Proposal and NEUR 999 Doctoral Dissertation may be applied toward satisfying doctoral degree requirements, with no more than 12 credits of NEUR 998 Dissertation Proposal.

Code	Title	Credits
Select 24 credits from the following:		24

Administration

- Iosif Vaisman, Director
- Dmitri Klimov, BCB PhD Program Director
- Alessandra Luchini, BIOS PhD Program Director
- Don Seto, BCB MS Program Director
- Ancha Baranova, Biology MS Program Director
- Vikas Chandhoke, PSM Program Director
- Kimberly Harris, Graduate Coordinator
- Andrea Nikoi, Director of HR and Finance

The School of Systems Biology offers undergraduate and graduate degree programs in bioinformatics and computational biology, and graduate degree programs in biology and biosciences. The school also offers research opportunities at the graduate and undergraduate levels. For additional details about current faculty research activities, please visit the school's website.

The School of Systems Biology works closely with and provides faculty and administrative support to the Department of Biology, through which the Biology, BA and Biology, BS degrees are offered. Accelerated master's options are also available.

Requirements & Policies

Policies
Students are governed by the university's policies.

Using Laboratories
Only authorized experiments and exercises may be carried out in the school's research and teaching laboratories and must be done under the supervision of a university faculty or staff member. No unauthorized work is allowed in any laboratory.

Using Organisms in Classes
Direct observations of actual organisms are considered an essential part of learning biology at all levels. Direct observations of organisms may involve the use of living or preserved specimens, dissections of organisms or parts of organisms, and microscopic examination of organisms or parts of organisms. All use of live animals conforms to National Institutes of Health guidelines for the use and care of laboratory animals. Activities specified above may be a required part of a course and thus serve as a basis for grading in the course. Any questions about the administration of this policy should be directed to the course coordinator or instructor.

Email: binf@gmu.edu
Website: science.gmu.edu/academics/departments-units/systems-biology

This graduate certificate addresses the growing national and regional demand for trained computational biologists by combining a solid foundation in biotechnology with computational skills relevant to bioinformatics. With online and onsite courses, the flexibility of this certificate's structure permits students to custom design their curriculum under an advisor's guidance, making the graduate certificate especially relevant for students employed in today's diverse Northern Virginia high-technology workplace. Ideal candidates for this certificate are those who have a background in biological and computer sciences, and are currently working in or planning to enter the fields of biotechnology or bioinformatics. The certificate is also highly relevant for students who are interested in advancing their career goals but may not have adequate time available to undertake a graduate degree program.

All courses are also offered online, allowing students to participate in class without having to travel to campus. Further information can be found with Mason Online (http://masononline.gmu.edu/).

The certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions
University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants should hold a BA or BS degree in a discipline related to biological or computer science from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, with a minimum GPA of 3.00. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, or statistics, and should also possess working knowledge of a computer programming language. To apply, prospective students should complete a George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply two copies of official transcripts from each college and graduate institution attended, and a current résumé. TOEFL scores are required of all international applicants.

Policies

For policies governing all graduate certificate programs, see AP.6 Graduate Policies.

Premium Tuition

The certificate is a professional certification program that charges students at a differential (premium) tuition rate, with an additional $100 per credit added to the standard George Mason University graduate tuition rate for students who enroll in this certificate program, regardless of in-state or out-of-state status. The differential tuition is used to fund continuing improvements in the College of Science's (COS) educational facilities used to support the certificate program.

Students may not pursue this certificate concurrently with any other graduate degree program or certificate program offered by COS. In addition, students may not apply previous credit hours from another certificate, degree, or non-degree studies to this certificate program because of the differential (premium) tuition rate.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

In the field of bioinformatics and computational biology, specialists collect, store, analyze and present complex biological data. Through this work, critical contributions are made to basic biology, disease detection, drug design, modeling biosystems, forensics, agriculture, and environmental sciences through the combination of biological analysis and high-performance computing. This degree addresses the growing national and regional demand for trained computational biologists. It combines a solid foundation in biotechnology with the computational skills required for bioinformatics. The flexibility of the degree structure permits students to custom design their curriculum under an advisor's guidance, making the program especially relevant for students employed in today's diverse biotechnology workplace. Students completing the program are qualified to pursue careers that require knowledge of current bioinformatics methods and applications, and the ability to develop and/or use new bioinformatics software.

Courses are generally offered in the late afternoon or early evening to accommodate students with full-time employment outside the university. Students employed at area biotechnology organizations may take up to 6 credits (out of 31) for bioinformatics work done on the job, under the guidance of a faculty member. This work-related project may be applied as either a 3-credit research project or a 6-credit master's thesis.

All courses are also offered online, allowing students to participate in class without having to travel to campus. Further information can be found on with Mason Online (http://masononline.gmu.edu/).

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Applicants should have a bachelor's degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

Application Requirements

To apply, prospective students should complete a George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and official scores obtained on the GRE general exam. The GRE requirement will be waived if the student holds a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. TOEFL scores are required for all international applicants.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Website: science.gmu.edu/academics/departments-units/systems-biology

In the field of bioinformatics and computational biology, specialists collect, store, analyze, and present complex biological data. Through this work, critical contributions are made to disease detection, drug design, forensics, agriculture, and environmental sciences through the combination of biological analysis and high-performance computing. The main objective of this doctorate is to educate the next generation of computational biologists for careers in academia, industry, and government. The program provides students with interdisciplinary academic training that includes fundamental bioscience courses as well as core and advanced courses in bioinformatics. Courses are designed to be completed in approximately two years. Completion of coursework, the comprehensive exam, and a successful dissertation proposal results in advancement to candidacy status. In the final phase, students focus on research that culminates in a dissertation.

The program is structured to be accessible for full and part-time students. Many of the courses are offered in a distance-learning format, allowing students to participate in class without having to travel to campus; visit Mason Online (http://masononline.gmu.edu/) for details.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Applicants should have a bachelor's degree in biology, computer science, or a related field, with a minimum GPA of 3.25 in the last earned degree. Applicants should have taken courses in molecular biology, cell biology, biochemistry, genetics, calculus, physical chemistry, computer programming and data structures, and probability and statistics. Students with deficiencies in one or more of these areas may be admitted

provisionally and required to take additional courses, some of which may not be applicable to the degree's course total. Students whose undergraduate record does not include basic biochemistry will be required to take a basic course prior to BINF 701 Systems Biology.

Application Requirements

To apply, prospective students should submit the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), two copies of official transcripts from each college and graduate institution attended, a current résumé, and an expanded goals statement. Applicants should also include three letters of recommendation and an official report of scores obtained on the GRE general exam. Scores should be in the 45th percentile or above. The GRE requirement for admission to the doctoral program will be waived if the student holds a master's degree from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. TOEFL or IELTS scores are required of all international applicants.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program director and the college's associate dean for student affairs. See AP.6.5.2 Reduction of Credits for more information.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

BINF 704	Colloquium in Bioinformatics (taken three times)	
Total Credits		48-60

Doctoral Committee and Advancement to Candidacy

By the end of the semester when coursework is completed, the student must form a doctoral committee made up of a minimum of three graduate faculty members and take a written comprehensive exam. The exam includes written and oral components. Upon passing the comprehensive exam and submitting an acceptable dissertation proposal, the student is advanced to doctoral candidacy to begin the dissertation writing phase.

Dissertation Research

A minimum of 12 and maximum of 24 combined credits from BINF 998 Doctoral Dissertation Proposal and BINF 999 Doctoral Dissertation may be applied toward satisfying doctoral degree requirements. Students must take at least 3 credits of BINF 999 Doctoral Dissertation.

Code	Title	Credits
Select 12-24 credits from the following:		12-24
BINF 998	Doctoral Dissertation Proposal	
BINF 999	Doctoral Dissertation	
Total Credits		12-24

Doctoral Dissertation

After advancing to doctoral candidacy, students work on their doctoral dissertation while enrolled in BINF 999 Doctoral Dissertation. The dissertation should represent a significant contribution that is suitable for publication in a refereed scientific journal. The dissertation must be defended in a public forum before the dissertation committee and other interested faculty.

Bioinformatics Management, MS

This degree addresses the regional and national need for technically trained managers who will be able to lead teams of bioinformaticians in both the public and private sectors. The degree combines a solid foundation in bioinformatics research, tools, and techniques, with the management skills needed to address the associated legal, ethical, managerial, and business issues. The degree is intended for:

- Students seeking advancement in their current bioinformatics careers that requires an advanced degree in bioinformatics combined with management expertise.
- Students with a general background in biological science or computational methods who are planning to enter the field of

bioinformatics as managers and would like to strengthen their bioinformatics and managerial expertise.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Eligibility

Applicants should have a bachelor's degree in biology, computer science, or a related field, with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

Application Requirements

Website: science.gmu.edu/academics/departments-units/systems-biology

This Professional Science Master's (https://www.professionalsciencemasters.org/) (PSM) degree addresses the growing demand for trained bioinformatics professionals with solid management skills able to assume leadership roles in biotechnology, pharmaceutical and health care sectors. The flexible degree structure

allows students to custom design a curriculum that best suits their needs and allows a focus on the biological big data analysis, genomics, or bioinformatics software development and management. Students will receive advanced training in bioinformatics and management through coursework and an external internship. The curriculum was developed with active input from the Program Advisory Board consisting of recognized leaders in the field. Many courses are offered in a distance-learning format, allowing students to participate in class without having to travel to campus.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Applicants should have a bachelor's degree in biology, computer science, or a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent with a GPA of at least 3.00 in their last 60 credits of study. Applicants should have taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum. To apply, prospective students should submit the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), supply an official transcript from each college and graduate institution attended, a current résumé, three letters of recommendation, and an expanded goals statement. TOEFL or IELTS scores are required of all international applicants.

The GRE is not required for admission into this program.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 31

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Due to the varied course options and their associated prerequisites, students are encouraged to create a program of study with their faculty advisor by the end of their first semester of studies.

Bioinformatics Courses

Code	Title	Credits
BINF 630	Bioinformatics Methods	3
BINF 631	Molecular Cell Biology for Bioinformatics	3
BINF 702	Biological Data Analysis	3
Select two from the following or other BINF-prefixed courses in consultation with the faculty advisor:		6
BINF 633	Molecular Biotechnology	
BINF 634	Bioinformatics Programming	
BINF 650	Introduction to Bioinformatics Database Design	
BINF 731	Protein Structure Analysis	
BINF 732	Genomics	
BINF 740	Introduction to Biophysics	
Total Credits		15

Professional Skills Courses

Please note: MBA-prefixed courses are offered on an alternative semester schedule (view the Schedule of Classes (https://patriotweb.gmu.edu/pls/prod/bwckschd.p_disp_dyn_sched/) for details). Considering this, it may be advisable to take these courses in one semester rather than over several.

Code	Title	Credits
BINF 705	Research Ethics	1
MBA 712	Project Management	3
Select one course from the following that hasn't previously been taken:		3
BIOL 508	Selected Topics in Animal Biology [1]

Total Credits		7

[1] When the topic is Research & Development in Biotechnology Companies.

Scientific Electives

Close attention should be paid to each course's prerequisites.

Code	Title	Credits
Select 6 credits in courses that haven't previously been taken, tailored to suit interests and goals in consultation with the faculty advisor.		6
Big Data Analysis:		
CSI 695	Scientific Databases	
AIT 580	Analytics: Big Data to Information	
AIT 581	Problem Formation and Solving in Big Data	
AIT 622	Determining Needs for Complex Big Data Systems	
Synthetic and Systems Biology:		
BIOS 701	Systems Biology	
CHEM 665	Protein-Protein Interactions: Methods and Applications	
Human Health and Personal Genomics:		
BINF 732	Genomics	
BIOL 562	Personalized Medicine	
BIOL 566	Cancer Genomics	
BIOL 665	Environmental Hazards to Human Health	
BIOS 740	Laboratory Methods in Functional Genomics and Biotechnology	
BIOS 741	Genomics	
Software Development and Analysis:		
BINF 634	Bioinformatics Programming	
SWE 510	Object-Oriented Programming in Java	
SWE 619	Object-Oriented Software Specification and Construction	
SWE 621	Software Design and Architecture	
SWE 626	Software Project Laboratory	
SWE 637	Software Testing	
SWE 645	Component-Based Software Development	
SWE 760	Software Analysis and Design of Real-Time Systems	
Colloquium: [1]		
BINF 704	Colloquium in Bioinformatics (may be repeated for up to 3 credits)	
Additional Internship Experience [2]		
BINF 795	Bioinformatics Internship	
Total Credits		6

1 If chosen, it is recommended that students take the colloquium course early in their studies so that they may be exposed to various possibilities and areas of research presented by the speakers.

2 The maximum amount of internship credits that can be applied to the degree is 6 credits.

Internship

The internship component is intended to provide students with the opportunity to put into practice all of the skills and knowledge accumulated throughout their studies in this program. Students must arrange an internship with a private company, a governmental agency, a non-governmental organization, or some other entity with an interest in bioinformatics *and* management. Students must identify a specific person within that outside entity who will be the contact and manager of the internship.

Internship credit is never given for work previously done, or for work that would have been done in any case due to an existing employment relationship.

The internship work must produce one or more products such as: a comprehensive report, a departmental presentation, a research project, or an article. Internship placement and product type must be approved by the student's faculty advisor.

Further details and procedures for completing the internship can be found with the faculty advisor.

Code	Title	Credits
Three credits of internship		3
BINF 795	Bioinformatics Internship	
Total Credits		3

Accelerated Master's

Bachelor's Degree (selected), Bioinformatics Management, Accelerated PSM

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/), or the Chemistry, BS, or the Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/), or the Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/), or the Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/) and the Bioinformatics Management, PSM (https://catalog.gmu.edu/colleges-schools/science/systems-biology/bioinformatics-management-professional-science-masters/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate

study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students in the Biology, BS (https://catalog.gmu.edu/colleges-schools/science/biology/biology-bs/); Chemistry, BS (https://catalog.gmu.edu/colleges-schools/science/chemistry-biochemistry/chemistry-bs/); Computational and Data Sciences, BS (https://catalog.gmu.edu/colleges-schools/science/computational-data-sciences/computational-data-sciences-bs/); Neuroscience, BS (https://catalog.gmu.edu/colleges-schools/science/neuroscience-program/neuroscience-bs/); or Physics, BS (https://catalog.gmu.edu/colleges-schools/science/physics-astronomy/physics-bs/) with an overall GPA of at least 3.00 in their last 60 credits are welcome to apply to the Bioinformatics Management, PSM accelerated master's program. Applicants to this accelerated master's should have previously taken courses in molecular biology, computer science, calculus, physical chemistry, and statistics. Students with deficiencies in one or more of these areas may be required to take additional courses from the undergraduate curriculum.

The GRE requirement is waived for students accepted into this accelerated program.

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
BINF 630	Bioinformatics Methods	3
BINF 631	Molecular Cell Biology for Bioinformatics	3
BINF 702	Biological Data Analysis	3
GBUS 738	Data Mining for Business Analytics	3
or MBA 738	Data Mining for Business Analytics

This program provides advanced training for college graduates or professionals seeking careers in the biomedical research, biotechnology, neuroscience or biodefense, as well as evolutionary and animal biology, animal biology and biology teaching. Master's level concentrations are available in microbiology and infectious disease, molecular biology, neuroscience, evolutionary biology, and translational and clinical research. Alternatively, students may choose the program in general biological sciences, which allows flexibility to build a degree program tailored to a specific research or career interest.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

While each applicant's qualifications are reviewed as a whole, the following are required: Applicants to the program must have a bachelor's degree in biology or other relevant fields from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent. Additionally, all MS concentrations require a GPA of 3.00 in biology coursework or in the last 60 credits of undergraduate study. Students must also submit three letters of recommendation and scores on the GRE general exam. GRE is waived for those with previous MS degree in any field, with graduate-level certificate or at least 9 credits of relevant non-degree studies. Previous research experience or relevant employment is a plus. Admission is contingent on acceptance by a faculty research advisor.

