Admissions & Policies

Admissions

All students pursuing a music pedagogy minor must pass a music audition and an interview.

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their minor, with a minimum grade of C earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 20

Coursework

Code	Title	Credits

This minor is open to majors from throughout the university who seek to expand their knowledge and skill in this area of study.

Admissions & Policies

Admissions

Entrance requirements

MUSI 100 Fundamentals of Music (Mason Core) or MUSI 115 Introduction to Music Theory with a grade of C or higher. A music audition and interview with music technology faculty is required.

Policies

University policy states that students must earn 8 distinct credits that are not used for their major toward their degree, with a minimum 2.00 GPA earned in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Music Ensemble (list follows)		3
Total Credits		41-47

1. Pianists may substitute MUSI 371 Techniques of Accompanying I for MUSI 171 Keyboard Skills I
2. Pianists may substitute MUSI 372 Techniques of Accompanying II for MUSI 172 Keyboard Skills II
3. Meets Writing Intensive requirement in the BA in Music with a concentration in Music Technology.
4. Meets Writing Intensive requirement in the BA in Music (all concentrations except Music Technology).
5. Students in the Music Technology concentration should take 6 credits of Applied Music. All others should take 8 credits.

Pedagogy

All students (except for Music Technology and Pedagogy Concentration students) must register for a pedagogy and literature class appropriate to their major instrument or register for a teaching internship.

Code	Title	Credits
Select one from the following:		0-3
MUSI 395	Teaching Internship (2 credits)	
MUSI 351	Keyboard Pedagogy [1]	
MUSI 352	Vocal Pedagogy and Lab [2]	
MUSI 353	Instrumental Pedagogy and Literature [3]	
Total Credits		0-3

1. Required for keyboard students.
2. Required for vocal students.
3. Topic varies; students must register for the topic corresponding with their major instrument. Required for strings and guitar students; recommended for wind, brass, or percussion students.

Concentration in Music Technology (MTEC)

Students pursuing this concentration may not also pursue the Music and Technology minor. Students who wish to complete a concentration in music technology must also complete the following:

Code	Title	Credits
MUSI 252	Popular Music Arranging	3
MUSI 254	Music and Technology	3
MUSI 354	Electronic Composition	3
MUSI 355	Recording Techniques	3
MUSI 359	Topics in Music Technology	3
Total Credits		15

Concentration in Pedagogy (PDGY)

Students pursuing this concentration may not also pursue the Music and Technology minor. Students who wish to complete a concentration in pedagogy must also complete the following:

Code	Title	Credits
MUSI 351	Keyboard Pedagogy	3
or MUSI 352	Vocal Pedagogy and Lab	
or MUSI 353	Instrumental Pedagogy and Literature	
MUSI 456	Pedagogy II [1]	2
MUSI 457	Pedagogy III [1]	2
MUSI 458	Pedagogy IV	2
MUSI 494	Pedagogy Internship	2
Choose four credits from the following:		4
MUSI 221	Applied Music I	
MUSI 222	Applied Music in Keyboard	
MUSI 223	Applied Music in Voice	

MUSI 224	Applied Music in Woodwind	
MUSI 225	Applied Music in Brass	
MUSI 226	Applied Music in String	
MUSI 227	Applied Music in Percussion	
MUSI 241	Applied Music II	
MUSI 242	Applied Music in Keyboard	
MUSI 243	Applied Music in Voice	
MUSI 244	Applied Music in Woodwind	
MUSI 245	Applied Music in Brass	
MUSI 246	Applied Music in String	
MUSI 247	Applied Music in Percussion

4-Year Plan

Bachelor of Arts in Music Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

First Year

Fall Semester	Credits	Spring Semester	Credits
ENGH 101	3	Literature (Mason Core)	3
MATH 106	3	Natural Science (non-Lab) (Mason Core)	3
MUSI 113	1	MUSI 114	1

Accelerated Master's

Music, BA/Arts Management, Accelerated MA

Overview

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Application Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Option Requirements.

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of B in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credits

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Music. Permission to take a graduate course for reserve graduate credit is

normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Requirements

Degree Requirements

Total credits: 120

Students must complete all Mason Core requirements and core coursework, as well as the requirements within one selected concentration.

Mason Core

Coursework within the major and concentration fulfills the information technology, global understanding, oral communications, fine arts, and synthesis requirements. Students must fulfill the requirements remaining in the following areas:

Code	Title	Credits
Quantitative Reasoning [1]		3
Written Communication		6
Literature		3
Non-Lab Natural Science		3
Western Civilization		3
Social or Behavioral Sciences		3
Information Technology [2]		3
Total Credits		24

1. Students in the Music Technology concentration, will fulfill this requirement as part of their concentration requirements.
2. Music Technology concentration students only.

Core Courses Required for All Concentrations

Code	Title	Credits
MUSI 113	Aural Skills I	1
One credit of		1
MUSI 114	Aural Skills II	
MUSI 115	Introduction to Music Theory	3
MUSI 213	Aural Skills III	2
MUSI 251	Musical/Oral Communication [1]	3
MUSI 273	Keyboard Skills III	1
Five instances of:		0
MUSI 300	Recital Attendance	
MUSI 431	Music History in Society III (Mason Core)	3
Total Credits		14

1. Fulfills Mason Core requirement in oral communication for Music, BM students only.

Concentration in Composition (CPO)

Students must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- String
- Voice
- Woodwind

Courses Required for All Emphases

Code	Title	Credits
MUSI 214	Aural Skills IV	2
MUSI 215	Theory for Pop and Jazz Music	3
MUSI 216	Theory for 20th- and 21st-Century Music	3

MUSI 387	Symphony Orchestra (Mason Core)	
MUSI 389	Jazz Ensemble (Mason Core)	
Total Credits		10

Concentration in Music Education (MUE)

Certification to Teach

The music education concentration at George Mason University is recognized by the Virginia Department of Education (VDOE) as an approved teacher preparation program that imparts licensure. Even though an undergraduate student may declare music education as their major, this is not an official indication of a student's degree status. In order to be accepted into the degree, students must complete an application, meet all eligibility requirements, and pass the MTEC Interview and Skill Proficiency Exam. All entry requirements are described in Part 1 of the GMUsicEd Handbook located online (https://sites.google.com/site/gmusicedhandbook/Information/part1bme/).

The deadline for applying to the BME and taking the MTEC exam is the 4th semester of coursework. The 4th semester is defined as a minimum of 36 attempted credits. Transfer and continuing students entering GMU as an undergraduate with 36 or more credits will be required to apply to the BME no later than their 2nd semester of coursework at GMU.

Student must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- String
- Voice
- Woodwind

Courses Required for All Emphases

Code	Title	Credits
MUSI 214	Aural Skills IV	2
Select 9 credits from:		9
MUSI 215	Theory for Pop and Jazz Music

Concentration in Music Technology (MTEC)

Students must complete all concentration requirements as well as requirements for one of the following emphases:

- Electroacoustic Music
- Engineering
- Recording

Courses Required for All Emphases

Code	Title	Credits
MUSI 171	Keyboard Skills I	1
MUSI 172	Keyboard Skills II	1
Select 6 credits from:		6
MUSI 215	Theory for Pop and Jazz Music	
MUSI 216	Theory for 20th- and 21st-Century Music	
MUSI 217	Theory for 18th-Century Music	
MUSI 317	Baroque and Classical Forms	
Six credits of		6
MUSI 248	Applied Music in Composition [1]	
or MUSI 242	Applied Music in Keyboard	
or MUSI 243	Applied Music in Voice	
or MUSI 244	Applied Music in Woodwind	
or MUSI 245	Applied Music in Brass	
or MUSI 246	Applied Music in String	
or MUSI 247	Applied Music in Percussion	
MUSI 252	Popular Music Arranging	3
MUSI 254	Music and Technology	3
MUSI 338	Music History in Society A	3
MUSI 354	Electronic Composition	3
MUSI 355	Recording Techniques	3
MUSI 358	Music Programming	3
MUSI 359	Topics in Music Technology	3
Music Ensemble Options [2]		3
Two credits of		2
MUSI 397	Music Technology Internship	
MUSI 438	Music History in Society B	3
MUSI 439	Music History in Society C	3
MUSI 489	Music Technology Capstone	3
Lab Science (Mason Core)		4
6-7 credits of general electives		6-7
Total Credits		59

[1] See Music advisor for permission and course options.

[2] Transfer students must earn at least 2 credits at Mason.

Emphasis Requirement

Music Technology: Electroacoustic Music

Code	Title	Credits
Core Courses		
MUSI 359	Topics in Music Technology [1]	3
Four credits of		4
MUSI 448	Applied Music in Composition	
Two credits of		2
MUSI 485	Chamber Ensembles (Mason Core) (Healing Arts Ensemble or Contemporary Ensemble)	
MATH		
Select one from the following:		3-4
MATH 106	Quantitative Reasoning (Mason Core)	
MATH 108	Introductory Calculus with Business Applications (Mason Core)	
MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 115	Analytic Geometry and Calculus I (Honors) (Mason Core)	
MATH 125	Discrete Mathematics I (Mason Core)	
Additional Coursework		
Select 13-14 credits from the following: [1]		13-14
MUSI 228	Applied Music in Composition	
or MUSI 248	Applied Music in Composition	
or MUSI 448	Applied Music in Composition	
MUSI 359	Topics in Music Technology	
MUSI 397	Music Technology Internship	1-4
MUSI 485	Chamber Ensembles (Mason Core) (1-3 credits)	
Coursework from any of the following prefixes:		
CS		
ECE		
IT		
MATH		
PHYS		
Total Credits		27-30

[1] Must be electroacoustic music emphasis.

[2] At least one credit of additional coursework or general electives must come from 300 or 400 level courses.

Music Technology: Engineering Emphasis

A double degree in a STEM field or the following:

Code	Title	Credits
MATH		
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4

or MATH 115	Analytic Geometry and Calculus I (Honors) (Mason Core)	
Additional Coursework [1]		
Coursework from any of the following prefixes:		22
CS		
ECE		
IT		
MATH		
MBUS		
PHYS		
Total Credits		26

[1] At least 10 credits from additional coursework or general electives must come from 300 or 400 level courses.

Music Technology: Recording Emphasis

Code	Title	Credits
Courses		
BUS 100	Business and Society (Mason Core)	3
MUSI 359	Topics in Music Technology [1]	3
Two credits of		2
MUSI 395	Teaching Internship	
MATH		
Select one from the following:		3-4
MATH 106	Quantitative Reasoning (Mason Core)	
MATH 108	Introductory Calculus with Business Applications (Mason Core)	
MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 115	Analytic Geometry and Calculus I (Honors) (Mason Core)	
MATH 125	Discrete Mathematics I (Mason Core)	
Additional Coursework [2]		
Select 14-15 credits of additional coursework from the following:		14-15
MUSI 221	Applied Music I (1-4 credits)	
MUSI 359	Topics in Music Technology	
MUSI 397	Music Technology Internship	1-4
MUSI 485	Chamber Ensembles (Mason Core) (1-3 credits)	
Coursework from any of the following prefixes:		
ECE		
ECON		
IT		
MATH		
MBUS		
PHYS		
Total Credits		27-30

[1] Topic must be in Recording emphasis.

[2] At least 5 credits from additional coursework or general electives must come from 300 or 400 level courses.

Concentration in Performance (PFM)

Students must complete all concentration requirements as well as requirements for one of the following emphases:

- Brass
- Guitar
- Keyboard
- Percussion
- String
- Voice
- Woodwind

Courses Required for All Emphases

Code	Title	Credits
MUSI 214	Aural Skills IV	2
Select 9 credits from:		9
MUSI 215	Theory for Pop and Jazz Music	
MUSI 216	Theory for 20th- and 21st-Century Music

MUSI 485	Chamber Ensembles (Mason Core)	1
MUSI 280	Athletic and Ceremonial Ensemble (Mason Core) For Music Technology Students only	1

4-Year Plan

Bachelor of Music Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on prerequisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

Music Technology Electroacoustic

First Year

Fall Semester	Credits	Spring Semester	Credits
ENGH 101	3	MATH 106, 108, 113, 115, or 125	3-4
MUSI 113	1	MUSI 114	1
MUSI 115	3	MUSI 217 or 216	3
MUSI 171	1	MUSI 172	1
MUSI 254	3	MUSI 251	3
MUSI 300	0	MUSI 300	0

Applied Music (Major Instrument)	2	Applied Music (Major Instrument)	2
Ensemble	1	Ensemble	1
	14		14-15

Second Year

Fall Semester	Credits	Spring Semester	Credits
Western Civilization/ World History	3	Natural Science with or without lab	3
MUSI 213	2	MUSI 300	0
MUSI 215 or 317	3	MUSI 355	3
MUSI 273	1	Applied Music (Composition)	2
MUSI 300	0	Music Technology Elective	3
Applied Music (Major Instrument)	2	General Elective	3
Ensemble	1	Chamber Ensemble (NSC or Healing Arts Ensemble)	1
General Elective	3		
	15		15

Third Year

Fall Semester	Credits	Spring Semester	Credits
Literature	3	ENGH 302	3
Natural Science w/lab	4	MUSI 252	3
MUSI 300	0	MUSI 359	3
MUSI 354	3	MUSI 338	3
MUSI 431	3	300-400 level Music Technology Elective	3
Applied Music (Composition)	2		
Chamber Ensemble (NSC or Healing Arts Ensemble)	1		
	16		15

Fourth Year

Accelerated Master's

Music, BM (Performance)/Music, Accelerated MM (Performance)

Overview

Students in the Music, BM (Performance concentration) have the option of obtaining an accelerated Music, MM (Performance concentration).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit the following:

- An Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies
- 1-2 page Goals Statement
- Two letters of recommendation
- In addition, all applicants must complete a live performance audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music website.

Interested students should contact the Senior Academic Advisor, School of Music, for more details about the application process.

Degree Requirements & Reserve Graduate Credit

After admission and having earned 90 undergraduate credits, accelerated master's students complete 6 credits of graduate coursework in their field of study (with a 3.00 GPA or better in each course), specified by their undergraduate and graduate advisors. These credits will apply to the undergraduate degree and provide the student advanced standing in the MM Performance program. All graduate course prerequisites must be completed prior to enrollment. While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

Students in the BM (Performance)/MM (Performance) accelerated degree program must fulfill all university requirements for the master's degree, including a minimum of 18 applicable graduate credits taken after the bachelor's degree has been completed and posted to the student's academic record. Successful completion of the accelerated MM will require one summer of coursework between years 4 and 5.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students amy need a longer timeframe to complete requirements.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see Academic Policies.

Music, BM/Arts Management, Accelerated MA

Overview

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of Capstone, which is only offered in Fall and Spring. Students may need a longer timeframe to complete all requirements.

This accelerated option is offered through joint cooperation between the School of Music and the Arts Management Program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see the Academic Policies section of the catalog.

Admissions

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Option Requirements.

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of C in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credits

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Music. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Music, MM

Banner Code: AR-MM-MUSI

Music Academic Advisor

A417 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/graduate/

The Music, MM degree is offered as an educational channel to meet the intellectual and career needs of qualified students. It is a comprehensive and advanced program of study with a choice of concentrations in performance, music education, composition, conducting, jazz studies, collaborative piano, and pedagogy. The Music, MM with a concentration in music education does not provide licensure to teach music in public or private schools.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified on the Graduate Admissions policy page (https://catalog.gmu.edu/admissions/graduate-policies/). Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Diagnostic Entrance Exam

All students except those enrolled in the MM in music education are required to complete diagnostic entrance examinations in music theory, music history, aural skills, and basic keyboard skills. These examinations must be taken prior to the beginning of the first semester of graduate study. A sufficient placement score can reduce or eliminate prerequisites for some of the 600-level and above courses in music theory and history.

Foreign Language Exams (Vocal Performance Emphasis)

Students in the MM degree program (emphasis in vocal performance) must take proficiency exams in French, German, Italian, and English to demonstrate diction competency. Students may be required to take MUSI 525 (https://catalog.gmu.edu/search/?P=MUSI%20525) Performance Seminar and Vocal Literature for Singers and Accompanists I and MUSI 526 (https://catalog.gmu.edu/search/?P=MUSI%20526) Performance Seminar and Vocal Literature for Singers and Accompanists II.

Comprehensive Exit Exam

All students are required to pass a comprehensive exit exam except those enrolled in the MM in music education (online and face-to-face modalities). This exam is normally administered during the graduation semester. August graduates should consult with the Director of Graduate Studies about the timing of their exit exams prior to their final spring semester. This exam is usually a three-hour written test, with questions based primarily on course work the student has taken toward the degree at Mason. Students enrolled in the MM in music education (online and face-to-face modalities) will be required to submit a comprehensive electronic portfolio in place of a comprehensive exit exam. For students in the music education concentration, the portfolio is normally submitted during the graduation semester or, in the case of students selecting the thesis option in the music education concentration, on completion of 24 credits of course work and immediately before beginning work on the thesis.

Policies

500- to 800-level music courses may be counted as electives except for the following classes: MUSI 501, MUSI 502, MUSI 516, MUSI 532, MUSI 533. These are review courses that cover undergraduate-level material and they may not be counted toward the MM, DMA, or Ph.D.

For policies governing all graduate degrees, see AP.6 Graduate Policies. See College of Visual and Performing Arts for policies specific to the college.

Program Requirements

A student must successfully complete the appropriate 30 credits in graduate music courses. With approval of the graduate advisor, 3 non-music graduate credits may be taken.

The student is admitted as concentrating in one of seven areas: performance, music education, composition, conducting, jazz studies, collaborative piano, or pedagogy. All students are required to complete the 11 credits described as General Requirements plus 19 credits in one of the six areas identified as Additional Requirements. There are some limited possibilities for double concentrations. For details, see the director of graduate studies.

Requirements

Degree Requirements

Total credits: 30

General Requirements for All Concentrations

Music Education students will have 9 credits of General Requirements and 21 credits of Concentration Requirements; all other concentrations will have 11 credits of General Requirements and 19 credits of Concentration Requirements.

Code	Title	Credits
Select 2 credits of Graduate Ensemble (all concentrations except Music Education) from the following:		2
MUSI 681	Graduate Choral Ensembles	
MUSI 682	Wind Symphony	
MUSI 683	Symphonic Band	
MUSI 685	Graduate Chamber Ensemble	
MUSI 687	Symphony Orchestra	
MUSI 688	Opera and Musical Theater Ensemble	
MUSI 689	Jazz Ensemble	
MUSI 611	Analytical Techniques	3
or MUSI 610	Topics in Music Theory	
or MUSI 710	Advanced Topics in Music Theory	
MUSI 630	Topics in Music History and Literature	3
or MUSI 640	Topics in World Musics	
or MUSI 730	Advanced Topics in Music History

Accelerated Master's

Music, BM (Performance)/Music, Accelerated MM (Performance)

Overview

Students in the Music, BM (Performance concentration) have the option of obtaining an accelerated Music, MM (Performance concentration).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admissions Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 100 credits. Applicants should submit the following:

- An Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies
- 1-2 page Goals Statement
- Two letters of recommendation
- In addition, all applicants must complete a live performance audition. Arrangements for an audition must be made in advance by contacting the School of Music before the scheduled audition date. Auditions are held approximately once per month. Audition dates and audition application forms are available through the School of Music website.

Interested students should contact the Senior Academic Advisor, School of Music, for more details about the application process.

Degree Requirements & Reserve Graduate Credit

After admission and having earned 90 undergraduate credits, accelerated master's students complete 6 credits of graduate coursework in their field of study (with a 3.00 GPA or better in each course), specified by their undergraduate and graduate advisors. These credits will apply to the undergraduate degree and provide the student advanced standing in the MM Performance program. All graduate course prerequisites must be completed prior to enrollment. While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

To apply these credits to the master's degree, students should use the Bachelor's/Accelerated Master's Transition Form.

Students in the BM (Performance)/MM (Performance) accelerated degree program must fulfill all university requirements for the master's degree, including a minimum of 18 applicable graduate credits taken after the bachelor's degree has been completed and posted to the student's academic record. Successful completion of the accelerated MM will require one summer of coursework between years 4 and 5.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. The regular designed timeframe would be a start in the Fall and completion of all coursework in the Summer five years later with the exception of

Capstone, which is only offered in Fall and Spring. Students amy need a longer timeframe to complete requirements.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see Academic Policies.

Musical Arts, DMA

Banner Code: AR-DMA-MUAR

Music Academic Advisor

A417 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1392
Email: music@gmu.edu
Website: music.gmu.edu/degree-programs/graduate/

The Doctor of Musical Arts (DMA) requires 90 credits, 60 credits beyond the Master's degree in music. The doctor of musical arts concentrations are composition, conducting, and performance. While these concentrations share some of the required coursework, each is also distinct in course requirements. Professional musicians earn the DMA to enhance and extend their knowledge and practice within their area of specialization. The DMA student focuses on the profession of music performance, as well as the theory and practice of the discipline.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified on the Graduate Admissions policy page (https://catalog.gmu.edu/admissions/graduate-policies/). Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Policies

500- to 800-level music courses may be counted as electives except for the following classes: MUSI 501, MUSI 502, MUSI 516, MUSI 532, MUSI 533. These are review courses that cover undergraduate-level material and they may not be counted toward the MM, DMA, or Ph.D.

For policies governing all graduate degrees, see AP .6 Graduate Policies. See College of Visual and Performing Arts for policies specific to the college.

Reduction of Credit

Students must have a master's degree before being admitted to the Doctor of Musical Arts Program. Most students receive a reduction of study of 30 credits based on their previous master's degree.

Requirements

Degree Requirements

Total credits: 90

The following degree plan is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Placement Examinations

Prior to the beginning of the first semester of doctoral studies, the student must complete placement examinations in music theory, music history, and musicianship (including aural skills and keyboard skills). Positive scores on the placement exams may reduce or eliminate prerequisites for courses in music history and music theory. Recitals can be scheduled only after completion of any necessary prerequisites in music theory, music history, and musicianship.

Doctoral Coursework

The doctoral student must maintain a minimum of 3.00 GPA in courses presented on the degree plan, which may include no more than 6 credits with a grade of C. The GPA calculation excludes all transfer courses and Mason extended studies or non-degree credits not formally approved for the degree.

Students must complete the following required courses as well as those in their chosen concentration:

Code	Title	Credits
Select 3 credits of Music Theory elective from the following:		3
MUSI 610	Topics in Music Theory	
MUSI 613	Graduate Orchestration	
MUSI 614	Music Theory Pedagogy	
MUSI 640	Topics in World Musics	
MUSI 710	Advanced Topics in Music Theory	
MUSI 780	Doctoral Research Methods in Music	
MUSI 810	Doctoral Seminar in Analysis	
MUSI 830	Doctoral Seminar in Music History	3
Two credits of		2
MUSI 890	Doctoral Recital	
CVPA 600	CVPA Graduate ProSeminar [1]	0
Total Credits		8

[1] Must be taken within the student's first 2 semesters.

Concentration in Composition (CPO)

Code	Title	Credits

MUSI 880 & MUSI 720	Doctoral Major Ensemble and Advanced Topics in Applied Music	
MUSI 880 or MUSI 720	Doctoral Major Ensemble Advanced Topics in Applied Music	
Select 3 credits from the following:		3
MUSI 610	Topics in Music Theory	
MUSI 710	Advanced Topics in Music Theory	
MUSI 712	Composition for Conductors and Performers	
MUSI 810	Doctoral Seminar in Analysis	
Total Credits		39

[1] Approved electives could be from music history, music literature, world music, music theory, conducting, music education, secondary Applied Music, ensemble (including chamber music), or relevant nonmusic courses.

Residency

More than half of all credits (minimum 72) must be taken in doctoral degree status, after admission to the degree program. One year (fall and spring) of consecutive full-time study (9 credits per semester; 18 credits per year) is recommended. Or, the academic residency requirement may be fulfilled by earning 21 credits within 12 months (fall and spring semesters and summer term). Academic residency should be completed during the first year of study. Any necessary prerequisite courses at the 500 level can be included to meet the residency requirement. Language courses at the undergraduate level may not. Note: The academic residency does not imply meeting the standards of Virginia residency for tuition purposes.

Language Requirements

Reading proficiency is required in a language appropriate to the student's major area of study. Normally, this will be German, French, or Italian. The director of graduate studies and the Graduate Committee will determine the appropriate area of study. Reading proficiency may be accomplished by completing a reading examination provided by the music faculty. The reading examination provided by the faculty will normally consist of translation (with dictionary) of appropriate technical passages relevant to the student's area of study within a two-hour period. The language reading proficiency should be completed prior to earning 12 credits of courses at the 600 level or above.

Graduate Committee

The Graduate Committee will evaluate the progress of the student annually. Continuation in the program is subject to the endorsement of this group.

Comprehensive Exams

After the completion of required courses (excluding dissertation credits) or during the semester when completion of those courses is anticipated,

the student will take comprehensive examinations. The written exams will be followed by a one-hour oral exam to clarify issues included in the written exams.

Doctoral Research

Code	Title	Credits
Select 13 credits from the following:		13
MUSI 998	Dissertation Proposal (a minimum of 3 credits)	
MUSI 999	Dissertation (a minimum of 7 credits)	
Total Credits		13

Advancement to Candidacy

Before doctoral students may be advanced to candidacy by the dean of the College of Visual and Performing Arts, they must complete all coursework required by the program faculty, be certified in all relevant doctoral research skills, pass the comprehensive exams, and be recommended by the Graduate Committee, the director of graduate studies, and the director of the School of Music. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for MUSI 999 Dissertation.

Dissertation Committee

The dissertation is the capstone experience of doctoral study. The dissertation will be guided by the Dissertation Committee consisting of at least three members of the music faculty. The student's major professor will chair the committee. The director of graduate studies of the School of Music may be part of the committee; if not, he or she will serve exofficio. All Dissertation Committee members will be appointed by the dean of the College of Visual and Performing Arts and have graduate faculty status, as approved by the university provost. Performance and composition recitals are also subject to the approval of the Dissertation Committee.

Final Defense and Graduation

When all degree requirements have been satisfied, including completion of the doctoral dissertation, the doctoral candidate may request a doctoral defense. Approval for the defense must be obtained from the Dissertation Committee, the director of graduate studies and the director of the School of Music, and the dean of the College of Visual and Performing Arts. Notice of a defense must be circulated to the university community two weeks before the defense date.

All relevant rules regarding schedule, fees, and other matters as described in the catalog must be followed. All copies of the dissertation materials and fees must be paid before the doctoral degree is awarded.

School of Theater

Kevin Murray, Associate Director

A407 deLaski Performing Arts Building
Fairfax Campus

Phone: 703-993-1120
Email: theater@gmu.edu
Website: theater.gmu.edu

Undergraduate Programs

Theater BA and BFA

The School of Theater offers Bachelor of Arts (BA) and Bachelor of Fine Arts (BFA) degrees and prepares students for graduate study or entry into the profession through rigorous, concentrated, and individualized training; however, students are encouraged to maintain wide-ranging interests within the school and throughout the university's extensive offerings. Theater majors organize their advanced work within the major to include classes in areas of emphasis including performance, design and technical theater, and other theater studies.

Theater BA Concentrations

Theater majors must complete their Bachelor of Arts degree with a concentration in one of the following areas: Design and Technical Theater, Performance (Acting and Directing), Theater Education for Theater Arts PK-12, or Theater Studies. Students must earn a minimum 2.5 cumulative GPA to complete a BA. Bachelor of Arts students must use some/all general electives to complete a minor, double major, double degree or intermediate-level proficiency in one foreign language.

Certification for Theater Education for Theater Arts PK-12

The Theater Education for Theater Arts PK-12 concentration is approved by the Virginia State Department of Education and administered through the College of Education and Human Development, which is accredited by the National Council for the Accreditation of Teacher Education (NCATE). Upon degree conferral and completion of all requirements, students will be eligible to apply for Virginia state licensure. Minimum scores on the Praxis Core and VCLA tests must be achieved before state licensure is granted.

Students must be formally accepted into the Theater Education for Theater Arts PK-12 concentration.

Theater BFA Concentrations

Theater majors must complete their Bachelor of Fine Arts degree with a concentration in one of the following areas: Design for Stage and Screen, Performance for Stage and Screen (Acting and Directing), or Musical Theater Performance. Students must earn a minimum 2.5 cumulative GPA to complete a BFA.

Graduate Programs

Accelerated Master's Program

The School of Theater offers a Theater, BA/Arts Management, Accelerated MA option which allows undergraduate students to take graduate classes that can be used towards a designated Master's degree. Undergraduates who wish to pursue the accelerated Master's route should talk to their academic advisor first to see if they qualify. Students must be within 75-90 credits of their Bachelor's program to be eligible to apply; those who have earned more than 100 credits will not be considered. Students must be approved by their academic advisor and formally apply and be accepted to the Master's program through an Accelerated Master's application. For more information about admissions requirements and the application process, students should visit the college website (http://cvpa.gmu.edu).

Visual and Performing Arts, MFA

The School of Theater offers one concentration under the Master of Fine Arts, Visual and Performing Arts degree: Theater. Applicants to the program must designate which concentration they intend to apply for on

the application. Each concentration has its own unique set of admissions requirements and program requirements.

Graduate Certificate

Teaching Theatre PK-12 Graduate Certificate

The Teaching Theater PK–12 Graduate Certificate is a pre-service program that prepares students for Theatre Arts licensure by the Commonwealth of Virginia. In conjunction with the College of Education and Human Development, the Certificate curriculum consists of graduate-level Theater and Education courses, field experience observation and pre-service teaching internship.

Adjunct Faculty

Alman, Armstrong, Cox, Gaines, Goldstein, Hobson, Kessinger, Lee, Lennon, Maaty, Ohanian, Robinson Jr., Sittig, Yamamoto

Requirements & Policies

Requirements

Admission Requirements

Entrance to the program is by audition/interview or portfolio review. Information about the audition process, including dates, can be found on the School of Theater website. Admission to the university is determined by the Office of Admissions (https://www2.gmu.edu/admissions-aid/).

Program Audition, Portfolio Requirements

Students interview with a faculty panel in order to apply to become a Theater major. Additionally, actors audition for the program; designers and technicians undergo a portfolio review (B.A. candidates may opt to submit an essay); generalists, theater educators, and writers provide written statements as described on the School of Theater website (https://theater.gmu.edu/). See additional details on the College of Visual & Performing Arts Admissions page (https://cvpa.gmu.edu/admissions/undergraduate-admissions/school-theater-admissions/).

We are looking for:

- An appropriate level of craft and artistry.
- Commitment to the work as demonstrated by preparation for the interview, audition, and/or portfolio review.
- A willingness to accept direction, criticism and mentoring.
- A willingness and ability to collaborate with students, faculty, and professionals.

Students must schedule their audition or interview through SlideRoom **(**https://gmucvpa.slideroom.com/#/login/program/43722**)**. Additional details can be found on the College of Visual & Performing Arts Admissions page (https://cvpa.gmu.edu/admissions/undergraduate-admissions/school-theater-admissions/). You will receive an email confirmation of your program audition or portfolio review date.

If you have any questions, please contact the School of Theater (https://theater.gmu.edu/). An applicant may request a virtual appointment during business hours. In person Theater major program auditions, portfolio reviews, and interviews will take place within the School of Theater on the Fairfax Campus.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated writing-intensive in their major at the 300 level or above. Students seeking a BA or BFA in Theater fulfill this requirement by successfully completing THR 350 Script Analysis or THR 482 Advanced Screenplay Workshop.

Production Requirements

Participation in Theater at Mason productions is expected of all declared majors. Students must have a minimum 2.5 cumulative GPA to participate in Theater at Mason productions.

Theater Honors Program

See the Theater, BA or Theater, BFA for specific details.

BA/BFA Policies

Students seeking to earn a BA or BFA as a second bachelor's degree, either concurrently or sequentially, must complete all Theater degree requirements. Students must earn a minimum 2.00 cumulative GPA in their major. A student must earn a minimum cumulative GPA of 2.5 to complete a BA with a concentration or a BFA.

This minor is offered jointly with the College of Education and Human Development (School of Recreation, Health, and Tourism). This minor, available to all Mason undergraduate students, offers the opportunity to study special event management and event technologies, design and production for installations and special events. Students will gain insights into industry standards and practices regarding planning, managing, and executing live events and presentations. The required courses in this minor provide students with a foundational overview of management and production. Students can complement that knowledge with specific electives that meet their individual interests in events and areas of design and technology.

Admissions & Policies

The Teaching Theater PK–12 Graduate Certificate is a pre-service program that prepares students for Theatre Arts licensure by the Commonwealth of Virginia. In conjunction with the College of Education and Human Development, the certificate curriculum consists of graduate-level theater and education courses, field experience observation and pre-service teaching internship.

This certificate can be earned on a full-time or part-time basis.

This certificate program qualifies for Title IV Federal Financial Aid.

For more information about this program please visit Graduate Admissions FAQ (https://cvpa.gmu.edu/admissions/graduate-admissions/grad-admissions-faqs/) or the School of Theater website (https://theater.gmu.edu/)

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified on the Graduate Admissions policy page (https://catalog.gmu.edu/admissions/graduate-policies/). Specific graduate admissions requirements can be found on the College of Visual and Performing Arts Graduate Admissions requirements page (https://cvpa.gmu.edu/admissions/graduate-admissions/graduate-admission-requirements/).

Policies

Students must earn a B- or higher in all coursework. For policies governing all graduate programs see AP.6 Graduate Policies.

Requirements

Certificate Requirements (Licensure)

Total credits: 21

This certificate may be pursued on a full-or part-time basis.

The BA degree stresses the breadth of a liberal arts education in the belief that such study, combined with serious practical training and experience, offers the best preparation for a life in theater and screen.

Students complete the theater core. To organize their advance work within the major, students elect a course of study from four concentrations:

- Performance (Acting and Directing)
- Design and Technical Theater
- Theater Education for Theater Arts PK-12
- Theater Studies

Admissions & Policies

Admissions

Entrance to the program is by audition/interview or portfolio review. Information about the audition process, including dates, can be found on the School of Theater website (https://theater.gmu.edu).

Admission to the university is determined by the Admissions Office. University-wide admissions policies can be found in the Undergraduate Admissions Policies section of this catalog.

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (https://catalog.gmu.edu/policies/academic/undergraduate-policies/).

Dramatic Literature		**3**
Select one course from the following: [3]		
THR 352	Dramatic Literature Seminar	
THR 353	Advanced Studies in Theater History	
THR 354	American Voices	
THR 359	World Stages (Mason Core) [1]	
THR 424	Contemporary Women Playwrights	
Total Credits		43

1. May fulfill either Mason Core Global Understanding requirement or dramatic literature requirement but not both.
2. Design & Tech concentration students must complete THR 240 for the Design/Tech in the Discipline requirement.
3. or with permission of Director

Concentrations

Theater majors earning a BA in Theater must select one of the following concentrations:

Concentrations

- Concentration in Design and Technical Theater (DTT)
- Concentration in Performance (PFM)
- Concentration in Theater Education for Theater Arts PK-12 (THEA)
- Concentration in Theater Studies (THST)

Concentration in Design and Technical Theater (DTT)

Provides a foundation of knowledge, technique, and experience in one or more areas of theater design and technology in preparation for advanced study and professional work in the field.

Code	Title	Credits
THR 339	Principles of Design	3
THR 492	Advanced Practicum	3

THR 437	Advanced Sound Design	
Upper-Level Theater Electives		12
12 credits of 300-400 level THR coursework		
Total Credits		27

1 or with permission of Director

2 Registration by audition/interview only. Students completing THR 428 for the first time must register for 3 credits. Students repeating the course may elect to register for 1-3 credits.

Concentration in Performance (PFM)

Designed for the serious student of acting and directing with professional aspirations. Solid grounding in the fundamentals of performance analysis and basic training of the actor's instrument are complemented by a rigorous, sequential instruction in the various facets of the actor's craft.

At its core, the Performance Concentration is a blend of Modern and Classical actor training using a Stanislavski-grounded approach balanced with techniques for understanding texts written two hundred years before "motivation" and "characterization" entered the critical vocabulary. Rounding out the curriculum is specialized study in vocal production and movement technique. Matriculation in this program expresses a profound commitment to a rigorous intellectual, physical and emotional investigation of the discipline of performance over a two-year period. Professional development is enhanced with ongoing student progress reviews, support and advising from Performance Concentration faculty.

Code	Title	Credits
THR 301	Advanced Study in Voice	3
THR 310	Acting II	3
Select two courses from the following: [1]		6

THR 304	Advanced Movement for Actors	
THR 305	Unarmed Stage Combat	
THR 306	Movement in Musical Theater	
THR 365	Characterization	
THR 405	Advanced Stage Combat	
THR 421	One-Person Show	
THR 427	Musical Theater Workshop	
Upper-Level Theater Electives		12
12 credits of 300-400 level THR coursework		
Total Credits		27

1 or with permission of Director

2 Registration by audition/interview only. Students completing THR 428 for the first time must register for 3 credits. Students repeating the course may elect to register for 1-3 credits.

Concentration in Theater Education for Theater Arts PK-12 (THEA)

Designed for students interested in pursuing theater education. Students pursuing a concentration in Theater Education for Theater Arts PK-12 must:

- Maintain an overall GPA of 2.80 in all coursework completed at Mason and in course work at all institutions of higher learning combined.
- Earn no grade lower than a C in theater and professional education courses needed for graduation.

Upon completion of all required coursework students must complete 15 weeks of a full-time student teaching internship (THR 455 Theater Education Internship). Applications for placement, subject to approval of the unit, are submitted to the Field Placement Specialist in the College of Education and Human Development at the beginning of the previous semester. In addition, students must pass the VCLA before student teaching.

Code	Title	Credits
Required Core Courses		
THR 448	Foundations of Theater Education	3
THR 449	Elementary Theater Education	3
THR 450	Secondary Theater Education	3

EDUC 302	Human Growth and Development	3
Six credits of		6
THR 455	Theater Education Internship	
Total Credits		27

Concentration in Theater Studies (THST)

Designed for the Theater generalist or the writer specializing in playwriting, screenwriting, production dramaturgy, season planning, theater criticism, and translation/adaptation for the stage. The Concentration in Theater Studies requires each student to work with a faculty advisor to craft an individualized course of study that challenges their development conceptually and creatively for a total of 27 credits of upper-division (300-400 level) THR courses. Concentration curriculum must include a minimum of three credits of THR 422 Performance: Process and Portfolio or THR 492 Advanced Practicum.

General Electives

Code	Title	Credits
BA students must use some/all general electives to complete a		13
Minor		
Double Major [1]		
Double Degree [1]		

Intermediate-level proficiency in one foreign language	
Remaining electives [2]	

1 Must be outside student's primary major field of study.

2 May be taken inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300 and 400 level).

4-Year Plan

Bachelors of Arts in Theatre Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

	15		16-24

Total Credits 120-128

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Honors

Honors in the Major

Highly-qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three honors-specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

Accelerated Master's

Theater, BA/Arts Management, Accelerated MA

Overview

Undergraduates in Theater may apply to the accelerated master's degree in Arts Management. If accepted, students will be able to earn a BA in Theater and an MA in Arts Management after satisfactory completion of 150 credits.

Students choosing the accelerated option must fulfill all university requirements for the master's degree. The regular designed timeframe would be a start in the Fall and the completion in the Summer five years later, but longer time frames may also be available.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Applicants to accelerated master's programs must have completed at least 75 credits that apply to their undergraduate degree (with at least 24 credits at Mason) and no more than 90 credits. Applicants should submit an Accelerated Master's Program Application, available from the College of Visual and Performing Arts (CVPA) Graduate Studies. It includes the proposed conferral date for the undergraduate degree and the two graduate courses that are to be applied to the undergraduate degree.

Interested students should contact the Arts Management Program Office for more details about the application process.

Accelerated Option Requirements

As an undergraduate, the accelerated master's student is to complete the two graduate courses indicated on their Accelerated Master's Program application with a minimum grade of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major. On completion and conferral of the undergraduate degree in the semester indicated in the application, they submit the Bachelor's/Accelerated Master's Transition Form (which shall incorporate all of the Graduate Admission requirements of the university) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. They must meet all master's degree requirements except for the two courses (6 credits) they completed as undergraduates. The Internal Internship (AMGT 742 Internship I) will be within Theater at Mason (generally with the School of Theater). Students will begin their master's program in the semester immediately following conferral of the undergraduate degree, and they may also begin in the summer term.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with permission of the School of Theater. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation and must be approved by the Dean's Office.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form.

Admissions & Policies

Admissions

Entrance to the program is by audition/interview or portfolio review. Information about the audition process, including dates on the School of Theater website (https://theater.gmu.edu). Admission to the university is determined by the Admissions Office.

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies (https://catalog.gmu.edu/policies/academic/undergraduate-policies/).

Requirements

Degree Requirements

Total credits: 120

Mason Core

Code	Title	Credits
Foundation Requirements		
Oral Communication		3
Information Technology		3
Quantitative Reasoning		3
ENGH 101	Composition (Mason Core) [1]	3
ENGH 302	Advanced Composition (Mason Core) [1]	3
Core Requirements		
Literature		3
Arts [2]		3
Natural Science [3]		7
Western Civilization/World History		3
Global Understanding		3
Social and Behavioral Sciences		3
Total Credits		37

1. Nonnative speakers of English with limited proficiency in the language may substitute ENGH 100 Composition for Multilingual Writers (Mason Core) for ENGH 101 Composition (Mason Core). Students must attain a minimum grade of C in ENGH 100 Composition for Multilingual Writers (Mason Core) or ENGH 101 Composition (Mason Core), as well as in ENGH 302 Advanced Composition (Mason Core), to fulfill degree requirements.
2. Outside the major. Students earning a concentration in Musical Theater Performance must take DANC 125 Modern/Contemporary Dance I (Mason Core), DANC 131 Beginning Jazz Technique (Mason Core), DANC 145 Ballet I (Mason Core), DANC 161 Beginning Tap Dance (Mason Core), DANC 225 Modern/Contemporary Dance II (Mason Core), DANC 231 Intermediate Jazz Technique (Mason Core), DANC 245 Ballet II (Mason Core), or DANC 331 Advanced Jazz Dance (Mason Core).
3. Including one laboratory science

Major

Code	Title	Credits
Theater Core Requirements		
Note: All THR majors may not double count THR courses within the major. All THR courses count either towards the degree core or the concentration, but not both.		
THR 150	Greeks to Restoration (Mason Core)	3
THR 151	Romanticism to Present (Mason Core)	3
THR 198	Theatrical Construction Practicum	1
THR 201	Stage Management	3
THR 210	Acting I (Mason Core)	3
THR 230	Fundamentals of Production (Mason Core)	3
THR 300	Voice and Speech	3
THR 329	Directing	3
THR 350	Script Analysis	3
THR 411	Great Film Directors (Mason Core)	3
or THR 412	Great Film Performances (Mason Core)	
Movement		**3**
Select one course from the following:		
THR 303	Movement for Actors	
THR 304	Advanced Movement for Actors	
THR 305	Unarmed Stage Combat	
THR 306	Movement in Musical Theater	
Synthesis		**3**
Select one course from the following:		
THR 440	Advanced Studies in Directing/ Dramaturgy (Mason Core)	
THR 496	Text in Production (Mason Core)	
Design/Tech in the Discipline		**3**
Select one course from the following: [3]		
THR 240	Introduction to Theatrical Design [2]	
THR 313	Event Technical Production	
THR 314	Lighting Stagecraft	
THR 315	Sound Engineering	
THR 316	Scene Painting	
THR 330	Seminar in Technical Theater	
THR 342	Makeup Design	
Writing in the Discipline		**3**
Select one course from the following: [3]		
THR 351	Dramatic Theory and Criticism	
THR 380	Playwriting I	
THR 382	Screenplay Workshop	
THR 484	Translation Adaptation for Stage Screen	
Dramatic Literature		
Select one course from the following: [3]		3
THR 352	Dramatic Literature Seminar	
THR 353	Advanced Studies in Theater History	
THR 354	American Voices	
THR 359	World Stages (Mason Core) [1]	
THR 424	Contemporary Women Playwrights	
Total Credits		43

[1] May fulfill Mason Core global understanding or the upper-level dramatic literature requirement but not both.

[2] Design & Tech concentration students must complete THR 240 for the Design/Tech in the Discipline requirement.

[3] or with permission of Director

Concentrations

Theater majors earning a BFA in Theater must select one of the following concentrations:

Concentrations

- Design for Stage and Screen Concentration (DSS)
- Musical Theater Performance Concentration (MTPF)
- Performance for Stage and Screen (Acting and Directing) Concentration (PSS)

Design for Stage and Screen Concentration (DSS)

Code	Title	Credits
THR 339	Principles of Design	3
THR 492	Advanced Practicum	3
Select 9 courses from the following: [1]		27
THR 313	Event Technical Production	
THR 314	Lighting Stagecraft	
THR 315	Sound Engineering	
THR 316	Scene Painting	
THR 330	Seminar in Technical Theater	
THR 331	Drafting and Model Making	
THR 332	History of Fashion and Dress	
THR 333	Scenic Design	
THR 334	Lighting Design	
THR 335	Costume Design	
THR 336	Technical Direction	
THR 337	Sound Design	
THR 340	Advanced Studies in Directing	
THR 342	Makeup Design	
THR 343	Costume Technology	
THR 345	Puppetry	
THR 415	Advanced Sound Engineering	
THR 428	Musical Theater Ensemble [2]	
THR 434	Advanced Lighting Design	
THR 437	Advanced Sound Design	
THR 490	Special Topics in Theater	
THR 491	Seminar on the Profession	
THR 494	Field Experience	
Total Credits		33

[1] or with permission of Director

[2] Registration by audition/interview only. Students completing THR 428 for the first time must register for 3 credits. Students repeating the course may elect to register for 1-3 credits.

Musical Theater Performance Concentration (MTPF)

Code	Title	Credits
Required Core Courses		
MUSI 113	Aural Skills I [1]	1

MUSI 114	Aural Skills II [1]	1

or THR 420	Advanced Performance Studio	
THR 427	Musical Theater Workshop	3
Ensemble		**3**
Select one course from:		
THR 428	Musical Theater Ensemble [2]	
THR 494	Field Experience	
THR 495	Senior Capstone Project	
Movement Elective		**3**
Select one course from: [3]		
DANC 231	Intermediate Jazz Technique (Mason Core)	
DANC 331	Advanced Jazz Dance (Mason Core) (200 level pre-requisite must be met)	
THR 304	Advanced Movement for Actors	
THR 305	Unarmed Stage Combat	
THR 405	Advanced Stage Combat	
Total Credits		40

1 The School of Music offers placement tests in Theory, Sight Singing, Ear Training and Keyboard Skills for students with an exceptional level of competency or prior academic experience in these areas. Placement tests are optional. However, students must pass the specific placement tests in order to receive "credit-by-examination" to be applied for credit to the concentration. These exams are only available the semester you begin coursework at Mason and cannot be scheduled for a later time. Opportunities to take the placement exams and additional exam details are posted on the School of Music website: music.gmu.edu (https://music.gmu.edu)

2 Registration by audition/interview only. Students completing THR 428 for the first time must register for 3 credits. Students repeating the course may elect to register for 1-3 credits.