Evolutionary Biology (EB) Concentration

Students who choose the Evolutionary Biology concentration must also submit a personal statement/statement of interest consistent with at least one faculty member's research program.

Microbiology and Infectious Disease (MID) Concentration

Students who choose the Microbiology and Infectious Disease concentration must have a lecture and lab course in microbiology and a lecture course in biochemistry.

Translational and Clinical Research (TCR) Concentration

Students who choose the Translational and Clinical Research concentration may submit MCAT scores in place of GRE general exam scores.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 30

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Candidates for the Biology, MS must complete the Core Courses and may choose one concentration or the MS without concentration requirements, detailed below, for a total of 30 credits (minimum).

Program of Study

The faculty advisor and the student work together to develop a program of study that best fits the student's background and interests. The student must submit a program of study to the program director for approval within the first 12 credits of coursework. By the end of the second semester of coursework, students will form a graduate committee made up of three faculty members. At least two committee members must be faculty in the School of Systems Biology.

Students must complete all core courses and choose one concentration option:

Core Courses

Code	Title	Credits
Cell and Molecular Requirement		**3**
BIOL 682	Advanced Eukaryotic Cell Biology	
or BIOS 744	Molecular Genetics	
Professional Methods Requirement		**4**
BIOL 690	Introduction to Graduate Studies in Biology	
Choose one from the following:		
BIOL 689	Interdisciplinary Tools in the Biosciences	
BIOL 691	Current Topics in Biology [1]	
or BIOS 702	Research Methods	
NEUR 702	Research Methods	
Seminar Requirement		**3**
Select a total of 3 credits from the following courses:		
BIOL 692	Seminar in Biology	
BIOL 695	Seminar in Molecular, Microbial, and Cellular Biology [2]	
Systems Biology/Evolution Requirement		**3**

BIOL 502	Adaptation in Biosystems	
Research Requirement		**2-6**
Students have the option to complete a 2-3 credit research project (BIOL 798 Master's Research Project) or a 3-5 credit master's thesis (BIOL 799 Thesis). In accordance with AP.6 Graduate Policies, the same quality of work is expected of students regardless of which option they choose.		
Research Project: The MS project is most appropriate for students who have scheduling commitments, such as a full-time job, that may preclude performing a complete series of laboratory experiments. Students pursuing the project option must successfully complete written and oral comprehensive exams. Additionally, students should present their research orally or as a poster to a community outside of the classroom, at Mason conferences or at external conferences.		
Thesis: In general, the MS thesis is most appropriate for students planning or considering a research career. Students pursuing the thesis option must write a formal thesis that meets the requirements of the school and must defend their thesis and present their results in a public seminar.		
Select a Research Project or a Master's Thesis		
BIOL 798	Master's Research Project (2-3 credits)	
BIOL 799	Thesis (3-5 credits)	
Total Credits		15-19

1 When the topic is "Research Methods," or "Creativity and Innovation".

2 May be taken up to six times in this program under different topics.

MS without Concentration

Code	Title	Credits
General Coursework		**12**
In consultation with an advisor, select at least 12 credits of graduate coursework from BIOL, BIOS, BMED, or NEUR-prefixed courses. Suggestions include:		
BIOL 508	Selected Topics in Animal Biology [1]	
BIOL 553	Advanced Topics in Immunology	
BIOL 566	Cancer Genomics	
BIOL 568	Advanced Topics in Molecular Genetics	
BIOL 575	Selected Topics in Genetics	
BIOL 579	Molecular Evolution and Conservation Genetics	
BIOL 583	General Biochemistry	
BIOL 585	Eukaryotic Cell Biology Laboratory	
BIOL 693	Directed Studies in Biology [2]	
or BINF 795	Bioinformatics Internship	
BIOL 793	Research in Biology	
BIOS 740	Laboratory Methods in Functional Genomics and Biotechnology	
BIOS 741	Genomics	
BIOS 742	Biotechnology	
BIOS 743	Genomics, Proteomics, and Bioinformatics	
BIOS 744	Molecular Genetics	
BIOS 767	Molecular Evolution	
Total Credits:		**30**

1 Suggested section topics: "Research and Development in a Biotechnology Company," or "Biology of Obesity and Weight Loss". Other relevant topics may only be applied toward the degree with advisor approval.

2
- No more than 3 credits of directed study or internship can be applied.
- Topics should be relevant and approved by the program director.

Concentration in Evolutionary Biology (EB)

Code	Title	Credits
Populations and Species		**3-6**
Select 3-6 credits from the following:		
BIOL 574	Population Genetics	
BIOL 579	Molecular Evolution and Conservation Genetics	
or BIOS 767	Molecular Evolution	
BIOL 648	Population Ecology	
Organismal Biology		**3-6**
Select 3-6 credits from the following:		
BIOL 501	Microbial Diversity: An Organismal Approach	
BIOL 507	Selected Topics in Ecology	
BIOL 508	Selected Topics in Animal Biology	
BIOL 518	Conservation Biology	
BIOL 532	Animal Behavior	
BIOL 533	Selected Topics in Plant Biology	
BIOL 537	Ornithology	
BIOL 538	Mammalogy	
BIOL 539	Herpetology	
BIOL 543	Tropical Ecosystems	
BIOL 559	Fungi and Ecosystems	
BIOL 566	Cancer Genomics	
BIOL 581	Estuarine and Coastal Ecology	
BIOL 582	Estuarine and Coastal Ecology Laboratory	
BIOL 643	Microbial Ecology	
EVPP 536	The Diversity of Fishes	
Molecular Techniques		**3-4**
Select 3-4 credits from the following:		
BIOL 693	Directed Studies in Biology [1]	
or BINF 795	Bioinformatics Internship	
BIOS 716	Methods in Evolutionary Biology	
EVPP 515	Molecular Environmental Biology I	
EVPP 615	Molecular Environmental Biology II	
Electives		**2-6**
If needed in order to reach a total of 30 credits, select from the following courses: [2]		
BIOL 583	General Biochemistry	
BIOL 693	Directed Studies in Biology [1]	
or BINF 795	Bioinformatics Internship	
BIOS 741	Genomics	

Any additional course listed in the Core Courses section	
Total Credits:	**30**

1
- No more than 3 credits of directed study or internship can be applied to this concentration.
- Topics should be relevant to the concentration and should be approved by the program director.

2 Other relevant graduate-level coursework may be selected in consultation with the advisor.

Concentration in Microbiology and Infectious Disease (MID)

Code	Title	Credits
Microbiology and Infectious Diseases		**12**
In consultation with an advisor, select 12 credits from the following:		
BINF 739	Topics in Bioinformatics [1]	
BIOL 553	Advanced Topics in Immunology	
BIOL 563	Virology	
BIOL 685	Emerging Infectious Diseases	
BIOL 693	Directed Studies in Biology [2]	
BIOL 669	Pathogenic Microbiology	
BIOL 715	Microbial Physiology	
Electives		**0-3**
If needed to reach a total of 30 credits, select from the following courses:		
BIOL 560	Infectious Diseases of Wildlife	
BIOL 564	Techniques in Virology	
BIOL 583	General Biochemistry	
BIOL 718	Techniques in Microbial Pathogenesis	
BIOS 742	Biotechnology	
Any additional course listed in the Core Courses section		
Total Credits:		**30**

1 When the topic is "Computational Analysis: Viral Genomes".

2
- No more than 3 credits of directed study can be applied to this concentration.
- Topics should be relevant to the concentration and should be approved by the program director.

Concentration in Molecular Biology (MOB)

Code	Title	Credits
Molecular Biology		**12**
In consultation with an advisor, select 12 credits from the following:		
BIOL 508	Selected Topics in Animal Biology [1]	
BIOL 568	Advanced Topics in Molecular Genetics	
BIOL 579	Molecular Evolution and Conservation Genetics	
or BIOS 767	Molecular Evolution	
BIOL 580	Computer Applications for the Life Sciences	
or BINF 630	Bioinformatics Methods	
BIOL 583	General Biochemistry	
BIOL 585	Eukaryotic Cell Biology Laboratory	
BIOL 678	Cell-Based Assays	
BIOL 693	Directed Studies in Biology [2]	
or BINF 795	Bioinformatics Internship	
BIOS 716	Methods in Evolutionary Biology	
BIOS 742	Biotechnology	
or BINF 633	Molecular Biotechnology	
NEUR 651	Molecular Neuropharmacology	
Electives		**0-3**
If needed to reach a total of 30 credits, select from the following courses:		
BINF 641	Biomolecular Modeling	
BIOL 693	Directed Studies in Biology [2]	
or BINF 795	Bioinformatics Internship	
BIOS 741	Genomics	
NEUR 592	Special Topics in Neuroscience [3]	
or NEUR 689	Topics in Neuroscience	
CHEM 564	General Biochemistry II	
CHEM 660	Protein Biochemistry	
Any additional course listed in the Core Courses section		
Total Credits:		**30**

1 When the topic is "Research and Development in a Biotechnology Company".

2
- No more than 3 credits of directed study or internship can be applied to this concentration.
- Topics should be relevant to the concentration and should be approved by the program director.

3 When the topic is "Glutamatergic Systems".

Concentration in Neuroscience (NEUR)

Code	Title	Credits
Statistics		**3**
Select 3 credits from the following:		
BINF 530	Introduction to Bioinformatics Methods	
BINF 630	Bioinformatics Methods	
BINF 702	Biological Data Analysis	
BIOL 691	Current Topics in Biology [1]	
STAT 535	Analysis of Experimental Data	
STAT 544	Applied Probability	
STAT 554	Applied Statistics I	
Neurobiology		**9**
In consultation with an advisor, select 9 credits from the following, at least 6 of which must be in NEUR-prefixed courses:		
BIOL 508	Selected Topics in Animal Biology [2]	
BIOL 568	Advanced Topics in Molecular Genetics [3]	
BIOL 693	Directed Studies in Biology [4]	
or BINF 795	Bioinformatics Internship	
NEUR 592	Special Topics in Neuroscience	
NEUR 601	Developmental Neuroscience	
NEUR 602	Cellular Neuroscience	
NEUR 603	Mammalian Neuroanatomy	
NEUR 612	Neuroethics	
NEUR 621	Synaptic Plasticity	

NEUR 634	Neural Modeling	
NEUR 651	Molecular Neuropharmacology	
NEUR 689	Topics in Neuroscience	
NEUR 701	Neuroscience Laboratory	
NEUR 709	Neuroscience Seminars	
NEUR 710	Special Topics in Neuroscience	
NEUR 734	Computational Neurobiology	
NEUR 741	Introduction to Neuroimaging	
Electives		**0-3**
If needed to reach a total of 30 credits, select from the following:		
BIOL 583	General Biochemistry	
BIOL 691	Current Topics in Biology [5]	
or BIOS 743	Genomics, Proteomics, and Bioinformatics	
BIOL 693	Directed Studies in Biology [4]	
or BINF 795	Bioinformatics Internship	
Any additional NEUR-prefixed course at the 500-700 levels		
Total Credits:		**30**

1 When the topic is "MATLAB for Brain, Biological, and Cognitive Scientists".

2 When the topic is "Biology of Obesity and Weight Loss".

3 When the topic is "Epigenetics".

4
- No more than 3 credits of directed study or internship can be applied to this concentration.
- Topics should be relevant to the concentration and should be approved by the program director.

5 When the topic is "Genomics, Proteomics, and Bioinformatics".

Concentration in Nutrition Genetics and Nutraceuticals (NGN)

Code	Title	Credits
Nutrition		**6**
In consultation with an advisor, choose 6 credits from the following:		
BIOL 508	Selected Topics in Animal Biology [1]	
NUTR 522	Nutrition Across the Lifespan	
NUTR 642	Macronutrients	
NUTR 670	Nutrition Research Methods	
Human Diseases		**6**
In consultation with an advisor, choose 6 credits from the following:		
BIOL 566	Cancer Genomics	
BIOL 666	Human Genetics Concepts for Health Care	
BIOS 743	Genomics, Proteomics, and Bioinformatics	
Electives		
If needed to reach a total of 30 credits, select from the following courses:		
BIOL 508	Selected Topics in Animal Biology [2]	
BIOL 562	Personalized Medicine	
BIOL 568	Advanced Topics in Molecular Genetics	
BIOL 583	General Biochemistry	
BIOL 693	Directed Studies in Biology [3]	
or BINF 795	Bioinformatics Internship	
CHEM 564	General Biochemistry II	
Any additional course listed in the Core Courses section		
Total Credits		**30**

1 When the topic is "Biology of Obesity and Weight Loss".

2 When the topic is "Research and Development in Biotechnology Companies".

3
- No more than 3 credits of directed study or internship can be applied to this concentration.
- Topics should be relevant to the concentration and should be approved by the program director.

Concentration in Translational and Clinical Research (TCR)

Code	Title	Credits
Translational and Clinical Research [1]		**12**
In consultation with an advisor, select 12 credits from the following:		
BIOL 508	Selected Topics in Animal Biology [2]	
BIOL 562	Personalized Medicine	
BIOL 566	Cancer Genomics	
BIOL 666	Human Genetics Concepts for Health Care	
BIOL 667	Signal Transduction in Cancer	
BIOL 691	Current Topics in Biology [3]	
or BIOS 743	Genomics, Proteomics, and Bioinformatics	
BIOL 693	Directed Studies in Biology [4]	
or BINF 795	Bioinformatics Internship	
BMED 603	Cell Biology and Microscopic Anatomy [5]	
BMED 604	Fundamentals of Human Physiology [5]	
BMED 605	Introduction to Human Anatomy [5]	
Electives		**0-3**
If needed to reach a total of 30 credits, select from the following courses:		
BIOL 508	Selected Topics in Animal Biology [6]	
BIOL 568	Advanced Topics in Molecular Genetics	
BIOL 583	General Biochemistry	
BIOL 693	Directed Studies in Biology [4]	
or BINF 795	Bioinformatics Internship	
BIOS 741	Genomics	
Any additional course listed in the Core Courses section		
Total Credits:		**30**

1
- For students concurrently enrolled in the Advanced Biomedical Sciences Graduate Certificate, contact your advisor for details regarding:
  - BMED course credit that may be counted towards this concentration
  - Meeting the requirements for graduate certificates and for master's degrees

2 When the topic is "Research and Development in a Biotechnology Company," or "Biology of Obesity and Weight Loss".

3 When the topic is "Genomics/Proteomics/Bioinformatics".

[4]
- No more than 3 credits of directed study or internship can be applied to this concentration.
- Topics should be relevant to the concentration and should be approved by the program director.

[5] Course is only available for students enrolled in the Advanced Biomedical Sciences Graduate Certificate (https://catalog.gmu.edu/colleges-schools/science/advanced-biomedical-sciences-graduate-certificate/).

[6] When the topic is "Research and Development in a Biotechnology Company".

Accelerated Master's

Biology, BS/Biology, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain both the Biology, BS and the Biology, MS degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

Three letters of recommendation, including one from a prospective thesis or project advisor, are required.

GRE scores are not required for students in this accelerated program.