3 or with permission of Director

Performance for Stage and Screen (Acting and Directing) Concentration (PSS)

Code	Title	Credits
THR 301	Advanced Study in Voice	3
THR 310	Acting II	3
THR 365	Characterization	3
or THR 421	One-Person Show	
THR 410	Acting for the Camera	3
THR 422	Performance: Process and Portfolio	3
or THR 492	Advanced Practicum	
Select 4 courses from the following: [1]		12
THR 320	Performance Studio	
THR 321	Acting Shakespeare	
THR 340	Advanced Studies in Directing	
THR 342	Makeup Design	
THR 420	Advanced Performance Studio	
THR 422	Performance: Process and Portfolio	
THR 423	Audition Techniques: Stage and Camera	
THR 428	Musical Theater Ensemble [2]	
THR 490	Special Topics in Theater	
THR 491	Seminar on the Profession	
THR 494	Field Experience	
Select 2 courses from the following: [1]		6
THR 304	Advanced Movement for Actors	
THR 305	Unarmed Stage Combat	
THR 306	Movement in Musical Theater	
THR 405	Advanced Stage Combat	
THR 427	Musical Theater Workshop	
Total Credits		33

1 or with permission of Director

2 Registration by audition/interview only. Students completing THR 428 for the first time must register for 3 credits. Students repeating the course may elect to register for 1-3 credits.

General Electives

Code	Title	Credits
After fulfilling degree requirements, BFA students may use remaining general electives credits inside or outside of the department. All students are required to take a minimum of 45 credits of upper-division courses (300-400 level).		0-7
Total Credits		0-7

4-Year Plan

Bachelor of Fine Arts in Theater Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

First Year

Fall Semester	Credits	Spring Semester	Credits
THR 150	3	THR 151	3
THR 201 or 210	3	THR Concentration Course	3

THR 230	3	Mason Core (typically COMM 100 or 101)	3
Mason Core (typically ENGH 101)	3	Mason Core (typically Arts - outside the major)	3
Mason Core (typically Quantitative Reasoning)	3	Mason Core (typically Literature)	3
	15		15

Second Year

Fall Semester	Credits	Spring Semester	Credits
THR 201 or 210	3	THR 329	3
THR 350	3	Movement or Design/Tech in the Discipline	3
Movement or Design/Tech in the Discipline	3	THR Concentration Course	3
THR 300 or THR Concentration Course	3	Mason Core (typically HIST 100 or 125)	3
Mason Core (typically Information Technology) or THR Concentration Course	3	Mason Core (typically Information Technology) or THR Concentration Course	3
	15		15

Third Year

Fall Semester	Credits	Spring Semester	Credits
Dramatic Literature or Writing in the Discipline	3	Dramatic Literature or Writing in the Discipline	3
THR 300 or THR Concentration Course	3	Film Study or THR Concentration Course	3
THR Concentration Course	3	THR Concentration Course	3
Mason Core (typically Lab Science)	4	Mason Core (typically ENGH 302)	3
THR 198	1	Mason Core (typically Social & Behavioral Sciences)	3
	14		15

Fourth Year

Fall Semester	Credits	Spring Semester	Credits
Synthesis or THR Concentration Course	3	Synthesis or THR Concentration Course	3
Film Study or THR Concentration Course	3	THR Concentration Course	3
THR Concentration Course	3	THR Concentration Course	3
Mason Core (typically Non-Lab Science)	3	General Elective	3
Mason Core (typically Global Understanding)	3	General Elective	3
		General Elective	1
	15		16

Total Credits 120

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Concentration in Musical Theater Performance

First Year

Fall Semester	Credits	Spring Semester	Credits
THR 150	3	THR 151	3
THR 210	3	THR 230	3
Mason Core (typically ENGH 101)	3	THR 310	3
Mason Core (typically Quantitative Reasoning)	3	Mason Core (typically COMM 100 or 101)	3
DANC Course (Chosen from Mason Core Arts list)	3	Mason Core (typically Literature)	3
MUSI 223	1	MUSI 223	1
	16		16

Second Year

Fall Semester	Credits	Spring Semester	Credits
Mason Core (typically Information Technology)	3	Mason Core (typically Social & Behavioral Sciences)	3
Mason Core (typically HIST 100 or 125)	3	Mason Core (Typically Global Understanding)	3

Movement (THR 303, 304, or 305) or THR 300	3	THR 350	3
THR 427	3	THR 306 or 201	3
MUSI 115	3	MUSI 171	1
MUSI 223	1	MUSI 381	1
		MUSI 223	1
	16		15

Third Year

Fall Semester	Credits	Spring Semester	Credits
Mason Core (typically Lab Science)	4	Mason Core (typically Non-Lab Science)	3
THR 329	3	THR 306 or 201	3
Movement (THR 303, 304, or 305) or THR 300	3	THR 411 or 412	3
THR 320	3	Dramatic Literature or THR 420	3
MUSI 113	1	MUSI 172	1
MUSI 223	1	THR 198	1
		MUSI 223	1
	15		15

Fourth Year

Fall Semester	Credits	Spring Semester	Credits
Mason Core (typically ENGH 302)	3	Synthesis (THR 440 or 496)	3
Dramatic Lit or THR 410	3	Writing in the Discipline or Design/Tech in the Discipline	3
Writing in the Discipline or Design/Tech in the Discipline	3	THR 303, 304, 305, DANC 231, or DANC 331	3
MUSI 114	1-2	THR 428, 494, or 495	3
MUSI 223	1	MUSI 223	1
THR 422 or 365	3		
	14-15		13

Total Credits 120-121

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Honors

Honors in the Major

Highly-qualified students who have completed 75 credits may pursue advanced work leading to graduation with honors in the major. Students apply for Honors in Theater by submitting to the Director (by November 15 or April 15) a two-page written statement outlining their reasons for pursuing advanced coursework and specific professional goals, along with the names of two Mason theater faculty members who have agreed to serve as references.

Students satisfy the honors course sequence by taking three honors-specific courses from their chosen concentration. They must also maintain an overall GPA of 3.50 and a GPA of 3.75 within the major.

Theater Performance Minor

Interdisciplinary Programs and Courses

College Code: UN

Academic Units

- Smithsonian-Mason School of Conservation

Programs

- Applied Science, BAS
- Design Thinking Minor

Applied Science, BAS

Banner Code: UN-BAS-APLS

Administration

- Janette Kenner Muir, Academic Director and Associate Provost for Academic Initiatives and Services
- Marcy R. L. Glover, Curriculum Coordinator
- Krystal Dains, Coordinator, Volgenau School of Engineering concentrations
- Jane Walker, Coordinator, School of Conflict Analysis and Resolution concentration

The Bachelor of Applied Science (BAS) is an undergraduate liberal arts degree program for adult learners. It is designed primarily to deepen student knowledge in an academic area and foster critical thinking, analytic reasoning, and an ability to synthesize information.

The BAS articulates well with specialized Applied Associate Science (AAS) degree programs, providing a streamlined path to completion of traditional academic requirements leading to the baccalaureate degree. It meets students' professional and personal goals while developing a depth of knowledge and proficiency of skill that translates well to the workplace. However, it is not organized in the same way as a traditional baccalaureate degree. Students planning graduate study should consult with an academic advisor prior to undertaking this degree program.

Admissions & Policies

Admissions

As a prerequisite to enrollment in the BAS, students must have received an Associate of Applied Science (AAS) degree from an accredited two-year institution in an approved area of specialization. Students should review specific Admissions details on the program's website. (http://bas.gmu.edu)

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Program Requirements

BAS students must fulfill all requirements for bachelor's degrees including Mason Core requirements, to include 45 credits of upper-level coursework. All Mason Core requirements must be met with either George Mason courses or transferrable equivalents.

The minimum credit requirement for a bachelor's degree is 120 credits; however, while there is some variation between concentration areas, fulfilling all Mason Core requirements and an academic concentration is likely to require most BAS students to complete at least 63-66 credits at George Mason, which may lead to over 120 credits of coursework in order to receive the degree.

Admitted BAS students will be academically advised by the appropriate BAS Program concentration advisor to plan their course of study including completion of the Mason Core, the BAS concentration, and any remaining requirements. See t (http://bas.gmu.edu)he website (http://bas.gmu.edu) for more information.

The degree plan outlined is based on a student who transfers in a minimum of 30 credits from a completed AAS degree. Some of these credits may count only towards the elective requirement within the BAS degree.

Specific concentrations may have additional policies indicated in the Requirements tab.

Requirements

Degree Requirements

Total credits: 120-126

Concentrations are intended to provide focus for the BAS curriculum in an area relevant to the student's AAS degree while allowing for the breadth of study associated with a liberal arts baccalaureate degree. Please note that determination of current transfer work for these concentrations may impact course requirements.

In addition to satisfying all Mason Core requirements, students must satisfy the requirements for one of the eight concentrations.

Concentrations

- Concentration in Applied Conflict Analysis and Resolution (ACAR)
- Concentration in Cyber Security (CYBS)
- Concentration in Cloud Computing (CCG)
- Concentration in Data Analytics (DNIC)
- Concentration in Health, Wellness and Social Services (HWSS)
- Concentration in Human Development and Family Science (HDFS)
- Concentration in Legal Studies (LGLS)
- Concentration in Managerial Leadership (MGL)
- Concentration in Technology and Innovation (TCNV)

Concentration in Applied Conflict Analysis and Resolution (ACAR)

This concentration is in collaboration with the Jimmy and Rosalynn Carter School for Peace and Conflict Resolution.

Code	Title	Credits
Core Requirement		
BAS 300	Building Professional Competencies	3
CONF 101	Conflict and Our World (Mason Core)	3
CONF 301	Research and Inquiry in Conflict Resolution	3
CONF 302	Culture, Identity, and Conflict	3
Select one of the following		3
CONF 320	Interpersonal Conflict Analysis and Resolution	
CONF 330	Community, Group, and Organizational Conflict Analysis and Resolution	
CONF 340	Global Conflict Analysis and Resolution (Mason Core)	
Applied Coursework		
CONF 300	Conflict Resolution Techniques and Practice	3
Choose three credits of Skills Coursework from:		3
CONF 325	Dialogue and Difference	
CONF 370	Internship Field Experience	
CONF 385	International Field Experience	
CONF 398	Special Topics in Advanced Techniques and Practices	
CONF 425	Mediating Conflict	
or foreign language completed at the 202 level.		
CONF 490	RS: Integration (Mason Core)	3
Electives		
In consultation with their advisor, students are required to take 18 credits of concentration coursework; at least 9 credits must be from the CONF department. The concentration list can be found in the catalog or on our website.		18
Total Credits		42

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Cyber Security (CYBS)

This concentration is in collaboration with the Volgenau School of Engineering and is only available to students who graduate with an AAS degree in Cyber Security from a partner school. Full admissions requirements can be viewed on the program website (http://bas.gmu.edu).

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BAS with a Cyber Security concentration, students must have a C or better in their core, concentration, and technical focus courses.

Code	Title	Credits

MIS 341	Cloud Computing Essentials	
MIS 441	Cloud System Management	
HAP 318	Introduction to IT Methods for Healthcare	
HAP 360	Introduction to Health Information Systems	
COMM 320	Business and Professional Communication	
CRIM 310	Introduction to the Intelligence Community	
CRIM 312	Intelligence Analysis Techniques	
CRIM 350	Counterintelligence	
Total Credits		78

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Cloud Computing (CCG)

This concentration is in collaboration with the School of Business and the Volgenau School of Engineering and is only available to students who graduate with an AAS degree in a related field from a partner school. Full admissions requirements can be viewed on the program website (http://bas.gmu.edu).

To graduate with the BAS with a Cloud Computing concentration, students must have a C or better in their core and concentration courses.

Code	Title	Credits
Core Requirements		
BAS 300	Building Professional Competencies	3
BAS 490	Introduction to Research Methods	3
BAS 491	Applied Sciences Capstone (Mason Core)	3
Total Credits		9

Additional Concentration Requirements

In order to complete the Cloud Computing Concentration, students complete one of the two following areas:

Code	Title	Credits
Cloud Technology		
MATH 108	Introductory Calculus with Business Applications (Mason Core)	3
or MATH 113	Analytic Geometry and Calculus I (Mason Core)	
IT 102	Discrete Structures	3
or MATH 125	Discrete Mathematics I (Mason Core)	
IT 104	Introduction to Computing	3
IT 105	IT Architecture Fundamentals	3
IT 106	Introduction to IT Problem Solving Using Computer Programming	3
or IT 109	Introduction to Computer Programming	
IT 300	Modern Telecommunications	3
IT 341	Data Communications and Network Principles	3
IT 343	IT Project Management	3
IT 442	Cloud Infrastructure	3
IT 451	Cloud Services Management	3
IT 461	Application Development in Cloud	3
IT 481	Cloud Security	3
Total Credits		36

Code	Title	Credits
Cloud System Management		
MIS 303	Introduction to Business Information Systems	3
MIS 310	Database Management Systems	3
MIS 330	Systems Analysis and Design	3
MIS 341	Cloud Computing Essentials	3
MIS 441	Cloud System Management	3
Applied Coursework		
Students pursuing Cloud System Management must select 15 credit hours of upper-level coursework from the following. Courses not listed here may be selected in consultation with the advisor.		15
MBUS 300	Accounting in a Global Economy	
MBUS 301	Managing People and Organizations in a Global Economy	
MBUS 303	Marketing in a Global Economy	
MBUS 304	Entrepreneurship: Starting and Managing a New Enterprise	
MBUS 305	Introduction to International Business (Mason Core)	
MBUS 306	Managing Projects and Operations

MIS 415	Information Systems Audit and Control	
MIS 420	Information Security and Assurance	
MIS 430	Data Warehousing	
MIS 431	Data Mining for Business Applications	
MIS 432	Advanced Data Mining	
MIS 433	Programming for Analytics	
Total Credits		30

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Data Analytics (DNIC)

This concentration is in collaboration with the Volgenau School of Engineering. Full admissions requirements can be viewed on the program website (http://bas.gmu.edu).

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BAS with a Data

Analytics concentration, students must have a C or better in their core, concentration, and applied coursework courses.

Code	Title	Credits
Core Requirements		
BAS 300	Building Professional Competencies	3
BAS 490	Introduction to Research Methods	3
BAS 491	Applied Sciences Capstone (Mason Core)	3
Concentration Requirements		
MATH 108	Introductory Calculus with Business Applications (Mason Core)	3
or MATH 113	Analytic Geometry and Calculus I (Mason Core)	
STAT 250	Introductory Statistics I (Mason Core)	3
STAT 350	Introductory Statistics II	3
STAT 362	Introduction to Computer Statistical Packages	3
STAT 463	Introduction to Exploratory Data Analysis	3
IT 102	Discrete Structures	3
IT 109	Introduction to Computer Programming	3
or IT 106	Introduction to IT Problem Solving Using Computer Programming	
IT 209	Introduction to Object Oriented Programming	3
or IT 206	Object Oriented Techniques for IT Problem Solving	
IT 309	Data Structures and Algorithms in Python	3
or IT 306	Data Structures and Algorithms in Java	
IT 343	IT Project Management	3
Applied Coursework		
Select 9 credit hours of applied coursework from the following. Courses not listed may be selected in consultation with the advisor.		
CDS 301	Scientific Information and Data Visualization	
CDS 302	Scientific Data and Databases	
CDS 303	Scientific Data Mining	
STAT 455	Experimental Design	
STAT 456	Applied Regression Analysis	
STAT 460	Introduction to Biostatistics	
STAT 462	Applied Multivariate Statistics	
STAT 465	Nonparametric Statistics and Categorical Data Analysis	
STAT 474	Introduction to Survey Sampling	
SYST 469	Human Computer Interaction	

Concentration in Health, Wellness and Social Services (HWSS)

This concentration is in collaboration with the College of Health and Human Services.

To enroll in this concentration, students must have an AAS in one of the following areas:

- Health Information Management
- Hospitality Management, Nutrition Management specialization
- Nursing
- Physical Therapist Assistant
- Respiratory Therapy

Code	Title	Credits
Core Requirements		
BAS 300	Building Professional Competencies	3
SOCW 200	Introduction to Social Work (Mason Core)	3
GCH 205	Global Health (Mason Core)	3
NURS 434	Vulnerable Populations	3
BAS 490	Introduction to Research Methods	3
BAS 491	Applied Sciences Capstone (Mason Core)	3
Total Credits		18

Additional Concentration Requirements

To complete the Health, Wellness and Social Services concentration, students must complete one of the two following areas:

Code	Title	Credits
Health Care Administration		
HAP 301	Health Care Delivery in the United States	3
HAP 360	Introduction to Health Information Systems	3
HAP 442	Introduction to Health Care Politics and Policy	3
SOCW 380	Changing Social Policies and Systems	3
Total Credits		12

Code	Title	Credits
Physical and Mental Health Care Delivery		
HAP 301	Health Care Delivery in the United States	3
NUTR 295	Introduction to Nutrition (Mason Core)	3
Select one from the following:		3
GCH 360	Health and Environment	
HHS 432	Healthy Aging	
SOCW 375	Human Behavior and the Family Life Course (Mason Core)	
SOCW 435	Introduction to Gerontology	
SOCW 483	Selected Topics in Social Work Intervention	
Total Credits		9

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Human Development and Family Science (HDFS)

This concentration is in collaboration with the College of Humanities and Social Sciences and the College of Education and Human Development.

Code	Title	Credits
Requirements		
BAS 300	Building Professional Competencies	3

HDFS 200	Individual and Family Development (Mason Core)	3
PSYC 211	Developmental Psychology (Mason Core)	3
PSYC 301	Research Methods in Psychology (Fulfills writing intensive requirement)	3
or SOCI 303	Methods and Logic of Inquiry	
INTS 321	Parent-Child Relations (Mason Core)	3
HDFS 300	Individual and Family Services Delivery	3
HDFS 400	Advanced Family Processes (Mason Core) (Fulfills synthesis requirement)	3
HDFS 401	Family Law and Public Policy (Fulfills writing intensive requirement)	3
HDFS 498	Internship and Analysis in Human Development and Family Science	3
HDFS 499	Advanced Internship and Analysis in Human Development and Family Science	3
Total Credits		30

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Legal Studies (LGLS)

This concentration is in collaboration with School of Integrative Studies, College of Humanities and Social Sciences, and Schar School of Policy and Government.

Code	Title	Credits
Core Requirements		
BAS 300	Building Professional Competencies	3
BAS 490	Introduction to Research Methods	3
BAS 491	Applied Sciences Capstone (Mason Core)	3
Concentration Requirements		
Required Courses:		
INTS 300	Law and Justice (Mason Core)	3
Additional Courses (minimum 18 credits): [1]		18
BULE 303	Legal Environment of Business	
CLAS 330	Roman Law and Society	
COMM 230	Case Studies in Persuasion	
COMM 430	Persuasion	
COMM 475	Journalism Law	
CONF 425	Mediating Conflict	
CRIM 100	Introduction to Criminal Justice (Mason Core)	
CRIM 220	Introduction to Law and Society	
CRIM 301	Public Law and the Judicial Process	3
or GOVT 301	Public Law and the Judicial Process	
CRIM 405	Law and Justice around the World (Mason Core)	
CRIM 406	Family Law and the Justice System	
CRIM 407	Advanced Topics in Law and Society	
CRIM 422	Controversial Legal Issues	
CRIM 423	Constitutional Law: Civil Rights and Liberties	
or GOVT 423	Constitutional Law: Civil Rights and Liberties	
CRIM 424	Constitutional Law: Criminal Process and Rights	
CRIM 430	Criminal Law	
ECON 415	Law and Economics	
GOVT 103	Introduction to American Government (Mason Core)	
GOVT 407	Law and Society	
GOVT 443	Law and Ethics of War	
GOVT 446	International Law and Organization	
GOVT 452	Administrative Law and Procedures	
HAP 312	Healthcare Law	
HDFS 401	Family Law and Public Policy	
INTS 202	Public Speaking and Critical Thinking Skills (Mason Core)	
INTS 304	Social Movements and Community Activism (Mason Core)	
INTS 305	Conflict Resolution and Transformation	
INTS 336	Poverty, Wealth and Inequality in the US (Mason Core)	
INTS 362	Social Justice and Human Rights (Mason Core)	
INTS 416	Refugee and Internal Displacement (Mason Core)	
INTS 417	Human Trafficking and Smuggling	
PRLS 460	Sport and Recreation Law	
PHIL 311	Philosophy of Law	
RELI 364	Religion and Law in the United States	
SOCI 301	Criminology	
SOCI 302	Sociology of Delinquency	
Total Credits		33

[1] Other relevant courses may be selected with advisor approval.

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Concentration in Managerial Leadership (MGL)

This concentration is in collaboration with School of Business, College of Humanities and Social Sciences, and Jimmy and Rosalynn Carter School for Peace and Conflict Resolution.

Code	Title	Credits
Core Requirements		
BAS 300	Building Professional Competencies	3

[1] All courses for this concentration are available in an online format with most offered as asynchronous delivery.

[2] The Information Sciences and Technology department offers 1-credit, self-paced, online review courses; ending with an in-class final exam. Students who register for a 1-credit course and successfully pass will receive credit (not a waiver) for the corresponding 3-credit course. Students who are not successful must take the respective course at Mason to meet their degree requirements.
Review courses are available as follows:

- for IT 213 Multimedia and Web Design: IT 193 Review of Multimedia and Web Design
- for IT 214 Database Fundamentals: IT 194 Review of Database Fundamentals

Electives (variable)

All BAS students are required to complete a minimum of 120 credit hours of coursework. Students will work with their advisor to determine how to fulfill their outstanding credit hours to ensure they have met all major and university requirements. The number of elective credits that a BAS student may have available will vary by concentration and the amount of applicable transfer coursework the student has been awarded.

Accelerated Master's

Applied Science, BAS Cyber Security Concentration/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Applied Science, BAS, Cyber Security Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/#cybs) have the option of obtaining an accelerated Applied Information Technology, MS (https://catalog.gmu.edu/colleges-schools/engineering/information-sciences-technology/applied-information-technology-ms/).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements

Students in the Applied Science, BAS, Cyber Security Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/#cybs) program may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. They may begin taking graduate-level courses once they have earned 75 undergraduate credits. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BAS and MS programs, with up to 12 credits overlapping from the following courses:

Code	Title	Credits
AIT 512	Algorithms and Data Structures Essentials	3
or AIT 580	Analytics: Big Data to Information	

AIT 524	Database Management Systems	3
AIT 542	Fundamentals of Computing Platforms	3
AIT 660	Cyber Security Fundamentals [1]	3
AIT 664	Information: Representation, Processing and Visualization	3

[1] This course is only applicable to the CYBR and ITMG concentrations in the MSAIT. Students planning to pursue CBHS or DAIN should select a different course.

Note: When selecting between AIT 512 and AIT 580, students should select the course that aligns with the MSAIT concentration they intend to pursue.

Degree Conferral

Students must apply the semester before they expect to complete the BAS requirements to have the BAS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Applied Science, BAS Cyber Security Concentration/Digital Forensics, Accelerated MS

Overview

Highly-qualified students in the Applied Science, BAS, Cyber Security Concentration have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Science, BAS, Cyber Security Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/#cybs) program may apply for this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BAS and MS programs, with up to 12 credits overlapping from the following courses:

Code	Title	Credits
DFOR 510	Digital Forensics Analysis	3
DFOR 660	Network Forensics	3
DFOR 661	Digital Media Forensics	3
DFOR 663	Operations of Intrusion Detection for Forensics	3
DFOR 664	Incident Response Forensics	3

Degree Conferral

Students must apply the semester before they expect to complete the BAS requirements to have the BAS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Applied Science, BAS Data Analytics Concentration/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Applied Science, BAS, Data Analytics Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/) have the option of obtaining an accelerated Applied Information Technology, MS (https://catalog.gmu.edu/colleges-schools/engineering/information-sciences-technology/applied-information-technology-ms/).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Science, BAS Data Analytics concentration may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. Students may begin taking the master's level courses once they have earned 75 undergraduate credits.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BAS and MS programs. Students may select up to 12 credits to overlap from the following options. Students should consult with both the BAS and MSAIT advisors.

Code	Title	Credits
AIT 512	Algorithms and Data Structures Essentials [1]	3
or AIT 580	Analytics: Big Data to Information	
AIT 524	Database Management Systems	3
AIT 542	Fundamentals of Computing Platforms	3
AIT 664	Information: Representation, Processing and Visualization	3

[1] When selecting between AIT 512 and AIT 580, students should select the course that aligns with the MSAIT concentration they intend to pursue.

Applied Science, BAS Data Analytics Concentration/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Applied Science, BAS, Data Analytics Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/) have the option of obtaining an accelerated Data Analytics Engineering, MS. (https://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/#text)

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements

Students in the Applied Science, BAS Data Analytics (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/#text) concentration may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. Students may begin taking the master's level courses once they have earned 75 undergraduate credits.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BAS and MS programs. The following six credits may overlap:

Code	Title	Credits
AIT 580	Analytics: Big Data to Information	3
CS 504	Principles of Data Management and Mining	3
or CS 584	Theory and Applications of Data Mining	
OR 531	Analytics and Decision Analysis	3
or OR 541	Operations Research: Deterministic Models	
STAT 515	Applied Statistics and Visualization for Analytics	3
or STAT 554	Applied Statistics I	

In addition to the six credits above, students may select up to 6 additional credits to overlap. These credits must be selected in consultation with both the BAS and DAEN advisors. Credits selected will depend on which DAEN concentration the student intends to pursue.

Design Thinking Minor

Banner Code: DSTH

The design thinking minor is designed flexibly to include courses that may already be in a student's major. It culminates in a capstone course with a studio format in which students with multi-disciplinary backgrounds collaborate and learn by using the design thinking process to explore problems, prototype solutions, and convey their ideas through effective visual, written, and oral presentations.

Admissions & Policies

Policies

In addition to the required coursework, three courses should be selected from either the list of electives under the Design in the Built Environment Track or the User Experience Design (UXD) Track. Note that the three electives must all belong to one of these two groups.

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Minor Requirements

Total credits: 18

Required Courses

Smithsonian-Mason School of Conservation

Smithsonian-Mason School of Conservation

1500 Remount Road
Front Royal, VA 22630

Phone: 540-635-0115 (direct)
Website: smconservation.gmu.edu

Administration

- Cody W. Edwards, Executive Director
- Robert Barrett, Assistant Director of Recruitment and Outreach
- Anastasia Triplett, Assistant Director of Budget and Administration

The Smithsonian Institution and George Mason University partnered to establish the Smithsonian-Mason School of Conservation (SMSC) to provide innovative education for current and future generations of global conservation professionals, leaders, and practitioners.

SMSC offers a range of residential, hands-on, interdisciplinary programs in conservation biology for undergraduate and graduate students and professionals on the grounds of SCBI in Front Royal, Virginia. Highly qualified world experts, including Smithsonian scientists, Mason faculty, and colleagues from other U.S. and international conservation organizations, provide students with direct connections to the most current teaching, research techniques, and work in the field.

Undergraduate Program

The Smithsonian-Mason Semester offers undergraduate programs in which students can earn a Conservation Studies Minor (CHSS), or apply credits to certain Mason degrees. There are currently three 16 credit programs: “Conservation, Biodiversity and Society”, “Wildlife Ecology and Conservation”, and "Endangered Species Conservation". See the Programs of Study section of this catalog for details on the minor and the Courses section for details on the courses (select the course prefix CONS). Grounded in natural science, this interdisciplinary semester brings public policy, sociology, conflict resolution, and global awareness to the learning environment. Students majoring in the Integrative Studies, BS, Biology, BS, Environmental Science, BS, Environmental and Sustainability Studies, BA (CHSS), Applied Science, BAS, and Global Affairs, BA can fulfill major requirements and/or Mason Core requirements with Smithsonian-Mason Semester (CONS) credits subject to college approval.

Graduate Program

Smithsonian-Mason School of Conservation graduate courses offer in-depth explorations of advanced and highly specialized topics in applied conservation studies. Courses cover a diverse selection of topics focusing on biodiversity conservation, ranging from adaptive management to statistics in ecology and conservation, to non-invasive genetic techniques. All current courses take place as intensive one or two-week sessions and participants are in residence on the SMSC grounds in Front Royal, VA.

Although the Smithsonian-Mason School of Conservation does not presently offer a graduate degree, coursework may be applied to George Mason University’s Environmental Science and Policy, MS concentration in Conservation Science and Policy. In many cases, graduate students will have the unique opportunity to learn alongside conservation professionals currently working in the field. The unparalleled resources at the facilities draw researchers and practitioners from around the world, and this offers a rare opportunity for students and professionals to interact to mutual benefit in a hands-on situation and to receive informal mentoring from experienced practitioners.

- Elizabeth Eck Olchowski, Assistant Dean for Graduate Program Management

College Code: PP

The Schar School of Policy and Government prepares undergraduate and graduate students to be leaders who advance the public good in the private, public, and nonprofit sectors. Through research and education in policy, government, and international affairs, Schar allows Mason to more effectively serve the region, Commonwealth, nation, and world.

The Schar faculty combines original research with real-world experience to connect theory and practice for the benefit of students and wider constituencies. The School employs approximately 80 full-time faculty members across a wide range of disciplines, including political science, public administration, international relations, economics, management, geography, engineering, sociology, anthropology, and law. Schar is a major research unit of the University, with approximately $25 million per year in sponsored funding. Schar faculty members frequently advise governments, companies, and non-profit organizations, appear in the national and international media, and participate in public debates on critical issues of the day.

Schar offers two undergraduate majors, eight master's degree programs, three doctoral programs, and a range of undergraduate minors and graduate certificates. Collectively, these programs enroll approximately 2,000 students. Schar offers classes on Mason's Fairfax and Arlington campuses, and its faculty members have offices on both campuses.

Undergraduate Programs

Schar offers two degrees for students interested in political science, government, and international relations: a BA in Government and International Politics and a BS in Public Administration. Majors in Government and International Politics take core courses in American political institutions, the political systems of other countries, and international relations. Students can focus their electives to earn a concentration in American institutions and processes, comparative politics, international political economy, international relations, law, philosophy and governance, political analysis, political behavior and identity politics, public policy, or a higher credit concentration in Philosophy, Politics, and Economics (https://ppe.gmu.edu). Majors in public administration and policy take courses in government, management, policy, and administration. Concentrations are offered in administration and management, economic policy analysis, international political economy, nonprofit management, public policy, and US government institutions.

Students have an opportunity to do internships as part of their degree programs, gaining valuable work experience while earning academic credit.

Minors

Schar offers minors in American government, international/comparative studies, international security, legal studies, and public policy and management. In addition, faculty from the School coordinate or participate in the Asia-Pacific and Northeast Asian Studies Minor, Global Systems Minor, Latin American Studies Minor, Middle East Studies Minor, Islamic Studies Minor, and Urban and Suburban Studies Minor. It participates with the Philosophy Department in the Political Philosophy Minor and with the Communications Department in the Political Communication Minor (CHSS).

Bachelor's/Accelerated Master's Programs

The School offers qualified undergraduates in any major the opportunity to apply to several accelerated master's degree programs. If accepted, students may earn both an undergraduate and a graduate degree, sometimes within five years. More information about the degree options and application process may be found here (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

Graduate Programs

Schar offers three doctoral degree programs and eight master's degree programs, as well as numerous graduate certificate programs. Specific information on each program may be found by clicking the "Programs" tab at the top of this page.

The Schar School of Policy and Government and the Antonin Scalia Law School offer a joint JD/MPP degree program in law and public policy studies. For more information, go to the website (http://www.law.gmu.edu/academics/degrees/jd_mpp/).

Research Centers

The Schar School of Policy and Government's research centers focus on a wide range of issues and areas.

Center for Advancing Correctional Excellence

Director: Faye Taxman, PhD

This center conducts public policy research to improve outcomes from the justice and health systems while advancing scientific knowledge about effective interventions, successful implementation and high performing organizations. Center faculty and students design and conduct original research that addresses key policy questions, and improves methodologies for conducting studies in justice and health settings and translating evidence into practice. ACE! is an active, engaged research center serving Virginia, the nation, and the world.

Center for Business Civic Engagement

Director: David Rehr, PhD

This center conducts research on a wide range of topics revolving on how public institutions can utilize private sector tools to be more effective and efficient in their missions. The focus of the center revolves around government financial transparency, government accountability, civic engagement, and best practices in business advocacy so government can make informed decisions on public policy.

Center for Energy Science and Policy

Co-Directors: Richard Kauzlarich, PhD and Paul R. Houser, PhD

This center, a joint initiative of the School of Business and the Schar School, provides objective analysis of key issues in the energy field that is grounded in original research. It serves as a center of gravity for the many researchers at George Mason whose work engages them with these issues and connects them with decision-makers in the economy, society, and government.

Center for Microeconomic Policy Research
Director: John Earle, PhD

This center is a forum for policy-relevant research using micro-economic and micro-econometric methods.

Center for Regional Analysis
Director: Terry Clower, PhD

This center is the clearinghouse for economic data and forecasts specific to the Washington, D.C. region. Its fiscal analyses, economic indicators, demographic studies, information services, and data products are relied on by business and government executives as they seek to stimulate investment and development and spur enterprise in Northern Virginia, Washington, D.C., and suburban Maryland.

Center for Science, Technology and Innovation Policy
Co-Directors: David M. Hart, PhD and Connie McNeely, PhD

This center is dedicated to better understanding how public policy shapes scientific discovery and technological innovation. Science and technology are complex social phenomena that arise from the interactions of individuals and organizations, public and private institutions, and markets, cultures, and politics.

Center for Security Policy Studies
Director: Ellen Laipson, MA

Today's security challenges--from proliferation and terrorism to climate change and cyber security-- are beyond the scope of any one nation-state to address. Finding solutions requires international and multi-lateral cooperation among regional and global leaders, both state-based and outside the state, including corporate and non-governmental actors. The purpose of the Center for Security Policy Studies is to strengthen global strategic thinking by current and future policy-makers, so as to improve US and global security in the 21st century.

Center the Study of Social Change, Institutions, and Policy (SCIP)
Director: Jack Goldstone, PhD

This center conducts research on a wide range of global policy issues. Center faculty undertake basic academic research on such topics as foreign trade, democratization and state-building, and transnational networks, and analyze specific policy issues for a variety of government agencies.

Center for Transportation Public-Private Partnership Policy
Director: Jonathan L. Gifford, PhD

The Center is devoted to advancing the objective consideration of public-private partnerships for transportation system renewal and expansion through research, education and public service. The Center supports development of U.S. and international case studies of P3 projects and programs, analyses of the impact of P3s, sponsors workshops and conferences, and supports graduate students and faculty.

Gender and Policy Center
Director: Bonnie Stabile, PhD

This center addresses a compelling area of interest in the fields of public policy and politics, and offers the opportunity for the Schar School to develop and promote its expertise in a field where scholarship, like its subject, is underrepresented and sorely needed.

Michael V. Hayden Center for Intelligence, Policy, and International Security
Director: Larry Pfeiffer, M.A.

The threats to global security have rarely ever been so great in scope and number—in such a complex, complicated world, intelligence has never been more vital. The Michael V. Hayden Center for Intelligence, Policy, and International Security at the Schar School for Policy and Government provides for the full examination of intelligence and its interplay with US national security.

Stephen S. Fuller Institute for Research on the Washington Region's Economic Future
Director: Jeanette Chapman, MPP

Through consistent monitoring of regional issues and the economy, the institute is able to identify critical conditions and trends impacting the future vitality of the Washington region's economy. Regularly communicating these findings and producing timely research on short- and long-term regional policy options ensure local business and government leaders are equipped with the data needed to make informed decisions regarding the region's future.

Terrorism, Transnational Crime and Corruption Center
Director: Louise I. Shelley, PhD

The Terrorism, Transnational Crime and Corruption Center (TraCCC) is the first center in the United States devoted to understanding the links among terrorism, transnational crime and corruption. The center teaches, researches and formulates policy on these critical issues. TraCCC accomplishes its mission through international research partnerships engaging in fundamental and applied research projects. Research addresses such diverse concerns as national security, economic development and human rights.

Faculty

School Faculty

Professors

Abramson, Acs, Button, Clower, Conlan, Dinan, Dudley, Dueck, Earle, Gifford, Goldstone, Hart, Katz, Malawer, Mandaville, McNeely, Olds, Pfiffner, Regan, Reinert, Rhodes, Root, Rozell, Ruth, Shelley, Singh, Slavov, Thatchenkery, Wan, Wedel

Burroughs, Daigle, Deitz, Edner, El Shazli, Hayden, Kauzlarich, Laipson, LaPorte, Martin, Neaves, Nicogossian, Schneider, Shafroth, Srikantia, Stabile, Walker, Wilde

Requirements & Policies

Policies for Undergraduate Students

Students should become familiar with the university's Academic Policies in addition to those specific to each academic unit.

The undergraduate degree consists of coursework in four areas: (a) Mason Core requirements, (b) School requirements for the Schar school, (c) requirements specified for the chosen major, and (d) electives. All students must complete 120 credits, of which at least 45 must be in upper-level courses (numbered 300 and above). At least one course at the 300 or 400 level must be designated "writing intensive." In Schar, GOVT 490 Synthesis Seminar (Mason Core)or GOVT 491 Honors Seminar (Mason Core) will satisfy this requirement.

The School requirements, (b) above, are the same as the additional requirements for the College of Humanities and Social Sciences. For the BA in Government and International Politics, there is one class in Philosophy or Religion, one additional class in social and behavioral science, one class in non-Western culture, and demonstrated foreign language proficiency at the intermediate level. Students should consult the Mason Core and CHSS requirements page (http://chss.gmu.edu/general-education/all-requirements/) for more detailed information.

All students are responsible for meeting with their academic advisor, and reviewing their transcripts and degree audits regularly to ensure that they are correct and meet all their requirements. Transfer students are encouraged to meet with their academic advisor prior to registering for classes to review their transcripts and course equivalencies. In some cases, students may need to earn more than 120 credits to complete all of their requirements.

Students with questions about exceptions to academic policies and about School requirements should contact Schar Undergraduate Student Services (Research Hall, Room 359; 703-993-1400; gvip@gmu.edu or puad@gmu.edu).

Additional policy information and forms are available on the Schar website (http://schar.gmu.edu/).

Registration

Students are personally responsible for correctly registering for courses and paying all tuition and fees by the official university registration and payment deadlines. All students should verify the accuracy of their enrollment before the end of the official add period.

Academic Load

Students should review AP.1.2 Academic Load.

In order to be considered for a credit overload, students must fulfill all of the following criteria:

- Be in good academic standing
- Have completed the prior semester with a GPA of 2.33 or higher
- Have a cumulative GPA of 2.33 or higher
- Have demonstrated in prior semesters at Mason the ability to handle an increased and demanding courseload while maintaining high performance
- Have no remaining incompletes (INs) from a previous semester

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Excluded Courses and Credits

At most 3 credits of 100-level Recreation (RECR) activity courses may be taken for general elective credit for an undergraduate degree in the Schar School of Policy and Government.

Only Military Science (MLSC) courses at the 400-level can be used for credit for a degree in the School; credit for other MLSC courses may not be applied toward a degree in the School.

Once matriculated at Mason, students may not take CLEP exams and apply credits from those exams to degrees in the School. Students may apply credits from CLEP exams to degrees in the School only if those credits were awarded and reported prior to admission.

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstances. All consortium registration requests must be submitted to the Schar Undergraduate Student Services office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Permission to Study at Another Regionally-Accredited U.S. Institution

Once enrolled in degree status at Mason, students with fewer than 60 hours of transfer coursework (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through Mason Study Abroad) may take up to 8 hours of coursework in Schar disciplines at another institution. See the university Permission to Study Elsewhere policy for additional information.

Study Abroad

In order to be considered for study through Mason Study Abroad, students must plan well in advance and receive prior, written permission from the Assistant Dean. Students must also meet all of the following criteria:

- Meet all eligibility requirements for their program as specified by Mason Study Abroad including course prerequisites and minimum GPA.
- Have completed the immediately preceding semester at Mason with a minimum GPA of 2.00.
- Have completed the necessary forms and have obtained all required signatures and course equivalencies.

Students in danger of probation, suspension, or dismissal should plan very carefully before requesting to study abroad. Students who are not in good academic standing will not be permitted to study abroad.

Leave of Absence

All undergraduate students who are planning an absence from George Mason must submit a formal request for Leave of Absence to the Office of the University Registrar. Students do not need to complete the Leave of Absence form if they are participating in a George Mason University sponsored study abroad program or have received permission to study elsewhere.

The maximum time allowed for a Leave of Absence is two years. A new admission application will be required if a Leave of Absence extends beyond two years. If a Leave of Absence form was not submitted, a new admission application will be required if a student misses two graded semesters, excluding the summer term. Re-admission is not guaranteed. See Academic Policies for full university policy.

Withdrawals

Students should review the Withdrawal section in the Academic Policies section of this catalog. Courses for which a withdrawal is approved receive a grade of "W."

Students should be aware of the potential consequences of withdrawing on their academic standing. Although credits graded "W" do not affect a student's GPA, they do count towards the total attempted hours. The total attempted hours and cumulative GPA together determine a student's academic standing. These are explained in the Academic Standing section of Academic Policies.

Academic Clemency

Students should review the university policies regarding academic clemency in the Academic Standing section of Academic Policies.

To be considered for clemency, students must meet all of the following criteria:

- Be absent from George Mason for a minimum of three consecutive calendar years.
- Provide a detailed explanation for why they were unsuccessful in those courses and how they have made changes to ensure their academic progress upon their return.
- Submit their request within 12 months of the first day of the re-enrollment term.
- Complete at least 6 credits during their first 12 months back at George Mason.
- Earn a minimum GPA of 2.50 each semester back prior to making the clemency request with no individual grade below 2.00.

If the last three minimum academic requirements are not met, clemency will not be allowed under any circumstances.

Appeals Process

Undergraduate students may appeal decisions concerning academic actions to the Schar Office of Undergraduate Student Services. They may appeal decisions of the Office of Undergraduate Student Services to the Associate Dean. Students may appeal decisions of the Associate Dean to the Associate Provost, Undergraduate Academic Affairs and Programs. Students who feel that the School's appeal process was conducted unfairly may appeal to the Provost's Office as specified in the Academic Policies section of this catalog.

The grade appeal process occurs at the Dean's Council level as discussed above.

Students should file all appeals in a timely manner, usually within the semester in which the original decision is rendered, but no later than the final day of classes of the following semester.

Second Bachelor's Degree

Students should review the university policies regarding second bachelor's degrees in the Undergraduate Admission Policies and in Academic Policies/ Requirements for Undergraduate Programs sections of the catalog. Students pursuing a second bachelor's degree concurrently with their first bachelor's degree at Mason must meet all the additional requirements for the School (see second paragraph of the Policies for Undergraduate Students section) if they differ from the requirements in the School or College of their first major.

Students pursuing a second bachelor's degree in the School after already having received one or more bachelor's degrees are considered to have met all of the Mason Core requirements. Students pursuing a Bachelor of Science degree do not have additional School-level requirements. Students pursuing a Bachelor of Arts degree in the School must complete these additional School-level requirements: one additional 3-credit course each in philosophy or religious studies, in social and behavioral science, and in non-western culture (for a total of 9 credits). They must also demonstrate proficiency in a foreign language through the intermediate level

Minors

Students may elect to take up to two minors in addition to their major field of study. For policies governing all minors, see the AP.5.3.4 Minors section of this catalog. Students interested in earning a minor should complete the appropriate section of the Change/Declaration of Academic Program form and submit it to the Office of the University Registrar. See All about Minors for more information.

Concentration Courses and Minors

Students may elect to declare a concentration, which requires four of their major field electives to be from the same designated field. Students should be aware that minors usually require between 15 and 21 credits of study, at least 8 of which must be applied only to that minor and may not be used to fulfill requirements of the student's major, concentration, an undergraduate certificate, or another minor.

Honors in the Major

Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Policies for Graduate Students

Students should become familiar with the university's Academic Policies in addition to those specific to each academic unit.

Graduate Student Appeal and Grievance Procedures

Graduate student appeal and grievance procedures are based on George Mason University's honor system. Students are responsible for understanding the provisions of the code described in detail in the Academic Policies section of this catalog and in Schar's graduate student guides.

Students with grievances should direct them in writing to the Assistant Dean of Admissions and Student Services, who will provide guidance on how to resolve their concerns in accordance with established procedures.

Students may appeal decisions concerning academic actions, including termination. Written appeals must be submitted to the Assistant Dean of Admissions and Student Services. The merit of these appeals will be reviewed by the Dean or Dean's designate.

Grade appeals are made to the Dean. Students should contact the Associate Dean for Academic Affairs in writing to initiate the process. The Dean's decision is final.

A student who is facing termination from the program for non-academic reasons may appeal the decision to the Dean. This appeal must be in writing and must be received within 30 calendar days of the date on the notice of dismissal or termination. The Dean or Dean's designate will make a final determination. This determination may not be appealed.

American Government Minor

Banner Code: AMGV

Robert J. McGrath, Associate Professor & Minor Advisor

359 Research Hall
Fairfax Campus

The minor in American government provides students the opportunity to focus on the most relevant features of American government, its institutions, the political behavior of its citizens and leaders, and the defining political questions of our time.

Admissions & Policies

Policies

Students pursuing this minor must complete 18 credits in government with a minimum grade of C in each course. Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Core Course

Code	Title	Credits
GOVT 103	Introduction to American Government (Mason Core)	3
Total Credits		3

Electives

Code	Title	Credits
Select five electives from the following:		15
Any course on political institutions: GOVT 301–GOVT 309		
Any course on political behavior GOVT 310–GOVT 319		
Any course from GOVT 409–GOVT 420		
GOVT 344	American Foreign Policy	
GOVT 480	Internship [1]	
Total Credits		15

[1] When topic is relevant, 3 credits of GOVT 480 may be applied to the minor with approval of the minor advisor.

Biodefense Graduate Certificate

Banner Code: PP-CERG-BIOD

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The certificate provides an interdisciplinary introduction to man-made and natural biological threats, including a background in the science and technology of biodefense and the specialized areas of threat assessment, non-proliferation, and medical and public health preparedness. Students already pursuing a master's degree in the school may, after admission to a certificate program, in most cases, earn an additional six credits (two courses) in the Schar School to receive a certificate in addition to the master's degree.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See AP.6.6.2 Academic Termination.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Master of Science in Biodefense prepares students to become the next generation of biodefense and biosecurity professionals and scholars. This program provides students with a foundation in microbiology and biotechnology combined with a broader security and organizational context.

Admissions & Policies

Admissions

Admission Requirements

Please see Graduate Admissions for information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Biodefense master's program may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance AP.6.4.1 Change from Nondegree Status.

Policies

Academic Policies

Students admitted to a Schar program will be terminated from the Schar school upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 36

The schedule of courses that students plan on taking should be approved in an education plan designed by the students and their advisor during the student's first semester. Students must receive the permission of their advisor to take courses outside of the Biodefense Program.

Core Courses

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program.

Accelerated Master's

Bachelor's Degree (any)/Biodefense, Accelerated MS

Overview

Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission

Please see the Graduate Admissions for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to fifteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses include BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Biodefense, PhD

Banner Code: PP-PHD-BIOD

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

This program is designed to prepare students to serve as scholars and professionals in the fields of biodefense and biosecurity. The program integrates knowledge of natural and man-made biological threats with the skills to develop and analyze policies and strategies for enhancing biosecurity. Other areas of biodefense, including nonproliferation, intelligence and threat assessment, and medical and public health preparedness are integral parts of the program.

Admissions & Policies

Admissions

See Graduate Admissions for general information on graduate admission to George Mason University. See the Schar School of Policy and Government Admissions website (http://schar.gmu.edu/admissions/doctorate-admissions/) for application requirements and deadlines. Students are considered for admission for the Fall term only.

Policies

For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees.

Reduction of Credit

Students who enter the doctoral program with a master's degree or other graduate credit may have their credit reduced by up to 30 credits, subject to the approval of the program director.

Requirements

Degree Requirements

Total credits: 72

Students are strongly encouraged to take the core courses as early as possible because they provide the foundation for the rest of the program. The courses which students plan to take should be approved in a program of study designed by the student and their advisor during the student's first semester. Students may take up to 12 credits of courses outside of the Biodefense Program with prior written approval of their advisor. Consult with the graduate program director or coordinator for a list of BIOD electives and approved non-BIOD electives that may be used to fulfill some of the requirements below.

A complete description of the program policies, procedures, and requirements is in the PhD student and faculty handbook (https://schar.gmu.edu/current-students/phd-student-services/phd-handbook-forms/), which is published annually.

Core Courses

Code	Title	Credits
BIOD 604	Emerging Infectious Diseases I: Bacteria and Toxins	3
BIOD 605	Emerging Infectious Diseases II: Viral Agents	3
BIOD 609	Biodefense Strategy	3
BIOD 620	Global Health Security Policy	3
GOVT 500	The Scientific Method and Research Design	3
GOVT 540	International Relations	3
Select one of the following advanced research courses:		3
GOVT 717	Qualitative Methods	
POGO 611	Advanced Data Analysis for Policy and Government	
POGO 646	Policy and Program Evaluation	
An alternative research course approved by the program director		
Total Credits		21

Field of Specialization

Select one field of specialization and complete the requirements therein.

International Security

Code	Title	Credits
GOVT 744	Foundations of Security Studies	3
GOVT 745	International Security	3
Select six credits of electives (courses may be chosen from the electives list below)		6
Total Credits		12

Terrorism and Homeland Security

Code	Title	Credits
BIOD 722	Examining Terrorist Groups	3
BIOD 725	Terrorism and Weapons of Mass Destruction	3

PUAD 750	Federalism and Intergovernmental Relations	
PHIL 642	Biomedical Ethics	
PUBP 757	Public Policy in Global Health and Medical Practice	
PUBP 758	Global Threats and Medical Policies	
Total Credits		9-21

Qualifying Exam

The purpose of the qualifying exam is to determine if the student is ready to engage in dissertation research. Doctoral students are eligible to take the exam at the conclusion of coursework, provided an approved Degree Plan is on file with Schar. The exam must be completed before the student takes dissertation proposal (BIOD 998 Doctoral Dissertation Proposal).

Advancement to Candidacy

Advancement to candidacy for the doctoral degree occurs when a student has met the coursework requirements, passed the comprehensive qualifying examination, presented and successfully defended a dissertation proposal, and has an approved dissertation committee.

Dissertation Research

Once enrolled in BIOD 998, students in this degree program must maintain continuous registration in BIOD 998 or BIOD 999 each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in BIOD 999, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Registration. Students who defend in the summer must be registered for at least 1 credit of BIOD 999.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of BIOD 998 and a minimum of 6 and a maximum of 18 credits of BIOD 999. They apply a minimum of 12 and a maximum of 24 dissertation credits (BIOD 998 and BIOD 999 combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Before registering in BIOD 999, students must offer a successful public defense of the dissertation proposal. Students must present the results of the dissertation research to their dissertation committee in a seminar and defend their dissertation to the university community. Successful completion of a dissertation is contingent on approval of the dissertation committee and the dean.

Code	Title	Credits
Research credits		12-24
BIOD 998	Doctoral Dissertation Proposal (minimum of 3 credits)	
BIOD 999	Doctoral Dissertation (minimum of 6 credits)

Emergency Management and Homeland Security Graduate Certificate

Banner Code: PP-CERG-EMHS

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Schar School of Policy and Government offers certificates in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master's degree.

The graduate certificate in emergency management and homeland security may only be pursued on a part-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the Schar admissions web site (http://spgia.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a part-time basis only.

Required Courses

Code	Title	Credits
PUAD 502	Administration in Public and Nonprofit Organizations	3
PUAD 630	Emergency Planning and Preparedness	3
PUAD 637	Managing Homeland Security	3
Total Credits		9

Electives

Students choose electives in the emergency management and homeland security area. A list of relevant electives is available under the concentration in emergency management and homeland security in the MPA (master of public administration).

Global Health and Security Graduate Certificate

Banner Code: PP-CERG-GHS

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Schar School of Policy and Government offers certificate programs in conjunction with its master's programs. The certificate in global health and security provides an introduction to the intersection of global public health and security, covering topics such as emerging infectious diseases, biosurveillance, the development of vaccines, and emergency response to public health disasters. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master's degree.

The graduate certificate in global health and security may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the Schar admissions web site (http://spgia.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. See the Academic Policies section of the catalog for additional policies pertaining to graduate students.

Global Systems Minor

Banner Code: GLOS

Academic Advising

359 Research Hall
Fairfax Campus

Global systems have become increasingly important to the way we live and work, and a global perspective makes us more aware of how we are connected to others around the world and to the whole of nature.

The interdisciplinary minor in global systems is designed to complement virtually any undergraduate major. It works well for majors in business disciplines, economics, languages, geography, government and international politics, history, and other disciplines that take a global view. Students in professional programs learn to connect their professional concerns to global issues of health care, trade and finance, or technology. Students in the liberal arts gain insights into their disciplines as they learn how the arts, humanities, sciences, and social sciences are affected by global issues such as demographic change, telecommunications, and environmental protection.

Other globally oriented courses may also fulfill or substitute for the requirements of this program with written permission of the coordinator prior to registration.

This is an interdisciplinary minor offered by the Schar School of Policy and Government and the College of Humanities and Social Sciences.

Faculty

Lopez-Santana (minor advisor)

Admissions & Policies

Policies

Students must complete all coursework with a minimum GPA of 2.00. At least 9 credits must be at the 300 level or above. Eight credits of coursework must be unique to the minor.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18

Required Course

Code	Title	Credits
Select one course from the following:		3
GLOA 101	Introduction to Global Affairs (Mason Core)	
GOVT 132	Introduction to International Politics (Mason Core)	
HIST 125	Introduction to World History (Mason Core)	
Total Credits		3

Electives

Code	Title	Credits
Select five electives from at least two of the following fields: [1]		15
Field A: Government, geography, and administration of justice		
GOVT 132	Introduction to International Politics (Mason Core)	
GOVT 444	Issues in International Studies	
CRIM 405	Law and Justice around the World (Mason Core)	
GGS 101	Major World Regions (Mason Core)	

GGS 301	Political Geography (Mason Core)
GGS 303	Geography of Resource Conservation (Mason Core)
GGS 304	Population Geography (Mason Core)
GGS 305	Economic Geography
Field B: Economics, anthropology, marketing, history, and sociology	
ANTH 300	Civilizations
ANTH 312	Political Anthropology (Mason Core)
ANTH 331	Refugees (Mason Core)
ANTH 375	Culture, Power, History
ECON 360	Economics of Developing Areas (Mason Core)
ECON 361	Economic Development of Latin America (Mason Core)
ECON 380	Economies in Transition (Mason Core)
ECON 390	International Economics
HIST 387	Topics in Global History (Mason Core)
MKTG 407	Global Marketing
SOCI 332	The Urban World (Mason Core)
Field C: Environmental science, global health, systems engineering, urban and suburban studies, civil and infrastructure engineering	
BIOL 377	Applied Ecology
CEIE 100	Environmental Engineering around the World (Mason Core)
CEIE 450	Environmental Engineering Systems
GCH 543	Global Health
USST 301	Urban Growth in a Shrinking World
Field D: Modes of communication	
COMM 305	Foundations of Intercultural Communication (Mason Core)
COMM 456	Comparative Mass Media (Mason Core)
DANC 118	World Dance (Mason Core)
MUSI 103	Musics of the World (Mason Core)
MUSI 431	Music History in Society III (Mason Core)
THR 359	World Stages (Mason Core)
Total Credits	15

[1] Other globally-oriented courses may also be applied to this requirement with written approval of the director.

Government Analytics Minor (Schar)

Banner Code: GVAN

Dr. Robert McGrath

344 Research Hall

Fairfax Campus

Phone: 703-993-4567
Email: rmcgrat2@gmu.edu

Government analytics involves the use of cutting-edge tools of data science and analysis to address political, policy, and governance problems at federal, state, local, and organizational levels. This minor introduces students to the tools and context that are now commonly employed by government entities and agencies, as well as by the non-profit and private sectors. In particular, students will work with canonical programming languages (R and Python) and apply these tools to substantive issues in political science, public administration, and international relations. The minor integrates a technical curriculum with real-world applicability and gives students the flexibility and independence to develop unique expertise and hone research skills. The curriculum also introduces students to issues of copyright and privacy that are integral to ethical government analytics.

Admissions & Policies

Admissions

This minor is available to all Mason undergraduate students.

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 19-20

Of the total of 19 credits, 9 credits must be unique to minor

Required Courses

Code	Title	Credits
CDS 101	Introduction to Computational and Data Sciences (Mason Core)	3
CDS 102	Introduction to Computational and Data Sciences Lab (Mason Core)	1
CDS 230	Modeling and Simulation I	3
Select one of the following:		**3**
CDS 301	Scientific Information and Data Visualization	
CDS 302	Scientific Data and Databases	
CDS 303	Scientific Data Mining	
STAT 463	Introduction to Exploratory Data Analysis	
Select two of the following: [1]		**6-7**
GOVT 300	Research Methods and Analysis	
GOVT 307	Legislative Behavior	
GOVT 308	The American Presidency	
GOVT 311	Public Opinion and Electoral Behavior	
GOVT 312	Political Parties and Campaigns	
GOVT 313	Political Psychology	
GOVT 318	Interest Groups, Lobbying, and the Political Process

GOVT 354	Nonprofit Sector in Society	
GOVT 355	Public Personnel Administration	
GOVT 356	Public Budgeting and Finance	

GOVT 357	Urban Planning	
GOVT 358	Nonprofit Financial Planning	
GOVT 361	Introduction to Environmental Policy	
GOVT 362	Intermediate Environmental Policy	
GOVT 364	Public Policy Making	
GOVT 365	State and Regional Public Policy	
GOVT 366	Public Policy Analysis	
GOVT 367	Money, Markets and Economic Policy (Mason Core)	
GOVT 368	Tools for Economic Policy Analysis	
GOVT 400	Issues in Political Analysis	
Seminar Requirement		
GOVT 490	Synthesis Seminar (Mason Core) [2]	3
Total Credits		19-20

[1] An alternative 300-level GOVT course, especially including GOVT 319, or any 400-level GOVT course, may be substituted for any other GOVT course with the permission of the minor director, depending on the topic.

[2] This Government Analytics capstone seminar will be offered annually and covers:
i) Open Government Data, in theory and practice
ii) Supervision of individual capstone projects
Enrollment in the capstone section is limited to Government Analytics minors and requires permission of the instructor.

Government and International Politics, BA

Banner Code: PP-BA-GVIP

Academic Advising

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Program Requirements

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. Students pursuing a BA in Government and International Politics must complete additional requirements for the BA degree in the Schar School of Policy and Government.

Students pursuing this degree must complete 43 credits in GOVT and earn a minimum grade of 2.00 in each course applied to the major.

Requirements

Degree Requirements

Total credits: minimum 120

Students pursuing a BA in Government and International Politics and wishing to narrow their focus may choose to concentrate in one of eight government fields or complete a higher credit concentration in Philosophy, Politics, and Economics.

BA with or without Government Concentration

Code	Title	Credits
Core Courses		
GOVT 101	Democratic Theory and Practice (Mason Core)	3
GOVT 103	Introduction to American Government (Mason Core)	3
GOVT 132	Introduction to International Politics (Mason Core)	3
GOVT 133	Introduction to Comparative Politics (Mason Core)	3
GOVT 300	Research Methods and Analysis	4
Senior Seminar		
Select one seminar from the following:		3
GOVT 490	Synthesis Seminar (Mason Core)	
GOVT 491	Honors Seminar (Mason Core) [1]	
Total Credits		19

[1] This option is for students who have been accepted to pursue honors in the major.

Government Field Study

Code	Title	Credits
Select any eight advanced government field courses, with or without a government concentration		24
Total Credits		24

Students may complete a government concentration (four courses) in one field, then complete any four more advanced government field courses to satisfy this requirement. Students who do not pursue a government concentration may choose 24 credits from the advanced government field courses listed below (with restriction) for a broader learning experience.

Up to three credits of GOVT 399 Research Practicum and GOVT 480 Internship may be used to fulfill the field course requirement with prior advisor approval. Up to six credits of GOVT 496 Directed Readings and Research may be used to fulfill this requirement with prior advisor approval. GOVT 490 Synthesis Seminar (Mason Core) or GOVT 491 Honors Seminar (Mason Core) may not be used to fulfill this requirement.

Advanced government field courses include courses numbered GOVT 301 - GOVT 499

Concentrations

- Concentration in American Institutions and Processes (AMIP)
- Concentration in Comparative Politics (CPOL)
- Concentration in International Political Economy (IPE)

- Concentration in International Relations (INTR)
- Concentration in Law, Philosophy and Governance (LPGV)
- Concentration in Political Analysis (PA)
- Concentration in Political Behavior and Identity Politics (PBIP)
- Concentration in Public Policy and Administration (PPA)
- Individualized Concentration (IND)
- Concentration in Philosophy, Politics, and Economics (PPE)

Code	Title	Credits
Select 0-12 credits in any one concentration		0-12
Total Credits		0-12

Students may partially satisfy the field study requirement by completing four courses (minimum 12 credits) in any one approved concentration.

Concentration in American Institutions and Processes (AMIP)

Code	Title	Credits

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in government and international politics may fulfill this requirement by successfully completing GOVT 490 Synthesis Seminar (Mason Core) or GOVT 491 Honors Seminar (Mason Core) in their major programs.

Schar Requirements in Addition to Mason Core Below

Code	Title	Credits
One course in Philosophy or Religion		
One additional course in Social and Behavioral Sciences		
One course in Non-Western Culture		
Proficiency in a foreign language through the intermediate level		

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

Honors

Honors in the Major

Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Accelerated Master's

Bachelor's Degree (any)/Biodefense, Accelerated MS

Overview

Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission

Please see the Graduate Admissions for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to fifteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses include BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/International Security, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees.

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to twelve graduate credits, all of which may be counted toward both the bachelor's and master's degrees. Any remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses are:

Code	Title	Credits
GOVT 540	International Relations	3
POGO 511	Introductory Data Analysis for Policy and Government	3
PUBP 504	Grand Strategy	3
PUBP 506	Ethics and the Use of Force	3

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/International Commerce and Policy, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees.

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to eighteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses include ITRN 500 Global Political Economy, ITRN 504 Microeconomics and Trade Policy, ITRN 503 Macroeconomic Policy in the Global Economy and ITRN 605 Technology, Culture and

Commerce. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/Political Science, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor's degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees.

Admission

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master's program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to eighteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/Public Administration, Accelerated MPA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated master's degree in public administration. If accepted, students will be able to earn a bachelor's degree in their chosen major and a master's degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to eighteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses include PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/Public Policy, Accelerated MPP

Overview

Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor's degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9)

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on

the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to fifteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree.. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Code	Title	Credits
PUBP 500	Theory and Practice in Public Policy	3
PUBP 503	Culture, Organization, and Technology	3
ITRN 503	Macroeconomic Policy in the Global Economy	3
POGO 511	Introductory Data Analysis for Policy and Government	3

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Illicit Trade Analysis Graduate Certificate

Banner Code: PP-CERG-ILTA

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies (https://catalog.gmu.edu/admissions/graduate-policies/). Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-8)

Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

International Commerce and Policy, MA

Banner Code: PP-MA-ICP

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The International Commerce and Policy, MA program (ICP) is an interdisciplinary course of study to help students from around the world prepare for jobs in the new economy. Unlike traditional international affairs programs, the degree is focused on such international economic issues as global trade and investment. The MA in International Commerce and Policy differs from an MBA program by providing training in the political, social, and technological aspects of the global economy. In today's world, it is critical for all participants in global markets to understand the multifaceted environment in which they work.

Faculty

The core faculty is augmented by adjunct faculty members who bring a wealth of practical knowledge and experience, as well as strong academic qualifications to the program. Adjuncts are drawn from the U.S. Commerce and State Departments, the Office of the U.S. Trade Representative, and the International Trade Commission, among other

government agencies, as well as from the private sector, the think tank community, and trade associations.

Courses

Courses are offered primarily in the late afternoon and evening to fit the schedules of busy professionals. In addition to classroom study, the program emphasizes experiential learning by supporting student internships, cooperative education, and research activities with private- and public-sector employers, and sponsoring a variety of study-abroad experiences.

Admissions & Policies

Admissions

Applications

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Students from all academic backgrounds are welcome to apply; however, some knowledge of economics, preferably through at least two undergraduate economics courses, is encouraged. While many students may have prior educational and work-related training in business and economics, others see the ICP Program as a bridge from government, education, and other non-business occupations to careers in the global economy.

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Termination from Program

Students admitted to an Schar graduate program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Program Requirements

The ICP program requires 36 credits of coursework. All degree candidates must take 21 credits of work in required courses. The remaining 15 credits consist of electives that may include internships, independent studies, and study abroad. Upon entering the program students complete core courses first to prepare for higher-level elective coursework.

Accelerated Master's

Bachelor's Degree (any)/International Commerce and Policy, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees.

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to eighteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses include ITRN 500 Global Political Economy, ITRN 504 Microeconomics and Trade Policy, ITRN 503 Macroeconomic Policy in the Global Economy and ITRN 605 Technology, Culture and Commerce. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

International Security Minor

Banner Code: INLS

Academic Advising

359 Research Hall
Fairfax Campus

The world faces a complex range of threats to its security and stability. Some, including war, terrorism and weapons of mass destruction, have been around for a long time. Others, including climate change and cyber conflict, are relatively new. And in today's increasingly connected world, old threats like pandemic disease and state fragility now take on a new urgency. Using a mix of history, theory and policy analysis, the international security minor prepares students to think critically about these pressing issues.

Faculty

Hunzeker (minor advisor)

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Website: schar.gmu.edu

The program trains early to mid-career professionals who seek the analytical and substantive capabilities to address the security challenges of the 21st century. In addition to understanding the traditional military and diplomatic approaches that characterized the state-centric security framework of the last century, the program's core courses will provide a firm grounding with regard to public-private and international collaborative responses to emerging and unconventional threats, ranging from transnational crime, terrorism, illicit trade, proliferation of emerging technologies and WMD, and corruption to state fragility and ethnic and sectarian conflict.

Admissions & Policies

Admissions

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the MA in International Security program may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. Accelerated Master's

Bachelor's Degree (any)/International Security, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees.

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to twelve graduate credits, all of which may be counted toward both the bachelor's and master's degrees. Any remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses are:

Code	Title	Credits
GOVT 540	International Relations	3
POGO 511	Introductory Data Analysis for Policy and Government	3
PUBP 504	Grand Strategy	3
PUBP 506	Ethics and the Use of Force	3

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

International/Comparative Studies Minor

Banner Code: ICS

Academic Advising

359 Research Hall
Fairfax Campus

In this minor, students learn the key features of government systems as they are applied in different contexts around the world. Students explore the interaction between government, society, and humans' most important challenges with respect to different regions and the international community.

Faculty

Butt (minor advisor)

Admissions & Policies

Policies

Students must complete all coursework with a minimum GPA of 2.00 and 8 credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

National Security and Public Policy Graduate Certificate

Banner Code: PP-CERG-NSP

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Schar School of Policy and Government offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master's degree.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from the program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Requirements

Certificate Requirements

Organization Development and Knowledge Management, MS

Banner Code: PP-MS-ODKM

Academic Advising

560 Founders Hall
Arlington Campus

Website: schar.gmu.edu

The Master of Science in Organization Development and Knowledge Management is an integrated program taught in executive format and designed for professionals who have several years of work experience. Providing conceptual tools and practical guidance to foster organizational change, the program focuses on three related areas: creating and leveraging knowledge through networks of people who communicate and collaborate; understanding and managing change by integrating the diverse roles of people, processes, and technology; and enhancing and facilitating collaboration by building effective relationships in technology-rich environments. A feature of this program is the group-oriented approach to learning supported by the use of

web-based collaborative computer technologies. Students develop the competencies to apply these technologies to make organizations more effective.

The cohort usually completes the program on a part-time basis. Full-time study is also possible by arrangement with the program director.

Students work in teams and complete most of the courses in sequence. The second academic year includes an action learning component, in which participants undertake projects in organizations and apply research methods. Overall, the process and methods of evaluation stress the cumulative development of competencies and the capacity to apply the insights gained. Students are expected to have easy access to a computer and the Internet. Minimum computer specifications can be obtained from the program office.

Admissions & Policies

Admissions

Students are considered for admission for the fall term only.

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Policies

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Political Communication Minor (Schar)

Banner Code: PCOM

Academic Advising

359 Research Hall
Fairfax Campus

The interdisciplinary minor in political communication is offered jointly by the Schar School of Policy and Government and the CHSS Department of Communication.

Political communication explores the interaction among members of the public, the media, advocacy groups, and politicians in democratic society. This minor uses a diverse approach to questions of how mass and interpersonal communication influence democratic functioning, including

1. how political actors use strategic messaging to persuade and mobilize the public
2. how citizens make sense of these messages and their impact on engagement, deliberation, efficacy, knowledge, and participation
3. the role of the mass media in facilitating or hindering this relationship

Political communication includes explicitly political activities like voting and political campaigns. It also encompasses any issue of public debate or deliberation, including culture and social movements.

Faculty

Daigle (minor advisor for Schar)

Admissions & Policies

Admissions

This minor is available to all Mason undergraduate students with the exception of communication majors pursuing a concentration in political communication.

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. A minimum of 6 COMM credits and a minimum of 6 GOVT credits are required. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Political Science, MA

Banner Code: PP-MA-POS

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Master of Arts in Political Science program prepares students for advanced work in political science, teaching, and research about government; a career in government and politics; and work in domestic and international nongovernmental organizations.

The program is made up of four core courses in political science and completion of either a concentration in international security or a broader field of specialization in American government and politics, international relations, or comparative politics. Students choosing a specialization have interdisciplinary opportunities to take up to 9 credits in related fields such as history or public policy.

The master's degree is the first step in an engaging and stimulating career. Students develop a deeper understanding of political ideas and institutions, more sophisticated research skills, a better grasp of the intricacies of governments abroad, and a deeper knowledge of the complexities of international politics. This degree can lead to a career teaching about government; working with legislative bodies, government agencies, and international organizations; or doing research and writing about politics and government.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for non-degree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Termination from Program

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses offered by the Schar school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Requirements

Degree Requirements

Total credits: 36

Students should develop an education plan with their advisors that lists the courses they plan to take. The plan is approved by the student's advisor. Students may include courses from other units to complement their field of specialization; they should reflect the ideas, institutions, or processes of contemporary governance.

Students who wish to begin a career in government and politics or to alter their current career path in government and politics are encouraged to take a 3-credit internship in their area of interest. Internships can be arranged through the Schar school.

Electives

Code	Title	Credits
Select up to two electives. [1]		0-6
Total Credits		0-6

[1] The number of electives students have will depend on how many credits they took in the concentration or field of specialization and whether they choose a 3-credit project or a 6-credit thesis. Students choose the remaining credits required for the degree, if any, from other courses in Schar, including an internship, additional courses in the field of specialization, or from course work offered by other units.

3 Credits of Project or 6 Credits of Thesis

A project or thesis is required for the MA in political science. Students who choose to do a project take 3 credits of GOVT 798 Political Science Research Project linked to an advanced specialty course and produce a final research project. Students who choose to do a thesis should be aware of the policies governing theses. They must follow the enrollment policy of the university and, once enrolled in GOVT 799 Political Science Thesis, must maintain continuous enrollment as specified in AP.6.9.3 Master's Thesis. A thesis director and a committee of two additional faculty members appointed by the school read and approve the thesis. Students should make arrangements for doing a project or thesis with their advisor.

Code	Title	Credits

Accelerated Master's

Bachelor's Degree (any)/Political Science, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor's degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees.

Admission

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master's program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to eighteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Political Science, PhD

Banner Code: PP-PHD-POS

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The doctoral degree in political science program is designed to prepare students for teaching and conducting research about government, careers in government and politics, and work in domestic and international nongovernmental organizations. The program allows students to combine their academic education with experience in the kinds of complex domestic and international political organizations they are studying. This model for political science education, patterned after the American Political Science Association's Congressional Fellows Program, is designed to foster scholarship and a firsthand understanding of domestic and international institutions such as think tanks, international bodies, nongovernmental organizations, journals of political opinion, and congressional and executive branch offices.

Admissions & Policies

Admissions

Application Requirements

See Graduate Admission Policies for general information on graduate admission to George Mason University. See Schar Admissions (http://schar.gmu.edu/admissions/) for application requirements and deadlines for the PhD in Public Policy. Students are considered for admission for the Fall term only.

For students who have been admitted with a bachelor's degree, the Faculty Review Committee will review each student's progress after 30 credits of coursework to determine whether the student will be allowed to continue their work toward the PhD. For students entering the program with a master's degree, this review will occur after 12 credits in this program. Students who are not allowed to continue to work toward the PhD will be allowed to complete the MA degree.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Academic Advising

A total of 12 credits of supporting courses may be taken in other departments to fulfill a minority of the credits for any of the requirements below, including the methodology requirement, with prior written approval of the program director. All courses should be planned with an advisor and appear on a program of study, which requires the approval of the program director.

A complete description of the program policies, procedures, and requirements is in the PhD student and faculty handbook (https://schar.gmu.edu/current-students/phd-student-services/phd-handbook-forms/), which is published annually.

Reduction of Credit

For students entering the program with a master's or MPA degree, the number of credits required for the doctorate may be reduced by up to 30 credits subject to approval of the doctoral program director.

Advancement to Candidacy

To advance to candidacy, students must complete all coursework required by their approved program of study. Students must also successfully complete and pass two comprehensive qualifying exams in major fields. In addition, students must have an approved dissertation committee and must present and successfully defend a dissertation proposal before advancing to candidacy.

Dissertation Research

Once enrolled in GOVT 998 Doctoral Dissertation Proposal, students in this degree program must maintain continuous registration in GOVT 998 Doctoral Dissertation Proposal or GOVT 999 Doctoral Dissertation Research each semester (excluding summers) until the dissertation is submitted to and accepted by the University Libraries. Once enrolled in GOVT 999 Doctoral Dissertation Research, students must follow the university's continuous registration policy as specified in AP.6.10.6 Dissertation Research. Students who defend in the summer must be registered for at least 1 credit of GOVT 999 Doctoral Dissertation Research.

Students may apply to this degree a minimum of 3 and a maximum of 6 credits of GOVT 998 Doctoral Dissertation Proposal and a minimum of 6 credits of GOVT 999 Doctoral Dissertation Research. They apply a minimum of 12 and a maximum of 24 dissertation credits (GOVT 998 Doctoral Dissertation Proposal and GOVT 999 Doctoral Dissertation Research combined) to the degree. Because of the continuous registration policy, students may be required to register for additional credits of these courses.

Students who do fewer than 24 credits of dissertation will complete their degree with additional electives.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Requirements

Degree Requirements

Total credits: minimum 120

Students must fulfill all Requirements for Bachelor's Degrees including the Mason Core. Students pursuing a BS in Public Administration must complete additional requirements for the BS degree in the Schar School of Policy and Government.

Students must earn a minimum grade of 2.00 in each course applied to the major, including GOVT courses as well as the supporting courses in other disciplines used to fulfill the requirements below. See an advisor before registering.

Core Courses

The math or statistics core course cannot be used to fulfill the Mason Core requirement in quantitative reasoning.

Code	Title	Credits
GOVT 101	Democratic Theory and Practice (Mason Core)	3
GOVT 103	Introduction to American Government (Mason Core)	3
GOVT 132	Introduction to International Politics (Mason Core)	3

or GOVT 133	Introduction to Comparative Politics (Mason Core)	
GOVT 300	Research Methods and Analysis	4
GOVT 351	Administration in the Political System	3
GOVT 367	Money, Markets and Economic Policy (Mason Core)	3
GOVT 368	Tools for Economic Policy Analysis	3
One course (3 credits) in math or statistics in addition to the quantitative reasoning Mason Core requirement		3
Total Credits		25

Senior Seminar

Code	Title	Credits
GOVT 490	Synthesis Seminar (Mason Core)	3
or GOVT 491	Honors Seminar (Mason Core)	
Total Credits		3

Public Administration Field Study

Code	Title	Credits
Students complete the degree by taking a minimum of 24 credits of advanced public administration field courses, with or without concentration		24
Total Credits		24

Students may complete a concentration of at least 12 credits in one field to fulfill a concentration. Students who do not wish to pursue a concentration may choose at least 24 credits from any of the advanced public administration courses listed below (with restrictions noted below) for a broader learning experience. Up to three credits of GOVT 399 Research Practicum and GOVT 480 Internship may be used to fulfill the field course requirement with prior advisor approval. Up to six credits of GOVT 496 Directed Readings and Research may be used to fulfill this requirement with prior advisor approval. GOVT 490 Synthesis Seminar (Mason Core) or GOVT 491 Honors Seminar (Mason Core) may not be used to fulfill this requirement.

Advanced Public Administration courses

Code	Title	Credits
ECON 309	Economic Problems and Public Policies	3
ECON 310	Money and Banking	3
ECON 335	Environmental Economics	3
ECON 355	The Political Economy of Nonprofit Institutions	3
ECON 385	International Economic Policy	3
ECON 390	International Economics	3

ECON 385	International Economic Policy	3

Individualized Concentration (IND)

Code	Title	Credits
Create your own concentration consisting of four upper level courses with Director approval [1]		

[1] A minimum of two courses in this concentration must be advanced public administration field courses.

Writing-Intensive Requirement

The university requires all students to complete at least one course designated "writing intensive" in their majors. Students majoring in public administration may fulfill this requirement by successfully completing GOVT 490 Synthesis Seminar (Mason Core) or GOVT 491 Honors Seminar (Mason Core) in their major programs.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelors of Science in Public Administration Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

First Year

Fall Semester	Credits	Spring Semester	Credits
GOVT 101	3	GOVT 103	3
GOVT 132 or 133	3	STAT 250	3
ENGH 101 or COMM 101	3	ENGH 101 or COMM 101	3
Western Civ/ World History	3	Nat Science 1	4
MATH 106	3	Literature	3
	15		16

Second Year

Fall Semester	Credits	Spring Semester	Credits
GOVT 351	3	ENGH 302	3
GOVT 367 (Fall only)	3	GOVT 368	3
Elective/Minor	3	GOVT Field 1	3

	15		15

Total Credits 122

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Honors

Honors in the Major

Highly qualified students majoring in Government and International Politics and Public Administration may pursue advanced work leading to graduation with honors in the major. Those students selected for participation in this program take a two-course sequence: GOVT 491 Honors Seminar (Mason Core) and GOVT 496 Directed Readings and Research. To graduate with honors in the major, students must complete these courses with a minimum GPA of 3.50.

Accelerated Master's

Bachelor's Degree (any)/Biodefense, Accelerated MS

Overview

Highly qualified undergraduates in any major may apply to the accelerated Biodefense, MS. If accepted, students will be able to earn a bachelor's degree in their chosen major and a Biodefense, MS with a reduced number of overall credits and within a reduced time frame, sometimes within five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission

Please see the Graduate Admissions for general information on graduate admission to George Mason University. Information specific to the accelerated MS program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to fifteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses include BIOD 604 Emerging Infectious Diseases I: Bacteria and Toxins, GOVT 500 The Scientific Method and Research Design, BIOD 605 Emerging Infectious Diseases II: Viral Agents and BIOD 620 Global Health Security Policy. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/International Security, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Security. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Security with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees.

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to twelve graduate credits, all of which may be counted toward both the bachelor's and master's degrees. Any remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses are:

Code	Title	Credits
GOVT 540	International Relations	3
POGO 511	Introductory Data Analysis for Policy and Government	3
PUBP 504	Grand Strategy	3
PUBP 506	Ethics and the Use of Force	3

Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/International Commerce and Policy, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree program in International Commerce and Policy. If accepted students will be able to earn a bachelor's degree in their major and an MA in International Commerce and Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees.

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including at least 12 credits of Government, Economics and/or Global Affairs courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to eighteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses include ITRN 500 Global Political Economy, ITRN 504 Microeconomics and Trade Policy, ITRN 503 Macroeconomic Policy in the Global Economy and ITRN 605 Technology, Culture and Commerce. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/Political Science, Accelerated MA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated MA degree in political science. If accepted, students will be able to earn a bachelor's degree in their chosen major and a MA in Political Science with a reduced number of overall credits and within a reduced time frame, sometimes five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees.

Admission

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines for the Political Science master's program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to eighteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses are chosen from GOVT 500 The Scientific Method and Research Design, GOVT 510 American Government and Politics, GOVT 520 Political Theory, GOVT 530 Comparative Politics, GOVT 540 International Relations. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/Public Administration, Accelerated MPA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated master's degree in public administration. If accepted, students will be able to earn a bachelor's degree in their chosen major and a master's degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to eighteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses include PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Bachelor's Degree (any)/Public Policy, Accelerated MPP

Overview

Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor's degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9)

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to fifteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree.. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Code	Title	Credits
PUBP 500	Theory and Practice in Public Policy	3
PUBP 503	Culture, Organization, and Technology	3
ITRN 503	Macroeconomic Policy in the Global Economy	3
POGO 511	Introductory Data Analysis for Policy and Government	3

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Public Administration, MPA

Banner Code: PP-MPA-PUAD

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Master of Public Administration (MPA) is designed for people who hold or aspire to hold leadership positions in organizations that participate in the development and implementation of public policy. The mission of the MPA program is to give graduate students the opportunity to build their knowledge of politics, public policy and management and to enhance their analytic, problem solving, and communication skills.

MPA students at Mason have the research and cultural resources of the Washington, D.C. area at their disposal. Government agencies representing all levels in the U.S. federal system are located close to the campus, as are the National Archives, the Library of Congress, and the Smithsonian Institution. Another benefit is the wide range of internship opportunities available in governmental and nonprofit organizations. The MPA Program regularly has internship invitations from national, state, and local government organizations, as well as from nonprofit organizations whose principal work is at the local, state, national, or international levels. Many of these internships are paid positions.

MPA courses are held at the Fairfax and the Arlington campuses during the week and on the weekend in an accelerated format.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university and school policy.

Policies

Termination from Program

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Program Requirements

The MPA curriculum is arranged in a sequential manner. PUAD 500-level courses are foundation courses, 600-level courses are intermediate courses, and the 700-level courses are advanced courses. Students must take PUAD 500-level, or foundation courses, during the first two semesters, followed by 600-level classes. The PUAD 700-level courses should be taken during the last semester or two of enrollment in the MPA program.

For example, a full-time student should enroll in PUAD 502 Administration in Public and Nonprofit Organizations and two other 500-level courses, such as POGO 511 Introductory Data Analysis for Policy and Government and PUAD 520 Organization Theory and Management Behavior, during the first semester. In the second semester the student should enroll in PUAD 540 Public Policy Process and two intermediate courses such as PUAD 662 National Budgeting and a 600-level elective course.

Part-time students taking two courses a semester should take PUAD 502 Administration in Public and Nonprofit Organizations and either POGO 511 Introductory Data Analysis for Policy and Government or PUAD 520 Organization Theory and Management Behavior during the first semester, followed by either POGO 511 Introductory Data Analysis for Policy and Government or PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process in the second semester.

Requests for taking a course out of sequence must be made in writing to the student's advisor and must be approved by the advisor before enrollment.

Requirements

Degree Requirements

Total credits: 36-39

The required courses emphasize the development of knowledge about public policy and management, as well as analytical problem-solving and communication skills, and third-party governance. Through these courses, students develop a shared knowledge base and skill set. The elective courses can be used by students to focus their knowledge and skill development within one concentration. Alternatively, the electives can be used to extend the breadth of study with courses drawn from a variety of concentrations or from other departments and schools across the university.

Core Courses

Code	Title	Credits
PUAD 502	Administration in Public and Nonprofit Organizations	3

POGO 511	Introductory Data Analysis for Policy and Government	3
PUAD 520	Organization Theory and Management Behavior	3
PUAD 540	Public Policy Process	3
PUAD 700	Ethics and Public Administration	3
PUAD 703	Collaborative Public Management	3
Total Credits		18

Additional Methods Course

Code	Title	Credits
Select one course from the following:		3
PUAD 613	Economic Analysis in Public Administration	
PUAD 645	Policy Analysis	
POGO 611	Advanced Data Analysis for Policy and Government	
POGO 646	Policy and Program Evaluation	
Total Credits		3

Accounting, Budgeting, and Financial Management

Code	Title	Credits
Select one course from the following:		3
PUAD 660	Public and Nonprofit Accounting and Finance	
PUAD 662	National Budgeting	
PUAD 663	State and Local Budgeting

Total Credits		3

Electives

Code	Title	Credits
Select four electives [1]		12
Total Credits		12

[1] Students may take their electives within one of the concentrations which follow. As an alternative, with the approval of their advisor, students may select their electives from several concentrations or fields. Students not pursuing a concentration may select electives from Schar course offerings.

Concentrations

Students may declare only one concentration. PUAD 794 Internship and POGO 796 Directed Readings and Research may be applied to a concentration where content is appropriate and with prior written approval of the student's advisor. Other courses may also be applied to a concentration with prior written approval of the advisor.

Concentrations

- Concentration in Administration of Justice (ADJ)
- Concentration in Emergency Management and Homeland Security (EMHS)
- Concentration in Environmental Science and Public Policy (EVPP)
- Concentration in Human Resources Management (HRM)
- Concentration in International Management (IM)
- Concentration in Nonprofit Management (NPMG)
- Concentration in Policy Studies (PS)
- Concentration in Public Management (PMG)
- Concentration in Public and Nonprofit Finance (PNF)
- Concentration in State and Local Government (SLG)
- Concentration in Managing Across Sectors (MAS)

Concentration in Administration of Justice (ADJ)

Accelerated Master's

Bachelor's Degree (any)/Public Administration, Accelerated MPA

Overview

Highly-qualified undergraduates in any major may apply to the accelerated master's degree in public administration. If accepted, students will be able to earn a bachelor's degree in their chosen major and a master's degree in public administration with a reduced number of overall credits and within a reduced time frame, sometimes within five years. See AP.6.7 Bachelor's/Accelerated Master's Degrees.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Information specific to the accelerated MPA program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including 12 GOVT credits, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to eighteen graduate credits of which twelve may be

counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree. The courses include PUAD 502 Administration in Public and Nonprofit Organizations, POGO 511 Introductory Data Analysis for Policy and Government, PUAD 520 Organization Theory and Management Behavior and PUAD 540 Public Policy Process. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Public Management Graduate Certificate

Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Schar School of Policy and Government offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master's degree.

The graduate certificate in public management may only be pursued on a part-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from that program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Requirements

Website: schar.gmu.edu

The master of public policy leads to a degree for aspiring or experienced professionals who seek career advancement through cutting-edge education and training in policy analysis and development in increasingly technical and global environments. The program prepares students to be reflective practitioners who develop, implement, manage, analyze, evaluate, and effect innovative change in the public and private sectors through a course of study that emphasizes the fundamentals of policy development; the role of technology, analytic assessment, and modeling for policy evaluation; and the implications of international and global perspectives on policy formation. Courses are offered primarily in late afternoon and evening to fit the schedules of busy professionals.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions/). Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

Termination from Program

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Program Requirements

Students must complete 36 to 39 credits of coursework through a combination of core courses, electives, and a professional experience requirement. Appropriate professional experience can be demonstrated through previous employment or a supervised internship. Students will also be exposed to the global nature of public policy activity through the core requirement of international comparative policy assessment.

Accelerated Master's

Bachelor's Degree (any)/Public Policy, Accelerated MPP

Overview

Highly-qualified undergraduates in any major may apply to the accelerated Master of Public Policy (MPP) program. If accepted students will be able to earn a bachelor's degree in their chosen major and the Master of Public Policy with a reduced number of overall credits and within a reduced time frame, sometimes within five years. More information on bachelor's/accelerated master's programs may be found in AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. See AP.6.9 Requirements for Master's Degrees. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-9)

Admission

Please see Graduate Admission Policies for general information on graduate admission to George Mason University. Information specific to the accelerated Master of Public Policy program may be found on the Schar website (http://schar.gmu.edu/programs/undergraduate-degrees/accelerated-masters-programs/).

To be considered for this accelerated master's program, applicants must have completed a minimum of 60 credits, including 12 credits of Government and/or Economics courses, and have a minimum GPA of 3.50 in all coursework applied to the degree.

Accelerated Option Requirements

While undergraduate students, accelerated master's students may complete up to fifteen graduate credits of which twelve may be counted toward both the bachelor's and master's degrees. Remaining credits may be held as reserve graduate credit and count only toward the master's degree.. The student must have a minimum GPA of 3.00 in each course. Students must maintain a minimum GPA of 3.00 in these courses and in coursework applied to their major.

POGO 511	Introductory Data Analysis for Policy and Government	3

Upon completion and conferral of the undergraduate degree in the semester indicated in the application, students must submit the Bachelor's/Accelerated Master's Transition Form to apply credits to

the master's degree. Students must begin their master's program the semester immediately following conferral of the undergraduate degree (excluding summer).

Public Policy, PhD

Banner Code: PP-PHD-PUBP

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

This doctoral degree in public policy is distinctive in its heavy emphasis on the combined influence of technology, culture, and institutions on public policy. Students investigate the increasing tensions created by technologically driven organizational change. This doctoral program prepares its graduates to assume positions of significant responsibility in academia, government, and the private and public sectors. With a focus on analytical and research-based approaches to public policy, our students seek to understand the underlying determinants of public policy choices, analyze and improve the implementation of policy, and identify and assess new opportunities to address emerging issues.

To investigate the policy issues associated with substantive policy areas, students develop in-depth understanding of American institutions, values, and culture; competence in research methods and advanced analytical methodologies; and a comparative, international perspective. At the time of admission, each student is assigned a faculty advisor who assists in the design and development of the student's program.

Admissions & Policies

Admissions

See Graduate Admission Policies for general information on graduate admission to George Mason University. See Schar Admissions (http://schar.gmu.edu/admissions/) for application requirements and deadlines for the PhD in Public Policy. Students are considered for admission for the Fall term only.

Policies

For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-10).

Program Requirements

Students are required to complete a minimum of 80 credits of graduate coursework, of which no more than 12 may be dissertation credits. Specific coursework requirements include four foundational core courses, one semester of participation in the research colloquium (public policy seminar), two advanced methodology courses, three courses in an area of program specialization, and three advanced courses tailored to the student's research needs and interests. Courses are determined in collaboration with the student's advisor and are drawn widely not only from Schar, but also from other programs at Mason.

At the completion of core skills coursework (Stage One), students must pass a qualifying exam that evaluates mastery of the first year's material, as well as the ability to integrate that material when addressing important and complex public policy problems and issues. Students must then develop their research areas through specialized coursework, and pass a field exam structured around their specific field of proposed doctoral research (Stages Two and Three). Other requirements include the successful preparation and defense of a doctoral research proposal and the ensuing dissertation (Stage Four).

A complete description of the program policies, procedures, and requirements is in the PhD student and faculty handbook (https://schar.gmu.edu/current-students/phd-student-services/phd-handbook-forms/), which is published annually.

Reduction of Credit

Students who enter the doctoral program with a master's degree or other graduate credit may have their credit reduced by up to 30 credits, subject to the approval of the program director.

Prerequisites: Methodological and Substantive Foundations

PhD students are required to have competence in the following three areas, either by taking these courses or by proving competence through a placement exam and/or evidence of previous relevant coursework.

Prerequisite courses will not count as part of the 80 credit requirement.

Code	Title	Credits
POGO 511	Introductory Data Analysis for Policy and Government	3

Doctoral Coursework and Requirements

Stage One - Core Skills

Code	Title	Credits
Coursework		
Four credits of		4
PUBP 800	Culture and Public Policy	
POGO 801	Research Design for the Social Sciences and Public Policy	3
PUBP 804	Multivariate Statistical Analysis in Public Policy	4
PUBP 805	Foundations of Social Science for Public Policy	4
Pass the comprehensive Qualifying Exam		
Total Credits		15

Stage Two - Policy Fields and Skills

After passing the qualifying exam, students assemble a Field Research Committee. By the end of their third semester, full-time students (fourth semester for part-time) must choose a chair for their Field Committee.

By the start of their fourth semester, full-time students (fifth semester for part-time) must submit to the chair of their Field Committee a plan for their Field of Study. The Field of Study Plan will describe a proposed research area, including citations relevant to current research in that field; four relevant field courses; and the names of faculty who will be involved. The plan must be approved by both the student's Field Committee chair and the program director.

Code	Title	Credits

Total Credits		13-14

[1] Other courses may be approved by the program director.

Stage Three - Research Foundations

In Stage Three, students take coursework approved in the Field of Study Plan.

The Field of Study must include one advanced methods course from the approved list for the doctoral program, or be approved in writing by the Field Committee Chair and Doctoral Program Director. Where appropriate courses are not available from Schar School, students may petition the Director of the PhD program for substitute courses to count for their Field of Study Plan.