Successful applicants will have an overall undergraduate GPA of at least 3.10. Additionally, they will have completed the following courses with a GPA of 3.00 or higher[2]:

Code	Title	Credits
BIOL 213	Cell Structure and Function (Mason Core)	4
BIOL 214	Biostatistics for Biology Majors	4
BIOL 300	BioDiversity [1]	4
or BIOL 311	General Genetics	
CHEM 313 & CHEM 315	Organic Chemistry I and Organic Chemistry Lab I [2]	5

[1] Students should speak with an advisor to choose the course most appropriate for their post-graduation goals.

[2] Grades of 2.50 in CHEM 313 Organic Chemistry I and CHEM 315 Organic Chemistry Lab I are acceptable for admission into this accelerated pathway.

Accelerated Option Requirements

After the completion of 60 undergraduate credits, students must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (http://registrar.gmu.edu/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/).

At the completion of 75 undergraduate credits, students may begin completing up to 12 credits of graduate coursework that will count toward their bachelor's and master's.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
BIOL 508	Selected Topics in Animal Biology (When the topic is "Research and Development in a Biotechnological Company")	1-4
BIOL 682	Advanced Eukaryotic Cell Biology	3
BIOL 689	Interdisciplinary Tools in the Biosciences	3
BIOL 690	Introduction to Graduate Studies in Biology	1-2
BIOL 695	Seminar in Molecular, Microbial, and Cellular Biology	1

Neuroscience, BS/Biology, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance

their education to obtain both the Neuroscience, BS and the Biology, MS (https://catalog.gmu.edu/colleges-schools/science/systems-biology/biology-ms/) degrees within an accelerated timeframe. Upon completion of this 138 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

Students should seek out the graduate program's advisor who will aid in choosing the appropriate graduate courses and help prepare the student for graduate studies.

GRE scores are not required for students in this accelerated program.

Students must obtain a graduate faculty advisor prior to beginning graduate coursework.

Successful applicants will have an overall undergraduate GPA of at least 3.10. Three letters of recommendation, including one from a prospective thesis or project advisor, are required. Additionally, they will have completed[2] the following courses with a GPA of 3.00[1] or higher:

Code	Title	Credits
BIOL 213	Cell Structure and Function (Mason Core)	4
One Course in Statistics:		3-4
BIOL 214	Biostatistics for Biology Majors	
or STAT 250	Introductory Statistics I (Mason Core)	
or PSYC 300	Statistics in Psychology	
or MATH 352	Statistics	
BIOL 311	General Genetics	4
CHEM 313 & CHEM 315	Organic Chemistry I and Organic Chemistry Lab I [1]	5
NEUR 327	Cellular, Neurophysiological, and Pharmacological Neuroscience [2]	3

[1] Grades of 2.50 in CHEM 313 Organic Chemistry I and CHEM 315 Organic Chemistry Lab I are acceptable for admission into this accelerated pathway.

[2] Registration in, as opposed to completion of, NEUR 327 Cellular, Neurophysiological, and Pharmacological Neuroscience is sufficient.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credit

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
BIOL 682	Advanced Eukaryotic Cell Biology	3
BIOL 689	Interdisciplinary Tools in the Biosciences	3
BIOL 690	Introduction to Graduate Studies in Biology	1-2
BIOL 695	Seminar in Molecular, Microbial, and Cellular Biology	1
NEUR 612	Neuroethics	3
NEUR 601	Developmental Neuroscience	3
NEUR 602	Cellular Neuroscience	3
NEUR 603	Mammalian Neuroanatomy	3
NEUR 634	Neural Modeling	3
NEUR 651	Molecular Neuropharmacology	3

Email: biologygrad@gmu.edu
Website: science.gmu.edu/academics/departments-units/systems-biology

This program is a research-oriented field of study that prepares students for significant contributions in academic or industrial settings. It is broken down into three concentrations: Cell and Molecular Biology, Microbiology and Infectious Disease, and Biocomplexity and Evolutionary Biology.

The academic component is a three-tiered structure. The first tier provides a set of core courses designed to advance research skills across all disciplines. The second tier comprises additional core courses and elective courses. The first two tiers are designed to be completed in approximately two years, including the comprehensive qualifying exam. Only on completion of these requirements, the qualifying exam, and a successful dissertation proposal can the students advance to candidacy status. The third tier focuses on research and culminates in a dissertation.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Application Requirements

The following are required of applicants to this program:

- Minimum 3.25 GPA in previous coursework with significant training in the biological sciences from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent.
- Three letters of recommendation from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities.
- Statement of purpose consistent with the research interests of at least one faculty member in the program.
- Scores on GRE general exam (required) and biology or biochemistry subject exam (recommended) taken within the past five years prior to date of application submission. The GRE exam is waived if applicants hold a master's degree from a fully-accredited U.S. university at the time of their application.
- A TOEFL score of 575 on the paper-based exam or 230 on the computer-based exam is required of international students.

An interview may also be required. Applications should be submitted by January 1st for fall admission. Under unusual circumstances, applications may be considered for spring admission if they are received by October 1st. Applications will be considered until positions are filled. Students are encouraged to meet application deadlines to be considered for scholarships and stipends.

Strong candidates who lack several prerequisites may be admitted to provisional status. Removal from provisional status and continuation in the program is contingent on earning a GPA of 3.25 in the program's fundamental courses, plus completion of missing prerequisites.

Students who have not taken a course in basic biochemistry will be required to complete one prior to BIOS 701 Systems Biology.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Reduction of Credits

For students entering the doctoral program with a master's degree in a related field from an institution of higher education accredited by a Mason-recognized U.S. institutional accrediting agency or international equivalent, the number of required credits may be reduced up to 30 credits, subject to approval of the program faculty and the college's associate dean for student affairs.

Transfer of Credit

Graduate credits taken previously and not used toward another degree may be transferred, subject to the approval of the advisor, the program director, and the associate dean. See AP.6.5 Credit by Exam, Reduction or Transfer for more information.

Requirements

Degree Requirements

Total credits: 72

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Students in the doctoral program are required to present two research papers at a meeting or conference any time before graduation.

Doctoral Coursework

Bioscience Core

Code	Title	Credits
BIOL 682	Advanced Eukaryotic Cell Biology	3
Six credits or two instances of		6
BIOS 703	Laboratory Rotation	
Three credits of		3
BIOS 704	Topics in Biosciences	
Total Credits		12

Concentration in Cell and Molecular Biology (CMB)

This concentration prepares students for significant contributions in an academic or industrial research career. Coursework covers microarray analysis of gene expression, proteome analysis, sequencing and analysis of gene polymorphisms, gene and genome evolution, molecular studies of disease mechanisms, mechanisms of toxicology and mutagenesis, developmental neuroscience, and biotechnological applications.

Code	Title	Credits
Select 12 credits from the following:		12
BIOL 666	Human Genetics Concepts for Health Care	
BIOS 702	Research Methods	

BIOS 740	Laboratory Methods in Functional Genomics and Biotechnology	
BIOS 741	Genomics	
BIOS 742	Biotechnology	
BIOS 743	Genomics, Proteomics, and Bioinformatics	
BIOS 767	Molecular Evolution	
Total Credits		12

Concentration in Microbiology and Infectious Disease (MID)

Students in this concentration will be prepared for employment in academia, government, or industry. By stressing mechanisms of pathogenicity, physiology, metabolism, and genomic and proteomic analysis of pathogens, students will have a firm foundation for future research in infectious disease. Students will also be introduced to advanced laboratory practices, such as animal research methodologies and biocontainment laboratory work.

Code	Title	Credits
Select 12-13 credits from the following:		12-13
BIOL 553	Advanced Topics in Immunology	
BIOL 563	Virology	
BIOL 583	General Biochemistry	
BIOL 669	Pathogenic Microbiology	
BIOL 715	Microbial Physiology	
BIOS 702	Research Methods	
Total Credits		12-13

Concentration in Biocomplexity and Evolutionary Biology (BEB)

This concentration prepares students for careers in academia, government or industry. Through this concentration students will learn laboratory and quantitative skills that will enable them to investigate evolutionary relationships among organisms at the population, species or ecosystem level. Students will be encouraged to explore a wide range of coursework in order to develop a broad background in evolutionary biology and a deep knowledge of relevant methodologies necessary to keep abreast in this rapidly changing field.

The science of evolutionary biology is fundamentally concerned with documenting not only genetic change, but also the processes that cause it. Evolutionary biology includes paleobiology, population genetics, evolutionary ecology and phylogenetics. Biocompexity is the study of living organisms, including their unique structural, chemical and genetic properties, their distribution and abundance in nature, and their evolutionary relationships to all other organisms. Given the fact that most of the earth's biodiversity is unknown, collecting, cataloging and studying organisms have always been and will continue to be one of the most challenging aspects of biology.

Code	Title	Credits
Select 12 credits from the following:		12
BIOL 574	Population Genetics	
BIOL 585	Eukaryotic Cell Biology Laboratory	
BIOS 716	Methods in Evolutionary Biology	
BIOS 767	Molecular Evolution	
Total Credits		12

Electives

Code	Title	Credits
Select 23-36 credits from the following lists associated with the chosen concentration:		23-36
Cell and Molecular Biology & Microbiology and Infectious Disease Concentrations		
BIOL 564	Techniques in Virology	
BIOL 568	Advanced Topics in Molecular Genetics	
BIOL 579	Molecular Evolution and Conservation Genetics	
BIOL 580	Computer Applications for the Life Sciences	
BIOL 685	Emerging Infectious Diseases	
BIOL 718	Techniques in Microbial Pathogenesis	
BIOS 701	Systems Biology	
BIOS 702	Research Methods	
BIOS 710	Current Topics in Bioscience	
BIOS 740	Laboratory Methods in Functional Genomics and Biotechnology	
BIOS 741	Genomics	
BIOS 742	Biotechnology	
BIOS 743	Genomics, Proteomics, and Bioinformatics	
BIOS 744	Molecular Genetics	
BIOS 898	Directed Studies in Biosciences	
BIOS 899	Directed Research in Biosciences	
BINF 633	Molecular Biotechnology	
BINF 641	Biomolecular Modeling	
BINF 705	Research Ethics	
Biocomplexity and Evolutionary Biology Concentration [1]		
BIOL 506	Selected Topics in Microbiology	
BIOL 507	Selected Topics in Ecology	
BIOL 508	Selected Topics in Animal Biology	
BIOL 518	Conservation Biology	
BIOL 532	Animal Behavior	
BIOL 533	Selected Topics in Plant Biology	
BIOL 537	Ornithology	
BIOL 538	Mammalogy	
BIOL 539	Herpetology	
BIOL 543	Tropical Ecosystems	
BIOL 559	Fungi and Ecosystems	
BIOL 561	Comparative Animal Physiology	
BIOL 566	Cancer Genomics	
BIOL 572	Human Genetics	
BIOL 573	Developmental Genetics	
BIOL 643	Microbial Ecology	
BIOL 715	Microbial Physiology	
BIOS 741	Genomics	
BIOS 742	Biotechnology	

BIOS 743	Genomics, Proteomics, and Bioinformatics
BIOS 744	Molecular Genetics
BIOS 898	Directed Studies in Biosciences
BIOS 899	Directed Research in Biosciences
EVPP 536	The Diversity of Fishes
GEOL 501	Selected Topics in Modern Geology (may be repeated once)
GEOL 534	Vertebrate Paleontology
Total Credits	23-36

[1] Students may take other courses related to their research topic if approved by their committee. Courses in Geographic Information Systems or Statistics are encouraged.

Dissertation Committee

Upon admission to the program, each student is assigned an advisor from the bioscience faculty. The advisor may be changed by mutual consent of student and advisor, or petition to the program director and associate dean. With their advisor, students adopt an individual program that focuses on a specific area of research.

By the end of the fourth semester of coursework, students assemble a dissertation committee of four graduate faculty members with representation from at least two academic departments. The faculty advisor and the program director approve the program of study.

Qualifying Examination

On nearing completion of course requirements, students take a qualifying exam with a written and an oral component. At the discretion of the committee, the written qualifying exam may be retaken once if the student's performance was deemed below satisfaction.

Advancement to Candidacy

Upon successful completion of the qualifying exam, the majority of all coursework, and an accepted dissertation proposal, students will be recommended for advancement to candidacy by the committee and the program director.

The semester after advancement to candidacy, students are eligible to enroll in dissertation research (BIOS 999 Doctoral Dissertation Research). Students must review their progress on the dissertation with their graduate committee on a regular basis until graduation.

Dissertation Research

No more than 24 combined credits from BIOS 998 Doctoral Dissertation Proposal and BIOS 999 Doctoral Dissertation Research may be applied toward satisfying doctoral degree requirements. Students register for a minimum of 3 credits of BIOS 999 Doctoral Dissertation Research in the first semester of advancement.

Code	Title	Credits
Select 12-24 credits from the following:		12-24
BIOS 998	Doctoral Dissertation Proposal	
BIOS 999	Doctoral Dissertation Research	
Total Credits		12-24

Doctoral Dissertation

After advancing to doctoral candidacy, students work with their dissertation committee to develop their dissertation proposal into a completed doctoral dissertation. The dissertation research should represent a significant contribution that is publishable in a refereed scientific journal. When the dissertation is complete, students will present their results to their graduate committee and defend their dissertation in a public forum.

Personalized Medicine Graduate Certificate

Banner Code: SC-CERG-PRSM

Academic Advising

312 Colgan Hall
Science and Technology Campus

Phone: 703-993-8400
Email: biologygrad@gmu.edu
Website: science.gmu.edu/academics/departments-units/systems-biology

This certificate is based upon a set of core courses that currently support the Biology, MS; the Biosciences, PhD; the Bioinformatics and Computational Biology, MS; and the Bioinformatics and Computational Biology, PhD degree programs. Students completing this certificate will receive the most up-to-date advanced education available in the region. Completion of the certificate will enhance the careers of those students who are already working in this area, and can also serve as a useful intermediate step towards later enrollment in master's or doctoral programs.

Courses are generally offered in the late afternoon or in the evening to accommodate students with full-time employment outside of the university.

This certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

University-wide admissions policies can be found in the Graduate Admissions Policies section of this catalog.

To apply for this program, please complete the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/).

Prospective students should hold an undergraduate GPA of 3.00 or current employment in clinical or translational research, diagnostics lab, or biological data analysis field.

To be considered for admission, applicants must submit the George Mason University Admissions Application (https://www2.gmu.edu/admissions-aid/apply-now/), all undergraduate transcript(s), three letters of recommendation, and a statement of interest.

Policies

Students may not enroll initially in any College of Science master's or doctoral program and later transfer into this certificate program.

For policies governing all graduate programs, see AP.6 Graduate Policies.

Premium Tuition

This certificate charges students a differential tuition rate of $100 per credit hour, which is added to the standard graduate tuition rate (regardless of in or out of state status).

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Students should refer to the Admissions & Policies tab for specific policies related to this program.

Required Core Courses

Code	Title	Credits
Select 9 credits from the following:		9
BIOL 562	Personalized Medicine	
BIOL 566	Cancer Genomics	
BIOL 572	Human Genetics	
or BIOL 666	Human Genetics Concepts for Health Care	
BIOL 685	Emerging Infectious Diseases	
BIOS 743	Genomics, Proteomics, and Bioinformatics	
Total Credits		9

Electives

Code	Title	Credits
Select 6 credits from the following:		6
BIOL 506	Selected Topics in Microbiology	
BIOL 508	Selected Topics in Animal Biology	
BIOL 553	Advanced Topics in Immunology	
BIOL 566	Cancer Genomics	
BIOL 568	Advanced Topics in Molecular Genetics	
BIOL 575	Selected Topics in Genetics	
BIOL 583	General Biochemistry	
BIOL 669	Pathogenic Microbiology	
BIOL 682	Advanced Eukaryotic Cell Biology	
BIOL 685	Emerging Infectious Diseases	
BIOL 691	Current Topics in Biology [1]	
BIOL 695	Seminar in Molecular, Microbial, and Cellular Biology	
BIOS 701	Systems Biology	
BIOS 741	Genomics	
BINF 630	Bioinformatics Methods	
BINF 633	Molecular Biotechnology	
Up to 4 credits of BIOL 693 and/or BINF 796. [1]		
Total Credits		6

[1] Credit for these courses may only be applied toward the certificate's electives if the research topic is relevant to personalized or translational medicine.

College of Visual and Performing Arts

C211 College Hall
Fairfax Campus
MSN: 1H4

Phone: 703-993-8877
Website: cvpa.gmu.edu

Administration

- Rick Davis, Dean
- Lisa C. Kahn, Associate Dean for Research and Graduate Studies
- John Wilkin, Director Finance and Administration, CFO
- Julie Thompson, Executive Director, Center for the Arts

College Code: AR

The mission of the College of Visual and Performing Arts (CVPA) is to advance the study, creation, performance, exhibition, and management of the arts, acting on the strong belief in their transformative influence on individuals and civilizations. Fusing the academic and the professional, the campus and the community, the past and the present, CVPA seeks to engage new art forms, populations, and ways of working to meet the needs of a changing world both inside and beyond the walls of the university. The College strives to ensure that Mason's entire student population has the opportunity to experience and study the arts as a key component of a well-rounded liberal education.

Studying the arts goes hand in hand with creation, performance, and management. Each major features strong academic preparation in the history and theory of the art form in support of discipline-based technique courses. The college's faculty of practicing artist-teachers-managers works closely with students in a variety of curricular and co-curricular creative projects. Once basic techniques are established, students are encouraged to stretch, grow, and experiment within this supportive environment, enhancing their experience as working artists and arts managers while enriching the cultural life of the campus community.

An education in the arts is deepened by regular contact with the work of distinguished visiting artists. The college is home to the Center for the Arts (http://cfa.gmu.edu/) on the Fairfax campus and the Hylton Performing Arts Center (https://hyltoncenter.org/) on the Science and Technology campus, both of which present diverse programs of cultural experiences for the entire university community, as well as Northern Virginia and the greater Washington, D.C., area. Artists from across the country and around the world regularly perform, give master classes, work with students during extended residencies, and interact with the community in a variety of other ways. The accessibility and vitality of the Concert Hall, Hylton Center, TheaterSpace, the Gillespie Gallery of Art, Johnson Center Cinema, Harris Theater, and other campus and regional venues provide an unparalleled educational experience in the arts.

Requirements & Policies

General Academic Policies

The requirements for each academic program offered by the college are described in the sections below. Students are ultimately responsible for their academic progress towards their degrees. All students are subject to the university's general academic policies in addition to those specific to each academic unit.

Accommodations for Disabled Students

Students with documented disabilities should contact the Office of Disability Services (http://ods.gmu.edu) (Student Union I, Room 222; 703-993-2474) to open a file and learn more about accommodations that may be available to them.

Auditing

Students who wish to audit a course must obtain written permission from the instructor before registering for the class. Students do not receive grades or credit for audited courses. A student who audits a course does so for the purposes of self-enrichment and academic exploration and is not required to actively participate in class assignments, presentations, or exams. The course is offered **only** on a space-available basis with the approval of the instructor. It is expected that auditing students will respect all class rules and practices.

The Course Audit Form can be found on the Registrar's website (http://registrar.gmu.edu). The form must be submitted to the Office of the University Registrar by the last day to drop the course.

Note: A previously audited course may be taken again for credit in a later term. Students may also audit a course previously taken and passed; however, students may not change from credit to audit status nor from audit to credit status after the end of the drop period, as defined above. The usual tuition and fees apply to audit status.

Auditing Courses under the Senior Citizen Waiver Program

Under terms of the Senior Citizen Higher Education Act of 1974, eligible Virginia residents (requires legal domicile for one year) that are 60 years of age or older are entitled to enroll to audit (no academic credit received) up to three academic credit courses per semester and pay no tuition or fees, except fees established for the purpose of paying for course materials or laboratory fees.

For more information on policies and procedures, please refer to the Registrar's website (https://registrar.gmu.edu/topics/senior-citizen-waiver/).

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/ department/ program and other administrative units, and check it regularly for important information.

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. Instructors do not have the authority to add students to courses. All students should verify the accuracy of their enrollment before the end of the add and drop periods.

Questions about Academic Policies

Students with questions regarding exceptions to academic policies should contact the CVPA Academic Affairs Office (College Hall, C200; 703-993-4551).

Undergraduate Policies and Information

Degree Programs

The undergraduate degree consists of coursework in the Mason Core, a major area of study, and electives. To earn a bachelor's degree, students must complete a minimum of 120 credits, of which at least 45 must be upper level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated "writing intensive."

Academic Course Load

Undergraduate students earning degrees in CVPA may register for 18 credits per fall and spring semester without the dean's permission. Students are advised that they will be required to pay additional tuition beyond the 15-credit, university full-time academic load. Students should be cognizant of the time commitment when they register for their courses, especially if they register for high numbers of credits. Students are urged to consult with their academic advisor regularly and familiarize themselves with Mason guidelines for work and academic load. Students are reminded that employment must not take priority over coursework.

Advising

Students are assigned academic advisors and are strongly encouraged to meet with them at least once per semester, and particularly when they achieve 75 credits or are two semesters before expected graduation. Undeclared CVPA students and undergraduate students in academic difficulty (cumulative GPA under 2.00) are required to see an advisor prior to registration for the semester following registration restriction.

Minimum Cumulative GPA in Major

Undergraduate students earning CVPA degrees must earn a minimum 2.00 cumulative GPA in their major, or higher if required by their program.

Foreign Language Requirement

Some degrees within CVPA require intermediate-level proficiency in one foreign language or the completion of a minor, double major or double degree. The foreign language requirement may be fulfilled by completing a course in a foreign language numbered 202, 209, or 210 (or higher level courses taught in the language) or achieving a satisfactory score on an approved proficiency test. International students should consult the CVPA Academic Affairs Office about a possible waiver of this requirement.

Leave of Absence

All undergraduate students who are planning an absence from George Mason must submit a formal request for Leave of Absence to the Office of the University Registrar. Students do not need to complete the Leave of Absence form if they are participating in a George Mason University sponsored study abroad program or have received permission to study elsewhere. The maximum time allowed for a Leave of Absence is four semesters. A new application for admission to the university will be required if a student is away for more than 2 academic years OR a Leave of Absence form was not submitted. Re-admission is not guaranteed. See AP.1.8 Undergraduate Leave of Absence for full university policy.

Mason Core Program

The baccalaureate degree requires students to take a range of courses that provide a broad knowledge of the world, develop the ability to think both conceptually and critically, acquaint them with many different methods of inquiry, and provide the skills to continue intellectual growth throughout their lives. Students select from a range of courses outlined in the Mason Core section. Students accepted into the Honors College fulfill some/all of their Mason Core requirements with completion of that program of study. Students are strongly advised to consult the University Mason Core page.

Minors

Some degrees within CVPA require a minor or intermediate-level proficiency in one foreign language. University policy states that as part of their minor, students must earn 8 distinct credits that are not used to fulfill requirements for their major. Some programs have more specific criteria for applying credits to a minor.

RECR courses

Any 100-level RECR courses incorporating dance, offered by the College of Education and Human Development, cannot be counted toward credits required for a degree in CVPA. Students may take non-dance RECR courses for elective credit for CVPA degrees.

Prerequisites

Undergraduate students must earn a C or better in prerequisite courses to proceed to the next course.

Study Elsewhere

Students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education) may take up to 12 hours of coursework in CVPA disciplines at another institution. A student may seek permission for additional hours beyond these limits for summer registration if his/her permanent residence is more than 50 miles from the George Mason University Fairfax campus. Students must obtain advance, written approval from the student's dean and the course dean's office. Students who enroll elsewhere without advance written permission while enrolled at Mason will not receive transfer credit for the coursework taken at another institution unless they re-apply for admission to Mason as transfer applicants and meet all priority deadlines. Re-admission is not guaranteed, and transfer credit is awarded based upon course equivalences in effect at the time of re-admission. Freshmen and transfer students in their first semester at Mason are not permitted to study elsewhere. Courses previously attempted at Mason (including withdrawals) cannot be taken elsewhere. Schools and Colleges have study elsewhere criteria for courses in their disciplines in addition to University policy. Students must be in good standing with a minimum cumulative GPA of 2.00 in their Mason courses. See AP.1.4.2 Permission to Study Elsewhere for additional information.

Transfer of Credit

Transfer students must resolve transfer credit issues within the first academic year of enrollment.

Undergraduate students may transfer a maximum of 18 credits earned in non-degree status at Mason.

Withdrawals

Students are responsible for all courses in which they remain officially enrolled once the drop period has ended.

Undergraduates enrolled in degree programs are eligible to withdraw from three classes through the ninth week (of a fifteen week semester) without dean's approval and at the student's own discretion during their entire undergraduate career at Mason. See AP.1.5.1 Selective Withdrawal for Undergraduates for further details.

Instructors do not have the authority to withdraw students from classes. Withdrawals other than Selective Withdrawals require the approval of the academic dean and are typically allowed only for full semesters at a time (all enrolled courses) and are only permitted for non-academic reasons. No withdrawals can be approved to avoid an unsatisfactory grade. When submitting a withdrawal request, students must provide original, verifiable, third-party documentation for the reason for the withdrawal. Requests for withdrawals should be submitted as early in the semester as possible, and never after the last day of classes.

Graduate Policies and Information

For items not listed below, please refer to the university's policies: AP.6 Graduate Policies.

Admissions

CVPA follows university policies for graduate admissions. Some programs ask for additional admissions requirements. Please refer to the program for a listing of all requirements.

All applicants, regardless of admission or not, will have their decision uploaded through their self-service center. Applicants will be notified that their decision is ready for their review via email to the address they provided at the point of application. Applicants will not be told decisions over the phone or in-person. Applicants who do not meet our minimum requirements (e.g., GPA, test scores, pre-screening requirements, portfolio requirements) may be issued a denial decision before their application is completed.

The College of Visual and Performing Arts does not offer an appeal process for admissions decisions. Applicants are welcome to file a new application for a future semester.

Graduate Programs

CVPA's graduate programs offer highly focused study designed to prepare students for professional work in the arts and education. The requirements for each graduate degree are described under the program's catalog entry.

Transfer of Credit

Graduate credit earned prior to admission to a certificate, master's, or doctoral program may be eligible to be transferred and applied to a CVPA graduate program, certificate or doctoral degree. Please see AP.6.5.3 Transfer of Credit for more detailed information about the requirements.

Appeals Process

Appeals of Academic Procedures

See Appeals of Academic Procedures for University Policies.

CVPA Procedures for Grade Appeal

Although faculty members are generally the best judges of student performance in their classes, circumstances may cause a student to

believe that a professor has made an unfair grade decision. Therefore, a Grade Appeal process has been established to ensure a fair hearing in such cases. Grade appeals are not accepted after the last day of classes for the following semester, as indicated in the Schedule of Classes (spring for fall grades, fall for spring and summer grades). The process for initiating and resolving a Grade Appeal is as follows:

1. The first step to resolve differences between an instructor and student concerning a grade should be a discussion with the instructor; this meeting should occur within two weeks of the student's written request for a meeting; if the instructor is no longer affiliated with the University, the appeal is made to the Program Director.
2. If the instructor and student cannot resolve the issue, and the student wishes to pursue the matter further, he or she must present to the Program Director, a written appeal including the following: A description of the outcome of the informal discussion process. Any relevant documents the student would like to have reviewed as part of the appeal process. A copy of the course syllabus and assignment descriptions. Failing a satisfactory resolution, the student may appeal the grade by submitting a written appeal to the CVPA Academic Affairs Office. Undergraduate students will submit their request to the assistant dean; graduate students will submit their requests to the associate dean in the CVPA Academic Affairs Office.

The decision of the CVPA Assistant or Associate Dean is final.

CVPA Procedure for Non-Academic Appeals or Grievance

A student who intends to file a non-academic appeal, or intends to file a grievance against a faculty member, another student, or administrator undertakes the following steps:

1. The student meets with the professor and Program Director to discuss the non-academic appeal/grievance; this meeting should occur within two weeks of the student's written request for a meeting; if the person is no longer affiliated with the University, the request is made to the Department or Program Director only.
2. The professor (Program Director) responds to the student within three days of the meeting.
3. If the student wishes to continue the non-academic appeal/grievance, the student must submit a written explanation to Academic Affairs Office. The Associate Dean reviews all non-academic appeals and grievances, and has the final decision for the college
4. The student may follow additional University appeal procedures outlines in Appeals of Academic Procedures.

Academic Termination from an Undergraduate Program

Termination from a major may be imposed as a result of excessive repeating of required courses without achieving the minimum standard, and for other evidence of continued failure to make adequate progress toward completion of the major. Some programs have specific criteria for termination from the major. See the program and AP.5.2.4 Termination from the Major.

Academic Dismissal from an Undergraduate Program

A third suspension results in academic dismissal from the university. See AP.5.2.6 Academic Dismissal for details.

Academic Dismissal from a Graduate Program

The Office of the University Registrar contacts students via e-mail if they have earned an academic warning, or dismissal. Students wishing to appeal should contact the CVPA Graduate Programs Office within three days of the e-mail date. A deadline for the appeal documentation is determined, normally two weeks. Students are to submit:

1. A written statement explaining the circumstances that led to the dismissal, along with supporting documentation from employers, physicians, or other sources as necessary;
2. Evidence that the circumstances precipitating the unsatisfactory academic performance have been remedied;
3. Statement from department and program's graduate coordinator supporting the student's continued enrollment at the University.

Upon receipt of the above,

1. The Associate Dean of Academic Affairs reviews the appeal.
2. The final decision of the Associate Dean is forwarded to the student and the Office of the University Registrar.
3. The student may follow University appeal procedures outlined in Appeals of Academic Procedures.

For these, and any other academic concerns, students are encouraged to contact George Mason University's Ombudsman for Student Academic Affairs. The ombudsman is a neutral, independent, informal, and confidential party who provides assistance to students in resolving university-related concerns. The ombudsman is an advocate for fairness and the equitable treatment of students, operates independently of all formal grievance processes at the university, and considers all sides of an issue in an impartial and objective manner. The ombudsman has no authority to make exceptions or to grant requests but can perform informal investigations and, as a result, may recommend actions that lead to changes in processes and policies at the university. Meetings with the ombudsman are confidential. The ombudsman serves all undergraduate and graduate students at the university.

Academic Units

Programs

- Visual and Performing Arts, MFA

Visual and Performing Arts, MFA

Banner Code: AR-MFA-VPA

Phone: 703-993-2196
Email: cvpaaff@gmu.edu

The MFA in Visual and Performing Arts is a terminal degree which prepares students as professional artists and scholars who can work

within their specialty and teach at the university level. Creative work and skill building are at the core of the study. The curriculum is designed for serious and talented students who are prepared to examine modes of creative inquiry in an inclusive, unique environment that promotes exploration, analysis, synthesis, and development as artists.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified on the Graduate Admissions policy page (https://catalog.gmu.edu/admissions/graduate-policies/). Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Concentration in Dance

The MFA in Visual and Performing Arts, concentration in Dance, is a highly selective 60-credit program of study grounded in the modern dance genre that emphasizes mastery in performance, choreography, and teaching in higher education. Applicants must have significant (5 years or more) professional performance experience in modern or ballet at the national or international level. They must also demonstrate professional competence in choreography as exemplified by a significant body of work, and have experience teaching technique at the advanced level.

Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Concentration in Graphic Design

The MFA in Visual and Performing Arts, Graphic Design concentration, is a terminal degree that offers creative students a broad study of design as well as the development of skills for teaching at the university level. The 60-credit program includes courses in typography, web and motion design, user experience, and branding. Coursework in theoretical and historical design will supplement the studio experience. The broad range of study is intended to develop design educators and professionals, preparing them for the ever-evolving field of design. Admission is selective, ideal applicants should possess a BFA degree in graphic design and a significant design portfolio, reflecting professional achievement.

Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Concentration in Theater

The MFA in Visual and Performing Arts with a concentration in Theater is a highly selective program designed for theater artists with some professional experience who continue to work professionally during their course of study. Students are admitted to a specific emphasis: Acting, Design & Technology, or Directing. A program of study will be designed for each individual, based on their area of expertise, previous experience and professional goals.

Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Concentration in Visual Art

The MFA in Visual and Performing Arts with a concentration in Visual Arts is a highly selective 60 credit terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Coursework includes research in areas of study that include New Media, Painting and Drawing, Photography, Printmaking, Sculpture, and InterArts. Students have the opportunity to combine art forms in projects that may be installation, performance, publishing, time-based, or writing-based, and combine creative and critical approaches in their work.

Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Policies

Program Requirements

Candidates are required to complete 60 credits, of which 30 are made up from core requirements. An additional 30 credits are based on concentration area and comprehensive experience.

MFA concentrations include:

- Dance
- Graphic Design
- Theater
- Visual Art

While the faculty anticipate that students will work through their coursework as described in this catalog, individuals with extensive professional accomplishment may craft an individualized program that meets curricular requirements. Individualized programs require the recommendation of the Graduate Committee within the student's respective school as well as the approval of the CVPA Associate Dean.

Requirements

Degree Requirements

Total credits: 60

Students should complete all requirements within the concentration to which they have been admitted. Candidates are required to complete 60 credits, of which 30 are made up from core requirements. An additional 30 credits are based on concentration area and comprehensive experience.

Concentration in Dance (DANC)

The MFA in Visual and Performing Arts, concentration in Dance, is a highly selective 60-credit program of study grounded in the modern dance genre that emphasizes mastery in performance, choreography, and teaching in higher education.

Concentration in Visual Art (VART)

The MFA in Visual and Performing Arts, concentration in Visual Arts, is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Students select an emphasis in one of the following: New Media, Painting and Drawing, Photography, Printmaking, Sculpture, or InterArts. Students have the opportunity to combine art forms in projects that may be installation, performance, publishing, time-based, or writing-based, and combine creative and critical approaches in their work.

Core Requirements

Code	Title	Credits
Research Methods		
AVT 600	Research Methodologies	3
Graduate Seminar		
Six credits of		6
AVT 610	Graduate Seminar	
Writing Seminar		
AVT 621	Art Writing Seminar	3
Advanced Aesthetics		
AVT 507	Advanced Aesthetics	3
or AVT 599	Special Topics in Art and Visual Technology	
Studies in History/Theory/Contemporary Trend		
AVT 620	Theory, Criticism, and the Arts	3
Teaching Practicum		
Four credits of		4
AVT 670	Teaching Practicum	
Directed Reading		
AVT 796	Directed Reading	3
Project		
Six credits of		6
AVT 798	Directed Project and Exhibition	
Thesis		
Three credits of		3
AVT 799	Thesis	
CVPA 600	CVPA Graduate ProSeminar [1]	0
Total Credits		34

[1] Must be taken within the student's first two semesters.

Note:

AVT 796 Directed Reading/AVT 798 Directed Project and Exhibition/AVT 799 Thesis involves a study of the historical basis for a studio project; an independent creative production suitable for public viewing; and a written thesis documenting the evolution of the creative problem and exploring the intention, purpose, and relative success of the finished project.

Concentration Requirements

Code	Title	Credits
Select 9 credits from the following:		9
AVT 596	Independent Study	
AVT 599	Special Topics in Art and Visual Technology	
Other courses as approved by director

Website: artsmanagement.gmu.edu

Administration

- William Reeder, Program Director

Undergraduate Program

Arts Management Minor

The field of visual and performing arts offers many career paths that rely on a strong foundation in one or more art forms and require specific knowledge and skills in administration and management. The minor in arts management is open to all CVPA majors as well as art history majors. All other students must complete 9 credits of arts-related course work to be eligible for this minor.

Graduate Program

MA in Arts Management

The Master of Arts in Arts Management responds to a growing demand for graduates who can manage and coordinate the arts, bridging the worlds of performing and visual arts with applied managerial skills. The Washington, D.C., region is home to one of the nation's largest concentrations of arts organizations. The demand for arts managers with skills in financial and budgetary management, strategic management and entrepreneurship, and public relations, including marketing and advertising, has arguably never been more acute. The need for arts managers with skills in philanthropy, fund raising, and ongoing relationship management in the private and public arts sectors also continues to grow at a fast pace.

The MA in Arts Management is a 36-credit program of study that provides a core curriculum in the fundamentals of arts management. Students complete a 24-credit core and then select 9 credits of approved elective courses. Students also take an internship, which affords an in-depth opportunity to work with professionals in the field. The internship provides the opportunity to work at more than 60 different visual and performing arts venues in Washington, D.C., as well as national and international locations.

Requirements & Policies

Requirements

Admissions

The program is geared toward those with a passion for the arts. Diversity among applicants is anticipated and sought, and candidates are evaluated on a case-by-case basis. Work experience is strongly preferred. It is anticipated that some students will come from the arts community, with experience and training in music, dance, theater, visual and technical arts and wish to add the skills of marketing, finance, strategy, fundraising, entrepreneurship, and management to their repertoire. It is also expected

that some students will enter with more developed skills in business and wish to unite these skills with prior experiences in the arts.

For admissions requirements and deadlines, applicants should visit the graduate admissions page of the Arts Management website (http://artsmanagement.gmu.edu).

Accelerated Master's

Art and Visual Technology, BA/Arts Management, Accelerated MA

Overview

Undergraduates in art may apply to the accelerated master's degree in arts management. If accepted, students will be able to earn an Art and Visual Technology, BA and an Arts Management, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed time frame would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer time frame to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least

24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Art and Visual Technology, BFA/Arts Management, Accelerated MA

Overview

Undergraduates in art may apply to the accelerated master's degree in arts management. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Arts Management, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed time frame would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer time frame to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Music, BA/Arts Management, Accelerated MA

Overview

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Option Requirements.

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of B in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credits

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Music. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Music, BM/Arts Management, Accelerated MA

Overview

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Theater, BA/Arts Management, Accelerated MA

Overview

Undergraduates in Theater may apply to the accelerated master's degree in Arts Management. If accepted, students will be able to earn a BA in Theater and an MA in Arts Management after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and the completion in the Summer five years later, but longer time frames may also be available.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. The Internal Internship (AMGT 742 Internship I) will be within Theater at Mason (generally with the School of Theater). Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Theater. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Computer Game Design Program

Sang Nam, Director

2019 Art and Design Building
Fairfax Campus

Phone: 703-993-5734
Website: game.gmu.edu

Undergraduate Program

The 120-credit Computer Game Design, BFA program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field. Required courses include computer science, art and visual technology, music, the humanities, and computer game design. The required internship provides students with practical experience that enhances their employability post-graduation.

Graduate Program

The Master of Arts in Computer Game Design prepares graduate students who may have studied game design at the undergraduate level or who have degrees in a related technology, humanities, or arts disciplines for a career in game development and design. The program's intention is to prepare students for employment and further study in computer game design and development fields with a curriculum that reflects the gaming industry's demand for an academically rigorous, technical program coupled with an understanding of the artistic and creative elements of the evolving field of study.

Requirements & Policies

Undergraduate Program

Admissions

A writing sample will be reviewed prior to admission into the Game Design Program. Students will either be accepted, provisionally accepted, or denied. Visit the department website (http://game.gmu.edu/) for further instruction.

Writing-Intensive Requirement

The university requires all undergraduate students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. Students in the BFA in computer game design fulfill this requirement by successfully completing GAME 332 RS: Story Design for Computer Games.

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level. Fulfilling degree requirements does not guarantee this requirement will be met.

Major GPA

All GAME undergraduate students must earn a minimum 2.00 cumulative GPA in their major.

All GAME courses except GAME 101 Introduction to Game Design (Mason Core), GAME 250 Music for Film and Video and GAME 367 Writing and Editing Music and Sound must be passed with a grade of C or better.

Academic Policies

All GAME majors are required to adhere to the George Mason University Honor code. Failure to do so may result in academic sanctions up to an including dismissal from the University.

Please see College of Visual and Performing Arts for college academic policies.

Graduate Program

Admissions

Admission is competitive. An offer of admission is valid only for the semester for which the student applies. For application requirements and deadlines, applicants should visit the Computer Game Design website (http://game.gmu.edu/). Mason encourages early applications from prospective students who wish to be considered for academic scholarships or grants.

Email: wtuohy@gmu.edu
Website: game.gmu.edu/undergraduate/

The minor embodies the core components discovered in the larger game design field. It offers a core of foundational studies with intermediate and advanced course options in game animation, game sound and music, or game design and development. Students pursuing the minor will be able to participate in game program events, special activities, game design competitions, and in most projects hosted in the Computer Game Design Research Studio.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

The 120-credit Computer Game Design program enables students to focus on the artistic components of computer game design while providing them with the technical skills prerequisite to the field.

Admissions & Policies

Policies

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level. Fulfilling degree requirements does not guarantee this requirement will be met.

Major GPA

All GAME undergraduate students must earn a minimum 2.00 cumulative GPA in their major. All GAME courses except GAME 101 Introduction to Game Design (Mason Core), GAME 250 Music for Film and Video, and GAME 367 Writing and Editing Music and Sound must be passed with a grade of C or better.

4-Year Plan

Bachelor of Fine Arts in Computer Game Design Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

First Year

Fall Semester	Credits	Spring Semester	Credits
GAME 210	3	GAME 250	3
GAME 230	3	GAME 140	3
ENGH 101	3	MATH 113	4
MATH 105	4	AVT 104	3
Mason Core Western Civilization Requirement	3		
	16		13

Second Year

Fall Semester	Credits	Spring Semester	Credits
GAME 231	3	GAME 310	3
GAME 232	3	GAME 398	3
Mason Core Oral Communication Requirement	3	PSYC 100	3
AVT 180	3	Mason Core Literature Requirement	3
Any Visual Arts Elective	3-4	Any Digital Media Elective	3-4
	15-16		15-16

Third Year

Fall Semester	Credits	Spring Semester	Credits
GAME 330	3	GAME 410	3
GAME 331	1	GAME 489	1
ENGH 302	3	GAME 332	3
GAME 367	3	Mason Core Natural Science Including Lab	4
PHYS 103	4	Any Visual Arts Elective	3-4
GAME 300	1		
	15		14-15

Fourth Year

Fall Semester	Credits	Spring Semester	Credits
GAME 490	3	GAME 490	3

Any Digital Media Elective	3-4	Any Digitial Media Elective	3-4
Mason Core Global Understanding Requirement	3	General Elective	3
General Elective	3	General Elective	3
	15-16		15-17

Total Credits 118-124

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Sport and Computer Game Design Minor (CVPA)

Banner Code: SCGD

Phone: 703-993-5734
Website: http://game.gmu.edu/

This minor is offered jointly with the School of Recreation, Health, and Tourism.

It offers academic preparation in an industry that has seen rapid expansion in the sale, design, and production of sport-related games around the world. The required courses provide students with a foundational overview of the sports industry, the sport management academic discipline, and computer game design. Students can complement that knowledge with the selection of courses in these two disciplines that meet their individual interests.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Film and Video Studies Program

Cynthia Fuchs, Interim Director

C100 College Hall
Fairfax Campus

Phone: 703-993-3287
Website: film.gmu.edu

The Film and Video Studies Program offers a multidisciplinary Bachelor of Arts degree in cinematic arts production. We emphasize Directing, Producing, Cinematography, Screenwriting, Sound Design and Editing, along with business, ethics, history, and theory of film and media. Students engage with many genres of cinematic storytelling, including short fiction, documentary, video art, television, web series and interactive video.

Students take most of their courses in Film and Video Studies with additional coursework in Film and Media Studies, Art, Communication, Computer Game Design, Music, Theater, and many other departments. Students engage with emerging technologies alongside entrepreneurship and industry standards to prepare for our vibrant, ever-changing field. Screening events, guest lectures, pitching competitions, and production work on a teaching film set (our Mason Film Lab) allow students to earn credits while they learn.

Film at Mason is a community of cinematic storytellers that fosters creativity, analysis, and diverse perspectives, professional practice and socially-conscious filmmaking. The Film and Video Studies Program is grounded in flexible thinking, critical engagement, interpersonal communication and regional storytelling. Graduates apply their skills on film sets, in corporate environments, and with community organizations with professionalism that is creative, entrepreneurial, and adaptable.

Requirements & Policies

Requirements

Portfolio

Admission to Film and Video Studies is considered separately from admission to the university and only through a digital portfolio review. Information about the portfolio process, including submission deadlines and portfolio application requirements, can be found on the program's website (https://film.gmu.edu/) or by calling the Film office at 703-993-3287. Admission to the university is determined by the Admissions Office.

Writing-Intensive

The university requires all students to complete at least one course designated "writing-intensive" in their majors at the 300 level or above. Students seeking a BA in Film and Video studies fulfill this requirement by completing FAVS 304 Ways of Thinking: Film, TV, and Beyond, FAVS 380 TV Writing, or FAVS 498 Development for Senior Project.

Major GPA

All Film and Video Studies undergraduate students must earn a minimum grade of C in all courses in their major.

Policies

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300-499 level.

Termination from the Major

No Film and Video Studies course that is required for the major may be unsuccessfully attempted more than three times. A grade lower than a C constitutes an unsuccessful attempt in any given course. Those students who do not successfully complete such a course within three

attempts will be terminated from the major. For more information, see the "Termination from the Major" section under AP.5 Undergraduate Policies.

Academic Policies

Please see College of Visual and Performing Arts for college academic policies.

C100 College Hall
Fairfax Campus

Phone: 703-993-3287
Email: film@gmu.edu
Website: film.gmu.edu

The Film and Video Studies degree is the first multidisciplinary undergraduate degree in Virginia focusing on cinematic arts production and film theory and history with core courses in ethics, business, writing for the moving image, fiction, documentary, interactive storytelling and episodic television.

Students complete courses in the Film Core. To fine-tune their craft, students select advanced courses of study from four concentrations:

- Directing
- Producing
- Production/Post-Production (Cinematography or Editing/Sound)
- Screenwriting

Each concentration includes a capstone experience wherein students are mentored by faculty on original projects in their senior year that prepare them for work in the cinematic arts.

Admissions & Policies

Admissions

All students are admitted to the Film program separately from their admission to the university and only by portfolio review.

Policies

Major GPA

All Film and Video Studies undergraduate students must earn a minimum grade of C in all courses in their major.