Students are expected to complete coursework before taking PUBP 998 credits. A student may take no more than six credits of PUBP 998 before completing a field of study plan and having it approved by three Graduate Faculty members.

Code	Title	Credits
Coursework		
Three substantive Field of Study courses that will serve as a foundation for their Field [1]		9-12
PUBP 810	Regional Development and Transportation Policy	
PUBP 811	Applied Methods in Regional Development and Transportation Policy	
PUBP 820	Technology, Science, and Innovation: Institutions and Governance	
PUBP 821	Analytic Methods for Technology, Science, and Innovation Policy	
PUBP 834	Entrepreneurship, Growth, and Public Policy	
PUBP 835	Entrepreneurship, Creativity, and Innovation	
POGO 840	Policy, Politics, and American Government Institutions	
POGO 841	U.S. Political Behavior and the Process of Policymaking	
PUBP 860	Social Theory, Culture, and Public Policy	
PUBP 861	Culture and Social Policy Analysis	
PUBP 880	Global and International Public Policy I	
PUBP 881	International Trade Policy	
One Advanced Methods course [2]		3-4
POGO 611	Advanced Data Analysis for Policy and Government	
PUBP 754	Geographic Information Systems and Spatial Analysis for Public Policy	
PUBP 791	Advanced Field Research for Policy: Theory and Method	
PUBP 792	Advanced Economic Analysis for Policy Research	
POGO 793	Big Data Analytics for Policy and Government	
Total Credits		12-16

[1] Courses must include at least one 800 level Schar course from this list.

[2] Other courses must be approved in writing by the Field Committee Chair and program director.

Note: Where appropriate courses are not available from Schar, students may petition the program director for substitute courses to count for their Field of Study Plan.

Dissertation Research

Qualifying Exams

Students must pass a qualifying exam which is taken after the core courses are completed.

When students have completed all coursework, have passed the qualifying exam, have an approved dissertation committee and presented and successfully defended a dissertation proposal, they advance to candidacy.

Stage Four - Dissertation

Twelve credits of PUBP 998 and PUBP 999 must be applied to the degree. A minimum of six credits must be PUBP 999.

Code	Title	Credits
Up to six credits of		6
PUBP 998	Research/Proposal for Dissertation	
Proposal Oral Defense		
At least six credits of		6
PUBP 999	Dissertation	

Dissertation Oral Defense	
Total Credits	12

Public Policy and Management Minor

Banner Code: PPMG

Academic Advising

359 Research Hall
Fairfax Campus

This minor equips students with the background and tools to understand the complexities of policy formation and implementation as leaders and managers in the political arena.

Faculty

Conant (minor advisor)

Admissions & Policies

Policies

Students pursuing this minor must complete 18 credits in government with a minimum grade of C in each course. Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Science, Technology, and Security Graduate Certificate

Banner Code: PP-CERG-STS

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Schar School of Policy and Government offers certificate programs in conjunction with its master's programs. Students already pursuing a master's degree in the school may, in most cases, after admission to a certificate program, earn an additional six credits (two courses) in Schar to receive a certificate in addition to the master's degree. The certificate in science, technology, and security provides an introduction to the intersection of science and security, covering topics such as the technology of CBRN weapons, proliferation, technical countermeasures, and the role of science and technology in the policy-making process.

The graduate certificate in science, technology, and security may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

Applicants to all graduate programs must meet the admission standards and application requirements for graduate study as specified in Graduate Admission Policies. Participants must be admitted to a certificate program. Admission requirements are the same as those for the master's programs and may be found on the Schar admissions website (http://schar.gmu.edu/admissions/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Termination from Program

Students admitted to a Schar program will be terminated from that program upon receiving one grade of F and are no longer eligible to take courses in the school. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses. For policies governing all graduate degrees, see Graduate Policies.

Transportation Policy, Operations, and Logistics, MA

Banner Code: PP-MA-TPOL

Academic Advising

560 Founders Hall
Arlington Campus

359 Research Hall
Fairfax Campus

Website: schar.gmu.edu

The Master of Arts in Transportation Policy, Operations, and Logistics (TPOL) program is designed for students and practicing professionals engaged in planning, regulating, managing, and operating transportation facilities and services. Students obtain a working knowledge of the theory, policy, law, research, and practices required to effectively and efficiently supply and operate transportation facilities and services. They also learn to think critically and analytically about the problems and challenges in this field and communicate their analyses clearly and effectively through written and oral presentations.

Admissions & Policies

Admissions

Requirements

See Graduate Admission Policies for general information on graduate admission to George Mason University. Specific information on application requirements and deadlines may be found with Schar Admissions (http://schar.gmu.edu/admissions/).

Completed applications for fall and spring semesters are reviewed on a rolling basis, with late applications considered on a space-available

basis. Students may be admitted for nondegree study and apply a limited number of credits toward the master's degree should they choose to apply to the degree program later, in accordance with university policy.

Policies

For policies governing all graduate degrees, see Graduate Policies.

Termination from Program

Students admitted to a Schar program will be terminated from Schar upon receiving one grade of F and are no longer eligible to take courses in Schar. Per university regulation, students are terminated from the university after accumulating grades of F in two courses or 9 credits of unsatisfactory grades in graduate courses.

Administration

- Alpaslan Özerdem, Dean
- Julie Shedd, Associate Dean

- Thomas Flores, Graduate Programs Director
- Mara Schoeny, Undergraduate Program Director

College Code: CA

The Jimmy and Rosalynn Carter School for Peace and Conflict Resolution (Carter School) is committed to the development of theory, research, and practice that interrupt cycles of violence. The school community includes scholars, graduate and undergraduate students, alumni, practitioners, and organizations in the field of peace making and conflict resolution. Building on the strengths of our four research centers, field-based courses, and faculty with expertise from over a dozen disciplines, earning a degree at the Carter School will take you to the epicenter of conflict and prepare you for a meaningful career.

Recognized in 1997 as a Commonwealth Center of Excellence by the Virginia Legislature, the Carter School is committed to serving our students, faculty and staff, our local community, our global mission, and the field of Conflict Analysis and Resolution. The Carter School is a leader in George Mason University's commitment to be a University for the world, leveraging our long history of engagement in research and intervention in real world problems and our strength in preparing our graduates to productively engage in our local and global challenges. The Carter School strives to break down the silos of domestic and international conflict research and practice with teaching, research and practice that cut across levels of conflict.

Our world class faculty has published foundational texts on such topics as culture, social identity, narrative, religion, history and education, gender, and peacebuilding and consciousness. As scholar-practitioners, their projects and teaching engage them around the globe, including in the Middle East, Africa, the Caucasus, and here in the United States.

We offer a full complement of degree programs: Bachelor's, Master's, Graduate Certificate, and Doctoral degrees that develop students' ability to engage with theory and build their own practice.

Undergraduate Programs

Bachelor's Degrees and Minors

The Carter School offers students a BA, BS, and two minors in an interdisciplinary social science field with practical applications. The BA and BS are in Conflict Analysis and Resolution and the minors are in Conflict Analysis and Resolution or Sport and Conflict Resolution. The field of conflict analysis and resolution analyzes the sources and dynamics of conflict and the means for resolution toward lasting peace. Conflict resolution students take a series of core courses that provide a background in conflict theory, analysis, and conflict resolution skills. All conflict analysis and resolution majors also choose an area of concentration. There are six concentrations: Building Peace in Divided Societies, Global Engagement, Political and Social Action, Justice and Reconciliation, Interpersonal Dynamics, and Collaborative Leadership. After selecting a concentration, students choose courses from units throughout the university that relate to the concentration and their areas of interest. The major also requires three credits of field experience in the form of an internship, independent research, or study abroad.

Bachelor's/Accelerated Master's

Bachelor's/Accelerated Master's

The School offers qualified undergraduates the opportunity to apply to the accelerated master's degree program. If accepted, students will earn both an undergraduate and a graduate degree after satisfactory completion of 147 credits, sometimes within 5 years. More information about the degree options and application process may be found here (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/).

Graduate Programs

PhD Program

The PhD program in Conflict Analysis and Resolution, the first of its kind in the United States, provides advanced study for students in the fields of conflict and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and the private sectors. The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

MS Program

The MS in Conflict Analysis and Resolution is a professional program that prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice. Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

Graduate Certificates

The Carter School offers a graduate certificate in Mass Atrocity and Genocide Prevention and a graduate certificate in Conflict Analysis and Resolution. The Conflict Analysis and Resolution certificate offers four concentrations: Advanced Skills; Collaborative Community Action; Prevention and Reconstruction Contexts; and World Religions and Peacebuilding. Each of these 15-credit programs is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields.

Requirements & Policies

Policies
Students should become familiar with the university's general academic policies in addition to those specific to each academic unit. See the Academic Policies.

Policies specific to each academic program can be found listed in each program's catalog listing.

Appeal of Decisions
The policies of the Jimmy and Rosalynn Carter School for Peace and Conflict Resolution are designed to be consistent, equitable, and transparent. Our office strives to be thorough, timely, and open to answer any questions students may have regarding our decisions and/or the process through which they were reached. Students seeking clarification and explanation of the decision should request an appointment with the appropriate Program Director to discuss their concerns.

Students have the right to appeal decisions regarding requests for academic actions. This step can only be taken after a request to meet with the Program Director. Students who wish to pursue an appeal after this meeting should do so only if they can provide sufficient and compelling reasons for their initial claim to be reconsidered. Such reasons include newly available documentation, proof of an irregularity in procedures, proof of inequity or inconsistency, or consequences so serious that further review is warranted. A student's dissatisfaction or disagreement with the decision does not constitute sufficient reason for a decision to be changed. Appeals are first reviewed by the Program Director. If denied, the appeal is forwarded to the Dean. The decision of the Dean is the final decision of the School.

If the appeal is a case involving a school-level policy, the Dean serves as the final point of appeal. If the appeal involves university level policies, students must first complete the school-level appeal process before appealing to the Provost's Office.

Conflict Analysis and Resolution Graduate Certificate

Banner Code: CA-CERG-CONF

Academic Advising

Phone: 703-993-1300
Email: carter@gmu.edu
Website: https://carterschool.gmu.edu/

This 15-credit certificate is specifically tailored to provide students with practical knowledge of conflict analysis and resolution relevant to their focused areas of work. Designed for mid-career professionals studying in a cohort environment, the certificate programs integrate conflict analysis and resolution theory, research, and practical technique. These programs use intensive course sessions, lecture, seminar, and applied mentored learning in real and simulated situations to prepare students to use conflict analysis and resolution approaches in their work in a variety of fields. Students choose one of four concentrations.

This certificate may only be pursued on a part-time basis, unless a student is concurrently enrolled in another degree program or takes additional courses over those required for the certificate program. Some courses are offered only in intensive Saturday and Sunday formats or online.

Concentrations
Advanced Skills
The Advanced Skills concentration covers conflict resolution skills in challenging conflicts and considers innovative and emerging practices. This concentration considers the complexity of conflict in a variety of different settings and prepares students to design and implement interventions for difficult conflicts. The concentration emphasizes skill development.

Prevention and Reconstruction Contexts
The Prevention and Stabilization Contexts concentration augments development, defense, security, or humanitarian aid work experience with the theories and skills of conflict analysis and resolution for designing, implementing, and evaluating conflict-sensitive initiatives internationally in areas of potential violence and post-conflict reconstruction and stabilization. Considers cross-sectoral approaches to long-term violence prevention and constructive conflict resolution.

World Religions and Peacebuilding
The World Religions and Peacebuilding concentration considers strategies to reduce global violence and terrorism by incorporating the best moral practices of religious communities into policy planning, diplomacy, civil society building and democratization. Covers strategies

to elicit moderate moral religious expression in conflict regions to strengthen civil society and democracy.

Collaborative Community Action

All communities have conflicts, some much more severe than others, often driven by deep racial and ethnic divisions, economic inequity, complex intractable problems, and environmental degradation. Many community conflicts are triggered by changes, whether a new law or new development. These are among the many issues that effective, inclusive, collaborative community processes can help address. This concentration incorporates theory and skills needed to identify concerns and design collaborative processes that employ a wide range of design options ranging from small group dialogue to facilitated consensus building and online engagement to thousand person town meetings.

Admissions & Policies

Admissions

Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Class Schedule

Please note that some classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

Academic Advising

Phone: 703-993-4165
Email: ugradcar@gmu.edu
Website: https://carterschool.gmu.edu/

This minor provides students with the theory and skills to examine how and why conflicts occur and what can be done to mitigate their destructive aspects while reinforcing their constructive potential. Courses in the minor highlight relational, social, structural, and cultural factors that influence conflict and its resolution. This minor engages students in understanding the complexity of contemporary issues and problems and can be applied to many fields of study or professional careers.

Advising

Advisors help students create a course of study that meets their interests and career goals. All majors and minors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Admissions & Policies

Admissions

This minor is open to all undergraduate students.

Policies

Students pursuing this minor must complete 15 credits of coursework in conflict analysis and resolution with a minimum GPA of 2.00. Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

The world is becoming increasingly connected and the ability to create and maintain cross-cultural connections is more important than ever. As the effects of violence and conflict are felt throughout the global community, we are seeing more and more opportunities for collaboration, problem solving, and peacebuilding in local communities and across international barriers. To prepare our students to make cross-cultural connections, Bachelor's of Arts in Conflict Analysis and Resolution students must demonstrate intermediate level proficiency in a foreign language.

All conflict analysis and resolution majors choose an area of concentration:

- Building Peace in Divided Societies
- Global Engagement
- Political and Social Action
- Justice and Reconciliation
- Interpersonal Dynamics
- Collaborative Leadership
- Environmental Conflict and Collaboration

Advising

Advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Major Coursework Grade Requirement

Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BA. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

Transfer Students

For policies governing admission and requirements for students transferring from another college or university, see Undergraduate Admission Policies - Transfer.

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University's Mason Core requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 Advanced Composition (Mason Core) and a synthesis course.

Transfer students who have been offered admission under the terms of the Guaranteed Admission Agreement and are pursuing a BA are considered to have met all school requirements except for proficiency in a foreign language.

Students with a bachelor's degree from an accredited institution who are pursuing a BA in this school are considered to have met all school requirements except for proficiency in a foreign language.

Requirements

Degree Requirements

Total credits: 120

Students must fulfill all requirements for bachelor's degrees as stated in Academic Policies including all Mason Core requirements. Students majoring in Conflict Analysis and Resolution must also complete the college-level requirements for foreign language proficiency as well as 51 major requirement credits for the BA degree.

Students pursuing a double major/degree with a program outside of the Carter School undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Required Core Courses

Code	Title	Credits
CONF 101	Conflict and Our World (Mason Core)	3
CONF 210	Theories of Conflict Analysis and Resolution	3
CONF 300	Conflict Resolution Techniques and Practice	3
CONF 301	Research and Inquiry in Conflict Resolution	3
CONF 302	Culture, Identity, and Conflict	3
CONF 320	Interpersonal Conflict Analysis and Resolution	3
CONF 330	Community, Group, and Organizational Conflict Analysis and Resolution	3
CONF 340	Global Conflict Analysis and Resolution (Mason Core)	3
CONF 490	RS: Integration (Mason Core)	3
Total Credits		27

Field Experience

Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.

Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least nine credits of conflict coursework before applying for field experience credit. Prior departmental approval is *required* for students to receive credit through any field experience options. Students interested in trips with the Carter School can find information here (https://scar.gmu.edu/academics/undergraduate/study-abroad/). Students interested in study abroad through the Global Education Office can find information here (https://studyabroad.gmu.edu). Please contact a Carter School advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

Code	Title	Credits
Select a minimum of three credits from the following:		3
CONF 370	Internship Field Experience	
CONF 375	Special Programs Field Experience	
CONF 385	International Field Experience	
CONF 499	Independent Research in Conflict Analysis and Resolution	
Total Credits		3

Skills and Practice

This three credit requirement can be fulfilled by taking:

1. an additional 3 credits from a second field experience, OR
2. a foreign language course at the 250 level or higher, OR
3. one of the 3 credit courses or three of the 1 credit courses listed below:

Code	Title	Credits
Select one of these 3 credit courses:		3
CONF 325	Dialogue and Difference	
CONF 398	Special Topics in Advanced Techniques and Practices	
CONF 425	Mediating Conflict	
CONF 499	Independent Research in Conflict Analysis and Resolution	
Or select three of these 1 credit skills courses:		
CONF 310	Special Topics in Practice	
CONF 314	Career Development Seminar	
CONF 331	Simulation in Community and Organizational Conflict Resolution	
CONF 341	Simulation in Global Conflict Resolution	
Total Credits		3

Courses may NOT double count for the concentration requirement and the skills and practice requirement.

Concentrations

There are eight concentrations.

Concentrations

- Concentration in Building Peace in Divided Societies (BPDS)
- Concentration in Global Engagement (GLBE)
- Concentration in Political and Social Action (PSA)
- Concentration in Justice and Reconciliation (JRCN)
- Concentration in Interpersonal Dynamics (INTD)
- Concentration in Collaborative Leadership (CLDR)
- Concentration in Environmental Conflict and Collaboration (EVCC)
- Individualized Concentration (IND)

To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about which courses support learning in their chosen concentration. At least two of the six concentration courses must be CONF courses taken in residence. CONF 397 Study Abroad Special Topics and courses transferred from another institution do not fulfill this requirement. Courses may not double count for the concentration requirement and the skills and practice requirement.

Concentration in Building Peace in Divided Societies (BPDS)

Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

Code	Title	Credits
Select at least four of the six concentration courses from the following:		12
CONF 325	Dialogue and Difference	
CONF 335	Justice and Reconciliation	
CONF 392	Youth and Conflict	
CONF 393	Violence: Causes, Dynamics Alternatives	
CONF 435	Building Peace in Divided Societies	
COMM 305	Foundations of Intercultural Communication (Mason Core)	
CULT 320	Globalization and Culture	
ECON 360	Economics of Developing Areas (Mason Core)	
GGS 307	Geographic Approaches for Sustainable Development	
GOVT 342	Diplomacy	
HIST 373	The Civil War and Reconstruction	
INTS 305	Conflict Resolution and Transformation	
SOCI 320	Globalization and Social Change (Mason Core)	
Total Credits		12

Concentration in Global Engagement (GLBE)

Focuses on studying the dynamics and impact of global conflict resolution. Examines domestic and international dimensions of security, state-to-state conflict, internal wars, terrorism, migration, negotiation, and diplomacy. Explores what can be done to reduce violent conflict and increase peace and security.

Code	Title	Credits
Select at least four of the six concentration courses from the following:		12
CONF 335	Justice and Reconciliation	
CONF 345	Social Dynamics of Terrorism, Security, and Justice	
CRIM 405	Law and Justice around the World (Mason Core)	
ECON 385	International Economic Policy	
EVPP 337	Environmental Policy Making in Developing Countries	
GGS 301	Political Geography (Mason Core)	
GGS 307	Geographic Approaches for Sustainable Development	
GOVT 322	International Relations Theory	
GOVT 342	Diplomacy	
GOVT 446	International Law and Organization	

INTS 416	Refugee and Internal Displacement (Mason Core)	
SOCI 388	Violence and Religion	
Total Credits		12

Concentration in Political and Social Action (PSA)

Focuses on the ways that people organize themselves to effect change in their societies. This concentration explores social action, social organization, social movements, and civil resistance to analyze and investigate the role of constructive conflict.

Code	Title	Credits
Select at least four of the six concentration courses from the following:		12
CONF 393	Violence: Causes, Dynamics Alternatives	
CONF 394	Human Rights and Inequality	
COMM 326	Rhetoric of Social Movements and Political Controversy (Mason Core)	
ECON 309	Economic Problems and Public Policies	
GOVT 301	Public Law and the Judicial Process	
GOVT 364	Public Policy Making	
INTS 304	Social Movements and Community Activism (Mason Core)	
INTS 334	Environmental Justice (Mason Core)	
INTS 362	Social Justice and Human Rights (Mason Core)	
PSYC 427	Community Engagement for Social Change (Mason Core)	
SOCI 307	Social Movements and Political Protest	
SOCI 340	Power, Politics, and Society	
SOCI 352	Social Problems and Solutions (Mason Core)	
Total Credits		12

Concentration in Justice and Reconciliation (JRCN)

Focuses on the relationships between human rights, justice, and conflict resolution. Encompasses a spectrum of coursework including legal dimensions of human rights, trauma, memory, healing, conflict transformation, and forms of restorative justice.

Code	Title	Credits
Select four of the six concentration courses from the following:		12
CONF 335	Justice and Reconciliation	
CONF 394	Human Rights and Inequality	
CONF 435	Building Peace in Divided Societies	
CRIM 307	Social Inequality, Crime, and Justice	
CRIM 404	Crime Victims and Victimization	
CRIM 406	Family Law and the Justice System	
INTS 300	Law and Justice (Mason Core)	
INTS 314	Conflict, Trauma and Healing	
INTS 362	Social Justice and Human Rights (Mason Core)	
SOCI 308	Race and Ethnicity in a Changing World (Mason Core)	
SOCI 355	Social Inequality (Mason Core)	
Total Credits		12

Concentration in Interpersonal Dynamics (INTD)

Focuses on the dynamics of social interaction that lead to interpersonal conflict and the processes and skills that support the transformation of these conflicts. Issues examined include intercultural communication, psychology of groups, family relationships, and other dimensions of human relations.

Code	Title	Credits
Select four of the six concentration courses from the following:		12
CONF 325	Dialogue and Difference	
CONF 392	Youth and Conflict	
CONF 425	Mediating Conflict	
COMM 301	Relational Communication Theory	
COMM 305	Foundations of Intercultural Communication (Mason Core)	
COMM 401	Interpersonal Communication in the Workplace	
INTS 317	Issues in Family Relationships (Mason Core)	
PSYC 231	Social Psychology (Mason Core)	
PSYC 379	Applied Cross-Cultural Psychology (Mason Core)	
PSYC 417	Science of Well Being	
PSYC 467	The Psychology of Working in Groups and Teams	
SOCI 309	Marriage, Families, and Intimate Life	
SOCI 315	Contemporary Gender Relations (Mason Core)	
Total Credits		12

Concentration in Collaborative Leadership (CLDR)

Focuses on improving the capacity of leaders to work with conflict and manage change. Includes topics in conflict transformation, mediation, dialogue, and organizational leadership.

Code	Title	Credits
Select four of the six concentration courses from the following:		12
CONF 325	Dialogue and Difference	
CONF 326	Negotiation	
CONF 425	Mediating Conflict	
COMM 201	Small Group Communication	
COMM 335	Organizational Communication	
GOVT 351	Administration in the Political System	
INTS 331	The Nonprofit Sector (Mason Core)	
INTS 404	Ethics and Leadership	
INTS 435	Leadership in a Changing Environment	
MBUS 301	Managing People and Organizations in a Global Economy	
PRLS 316	Leadership and Outdoor Education	
PSYC 333	Industrial and Organizational Psychology	

PSYC 335	Psychology of Creativity and Innovation	
Total Credits		12

Concentration in Environmental Conflict and Collaboration (EVCC)

Focuses on using a variety of conflict resolution processes to address environmental issues. Examines how communities and societies are dealing with environmental issues and prepares students with process skills to promote collaborative solutions.

Code	Title	Credits
Select at least four of the six concentration courses from the following:		12
CONF 325	Dialogue and Difference	
CONF 326	Negotiation	
CONF 329	Community Engagement and Collaborative Problem Solving	
CONF 425	Mediating Conflict	
ANTH 370	Environment and Culture	
CONS 410	Human Dimensions in Conservation (Mason Core)	
CONS 490	RS: Integrated Conservation Strategies (Mason Core)	
EVPP 336	Human Dimensions of the Environment	
EVPP 337	Environmental Policy Making in Developing Countries	
EVPP 436	The Human Dimensions of Global Climate Change	
GGS 307	Geographic Approaches for Sustainable Development	
INTS 334	Environmental Justice (Mason Core)	
Total Credits		12

Individualized Concentration (IND)

Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that form a cohesive theme and will fulfill the requirements of the BA in Conflict Analysis and Resolution. Individualized concentrations must be approved by the Director of the Undergraduate Program

BA in Conflict Analysis and Resolution without Concentration

Students may opt to complete their major in Conflict Analysis and Resolution without a concentration. The department offers many elective courses that allow students to deepen their understanding of theory and practice within the field of Conflict Resolution. Students may choose this option and complete the conflict resolution Core and 18 credits of conflict coursework selected from the following. These credits may not be used to also fulfill the skills and practice or field experience requirements.

Code	Title	Credits
Select 18 credits from the following:		18
CONF 325	Dialogue and Difference	
CONF 326	Negotiation	
CONF 335	Justice and Reconciliation	
CONF 345	Social Dynamics of Terrorism, Security, and Justice	
CONF 375	Special Programs Field Experience	
CONF 392	Youth and Conflict	
CONF 393	Violence: Causes, Dynamics Alternatives	
CONF 394	Human Rights and Inequality	
CONF 398	Special Topics in Advanced Techniques and Practices	
CONF 399	Special Topics in Conflict Analysis and Resolution	
CONF 425	Mediating Conflict	
CONF 435	Building Peace in Divided Societies	
CONF 499	Independent Research in Conflict Analysis and Resolution	
Total Credits		18

Foreign Language Proficiency

Students must demonstrate intermediate-level proficiency in one foreign language. This requirement may be fulfilled by successfully completing a foreign language course numbered 202 or higher. Students may also fulfill this requirement by achieving a satisfactory score on a university approved foreign language proficiency test. Students who are already proficient in a second language may be eligible for a waiver of this requirement.

Writing-Intensive Requirement

All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 Culture, Identity, and Conflict has been designated "writing intensive."

Electives

Code	Title	Credits
Remaining credits needed to bring the degree total to 120 may be fulfilled with general elective courses. [1,2]		

1 Up to 3 credits of 100 level Recreation (RECR) courses may be taken as general elective credits.

2 Only Military Science (MLSC) courses at the 400-level can be used for credit for a degree in the School; credit for other MLSC courses may not be applied toward a degree in the School.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3

Integration Requirements	
Written Communications (ENGH 302)	3
Writing-Intensive [1]	3
Synthesis/Capstone [2]	3
Total Credits	40

[1] Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

[2] Minimum 3 credits required.

4-Year Plan

Bachelor of Arts in Conflict Analysis and Resolution Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

First Year

Fall Semester	Credits	Spring Semester	Credits
CONF 101	3	CONF 210	3
Mason Core (ENGH or COMM)	3	Foreign Language Intermediate Course I	3
Mason Core - Quantitative Reasoning	3	Mason Core- World History or Western Civilization	3
Foreign Language Introduction Course	6	Mason Core- Natural Science non-lab	3
UNIV 100	1	Mason Core (ENGH or COMM)	3
	16		15

Second Year

Fall Semester	Credits	Spring Semester	Credits
CONF 300	3	CONF 320	3
CONF 314	1	Concentration Course #1	3
Mason Core- Fine Arts	3	Mason Core- Literature	3
Mason Core- Natural Science with Lab	4	Mason Core- Information Technology	3
CONF 310	1	Minor Course	3
Foreign Language Intermediate Course II	3

Minor Course	3	Minor Course	3
Skill Based Elective	3	Electives	4
	15		14

Total Credits 120

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS

Overview

This accelerated Master's option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate degree and the Conflict Analysis and Resolution, MS after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS, see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions.

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

Accelerated Master's Requirements

- During the *first semester* in *senior status* admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the *second semester of senior status*, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
- Students must begin their master's program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
- See the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters/) for additional information.

Accelerated MS Requirements

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master's program until completion of the undergraduate program.
- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master's program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master's program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
- At the time of the undergraduate degree conferral, students' GPAs must meet the standard required for admission to the master's degree.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Conflict Analysis and Resolution, BS

Banner Code: CA-BS-CONF

Academic Advising

Phone: 703-993-4165
Email: ugradcar@gmu.edu
Website: https://carterschool.gmu.edu/

Analytical skills and techniques are critical to solving the world's toughest problems. In order to solve conflict we must first understand it. Critical thinking and research skills are the focus of our Bachelor of Science program and are in demand by employers of all sectors. Students pursuing a Bachelor's of Science in Conflict Analysis and Resolution develop research skills and have the opportunity to gain experience designing surveys, conducting interviews, analyzing statistics, and organizing data.

All conflict analysis and resolution majors choose an area of concentration:

- Building Peace in Divided Societies
- Global Engagement
- Political and Social Action
- Justice and Reconciliation
- Interpersonal Dynamics
- Collaborative Leadership
- Environmental Conflict and Collaboration

Advising

Advisors help students create an interdisciplinary course of study that meets their interests and career goals. All majors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Major Coursework Grade Requirement

Students cannot use more than 12 credits of coursework within the major with a C- or D grade to count towards the Conflict Analysis and Resolution, BS. If a student receives C- or D grades in excess of the allowed number, they may retake courses to meet the major coursework grade requirement for graduation. Students taking a graduate course for undergraduate credit must achieve a grade of B- or higher for graduate course credits to count towards their undergraduate degree.

Transfer Students

For policies governing admission and requirements for students transferring from another college or university, see Undergraduate Admission Policies - Transfer.

Admitted and enrolled transfer students who have completed an AA, AS, or AA&S degree from the Virginia Community College System (VCCS) and have been offered admission to Mason by the Office of Admissions may be eligible for a waiver of all George Mason University's Mason Core requirements in accordance with the Guaranteed Admission Agreement. Students eligible for this waiver are still required by the university to complete ENGH 302 Advanced Composition (Mason Core) and a synthesis course.

Requirements

Degree Requirements

Total credits: 120

Students must fulfill all requirements for bachelor's degrees as stated in Academic Policies including all Mason Core requirements. Carter School

majors must complete the 6 credit college-level requirement in research methods as well as 51 major requirement credits for the BS degree.

Students pursuing a double major/degree with a program outside of the Carter School undergraduate program will be expected to fulfill all of the Mason Core and college requirements necessary to complete the second major. Please check with the second major department concerning additional requirements.

Required Core Courses

Code	Title	Credits
CONF 101	Conflict and Our World (Mason Core)	3
CONF 210	Theories of Conflict Analysis and Resolution	3
CONF 300	Conflict Resolution Techniques and Practice	3
CONF 301	Research and Inquiry in Conflict Resolution	3
CONF 302	Culture, Identity, and Conflict	3
CONF 320	Interpersonal Conflict Analysis and Resolution	3
CONF 330	Community, Group, and Organizational Conflict Analysis and Resolution	3
CONF 340	Global Conflict Analysis and Resolution (Mason Core)	3
CONF 490	RS: Integration (Mason Core)	3
Total Credits		27

Field Experience

Students can choose to fulfill this requirement through an internship, service learning, study abroad, or independent study.

Students may not be approved for field experience until they have earned at least 30 credits. It is recommended that students complete at least 9 credits of conflict coursework before applying for field experience credit. Prior departmental approval is *required* for students to receive credit through any field experience options. Students interested in trips with the Carter School can find information here (https://scar.gmu.edu/field-experience/). Students interested in study abroad through the Global Education Office can find information here (http://studyabroad.gmu.edu). Please contact a Carter School advisor with questions or for information on the opportunities, policies, and procedures for field experience credit.

Code	Title	Credits
Select a minimum of three credits from the following:		3
CONF 370	Internship Field Experience	
CONF 375	Special Programs Field Experience	
CONF 385	International Field Experience	
CONF 499	Independent Research in Conflict Analysis and Resolution	
Total Credits		3

Skills and Practice

This three credit requirement can be fulfilled by taking

1. an additional 3 credits from a second field experience, OR
2. a foreign language course at the 250 level or higher, OR
3. one 3 credit course or three 1 credit courses from the following:

Code	Title	Credits
Select one of these 3 credit courses:		3
CONF 325	Dialogue and Difference	
CONF 398	Special Topics in Advanced Techniques and Practices	
CONF 425	Mediating Conflict	
CONF 499	Independent Research in Conflict Analysis and Resolution	
Or select 3 of these 1 credit skills courses:		
CONF 310	Special Topics in Practice	
CONF 314	Career Development Seminar	
CONF 331	Simulation in Community and Organizational Conflict Resolution	
CONF 341	Simulation in Global Conflict Resolution	
Total Credits		3

Courses may NOT double count for the concentration requirement and the skills and practice requirement.

Research Methods

Code	Title	Credits
Select at least six credits from the following:		6
ANTH 380	Language and Culture	
ANTH 450	Qualitative Methods: Nonstatistical Approaches in Culture and Social Research	
CRIM 315	Research Methods and Analysis in Criminology	
ENGH 318	Introduction to Cultural Studies	
GOVT 300	Research Methods and Analysis	
GOVT 366	Public Policy Analysis	
HIST 300	Introduction to Historical Method (Mason Core)	
HIST 390	The Digital Past	
PHIL 357	Philosophy of the Social Sciences	
PSYC 300	Statistics in Psychology	
PSYC 301	Research Methods in Psychology	
SOCI 303	Methods and Logic of Inquiry	
SOCI 313	Statistics for the Behavioral Sciences (Mason Core)	
SOCI 410	Social Surveys and Attitude and Opinion Measurements	
STAT 250	Introductory Statistics I (Mason Core)	
STAT 362	Introduction to Computer Statistical Packages	
STAT 474	Introduction to Survey Sampling	
WMST 410	Feminist Approaches to Social Research	
Total Credits		6

Concentrations

There are eight concentrations:

- Concentration in Building Peace in Divided Societies (BPDS)
- Concentration in Global Engagement (GLBE)
- Concentration in Political and Social Action (PSA)
- Concentration in Justice and Reconciliation (JRCN)
- Concentration in Interpersonal Dynamics (INTD)
- Concentration in Collaborative Leadership (CLDR)
- Concentration in Environmental Conflict and Collaboration (EVCC)
- Individualized (IND)

To fulfill the concentration requirement students select six concentration courses. Four of those six courses must be taken from within their chosen concentration. The remaining two concentration courses may be taken from any of the concentration course lists. Special topics courses relevant to the concentration and/or courses that provide regional expertise can be substituted with departmental approval. Students are encouraged to check special topics courses each semester and think creatively about the applicability of courses that support learning in their chosen concentration. At least two of the six concentration courses must be CONF courses taken in residence. CONF 397 Study Abroad Special Topics and courses transferred from another institution do not fulfill this requirement. Courses may not double count for the concentration requirement and the skills and practice requirement.

Concentration in Building Peace in Divided Societies (BPDS)

Focuses on how divided societies with a history of conflict seek to transform relationships and situations of violence and injustice. Examines communities and societies that have experienced conflict and how individuals and groups build peace locally and globally.

Code	Title	Credits
Select at least four of the six concentration courses from the following:		12
CONF 325	Dialogue and Difference	
CONF 335	Justice and Reconciliation

GOVT 342	Diplomacy	
GOVT 446	International Law and Organization	
INTS 416	Refugee and Internal Displacement (Mason Core)	
SOCI 388	Violence and Religion	
Total Credits		12

Concentration in Political and Social Action (PSA)

Focuses on the ways that people organize themselves to effect change in their societies. This concentration explores social action, social organization, social movements, and civil resistance to analyze and investigate the role of constructive conflict.

Code	Title	Credits
Select at least four of the six concentration courses from the following:		12
CONF 393	Violence: Causes, Dynamics Alternatives	
CONF 394	Human Rights and Inequality	
COMM 326	Rhetoric of Social Movements and Political Controversy (Mason Core)	
ECON 309	Economic Problems and Public Policies	
GOVT 301	Public Law and the Judicial Process	
GOVT 364	Public Policy Making	
INTS 304	Social Movements and Community Activism (Mason Core)	
INTS 334	Environmental Justice (Mason Core)	
INTS 362	Social Justice and Human Rights (Mason Core)	
PSYC 427	Community Engagement for Social Change (Mason Core)	
SOCI 307	Social Movements and Political Protest	
SOCI 340	Power, Politics, and Society	
SOCI 352	Social Problems and Solutions (Mason Core)	
Total Credits		12

Concentration in Justice and Reconciliation (JRCN)

Focuses on the relationships between human rights, justice, and conflict resolution. Encompasses a spectrum of coursework including legal dimensions of human rights, trauma, memory, healing, conflict transformation, and forms of restorative justice.

Code	Title	Credits
Select four of the six concentration courses from the following:		12
CONF 335	Justice and Reconciliation	
CONF 394	Human Rights and Inequality	
CONF 435	Building Peace in Divided Societies	
CRIM 307	Social Inequality, Crime, and Justice	
CRIM 404	Crime Victims and Victimization	
CRIM 406	Family Law and the Justice System	
INTS 300	Law and Justice (Mason Core)	
INTS 314	Conflict, Trauma and Healing	
INTS 362	Social Justice and Human Rights (Mason Core)	
SOCI 308	Race and Ethnicity in a Changing World (Mason Core)	
SOCI 355	Social Inequality (Mason Core)	
Total Credits		12

Concentration in Interpersonal Dynamics (INTD)

Focuses on the dynamics of social interaction that lead to interpersonal conflict and the processes and skills that support the transformation of these conflicts. Issues examined include intercultural communication, psychology of groups, family relationships, and other dimensions of human relations.

Code	Title	Credits
Select four of the six concentration courses from the following:		12
CONF 325	Dialogue and Difference	
CONF 392	Youth and Conflict	
CONF 425	Mediating Conflict	
COMM 301	Relational Communication Theory	
COMM 305	Foundations of Intercultural Communication (Mason Core)	
COMM 401	Interpersonal Communication in the Workplace	
INTS 317	Issues in Family Relationships (Mason Core)	
PSYC 231	Social Psychology (Mason Core)	
PSYC 379	Applied Cross-Cultural Psychology (Mason Core)	
PSYC 417	Science of Well Being	
PSYC 467	The Psychology of Working in Groups and Teams	
SOCI 309	Marriage, Families, and Intimate Life	
SOCI 315	Contemporary Gender Relations (Mason Core)	
Total Credits		12

Concentration in Collaborative Leadership (CLDR)

Focuses on improving the capacity of leaders to work with conflict and manage change. Includes topics in conflict transformation, mediation, dialogue, and organizational leadership.

Code	Title	Credits
Select four of the six concentration courses from the following:		12
CONF 325	Dialogue and Difference	
CONF 326	Negotiation	
CONF 425	Mediating Conflict	
COMM 201	Small Group Communication	
COMM 335	Organizational Communication	
GOVT 351	Administration in the Political System	
INTS 404	Ethics and Leadership	
INTS 435	Leadership in a Changing Environment	
INTS 331	The Nonprofit Sector (Mason Core)	
MBUS 301	Managing People and Organizations in a Global Economy	
PRLS 316	Leadership and Outdoor Education	
PSYC 333	Industrial and Organizational Psychology	
PSYC 335	Psychology of Creativity and Innovation	
Total Credits		12

Concentration in Environmental Conflict and Collaboration (EVCC)

Focuses on using a variety of conflict resolution processes to address environmental issues. Examines how communities and societies are dealing with environmental issues and prepares students with process skills to promote collaborative solutions.

Code	Title	Credits
Select at least four of the six concentration courses from the following:		12
CONF 325	Dialogue and Difference	
CONF 326	Negotiation	
CONF 329	Community Engagement and Collaborative Problem Solving	
CONF 425	Mediating Conflict	
ANTH 370	Environment and Culture	
CONS 410	Human Dimensions in Conservation (Mason Core)	
CONS 490	RS: Integrated Conservation Strategies (Mason Core)	
EVPP 336	Human Dimensions of the Environment	
EVPP 337	Environmental Policy Making in Developing Countries	
EVPP 436	The Human Dimensions of Global Climate Change	
GGS 307	Geographic Approaches for Sustainable Development	
INTS 334	Environmental Justice (Mason Core)	
Total Credits		12

Individualized Concentration (IND)

Students interested in creating their own concentration can work with an advisor to decide upon a set of at least six courses that will fulfill the requirements of the BS in Conflict Analysis and Resolution. Individualized concentrations must be approved by the Director of the Undergraduate Program.

BS in Conflict Analysis and Resolution without Concentration

Students may opt to complete their major in Conflict Analysis and Resolution without a concentration. The department offers many elective courses that allow students to deepen their understanding of theory and

practice within the field of Conflict Resolution. Students may choose this option and complete the conflict resolution Core and 18 credits of conflict coursework selected from the following. These credits may not be used to also fulfill the skills and practice or field experience requirements.

Code	Title	Credits
Select 18 credits from the following:		18
CONF 325	Dialogue and Difference	
CONF 326	Negotiation	
CONF 335	Justice and Reconciliation	
CONF 345	Social Dynamics of Terrorism, Security, and Justice	
CONF 375	Special Programs Field Experience	
CONF 392	Youth and Conflict	
CONF 393	Violence: Causes, Dynamics Alternatives	
CONF 394	Human Rights and Inequality	
CONF 398	Special Topics in Advanced Techniques and Practices	
CONF 399	Special Topics in Conflict Analysis and Resolution	
CONF 425	Mediating Conflict	
CONF 435	Building Peace in Divided Societies	
CONF 499	Independent Research in Conflict Analysis and Resolution	
Total Credits		18

Writing-Intensive Requirement

All Mason students are required to complete at least one course designated as "writing intensive" in their major at the 300-level or above. CONF 302 Culture, Identity, and Conflict has been designated "writing intensive."

Electives

Code	Title	Credits
Remaining credits needed to bring the degree total to 120 may be fulfilled with general elective courses. [1,2]		

1 Up to 3 credits of 100 level Recreation (RECR) courses may be taken as general elective credits.

2 Only Military Science (MLSC) courses at the 400-level can be used for credit for a degree in the School; credit for other MLSC courses may not be applied toward a degree in the School.

Mason Core

Some Mason Core requirements may already be fulfilled by the major requirements listed above. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication (ENGH 101)		3
Oral Communication		3
Quantitative Reasoning		3
Information Technology and Computing		3
Exploration Requirements		
Arts		3
Global Understanding		3
Literature		3
Natural Science		7
Social and Behavioral Sciences		3
Western Civilization/World History		3
Integration Requirements		
Written Communications (ENGH 302)		3
Writing-Intensive [1]		3
Synthesis/Capstone [2]		3
Total Credits		40

1 Most programs include the writing-intensive course designated for the major as part of the major requirements; this course is therefore not counted towards the total required for Mason Core.

2 Minimum 3 credits required.

4-Year Plan

Bachelor of Science in Conflict Analysis and Resolution Sample Plan of Study

The sample plan below is a recommended sequencing of courses based on pre-requisites and scheduling. This may not fit every student's needs and is a guideline, not a requirement. Students should confirm major requirements with their academic advisor and with PatriotWeb Degree Evaluation to ensure they enroll in the proper courses and are on track to graduate.

First Year

Fall Semester	Credits	Spring Semester	Credits
CONF 101	3	CONF 210	3

Total Credits 120

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS

Overview

This accelerated Master's option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate degree and the Conflict Analysis and Resolution, MS after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS, see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions.

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

Accelerated Master's Requirements

- During the *first semester* in *senior status* admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the *second semester of senior status*, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
- Students must begin their master's program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
- See the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters/) for additional information.

Accelerated MS Requirements

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master's program until completion of the undergraduate program.
- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master's program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master's program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
- At the time of the undergraduate degree conferral, students' GPAs must meet the standard required for admission to the master's degree.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Conflict Analysis and Resolution, MS

Banner Code: CA-MS-CONF

Academic Advising

Phone: 703-993-1300
Email: carter@gmu.edu
Website: https://carterschool.gmu.edu/

This professional program prepares students for practice and further academic work by integrating conflict analysis and resolution theory, research, and practical techniques. Participants study the theory, methods, and ethical perspectives of the field, and apply this knowledge in laboratory simulations and workshops, internships, and field practice.

Graduates work in a variety of settings where conflict resolution is useful and interest groups are in conflict with current and emergent public policy. Examples are businesses, unions, government agencies, religious groups, court systems, educational institutions, community centers, international relief and development organizations, and consulting firms.

Admissions & Policies

Admissions

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. In addition, applicants must submit all undergraduate and graduate transcripts; two letters of recommendation, one of which should be from a faculty member in the applicant's undergraduate or graduate major field; a resume or curriculum vitae; and a 750- to 1,000-word essay on goals and reasons for seeking admission to the program. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students. Students can be admitted to the MS program for either the Fall or Spring semesters.

Background courses in social sciences, as well as prior work experience, are desirable. Prior graduate academic work is evaluated on an individual basis for possible transfer credit and fulfillment of program requirements; however, Mason usually does not reduce the total credits required for the degree. Students may enroll on a full- or part-time basis. The MS Program is available on-campus, online (https://masononline.gmu.edu/programs/conflict-analysis-and-resolution-ms/) or in a hybrid format (on-campus and distance learning).

Policies

Mason requires all students to complete the master's degree within six years of their official admission date.

Consult the Carter School student handbook for information on registration procedures.

Transfer of Non-Degree Credit

A maximum of 12 credits of Carter School graduate courses taken at George Mason as a non-degree graduate student, or as part of the Carter School's graduate certificate program may be transferred into the MS program. How credit will be counted will be determined in consultation with the admitted student's advisor. A maximum of six credits of non-Carter School courses taken as non-degree credit can be counted toward the MS program. Courses counted toward another degree cannot be transferred.

Adding a Carter School Certificate Program

Students may elect to complete a Carter School Graduate Certificate in addition to the MS program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of conflict resolution practice. Certain graduate certificate courses can be used to fulfill MS program requirements. Students should consult with the Graduate Programs Director for policies on counting certificate courses toward the MS degree.

Requirements

Degree Requirements

Total credits: 33

Required Courses

Code	Title	Credits
Introductory Course [1]		
CONF 600	Foundations of Conflict Analysis and Resolution	6
Conflict Inquiry		
CONF 610	Conflict Inquiry	3
or CONF 660	Conflict Assessment and Program Evaluation	
Conflict Praxis [2]		
CONF 657	Facilitation Skills	3
CONF 625	Engaging Conflict	3
Total Credits		15

1. Students must take the introductory course in the first semester.
2. Students must take CONF 657 Facilitation Skills and at least 3 credits of CONF 625 Engaging Conflict. Additional credits of CONF 625 Engaging Conflict will count as electives.

Concentration in Social Justice Advocacy and Activism (SJAA)

This concentration will be geared towards students who want to work in communities both in the United States and internationally on issues of social justice and critical human rights promotion.

Code	Title	Credits
Select twelve (12) credits from the following:		12
CONF 651	Collaborative Community Action Participatory Governance	
CONF 658	Diversity and Difference in Conflict Analysis and Resolution	
CONF 682	Principles of Environmental Conflict Resolution	
CONF 706	Ethics and Conflict	
CONF 722	Conflict and Religion	
CONF 723	Conflict and Gender	
CONF 728	Human Rights Theory and Practice in Comparative Perspective	
CONF 733	Law and Justice from a Conflict Perspective	
CONF 747	Reconciliation	
CONF 756	Addressing Intractable Conflict	
Total Credits		12

Professional Opportunities: Conflict Resolution NGOs, Advocacy NGOs, Human Right Organizations, International

Concentration in Dynamics of Violence (DYNV)

This concentration is geared towards students who are interested in understanding the various manifestations of violence, structural sources of violence, networks of violence that straddle the divides between

domestic and international contexts and who want to work on violence prevention both in the United States and internationally.