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies. See College of Visual and Performing Arts for policies specific to the college.

Requirements

Degree Requirements

Total credits: 120

Students must earn a minimum grade of C in all required Film degree courses.

Mason Core

Film majors may not double-count Literature and Art courses toward both the Film major and Mason Core requirements. The synthesis requirement is part of the Film core requirements.

General Electives

Code	Title	Credits
Students must use general electives to complete a minor, a double major or double degree outside their primary major field of study (15-21 credits) or demonstrate intermediate-level proficiency in one foreign language (0-9 credits). After fulfilling one of these options, the remaining general electives may be taken inside or outside of the department.		17
Total Credits		17

4-Year Plan

Bachelor of Arts in Film and Video Studies

The sample plan below is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

First Year

Fall Semester	Credits	Spring Semester	Credits
FAVS 255 or 280	3	FAVS 255 or 280	3

Total Credits 121

[1] FAVS 450 is recommended for the summer between Junior and Senior year.

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

School of Art

2050 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
Website: soa.gmu.edu

Mission

George Mason University's School of Art is a collaborative academic and professional community focused on advancing creativity through traditional and new media applied to varying social contexts. The School of Art is founded on the premise that art both reflects and inspires a creative society, improving the human condition while describing the world, both as it is and could be. We focus on the role of artists in that conversation. We encourage students to see art both as an individual expression and public interaction. We celebrate historical reference, current relevance and experimentation-emphasizing innovative ways of thinking that enhance the impact of art on the future of society.

Embedded in a major liberal arts university rich in learning resources, the School of Art plays a vital role in the creative climate of the institution and the region through the cross-disciplinary research it facilitates and the artwork it produces and exhibits. The School's facilities engage an exceptional faculty of practicing artists, an active visiting artist program, and a diverse and intellectually curious graduate and undergraduate student body. Artistic skills and principles of creative practice in all visual media are grounded in a forward-thinking, adaptive curriculum. Faculty and students forge cross-disciplinary experimentation, challenging conventional thinking and blurring the lines between traditional artistic disciplines, indeed, between the arts and other humanities and sciences.

The School of Art educates artists and creative professionals to be responsible contributors to society, preparing them to be agents of change in an increasingly connected, complex, inclusive world. We highly value rigor in conceptual approach, skill in art production, and imaginative methods for implementing projects and engaging audiences. Each student is given a background in aesthetic and analytical judgment, the ethical framework for professional practice, the confidence to be both self-reliant and collaborative, and the mastery of design and production necessary to thrive as a professional artist in a competitive global environment.

Undergraduate Programs

Undergraduate studio degrees offered by the School of Art include the bachelor of arts (BA) and the bachelor of fine arts (BFA). An honors program enhances either degree for selected AVT majors. The school also offers undergraduate minors in art and visual technology, arts and social change, graphic design, photography, and web design.

For students who are interested in a career in teaching art in the public schools, neither the BA nor the BFA program satisfies all requirements for those seeking licensure. Undergraduate students interested in this field are highly encouraged to consider the accelerated degree path for the master of art in teaching and should contact the school's art education advisor to learn more about teacher preparation.

All George Mason University students are welcome to enroll in course work in the School of Art to fulfill Mason Core for requirements for the arts or to pursue minors. Consult the course listings for prerequisites and requirements. Students should carefully examine prerequisites for School

of Art courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Studios

The School of Art program is located in the Art and Design Building which houses well-equipped studios for drawing, painting, photography, printmaking, and sculpture, as well as six computer-equipped studios that cross platforms and are installed with current software applications used for two-dimensional imaging, three-dimensional modeling, animation, video production, sound editing, multimedia authoring, photography, and web publishing.

Policies, procedures, and schedules for studio use are established by the AVT studio faculty and are posted in the studios.

Graduate Programs

The MA in Graphic Design offers students a comprehensive study and preparation for the graphic design profession. The program calls for 36 credits, which includes courses in typography, web design, image making, and brand design. The broad range of study is intended to develop professionals prepared for an ever-expanding graphic design field. This degree is the only MA in Graphic Design in the Washington Metropolitan region.

The Art Education Licensure Certificate is a post-baccalaureate program designed for those who currently hold a graduate degree in an art-related field along with those who want a more immediate entrance into the art teaching profession. This 'licensure only' program, which results in a pre K-12 art certification in the Commonwealth of Virginia, is a 21 credit program consisting of graduate education courses, area endorsements, student teaching internships and seminar.

The Master of Arts in Teaching in Art Education is a pre-service degree program that prepares students with a BFA degree or equivalent for pre K-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and preservice teaching internship and seminar.

MFA, Visual and Performing Arts

The School of Art offers two concentrations under the Master of Fine Arts, Visual and Performing Arts degree: Graphic Design and Visual Art. Applicants to the program must designate which concentration they intend to apply for on the application. Each concentration has its own unique set of admissions requirements and program requirements. For specific information, please refer to the Visual and Performing Arts, MFA entry.

The MFA is a terminal degree that prepares students to become professional artists, work in technology or arts-related fields, and teach at the university level. Candidates are required to complete 60 credits, of which 30 credits are made up from core requirements and 30 are made up of emphasis and studio requirements.

In the Visual Arts concentration, students may select an emphasis in new media, painting and drawing, photography, printmaking, sculpture, or InterArts. The latter offers students the opportunity to combine art forms in interdisciplinary projects that may be installation, performance, publishing, time-based, or writing-based; and combine creative and critical approaches to their work.

While it is anticipated that students will move through the MFA as described in this catalog, individuals with extensive professional accomplishment may, upon recommendation of the SOA Graduate Committee and with prior approval of the CVPA dean, craft an individualized program within their intended emphasis that meets curricular requirements.

Accelerated Master's Options

The School of Art offers the following Accelerated Master's programs:

- Art and Visual Technology, BA/Arts Management, Accelerated MA
- Art and Visual Technology, BFA/Art Education, Accelerated MAT
- Art and Visual Technology, BFA/Arts Management, Accelerated MA
- Art and Visual Technology, BFA/Graphic Design, Accelerated MA

Each program allows undergraduate students to take graduate classes that can be used towards a designated Master's degree. Undergraduates who wish to pursue the accelerated Master's route should talk to their academic advisor first to see if they qualify. Students must be within 75-100 credits of their Bachelor's program to be eligible to apply; those who have earned more than 100 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master's program through an Accelerated Master's application. For more information about admissions requirements and the application process, students should visit the website (http://cvpa.gmu.edu).

Faculty

School Faculty

Professors

Carbonneau, Elahi (Director), Linton, White

Associate Professors

Cooley, Crawford, Cui, Endress, Frenn, Karametou, Rothstein, Sheridan, Starr (Associate Director), Winant, Wrbican

Assistant Professors

Carrier, Debuque, Del Popolo, Green, Incerti, Kardambikis, McDermott, Sutters, Yi

Research Faculty

Russell

Adjunct Faculty

Adair, Ashworth, Banales, Benassi, Bisese, Booth, Bourke, Bradley, Brinn, Carr, Chaudhary, Cole, Cushner, Davis, Deliyianni, Dixon, Dravenstadt, Durkin, Ellison, Fussner, Geffen, Guerrieri, Heffner, Hicks, Higgins, Ho, Jones, Kallista, Kehoe, Kenney, Lessner, Lillis, McComas, McCoy, Murray, Nesbitt, North, Parada, Petrine, Plakas, Quinones, Rhoades, Rodriguez, Sakai, Sanchez, Sandberg, Sargent, Sawyer, Smyers, Tafalla, Van Meer, Wheeler, Yoder, Zdepski

Requirements & Policies

Requirements

Undergraduate Admission to the School of Art

Students are admitted to School of Art degree programs separately from their admission to George Mason University and only by portfolio review. The College of Visual and Performing Arts strongly encourages students to apply to the university by November 1 in order to receive maximum scholarship consideration, including merit and talent-based scholarships.

Applicants apply to George Mason University. Admission to George Mason is determined by the Admissions Office and is separate from admission to the School of Art degree programs. All School of Art applicants are encouraged to apply for admission to the university prior to submitting a portfolio for review.

Successfully complete a portfolio review. Please refer to the Portfolio Review Criteria (https://art.gmu.edu/portfolio-review/).

Artsbus Requirement

All AVT majors must meet the school's requirement of travel to galleries and museums through the Artsbus program. Students meet this requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 Artsbus Attendance are the same as for any other class.

Freshmen who enroll as AVT majors must register for AVT 300 Artsbus Attendance 5 times during their course of study. Transfer students and students who change their majors to AVT must register for AVT 300 Artsbus Attendance for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters. Semesters of enrollment in AVT 300 Artsbus Attendance do not have to be consecutive. Students may take AVT 300 Artsbus Attendance up to three times in a semester if they wish to accelerate their completion of the requirement although this is strongly discouraged.

All rules and requirements to AVT 300 Artsbus Attendance participation are posted on the Artsbus website (http://artsbus.gmu.edu). Students are responsible for being familiar with and following the posted rules and requirements for Artsbus. The site also provides pertinent information for each trip regarding exhibits as well as reviews and articles for exhibitions.

Visual Voices Requirement

All AVT majors must fulfill three credits of AVT 301 Visual Voices Colloquium in order to graduate unless they are enrolled at Mason for fewer than three semesters. If enrolled for less than three semesters, students are required to register for AVT 301 Visual Voices Colloquium each semester in which they are enrolled. Visual Voices is an intrinsic part of the major, offering students a chance to meet with and hear nationally and internationally recognized artists speak about their work.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated "writing intensive" in their majors at the 300 level or above. AVT students fulfill this requirement by successfully completing AVT 395 Writing for Artists.

Upper-Level Credits

All undergraduate students are required to complete a minimum of 45 credits of upper-division courses at the 300–499 level.

Major GPA

All School of Art BA and BFA majors, AVT minor, Arts and Social Change minor, Graphic Design minor, Photography minor, and Web Design minor students must earn a grade of C or better in required AVT coursework, including Studio Foundation, Critical Analysis and Contemporary Practice, Breadth and Experience, Synthesis and Concentrations. All School of Art undergraduate students must earn a minimum 2.00 cumulative GPA in their major. To graduate with a BA or BFA in Art and Visual Technology with a concentration in Graphic Design, students are required to maintain a 2.40 GPA in concentration classes. Students who fail to maintain this minimum may either retake core classes (an earned higher grade replaces the old one) or take concentration special topics classes in order to raise their average to the threshold. The effect of this change will be that very weak students will have to return to required classes to master core skills, and marginally weak students will be able to meet the requirement while expanding the breadth of their education.

Policies

See CVPA Requirements and Policies.

Honors Program

Students interested in the Honors Program in School of Art should contact the director of the school. Both BA and BFA students are eligible to apply for admission to the program. Honors students must complete at least 4 credits AVT 394 Honors Seminar. They must have a cumulative GPA of at least 3.00 and at least 3.50 in AVT 394 Honors Seminar and the AVT major.

Programs

- Animation Minor
- Art Education Licensure Graduate Certificate
- Art Education, MAT
- Art and Visual Technology, BA
- Art and Visual Technology, BFA
- Arts and Social Change Minor
- Digital Media and Web Design Minor (CVPA)
- Graphic Design Minor
- Graphic Design Undergraduate Certificate
- Illustration Minor
- Photography Minor
- Photojournalism Minor (CVPA)
- Studio Art Minor
- Web Design Minor

Animation Minor

Banner Code: ANMT

2050 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
Email: avt@gmu.edu

Website: soa.gmu.edu

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 15

Required Courses

Code	Title	Credits
AVT 222	Drawing I (Mason Core) [1]	3
AVT 380	Thinking Through Animation	3
AVT 382	2D Experimental Animation	3
Total Credits		9

Elective Courses

Code	Title	Credits
Select 6 credits from the following:		6
AVT 327	Illustration	
AVT 374	Sound Art I	
FAVS 255	Video Production for Film [2]	
FAVS 280	Writing for the Moving Image (Mason Core) [2]	
THR 210	Acting I (Mason Core)	
THR 303	Movement for Actors	
Total Credits		6

1 Animation minors are strongly encouraged to enroll in a *sequential drawing emphasis* section of AVT 222.

2 FAVS majors pursuing the Animation minor may not use FAVS 255 or FAVS 280 to fulfill minor requirements.

or AVT 453	Professional Practices	
Synthesis		
AVT 497	Senior Project (Mason Core) [7]	3
or AVT 498	Senior Design Project (Mason Core)	
Total Credits		52

1 Students concentrating in graphic design must take either AVT 318 History of Graphic Design or AVT 410 Experiential Design History to fulfill this requirement. Students concentrating in photography must complete ARTH 350 History of Photography (Mason Core) to fulfill this requirement.

2 Must be taken for a total of 3 credits or each semester, if less than 3 semesters

3 Students concentrating in graphic design must take AVT 396 Writing for Designers to fulfill this requirement.

4 At least one course must be a 200-level studio course. See each concentration for individual requirements.

5 All students concentrating in graphic design must complete AVT 413 Professional Design Practices

6 Students concentrating in graphic design and printmaking & book arts must take AVT 110 Digital Design Studio for this requirement.

7 Students concentrating in graphic design must take AVT 498 Senior Design Project to fulfill the Synthesis requirement.

Artsbus Requirement

All AVT majors must meet the school's requirement of travel to galleries and museums through the Artsbus program. Students meet the requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 are the same as for any other class.

Freshmen who enroll as AVT majors must register for AVT 300 Artsbus Attendance 5 times during their course of study. Transfer students and students who change their majors to AVT must register for AVT 300 Artsbus Attendance for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters.

Concentrations

Select one concentration and complete the requirements therein.

Concentrations

- Drawing (DRW)
- Graphic Design (GD)
- New Media Art (NMA)
- Painting (PNT)
- Photography (PHO)
- Printmaking & Book Arts (PMBA)
- Sculpture (SCL)

Drawing (DRW)

All AVT majors concentrating in drawing must complete AVT 232 Painting I (Mason Core) **under Breadth and Experience.**

Code	Title	Credits
AVT 422	Drawing III	3
AVT 423	Drawing IV	3
Select 6 credits from the following:		6
AVT 324	Figure Drawing	
AVT 326	Nontraditional Approaches to Drawing	
AVT 328	Mixed Media	
AVT 333	Painting II	
AVT 336	Experimental Painting	
AVT 337	Figurative Painting	
AVT 432	Painting III	
AVT 433	Advanced Painting I	
AVT 496	Special Topics [1]	
Other courses as approved by program director.		
Total Credits		12

1 Topic must be Drawing.

Graphic Design (GD)

All AVT majors concentrating in graphic design must complete AVT 252 Darkroom Photography I (Mason Core) **or AVT 253 Digital Photography I** (Mason Core) **under Breadth and Experience.**

Code	Title	Credits
AVT 311	Graphic Design Methods and Principles	3
AVT 313	Editorial Design	3
AVT 414	Corporate Design and Branding	3
Select 3 credits from the following:		3
AVT 412	Advanced Typography	

AVT 415	Web Design and Usability	
AVT 416	Advertising Design	
AVT 419	Topics in Graphic Design	
Other courses as approved by program director.		
Total Credits		12

New Media Art (NMA)

All students concentrating in new media art must complete AVT 280 Introduction to New Media Arts under Breadth and Experience, and AVT 180 New Media in the Creative Arts for their IT Mason Core requirement.

Code	Title	Credits
Select 12 credits from the following:		12
AVT 374	Sound Art I	
AVT 376	Live Movies	
AVT 382	2D Experimental Animation	
AVT 383	3D Experimental Animation	
AVT 385	EcoArt (Mason Core)	
AVT 390	Video Art	
AVT 482	Advanced Image Making	
AVT 483	RS: Art and Interactivity	
AVT 487	Advanced Topics: New Media Art	
Other courses as approved by program director.		
Total Credits		12

Painting (PNT)

All AVT majors concentrating in painting must complete AVT 262 Sculpture I (Mason Core) **under Breadth and Experience.**

Code	Title	Credits
AVT 333	Painting II	3
AVT 432	Painting III	3
AVT 433	Advanced Painting I	3
Select 3 credits from the following:		3
AVT 336	Experimental Painting	
AVT 337	Figurative Painting	
AVT 434	Advanced Painting II	
AVT 435	Advanced Painting III	
Other courses as approved by program director.		
Total Credits		12

Photography (PHO)

All AVT majors concentrating in photography must complete AVT 252 Darkroom Photography I (Mason Core) **under Breadth and Experience.**

Code	Title	Credits
AVT 353	Darkroom Photography II	3
AVT 356	Photo Studio Techniques	3
AVT 359	Photography Seminar	3
Select 3 credits from the following:		3
AVT 350	Alternative Photo Processes	
AVT 354	Digital Photography II	
AVT 357	Photobook: Concepts Form	
AVT 455	Digital Printing Techniques	
AVT 457	Documentary Photography	
AVT 458	Advanced Studio Lighting	
Other courses as approved by program director.		
Total Credits		12

Printmaking & Book Arts (PMBA)

Code	Title	Credits
AVT 343	Printmaking II	3
Select 9 credits from the following:		9
AVT 344	Book Arts: Books Enclosures	
AVT 345	Paper/Print/Book as Language	
AVT 346	Digital Printmaking	
AVT 442	Printmaking III	
AVT 443	Printmaking IV	
Other courses as approved by program director.		
Total Credits		12

Sculpture (SCL)

All AVT majors concentrating in sculpture must complete AVT 262 Sculpture I (Mason Core) **under Breadth and Experience.**

Code	Title	Credits
AVT 363	Sculpture II	3
Three credits of		3
AVT 393	Field Experience in the Arts	
or AVT 489	Internship in Art and Visual Technology	
AVT 462	Sculpture III	3
AVT 463	Sculpture IV	3
Total Credits		12

Concentration Electives

AVT 496 Special Topics or AVT 491 Independent Study in Art and Visual Technology may be taken with permission of respective program director.

General Electives

Code	Title	Credits
BA students must use some/all general electives to complete a		19
Minor		
Double Major		
Double Degree [1]		
Intermediate-level proficiency in one foreign language		
Remaining electives [2]		
Total Credits		19

1. Must be outside student's primary major field of study.
2. May be taken inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300 and 400 level); most students will require at least 13 elective credits at the 300 level or above. AVT 393 Field Experience in the Arts and AVT 489 Internship in Art and Visual Technology are not required courses but are highly recommended as electives for BA students.

4-Year Plan

Bachelor of Arts in Art and Visual Technology Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Accelerated Master's

Art and Visual Technology, BA/Arts Management, Accelerated MA

Overview

Undergraduates in art may apply to the accelerated master's degree in arts management. If accepted, students will be able to earn an Art and Visual Technology, BA and an Arts Management, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed time frame would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer time frame to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit

is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Total Credits		58

1 Transfer students with less than three semesters remaining must take AVT 301 Visual Voices Colloquium for each remaining semester.

2 Students concentrating in Graphic Design must take AVT 396 Writing for Designers to fulfill this requirement.

3 Students concentrating in Graphic Design must take either AVT 318 History of Graphic Design or AVT 410 Experiential Design History to fulfill this requirement. Students concentrating in photography must complete ARTH 350 History of Photography (Mason Core) to fulfill this requirement.

4 Students concentrating in graphic design must take either AVT 370 Entrepreneurship in the Arts or AVT 408 Visual Communication Theories to meet this requirement. Students concentrating in photography must take AVT 204 Visual Thinking to fulfill this requirement.

5 At least one course must be a 200-level studio course. See each concentration for individual requirements.

6 All students concentrating in graphic design must complete AVT 413 Professional Design Practices.

7 All students concentrating in graphic design and printmaking & book arts must take AVT 110 Digital Design Studio

8 Students concentrating in graphic design must take AVT 498 Senior Design Project to fulfill the Synthesis requirement.

Artsbus Requirement

All AVT majors must meet the school's requirement of travel to galleries and museums through the Artsbus program. Students meet the requirement by enrolling in AVT 300 Artsbus Attendance. The procedure and requirements for enrollment in AVT 300 are the same as for any other class.

Freshmen who enroll as AVT majors must register for AVT 300 Artsbus Attendance 5 times during their course of study. Transfer students and students who change their majors to AVT must register for AVT 300 Artsbus Attendance for the equivalent of each semester they are enrolled at Mason, up to a maximum of five semesters.

Concentrations

Select one concentration and complete the requirements therein.

Concentrations

- Drawing (DRW)
- Graphic Design (GD)
- InterArts (IA)
- New Media Art (NMA)
- Painting (PNT)
- Photography (PHO)
- Printmaking & Book Arts (PMBA)
- Sculpture (SCL)

Drawing (DRW)

All AVT majors concentrating in drawing must complete AVT 232 Painting I (Mason Core) under Breadth and Experience.

Code	Title	Credits
AVT 422	Drawing III	3
AVT 423	Drawing IV	3
Select 12 credits from 300-400 level AVT		12
Select 6 credits from the following:		6
AVT 324	Figure Drawing	
AVT 326	Nontraditional Approaches to Drawing

Other courses as approved by program director.		
Total Credits		24

[1] AVT 491 Independent Study in Art and Visual Technology or AVT 496 Special Topics may be taken with permission of the Concentration Director.

InterArts (IA)

The concentration in InterArts is an individualized program of study focused on arts research with multidisciplinary goals. Students concentrating in InterArts are engaged with both creative and conceptual inquiry in the development of artistic practice bolstered by knowledge of other disciplines. Often, this work exists at the interstices of artforms, and focuses on research on areas of interest to the student. InterArts students draw on the large resources of the School of Art and the university in creating an individualized program of studio courses and complementary courses for a total of 24 credits (12 credits of disciplinary focus and 12 credits of complementary study). In consultation with a faculty advisor, the student drafts a curriculum contract outlining the course of study, which is approved by the InterArts faculty. Admission to the concentration is based on acceptance into the BFA program via a portfolio review process and project approval from the InterArts faculty.

Code	Title	Credits
Twelve credits of disciplinary focus		12
Twelve credits of complementary study		12
Total Credits		24

New Media Art (NMA)

All majors concentrating in new media art must complete AVT 280 Introduction to New Media Arts under Breadth and Experience and AVT 180 New Media in the Creative Arts for their IT Mason Core requirement.

Code	Title	Credits
Select 12 credits from 300-400 level AVT		12

Accelerated Master's

Art and Visual Technology, BFA/Art Education, Accelerated MAT

Overview

Undergraduates in art may apply to the accelerated master's degree in Art Education. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Art Education, MAT after satisfactory completion of 144 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit:

- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities
- Official score on Praxis Core or SAT equivalent
- MAT (for BFA students) portfolio must include 15 to 20 images that reflect artistic breadth and depth, including samples of work with ample attention to drawing and painting from observation. These works must be submitted through SlideRoom. All pieces must include the title of the piece, date, medium, and size of each work. Incomplete portfolios will not be considered.

Teacher Endorsement

Students for the MAT (for BFA students) must complete ALL endorsements, as well as the Praxis Core Exam. Students must meet Virginia Department of Education's required semester credit hours in the following specific areas:

Code	Title	Credits
12 hours of two-dimensional media		12
12 hours of three-dimensional media		12
9 hours of cultural context and art history, judgment and criticism, aesthetics		9
3 hours of related areas of fine arts		3
Total Credits		36

Students should work closely with their advisor to ensure they complete these course requirements through the BFA in Art and Visual Technology and MAT degrees.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated on the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high-achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Art and Visual Technology, BFA/Arts Management, Accelerated MA

Overview

Undergraduates in art may apply to the accelerated master's degree in arts management. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Arts Management, MA after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed time frame would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer time frame to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Art and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Art Education Licensure Graduate Certificate

Banner Code: AR-CERG-ARTL

2005 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
Website: soa.gmu.edu

Following this curriculum does not guarantee entry into the Master of Art Teaching (MAT) Program. Prospective MAT students must meet all MAT admissions requirements.

This certificate may be earned either on a part time or full time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified on the Graduate Admissions policy page (https://catalog.gmu.edu/admissions/graduate-policies/). Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Policies

Students must earn a B- or higher in all coursework.

For policies governing all graduate certificates, see AP.6 Graduate Policies.

Requirements

Certificate Requirements

Total credits: 21

This certificate may be pursued on a full-or part-time basis.

AVT 695	Internship in Art Education (Student Teaching) [1]	5
AVT 696	Internship in Art Education Seminar [1]	1
Total Credits		21

[1] Prior to internship, student must pass: Praxis II, VCLA, technology and child abuse standards to receive placement for student teaching.

All Licensure Certificate students will receive ongoing evaluations by the art education faculty to determine their readiness for student teaching.

In addition, applicants who did not take equivalent undergraduate courses will be required to take AVT 180 New Media in the Creative Arts, art education endorsements, plus any additional studio or art history course work to meet Virginia licensure requirements.

Art Education, MAT

Banner Code: AR-MAT-ARTE

2005 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
Website: soa.gmu.edu

The Master of Arts in Teaching in Art Education (MAT I) is a pre-service degree program that prepares students with a BFA degree or equivalent for PreK-12 art licensure by the Commonwealth of Virginia. Using a studio-based approach to art education and working closely with area public school systems, the MAT degree consists of 30 credits of graduate art education, school practicum experience, studio work, and pre-service teaching internship and seminar.

Available Concentrations

This degree program has two concentrations: one concentration for those seeking certification (MAT I) as well as one for licensed art teachers who are continuing education (MAT II). The concentration for licensed art teachers (MAT II) is designed for PreK-12 licensed art teachers who currently hold an undergraduate degree in art education and a current teaching license in Art Education. Applicants should be interested in obtaining a graduate art education degree for further professional development. Students take graduate art education courses, approved graduate level studio art courses, education courses, and complete a capstone project.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified on the Graduate Admissions policy page (https://catalog.gmu.edu/admissions/graduate-policies/). Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Policies

See College of Visual and Performing Arts for policies specific to the college.

Requirements

Degree Requirements

Total Credits: 30

Students must earn a B- or higher in licensure coursework.

Required Core Courses

Code	Title	Credits
AVT 605	Issues and Research in Art Education	3
AVT 667	Two-Dimensional Art Making and Differentiated Instruction	3

AVT 668	Three-Dimensional Art Making Across Cultures	3
CVPA 600	CVPA Graduate ProSeminar (must be taken within a student's first 2 semesters)	0
Total Credits		9

MAT (I) Required Courses

Coursework meets licensure and Master's degree requirements. The listing below follows the recommended sequencing for licensure.

Code	Title	Credits
AVT 595	Introduction to Art Teaching and Learning	3
AVT 691	Elementary Art Education	3
AVT 692	Secondary Art Education	3
AVT 695	Internship in Art Education (Student Teaching) [1]	5
AVT 696	Internship in Art Education Seminar [1]	1
EDRD 501	Literacy and Curriculum Integration	3
EDUC 511	Child and Adolescent Development in Global Contexts	3
Total Credits		21

[1] Prior to internships, students must pass: Praxis II, VCLA, technology & child abuse standards.

MAT (I) Professional Teaching Portfolio

The comprehensive experience for the MAT I includes the following:

1. a group exhibition, "The Art of Teaching Art Showcase," in which MAT candidates display and formally present works of PreK–12 student art completed during the internship, along with exemplars of the MAT candidate's own artwork, and
2. a culminating review of the intern's competencies as reflected in a professional teaching portfolio, accomplished during the internship seminar course that accompanies student teaching.

A committee of MAT faculty will determine whether the student has mastered the field of study based on the final portfolio and exhibition. Students who are unable to successfully complete the full student teaching internship in art education and seminar for student teachers will be terminated from the MAT in Art Education program.

MAT (I) Teacher Endorsement

MAT I students originally admitted under provisional status must complete all endorsements and any assigned art education foundational courses by the date indicated on the student's provisional admission agreement and prior to admission to degree status. These courses may be taken concurrently with other MAT courses, but may not exceed a total of 9 credits. All MAT I students should meet all testing and coursework requirements prior to starting their student teaching internship.

Students must have a studio major in the Visual Arts and meet the Virginia Department of Education's required semester credit hours in the following specific areas: 12 hours of two-dimensional media, 12 hours of three-dimensional media, 9 hours of cultural context and art history, judgment and criticism, aesthetics, and 3 hours of related areas of the fine arts.

Note:

MAT I students will receive ongoing evaluation reviews by the MAT faculty to determine whether they have achieved satisfactory progress toward their degree.

MAT (II) Concentration for Licensed Art Teachers (LAT) Required Courses

Code	Title	Credits
AVT 596	Independent Study [1]	4
or AVT 599	Special Topics in Art and Visual Technology	
AVT 599	Special Topics in Art and Visual Technology (topic: Prints/Paper/Books as Language)	4
AVT 606	Creativity and Cognition in the Arts and Media	3
AVT 615	Technology for Art Teachers	3
AVT 698	Independent Study/Directed Readings	1
EDUC 537	Introduction to Culturally Linguistically Diverse Learners	3
Select 3 credits of graduate education courses from the following:		3
EDUC 511	Child and Adolescent Development in Global Contexts	
EDUC 522	Foundations of Secondary Education	
EDUC 542	Foundations of Education	
EDUC 543	Children, Family, Culture, and Schools, 4-12 Year Olds	
EDUC 597	Special Topics in Education	
EDUC 606	Education and Culture	
EDUC 613	How Students Learn	
EDUC 614	Designing and Assessing Teaching and Learning	
EDUC 615	Educational Change	
Or other course as approved by director		
Total Credits		21

[1] Other courses as approved by director may fulfill this requirement.

Capstone:

LAT concentration students must complete a Capstone Project. Under the guidance of a faculty advisor, students will select a topic in a personal area of interest in art education pedagogy, carry out in-depth research, and prepare a capstone final project in the form of a written report and visual presentation.

Student Teaching Placement Requirement

All MAT students must pass Praxis II and Virginia Communication and Language Assessment (VCLA) to receive placement for student teaching in the final semester.

Accelerated Master's

Art and Visual Technology, BFA/Art Education, Accelerated MAT

Overview

Undergraduates in art may apply to the accelerated master's degree in Art Education. If accepted, students will be able to earn an Art and Visual Technology, BFA and an Art Education, MAT after satisfactory completion of 144 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and the completion in the Fall semester five and a half years later, but longer time frames may also be available.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Academic Affairs Office. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

In addition to meeting the general university requirements for admission for graduate study, applicants must submit:

- Statement of intent and professional goals for entering the field
- Three letters of reference from faculty members or individuals who have firsthand knowledge of the applicant's academic or professional capabilities
- Official score on Praxis Core or SAT equivalent
- MAT (for BFA students) portfolio must include 15 to 20 images that reflect artistic breadth and depth, including samples of work with ample attention to drawing and painting from observation. These works must be submitted through SlideRoom. All pieces must include the title of the piece, date, medium, and size of each work. Incomplete portfolios will not be considered.