Code	Title	Credits
Select twelve (12) credits from the following:		12
CONF 653	World Religions, Diplomacy, and Conflict Resolution	
CONF 702	Peace Studies	
CONF 706	Ethics and Conflict	
CONF 707	Gender and Violence	
CONF 720	Ethnic and Cultural Factors in Conflict Resolution	
CONF 723	Conflict and Gender	
CONF 730	Structural Sources of Conflict	
CONF 751	Dynamics of Civil Wars	
CONF 754	Micro-theories of Conflict	
CONF 758	Social Dynamics of Terrorism	
Total Credits		12

Professional Opportunities: Gang Violence Prevention, Sexual Assault Prevention, Domestic Violence Prevention, Police, Conflict Resolution NGOs, Think Tanks, Development NGOs, Humanitarian organizations, USAID, State Department, UN

Concentration in Inclusive Conflict Engagement (ICEN)

This concentration prepares students for working to resolve conflicts and address divided cultures, societies, and organizations as advocates, mediators, peace-builders, and insider-partials. It will also prepare students for working with an intersectional awareness of diversity.

Code	Title	Credits
Select twelve (12) credits from the following:		12
CONF 650	Conflict Analysis and Resolution Advanced Skills	
CONF 651	Collaborative Community Action Participatory Governance	
CONF 653	World Religions, Diplomacy, and Conflict Resolution	
CONF 658	Diversity and Difference in Conflict Analysis and Resolution	
CONF 682	Principles of Environmental Conflict Resolution	
CONF 702	Peace Studies	
CONF 704	Narrative Approaches to Conflict Analysis	
CONF 706	Ethics and Conflict	
CONF 707	Gender and Violence	
CONF 708	Identity and Conflict	
CONF 720	Ethnic and Cultural Factors in Conflict Resolution	
CONF 721	Conflict and Race	
CONF 722	Conflict and Religion	
CONF 723	Conflict and Gender	
CONF 731	Conflict in Organizations	
CONF 741	Negotiating in Complex Systems	
CONF 747	Reconciliation	
CONF 755	Transforming Conflict through Insight	
CONF 756	Addressing Intractable Conflict	
Total Credits		12

Professional Opportunities: Conflict Resolution NGOs, Advocacy NGOs, International Peacebuilding NGOs, USAID, State Department, Human Rights, Resilience, Community Development, Humanitarian NGOs, Courts, Ombudsmen, Public Schools, Private Sector

Concentration in Conflict-Sensitive Development and Resilience (CSDR)

This concentration will be geared towards students who wish to work in development and humanitarian assistance fields, bringing an in-depth knowledge of conflict dynamics to improving communities' capacity to adapt to change and be resilient in times of social, economic, and political stress.

Code	Title	Credits
Select twelve (12) credits from the following:		12
CONF 650	Conflict Analysis and Resolution Advanced Skills	
CONF 651	Collaborative Community Action Participatory Governance	
CONF 652	Conflict Analysis and Resolution for Prevention, Reconstruction, and Stabilization Contexts	
CONF 659	Leadership in Conflict Analysis and Resolution	
CONF 704	Narrative Approaches to Conflict Analysis	
CONF 705	Conflict and Discourse Analysis	
CONF 706	Ethics and Conflict	
CONF 707	Gender and Violence	
CONF 708	Identity and Conflict	
CONF 722	Conflict and Religion	
CONF 723	Conflict and Gender	
CONF 728	Human Rights Theory and Practice in Comparative Perspective	
CONF 730	Structural Sources of Conflict	
CONF 731	Conflict in Organizations	
CONF 751	Dynamics of Civil Wars	
CONF 755	Transforming Conflict through Insight	
Total Credits		12

Professional Opportunities: Conflict Resolution NGOs, Humanitarian organizations, development NGOs, USAID, UN, State Department

Concentration in Media, Narrative, and Public Discourse (MNPD)

This concentration is designed for students who wish to work with and create representation, communication, media, discourse and narratives related to conflict.

Code	Title	Credits
Select twelve (12) credits from the following:		12
CONF 625	Engaging Conflict	
CONF 704	Narrative Approaches to Conflict Analysis	
CONF 705	Conflict and Discourse Analysis	
CONF 757	Conflict and Literature	

CONF 758	Social Dynamics of Terrorism	
Additional courses under developement		
Total Credits		12

Professional Opportunities: Journalism, Media, Communications, Conflict Resolution NGOs, Advocacy NGOs, International NGOs, Film Production

Concentration in Peacebuilding (PCB)

This concentration is designed for students interested in real-world, practical and professional skills in project design, management, monitoring and evaluation that will enable them to work in the peacebuilding field, primarily in NGOs and international organizations.

Code	Title	Credits
Complete the following fifteen (15) credits:		15
CONF 661	Program Design and Monitoring	
CONF 662	Funding and Managing Peacebuilding Programming	
CONF 651	Collaborative Community Action Participatory Governance	
CONF 670	Conflict Sensitive and Inclusive Peacebuilding	
CONF 694	Internship	
Total Credits		15

Individualized Concentration (IND)

Students will also be able to craft their own twelve (12) credit concentration with the approval of MS Program Director.

Electives

Code	Title	Credits
Select 3- 6 credits of elective courses from any 500, 600, or 700 level CONF courses, except required courses. Students in the Peacebuilding concentration will complete 3 elective credits. Students in all other concentrations complete 6. [1]		3 or 6
Total Credits		3-6

Students will need to declare their concentration by the start of their second semester of study. Students will need to take 12-15 credits of courses within the concentration to meet the concentration's distribution requirement.

Because the choice of courses within concentrations can vary significantly according to individual goals or needs, each student should develop a plan of study that should be discussed once each semester with the advisor and updated as appropriate.

With the advisor's approval, each student is eligible to include a maximum of six credits of electives from outside the S-CAR program, including courses in other Mason departments, consortium courses, and transfer courses from other universities.

Students wishing to complete a Master's Thesis or Internship would count these credits towards their elective requirement.

Internship

The CONF 694 Internship internship course provides students with opportunities to use and develop conflict resolution skills, integrate theory and practice of conflict analysis and resolution, and network with professionals in the field to enhance employment opportunities. The internship requires 160 hours of supervised work per every 3 credits. The goals and objectives of the internship are defined in an application and memorandum of agreement to be signed by the student, the internship site supervisor, and the advisor before the internship begins.

Students may either take 3 or 6 credits of CONF 694 Internship.

Code	Title	Credits
CONF 694	Internship (take 3 or 6 credits)	1-6

Thesis

Students wishing to complete a Master's Thesis are strongly encouraged to take CONF 797 Proposal Development (Proposal Development) the semester before beginning the thesis project. Before registering, students must have identified a Master's thesis committee chair to supervise the project. Students should contact Carter School student services to receive the CRN to register for thesis.

Code	Title	Credits
CONF 797	Proposal Development	1
CONF 799	Thesis	1-6

Directed Readings

Only two directed readings may be applied toward requirements for the master's degree (maximum 6 credits).

Code	Title	Credits
CONF 697	Directed Readings and Research	1-3

Dual Degree Options

Dual Degree Program with the University of Malta

Students have the opportunity to pursue a MS in Conflict Analysis and Resolution from George Mason University and a MA in Conflict Resolution and Mediterranean Security from the University of Malta through an innovative dual degree program. Teaching faculty includes professors from both George Mason University and the University of Malta. All teaching is in English and all classes are held at the Valetta Campus of the University of Malta. The 400-year-old University of Malta Valletta campus incorporates state-of-the-art instructional technology. The entire program is delivered over three intensive semesters on a full time basis starting in late September. Classes are held on a two week intensive block basis for the first two semesters while the third semester is devoted to the completion of a thesis.

Orientation in Malta begins at the end of September. Classes run from the beginning of October through June. Students work on their theses from June until October. University of Malta graduation is in November and Mason graduation is in December. The total duration of the program is 15 months. More information is available at the program website (http://scar.gmu.edu/academics/maltaprogram/). US and Canadian students apply through the Mason graduate admissions process and indicate they want to participate in the Malta program. All other students should apply through the University of Malta. (http://www.um.edu.mt/imp/)

Conflict Analysis and Resolution, MS and Social Work, MSW Dual Degree

The Department of Social Work and the Jimmy and Rosalynn Carter School for Peace and Conflict Resolution have joined forces to offer a three year dual-degree program. Students can earn both an MSW and an MS in Conflict Analysis and Resolution while taking advantage of the diversity of the Washington, D.C., metropolitan area and the university's proximity to the nation's capital. This is the only dual-degree program of its kind.

Admission Requirements

Applicants must meet the admission standards and application requirements specified in Graduate Admissions and apply using the online Application for Graduate Admission (http://admissions.gmu.edu/). The application process is competitive, and applications are considered for the fall semester only.

Students interested in the 3-year dual degree program submit one online Application for Graduate Admission (http://admissions.gmu.edu/), select the MSW in Social Work as a primary program, and submit all application support materials to the Office of Graduate Admission in the College of Health and Human Services. Applicants should communicate their interest in completing the dual degree program in their essays, and recommendations should address the dual program interest. Students must be admitted to both programs in the same semester (fall only) to be admitted to the dual degree program.

For application deadlines and detailed application requirements please refer to the CHHS Admissions website (https://chhs.gmu.edu/admissions/graduate-admissions/standards-requirements-and-deadlines/). Interested students should consult the MSW program website (https://socialwork.gmu.edu/program/view/19658/), the MSW program, and the MSW program director for additional information prior to applying.

Transfer of Credit

Transfer credit is governed AP.6.5.3 Transfer of Credit and AP.6 Graduate Policies. Transfer credits must be approved by the program director and the dean. Students who enroll initially through non-degree studies should seek course advising through the department prior to taking a course and plan to submit their application to the dual degree program as soon as possible.

Please refer to the Transfer of Credit policy for the MSW in Social Work for departmental policy governing courses taken at another institution and the maximum number of credits allowed.

Accelerated Master's

Bachelor's Degree (any)/Conflict Analysis and Resolution, Accelerated MS

Overview

This accelerated Master's option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate BA or BS and the Conflict Analysis and Resolution, MS after satisfactory completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS, see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (https://catalog.gmu.edu/admissions/graduate-policies/).

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

Accelerated Master's Requirements

- During the *first semester* in *senior status* admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the *second semester of senior status*, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
- At the beginning of the last semester of undergraduate study, the *Bachelor's/Accelerated Master's Transition Form* signed by an S-CAR undergraduate advisor is submitted to the Director of Graduate Student Services who will then forward to Graduate Admissions. Upon completion and conferral of the undergraduate degree the student is admitted to graduate status.
- Students must begin their master's program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
- Additional policies can be found on the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters/).

Course Requirements

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master's program until completion of the undergraduate program.
- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master's program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master's program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
- At the time of the undergraduate degree conferral, students' GPAs must meet the standard required for admission to the master's degree.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Conflict Analysis and Resolution, BA or BS/Conflict Analysis and Resolution, Accelerated MS

Overview

This accelerated Master's option is designed for highly qualified and motivated undergraduate students that have completed at least 6 credit hours of CONF coursework at the time of application. If accepted, students may take up to 12 credits of graduate coursework before undergraduate degree conferral and will be able to earn an undergraduate degree and the Conflict Analysis and Resolution, MS after satisfactory

completion of at least 147 credits. The time period for the combined program is typically five years. It provides a streamlined MS application process with no additional application fee.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

For specific application requirements and information for the accelerated Conflict Analysis and Resolution, MS, see Eligibility, Policies, and Deadlines (http://scar.gmu.edu/undergraduate/degrees/accelerated-masters/). Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions.

Students must have a minimum undergraduate cumulative GPA of 3.25 at the time of application.

Accelerated Master's Requirements

- During the *first semester* in *senior status* admitted students may take up to 6 credits (1-2 classes) that will count towards both their undergraduate AND graduate degrees. During the *second semester of senior status*, students may take up to 6 credits (1-2 classes) that will count towards the graduate degree only.
- Students must begin their master's program the semester immediately following conferral of the undergraduate degree and will be expected to complete all remaining graduate program requirements within five years.
- See the program website (https://scar.gmu.edu/academics/undergraduate/accelerated-masters/) for additional information.

Accelerated MS Requirements

- No grade below a B is permitted for any undergraduate or graduate CONF course taken after application to the accelerated master's program until completion of the undergraduate program.
- If a student receives a grade below a B in any CONF course after acceptance in the program, they will not be allowed to continue on to the master's program. Students that have received a grade below a B in a CONF course after acceptance into the program may re-apply to the master's program after conferral of the undergraduate degree; however, re-application does not guarantee admission.
- At the time of the undergraduate degree conferral, students' GPAs must meet the standard required for admission to the master's degree.
- Students may not take more than 12 credits a semester if taking two graduate courses or 15 credits a semester if taking one graduate course.

Conflict Analysis and Resolution, PhD

Banner Code: CA-PHD-CONF

Academic Advising

Phone: 703-993-1300
Email: carter@gmu.edu
Website: https://carterschool.gmu.edu/

The Conflict Analysis and Resolution doctoral program, the first of its kind in the United States, provides advanced study for students in the field of conflict analysis and conflict resolution. Students are prepared for careers as researchers, theoreticians, and teachers in higher education, and as policy administrators, analysts, and consultants in the public and private sectors.

The program stresses a close link between knowledge of theory and process in the resolution of conflict. For this, training in the methods of research and analysis is emphasized. In addition, students are expected to obtain a background in a substantive area of conflict, usually related to the topic of the dissertation.

Admissions & Policies

Admissions

A master's or equivalent degree is required for admission to the PhD program.

Application Requirements

In addition to meeting all admission requirements for graduate study, applicants must submit:

- all undergraduate and graduate transcripts
- three letters of recommendation, one of which should be from a faculty member in the applicant's undergraduate or graduate major field
- a 750 to 1,000 word essay on goals and reasons for seeking admission to the program
- a written sample of work that shows the applicant's potential for completing dissertation research in a doctoral program
- a resume or curriculum vitae.

The Graduate Record Exam (GRE) or other standardized test scores are not required but may be submitted. The Test of English as a Foreign Language (TOEFL) is required of international students.

For more information, see the Admission of International Students. Although students may enroll on a full- or part-time basis, entry into the program is in the fall semester only.

Policies

For policies governing all graduate degrees, see AP.6.10 Requirements for Doctoral Degrees.

Reduction of Credit

Since a master's degree or equivalent is required for admission, students will automatically receive a 15 credit reduction to the number of credits required.

Students may have the required number of credits reduced by up to 15 additional credits based on relevant previous coursework. The actual number of applied credits is determined in consultation with the student's advisor and the Graduate Program Director after a review of courses taken, subsequent to a student's admission to the program

Completion Timelines

Students must satisfactorily complete their coursework, comprehensive paper, advance to candidacy, and complete the dissertation within 9 years of admission to the program. Students are expected to have advanced to candidacy within 6 years of admission to the program.

Plan of Study Guidelines

All doctoral students should meet with their faculty advisor before starting classes to develop a plan of study. This plan should show the sequence of courses anticipated. It should be based on a discussion between the student and the advisor about the student's interest and goals. The plan should ensure that the student completes coursework efficiently and is able to build toward candidacy. The student and the advisor should then meet at least once each semester thereafter to review and amend the plan. The Program Director should receive a copy of each new or revised plan of study.

Transfer of Non-Degree Credit

A maximum of 12 credits of S-CAR graduate courses taken at George Mason as a non-degree graduate student, or as part of S-CAR's graduate certificate program may be transferred into the PhD program. How credit will be counted will be determined in consultation with the student's advisor and the Graduate Program Director. A maximum of 6 credits of non-S-CAR courses taken as non-degree credit can be counted toward the PhD program. Courses counted toward another degree cannot be transferred.

Adding a S-CAR Certificate Program

Students may elect to complete a S-CAR graduate certificate in addition to the PhD program. Graduate certificates are opportunities for students to further tailor their academic program and specialize in a specific area of Conflict Resolution practice. Certain graduate certificate courses can be used to fulfill PhD program requirements. Students should consult with the Graduate Program Director for policies on counting certificate courses toward the PhD degree.

Requirements

Degree Requirements

Total credits: 72

Required Course

Code	Title	Credits
CONF 801	Introduction to Conflict Analysis and Resolution (Should be taken in the first semester of coursework)	3
Total Credits		3

Foundation Courses

Students complete 12 credits of foundation courses distributed as follows:

Code	Title	Credits
Theoretical Foundations		
Select two courses (6 credits) from the following:		6
CONF 802	Theories of the Person	
CONF 803	Structural Theories	
CONF 804	Alternate Theoretical Foundations	
Research Foundations		
Select two courses (6 credits) from the following:		6
CONF 811	Quantitative Foundations	
CONF 812	Qualitative Foundations: Social Sciences	
CONF 813	Qualitative Foundations: Humanities	
Total Credits		12

Specialization Courses

Code	Title	Credits
Students will take four courses (12 credits) of specialization courses. Three credits each in the areas of theory and research, and six credits of practice specialization. [1]		12
Total Credits		12

[1] The Doctoral Program Director must approve courses.

Electives

Code	Title	Credits
Select 18 credits from electives that are any 500-, 600-, and 700-level CONF courses that are not required		18
Total Credits		18

With the advisor's approval, each student may include a maximum of 6 credits of electives from outside the S-CAR Program, including courses in other Mason departments, consortium courses, and transfer courses from other universities. The intent is to allow students to have maximum flexibility in selecting courses to build skills and knowledge needed in dissertation work. CONF 897 Directed Reading may be taken to meet the requirement. Only two directed readings classes (6 credits) can be applied toward doctoral elective requirements.

Foreign Language Requirement

At the point of application to fulfill the comprehensive paper, students will indicate to the Director of the Doctoral Program the membership of their dissertation committee. This committee will determine, based on the scope and nature of the student's research, the specific language requirement a student must meet. This will be conveyed to the Graduate Program Director. This language requirement must be completed prior to graduation.

Comprehensive Paper

Students are eligible to complete the comprehensive paper when they have completed all the requirements of coursework in the doctoral program with the exception of CONF 998 Doctoral Dissertation Proposal and CONF 999 Doctoral Dissertation Research and the language requirement. A student is advanced to candidacy upon successful completion of the comprehensive paper. Papers can be submitted for evaluation twice each year, once in the winter and once in the summer. Students who do not pass initially should form a plan of study with the chair of their dissertation committee and the Graduate Program Director that will prepare them to resubmit. The comprehensive paper may be resubmitted two times for a total of three attempts. After three unsuccessful attempts, the student should consult with the Graduate Program Director about the possibility of transferring to a Master's degree program.

Advancement to Candidacy

Upon successfully completing coursework (except dissertation) listed on the Plan of Study and passing the comprehensive paper, students will be advanced to candidacy. Students are expected to advance to candidacy within 6 years of admission to the program. Students have a total of 9 years from admission to complete all course requirements, including the dissertation.

Dissertation Research

Students are required to complete 12 combined credits of CONF 998 Doctoral Dissertation Proposal and CONF 999 Doctoral Dissertation Research, including at least 3 credits of CONF 999 Doctoral Dissertation Research. Students must have a signed dissertation proposal in order to register for CONF 999 Doctoral Dissertation Research.

Code	Title	Credits
Select 12 credits from the following:		12
CONF 998	Doctoral Dissertation Proposal [1]	
CONF 999	Doctoral Dissertation Research [2]	
Total Credits		12

1. All CONF 998 courses are graded In Progress until completion of the proposal. At that time, a grade of Satisfactory is issued.
2. All CONF 999 courses are graded In Progress until the dissertation defense is successfully completed. At that time, a grade of Satisfactory is issued.

Dissertation Committee

Students should propose a Dissertation Committee to the Graduate Program Director and the Dean who then formally appoint the committee. This must be done prior to taking the comprehensive exam. The Dissertation Committee must include a chairperson from among S-CAR graduate faculty and at least two other members of the graduate faculty, one of whom must be a non-S-CAR Mason faculty member. The Dean will inform the student, committee members, and Graduate Program Director when the committee has been appointed.

Dissertation Proposal

After the student passes the comprehensive exam and advances to candidacy, the next job of the committee is to approve the candidate's dissertation proposal. The proposal is the candidate's description (in some detail) of his/her dissertation project, reflecting the successful work of the comprehensive examination paper. It will include an argument about the hypothesis/theory question being tackled and the specific methods of research to be used. It should be prepared in consultation with the chair of the committee, and must be approved by all committee members. After receiving permission from the full committee, the candidate makes an oral presentation of the dissertation proposal before the committee and the Graduate Program Director that is also open to other S-CAR faculty, fellow students, and other scholars. In scheduling the defense, it is the student's responsibility to ensure that all members of the committee are available and will be present for the defense.

A signed cover page from that proposal must be filed with the the Graduate Program DIrector. Failure to complete the formation of a committee and an approved proposal by the end of the 12-month period will result in the candidate's dismissal from the doctoral program. (Candidates may appeal to the Dean a further extension of this dissertation preparation period, but such appeals will be allowed only on grounds of documented illness, family emergency, or military deployment). Candidates should consult thesis.gmu.edu/ (http://thesis.gmu.edu/) to ensure the proposal is in the correct format and has been submitted to all the appropriate offices.

Writing the Dissertation and its Defense

The chair of the dissertation committee usually takes most of the responsibility for guiding the overall project and the writing of the dissertation, although all members (and other useful persons) should be consulted as appropriate. It is the committee's responsibility to ensure a quality piece of work. When advanced to candidacy, the *Guide for Preparing Graduate Thesis, Dissertation and Projects* tells exactly how to prepare an acceptable dissertation. Please visit thesis.gmu.edu/ (http://thesis.gmu.edu/) to ensure formatting guidelines are met and submission procedures followed.

It is essential that doctoral committee members have sufficient time to read and evaluate dissertation drafts with care prior to the dissertation defense date. The committee may require no more than one month to read the final draft and provide feedback. It is also essential that students have sufficient time after the defense to do final revisions, editing and formatting. If the University determines the deadlines for final library submission deadline is May 1, for example, the defense must take place prior to April 1 and the full draft dissertation must be delivered to the full committee before March 1.

The dissertation is to be orally defended in public, minimally with the entire committee present. The S-CAR faculty and students must receive public notice of the defense at least two weeks prior. Students are welcome to invite family and friends. The University may also send a representative. The public defense helps ensure that the University's standards are met, and offers an opportunity to learn from the students' research. After a successful defense, the cover page is signed by the members of the Dissertation Committee, Graduate Program Director and Dean; and the dissertation is filed with the University. An additional signed copy should be delivered to the S-CAR Burton Library.

Dissertations must be presented to the library in the proper format or they will not be accepted. Please visit the University Dissertation & Thesis Services web site at thesis.gmu.edu/ (http://thesis.gmu.edu/) for dissertation formatting requirements and submission deadlines. Mason's Dissertation and Thesis Coordinator may be reached at udts@gmu.edu or 703-993-2222.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (https://catalog.gmu.edu/admissions/graduate-policies/). Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international

students. For more information, see Admission of International Students (https://catalog.gmu.edu/admissions/international-students/).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Mass Atrocity and Genocide Prevention Graduate Certificate

Banner Code: CA-CERG-MAGP

Douglas Irvin-Erickson, Program Director

Email: dirviner@gmu.edu
Website: https://carterschool.gmu.edu/academic-programs/graduate-and-professional-certificates

This 15-credit program is tailored to provide students with practical knowledge of conflict analysis and resolution relevant to mass atrocity prevention, including genocide and mass violence prevention. Designed for mid-career professionals studying in a cohort environment, or graduate students seeking specialized, practical knowledge, the certificate program integrates conflict analysis and resolution theory, research, and practical techniques of preventing mass atrocities. Certificate courses include intensive sessions, lectures, seminars, and applied-mentored learning in real and simulated situations. Students consider strategies to prevent mass atrocities through policy planning, diplomacy, civil society building, democratization, development, education, and “up-streaming” prevention efforts that apply peace-building, dialogue, and conflict resolution approaches designed specifically for highly-escalated conflict contexts where mass atrocities seem likely to appear.

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Applicants to this certificate must submit an undergraduate transcript showing completion of an undergraduate degree or equivalent, a cover letter specifying interest in the program, two letters of recommendation, and a curriculum vitae or résumé indicating relevant work experience.

In addition, prior work experience in areas related to the chosen graduate certificate is desirable. GRE or other standardized test scores are not required but may be submitted. The TOEFL is required of international students. For more information, see Admission of International Students.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Class Schedule

Please note that some classes for this graduate certificate are offered only in Saturday and Sunday sessions. Please check the Schedule of Classes for each term to identify course meeting dates, and specific add/drop dates for these partial semester courses.

Email: ugradcar@gmu.edu
Website: https://carterschool.gmu.edu/

Advising

Advisors help students create a course of study that meets their interests and career goals. All majors and minors are strongly encouraged to meet regularly with an academic advisor from the School who will help students develop and follow a coherent plan of study and complete the degree in a timely manner.

Admissions & Policies

Admissions

For policies governing all minors, see AP.5.3.4 Minors.

Policies

At least eight credits of the minor courses must be unique to the Organizational Conflict Resolution Minor and not applied toward any other major, minor, certificate, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

Requirements

Minor Requirements

Sport and Conflict Resolution Minor (TCS)

Banner Code: SCNR

Academic Advising

Phone: 703-993-1300
Email: carter@gmu.edu
Website: https://carterschool.gmu.edu/

There has been a real growth in the establishment of non-profit organizations that use 'sport for development', sport to bring diverse communities together and also 'sport for peace' organizations in high conflict areas of the world. This minor will help prepare students to work for organizations dedicated to using sports for development, community building and peace. It provides students with a cross section of courses in sports management and conflict resolution. Courses in sports management frame the sports industry in a philosophical, ethical, cultural and business context. Conflict resolution courses will introduce students to foundational concepts in the study of human conflict, the analysis of conflict and problem solving techniques for helping to resolve conflict.

This is an interdisciplinary minor offered by the Jimmy and Rosalynn Carter School for Peace and Conflict Resolution and the School of Sport, Recreation and Tourism Management.

Admissions & Policies

Admissions

This minor is available to all Mason undergraduate students.

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

School of Business

Enterprise Hall
Fairfax Campus

Phone: 703-993-1880
Website: business.gmu.edu

Administration

- Maury Peiperl, Dean
- Anne Magro, Senior Associate Dean, Strategy and Impact
- Cheryl Druehl, Associate Dean, Faculty
- Brett Josephson, Associate Dean, Executive Development
- Richard Klimoski, Associate Dean, Research
- Nirup Menon, Associate Dean, Arlington Ventures
- Patrick Soleymani, Associate Dean, Undergraduate Programs
- Paige Wolf, Associate Dean, Graduate Programs
- Diane Spence, Executive Director, Finance and Administration

College Code: BU

The mission of the School of Business is to prepare a diverse student body to succeed in a global business environment. Through the faculty's creation and dissemination of business knowledge, practice, and pedagogy, we enable our students to develop analytical and communication skills and to practice ethical business behavior.

Business leaders and organizations are actively involved with the School of Business through executive development programs, speaker engagements, classroom lectures, case competitions, internships, and career placement. The School of Business also maintains close connections to the business community through its 12 advisory boards and councils. More than 360 business leaders representing 295 different companies serve as advisory board or council members.

The School of Business enrolls more than 4,500 undergraduate students and more than 600 graduate students in its programs.

The School of Business's programs offer students a variety of opportunities to enhance their professional endeavors.

- Our innovative curriculum meets the demands of the marketplace, going beyond business fundamentals to focus on the contexts of business, analytics, strategic thinking, and teamwork.
- Our distinguished faculty are cross-disciplinary collaborators and innovative practitioners who are passionate about education. They bring both theoretical and applied expertise to the classroom.
- Our outstanding career management professionals are dedicated to providing tailored support to promote our students' professional advancement and to leverage their degrees over the short- and long-term.
- Our diverse student population offers unique opportunities to network and learn from your fellow classmates. Students at Mason represent over 130 different countries and all 50 states.

Undergraduate

The programs in business education culminate in a BS degree with a concentration in one of eight areas: Accounting, Business Analytics, Finance, Financial Planning and Wealth Management, Management Information Systems, Management, Marketing, or Operations and Supply Chain Management.

Students also can enhance their specialization with one of our ten minors: Business, Business Analytics, Entrepreneurship, Finance, Government Contracting, International Business, Management Information Systems, Marketing (http://catalog.gmu.edu/colleges-schools/business/colleges-schools/business/marketing-minor/), Operations and Supply Chain Management, and Real Estate Development.

Graduate

The School of Business offers a PhD in Business, an MBA, and MS degrees in Accounting, Management, Finance, Real Estate Development, and Technology Management.

Accelerated Master's Degrees

- Mason Accounting majors may apply to the accelerated master's degree program and obtain both the Business, BS with a Concentration in Accounting (https://catalog.gmu.edu/colleges-schools/business/business-bs/#requirementstext) and Accounting, MS degrees after satisfactory completion of a total of 144 credits.
- Non-business undergraduate majors may apply to the accelerated master's degree in Management.

For policies governing all accelerated degree programs, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Graduate Certificates

Graduate certificates are offered in Business Analytics, Business Fundamentals, Accounting Analytics, Accounting for Government Contracts, Government Accounting, Forensic Accounting, IT Strategy and Digital Transformation, Chief Information Officer, and Global IT Leadership.

Centers

The School of Business houses six centers:

- The Center for Innovation and Entrepreneurship (https://business.gmu.edu/innovation/) provides experiential learning through academic programs as well as hands-on programs for Mason

students interested in innovation, invention, early stage startups, and entrepreneurship.

- The Center for Real Estate Entrepreneurship (https://business.gmu.edu/realestate/) focuses on real estate research and education in real estate development and finance.
- The Investor Protection & Corporate Fraud Research Center (https://business.gmu.edu/fraudcenter/) strives to provide thought leadership on investor protection and fraud risk by sponsoring, conducting, and disseminating research in these areas.
- The Center for Government Contracting (https://business.gmu.edu/govcon/) has established the first-in-the-nation university center to address business, policy, regulatory and other issues in government contracting.
- The Center for Retail Transformation (https://business.gmu.edu/retail/) aspires to be a go-to resource for startup, small, and medium sized retailers and other members of the retail ecosystem by developing strategic partnerships and alliances with retail sector leaders, trade associations, and key government entities with oversight and interaction with the retail sector.
- The Business for a Better World Center (https://business.gmu.edu/business-for-a-better-world/) is founded on the belief that business can be a force for good in the world, leading the charge to address the world's complex challenges. We engage leaders, shape business education, and prepare tomorrow's leaders to act with people, planet, and prosperity in mind.

Requirements & Policies

Policies

Undergraduate Academic Policies

Academic Policies

Students should become familiar with the university's general academic policies in addition to those specific to each academic unit.

E-mail

George Mason University uses only Mason e-mail accounts to communicate with enrolled students. Students should activate their Mason e-mail, use it to communicate with their school/department/program and other administrative units, and check it regularly for important information.

Study Elsewhere Policy

A student who has matriculated at Mason may transfer a limited number of hours (9 for undergraduates, 6 for graduates) of coursework in School of Business disciplines from another institution (not including registration through the Consortium of Universities of the Washington Metropolitan Area or coursework completed through the Center for Global Education). Students are permitted to take courses elsewhere under unusual circumstances—these circumstances do not include scheduling or commuting convenience, or financial (lower cost) reasons.

Special instructions for School of Business students: courses that are attempted at a two-year institution may not be used to fulfill upper-level requirements. Any course that a student wished to transfer to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

For additional information, see AP.1.4.2 Permission to Study Elsewhere.

Undergraduate Internship Policy

The School of Business recognizes the importance of experiential education in both learning to apply theory to practice and positioning students for success in their careers. Because the School of Business is committed to supporting students' professional success, the School requires that all student internships for credit be registered with the School of Business as one of the following: ACCT 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, or OSCM 492. Students may enroll in a maximum of 6 credits for these courses. Only three credits of an internship course may be taken at a time. For students in catalog years Fall 2016 and beyond, one internship course may apply to the major or concentration , and a second internship course would apply as general elective credit. For students in catalog years prior to Fall 2016, a maximum of 6 credits of internship may apply to general electives. See Internship for Academic Credit (https://business.gmu.edu/career/bus492/).

Termination from the Major

Students who do not earn a C or higher in three attempts of School of Business Foundations and Core courses will be terminated from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course and will not be eligible to receive a degree from the School of Business.

Courses required for School of Business Foundations: ACCT 203 Survey of Accounting, BUS 100 Business and Society (Mason Core), BUS 103 Develop Professional Skills I: Foundational Elements, BUS 200 Global Environment of Business (Mason Core), BUS 210 Business Analytics I, BUS 310 Business Analytics II, ECON 103 Contemporary Microeconomic Principles (Mason Core), ECON 104 Contemporary Macroeconomic Principles (Mason Core), and MATH 108 Introductory Calculus with Business Applications (Mason Core).

Courses required for School of Business Core: ACCT 303 Accounting for Decision Making , BULE 303 Legal Environment of Business, BUS 303 Develop Professional Skills II: Advanced Elements, FNAN 303 Financial Management, MGMT 303 Principles of Management, MKTG 303 Principles of Marketing, MIS 303 Introduction to Business Information Systems, and OSCM 303 Operations Management.

Once a student has attempted a School of Business Foundations and/or Core course twice unsuccessfully, they must meet with an academic advisor in order to receive an override to register for the third attempt. Students who do not successfully complete these core courses and foundations courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course.

Students terminated from the School of Business are permitted to declare the business minor only, and are not able to declare any other School of Business minors. For more information about this, see AP.5.2.4 Termination from the Major. The School of Business Termination Policy is separate from the University Repeat Policy AP.1.3.4.

All School of Business courses require a C or higher with the exception of FNAN 303 Financial Management for Finance majors or those with a concentration in Finance (B- or higher is required). For those in the Financial Planning and Wealth Management concentration, a B- is needed in ACCT 303 Accounting for Decision Making and FNAN 303 Financial Management. No upper-level major required or elective course may be attempted for a C or higher more than three times. Once a third unsuccessful attempt is made in a School of Business major required or elective course, the student will be unable to pursue that major/concentration and must work with an academic advisor to declare a new major/concentration in the School of Business.

University Consortium

Students should review university policies regarding the University Consortium under Special Registration Procedures in the Academic Policies section of this catalog. Students who have attempted or failed a course at Mason are not permitted to take the equivalent course through the consortium under any circumstance. All consortium registration requests must be submitted to the dean's office at least 3 weeks prior to the first day of classes for the relevant semester at Mason.

Any consortium course that a student wishes to register for to fulfill major or graduate-level course requirements in the School of Business must be attempted at an institution accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Non-Business School Student Credit Limitation

Enrolled undergraduate students who are not declared in a School of Business major are limited to 9 credits of upper-level business coursework within the School of Business. This policy applies to any student who is declared in another major or program at Mason. This policy does not apply to students who have declared a School of Business minor and are earning required credit toward that minor.

Undergraduate Course Overload Policy

The School of Business recommends that undergraduate students attempt no more than 18 credits in an academic semester and no more than 14 credits in a summer term. Students wishing to attempt more than 18 credits must submit a Permission to Overload form to their academic advisor.

To be eligible for a course overload, a student must fulfill all of the following criteria:

- At least a 3.0 cumulative GPA at Mason
- Have completed all courses successfully in his/her previous semester with no Fs or incompletes (IN)
- Complete the Permission to Overload form and obtain an academic advisor's signature

Freshmen and transfer students in their first semesters are not given permission for overloads as they have yet to establish an academic record at George Mason University.

If approved for an overload, the student is responsible for adding the additional class(es) and paying for the related tuition by the official university deadlines.

Transfer Credit Expiration Policy

Transfer credit is not awarded for any business (management, marketing, finance, accounting, management information systems, operations management, foundations, core, or any other School of Business course), courses completed more than ten years prior to Mason enrollment. This includes any older courses completed at RBC or the VCCS.

Laptop Policy

All School of Business Undergraduate Students must have access to a portable computing device that meets the following minimum standards. (https://business.gmu.edu/undergraduate/current-students/policiesproceduresforms/)

Appeals Process

The School of Business strives to maintain policies and procedures that are consistent with those of the University, as well as in the best interest of our students. If you have any questions concerning a particular policy or procedure, contact the Office of Student Success & Academic Services, Room 008 of Enterprise Hall (703-993-1880) or visit the website (http://business.gmu.edu).

Courses Excluded from any School of Business BS Degree

Transfer credit is not awarded for any School of Business courses completed more than ten years prior to Mason enrollment.

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

This program provides an opportunity for nondegree-seeking students to earn the academic credit necessary to sit for the Uniform CPA Examination in Virginia.

This undergraduate certificate may be pursued on a part-time basis. Maintaining full-time status is not guaranteed. Students have four years to complete the certificate.

This certificate program qualifies for Title IV Federal Financial Aid.

Admissions & Policies

Admissions

The requirement for enrollment is a bachelor's degree or higher from an accredited college or university.

Policies

Certificate Completion

Students are required to complete a minimum of 30 credits of accounting courses. At least 16 required credits must be taken at Mason after acceptance to the certificate program. Students have four years to complete certificate requirements. Students who are given permission to re-enroll following an absence from Mason may not count the four-year time limit as beginning on the date of re-enrollment.

Successful completion of the certificate program requires a grade of C or better in accounting courses and a GPA of at least 2.00 in all courses. Students are only permitted three attempts to pass each course with a C or better, following a third unsuccessful attempt the student will no longer be able pursue the certificate program.

Virginia Uniform CPA Examination

All students who wish to sit for the Uniform CPA Examination in Virginia are required to have completed 150 college-level credits, including at least 30 credits of accounting with courses in financial accounting, auditing, taxation, and management accounting; and at least 24 credits of non-accounting business courses.

Requirements

Certificate Requirements

Total credits: 30

This certificate may be pursued on a part-time basis only.

Required Courses

Code	Title	Credits

Administration

- Kevin Jones, MSA Program Director

The Master of Science in Accounting integrates fundamental business skills and specialized knowledge and acumen required by the accounting profession. The program is pursued as a face to face or an online option.

Admissions & Policies

Admissions

Admission and Eligibility Requirements

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available. To be eligible for the MS in Accounting (the full-time, part-time and accelerated accounting programs), you must have a bachelor's degree in accounting or equivalent from an accredited institution or have completed 27 college credits in accounting.

Applicants who have a business degree, but do not have an accounting degree or equivalent will be provisionally admitted until they have completed the following courses or equivalents with a grade of B- or better:

- ACCT 531 Foundations of Financial Reporting I
- ACCT 532 Foundations of Financial Reporting II
- ACCT 551 Foundations of Taxation of Business Entities
- ACCT 561 Foundations of Assurance Services

Applicants who do not have an accounting degree or business degree will be provisionally admitted until they have completed the following courses or equivalents with a grade of B- or better:

- ACCT 303 Accounting for Decision Making
- ACCT 531 Foundations of Financial Reporting I
- ACCT 532 Foundations of Financial Reporting II
- ACCT 551 Foundations of Taxation of Business Entities
- ACCT 561 Foundations of Assurance Services

International students with accounting degrees that lack a course in U.S. tax will be required to take ACCT 351 prior to matriculation.

Full admission requirements can be viewed at the school's website. (http://business.gmu.edu/masters-in-accounting/admissions/requirements/)

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Accelerated Master's

Accounting, BS/Accounting, Accelerated MS

Overview

Mason Accounting majors may be admitted to the bachelor's/accelerated master's program to obtain both Accounting, BS or Business, BS (https://catalog.gmu.edu/colleges-schools/business/business-bs/)with a Concentration in Accounting (https://catalog.gmu.edu/colleges-schools/business/business-bs/) and Accounting MS (https://catalog.gmu.edu/colleges-schools/business/accounting-ms/)degrees (MSAccel) in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

Participation in this program enables students to start taking graduate courses while they are in undergraduate status and decreases the number of credits required during graduate status.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies. (https://catalog.gmu.edu/policies/academic/graduate-policies/#text)

MSAccel Pathway Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies. For information specific to the MSAccel pathway, see the School of Business website (https://business.gmu.edu/masters-in-accounting/msa-accelerated/) with other requirements.

Students will be considered for admission into the MSAccel pathway after completion of a minimum of 60 credits and meeting all academic requirements which can be found on the School of Business website (https://business.gmu.edu/masters-in-accounting/msa-accelerated/).

Students who are accepted into the MSAccel pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the MSAccel pathway will be admitted to the MS in Accounting program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Overall GPA of 3.0
- Grades of C or above (on the first attempt) in all accounting major courses. *Students with an accounting grade below a C may transition to the MSA only with approval from the Program Director.*
- 3 credits of advanced standing with a grade of B or better from one graduate level ACCT courses listed in the MSAccel Pathway Requirements section below.
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

MSAccel Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Code	Title	Credits
Advanced Standing courses (up to 12 credits; grade of B or better required)		
ACCT 611	Advanced Issues in Managerial Accounting	
ACCT 630	Advanced Financial Accounting	
ACCT 670	International Accounting	
Reserve Credit courses (up to 6 credits):		
ACCT 621	GovCon Acquisition Regulations and Reporting	
ACCT 636	Fraud Examination	
ACCT 665	Advanced Accounting Analytics	
ACCT 671	Managing Data Quality and Integrity	
ACCT 672	Governmental and Nonprofit Accounting	

* other courses as approved by Program Director

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree policies. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7)

Accounting Analytics Graduate Certificate

Banner Code: BU-CERG-ACAN

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

The Accounting Analytics Graduate Certificate is for students and working professionals to pair their accounting knowledge and skills with data and analytical knowledge. The certificate program will provide a building block for Master's in Accounting students and working professionals seeking a career change or advancement and provides a foundation to compete for current accounting employment opportunities.

Admissions & Policies

Admissions

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed on the program website (http://business.gmu.edu/masters-in-accounting/accounting-analytics-certificate/).

Policies

Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP.6 Graduate Policies. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is six years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

Requirements

Administration

- Pallab Sanyal, Director, MBA Program

This degree prepares the next generation of world leaders through a rigorous, stimulating business and management curriculum based on a global perspective, industry demand and leadership.

The MBA core curriculum effectively integrates functional areas with the use of IT, oral and written communication, and teamwork. The MBA program requires 48 credits: 30 credits of core courses, 3 credits of Global coursework and 15 credits of elective courses. The MBA program operates on an 8 week module structure and can be pursued either as a face to face or an online format.

JD/MBA Dual Degree students can apply 15 credits of Law elective coursework toward the MBA elective degree requirement. See the Antonin Scalia Law School (http://www.law.gmu.edu/academics/degrees/) for more details.

Admissions & Policies

Admissions

Admissions and Eligibility Requirements

- All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.
- An earned baccalaureate degree from a regionally-accredited institution of higher education, or international equivalent, verified from official transcripts.
- A minimum of two years of full-time, post-baccalaureate professional employment.
- One college-level calculus course prior to enrolling (recommended but not required).

Full admission requirements can be viewed are available on the program website (http://business.gmu.edu/mba-programs/admissions/).

Business Analytics Graduate Certificate

Banner Code: BU-CERG-BUSA

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

Administration

- Pallab Sanyal, Director, MBA Program

The Graduate Certificate in Business Analytics will help analysts and professionals from diverse domains to effectively analyze data through the hands-on use of decision modeling and other techniques using popular software tools. The program covers a wide array of methodologies and techniques — from data collection, organization, reporting and mining to extraction of useful and actionable information for decision makers.

Courses (grades of B or better) taken as part of the Graduate Certificate in Business Analytics can be applied toward the Mason MBA upon acceptance into the degree program.

Non-MBA students enroll in GBUS courses while MBA students enroll in MBA courses.

This certificate qualifies for Title IV Federal Financial Aid.

Business Analytics Minor

Banner Code: ABUS

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

- Jeremy Plotnick, Director of Minor Programs

The amount of data flowing from, to, and through enterprises of all sorts is enormous, and growing rapidly—more rapidly than the capabilities of organizations to use it. Successful enterprises are those that make

effective use of the abundance of data to which they have access: to make better predictions, better decisions, and form better strategies. Business analytics—which encompasses a variety of techniques to extract useful information from different sources of data—is being embraced at an increasing rate by organizations that need to gain actionable and forward-looking insight from their data. The minor in business analytics will provide students with the cutting-edge knowledge and skills they need to use and gather data to identify, understand, and deliver insights that internal and external clients find vital to organizational success.

Admissions & Policies

Policies

At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Business Fundamentals Graduate Certificate

Banner Code: BU-CERG-BUSF

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

The Graduate Certificate in Business Fundamentals provides students with foundational knowledge in four key areas of business: accounting, finance, management, and marketing. This introduction will augment students' skillsets from their own academic and professional disciplines with a fundamental understanding of effective business practices.

Courses (grades of B or better) taken as part of the Graduate Certificate in Business Fundamentals can be applied toward the Mason MBA upon acceptance into the degree program.

Currently, this certificate does not qualify for Title IV Federal Financial Aid.

Admissions & Policies

Admissions

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed on the program website. (http://business.gmu.edu/mba-programs/business-fundamentals-certificate/)

Policies

Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP.6 Graduate Policies.

A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is six years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a full-or part-time basis.

Business Minor

Banner Code: BUS

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

- Jeremy Plotnick, Director of Minor Programs

The business minor provides an introduction to the skills needed for success in the rapidly changing and evolving world of business. Because it is designed for non-business students who seek to learn business essentials to enhance their own area of expertise, the minor provides broad exposure to business concepts and theories. The minor also presents and integrates the major functional areas in business to solve management problems through the use of IT. Strong written and oral communication skills are expected.

Admissions & Policies

Policies

At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Requirements

Minor Requirements

Total credits: 15

Required Courses

Code	Title	Credits
Select at least four courses from the following:		12-15
MBUS 300	Accounting in a Global Economy	
MBUS 301	Managing People and Organizations in a Global Economy	
MIS 303	Introduction to Business Information Systems	
MBUS 303	Marketing in a Global Economy	
MBUS 308	Corporate Finance and Investments in a Global Economy	
Total Credits		12-15

Electives

Code	Title	Credits

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

The School of Business is ranked in the top 10 percent of the nation's undergraduate business schools and offers a Bachelor of Science in Business with innovative concentrations. The School of Business also offers several options for a minor for business and non-business majors, as well as an undergraduate certificate program in accounting. The School of Business programs are designed to prepare graduates for work in a rapidly changing and competitive marketplace with local, regional, and global companies. With Mason's location in Northern Virginia and proximity to Washington, D.C., combined with the assistance of the School of Business's own Career Services staff and Student Success and Academic Services staff, students are also afforded exceptional opportunities to gain practical experience and global engagement opportunities to complement their academic coursework. Students admitted spring 2020 and later will graduate with a Bachelor of Science in Business degree.

Requirements

Degree Requirements

Total credits: 120

School of Business students pursuing a BS degree must complete a minimum of 120 credits, including the Mason Core requirements, business foundations, business core and concentration requirements. In addition, the following requirements must be met:

- A minimum of 45 credits at the 300- or 400-level.
- A minimum of 30 credits of School of Business core and concentration courses at Mason.
- At least 9 credits required for the specific concentration and BUS 498 Capstone Course: Advanced Business Models (Mason Core) taken at Mason.
- A grade of C or higher earned in the business foundations, business core and concentration requirements.

Students should carefully follow prerequisites for School of Business courses. Students may be removed from a course if they enroll without having fulfilled the prerequisites.

Mason Core Requirements

Some Mason Core requirements may already be fulfilled by concentration requirements listed below. Students are strongly encouraged to consult their advisors to ensure they fulfill all remaining Mason Core requirements.

Code	Title	Credits
Foundation Requirements		
Written Communication		6
Oral Communication		3
Core Requirements		
Arts		3
Literature		3
Natural Science [1]		7
Western Civilization/World History		3
Total Credits		25

[1] The School of Business natural science requirement must be fulfilled by completing one 4-credit laboratory science and one 3 credit non-lab science.

Note: Remaining Mason Core requirements are fulfilled with concentration course work.

Business Foundations

Those who do not successfully complete these courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. For more information about this, see AP.5.2.4 Termination from the Major.

Code	Title	Credits
ACCT 203	Survey of Accounting	3
BUS 100	Business and Society (Mason Core) [2]	3
BUS 103	Develop Professional Skills I: Foundational Elements	3
BUS 200	Global Environment of Business (Mason Core) [2]	3
BUS 210	Business Analytics I	3
BUS 310	Business Analytics II	3
ECON 103	Contemporary Microeconomic Principles (Mason Core)	3
ECON 104	Contemporary Macroeconomic Principles (Mason Core)	3
Select one course from the following: [1]		3-4
MATH 108	Introductory Calculus with Business Applications (Mason Core)	
MATH 113	Analytic Geometry and Calculus I (Mason Core)	
MATH 114	Analytic Geometry and Calculus II	
HNRT 225	Applied Calculus	
Total Credits		27-28

[1] MATH 108 or MATH 113 satisfies the Mason Core Quantitative Reasoning requirement.

[2] BUS 200 satisfies Mason Core Global Understanding requirement, and BUS 100 satisfies the Mason Core Social and Behavioral Sciences requirement.

Business Core

Those who do not successfully complete these courses within three attempts will be terminated from the School of Business and will not be eligible to receive a degree from the School of Business. Students terminated from the School of Business are prohibited from enrolling in any School of Business course. For more information about this, see AP.5.2.4 Termination from the Major.

[1] General electives may be selected from any University or School of Business course, except courses designated for the Business Minor (MBUS). Credits awarded as Associate Degree Elective Credit (ADEC) as part of a student's transfer evaluation are also excluded from general electives.

Capstone

Students must have 90 graded credits and successfully complete all Business Core courses and BUS 310 Business Analytics II to be eligible to enroll in BUS 498 Capstone Course: Advanced Business Models (Mason Core).

Code	Title	Credits
BUS 498	Capstone Course: Advanced Business Models (Mason Core)	3
Total Credits		3

Concentration in Accounting (ACCT)

The concentration in Accounting prepares students for professional careers in the private and public sectors. The accounting concentration is designed to produce accounting professionals who can both generate and apply financial information to solve business problems. Our students learn principles of business and accounting as well as the specific skills and specialized technical knowledge necessary for success in the dynamic field of accounting. Our program emphasizes ethics, critical thinking, written and verbal communication, and effective use and understanding of technology. Our graduates are employed by the assurance, tax advisory, and consulting groups of the top accounting firms as well as Fortune 100 companies. Our proximity to the nation's capital provides unique opportunities for our graduates to work in government and in the federal practices of public accounting firms. The accounting concentration program is separately accredited by AACSB International. Students interested in CPA certification can apply

to the MSA (https://catalog.gmu.edu/colleges-schools/business/accounting-ms/) degree to meet the 150 hour requirement for CPA certification in most states. The MSA (https://catalog.gmu.edu/colleges-schools/business/accounting-ms/) allows students to meet the 150 hour requirement for CPA certification in most states in only nine months.

Also available for eligible students, the Accelerated Advanced Accounting Pathway (A++) is a pathway that provides the ability to complete a bachelor and master's degree in accounting in four years. For more information, please meet with an academic advisor in the School of Business.

Concentration in Business Analytics (BUSA)

Business analytics encompasses a wide array of methodologies and techniques, from collection, organization, reporting and mining of data to extraction of useful and actionable information for the decision makers. As the field matures, more organizations are turning to business analytics as part of their core function to assist decision making and strategy development. Business analytics is grounded in an understanding of business and uses knowledge and skills related to analytic tools to identify business questions that can be answered by data, identify appropriate data to answer the questions, evaluate the quality of the data, analyze the data, form conclusions, and meaningfully communicate those conclusions to relevant parties. Business analysts will work in practice with data scientists with backgrounds in engineering, math, or computer science whose expertise in data analytics is centered on data architecture or developing data analysis tools.

[1] Satisfies Writing Intensive requirement

Second Concentration in Business Analytics
Students declaring a second concentration in Business Analytics must complete the four required courses and two elective courses for the concentration (listed above).

Concentration in Finance (FNAN)

The concentration in Finance prepares students for professional careers by providing a solid foundation in the principles necessary to make operating decisions for an organization and in financial market analysis. We educate our finance students to understand, evaluate, and manage risk. In addition, students learn to conduct and effectively present financial analysis and research valuing complex projects, assets, securities, and firms. Students in the finance concentration explore the relationships among investors, firms, financial institutions, markets, and regulators. Students with a concentration in Finance have a unique opportunity to compete globally, as well as regionally, for unique and diverse job opportunities, including government (U.S. Treasury and the Board of Governors), large financial corporations (Fannie Mae and Freddie Mac), international organizations (World Bank and IMF), and other careers related to Finance.

[2] With the exception of FNAN 300 and FNAN 303

Second Concentration in Finance
Students declaring a second concentration in Finance must complete the four required courses and two elective courses for the concentration (listed above).

Concentration in Financial Planning and Wealth Management (FPWM)

Consumers increasingly seek professional advice on managing their finances from professionals with wide-ranging knowledge from taxes and estate planning to insurance and retirement planning to portfolio management. In a recent article title, Forbes described Financial Planning as “One of the Fastest Growing Careers” and noted that the field “is in Desperate Need of Young Talent.” The article went on to explain that the field is expected to grow at a 32% rate over the next decade according to the Bureau of Labor Statistics while the average growth rate for all occupations is 14%.” (Touryalai, 2012). The field of financial planning includes several certifications including the Certified Financial Planner certification (CFP) through the CFP Board and Personal Financial Specialist (PFS) certification through the AICPA. The national CFP Board and regional FPA leadership have reached out to Mason to work with us to develop a CFP-registered program in Financial Planning due to the significant need in our region for graduates with this specialization.

MGMT 452	Experiential Entrepreneurship	3
MGMT 454	Social Impact and Entrepreneurship	3
BULE 402	Commercial Law	3

Second concentration in Management

Students declaring a second concentration in Management must complete the two required courses and four elective courses for the concentration (listed above).

Concentration in Management Information Systems (MIS)

The concentration in Management Information Systems encompasses analysis, design, implementation, and management of information

systems, to support business processes and decision making in all functional areas of an organization. The curriculum highlights not only the fundamental building blocks of information systems, but also the interaction of technology, people and business processes. MIS students learn about designing, building, maintaining, and securing information systems to meet organizational goals. They also acquire skills to use data and information through business analytics to support better managerial decision making in areas such as marketing, accounting and finance. MIS graduates are capable of translating business needs into technology-based solutions, and new technological advances into business capabilities. The MIS concentration prepares students for diverse technology based careers including Business Analyst, System Analyst, Security Analyst, Data Analyst, IT Project Management, IT Quality Management, Cloud Management, IS Audit and Control, Government Contracting, and Consulting.

OSCM 493	Management of Technology Projects	
Total Credits		21

[1] Satisfies Writing Intensive requirement

[2] It is strongly recommended that students planning a concentration in Management Information Systems take MIS 350 as part of their program.

Second Concentration in Management Information Systems
Students declaring a second concentration in Management Information Systems must complete the three required courses and three elective courses for the concentration (listed above). At least 2 of the electives must be MIS courses.

Concentration in Marketing (MKTG)

The concentration in Marketing prepares students for a broad range of global and domestic career options in corporations, small businesses, government, and nonprofits. A marketing concentration provides students with a solid foundation in marketing management for understanding the needs of the customer, the value organizations create for their customers, and opportunities and threats in the global marketplace. Students learn marketing concepts and practices related to consumer behavior, marketing research and analytics, and marketing planning and strategy (product development, pricing, distribution, and advertising and promotions). Our graduates work in such diverse fields as advertising and marketing communications, product and brand management, customer relationship management, new product/service development, new market and business development, sales, retail management, marketing research and analytics, and digital and social media marketing.

[3] Research and scholarship intensive course.

Second Concentration in Marketing
Students declaring a second concentration in Marketing must complete the three required courses and three elective courses for the concentration (listed above).

Concentration in Operations and Supply Chain Management (OSCM)

Operations and Supply Chain Management (OSCM) is the business function devoted to the management of resources and processes used by a firm to produce goods or services. Students with an OSCM concentration learn how to perform strategic and tactical planning, enabling them to efficiently and effectively manage the activities involved in transforming organizational resources into customer value. OSCM students acquire modeling, business analytics, and information technology skills for addressing a range of business problems. OSCM knowledge and skills are applicable to every business, spanning services, manufacturing, consulting, public sector (including government contracting), and not- for- profit organizations. The OSCM concentration is designed to prepare students for a career in the areas of: Supply Chain Management, Government Contracting (including procurement, logistics, and distribution), Project Management, Quality Management, Socially Responsible Operations, Product and Services Design, Process Analysis and Design, and, Planning and Control of Operations.

Code	Title	Credits

[1] Satisfies Writing Intensive requirement

Second Concentration in Operations and Supply Chain Management
Students declaring a second concentration in Operations and Supply Chain Management must complete the three required courses and three elective courses for the concentration (listed above). At least 2 of the electives must be OSCM courses.

Honors

Honors in the Concentration Overview

The School of Business Honors Program provides highly motivated business students with an enriched academic experience integrating curricular, co-curricular, and extra-curricular development. Admission to the Honors Program is by invitation only.

Admission Requirements

- Minimum 3.0 cumulative Mason GPA
- A- or higher on first attempt at the core course for the concentrations
  - ACCT: A- or higher in ACCT 303 Accounting for Decision Making
  - BUSA: A- or higher in MIS 303 Introduction to Business Information Systems
  - FNAN: A- or higher in FNAN 303 Financial Management
  - FPWM: A- or higher in FNAN 303 Financial Management
  - MGMT: A- or higher in MGMT 303 Principles of Management
  - MIS: A- or higher in MIS 303 Introduction to Business Information Systems
  - MKTG: A- or higher in MKTG 303 Principles of Marketing
  - OSCM: A- or higher in OSCM 303 Operations Management
- Submission of a personal statement/essay
- Two recommendations from faculty within the School of Business

Curricular Requirements

- 3.0 cumulative Mason GPA
- 3.5 GPA in the concentration or 95th percentile GPA within the concentration
- B- or higher on first attempt at every concentration course

Co-Curricular Requirements

Students must complete **ONE** of the following to satisfy the co-curricular requirements for graduating with honors:

1. Honors section of BUS 498 Capstone Course: Advanced Business Models (Mason Core)
2. A concentration-specific honors course (See list below)
3. Completion of an honors project with faculty approval (the honors project as approved should be separate from work in other courses)

Code	Title	Credits
BUS 498	Capstone Course: Advanced Business Models (Mason Core) (Honors Section)	3
Honors Concentration Course		
ACCT		
ACCT 462	Honors Seminar in Accounting	3
BUSA		
MIS 462	Honors Seminar in Management Information Systems (Topic Varies)	3
FNAN		
FNAN 462	Honors Seminar in Finance	3
FPWM		
FNAN 462	Honors Seminar in Finance	3
MGMT		
MGMT 462	Honors Seminar in Management (Topic Varies)	3
MIS		
MIS 462	Honors Seminar in Management Information Systems (Topic Varies)	3
MKTG		
MKTG 462	Honors Seminar in Marketing (Topic Varies)	3
OSCM		
OSCM 462	Honors Seminar in Operations Management (Topic Varies)	3

Extra-Curricular Requirements

Attendance at a minimum of two honors events, as determined by the Honors Faculty Coordinator.

Requirements for Students to Obtain the Honors Designation

Honors students must meet all curricular, co-curricular, and extracurricular requirements mentioned above at the time of graduation.

Accelerated Master's

Accounting, BS/Accounting, Accelerated MS

Overview

Mason Accounting majors may be admitted to the bachelor's/accelerated master's program to obtain both Accounting, BS or Business, BS (https://catalog.gmu.edu/colleges-schools/business/business-bs/)with a Concentration in Accounting (https://catalog.gmu.edu/colleges-schools/business/business-bs/) and Accounting MS (https://catalog.gmu.edu/colleges-schools/business/accounting-ms/)degrees (MSAccel) in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

Participation in this program enables students to start taking graduate courses while they are in undergraduate status and decreases the number of credits required during graduate status.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies. (https://catalog.gmu.edu/policies/academic/graduate-policies/#text)

MSAccel Pathway Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies. For information specific to the MSAccel pathway, see the School of Business website (https://business.gmu.edu/masters-in-accounting/msa-accelerated/) with other requirements.

Students will be considered for admission into the MSAccel pathway after completion of a minimum of 60 credits and meeting all academic requirements which can be found on the School of Business website (https://business.gmu.edu/masters-in-accounting/msa-accelerated/).

Students who are accepted into the MSAccel pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the MSAccel pathway will be admitted to the MS in Accounting program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Overall GPA of 3.0
- Grades of C or above (on the first attempt) in all accounting major courses. *Students with an accounting grade below a C may transition to the MSA only with approval from the Program Director.*
- 3 credits of advanced standing with a grade of B or better from one graduate level ACCT courses listed in the MSAccel Pathway Requirements section below.
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

MSAccel Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Code	Title	Credits
Advanced Standing courses (up to 12 credits; grade of B or better required)		
ACCT 611	Advanced Issues in Managerial Accounting	
ACCT 630	Advanced Financial Accounting	
ACCT 670	International Accounting	
Reserve Credit courses (up to 6 credits):		

ACCT 621	GovCon Acquisition Regulations and Reporting
ACCT 636	Fraud Examination
ACCT 665	Advanced Accounting Analytics
ACCT 671	Managing Data Quality and Integrity
ACCT 672	Governmental and Nonprofit Accounting

* other courses as approved by Program Director

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree policies. (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7)

Business, PhD

Administration

- Kevin Rockmann, Director, PhD Program

In an increasingly globalized world characterized by rapid change and progress, business communities need innovative scholarship that challenges established convention and gives practitioners, policymakers, and cultural influencers cutting-edge, evidence-based findings and tools to help them manage, lead, innovate, and excel in their careers and organizations. Scholarship such as this is produced at business schools with a vibrant, innovative PhD program in Business.

The PhD program in Business is designed to address such needs. The PhD Program in Business will enhance GMU's mission by increasing the number of doctoral programs, research intensity, and university-wide interdisciplinary research and collaboration. By providing access to regional research sites and the diverse Mason community, our students will emerge from the program prepared to study many of the organizational problems within the Commonwealth as well as the world.

This program is designed as an overarching degree with four concentrations from which the students must pick one. The concentrations will be in Organizational Behavior, Strategic Management, Information Systems, and Operations Management. Each student will declare their concentration prior to admission, in order for the school and faculty to properly prepare courses for degree completion. While some courses will be in common for all students taking the PhD in Business, each concentration will contain unique courses. The goal with this model is both to simplify the overall administration of the program (one degree), but allowing the students the relevant domain knowledge to succeed in their specific field (required concentration).

Admissions & Policies

Admissions

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions (https://catalog.gmu.edu/admissions/graduate-policies/).

In addition to the University's requirements for graduate admission, the School of Business will require applicants to the proposed program to submit the following:

- Scores from the Graduate Management Admissions Test (GMAT) or Graduate Record Examination (GRE) taken within the last five years. Minimum scores are as follows:
  - GMAT: 600
  - GRE Verbal: 155
  - GRE Quantitative: 155
  - GRE Analytical: 3.5
- Three letters of recommendation, including at least one letter from a current or former professor, and one letter from a current or former supervisor.
- Resume, including relevant work and/or research experience.
- Statement of professional and academic mission and goals.
- Personal interview for selected applicants.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 72

The PhD in Business includes courses in the Business Core, within each concentration, and then credits towards dissertation research. Within each concentration there are required and elective courses.

PhD in Business Core

All students pursuing the PhD in Business will take the following courses:

Code	Title	Credits
BUS 701	Professional Practicum	3
BUS 702	Writing for Business PhD Students	3
BUS 703	Research Project	3
BUS 801	Field Research in Business [1]	6
Total Credits		15

[1] Must be repeated for a total of 6 credits.

Concentration in Organizational Behavior (ORGB)

All students pursuing the concentration in Organizational Behavior will be required to take courses in the domain, research methods courses, and specialization or elective courses.

Code	Title	Credits
Required Courses		
MGMT 711	Seminar in Organizational Behavior	3
MGMT 712	Seminar in Strategic Management	3
MGMT 893	Special Topics in Organizational Behavior [1]	6
Total Credits		12

[1] Must be repeated for a total of 6 credits.

Concentration in Strategic Management (STMT)

All students pursuing the concentration in Strategic Management will be required to take courses in the domain, research methods courses, and specialization or elective courses.

Code	Title	Credits
Required Courses		
MGMT 711	Seminar in Organizational Behavior	3
MGMT 712	Seminar in Strategic Management	3
MGMT 892	Special Topics in Strategic Management [1]	6
Total Credits		12

[1] Must be repeated for a total of 6 credits.

Concentration in Information Systems (ISY)

All students pursuing the concentration in Information Systems will be required to take courses in the domain, research methods courses, and specialization or elective courses.

Code	Title	Credits
Required Courses		
MIS 721	Seminar in Information Systems	1.5
OSCM 721	Seminar in Operations and Supply Chain Management	1.5
MIS 722	Seminar in Economics of Information Systems	3
MIS 723	Seminar in Technology Research in Information Systems	3
MIS 892	Special Topics in Information Systems [1]	3
Total Credits		12

[1] May be repeated for different topics.

Concentration in Operations Management (OMGT)

All students pursuing the concentration in Operations Management will be required to take courses in the domain, research methods courses, and specialization or elective courses.

Code	Title	Credits
Required Courses		
MIS 721	Seminar in Information Systems	1.5
OSCM 721	Seminar in Operations and Supply Chain Management	1.5
OSCM 731	Seminar in Supply Chain Management	3
OSCM 732	Seminar in Innovation and New Product Development	3
OSCM 893	Special Topics in Operations Management [1]	3
Total Credits		12

[1] May be repeated for different topics.

Research Methods

Research methods courses are designed to prepare students to evaluate and investigate a range of research approaches including data collection and analysis, data mining and econometrics, and empirical and analytical modeling. All courses must be approved by a faculty advisor.

Code	Title	Credits
Select 15 credits from the following:		15
ECON 611	Microeconomic Theory	
ECON 637	Econometrics I	
ECON 838	Econometrics II	
OR 641	Linear Programming	
OR 642	Integer Programming	
OR 645	Stochastic Processes	
PSYC 754	Multiple Regression	
PSYC 756	Quantitative Methods IV: Multivariate Techniques in Psychology	
PSYC 892	Special Topics in Psychology	
SOCI 631	Survey Research	
SOCI 634	Qualitative Research Methods	
SOCI 655	Ethnography	
SOCI 670	Social Networks, New Media, and Inequality	
SOCI 730	Analytic Techniques of Social Research	
STAT 525	Nonparametric Statistics and Categorical Data Analysis	
STAT 526	Applied Regression Analysis	
STAT 554	Applied Statistics I	
STAT 634	Case Studies in Data Analysis	
STAT 652	Statistical Inference	
STAT 654	Applied Statistics II	
STAT 656	Regression Analysis	
STAT 662	Multivariate Statistical Methods	
Total Credits		15

Specialization

Students must choose a specialization area closely related to their concentration, which consists of 15 credits of approved coursework. A student may select a specialization with a second concentration in Business, or may develop a specialization with the approval of the academic advisor. No more than one Independent Study course with a faculty member may be used toward satisfying the specialization requirement.

Examples of acceptable specialization areas include psychology (for students in the Organizational Behavior concentration), industrial engineering and statistics (for students in the Operations Management concentration), sociology (for students in the Strategic Management concentration), and economics and computer science (for students in the Information Systems concentration). Courses taken to fulfill the specialization must be in addition to any other requirements for the concentration.

Electives

Code	Title	Credits
Students complete the remaining credits through additional elective courses chosen in consultation with an advisor.		0-3

Advancement to Candidacy

To advance to candidacy, students must complete all courses required by the program. Students must also successfully complete and pass written and/or oral comprehensive exams.

Dissertation Research

All PhD in Business students must satisfactorily complete a doctoral dissertation. A PhD in Business dissertation culminates doctoral study. Such work must clearly demonstrate the candidates' abilities to apply principles of business-related problems within one's chosen concentration. It must integrate knowledge of various disciplines with knowledge of relevant practice and theory. The dissertation must also make a significant contribution to existing knowledge or practice within one's chosen concentration.

Students must register for 3 or 6 credits the first semester enrolled in BUS 998 Doctoral Dissertation Proposal. Students must register for at least 1 credit of BUS 998 thereafter until they are permitted to register for BUS 999 Doctoral Dissertation Research. Students must register for 3 credits the first semester enrolled in BUS 999 and must register for at least 1 credit of BUS 999 thereafter until all work has been completed, including the semester in which the degree is received. Students must apply a minimum of 12 dissertation credits (BUS 998 and BUS 999 combined) to the degree.

Chief Information Officer Graduate Certificate

Entrepreneurship Minor

Banner Code: ENTR

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

- Jeremy Plotnick, Director of Minor Programs

The Entrepreneurship Minor provides students with an interest in learning more about elements of new venture creation the ability to gain a strong set of entrepreneurship acumen. In combination with the school's expanding co-curricular entrepreneurship programs, the minor in entrepreneurship will provide an experiential platform to grow student skill sets, networks and professional portfolios.

Admissions & Policies

Policies

At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Requirements

Minor Requirements

Total credits: 15

Required Courses

Business major students should take:

Code	Title	Credits
MGMT 451	Introduction to Entrepreneurship	3
MGMT 452	Experiential Entrepreneurship	3
Total Credits		6

Non-business major students should take:

Code	Title	Credits
MBUS 304	Entrepreneurship: Starting and Managing a New Enterprise	3
MGMT 452	Experiential Entrepreneurship	3
Total Credits		6

Electives

Executive MBA

Banner Code: BU-MBA-BUEX

Graduate Program Office

Phone: 703-993-2136
Email: emba@gmu.edu

Administration

- Claus Langfred, Academic Director, Executive MBA Program

The Executive MBA is designed for those with a minimum of 7 years of significant business or military/professional experience. The program's focus is management decision making, strategic management of business resources, and leadership – all in the context of National Security and Government Contracting firms. Dedicated faculty, an innovative and relevant curriculum for the D.C. area, a student-centered program team, and great colleagues contribute to the learning experience of a lifetime. The program is carefully designed to help students master a broad range of executive-level competencies while cultivating expert business-related knowledge of the National Security business environment. Students complete the program as a cohort, resulting in strong bonds and networking opportunities. The program is completed in 16 months, starting in January and classes are held approximately one Saturday and one Friday per month.

Diversity in Learning

Students encounter multiple approaches to learning in the program. Classroom discussions, team projects, individual reading, team presentations, team problem solving, business simulations, business case analyses, coaching, and a D.C. residency all contribute to the creative learning environment delivered by the Mason Executive MBA Program.

National Security Focus

With America's role in the world continually evolving to meet new global challenges, the role of leadership in the security industry has never been more vital. The need for military leaders, government executives and corporate defense contractors who can provide mission critical products and services - and who understand the unique demands of the complex and dynamic national security sector - has never been more critical. Dedicated faculty from the Mason School of Business and adjunct faculty (working faculty working in specialty areas of the security sector) as well as accomplished government, military, and corporate guest speakers, technical experts, and Mason alumni employed in the security industry, are a part of the National Security focus on this program. The dynamic learning environment brings contemporary challenges of the national security industry right into the classroom.

Admissions & Policies

Admissions

Full eligibility and admission requirements can be viewed at the program's website. (http://business.gmu.edu/graduate/)

Policies

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Requirements

Degree Requirements

Total credits: 48

Modules

Students complete eight 8-week modules. During each eight-week module, students complete two courses (one in-person and one on-line) in an applications-oriented sequence that takes them from developing core management skills through the understanding and application of the tools of business performance to the talents of leadership.

Required Courses

Code	Title	Credits
EMBA 603	Managerial Economics	3
EMBA 612	Managing Costs and Evaluating Performance	3
EMBA 613	Financial Accounting	3

Finance, MS

Banner Code: BU-MS-FNAN

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

The purpose of the Finance, MS program is to prepare students for successful careers in financial industries and private sectors with finance-related job functions.

This degree will provide the opportunity for prospective students to further their education by offering a specialized program that helps them develop technical financial skills to fill the projected market demand and have a successful career in a global economy.

Overall, the Finance, MS program is ideal for students who have limited work experience or have decided to pursue a finance-related career path after receiving their undergraduate degrees. The program is designed to equip students with advanced knowledge and abilities essential for the highly skilled financial work environment.

Admissions & Policies

Admissions

All students registering for School of Business graduate courses must have graduate standing. Non degree student status is not available.

Government Contracting Minor

Banner Code: GOVC

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

- Jeremy Plotnick, Director of Minor Programs

The government contracting market sector is huge. At the federal level, alone, the U.S. General Accountability Office reported that annual obligations through contracts for goods and services exceeded $430 billion. Many of the federal agencies that contract for goods and services, as well as the contractors that carry out those contracts, are in the Washington DC metropolitan area. There is a need to prepare those Business School students who seek careers in government agencies or with government contractors with the skills and knowledge to promote success in their careers. A minor in government contracting will meet this need by providing students with an understanding of the best practices, processes, and methodologies of government contracting. Students will gain this understanding from a government agency's perspective, as well as from a government contractor's perspective.

Admissions & Policies

Policies

At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

OSCM 465	Government Contracting and Procurement	
Total Credits		9

[1] Students may not earn elective credit for both ACCT 320 and ACCT 472 (students must choose one). ACCT 320 is recommended for non-Accounting students and ACCT 472 is recommended for Accounting students.

International Business Minor

Banner Code: IB

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

- Jeremy Plotnick, Director of Minor Programs

The minor in International Business provides an introduction for those students interested in learning more about elements of business unique to international organizations or in pursuing a career in international business. With a strong set of business skills developed through the core undergraduate curriculum and their majors, students in the International Business Minor can further develop their skills in managing and communicating across different cultures, improve their understanding of how specific business disciplines vary in an international setting, and cultivate an appreciation for international monetary issues.

Admissions & Policies

Policies

At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Requirements

Minor Requirements

Total credits: 15

Required Courses

Code	Title	Credits
MGMT 461	Cross Cultural and Global Management	3
Total Credits		3

Electives

Code	Title	Credits
Select four electives from the following: [1]		12
ACCT 370	International Accounting	

ECON 360	Economics of Developing Areas (Mason Core)
ECON 361	Economic Development of Latin America (Mason Core)
ECON 362	African Economic Development (Mason Core)
ECON 380	Economies in Transition (Mason Core)
ECON 390	International Economics
ECON 420	International Money and Finance
FNAN 440	International Financial Management
GOVT 343	International Political Economy
GOVT 367	Money, Markets and Economic Policy (Mason Core)
MGMT 441	International Strategy
MKTG 407	Global Marketing
OM 320	Supply Chain Management in a Global Economy
Total Credits	12

[1] A maximum of one ECON or GOVT course may count towards the minor. The other three electives must be School of Business coursework.

Co-Curricular Requirement

Students must complete one of the following in addition to the curriculum requirements:

Global Experience

- Global residency course;
- An international internship abroad;
- A domestic internship with significant international experience;
- An approved study abroad program; or
- Study at a Mason campus or a Mason joint program overseas

OR

Foreign Language

- One language study course; or
- A course taught in foreign literature when taught in a foreign language

IT Strategy and Digital Transformation Graduate Certificate

Banner Code: BU-CERG-ITDT

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

Administration

- Candace Deans, Director, MS in Technology Management Program

The graduate certificate in IT Strategy and Digital Transformation is designed to develop skills for designing a digital transformation strategy, enhance knowledge at the intersection of emerging technologies and digital transformation, and expose students to real world applications through company use cases. Courses taken in the IT Strategy and Digital Transformation graduate certificate can be applied toward the MS in Technology Management program upon acceptance into the degree program.

Admissions & Policies

Admissions

All students registering for School of Business graduate courses must have graduate standing. Non-degree student status is not available.

Full eligibility and admission requirements can be viewed on the program website. (http://business.gmu.edu/masters-in-technology-management/it-strategy-and-digital-transformation-certificate/)

Policies

Students may use the credits completed as part of their graduate degree requirements in accordance with program requirements and AP.6 Graduate Policies. A maximum of 3 graduate credits taken at another institution can be transferred to the graduate certificate. The time limit for completion is four years from the date of admission to the graduate certificate. Students must have a minimum GPA of 3.00 to complete the certificate.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a full-or part-time basis.

Administration

- Victoria Grady, Director, MS in Management Program

The program prepares recent graduates of non-business majors for success in business fields. The Master of Science in Management offers the fundamentals of business management in a global environment and is composed of the core discipline areas common to all business graduate programs that are accredited by the Association to Advance Collegiate Schools of Business (AACSB). It is a full time, daytime program. Students will enter as a cohort and complete all degree requirements within 11 months.

Admissions & Policies

Admissions

Admissions and Eligibility Requirements

Admission to the Master of Science in Management is contingent on applicants having completed an undergraduate degree program within 24 months prior to when they would enroll in the program.

Policies

For policies governing all graduate degrees, see AP.6 Graduate Policies.

Accelerated Master's

Bachelor's Degree (any)/Management, Accelerated MS

Overview

Qualified undergraduates may be admitted to a Bachelor's/Accelerated Master's program (BAM) and obtain a BS/BA and an MS in Management (MSM) after satisfactory completion of a minimum of 144 credits. In keeping with the MSM admissions policy, the Bachelor's/Accelerated Master's in Management (BAM-MSM) program will focus primarily on non-business majors who seek a foundation in business management. Program benefits include reduced tuition, a lighter 5th year course load, and access to earlier advising and career coaching.

See AP.6.7 Bachelor's/Accelerated Master's degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the Master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM-MSM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree Policies. For information specific to this Accelerated Master's program, see the School of Business website. (https://business.gmu.edu/masters-in-management/)

Generally, Mason undergraduates from any non-School of Business program will be eligible. Students will be considered for admission into the BAM-MSM Pathway after completion of a minimum of 60 credits, and an overall GPA of 3.0 or above. Full admission requirements can be viewed at the School of Business website. (https://business.gmu.edu/)

Students who are accepted into the BAM-MSM pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and all course-specific pre-requisites.

Students admitted in the BAM-MSM pathway will be admitted to the MS in Management program if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form and university transcript:

- 3.0 Overall GPA
- Interview with Program Director

- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

BAM-MSM Pathway Courses

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses choose from the following:

Code	Title	Credits
GBUS 613	Financial Reporting and Decision Making	
BMGT 623	Marketing and Firm Performance	
GBUS 643	Managerial Finance [1]	
BMGT 662	Management of Information Technology	

[1] GBUS 613 is a prerequisite.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree policies.

Management Information Systems Minor

Banner Code: MIS

Phone: 703-993-1880
Website: business.gmu.edu

Administration

- Jeremy Plotnick, Director of Minor Programs

With the growth in Internet-based companies and the digitization of processes and data in traditional companies, the demand for business analysts, data analysts, and information systems professionals is growing in most economies. The MIS minor offers Business and other Mason undergraduate students a focused set of courses that provide them foundational knowledge and skills in management information systems. The focus is on applying information systems solutions to business problems. The minor is not intended for MIS/IT/CS majors. It is intended for students who could benefit from a deeper understanding of MIS as it relates to their major. The benefit of being able to apply information systems solutions in their chosen career would make the students more marketable/attractive to employers in an increasingly digital economy. The MIS minor offers a useful and attractive option for both business and non-business students.

Admissions & Policies

Policies

At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

Requirements

Marketing Minor

Banner Code: MKTG

Academic Advising

Phone: 703-993-1880
Email: masonbus@gmu.edu

Administration

- Jeremy Plotnick, Director of Minor Programs

The Marketing Minor provides any student who is interested in marketing a solid foundation for understanding the needs of the customer and in the principles of marketing management. This includes understanding new product development, creating marketing communications and promotions, managing customer relationships, and analyzing consumer and market trends. Learning outcomes also include the value

organizations create for their customers, and opportunities and threats in the global marketplace.

This minor provides a wide range of marketing classes that can enhance major coursework in other academic disciplines. In the required courses, students learn about the voice of the consumer and customer behavior, and explore fundamental marketing principles. In the elective courses, students can tailor their focus with a variety of specialized topics.

Admissions & Policies

Policies

At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

For policies governing all minors, see AP.5.3.4 Minors. The School of Business residency requirement for this minor supersedes the university requirement: at least nine credits must be earned at Mason.

This minor is available to all non-Marketing majors at the University with a minimum of sophomore standing.

Operations and Supply Chain Management Minor

Banner Code: OSCM

Phone: 703-993-1880
Website: business.gmu.edu

Administration

- Jeremy Plotnick, Director of Minor Programs

With the expanding global marketplace, multi-echelon supply chains span countries across the globe. The fusion of online and offline channels have given rise to omni-channel strategies adopted by major companies and there is a large demand for analysts and professionals in procurement, distribution, process improvement, logistics, and supply chain management. Specifically, the Metro DC region with its enormous federal government footprint and concomitant supply chain/logistics providers, demands professionals with supply chain management related skills; even in those who may not be majoring in that area. The OSCM minor offers students a focused set of courses that provide them the knowledge, training, and skills in supply chain management. Students with an OSCM minor will learn how to efficiently and effectively manage the activities involved in transforming organizational resources into customer value. They will be able to provide innovative and value-added solutions to organizations in the areas of process improvement, quality management, project management, supply chain analytics, and global supply chain design, coordination, and implementation.

Admissions & Policies

Policies

At least eight credits must be unique to the minor and not applied toward any other major, minor, or concentration. Students must achieve a grade of C or better in each course that is applied toward the minor.

Real Estate Development, MS

Banner Code: BU-MS-REAL

Graduate Program Office

Phone: 703-993-8006
Email: sbusgrad@gmu.edu

Administration

- Carolyn Grimsley, Director, MS in Real Estate Development

The Master of Science in Real Estate Development is designed to provide real estate professionals with the knowledge essential to assume increasingly responsible leadership roles within the development

industry. Areas of emphasis include real estate finance, investment analysis, project management, sustainability and economic development. The distinctiveness of this degree program lies in its multi-disciplinary curriculum, which incorporates coursework from the domains of business, engineering and public policy. Created in consultation with leading real estate development companies, the curriculum has been designed to strengthen the employment potential and upward mobility of industry professionals working in the areas of development, architecture, engineering, public planning, construction management, real estate finance, mortgage lending, property management, real estate law and related fields.

Admissions & Policies

Admissions

Requirements

All students registering for School of Business graduate courses must have graduate standing. Non degree student status is not available.

Full eligibility and admission requirements can be viewed here (http://business.gmu.edu/masters-in-real-estate-development/admissions/).

Policies

The 36-hour curriculum includes 21 hours of required courses and 15 hours of electives. Students are responsible for familiarization and compliance with AP.6 Graduate Policies.

Requirements

Degree Requirements

Total credits: 36

Required Courses

Code	Title	Credits

Email: sbusgrad@gmu.edu

Administration

- Candace Deans, Director, MS in Technology Management Program

The Master of Science in Technology Management is designed to provide students with a graduate management education that will help them further their leadership careers in technology and technology-oriented businesses and organizations. With technology innovation and commercialization occurring at an increasing pace and industries becoming more networked and global, business success depends on the successful management of technology. Companies are succeeding with rapid innovation, insightful technology integration, creation of focused technology organizations, and skillful management of complexity. The program addresses how to succeed in this marketplace and emphasizes leadership and management; special considerations of technology innovation, commercialization, introduction, and integration; and methods and approaches of systems thinking.

The program, designed for working professionals, starts in January and lasts for 16 months. Classes are held on the Arlington Campus on Saturdays from 8 a.m. to 5 p.m. The program is 36 credits and includes a capstone project and an international residency. The international residency is approximately 8 days abroad focusing on global topics in technology management.

Admissions & Policies

College Code: VS

The Volgenau School of Engineering delivers a transformative learning experience to its students by integrating engineering and technology with other areas of scholarship. We produce visionary stewards of society who are prepared to discover solutions to complex global challenges and make the world safer, cleaner, and more prosperous. A faculty of engaged educators lead high-impact research in critical areas, including sustainability, big data, cybersecurity, robotics and artificial intelligence, signals and communications, and healthcare technology. These existing and emerging areas of expertise span departmental and disciplinary boundaries and reflect the breadth of the scholarly activities of our faculty and students.

The Volgenau School of Engineering prepares students to solve complex, multidisciplinary, global challenges by leveraging innovative learning tools, the inventive capacity of our region, and Mason's global presence. The faculty and administration support the needs of the 21st century learner by providing multiple paths to success, a diverse and inclusive academic community, and real time integration of new data and technology in the classroom.

A proposal for a reorganization of the Volgenau School of Engineering to the College of Engineering and Computing, comprised of the School of Computing and Volgenau School of Engineering, is pending approval. As of April 1st, the proposal for the College of Engineering and Computing has been approved. The remaining reorganization is still pending.

Undergraduate Programs

Bachelor of Science Programs

Our undergraduate degree programs prepare students to enter directly into professional employment or continue studies at the graduate level. The requirements for the bachelor's degrees include required and elective courses in mathematics, humanities, Mason Core, and specialty courses applicable to the major. Each program strongly emphasizes English composition and communication.

The Volgenau School offers the following Bachelor of Science programs:

- Applied Computer Science
- Bioengineering
- Civil and Infrastructure Engineering
- Computer Engineering
- Computer Science
- Cyber Security Engineering
- Electrical Engineering
- Information Technology
- Mechanical Engineering
- Statistics
- Systems Engineering

Minors

Minors are available in aviation flight training and management, bioengineering, computer science, data analysis, environmental engineering, information technology, mechanical engineering, software engineering, statistics, and systems engineering.

BS/Accelerated MS Programs

Accelerated master's degree programs offer high-achieving Mason undergraduates the opportunity to complete their bachelor's and master's degrees within five years. Qualified candidates take advantage of a streamlined master's application process with no application fee and the ability to take up to 12 graduate credits at the undergraduate tuition rate.

Graduate Programs

Master of Science Programs

The ever-increasing complexity and technical challenges in engineering, computer science, and information technology demand studies beyond the bachelor's degree.

The Volgenau School offers the following master's programs:

- Applied Information Technology
- Bioengineering
- Biostatistics
- Civil and Infrastructure Engineering
- Computer Engineering
- Computer Science
- Cyber Security Engineering
- Data Analytics Engineering
- Digital Forensics
- Electrical Engineering
- Information Security and Assurance
- Information Systems
- Operations Research
- Software Engineering
- Statistical Science
- Systems Engineering
- Telecommunications

Doctor of Philosophy Programs

PhD students will gain comprehensive knowledge in their area of study and will be prepared for careers in higher education and scientific research. They are required to demonstrate a comprehensive

understanding and complete research that adds significantly to the body of knowledge in engineering, computer science, information technology, or statistics.

The Volgenau School offers seven doctoral programs:

- Bioengineering
- Civil and Infrastructure Engineering
- Computer Science
- Electrical and Computer Engineering
- Information Technology
- Mechanical Engineering (program in development)
- Statistical Science
- Systems Engineering and Operations Research

Cardinal Education

Cardinal Education (formerly the Commonwealth Graduate Engineering Program/CGEP) is the premier provider of high-quality post-baccalaureate online engineering education in the Commonwealth of Virginia. It is designed for practicing engineers, computing, and information scientists interested in maintaining and enhancing their skills through the pursuit of an online degree or certificate. Participating universities are: George Mason University, Old Dominion University, University of Virginia, Virginia Commonwealth University, Virginia State University, and Virginia Tech. Offerings include master's degrees and certificate programs.

While each program is based at one of the six participating universities, the collaboration between universities allows students more flexibility, potential shorter time to completion, and greater variety in course offerings. A substantial number of course requirements can be taken at any of the six participating universities to satisfy the degree or certificate program.

Students interested should begin by applying directly to the university offering the degree of interest. Mason has a number of degree and certificate programs available through Cardinal Education. These programs follow all policies stated in this catalog for the program, while also allowing up to 50 percent of non-core required credits to be completed at other Cardinal Education participating universities. Faculty advisor approval is needed when taking courses at a partner university.

Policies for other universities' programs and courses are determined by those institutions. Please consult with the university offering the program or course of interest for details.

For more information including the Mason programs available through this partnership, visit the Cardinal Education website.

Requirements & Policies

Undergraduate Requirements

Degree Requirements

The following general requirements must be completed by all undergraduate students:

- At least 120 credits of academic work including at least 45 credits of upper-level courses (numbered 300 or above);
- At least 6 credits of English composition, 3 credits of literature, and 3 credits of oral communication (Mason Core courses);
- At least 3 credits of arts, 3 credits of Western civilization or world history, 3 credits of social and behavioral science, and 3 credits of global understanding issues (Mason Core courses);

All requirements are listed in the sections for specific Volgenau School majors. These include university requirements for mathematics, natural science, information technology and computing, and synthesis. Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments.

Undergraduate Policies

Academic Policies

Students should become familiar with the Academic Policies in the University Catalog in addition to policies specific to each academic unit. The Academic Policies also list additional university requirements for minor programs and double majors.

Academic Appeal of Policies and Actions

A student's instructor, academic advisor and/or department can resolve most academic issues. If, however, an undergraduate student disagrees with a decision at the department level and feels that there may be reasonable grounds for appeal, the student should contact the Volgenau School Undergraduate Student Services Office at 703-993-1511 for guidance in preparing a request to the Associate Dean for Undergraduate Programs or other offices as appropriate. Information about grade appeals is found in AP.3.9 Grade Appeals.

Academic Progression

Students majoring in Volgenau School programs are expected to have an acceptable plan of study on file, formulated with assistance from their departmental advisor. They are expected to make reasonable progress toward their degree during each semester in which they are enrolled.

Termination from a major—or from all majors in a college—may be imposed as a result of excessive repeating of required courses without achieving the minimum standard, and for other evidence of continued failure to make adequate progress toward declaration or completion of the major. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4)

Sample Schedules

Sample schedules that fulfill degree requirements for individual programs within the Volgenau School are available from the departments.

Change of Major

1. Criteria for freshman students in their first semester at Mason

Freshman students who have been admitted to any VSE engineering or computer science program may change their major to any other engineering or computer science program before the final drop deadline of their first semester at Mason.

Freshman students who have been admitted to Information Technology, Statistics, VSE Undeclared, VSE Undecided, or any non-VSE major must have departmental approval to change their major to a VSE program before the final drop deadline of their first semester at Mason.

Any change of major requests made after this deadline are bound to the change of major criteria outlined in section 3 and require the completion of at least one semester at Mason.

2. Criteria for transfer students in their first semester at Mason

Transfer students who have been admitted to any VSE engineering program may change their major to any other engineering program before the final drop deadline of their first semester at Mason.

Transfer students who have been admitted to Computer Science, Information Technology, Statistics, VSE Undeclared, or any non-VSE major must have department approval to change their major to a VSE program before the final drop deadline of their first semester at Mason.

Any change of major requests made after this deadline are bound to the change of major criteria outlined in section 3 and require the completion of at least one semester at Mason.

3. Criteria for students who have completed at least one semester at Mason

Students who have completed at least one semester at Mason and who are considering changing their major to any VSE engineering program should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students must have successfully completed MATH 114, PHYS 160 and PHYS 161 (with a grade of at least C) and should have a minimum Mason GPA of 2.75* in all technical coursework. Technical coursework refers to any math, physics, engineering, statistics and computer sciences courses completed thus far at Mason and that are applicable to the intended engineering major. At least 6 credits of these technical courses should have been completed successfully at Mason.

*Students considering changing their major to Bioengineering with a Pre-Health concentration need to meet the above VSE engineering program requirements furthermore with a minimum Mason GPA of 3.00.

Students considering changing their major to Applied Computer Science, Computer Science, Information Technology, or Statistics should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students need to meet the criteria for that program as defined in the change of major section for that program in the catalog. Minimum GPA requirements stated for those programs are based on courses taken at Mason.

Exceptions to the policy may only be granted at the discretion of the chair or associate chair of the department.

Undecided Students in the Volgenau School of Engineering

Students who are undecided about their specific major may select Volgenau School Undecided as their major. This should be done as soon as possible after a student enrolls at Mason. Students will be advised to follow an initial semester or two of courses that could be applicable to majors that are of interest to them. This may involve taking courses that help the student better understand different engineering and computing areas, but which may not contribute to the total credits needed for the major they eventually choose.

VSE Undecided students are advised by the VSE Undeclared Academic Advisor and occasionally by the Coordinator of Undergraduate Academic Advising in the Student Services Office. Students should seek advising at least once each semester.

Undeclared Students in the Volgenau School of Engineering

Students who apply to a VSE major but do not meet major admissions criteria will be accepted into VSE Undeclared. These students will become eligible to declare a VSE major after meeting specific requirements as determined by that particular major. Students will be advised to follow an initial semester or two of courses that would be applicable to the major they plan to declare.

VSE Undeclared students are advised by the VSE Undeclared Academic Advisor and occasionally by the Coordinator of Undergraduate Academic Advising in the Student Services Office. Students should seek advising at least once each semester.

Writing-Intensive Requirement

The university requires all undergraduate students to successfully complete a course, or a combination of courses, designated "writing intensive" in their majors at the 300 level or above. To determine the writing-intensive course requirements for specific degrees, refer to the major program descriptions in the following department sections.

Restricted Courses

Students are encouraged to take advantage of the many excellent courses available to broaden their educational experience or strengthen their background; however, some credits earned may not satisfy any degree requirements. Degree requirements for Volgenau School undergraduate programs may not include credits earned in military science. At most 3 credits of 100-level RECR coursework may be taken to satisfy the degree requirements of those VSE programs that allow general electives. Whenever there is uncertainty, students must consult with an academic advisor in their department.

Online Education Programs

In order to increase access to Volgenau School education while meeting the needs of the School's student population, select degree programs and courses may be completed via online education. All academic policies and procedures apply to online education programs and courses as referred to in the appropriate sections of this catalog. Some instructors may require exams and/or other meetings to take place in a proctored or on-campus environment. Students should contact the instructor concerning these requirements if not explicitly stated on Patriot Web. Space permitting and if desired, students enrolled in the online sections are also permitted to attend the instructor's campus-based classroom section if offered during the same semester.

For more information about the Volgenau School programs available online, visit Mason Online (http://masononline.gmu.edu/).

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result

in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Graduate Policies

Admission

Admission decisions are made by the faculty committee or graduate coordinator of the respective graduate program. Denial of admission is not subject to appeal. Applicants denied admission to a program are not permitted to enroll in courses in that graduate program, though they may apply for either non-degree status or admission to another degree program.

If an applicant is offered graduate admission, the college reserves the right to withdraw that offer of admission if:

- During his or her academic studies, the admitted applicant has a significant drop in academic performance in the degree required for completion prior to admission to VSE graduate studies, or fails to graduate with a degree prior to the first day of classes for the term admitted.
- There has been a misrepresentation in the application process.
- Prior to the first day of classes for the term admitted, the school learns that the admitted applicant has engaged in behavior that indicates a serious lack of judgment or integrity, irrespective of the outcome of any disciplinary process related to such behavior.
- Students admitted to an accelerated master's program do not maintain satisfactory progress in his or her undergraduate program, do not receive a minimum grade of "B" in the graduate classes taken as an undergraduate, or otherwise does not meet the conditions specified on the application and admission letter.

The university further reserves the right to require the applicant to provide additional information (and/or authorization for the release of information) about any such matter.

Academic Policies

Students are responsible for becoming familiar and complying with the Academic Policies (https://catalog.gmu.edu/policies/academic/) in the University Catalog in addition to policies specific to the School. A handbook for VSE Graduate Students is maintained online (https://volgenau.gmu.edu/about/current-student-resources/vse-graduate-student-handbook/) with graduate-specific Volgenau information.

Academic Progression

Graduate students must make satisfactory progress toward a degree. At a minimum, this requires maintaining enrollment in at least one term per academic year and achieving a cumulative GPA of 3.0 or higher. Inability to make satisfactory progress toward a degree may result in academic termination (https://catalog.gmu.edu/policies/academic/graduate-policies/). Academic programs of study are entitled to enforce more stringent criteria which may include specific grade requirements in courses, successful completion of doctoral qualifying exams, etc. Please refer to your program for additional information.

Concentration

Students electing a degree concentration, post-admission, must do so in consultation with the graduate program advisor, via formal paperwork approved by the department/school, submitted and processed by the Registrar. It is the student's responsibility to ensure that their intended concentration is reflected on their transcript prior to graduation.

Doctoral Change of Program

Students in Volgenau School of Engineering doctoral programs are not permitted to change doctoral programs without a new, formal PhD admission application submitted in accordance with the established requirements and deadlines.

Non-degree

Students may decide to apply for Non-Degree status for a number of reasons, including for life-long learning, to take pre-requisite courses, to reacclimate to the environment of higher education or to begin taking classes while they apply to a specific degree program.

University Policy on Non-Degree Student Status can be found in AP.6.4.1. (https://catalog.gmu.edu/policies/academic/graduate-policies/) The Volgenau School of Engineering allows a maximum of 12 credits taken in non-degree status can be transferred to a Master's degree program; but only 3 credits to a Certificate program and does not permit non-degree graduate students to take classes numbered 700 or higher.

Readmission

Graduate students who have been terminated or have resigned from a program in the Volgenau School and want to reapply to the same program must wait five (5) semesters (Fall/Spring) before submitting a new application for admission. A full application for admission as well as all application materials required of that program must be submitted (or resubmitted). GRE scores, if required, cannot be older than five years. Previous admission to a program does not guarantee readmission to the same program. The circumstances of the prior termination or resignation will be a factor in the decision-making process. Graduate credit earned prior to termination may be applied to the degree program subject to meeting the requirements are satisfied for Transfer of Credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Online Education Programs

In order to increase access to Volgenau School education while meeting the needs of the School's student population, select degree programs and courses may be completed via online education. All academic policies and procedures apply to online education programs and courses as referred to in the appropriate sections of this catalog. Some instructors may require exams and/or other meetings to take place in a proctored or on-campus environment. Students should contact the instructor concerning these requirements if not explicitly stated on Patriot Web. Space permitting and if desired, students enrolled in the online sections

are also permitted to attend the instructor's campus-based classroom section if offered during the same semester.

For more information about the Volgenau School programs available online, visit Mason Online (http://masononline.gmu.edu/).

Termination

University policy on Academic Termination can be found in AP.6.6.2 (https://catalog.gmu.edu/policies/academic/graduate-policies/). School specific process and criteria can be found in the VSE Graduate Student Handbook. (https://volgenau.gmu.edu/about/current-student-resources/vse-graduate-student-handbook/)

Academic Units

- Department of Bioengineering
- Department of Computer Science
- Department of Cyber Security Engineering
- Department of Electrical and Computer Engineering
- Department of Information Sciences and Technology
- Department of Mechanical Engineering
- Department of Statistics
- Department of Systems Engineering and Operations Research
- Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Interdisciplinary Programs

Data Analytics Graduate Certificate

Banner Code: VS-CERG-DNIC

Phone: 703-993-6269
Email: datamine@gmu.edu

The Data Analytics Graduate Certificate allows students to obtain a basic foundation of knowledge and skills in data analytics engineering. These foundation courses provide the student with an understanding of the following concepts:

• Data, data quality, and large volumes of data

• Data management and data mining

• Modeling and model usage for making decisions

• Statistical methods and visualization

Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree from a regionally accredited program with an earned GPA of 3.00 or better in their 60 highest-level credits. Applicants are expected to have completed a degree in engineering, business, computer science, statistics, mathematics, or information technology, with demonstrated foundational competence in calculus, statistics, and computer programming. Applicants without that formal academic preparation but with clear evidence of strong and extensive work experience in data or analytics, may also be considered on a case by case basis. Current graduate students in the Volgenau School of Engineering and the School of Business can elect this certificate with the Graduate Secondary Certificate Program Application from the Office of the University Registrar (http://registrar.gmu.edu).

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a part-time basis only.

Coursework

Students must achieve a total GPA of at least 3.00, with no more than three credits of a grade of C from the following courses.

Code	Title	Credits
AIT 580	Analytics: Big Data to Information	3
CS 504	Principles of Data Management and Mining	3
OR 531	Analytics and Decision Analysis	3
STAT 515	Applied Statistics and Visualization for Analytics	3
Total Credits		12

Data Analytics Engineering, MS

Banner Code: VS-MS-DAEN

Phone: 703-993-6269
Email: datamine@gmu.edu

The MS in Data Analytics Engineering is a multidisciplinary degree program in the Volgenau School of Engineering, and is designed to provide students with an understanding of the technologies and methodologies necessary for data-driven decision-making. Students study topics such as data mining, information technology, statistical modeling, predictive analytics, optimization, risk analysis, and data visualization. It is aimed at students who wish to become data scientists and analysts in finance, marketing, operations, business/government

intelligence and other information intensive groups generating and consuming large amounts of data.

Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree from a regionally accredited program with an earned GPA of 3.00 or better in their 60 highest-level credits. Applicants are expected to have completed a degree in engineering, business, computer science, statistics, mathematics, or information technology, with demonstrated foundational competence in calculus, statistics, and computer programming. Applicants without that formal academic preparation but with clear evidence of strong and extensive work experience in data or analytics, may also be considered on a case by case basis. DAEN 500 Data Analytics Fundamentals may be required for domestic students without a basic foundation in Data Analytics.

For each of the concentrations there are additional admission requirements. These are listed in the descriptions of the individual concentrations.

In addition to fulfilling Mason's admission requirements for graduate study, applicants must provide:

- Two letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant's professional or academic accomplishments.
- Resume.
- Detailed statement of career goals and professional aspirations.
- Completed self-evaluation form.
- If the applicant's native language is not English, proof of English Proficiency Exam Score (https://www2.gmu.edu/admissions-aid/apply-now/how-apply/graduate/standardized-test-information/), if applicable.

Policies

Students are strongly encouraged to meet with their academic advisor during their first semester and design an approved plan of study. Students should seek out their advisor when questions arise and when their plan of study needs to be revised. Any changes to the plan of study are to be approved by the DAEN advisor.

Requirements

Degree Requirements

Total credits: 30

Core Courses

The following core coursework covers the basic elements of data analytics at the graduate level.

Code	Title	Credits
AIT 580	Analytics: Big Data to Information	3
CS 504	Principles of Data Management and Mining [1]	3
or CS 584	Theory and Applications of Data Mining	
DAEN 690	Data Analytics Project	3
OR 531	Analytics and Decision Analysis	3
or OR 541	Operations Research: Deterministic Models	
STAT 515	Applied Statistics and Visualization for Analytics [2]	3
or STAT 554	Applied Statistics I	
Total Credits		15

1 CS 504 Principles of Data Management and Mining (for all concentrations except Data Mining) or CS 584 Theory and Applications of Data Mining (for the Data Mining concentration only)

2 STAT 515 Applied Statistics and Visualization for Analytics (for all concentrations except Statistics for Analytics) or STAT 554 Applied Statistics I (for the Statistics for Analytics concentration only)

Concentrations

Students can elect a concentration that corresponds to a specialized technical area. Students not interested in a concentration can work with an advisor to select 15 credits of electives from among courses allowed in all the concentrations.

Available Concentrations

- Concentration in Applied Analytics (APAN)
- Concentration in Bioengineering (BIOE)
- Concentration in Business Analytics (BUSA)
- Concentration in Cyber Analytics (CYBA)
- Concentration in Data Mining (DTM)
- Concentration in Financial Engineering (FNNE)
- Concentration in Health Data Analytics (HDAN)
- Concentration in the Internet of Things (INOT)
- Concentration in Predictive Analytics (PRAN)
- Concentration in Statistical Analytics (STLA)

Concentration in Applied Analytics (APAN)

Focuses on the practical elements of adapting big data approaches to common analytic problems and government operations.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Code	Title	Credits
IT 106	Introduction to IT Problem Solving Using Computer Programming	3
MATH 108	Introductory Calculus with Business Applications (Mason Core)	3
STAT 250	Introductory Statistics I (Mason Core)	3

Required Concentration Courses

Code	Title	Credits
AIT 524	Database Management Systems	3
Select four from the following:		12
AIT 582	Metadata Analytics for Big Data	
AIT 590	Topics in Applied Information Technology	
AIT 614	Big Data Essentials	
AIT 622	Determining Needs for Complex Big Data Systems	
AIT 624	Knowledge Mining from Big-Data	

AIT 664	Information: Representation, Processing and Visualization
AIT 726	Natural Language Processing with Deep Learning
AIT 736	Applied Machine Learning
DAEN 698	Data Analytics Research Project
Total Credits	15

Concentration in Bioengineering (BIOE)

Focuses on data collection from medical devices/sensors and conditioning, filtering, extraction, and preparing the data.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Code	Title	Credits
BENG 320	Bioengineering Signals and Systems	3
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 213	Analytic Geometry and Calculus III	3
MATH 214	Elementary Differential Equations	3
STAT 346	Probability for Engineers	3

Note:

Domestic students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

Required Concentration Courses

Code	Title	Credits
BENG 501	Bioengineering Research Methods	3
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 535	Digital Signal Processing	3
Select one from the following:		3
BENG 526	Neural Engineering	
BENG 538	Medical Imaging	
BENG 550	Advanced Biomechanics	
DAEN 698	Data Analytics Research Project	
ECE 537	Introduction to Digital Image Processing (DIP)	
Total Credits		15

Concentration in Business Analytics (BUSA)

Students will learn to effectively analyze data through the hands-on use of decision modeling and other techniques using popular software tools. This concentration utilizes a wide array of methodologies and techniques — from data collection, organization, reporting and mining to extraction of useful and actionable information for decision makers.

Additional Admission Requirements

Students entering the program must have successfully completed STAT 515 Applied Statistics and Visualization for Analytics or STAT 554 Applied Statistics I with a grade of B or better.

Required Concentration Courses

Code	Title	Credits
GBUS 738	Data Mining for Business Analytics	3
Select four from the following:		12
GBUS 720	Marketing Analytics	
GBUS 721	Marketing Research	
GBUS 739	Advanced Data Mining for Business Analytics	
GBUS 740	People Analytics	
GBUS 744	Fraud Examination	
Total Credits		15

Concentration in Cyber Analytics (CYBA)

Deals with the process of acquiring, extracting, integrating, transforming, and modeling data with the goal of deriving useful information that is suitable for presentation in a court of law. Digital forensics is a key component in criminal, civil, intelligence, and counter-terrorism matters. Students will be able to apply data analytics to such areas as digital media, intercepted (network) data, mobile media, unknown code, and leverage that analysis in order to determine, intent, attribution, cause, effect, and context.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Code	Title	Credits
Computer Operating Systems		
CYSE 211	Operating Systems and Lab	3
Computer Networking		
IT 341	Data Communications and Network Principles	3
or TCOM 535	The TCP/IP Suite of Internet Protocols	
IT 445	Advanced Networking Principles	3
or TCOM 515	Internet Protocol Routing: Lecture and Laboratory Course	

Note:

Domestic students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

Required Concentration Courses

Code	Title	Credits
DFOR 510	Digital Forensics Analysis	3
DFOR 660	Network Forensics	3
Select three from the following:		9
DAEN 698	Data Analytics Research Project	
DFOR 661	Digital Media Forensics	
DFOR 663	Operations of Intrusion Detection for Forensics	
DFOR 664	Incident Response Forensics	

DFOR 698	Independent Reading and Research
DFOR 761	Malware Reverse Engineering
DFOR 762	Mobile Device Forensics
DFOR 763	Registry Forensics - Windows
DFOR 767	Penetration Testing in Digital Forensics
DFOR 768	Digital Warfare
DFOR 780	Advanced Topics in Digital Forensics
ECE 527	Learning From Data
Total Credits	15

Concentration in Data Mining (DTM)

Aimed at students who are interested in understanding data mining, advanced database systems, MapReduce programming, pattern recognition, decision guidance systems, and Bayesian inference as they relate to data analytics.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Code	Title	Credits
CS 310	Data Structures	3
CS 330	Formal Methods and Models	3
CS 367	Computer Systems and Programming	4
CS 465	Computer Systems Architecture	3
MATH 125	Discrete Mathematics I (Mason Core)	3

Note:

Domestic students with some deficiencies in preparation may be admitted provisionally pending completion of foundation courses in mathematics or computer science. Undergraduate credit earned for this purpose may not be applied toward the graduate degree.

Required Concentration Courses

Code	Title	Credits
CS 657	Mining Massive Datasets with MapReduce	3
Select four from the following: [1]		12
CS 550	Database Systems	
CS 580	Introduction to Artificial Intelligence	
CS 650	Advanced Database Management	
CS 688	Machine Learning	
CS 775	Advanced Pattern Recognition	
CS 782	Advanced Machine Learning	
CS 787	Decision Guidance Systems	
DAEN 698	Data Analytics Research Project	
INFS 623	Web Search Engines and Recommender Systems	
INFS 740	Database Programming for the World Wide Web	
SYST 664	Bayesian Inference and Decision Theory	
Total Credits		15

[1] Note: all prerequisites must be met.

Concentration in Financial Engineering (FNNE)

The concentration emphasizes both analytical and practical aspects of financial and econometric data analytics. Students are expected to demonstrate proficiency in several quantitative modeling disciplines. Students are also expected to understand issues relevant to practical aspects of investment and hedging decision making, derivative valuation, and risk analysis. Students will learn the techniques to analyze large financial and economic data to derive meaningful knowledge, which will be useful for developing effective business and risk mitigation strategies and making sound financial, marketing, and investment decisions. The concentration prepares students for careers in business analytics with a focus on practical applications in financial operations, investment, and risk mitigation strategy development.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Code	Title	Credits
CS 112	Introduction to Computer Programming	4
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
STAT 344	Probability and Statistics for Engineers and Scientists I	3

Required Concentration Courses

Code	Title	Credits
SYST/OR 538	Analytics for Financial Engineering and Econometrics	3
SYST/OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	3
SYST/OR 688	Financial Systems Engineering II: Derivative Products and Risk Management	3
Select two from the following:		6
DAEN 698	Data Analytics Research Project	
OR 541	Operations Research: Deterministic Models	
OR 542	Operations Research: Stochastic Models	
OR 604	Practical Optimization	
OR 645	Stochastic Processes	
SYST/OR 568	Applied Predictive Analytics	
SYST 573	Decision and Risk Analysis	
SYST 664	Bayesian Inference and Decision Theory	
Total Credits		15

Concentration in Health Data Analytics (HDAN)

This concentration focuses on analytics for health care. It provides coverage across several data analytics areas with specific application to the health care domain.

Code	Title	Credits
HAP 720	Health Data Integration	3
HAP 725	Statistical Process Control in Healthcare	3
HAP 780	Data Mining in Health Care	3
or HAP 880	Advanced Health Data Mining	
Select two from the following:		6
DAEN 698	Data Analytics Research Project	

HAP 671	Health Care Databases
HAP 719	Advanced Statistics in Health Services Research I
HAP 730	Health Care Decision Analysis
or HAP 770	Medical Decision Making and Decision Support Systems
HAP 819	Advanced Statistics in Health Services Research II
HAP 823	Comparative Effectiveness Analysis using Observational Data
Total Credits	15

Concentration in the Internet of Things (INOT)

The focus of this concentration is driven by sensors that collect the staggering amount of data that exists today. The Internet of Things (IoT) is expanding, at a geometric level, the number of devices that collect, forward, and offer for analysis data. IOTA looks at Data Analytics from the perspective of IoT and sensors. Analog and digital sensing design and deployment, hardware options, power consumption, security, sampling and quantization, Fourier transform, time analysis, and synchronization are topics covered in this concentration.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Code	Title	Credits
CS 222	Computer Programming for Engineers	3
ECE 301	Digital Electronics	3
ECE 321	Continuous-Time Signals and Systems	3
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
STAT 346	Probability for Engineers	3

Required Concentration Courses

Code	Title	Credits
Select five courses from the following:		15
DAEN 698	Data Analytics Research Project	
ECE 508	Internet of Things	
ECE 510	Real-Time Concepts	
ECE 527	Learning From Data	
ECE 530	Sensor Engineering	
ECE 535	Digital Signal Processing	
ECE 612	Real-Time Embedded Systems	
Total Credits		15

Concentration in Predictive Analytics (PRAN)

The ultimate goal of analytics of Big Data is to derive value by suggesting effective actions for the future. Predictive analytics focuses on the methods for deciding on the best course of action, taking into account possible constraints and risks. The concentration will provide students with skills that drive effective decision making and optimization. Students will learn the techniques to analyze both structured and unstructured data to derive meaningful knowledge, which will be useful for developing effective strategies and making optimal decisions.

The concentration emphasizes both analytical and practical aspects of predictive analytics. Students are expected to master the practical aspects of modeling and methods for optimization. Students are also expected to demonstrate proficiency in decision making, design of decision support systems, and risk analysis. The program prepares students for careers in big data analytics with a focus on strategic decision making in practical applications including financial engineering, health care, transportation, and intelligence.

Additional Admission Requirements

Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Code	Title	Credits
CS 112	Introduction to Computer Programming	4
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
STAT 344	Probability and Statistics for Engineers and Scientists I	3

Required Concentration Courses

Code	Title	Credits
OR 604	Practical Optimization	3
SYST 542	Decision Support Systems Engineering	3
SYST 568	Applied Predictive Analytics	3
or OR 568	Applied Predictive Analytics	
SYST 573	Decision and Risk Analysis	3
Select one from the following:		3
DAEN 698	Data Analytics Research Project	
OR 541	Operations Research: Deterministic Models	
OR 542	Operations Research: Stochastic Models	
OR 603	Sports Analytics	
OR 610	Deep Learning for Predictive Analytics	
STAT 663	Statistical Graphics and Data Exploration I	
SYST 508	Complex Systems Engineering Management	
SYST 584	Heterogeneous Data Fusion	
SYST 664	Bayesian Inference and Decision Theory	
SYST 670	Metaheuristics for Optimization	
or OR 670	Metaheuristics for Optimization	
Total Credits		15

Concentration in Statistical Analytics (STLA)

Provides students with skills necessary for gaining insight from data. Enables students to evaluate large data-sets from a rigorous statistical perspective, including theoretical, computational, and analytical techniques. Emphasis will be placed on developing deep analytical talent in the two areas of statistical modeling and data visualization. "Big Data" are well-known to encompass high levels of uncertainty and complex interactions and relationships. To gain knowledge from these data and hence inform decisions, elucidation of the core interactions and relationships must be done in a manner that acknowledges uncertainties in order to both minimize false signals and maximize true discoveries. Statistical modeling does exactly this – it accounts for uncertainty while identifying relationships. Visualization is often a critical component of modeling, but visualization also stands alone as an important tool for presentation of information, decision analysis, and process improvement.

Additional Admission Requirements
Students entering the program should have completed the following George Mason undergraduate courses or their equivalents:

Code	Title	Credits
MATH 203	Linear Algebra	3
MATH 213	Analytic Geometry and Calculus III	3
STAT 346	Probability for Engineers	3
or MATH 351	Probability	

Required Concentration Courses

Code	Title	Credits
STAT 544	Applied Probability	3
Select four from the following:		12
DAEN 698	Data Analytics Research Project	
STAT 654	Applied Statistics II	
STAT 662	Multivariate Statistical Methods	
STAT 663	Statistical Graphics and Data Exploration I	
STAT 672	Statistical Learning and Data Analytics	
Total Credits		15

Accelerated Master's

Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS can complete both a BS-ACS and a Data Analytics Engineering, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 9 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses. For all students in the Applied Computer Science, BS program:

Code	Title	Credits
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3

Students in the Software Engineering and Bioinformatics concentrations of the Applied Computer Science, BS program may also register for:

Code	Title	Credits
CS 550	Database Systems (to replace CS 450)	3

Students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS program may also register for one or both of the following courses:

Code	Title	Credits
CS 550	Database Systems (to replace CS 450)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3

Notes:

- For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS program, one of the 500 level courses will count as an elective towards their undergraduate degree.
- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students must still take the DAEN core courses (AIT 580 Analytics Big Data to Information, OR 531 Analytics and Decision Analysis, and STAT 515 Applied Statistics and Visualization for Analytics).
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Applied Science, BAS Data Analytics Concentration/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Applied Science, BAS, Data Analytics Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/) have the option of obtaining an accelerated Data Analytics Engineering, MS. (https://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/#text)

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements

Students in the Applied Science, BAS Data Analytics (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/

applied-science-bas/#text) concentration may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. Students may begin taking the master's level courses once they have earned 75 undergraduate credits.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BAS and MS programs. The following six credits may overlap:

Code	Title	Credits
AIT 580	Analytics: Big Data to Information	3
CS 504	Principles of Data Management and Mining	3
or CS 584	Theory and Applications of Data Mining	
OR 531	Analytics and Decision Analysis	3
or OR 541	Operations Research: Deterministic Models	
STAT 515	Applied Statistics and Visualization for Analytics	3
or STAT 554	Applied Statistics I	

In addition to the six credits above, students may select up to 6 additional credits to overlap. These credits must be selected in consultation with both the BAS and DAEN advisors. Credits selected will depend on which DAEN concentration the student intends to pursue.

Bioengineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Bioengineering (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs/) and MS in Data Analytics Engineering (https://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/) with a concentration in Bioengineering in an accelerated time-frame.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students majoring in the Bioengineering, BS will be considered for admission into the BAM Pathway after completion of a minimum of 60 undergraduate credits with an overall GPA of at least 3.0. Students must have successfully completed CS 222 Computer Programming for Engineers and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Bioengineering concentration of the Data Analytics Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/) program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Data Analytics Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- A GPA of 3.0 or better in their 60 highest-level credits
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students must complete all credits that satisfy requirements for both the BS and MS programs, with up to three classes (nine credits) overlap depending on their bioengineering concentration chosen from the following graduate courses:

Code	Title	Credits
AIT 580	Analytics: Big Data to Information	3
BENG 501	Bioengineering Research Methods	3
CS 504	Principles of Data Management and Mining (in place of BENG 420)	3
OR 531	Analytics and Decision Analysis	3
STAT 515	Applied Statistics and Visualization for Analytics	3
Total Credits		15

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS program. The graduate courses may be counted as Technical Electives or, in the case of CS 504 Principles of Data Management and Mining, for BENG 420 Biomedical Data Analytics towards the Bioengineering, BS program requirements with approval by the academic advisors of both the BS and MS programs.

While still in undergraduate status, a maximum of six additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree. These reserve credits can be chosen from the list of graduate level courses given above with approval by the academic advisors of both the BS and MS programs.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students are recommended to meet with the Bioengineering academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final

undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS can complete both a BS-CS and a Data Analytics Engineering, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models .

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 9 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 550	Database Systems (to replace CS 450)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students must still take the DAEN core courses (AIT 580 Analytics Big Data to Information, OR 531 Analytics and Decision Analysis, and STAT 515 Applied Statistics and Visualization for Analytics).
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Mechanical Engineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Mechanical Engineering, BS program have the option of applying to the accelerated Data Analytics Engineering, MS program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Mechanical Engineering, BS program may apply to the accelerated Data Analytics Engineering, MS program if they have earned 60 undergraduate credits with an overall GPA of at least 3.30.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following courses:

Code	Title	Credits
AIT 580	Analytics: Big Data to Information	3
CS 504	Principles of Data Management and Mining	3
OR 531	Analytics and Decision Analysis	3
STAT 515	Applied Statistics and Visualization for Analytics	3

All graduate course prerequisites must be completed prior to enrollment. Each 500-level course must be completed with a grade of B or better to apply toward the MS program. The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. The graduate courses may be counted as Electives toward the Mechanical Engineering, BS program requirements, with approval of the Mechanical Engineering Department.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form (https://registrar.gmu.edu/forms/) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment office. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain the Statistics, BS and

the Data Analytics Engineering, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Data Analytics Engineering, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of at least 3.0.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits that satisfy requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
CS 504	Principles of Data Management and Mining	3
or CS 584	Theory and Applications of Data Mining	
OR 541	Operations Research: Deterministic Models (Credit may not be received for both OR 441 and OR 541.)	3
or OR 531	Analytics and Decision Analysis	
STAT 515	Applied Statistics and Visualization for Analytics	3
or STAT 554	Applied Statistics I	
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS program.

The graduate courses may be counted as Technical Electives toward the Statistics, BS program requirements, with approval of the Statistics Department undergraduate coordinator.

While still in undergraduate status, a maximum of six additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form (https://registrar.gmu.edu/forms/) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment office. At the completion of MS requirements, a master's degree is conferred.

Systems Engineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Systems Engineering, BS and a Data Analytics Engineering, MS in an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Systems Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.0.

For the predictive analytics and financial engineering concentrations, students must submit evidence of:

- Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.
- Familiarity with analytical modeling software, such as spreadsheets or math packages.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Data Analytics Engineering, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.0
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

These courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may *not* be applied toward the Systems Engineering, MS.

Undergraduate	Graduate	
SYST 473	SYST 573	This course applies to only certain concentrations; Credit may not be received for both courses.
OR 441	OR 541	Satisfies OR 531 core requirement in the graduate program. Credit may not be received for both courses.
SYST 438	SYST 538	This course applies to only certain concentrations; Credit may not be received for both courses
SYST 468	SYST 568	This course applies to only certain concentrations; Credit may not be received for both courses
SYST 488	SYST 588	This course applies to only certain concentrations; Credit may not be received for both courses

For the predictive analytics and financial engineering concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program. Students Bachelor of Science in Systems Engineering program are not permitted to take OR 531 Analytics and Decision Analysis.

Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, PhD

Banner Code: VS-PHD-INFT

2400 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-1504
Email: vsephd@gmu.edu

The Information Technology (INFT) PhD is a signature degree of the Volgenau School of Engineering. The program focuses on the science, engineering, and technology of information processing, an area of study ripe for innovation in a world driven more and more by data. The PhD in INFT accommodates rigorous and cross-disciplinary PhD study that does not fit with PhD program requirements of a single VSE department. The PhD in INFT includes several concentrations to provide program focus.

Admissions & Policies

Admissions

Admission is competitive. An undergraduate degree in an information technology-related area, such as engineering, computer science, operations research, mathematics, or the physical sciences is typically

required for admission. The undergraduate preparation should include, at a minimum, calculus, differential equations, linear algebra, discrete structures, probability, and statistics, in addition to computational proficiency, including experience with a variety of languages and computer hardware. Additional requirements depend on the proposed study focus.

Most successful applicants complete their master's degree before admission with a minimum GPA of 3.5. Applicants can also be considered directly from their undergraduate studies with a minimum GPA of 3.25.

Applicants wishing to switch fields from non-information technology-related academic backgrounds, especially those with extensive work experience in information technology, are encouraged to discuss opportunities for study. This path into the Information Technology, PhD program typically requires academic preparation in the formal framework and underpinning theory of information technology. Those applicants are referred to the VSE departments offering the concentrations and courses of greatest interest, prior to application.

Applicants are required to submit: an online application for admission, undergraduate and graduate transcripts from previous colleges and universities, three letters of reference (preferably from college instructors), goals statement and a résumé. Applicants are also required to submit a brief personal goals statement including the proposed research areas of interest. Admission for cross-disciplinary Information Technology, PhD study will depend on alignment with VSE faculty research expertise.

International applicants are referred to the university's English Proficiency Requirements (https://www2.gmu.edu/admissions-aid/how-apply/international/english-proficiency-requirements/). In addition, international transcripts must be translated and evaluated (course-by-course preferred) by a member of the National Association of Credential Evaluation Services (NACES). Transcripts can be evaluated by George Mason University at no extra cost to the applicant; this typically adds 6-8 weeks to the application processing time. Please review George Mason University's Policy on International Transcript Submission (https://catalog.gmu.edu/admissions/international-students/). Applications must be completed and submitted before an admission decision is made.

Policies

The general doctoral requirements of Mason apply to this program.

Degree Requirements Overview

Students must complete a minimum of 72 graduate credits. This requirement may be reduced by a maximum of 30 credits from an approved and completed master's degree. That determination requires the evaluation by, and approval of, the program director or VSE Dean or their designee, and depends on alignment of the master's degree with the proposed study focus.

Within those 72 credit hours, the program requires:

- Specialized coursework comprised of 48 credits for students with no credit for previous MS coursework. This specialized coursework requirement may be reduced to a minimum of 18 credit hours, depending on the approved credit reduction for previous graduate coursework.
- Breadth requirement, requiring completion of two Fundamental Knowledge courses, and two Qualifying Exams.
- Comprehensive exam (oral) after completion of specialized coursework.
- Development and acceptance of a research proposal plus execution of the research culminating in a public final defense. This research phase of the PhD requires 24 credit hours of:

Code	Title	Credits
Research Requirement		24
IT 990	Dissertation Topic Presentation	1
23 additional credits from the following:		
IT 998	Doctoral Dissertation Proposal	1-12
IT 999	Doctoral Dissertation (Mininimum of 12 credits required)	12

- Approval by the dissertation committee of the defense of the dissertation research in written and oral forms.

Requirements

Degree Requirements

Total credits: minimum 72

Plan of Study

Students are strongly encouraged, but are not required, to select a concentration by the end of their first year. Concentration areas are based on broad areas of faculty expertise. Students who do not choose an established concentration must be flexible in their research focus, recognizing that not all faculty are available to accept doctoral students.

Concentrations

Available Concentrations

- Information Sciences and Technology (ISTC)
- Information Security and Assurance (ISA)
- Information Systems (ISYS)
- Mechanical Engineering (ME)
- Software Engineering (SWE)

Specialized Coursework

Each student works with his or her faculty advisor or dissertation director to develop a plan of study. Successful coursework completion includes:

- A cumulative GPA of 3.50 in courses included on the plan of study, and all grades must be a B- or better.
- At least 12 credits on the plan of study must be courses numbered 700 or higher. No 500 level courses are permitted. The suggested courses for each concentration is as follows. Specific courses should be chosen with advisement of your faculty advisor.

Information Sciences and Technology (ISTC)

Code	Title	Credits
AIT 602	Introduction to Research in Applied Information Technology	
AIT 614	Big Data Essentials	
AIT 624	Knowledge Mining from Big-Data	
AIT 681	Secure Software Development	
AIT 682	Network and Systems Security	
AIT 701	Cyber Security: Emerging Threats and Countermeasures	

AIT 702	Incident Handling and Penetration Testing
AIT 711	Rapid Development of Scalable Applications
AIT 712	Applied Biometric Technologies
AIT 716	Human Computer Interaction
AIT 724	Data Analytics in Social Media
AIT 726	Natural Language Processing with Deep Learning
AIT 734	Advanced Web Analytics Using Semantics
AIT 736	Applied Machine Learning
Other VSE courses with the approval of an advisor or program director.	

Information Security and Assurance (ISA)

Code	Title	Credits
ISA 673	Operating Systems Security	
ISA 674	Intrusion Detection	
ISA 681	Secure Software Design and Programming	
ISA 697	Topics in Information Security	
ISA 763	Security Protocol Analysis	
ISA 764	Security Experimentation	
ISA 796	Directed Readings in Information Security	
ISA 862	Models for Computer Security	
ISA 863	Advanced Topics in Computer Security	
CS 700	Research Methodology in Computer Science	
Any CS, INFS or SWE course numbered 700 or higher, subject to the approval of the student's academic advisor		

Information Systems (ISYS)

Code	Title	Credits
At least 12 credits in INFS or ISA courses numbered 700 or higher as follows:		
INFS 623	Web Search Engines and Recommender Systems	
INFS 740	Database Programming for the World Wide Web	
INFS 760	Advanced Database Management	
INFS 770	Knowledge Management for E-Business	
INFS 772	Intelligent Agents and the Semantic Web	
INFS 774	Enterprise Architecture	
INFS 796	Directed Readings in Information Systems	
ISA 656	Network Security	
ISA 797	Advanced Topics in Information Security	
At least 6 credits from SWE and CS courses in Software Engineering and Computer Science: [1]		
SWE 721	Reusable Software Architectures	
SWE 763	Software Engineering Experimentation	
SWE 796	Directed Readings in Software Engineering	
SWE 821	Software Engineering Seminar	
CS 657	Mining Massive Datasets with MapReduce	
CS 688	Machine Learning	
CS 700	Research Methodology in Computer Science	
CS 782	Advanced Machine Learning	
CS 787	Decision Guidance Systems	

[1] Students without a credit reduction should select the remaining credits from any 600 level or higher INFS, ISA, CS or SWE courses or courses approved in advance by the student's academic advisor.

Mechanical Engineering (ME)

Code	Title	Credits
600/700-level courses outside the ME department (typically physics, mathematics, etc.)		
700-level courses within the ME department in subjects within the student's area of specialization		
700-level courses within the ME department in subjects outside the student's area of specialization		
ME 620	Mechanical Engineering Decision Making	
Available courses include:		
ME 621	Foundations of Fluid Mechanics	
ME 714	Fracture Mechanics	
ME 715	Impact Dynamics	
ME 721	Advanced Fluid Mechanics	
ME 722	Introduction to Turbulence	
ME 723	Compressible Flow	
ME 724	Viscoelastic Flow	
ME 725	Introduction to Computational Fluid Dynamics for Engineers	
ME 728	Foundations of Heat Transfer	
ME 732	Advanced Thermodynamics	
ME 740	Introduction to Continuum Mechanics	
ME 741	Theory of Elasticity	
ME 742	Finite Element Analysis for Solids	
ME 745	Mechanics and Properties of Materials	
ME 750	Nanomaterials Enabled Renewable Energy	
ME 751	Advanced Materials for Water Treatment	
ME 753	Tribology	
ME 754	Introduction to Nano-Materials	
ME 755	Optofluidics	
ME 762	Biosensors	

Software Engineering (SWE)

Code	Title	Credits
SWE 763	Software Engineering Experimentation	
or CS 700	Research Methodology in Computer Science	
SWE 721	Reusable Software Architectures	
SWE 737	Advanced Software Testing	
SWE 760	Software Analysis and Design of Real-Time Systems	
SWE 795	Advanced Topics in Software Engineering	

SWE 796	Directed Readings in Software Engineering
SWE 798	Research Project
Select at least 6 credits from the following:	
SWE 619	Object-Oriented Software Specification and Construction
SWE 620	Software Requirements Analysis and Specification
SWE 621	Software Design and Architecture
SWE 622	Distributed Software Engineering
SWE 631	Software Design Patterns
SWE 632	User Interface Design and Development
SWE 637	Software Testing
SWE 642	Software Engineering for the World Wide Web
SWE 645	Component-Based Software Development
SWE 681	Secure Software Design and Programming
CS 706	Concurrent Software Systems
INFS 740	Database Programming for the World Wide Web
INFS 760	Advanced Database Management
INFS 770	Knowledge Management for E-Business
INFS 797	Advanced Topics in Information Systems
ISA 656	Network Security
ISA 763	Security Protocol Analysis
ISA 764	Security Experimentation
ISA 862	Models for Computer Security

Breadth Requirement

To satisfy the breadth requirements of the PhD INFT, a student must demonstrate his/her proficiency in the foundational knowledge specific to her/his program of study. This is satisfied through completion of two Fundamental Knowledge courses, and two Qualifying Exams. The Fundamental Knowledge courses and the Qualifying Exams are described in the online guide maintained by the Volgenau School of Engineering Office of Graduate Academic Affairs. Selection of the two Fundamental Knowledge courses and the two Qualifying Exams must be approved by the student's PhD advisor and filed with the Volgenau School of Engineering Office of Graduate Academic Affairs.

Students must complete the breadth requirements within the following time limits. Students who enter the program with a 24-30 credit reduction from a prior Master's degree must satisfy all breadth requirements no later than twelve months following the end of their fourth semester in the program. Students who enter the program with a reduction of less than 24 credits must satisfy all breadth requirements no later than twelve months following the end of their sixth semester in the program. In both instances, these time limits include all attempts at the Fundamental Knowledge courses and the Qualifying Exams. Time limits apply to all PhD INFT students, regardless of their part-time or full-time study status. Failure to satisfy all breadth requirements by the specified time is cause for termination from the PhD INFT program.

Fundamental Knowledge Course Requirement:

Students are required to complete two Fundamental Knowledge courses within the first 24 months of their PhD enrollment, regardless of their part-time or full-time study status and regardless of credit reductions from previous coursework. Fundamental Knowledge courses are listed in the study guide maintained by the VSE Office of Graduate Academic Affairs. Fundamental Knowledge courses must be approved by the PhD advisor; must be specific to the student's program of study; and must be submitted to the VSE Office of Graduate Academic Affairs. These courses can be used as credit toward the student's plan of study, but will not count toward his/her 700 level minimum requirement.

Students must earn a grade of A- or better in both Fundamental Knowledge courses on their first attempt to satisfy this component of the breadth requirement. Students failing to earn a grade of A- or better on their first attempt in one or both Fundamental Knowledge courses are required to take and pass, in one attempt, supplementary Qualifying Exams described below

Qualifying Exam Requirement:

Students are required to take and pass two Qualifying Exams within the time limit defined for the breadth requirement. Qualifying Exams are listed in the study guide maintained by the VSE Office of Graduate Academic Affairs. Selection of Qualifying Exams must be approved by the PhD advisor; must be specific to the student's program of study; must not duplicate the bodies of knowledge of the student's Fundamental Knowledge courses; and must be submitted to the VSE Office of Graduate Academic Affairs.

Qualifying Exams are offered twice a year, just before the fall and spring semesters. Each exam is allocated two hours and graded on a pass or fail basis. Students must take all required Qualifying Exams in their first attempt. Students failing one or both of their Qualifying Exams on the first attempt are required to retake the Qualifying Exams they did not pass the next time the Qualifying Exams are offered. Students failing Qualifying Exams may not subsequently satisfy the breadth requirement by completing Fundamental Knowledge courses.

Students failing to earn a grade of A- or better in one or both Fundamental Knowledge courses are required to take and pass supplementary Qualifying Exams in the bodies of knowledge covered by the Fundamental Knowledge courses in which they earned a grade of less than A-. Supplementary Qualifying Exams are in addition to the two required Qualifying Exams described above. Students must pass supplementary Qualifying Exams in one attempt only.

Failure to satisfy all breadth requirements, within established time limits, regardless of part-time or full-time study status, may be terminated from the PhD INFT program.

Comprehensive Exam

The comprehensive exam is an oral exam taken after students have satisfactorily completed all coursework requirements in their approved plan of study. To initiate the exam process, the student meets with his/her dissertation advisor to prepare an Oral Comprehensive Exam Request form. This Request must be approved by the entire dissertation supervisory committee and forwarded to the associate dean for final approval. The permission form must be submitted with:

- a one page description of the intended area of research; and
- a reading list on which the student will be examined.

The reading list should include articles and/or books that cover the fundamentals, state-of-the-art, and tools needed to perform research in the intended area.

The objective of the comprehensive exam is to allow the dissertation supervisory committee to assess the student's readiness to complete doctoral research in the chosen area of concentration. The duration of the oral exam is typically two hours. Students must pass the comprehensive exam and dissertation proposal defense before advancing to candidacy. The comprehensive exam must be attempted for the first time no later than one year after completing all coursework requirements and starting the IT 998 Doctoral Dissertation Proposal sequence.

Students who fail the exam are permitted to retake it once within six weeks of notification of failure of the first attempt. Failure in the second attempt will result in termination from the program.

Research Component

Research Credit Hours

Code	Title	Credits
Research Requirement		24
IT 990	Dissertation Topic Presentation	1
23 additional credits from the following:		
IT 998	Doctoral Dissertation Proposal	1-12
IT 999	Doctoral Dissertation (Mininimum of 12 credits required)	12

Once enrolled in Dissertation Research, students must maintain continuous registration in IT 998 Doctoral Dissertation Proposal until advancement and IT 999 Doctoral Dissertation until the dissertation is complete and has been successfully submitted to the library, excluding summers, unless conferring in August. For more information please see AP.6.10.6.

Faculty Advisement

On admission to the program, students are assigned a temporary faculty advisor aligned with the research area that the student identified in his/her application. The temporary faculty advisor advises on and approves the student's initial course selection.

Ultimately, all INFT PhD students require a dissertation director who will direct the student's PhD studies, including the research. This arrangement, by mutual consent, should be agreed on before the student begins their research. Topics of potential research are determined by the expertise and interests of the faculty. The student is responsible to identify, communicate and offer proof of his/her research skills to the faculty under whom (s)he wishes to work. A student's engagement, excitement, commitment and initiative are all attributes a potential dissertation director will consider before making the decision to formally commit. The university does not manage this matching process, nor does it compel any faculty member to undertake this role for a student.

Dissertation directors and their students should arrive at an understanding of the dissertation director's expectations. This must include a clear understanding of the research topic and the courses the student must complete in support of that research. It should also include, at a minimum, a timeline for the overall planned program of study, expectations regarding technical publications and presentations arising from the research, availability of graduate student support, advising style, and the location where the student will conduct the research and when. A successful dissertation depends on shared understanding.

Students have the right to change dissertation directors. Changing dissertation directors slows academic progress, and students are discouraged from changing more than once, since demonstration of satisfactory progress on the PhD is one criterion for continuation in the program. Dissertation directors also have the right to decline or to discontinue supervising students.

Doctoral Supervisory Committee

After a student and his/her dissertation director agree to work together and file this information with the VSE Office of Graduate Academic Affairs, the doctoral supervisory committee can be formed. The doctoral supervisory committee includes the dissertation director, who must be a member of the Mason graduate faculty, and at least three other people from the Mason graduate faculty. The dissertation director and chair of a PhD INFT dissertation committee must have at least a 50% appointment in the Volgenau School. This rule does not apply to a co-director. At least three committee members must be from the Volgenau School, and at least two of the departments in the Volgenau School must be represented. Representatives from industry or government with key, related expertise may also be considered as a fifth member. However, all members of the committee must hold a terminal degree.

The doctoral supervisory committee administers the comprehensive exam, the dissertation proposal presentation evaluation, and the dissertation predefense and defense. Permission for the comprehensive exam and dissertation defense are requested from the associate dean of graduate programs within the Volgenau School by submitting the appropriate committee approved forms.

Dissertation Proposal Presentation

After successful completion of the Comprehensive Exam, doctoral students prepare a written dissertation proposal to present to the doctoral supervisory committee. Students must continuously enroll in IT 998 Doctoral Dissertation Proposal to complete this effort. While in the IT 998 Doctoral Dissertation Proposal sequence, the student should enroll in IT 990 Dissertation Topic Presentation. The dissertation proposal presentation must be at least one week after passing the comprehensive exam. After successfully completing the dissertation-proposal requirement, the student is formally admitted as a candidate for the PhD degree and must begin to continuously register for IT 999 Doctoral Dissertation. The application for candidacy is submitted to the associate dean of graduate programs on a standard form.

Dissertation and Final Defense

With the concurrence of the dissertation supervisory committee and associate dean, students proceed with the doctoral research, during which time they must be continuously enrolled in IT 999 Doctoral Dissertation. When the central portions of the research have been completed to the point that students are able to describe the original contributions of the dissertation effort, they submit the written dissertation to the committee and schedule an oral predefense to the committee. Once the committee believes the student is ready, a final public oral defense may be scheduled allowing a minimum of two weeks for the defense notification as required by the University, AP.6.10.8 (https://catalog.gmu.edu/policies/academic/graduate-policies/#text). The entire dissertation committee and the associate dean must be present at the defense, unless an exception is approved by the associate dean of graduate programs in advance of the defense.

With satisfactory evaluation of the oral defense of the dissertation by the committee, the student must submit to the library a final publishable dissertation that represents a definitive contribution to

knowledge in INFT. If the candidate successfully defends the dissertation, the dissertation committee recommends that the final form of the dissertation be completed and the Volgenau School faculty and the graduate faculty of Mason accept the candidate for the PhD degree.

If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. An additional predefense is not required, but students are strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be terminated from the program.

STEM in Society Minor (VSE)

Banner Code: STEM

The STEM in Society minor develops strategic and critical thinking capabilities to better understand how science, technology, engineering, and mathematics (STEM), as well as medicine, impact the human experience - past, present, and future. It provides a broad perspective of the STEM fields, to include how advances are developed, how they fit into the wider context of society and culture, and how historical contexts have in turn shaped advances in these fields.

The skills and competencies gained from this minor are useful to those seeking work in the tech and health care industries, as well as fields like international development and public policy or in non-profits, the government, or think tanks.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must earn a minimum grade of 2.00 in all courses applied to the minor. For policies governing all minors, see AP.5.3.4 Minors.

Department of Bioengineering

Phone: 703-993-5846
Email: bioeng@gmu.edu
Website: bioengineering.gmu.edu

Bioengineering involves the application of engineering tools and concepts to solve problems in biology or medicine. The impact of engineering on biomedicine is wide ranging, from advanced biomedical imaging technologies to discovering new diagnostic devices and targeted therapeutics. With an aging population, the growing costs of health care, and the impact of novel technology to fundamental understanding in biosciences, the demand for bioengineers is growing. This program provides students with a solid foundation in engineering while offering in-depth exposure to the life sciences. Bioengineering faculty members collaborate with colleagues at George Mason University and nearby institutions including Inova Health Center, and federal laboratories such as the Naval Research Laboratory, the National Institutes of Health Clinical Center, and the National Institute of Standards and Technology. Research areas include:

- biomechanics
- biomedical imaging
- neuroengineering
- computational neuroscience
- microfabricated devices
- nanomedicines
- biomaterials
- tissue engineering

Available Programs

Bioengineering, BS

The BS in Bioengineering is a challenging multidisciplinary training program with the goal of enabling graduates to be competitive for an entry-level position in the biomedical industry or to continue their education in graduate school or medical school. The curriculum provides a strong background in the biological and engineering fundamentals of bioengineering as well as upper level courses in areas of biomedical measurements, biomedical systems modeling, and bioinformatics. The department offers six concentrations: Bioengineering Healthcare Informatics, Bioengineering Prehealth, Biomaterial and Nanomedicine, Biomedical Imaging and Devices, Computational Biomedical Engineering, and Neurotechnology and Computational Neuroscience. In addition the Bioengineering, BS program offers an Honors Program to outstanding students. Entry is by invitation and based on academic performance achieved at Mason.

Bioengineering, MS

The Bioengineering, MS prepares students for research and professional practice in bioengineering and related fields. The program comprises four core areas: Biomaterial and Nanomedicine, Biomedical Imaging and Devices, Computational Biomedical Engineering, and Neurotechnology and Computational Neuroscience while offering three different options. Students can choose to focus their graduate work toward a career in academia (thesis option), or in industry (practicum or coursework option).

Bioengineering, PhD

The Bioengineering, PhD is a research-intensive, multifaceted program which is comprised of four different concentrations: Biomaterial and Nanomedicine, Biomedical Imaging and Devices, Computational Biomedical Engineering, or Neurotechnology and Computational Neuroscience. Students can choose to focus their graduate work in one of the above mentioned concentrations.

- Bioengineering, PhD

Bioengineering Minor

Banner Code: BIOE

Website: bioengineering.gmu.edu/

The minor in Bioengineering is available to both engineering and non-engineering majors. It provides considerable opportunities in a highly cross-disciplinary field involving the application of engineering concepts and tools to solve problems in biomedicine. The minor in Bioengineering prepares students to gain and reinforce their knowledge of biology and engineering fundamentals, and develop and apply skills to clinically-relevant challenges.

Admissions & Policies

Admissions

Students must have completed MATH 114 Analytic Geometry and Calculus II with a grade of B- or better to be admitted to the minor.

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 19-21

Academic Advising

Phone: 703-993-4190
Email: cborke@gmu.edu
Website: https://bioengineering.gmu.edu/academics/bachelor-science-bioengineering

Bioengineering, also referred to as biomedical engineering, is the application of engineering tools and approaches to solve problems in biology and medicine. It is a broad and growing field that draws upon rapid advances in technology and computation, as well as on unprecedented growth in basic biological understanding.

This program provides i) a scientific foundation in math, physics, biology, chemistry and physiology; ii) broad introductions to bioengineering technology platforms of medical imaging, devices, computational biomedical engineering, computational neuroscience and neurotechnology, biomaterials and nanomedicine, and health care informatics followed by a deepening of knowledge in at least one of these areas through a chosen concentration; and iii) translational courses

showing how new technologies can be implemented in clinical medicine and be commercialized by industry partners.

Engineering design experiences are built into each year of the curriculum culminating in a senior design project. The impact of engineering, technologies and computer science on biomedicine is immense, and can only be harnessed through integrative multidisciplinary training in Bioengineering. With the growing demand for better health care, the need for bioengineers is expected to be high.

The multidisciplinary training in this field makes graduates competitive for positions in government and in biomedical industry. The BS in Bioengineering also enables students to continue their education in graduate school or medical school.

Accreditation

The bachelor's program in Bioengineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org (https://www.abet.org/).

Program Educational Objectives

Graduates of the Bioengineering bachelor's program are expected within 3-5 years of graduation to:

1. Contribute to the development or application of health-related products or processes that are a benefit to society.
2. Continue their formal education by making demonstrable progress toward an advanced degree or professional development milestone.
3. Communicate and perform effectively as members and/or leaders of multidisciplinary teams.

Concentrations

The concentrations in the BS Bioengineering program are:

- Bioengineering Healthcare Informatics (BHI)
- Bioengineering Prehealth (BMPH)
- Biomaterials and Nanomedicine (BNM)
- Biomedical Imaging and Devices (BMID)
- Computational Biomedical Engineering (CBME)
- Neurotechnology and Computational Neuroscience (NTCN)

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Advising

All Bioengineering students are required to meet with their departmental academic advisor prior to course registration each semester. Students who are considering bioengineering as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising in 2500 Nguyen Engineering Building.

Change of Major

See Change of Major for more information.

Writing-Intensive Requirement

Mason's writing-intensive requirement is satisfied by BENG 360 Biomedical Imaging, in which faculty provide feedback on student writing assignments.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements

Total credits: 122-134

Students must complete each BENG, BIOL, CHEM, CS, ECE, ME course presented as part of the required credits for the degree with a grade of C or better.

Required Courses

Mathematics and Statistics

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II [2]	4
MATH 203	Linear Algebra [3]	3
MATH 213	Analytic Geometry and Calculus III	3
MATH 214	Elementary Differential Equations [2]	3
STAT 360	Introduction to Statistical Practice II	3
Total Credits		20

1. All students in the Bioengineering program are required to register for the specific section of BIOL 213.
2. All students in the Bioengineering program need a grade of B- or better in MATH 114 and MATH 214, which are a pre-requisite requirement for some BENG courses
3. All students in the Bioengineering program are required to register for the specific section of MATH 203 that includes a 1-hour recitation with Matlab applications.

Physics

Code	Title	Credits

4-Year Plan

Bachelor of Science in Bioengineering Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Honors

Honors in the Major

The Department of Bioengineering offers an Honors Program that creates a community of outstanding scholars in bioengineering who share a commitment to learning, service, and leadership. The Program is based on the bioengineering curriculum, and is distinct from the University Honors Curriculum.

Eligibility

Entry to the Honors Program is by invitation, extended to students with a declared major in Bioengineering who have completed a minimum of 30 credit hours at Mason with a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each prior semester. Only one course may be repeated to raise the GPA.

Honors Requirements

The Honors Program is challenging and designed for the highly motivated student with interests in any of the bioengineering concentrations. Honors students must satisfy requirements in addition to those of the normal BS degree in bioengineering, including:

- Successful completion of BENG 395 RS: Mentored Research in Bioengineering or a Mason ASSIP research experience or at least 60 certified research project hours in a Mason bioengineering lab.
- Successful completion of three credits of BENG 5XX/6XX level courses. With permission of the Department of Bioengineering, 5XX/6XX level courses from other Volgenau School of Engineering programs may be considered.

Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS degree in bioengineering, maintain continuous enrollment working towards the degree, and abide by the Mason Honor Code.

Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain an undergraduate BS degree and the Statistical Science, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program **if such an accelerated** Statistical Science, MS **pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs.**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Statistical Science, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00.
- Completion of the following Mason courses each with a grade of C or better:

Code	Title	Credits
MATH 213	Analytic Geometry and Calculus III	3
MATH 203	Linear Algebra	3
or MATH 321	Abstract Algebra	
STAT 250	Introductory Statistics I (Mason Core)	3
or STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	3
or MATH 351	Probability	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits satisfying degree requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 560	Biostatistical Methods	3
STAT 574	Survey Sampling I	3
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Bioengineering, BS/Bioengineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Bioengineering (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs/) and a MS in Bioengineering (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 140 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students majoring in Bioengineering, BS will be considered for admission into the BAM Pathway after completion of a minimum of 60 undergraduate credits with an overall GPA of at least 3.0 and have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/) program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- A GPA of 3.0 or better in their 60 highest-level credits
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students must complete all credits that satisfy requirements for both the BS and MS programs, with up to four classes (twelve credits) overlap chosen from the following graduate courses:

Code	Title	Credits
BENG 520	Biomedical Data Analytics	3
BENG 521	Cell and Tissue Engineering	3
or BENG 541	Biomaterials	
BENG 526	Neural Engineering	3
BENG 537	Medical Image Processing	3
or BENG 538	Medical Imaging	
BENG 501	Bioengineering Research Methods	3
BENG 514	Pathophysiology and the Role of New Technologies in Human Diseases	3
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS program. The graduate courses may be counted as Technical Electives or Concentration Core courses towards the Bioengineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs/) program requirements with approval by the academic advisor of the BS program and the program director of the MS program (or the bioengineering department chair).

While still in undergraduate status, a maximum of six additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree. These reserve credits can be chosen from the list of graduate level courses given above with approval by the academic advisor of the BS program and the program director of the MS program (or the bioengineering department chair).

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students are recommended to meet with the Bioengineering academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a MS degree is conferred.

Bioengineering, BS/Biostatistics, Accelerated MS

Overview:

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain the Bioengineering, BS and the Biostatistics, MS in an accelerated time-frame after satisfactory completion of a minimum of 146 credits.

Admitted students are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements:

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Biostatistics, MS program if they meet the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of at least 3.0.
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 213	Analytic Geometry and Calculus III	3
BENG 320	Bioengineering Signals and Systems	3

Accelerated Pathway Requirements:

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits that satisfy requirements for the BS and MS programs. Students can take up to six credits of the following approved graduate level courses listed below as part of their undergraduate degree that will also be applied to the graduate degree.

Code	Title	Credits
BENG 501	Bioengineering Research Methods	3
STAT 554	Applied Statistics I	3
STAT 560	Biostatistical Methods	3
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS program. The graduate courses may be counted as Technical Electives toward Bioengineering, BS program requirements, with approval of the Bioengineering Department undergraduate coordinator.

While still in undergraduate status, a maximum of six additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral:

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form (https://registrar.gmu.edu/forms/) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment. At the completion of MS requirements, a master's degree is conferred.

Bioengineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Bioengineering (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs/) and MS in Data Analytics Engineering (https://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/) with a concentration in Bioengineering in an accelerated time-frame.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students majoring in the Bioengineering, BS will be considered for admission into the BAM Pathway after completion of a minimum of 60 undergraduate credits with an overall GPA of at least 3.0. Students must have successfully completed CS 222 Computer Programming for Engineers and BENG 320 Bioengineering Signals and Systems. Criteria for admission are identical to criteria for admission to the Bioengineering concentration of the Data Analytics Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/) program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Data Analytics Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- A GPA of 3.0 or better in their 60 highest-level credits
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students must complete all credits that satisfy requirements for both the BS and MS programs, with up to three classes (nine credits) overlap depending on their bioengineering concentration chosen from the following graduate courses:

Code	Title	Credits
AIT 580	Analytics: Big Data to Information	3
BENG 501	Bioengineering Research Methods	3

CS 504	Principles of Data Management and Mining (in place of BENG 420)	3
OR 531	Analytics and Decision Analysis	3
STAT 515	Applied Statistics and Visualization for Analytics	3
Total Credits		15

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS program. The graduate courses may be counted as Technical Electives or, in the case of CS 504 Principles of Data Management and Mining, for BENG 420 Biomedical Data Analytics towards the Bioengineering, BS program requirements with approval by the academic advisors of both the BS and MS programs.

While still in undergraduate status, a maximum of six additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree. These reserve credits can be chosen from the list of graduate level courses given above with approval by the academic advisors of both the BS and MS programs.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Students are permitted to take additional graduate basic courses in their undergraduate programs. In such cases, those classes cannot be counted toward requirements for the MS.

Degree Conferral

Students are recommended to meet with the Bioengineering academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Bioengineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Bioengineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 140 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Bioengineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Bioengineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Bioengineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.

- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select from the following Bioengineering courses:

Code	Title	Credits
Required course:		
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	
Select at most one from the following Bioengineering courses:		
BENG 501	Bioengineering Research Methods	
BENG 514	Pathophysiology and the Role of New Technologies in Human Diseases	
BENG 520	Biomedical Data Analytics	
BENG 521	Cell and Tissue Engineering	
or BENG 541	Biomaterials	
BENG 526	Neural Engineering	
BENG 537	Medical Image Processing	
or BENG 538	Medical Imaging	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Bioengineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Bioengineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 140 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Bioengineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four

courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Bioengineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Bioengineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select from the following Bioengineering courses:

Code	Title	Credits
Required course:

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Bioengineering, MS

Banner Code: VS-MS-BIOE

Academic Advisor: Shani Ross, PhD

Phone: 703-993-5934
Email: sross20@gmu.edu
Website: https://bioengineering.gmu.edu/academics/master-science-bioengineering

The MS in Bioengineering prepares students for research and professional practice in bioengineering and related fields. The program includes both fundamentals and advanced work to apply engineering techniques to solve problems in biology and medicine. A major distinguishing feature of the curriculum is that it is designed to educate leaders who understand and appreciate how biomedical technology is translated from bench to bedside. Graduates from this program will eventually work in universities, industry or government in a variety of

roles due to the breadth of this program and its content specific clinical translation of new technologies.

Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree in engineering or the sciences from an accredited program and an earned GPA of 3.0 or better in their 60 highest-level credits.

In addition to fulfilling Mason's admission requirements for graduate study, applicants seeking to be admitted must demonstrate or provide the following:

- Demonstrate strong knowledge in ordinary differential equations cell biology and general chemistry as demonstrated by the BS degree, course selection, or project work.
- Additional knowledge in molecular biology, physiology, organic chemistry, linear algebra, and/or statistics is recommended.
- Provide two letters of recommendation, from references who are familiar with the applicant's professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- If their native language is not English, students must take the English Proficiency exam. Test score minimum requirements are available at https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information (https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information/)
- Provide official GRE scores.

Requirements

Degree Requirements

Total credits: 30-33

Students complete the Core Bioengineering requirements, and requirements within one selected option: thesis, practicum or coursework.

Core Bioengineering

Code	Title	Credits
BENG 520	Biomedical Data Analytics	3
BENG 521	Cell and Tissue Engineering	3
or BENG 541	Biomaterials	
BENG 526	Neural Engineering	3
BENG 537	Medical Image Processing	3
or BENG 538	Medical Imaging	
Choose two courses from the following:		6
BENG 501	Bioengineering Research Methods	
BENG 514	Pathophysiology and the Role of New Technologies in Human Diseases	
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	
BENG 601	Collaborative Bioengineering Basic Science Research	
BENG 602	Collaborative Bioengineering Clinical Science Research	
STAT 535	Analysis of Experimental Data	
STAT 560	Biostatistical Methods	
Total Credits		18

Thesis Option

Code	Title	Credits
Research Thesis		**6**
BENG 799	Master's Thesis [1]	
Total Credits		6

[1] Students are expected to complete 6 credits of BENG 799 Master's Thesis towards their degree. Students cannot enroll in BENG 799 Master's Thesis until the completion of their second semester of coursework. Once enrolled students must maintain continuous registration in thesis research until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of thesis research during that summer term.

Students choose from a restricted list of technical specialization courses below and/or from the list of core courses that are not already being taken as part of their core requirement to increase technical depth in an area of their interest, under the guidance and with the approval of the student's advisor. Students must choose six credits from these courses. At least half of the selected classes must be at the 600 or 700 level.

Committee Selection

Each student must form a master's committee comprising three individuals. A minimum of two members of the committee must be tenured or tenure-track faculty in the Department of Bioengineering. The other member must be from outside the department.

Thesis Research Proposal

Each student must prepare a written thesis proposal, and it must be presented before the completion of the second semester. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. If the student fails to defend the proposal, the student may present a proposal a second time, no later than 60 days from the first attempt. Failure in the second attempt results in dismissal from the program.

Thesis Preparation and Defense

While preparing the thesis, the candidate enrolls in thesis research. The candidate can proceed to a public defense of the thesis once it has been approved by the committee.

The defense must be announced at least two weeks in advance. The thesis draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire committee must be present at the defense. If the candidate fails to defend the thesis, the candidate may request a second defense, following the same procedures as for the initial defense. A candidate who fails a second attempt to defend the thesis is terminated from the program.

Practicum Option

Code	Title	Credits
Internship/Co-Op		**6**
BENG 798	Independent Reading and Research in Bioengineering [1]	
Total Credits		6

[1] Students are expected to complete 6 credits of BENG 798 Independent Reading and Research in Bioengineering towards their degree. Students cannot enroll in BENG 798 Independent Reading and Research in Bioengineering until the completion of their second semester of coursework. These credits must be taken along with an internship/co-op opportunity. Therefore, a letter from the specific employer must be provided on behalf of the student.

Students choose from a restricted list of technical specialization courses below and/or from the list of core courses that are not already being taken as part of their core requirement to increase technical depth in an area of their interest, under the guidance and with the approval of the student's advisor. Students must choose six credits from these courses. At least half of the selected classes must be at the 600 or 700 level.

Committee Selection

Each student must form a master's committee, comprising two or three individuals. In this case, the committee will help identify the goals of the internship and make sure that they are in line with the MS program's objectives. The committee will also be responsible to evaluate a final report and presentation to assess the successful completion of the internship. A minimum of one member of the committee must be tenured or tenure-track faculty in the Department of Bioengineering. The other two members must be representatives from the internship program.

Project Preparation and Presentation

During the internship, the candidate enrolls in BENG 798 Independent Reading and Research in Bioengineering (Internship/Co-op) and prepares the project report and presentation. The candidate can proceed to the final presentation of the project once it has been approved by the committee.

The presentation must be announced at least two weeks in advance. The report draft must be submitted to the library and made publicly available at least two weeks in advance of the defense. The entire committee must be present at the presentation. If the candidate fails to defend the project, the candidate may request a second attempt, following the same procedures as for the initial one. A candidate who fails a second attempt is terminated from the program.

Coursework Option

Students choose from a restricted list of technical specialization courses below and/or from the list of core courses that are not already being taken as part of their core requirement to increase technical depth in an area of their interest, under the guidance and with the approval of the student's advisor. Students must choose 15 credits from these courses. At least half of the selected classes must be at the 600 or 700 level.

Additional Training Requirement

Bioengineering Seminar

All MS students are required to attend a minimum of two departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

Accelerated Master's

Bioengineering, BS/Bioengineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Bioengineering (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs/) and a MS in Bioengineering (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 140 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students majoring in Bioengineering, BS will be considered for admission into the BAM Pathway after completion of a minimum of 60 undergraduate credits with an overall GPA of at least 3.0 and have completed all MATH and PHYS requirements. Criteria for admission are identical to criteria for admission to the Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/) program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Bioengineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- A GPA of 3.0 or better in their 60 highest-level credits
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students must complete all credits that satisfy requirements for both the BS and MS programs, with up to four classes (twelve credits) overlap chosen from the following graduate courses:

Code	Title	Credits
BENG 520	Biomedical Data Analytics	3
BENG 521 or BENG 541	Cell and Tissue Engineering Biomaterials	3
BENG 526	Neural Engineering	3
BENG 537 or BENG 538	Medical Image Processing Medical Imaging	3
BENG 501	Bioengineering Research Methods	3
BENG 514	Pathophysiology and the Role of New Technologies in Human Diseases	3
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS program. The graduate courses may be counted as Technical Electives or Concentration Core courses towards the Bioengineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/bioengineering/bioengineering-bs/) program requirements with approval by the academic advisor of the BS program and the program director of the MS program (or the bioengineering department chair).

While still in undergraduate status, a maximum of six additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree. These reserve credits can be chosen from the list of graduate level courses given above with approval by the academic advisor of the BS program and the program director of the MS program (or the bioengineering department chair).

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students are recommended to meet with the Bioengineering academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of

the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a MS degree is conferred.

Mechanical Engineering, BS / Bioengineering, Accelerated MS

Overview

Highly-qualified students in the Mechanical Engineering, BS have the option of obtaining an accelerated Bioengineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in Mechanical Engineering, BS may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.20, completed all MATH and PHYS requirements, and passed BENG 320 Bioengineering Signals and Systems and BIOL 213 Cell Structure and Function (Mason Core) with the grade of C or better. It is also recommended that students take BENG 214 Physiology for Engineers and are proficient in MATLAB. Criteria for admission are identical to criteria for admission to the Bioengineering, MS program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Students take up to 9 credits of approved MS level BENG courses as part of their undergraduate degree that will also be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisor of both the BS and MS programs and by the Bioengineering department chair.

Specifically, students are encouraged to take up to three of the following courses to apply towards both their undergraduate and graduate degree.

Code	Title	Credits
BENG 520	Biomedical Data Analytics	3
BENG 521	Cell and Tissue Engineering	3
or BENG 541	Biomaterials	
BENG 526	Neural Engineering	3
BENG 537	Medical Image Processing	3
or BENG 538	Medical Imaging	
BENG 501	Bioengineering Research Methods	3
BENG 514	Pathophysiology and the Role of New Technologies in Human Diseases	3
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	3

Degree Conferral

Students are recommended to meet with their undergraduate academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a MS degree is conferred.

Bioengineering, PhD

Banner Code: VS-PHD-BIOE

Academic Advisor: Parag Chitnis, PhD

Phone: 703-993-5039
Email: pchitnis@gmu.edu
Website: https://bioengineering.gmu.edu/academics/phd-bioengineering

Rapid technologically driven advances in understanding and treating human disease have opened up vast opportunities to advance human health through research that integrates engineering, basic sciences, medical sciences, and knowledge of industry practices. The doctoral program will prepare leaders in bioengineering in this broader, integrative sense of the discipline. A major distinguishing feature of the curriculum is its emphasis on understanding how biomedical technology is translated from bench to bedside. Graduates from this program will eventually work in universities, industry or government in a variety of roles, including scientific research, technology development, and regulatory affairs.

Admissions & Policies

Admissions

Application Requirements

In addition to fulfilling Mason's admission requirements for graduate study, applicants should:

- Have a baccalaureate degree in engineering or the sciences from an accredited program with a reputation for high academic standards and an earned GPA of 3.3 or better in their highest-level engineering-related credits.
- Provide official GRE Scores.
- Provide three letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant's aptitude for research.
- Provide a resume and detailed statement of career goals and professional aspirations, including why they want to study at Mason, and two faculty with whom they want to work.
- Demonstrate interest in combining engineering and the natural sciences with discovery and application in the life science; i.e., via a degree which reflects the desired combination (such as bioengineering, biomedical engineering, biophysics); a degree in engineering or the natural sciences which includes coursework in life sciences; a degree in biology which includes coursework in mathematics, physics, or engineering; a project or research experience with combined complementary expertise.
- If their native language is not English, students must take the English Proficiency exam. Test score minimum requirements are available at https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information (https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information/).

Policies

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a related master's degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine how many credits are eligible for the reduction of credit.

Program Requirements

The Bioengineering PhD program requires successful completion of coursework detailed in a plan of study, qualifying examination, dissertation proposal, and final dissertation defense. Additional training requirements include seminar attendance, ethics training, and mentoring and teaching experience. All the general requirements for doctoral degrees at Mason apply to this program as well.

For students to remain eligible for the PhD program, they must maintain a "B" average. Grades of "C" or lower in courses cannot be counted towards degree completion. Refer to the University policy AP 6.6.2 (https://catalog.gmu.edu/policies/academic/graduate-policies/) and the Mason Engineering Graduate Student Resources (https://mymasonportal.gmu.edu/webapps/blackboard/content/listContent.jsp?course_id=_336120_1&content_id=_7643583_1) regarding academic termination policies.

Requirements

Degree Requirements

Total credits: 72

Complementary Background

Code	Title	Credits
Students choose 6 credits of complimentary courses [1]		**6**
Students with a background in engineering or related field select:		
BINF 531	Molecular Cell Biology for Bioinformatics	
NEUR 600	Chemistry and the Brain	
Students with a background in a non-engineering or related field select:		
MATH 446	Numerical Analysis I	
or OR 481	Numerical Methods in Engineering	
SYST 500	Quantitative Foundations for Systems Engineering	
Total Credits		6

[1] Students who have taken courses equivalent to the complimentary courses may replace them with 6 credits of technical electives.

Core Bioengineering

Code	Title	Credits
BENG 801	Bioengineering Colloquium II [1]	3
Select 12 credits from the following bioengineering courses: [2]		12
BENG 501	Bioengineering Research Methods	
BENG 514	Pathophysiology and the Role of New Technologies in Human Diseases	
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	
BENG 601	Collaborative Bioengineering Basic Science Research	
BENG 602	Collaborative Bioengineering Clinical Science Research	
STAT 554	Applied Statistics I [3]	3
or STAT 535	Analysis of Experimental Data	
or STAT 560	Biostatistical Methods	
Total Credits		18

[1] Students must first register for the 0-credit BENG 800 - Bioengineering Colloquium and attend at least 5 seminars per semester for 3 semesters before being able to take BENG 801. Note, students must continue to register for BENG 800 until they have attended the required number of seminars, then they can register for BENG 801 to receive credit.

[2] One of BENG 501, 514, 575, 601, and 602 can be replaced with a technical elective.

[3] Recommended option.

Concentrations

Select one concentration and complete the requirements therein.

- Biomedical Imaging and Devices (BMID)
- Computational Biomedical Engineering (CBME)
- Biomaterials and Nanomedicine (BNM)
- Neurotechnology and Computational Neuroscience (NTCN)

Biomedical Imaging and Devices (BMID)

Code	Title	Credits
BENG 538	Medical Imaging	3
BENG 537	Medical Image Processing	3
or BENG 570	Bioinstrumentation and Devices II	
BENG 704	Laboratory Rotations in Biomedical Imaging and Devices	3
BENG 738	Advanced Medical Image Processing	3
Total Credits		12

Computational Biomedical Engineering (CBME)

Code	Title	Credits
BENG 520	Biomedical Data Analytics	3

NEUR 689	Topics in Neuroscience	3
BENG 706	Laboratory Rotations in Neurotechnology and Computational Neuroscience	3
Total Credits		12

Technical Electives

These graduate courses develop additional technical expertise in a student's PhD concentration. Students must choose 12 credits from the following list and/or from the concentration courses that are not already being taken for the concentration requirement. At least half of the selected classes must be at or above the 600 level.

Code	Title	Credits
Technical Specialization		**12**
Bioengineering		
BENG 699	Advanced Topics in Bioengineering	
BENG 725	Computational Motor Control	
BENG 798	Independent Reading and Research in Bioengineering	
Electrical, Computer & Mechanical Engineering		
ECE 511	Computer Architecture	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 530	Sensor Engineering	
ECE 550	System Engineering Design	
ECE 635	Adaptive Signal Processing	
ME 621	Foundations of Fluid Mechanics	
Bioinformatics		
BINF 641	Biomolecular Modeling	
BINF 690	Numerical Methods for Bioinformatics	
BINF 701	Systems Biology	
BINF 731	Protein Structure Analysis	
BINF 740	Introduction to Biophysics	
BINF 741	Introduction to Computer Simulations of Biomolecules	
BINF 751	Biochemical and Cellular Systems Modeling	
BINF 760	Machine Learning for Bioinformatics	
Biology and Chemistry		
BIOL 562	Personalized Medicine	
BIOL 563	Virology	
BIOL 566	Cancer Genomics	
BIOL 572	Human Genetics	
BIOL 583	General Biochemistry	
BIOL 682	Advanced Eukaryotic Cell Biology	
CHEM 563	General Biochemistry I	
CHEM 568	Bioorganic Chemistry	
CHEM 613	Modern Polymer Chemistry	
CHEM 660	Protein Biochemistry	
Physics		
PHYS 510	Computational Physics I	
PHYS 612	Physics of Modern Imaging	
PHYS 640	Finite Element Analysis of Solids and Fluids	
PHYS 694	Applied Mechanics of Solids	
PHYS 695	Applied Fluid Mechanics	
Mathematics and Statistics		
MATH 685	Numerical Analysis	
STAT 517	Experimental Design	
STAT 522	Applied Multivariate Statistics	
STAT 526	Applied Regression Analysis	
STAT 662	Multivariate Statistical Methods	
STAT 672	Statistical Learning and Data Analytics	
Neuroscience		
NEUR 601	Developmental Neuroscience	
NEUR 602	Cellular Neuroscience	
NEUR 603	Mammalian Neuroanatomy	
NEUR 651	Molecular Neuropharmacology	
NEUR 734	Computational Neurobiology	
Total Credits		12

Program of Study

Upon starting the PhD program, the student should review the course requirements in the catalog and, in consultation with their advisor, define a plan of study and declare a concentration. The recommended timeline, milestones, instructions, and forms can all be found on the Bioengineering PhD program's website: https://bioengineering.gmu.edu/academics/phd-bioengineering (https://bioengineering.gmu.edu/academics/phd-bioengineering/).

Qualifying Examination

All students entering the Bioengineering PhD program are expected to pass a qualifying exam within one to two years of entering the program. Detailed instructions and forms can be found here (https://bioengineering.gmu.edu/academics/phd-bioengineering/). The goal of the qualifying exam is to test the student's preparation to undertake doctoral level research. The exam will test the student's research competency as well as knowledge of core bioengineering concepts and competency in complementary areas.

A committee identified by the student's advisor (dissertation director) will administer the exam. The exam consists of a written and oral component, times and dates of which are determined by the student's dissertation director. The candidate's dissertation director communicates with the committee to determine the four topics of the exam, completes the qualifying exam topics form and transmits the form to the candidate. At least two months prior to the written exam, the student will receive a reading list from each committee member. The committee members provide their written questions to the committee chair who puts them together into the final form of the written exam. The student will take the written exam and their answers will be transmitted to the committee members. The oral exam will take place about one week after the written exam.

Composition of the Qualifying Exam Committee:
The committees for the qualifying exam consists of four individuals:

- A minimum of two members, including the chair of the committee must be graduate faculty in the Department of Bioengineering.
- One member must be graduate faculty from outside the department.
- The chair of the committee is responsible for ensuring the correct forms are completed and procedures are followed.
- The dissertation director is the main scientist guiding the student's research and cannot be chair of the committee.

Written Exam:
A set of four topics, relevant to the student's concentration and research topic, will be assigned to the student as representing essential knowledge that the student should master to be successful in their research, at least two months prior to the qualifying exam. In addition, the qualifying exam committee will provide the student a list of readings for each topic that the student is expected to master. The list of readings can include specific articles, books or book chapters, or syllabus items (e.g. from a class at Mason) for each of the topics. Each of the committee members creates written questions for one of the topics which will be provided to the student on the day of the exam.

The written component is a four hour exam with questions from each of the four examiners. There will be one question per examiner and each question is expected to require one hour to answer. The exam is closed book. One question can be replaced by a computational assignment to be completed by the time of the oral. In that case, the total written exam time will be reduced to three hours.

Oral Exam:
At least one week after the written exam, the student will take the oral exam. The oral consists of answering questions by the qualifying committee related to the topics of the written exam.

Grading:
The committee determines whether the candidate has passed or failed the exam based on the written report and oral exam and reports the results in the qualifying exam results form. The committee optionally provides a list of recommendations, e.g. additional material the student needs to master. If the student fails the exam, the committee has the option of recommending that the student re-takes the exam, and if so, must specify what must be improved, e.g. knowledge of certain topics, oral presentation, and/or written exam. The committee can also specify a time frame for the second exam. The exam can only be repeated once. A student who fails to qualify on their second try will be removed from the program.

Dissertation Proposal
Each student must prepare and defend a written dissertation proposal to their dissertation committee. The student's dissertation director names the committee and chooses the date and time of the oral presentation. Detailed instructions, grading rubrics, and required forms are all found here (https://bioengineering.gmu.edu/academics/phd-bioengineering/). While preparing this proposal, the student enrolls in BENG 998 Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. All committee members assess the written proposal and oral presentation using the grading rubrics. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the qualifying exam, and the presentation may not be on the same day as the qualifying exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in dismissal from the program.

Written Proposal:
The proposal should at a minimum clearly state the research question and the specific aims of the research, provide a critical review of the literature, present the hypotheses, the rationale and the significance of the research in addressing a gap in scientific knowledge, describe the research methods and study design in sufficient detail and present preliminary results demonstrating the feasibility of the research. Additional guidelines are provided in the written proposal rubric.

Oral Presentation and Exam:
The candidate must present the proposal to committee in a venue open to the public. The presentation should be 30 - 45 minutes long. Following the research presentation, the dissertation committee will ask the students a number of questions to evaluate the students understanding of the relevant literature and methods that are broadly related to the chosen area of research, and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Additional guidelines are provided in the oral presentation rubric.

Grading:
The written proposal and oral presentation are graded according to rubrics and the results reported in the proposal results form. If the dissertation committee feels that the student is not adequately prepared, they may recommend remedial measures, including additional coursework to address any gaps in knowledge, or modification of the aims of the proposal. The proposal may be repeated once.

Advancement to Candidacy
The student is advanced to candidacy for the PhD degree once they have successfully presented and defended a written dissertation proposal, completed all 48 course credits, and completed a minimum of 6 credits of BENG 998 Doctoral Dissertation Proposal. The student should also submit the Advancement to Candidacy form. The instructions for advancement to candidacy and the required form can be found here (https://bioengineering.gmu.edu/academics/phd-bioengineering/).

Dissertation Research
Students are expected to complete 24 credits of BENG 998 Doctoral Dissertation Proposal and BENG 999 Doctoral Dissertation towards their degree. Students cannot enroll in BENG 998 Doctoral Dissertation Proposal before they have passed the qualifying exam. Students cannot enroll in BENG 999 Doctoral Dissertation before they have advanced to candidacy. Students who advanced to candidacy after the add period for a given semester must wait until the following semester to register for BENG 999 Doctoral Dissertation. Students cannot advance to candidacy and defend their dissertation during the same semester. Once enrolled in BENG 999 Doctoral Dissertation, students must maintain continuous registration in BENG 999 Doctoral Dissertation each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of BENG 999 Doctoral Dissertation during that summer term.

Code	Title	Credits
Select 24 credits from the following:		24
BENG 998	Doctoral Dissertation Proposal (6 credit minimum, 12 credit maximum)	
BENG 999	Doctoral Dissertation (12 credit minimum)	
Total Credits		24

Dissertation Committee Selection

Each student must form a dissertation committee, comprising four or five individuals:

- A minimum of two members, including the chair of the committee must be graduate faculty in the Department of Bioengineering.
- One member must be graduate faculty from outside the department.
- The chair of the committee is responsible for ensuring the correct forms are completed and procedures are followed.
- The dissertation director is the main scientist guiding the student's research and cannot be the chair of the committee.
- It is strongly recommended that one of the committee members be external to the university.

Refer to https://catalog.gmu.edu/policies/academic/graduate-policies/#text for who is allowed to be on these committees (see section AP.6.10.5 Dissertation Committee). The dissertation proposal committee has the same requirements as the dissertation committee. It is recommended for continuity that the same faculty should be on the committee for the qualifying exam, dissertation proposal, and dissertation defense; however, committee membership can be changed if circumstances warrant.

Dissertation Preparation and Defense

The candidate must write and publicly defend their dissertation. The student's dissertation director names the committee and chooses the date and time of the oral defense. The committee must sign and submit a pre-defense form four weeks prior to the defense. Detailed instructions, grading rubrics, and required forms are all found here (https://bioengineering.gmu.edu/academics/phd-bioengineering/). While preparing the dissertation, the candidate enrolls in BENG 999 Doctoral Dissertation. The candidate can proceed to a public defense of the dissertation once their dissertation has been approved by the dissertation committee. The dissertation must make significant contributions to its area as evidenced by refereed journal and/or conference publications.

The candidate should begin early in the term to meet the deadlines (https://registrar.gmu.edu/students/graduation/timelines/). The candidate schedules a Format Review with University Dissertation & Thesis Services (UDTS) at least 2 - 3 weeks prior to the defense (https://library.gmu.edu/udts/process (https://library.gmu.edu/udts/process/)). The candidate provides the written dissertation to the committee at least 4 weeks before the defense. The defense must be announced at least two weeks in advance. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Bioengineering Program in advance of the defense. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree. A candidate who fails a second attempt to defend the dissertation is terminated from the program.

Dissertation:

The dissertation should report on research performed by the candidate during their studies at Mason. Ideally, the main chapters of the dissertation are comprised of published manuscripts, submitted manuscripts, and the student's final manuscript in preparation. The dissertation should include an introductory chapter, which gives a broad overview of all the research, and a concluding chapter, which summarizes the main findings of the body of work, and outlines future directions suggested by the research. Additional guidelines are provided in the written dissertation rubric. Format of the dissertation is determined by University Dissertation & Thesis Services.

Oral Presentation and Exam:

The candidate must present the dissertation to committee in a venue open to the public. The oral presentation should last 30 - 45 minutes and include a general introduction and background to enable understanding by a broad audience. Explanation of the candidate's research should focus on the most significant results with easy to understand graphics. Additional guidelines for preparing the presentation are provided in the oral presentation rubric.

Following the research presentation, the dissertation committee will ask the candidate a number of questions to evaluate the student's understanding of research. The questioning generally begins with the external examiner and ends with the research director. Multiple rounds of questioning can occur. Once the committee's questions are complete, other attendees have an opportunity to ask questions of the candidate.

Grading:

Following the presentation and questions, the candidate and other attendees leave the room to allow the committee to deliberate. The deliberations are presided by the chair of the committee who begins by asking the external examiner to evaluate the candidate. Other committee members then provide their evaluations ending with the research supervisor's evaluation. All committee members assess the written dissertation and the oral presentation using the grading rubrics and the results are reported on the dissertation results form. If the dissertation committee feels the dissertation does not make a sufficient contribution, or that the oral presentation was inadequate, the committee may request further research or require a repeat of the oral presentation.

Additional Training Requirements

Bioengineering Seminar

All PhD students are required to attend a minimum of 5 departmental seminars per semester. Students will sign an attendance sheet available at the end of each seminar.

Ethics Training

Prior to beginning research studies in a Bioengineering laboratory, all PhD students must complete the on-line Collaborative Institutional Training Initiative (CITI) Responsible Conduct of Research course. CITI training modules provide students with an understanding of conflicts of interest, research misconduct, peer review, and authorship.

Bioengineering Mentorship

All PhD students are required to participate in mentoring at least one undergraduate Bioengineering senior design team for a duration of 1 year. PhD students work with the faculty advisor for the senior design team and are expected to apply translational and entrepreneurial concepts towards the mentorship of the team.

Teaching Requirement
For degree conferral all PhD students are required to participate in at least one teaching activity in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student's advisor.

Department of Computer Science

PhD program: csphd@gmu.edu

MS programs: csgrad@gmu.edu

Undergraduate programs: csug@gmu.edu

General information: csinfo@gmu.edu

Phone: 703-993-1530
Fax: 703-993-1710

Website: cs.gmu.edu

The Computer Science discipline is concerned with the design, analysis, implementation, maintenance, and evolution of computer-based systems, and their associated theoretical foundations. Computer science is powering the information revolution of the 21st century, and computer-based systems are used in every scholarly discipline, every sector of industry, and every walk of human life.

Advanced computation tools and techniques are revolutionizing, transforming, and often automating the way we work, play, communicate, collaborate, and conduct business. Computational approaches are integral to a broad array of disciplines including computational natural and social sciences, bioinformatics, health informatics, digital humanities, and financial technology. In addition, the spread of computing throughout society has made the ethical use of computing a central concern to policymakers.

Computer scientists must be well-grounded in the theory of computing and in its application to diverse areas, and they must be able to work closely with members of other professions that use computing. The department therefore offers a broad array of programs in computer science at both the undergraduate and graduate levels. Students who study this discipline can learn about a wide variety of concepts and methods in computer science—algorithms, artificial intelligence, computer networking, cyber security, databases, data mining, data structures, machine learning, operating systems, programming languages, robotics, software engineering—and they will explore effective and ethical applications of these concepts and methods.

Website: http://cs.gmu.edu/prospective-students/undergraduate-programs/bs-in-applied-computer-science/

This program presents an innovative approach to the integration of computer science with other disciplines that require expertise in computing techniques. These disciplines do not merely use computing but create new and interesting problems for computer scientists.

Admissions & Policies

Policies

Advanced Placement, Credit by Exam

A score of 4 on the Advanced Placement (AP) computer science exam qualifies students for credit in CS 112 Introduction to Computer Programming. A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credits in CS 112 Introduction to Computer Programming, and a score of 5 or more qualifies students for credit in CS 211 Object-Oriented Programming.

Change of Major

Students requesting a change of major to Applied Computer Science must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. Students requesting a change of major to Applied Computer Science must have a GPA of at least 2.75 in computer science and math courses and successfully completed one of CS 112 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302778) or CS 211 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302780), and one of MATH 113 (http://catalog.gmu.edu/preview_program.php?catoid=29&poid=28176#tt1999), MATH 114 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305053), or MATH 125 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305056), with a grade of B or better at Mason. See Change of Major for more information.

Grades

Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Applied Computer Science majors may not use more than one course with a grade of C- or D toward department requirements.

Program Requirements

For the BS ACS degree, students must complete 120 credits, including the Mason Core requirements. The program requires foundation, core, and concentration courses. These course requirements provide expertise in programming, computer systems, software requirements and modeling, formal methods, and analysis of algorithms.

Repeating Courses

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250 Introductory Statistics I (Mason Core), which follows the normal university policy for repeating undergraduate courses.

The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

Writing-Intensive Requirement

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 Synthesis of Ethics and Law for the Computing Professional (Mason Core) and CS 321 Software Engineering. Faculty members provide feedback on students' expository writing.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements

Total credits: 120

Students must complete all foundation, core, elective, and communication requirements, and the requirements from one selected concentration.

Foundation

Code	Title	Credits
CS 110	Essentials of Computer Science (Mason Core) [1]	3
CS 112	Introduction to Computer Programming	4
CS 211	Object-Oriented Programming	3
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
or MATH 123 & MATH 124	Calculus with Algebra/Trigonometry, Part A and Calculus with Algebra/Trigonometry, Part B (Mason Core)	

MATH 114	Analytic Geometry and Calculus II	4
MATH 125	Discrete Mathematics I (Mason Core)	3
MATH 203	Linear Algebra	3
Total Credits		24

[1] Must be taken within a student's first year at the university.

Note:
MATH 104 Trigonometry and Transcendental Functions, MATH 105 Precalculus Mathematics, MATH 108 Introductory Calculus with Business Applications (Mason Core), and courses with an IT designation (and any associated cross-listed courses) cannot be counted toward this degree.

Core

Code	Title	Credits
CS 262	Introduction to Low-Level Programming	3

4-Year Plan

Bachelor of Science in Applied Computer Science

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Honors

CS Honors Program

The Department of Computer Science offers a CS Honors Program for students with strong computational foundations and the drive to delve deeper into computing. The program is based on the bachelor of science in computer science and applied computer science curriculum and is distinct from the University Honors College curriculum.

Entry Requirements

Students must be seeking a Bachelor of Science in Computer Science or a Bachelor of Science in Applied Computer Science and must apply for entry into the CS Honors Program after completing 12 credits of CS courses. Applicants must meet the GPA requirements outlined below to enter into the CS Honors Program.

Honors Requirements

CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in Computer Science or Applied Computer Science degree as well as the following additional requirements:

- GPA Requirement: Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the BS/CS or BS/ACS major including math, natural sciences, and all CS/SWE courses.
- Research Project Requirement: Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels:
  a. a written project report that is approved by the student's research advisor and submitted to the department;
  b. a presentation of the project to an audience of students and/or faculty.
- Advanced Course Requirement: At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

Accelerated Master's

Applied Computer Science, BS/Computer Science, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS can complete both a BS-ACS and a Computer Science, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Applied Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS can complete both a BS-ACS and a Data Analytics Engineering, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 9 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses. For all students in the Applied Computer Science, BS program:

Code	Title	Credits
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3

Students in the Software Engineering and Bioinformatics concentrations of the Applied Computer Science, BS program may also register for:

Code	Title	Credits
CS 550	Database Systems (to replace CS 450)	3

Students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS program may also register for one or both of the following courses:

Code	Title	Credits
CS 550	Database Systems (to replace CS 450)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3

Notes:

- For students in the Computer Game Design and Geography concentrations of the Applied Computer Science, BS program, one of the 500 level courses will count as an elective towards their undergraduate degree.
- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students must still take the DAEN core courses (AIT 580 Analytics Big Data to Information, OR 531 Analytics and Decision Analysis, and STAT 515 Applied Statistics and Visualization for Analytics).
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Applied Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS program can complete both a BS-ACS and an Information Security and Assurance, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Email: csinfo@gmu.edu
Website: cs.gmu.edu/prospective-students/undergraduate-programs/undergraduate-certificate/

This certificate targets students who are working on or possess an undergraduate degree in a technical (science or engineering) field but lack a formal credential in the computer science field. The certificate also targets students who have shown an aptitude for graduate study but do not have the academic prerequisites required for admittance into a graduate MS computer science program.

The undergraduate certificate in computer science may be pursued on a full-time basis except when limited by prerequisite constraints.

Admissions & Policies

Admissions

Students must have programming experience at the level of CS 112 Introduction to Computer Programming and CS 211 Object-Oriented Programming, and either a BS in a technical field with a 3.00 GPA or higher or current enrollment in a technical undergraduate major.

Policies

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Requirements

Certificate Requirements

Total credits: 28

This certificate may be pursued on a full-time basis only.

Basic Computer Science

Code	Title	Credits
CS 262	Introduction to Low-Level Programming	3
CS 310	Data Structures	3
CS 330	Formal Methods and Models	3
CS 367	Computer Systems and Programming	4
CS 471	Operating Systems	3
Total Credits		16

Mathematics

Code	Title	Credits
MATH 125	Discrete Mathematics I (Mason Core)	3
Total Credits		3

Additional Coursework

Code	Title	