Teacher Endorsement

Students for the MAT (for BFA students) must complete ALL endorsements, as well as the Praxis Core Exam. Students must meet Virginia Department of Education's required semester credit hours in the following specific areas:

Code	Title	Credits
12 hours of two-dimensional media		12
12 hours of three-dimensional media		12
9 hours of cultural context and art history, judgment and criticism, aesthetics		9
3 hours of related areas of fine arts		3
Total Credits		36

Students should work closely with their advisor to ensure they complete these course requirements through the BFA in Art and Visual Technology and MAT degrees.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is required to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated on the application, candidates submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing and must meet all master's degree requirements except for the two courses (6 credits) completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high-achieving undergraduates with permission of the School of Art. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 credit hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Arts and Social Change Minor

Banner Code: ASC

2050 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
Email: avt@gmu.edu
Website: soa.gmu.edu

The minor leverages artistic and creative practice in an array of academic and social contexts. The goal is to infuse these practices into territories outside the traditional art world through research, participatory experimentation and documentary aesthetic aspects of social practice. With a focus on creative research and project production students experience direct engagement with communities while developing skills toward fostering positive change in communities via the arts.

Admissions & Policies

Policies

Students must complete an approved AVT course for their Mason Core Arts requirement.

Special topics courses will be notated in Patriot Web as a designated Arts and Social Change course.

Twelve credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Graphic Design Undergraduate Certificate

Banner Code: AR-CERB-GD

2050 Art and Design Building
Fairfax Campus

Phone: 703-993-8898
Email: avt@gmu.edu
Website: soa.gmu.edu

The Graphic Design Undergraduate Certificate is for prospective students with a 4-year baccalaureate undergraduate degree from an accredited institution who seek to gain the skills and competency to advance into a career in graphic design. It encompasses a specific body of knowledge and practice that prepares candidates for rewarding positions in the design field.

Due to prerequisites, the certificate requirements need to be taken on a part-time basis.

Admissions & Policies

Admissions

There is not a portfolio review required for admission, but prospective students--with graphic design experience--should consider scheduling an interview with the program director prior to applying. Tuition is billed at the undergraduate rate, and most students complete certificate requirements in four semesters.

Students entering the certificate must be able to demonstrate basic skills in visual language and should have working knowledge of professional graphic design software, or must take AVT 110 Digital Design Studio in addition to other required courses.

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Photojournalism Minor (CVPA)

Banner Code: PHOJ

The photojournalism minor explores photography as a journalistic storytelling medium. Offered jointly by the Department of Communication and the School of Art, the minor prepares students to bear witness through the lens of a camera; to examine the world around them, pose questions and inform audiences. Students gain proficiency with digital photo technology, develop reporting skills, apply visual storytelling principles, and examine the ethical and legal challenges of capturing stories in a mediated society.

Admissions & Policies

Requirements

BFA Admissions Requirements

The School of Dance offers a BFA. Entrance to the program is by audition. Information about the audition process, including dates and audition application, can be found on the School of Dance website. Admission to the university is determined by the Admissions Office.

Master of Fine Arts, Visual and Performing Arts, Concentration in Dance

A Visual and Performing Arts, Master of Fine Arts with a concentration in Dance is offered by the College of Visual and Performing Arts. For specific information, please refer to the Visual and Performing Arts, MFA.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their major at the 300-level or above. Students in the Dance, BFA fulfill this requirement by successfully completing DANC 390 Dance History I (Mason Core)or DANC 391 Dance History II (Mason Core).

Policies

See CVPA Requirements and Policies.

Total Credits		6

[1] DANC 118 World Dance (Mason Core) fulfills the global understanding requirement. Students who choose to take this course twice for the minor must select two different world cultures.

Notes

Mason does not guarantee the availability of these courses every semester; some are offered in alternate years.

Dance, BFA

Banner Code: AR-BFA-DANC

A300 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1114
Email: dance@gmu.edu
Website: https://workingcatalog.gmu.edu/colleges-schools/visual-performing-arts/dance/#programstext

The BFA in Dance is a performance-oriented contemporary dance program designed to prepare students professionally as performers, choreographers, educators, and active leaders of the dance community. Students in this program demonstrate technical mastery and devote their college study to an intensive and comprehensive dance curriculum.

Daily technical training in modern dance and ballet, and numerous performance opportunities develops a versatile dancer. Student progress in the BFA program is assessed consistently. Because of the professional nature of the BFA degree, the program requires completion of 124 credits of coursework.

Admissions & Policies

Admissions

Entrance to the program is by audition. Information about the audition process, including dates and audition application, can be found on the school web page (http://dance.gmu.edu), or by calling the dance office at 703-993-1114. Admission to the university is determined by the Admissions Office.

Undergraduate Programs

Bachelor's Degrees

The two undergraduate degree programs offered through the School of Music, the Bachelor of Arts (BA) in Music and the Bachelor of Music (BM), prepare students for graduate work in music and music literature; research and professional work in musical activities; and state licensure, or certification, to teach vocal and choral or instrumental music at the elementary and secondary school levels.

The School of Music enables students to pursue worthwhile vocational goals as teachers, performers, conductors, composers, and in music technology. The School of Music also seeks to educate its students to reflect a concern for cultural and humanistic values as future ambassadors and advocates of music and other arts. Through innovative learning experiences, the School of Music provides all students in the BA and BM programs with opportunities to become effective musicians, teachers, and advocates of music. Teaching music is the principal area in which students can find employment in private studios, public and private schools, academies, and higher education within the ever-changing workplace. Because of this, all music majors at Mason receive some training in the teaching of music.

The School of Music also recognizes the critical outreach role it provides in serving students from all majors, as well as members of the community who significantly benefit from the values and experiences of an education in music. The School of Music seeks to provide unique educational opportunities through its various course offerings, workshops, presentations, and performances for those seeking music enrichment.

Teacher Licensure

Undergraduate students seeking certification to teach vocal and choral or instrumental music at the elementary and secondary levels must earn the BM degree as specified under Concentration in Music Education section in this section. Students who have earned a baccalaureate degree and are seeking state licensure to teach music must also complete this sequence of courses, which constitute a state-approved program for teacher education in music.

Graduate Certificates

Music Education Licensure for PK-12

This graduate certificate is designed as a pathway to music education licensure for music students without an undergraduate degree in music education. Upon completing this certificate students will be equipped with the necessary skills, knowledge, and experience to obtain music teaching licensure from the Commonwealth of Virginia.

Music for Well-Being Graduate Certificate

The Graduate Certificate in Music for Well-Being builds on courses currently offered in the School of Music and on the school-wide initiative around well-being as an important consideration and subject of study for all musicians.

Expanding and supplementing courses developed in connection with the undergraduate minor in Music for Well-Being, the certificate allows students to explore the connections between music and consciousness and between vibration, meditation, and well-being. The graduate certificate gives students a thorough grounding in theory and practice and includes instruction in compositional and improvisational approaches. Although there is some overlap in subject matter, this is not intended as a program in music therapy. The certificate is conceived as a compliment to the programs focused on mindfulness and well-being that are a priority across the university. The success of the long-running Healing Arts Ensemble at the graduate level, as well as the undergraduate level, and the growth in the new minor in Music for Well-Being indicates the potential level of student interest in the program.

This certificate may be pursued in either part-time or full-time status.

Instrumental Performance Artist Graduate Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Piano Performance Artist Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art.

The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Vocal Performance Artist Certificate

The certificate is a specialized, graduate-level program for advanced musicians who desire to further develop and refine their performance art. The certificate program is a two-year course of study requiring at least two consecutive semesters of residence. A total of 32 credits is required. Advisor's approval is required for each semester's enrollment.

Graduate Programs

Accelerated Master's Option

The School of Music offers a Music, BM (Performance)/Music, Accelerated MM (Performance) option which allows undergraduate students to take graduate classes that can be used towards a designated master's degree. Undergraduates who wish to pursue the accelerated master's route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their bachelor's program to be eligible to apply; those who have earned more than 90 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the master's program through an accelerated master's application. For more information about admissions requirements and the application process, students should visit the website (http://cvpa.gmu.edu).

Music, Master of Music (MM)

The Master of Music (MM) degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, and pedagogy. The MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Music Education, Ph.D.

The PhD in music education, a research-intensive degree, focuses on the gathering, processing, and interpretation of information. Students in the PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education.

The PhD in music education requires 60 credits beyond the master's degree in music.

Doctor of Musical Arts (DMA)

The DMA concentrations are composition, conducting, and performance. While these concentrations share some required coursework, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, conducting, or composition, as well as the theory and practice of those disciplines.

The Doctor of Musical Arts (DMA) degree requires 60 credits beyond the master's degree in music.

Requirements & Policies

Requirements

Admission Requirements

Entrance to all music degree programs is by audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music (http://music.gmu.edu).

Program Requirements

A fundamentals of music test is given prior to the first week of classes to all students enrolled in MUSI 115 Introduction to Music Theory . Call for additional information.

Competency placement tests are required of all transfer students who wish to present transfer credit in any of the following areas: music theory, aural skills, and keyboard skills.

Students must earn a minimum 2.00 cumulative GPA in their major or higher, if required by their program.

Policies

See CVPA Requirements and Policies.

Termination from the Major

No School of Music course that is required for the major may be unsuccessfully attempted more than three times. A grade of F constitutes an unsuccessful attempt in any given course. Those students who do not successfully complete such a course within three attempts

will be terminated from the major. For more information, see AP.5.2.4 Termination from the Major.

Writing-Intensive Requirement

Mason requires all students to complete at least one course designated "writing intensive" in their major at the 300 level or above. Students majoring in music may fulfill this requirement by successfully completing MUSI 332 Music History in Society II or MUSI 438 Music History in Society B. Students who transfer this course into Mason may be required to repeat it or enroll in some other suitable course to fulfill the writing intensive requirement.

Fairfax Campus

Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/undergraduate/

The minor is designed for students who wish to widen their scope of knowledge about music, while deepening their understanding of the

world's peoples. Students learn in the classroom, as well as experientially, in the form of applied studies and exercises in field work, how music-making functions within cultural contexts, conveying varied meanings in bodily action and musical sound worldwide. Students gain skills that will serve them in many fields of endeavor, from developing specific musical expertise to acquiring proficiency with technological and anthropological aspects of ethnographic inquiry.

Admissions & Policies

Admissions

Students must first demonstrate to the Ethnomusicology coordinator a basic level of knowledge and training in some area of Western or non-Western music, or earn a grade of B or higher in MUSI 103 Musics of the World (Mason Core) or MUSI 431 Music History in Society III (Mason Core).

Policies

Eight credits of coursework must be unique to the minor with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

This minor is open to music and non-music majors who wish to explore America's unique art form. It is open to all instrumentalists and vocalists, including students who perform on instruments not typically associated with jazz.

Admissions & Policies

Admissions

No prior experience in jazz is needed, but candidates must pass a music audition.

Policies

Students in the keyboard area use the Keyboard Skills I credit as a music elective.

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

This certificate may be earned on a full-time or part-time basis.

This certificate program qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified on the Graduate Admissions policy page (https://catalog.gmu.edu/admissions/graduate-policies/). Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Certificate Requirements

Total credits: 21

This certificate may be pursued on a full-or part-time basis.

Required Courses

Code	Title	Credits
MUSI 561	Music Curriculum and Instructional Procedures	3
MUSI 593	Foundations of Music Education	3
EDRD 501	Literacy and Curriculum Integration	3
EDUC 511	Child and Adolescent Development in Global Contexts	3
Select one course from the following:		3
MUSI 566	Instrumental Methods for Band	
MUSI 567	Instrumental Methods, Strings	
MUSI 568	Vocal and Choral Methods	
CVPA 600	CVPA Graduate ProSeminar [2]	
Total Credits		15

[2] Must be taken within the student's first 2 semesters

[1] Students should contact their academic advisor in regards to fulfilling this requirement.

Internship

Upon completion of coursework the candidate must complete a student teaching internship at the elementary and secondary levels in a program-approved public or private school (6 credits). Prior to being permitted to student teach, the candidate must complete and pass the VCLA, the Praxis Subject Assessment (Music Content Knowledge-5113), and the MTEC Competency Check[1].

Code	Title	Credits
MUSI 595	Internship in Music Education	6
Total Credits		6

[1] The requirements and procedures for applying for an internship as well as the MTEC Competency Check is outlined in the Music Education Handbook (https://music.gmu.edu/resources/students/music-education-resources/) . Candidates will be advised to sign up for vocal and/or instrumental technique courses during coursework as needed to help prepare them for these exams. Note that techniques courses are not required and thus cannot be transferred or counted as course substitutions for completion of the certificate.

Music Education, PhD

Banner Code: AR-PHD-MUE

Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/graduate/

The Music Education, PhD is a research-intensive degree focusing on the gathering, processing, and interpretation of information. Students in the Music Education PhD program take seminars and topics courses in music education, as well as research courses through the College of Education and Human Development. Music Education, PhD graduates are expected to demonstrate the ability to communicate significant concepts of music education. The Music Education, PhD requires 90 credits, 60 beyond the master's degree in music.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified on the Graduate Admissions policy page (https://catalog.gmu.edu/admissions/graduate-policies/). Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

500- to 800-level music courses may be counted as electives except for the following classes: MUSI 501, MUSI 502, MUSI 516, MUSI 532, MUSI 533. These are review courses that cover undergraduate-level material and they may not be counted toward the MM, DMA, or Ph.D.

Reduction of Credit

Students must have a master's degree before being admitted. Most students receive a reduction of study of 30 credits based on their previous master's degree.

Requirements

Degree Requirements

Total credits: 90

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Placement Examinations

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory.

Doctoral Coursework

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or nondegree credits not formally approved for the degree.

Code	Title	Credits
800-level EDEP/EDRS/EDUC Research Courses from CEHD, selected in consultation with the Director of Music Education		9
Select six credits in music theory		6

Select 6 credits of MUSI 500 - 800 level electives as approved by advisor.		6
Total Credits		48

Residency

More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and spring) of consecutive full-time study (9 credits per semester) is recommended (18 total credits). Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not be included. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements

Reading proficiency is required in a language appropriate to the student's major area of study. Normally, this will be German, French, or Italian. Alternatively, the student may choose to demonstrate proficiency interpreting statistical findings in quantitative-based educational research. The director of graduate studies and the Graduate Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student's area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Graduate Committee

The Graduate Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group.

Comprehensive Exams

After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated, the student will take comprehensive examinations. The written exams may also be followed by a one-hour oral exam if needed to clarify issues included in the written exams.

Doctoral Research

Code	Title	Credits
Select 12 credits from the following:		12
MUSI 998	Dissertation Proposal (A minimum of 3 credits)	
MUSI 999	Dissertation (A minimum of 6 credits)	
Total Credits		12

Advancement to Candidacy

Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all coursework required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Graduate Committee, the director of graduate studies, and the director of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

Dissertation

The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee consisting of at least three members of the music faculty. The student's major professor will chair the committee. The director of graduate studies of the School of Music may be a part of the committee; if not, he or she will serve exofficio. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost.

Final Defense and Graduation

When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a

doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/advising/

The minor is designed to allow participation by students with minimal formal musical training. The coursework allows students to explore the connections between music and consciousness and between vibration, mindfulness, and well-being.

Admissions & Policies

Admissions

Admission to the Music for Well-Being minor is by interview with the minor coordinator.

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of 2.00 earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Admissions & Policies

Admissions

All students pursuing a music minor must pass a music audition. Students in the keyboard area use the Keyboard Skills I credit as a music elective.

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of C earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.
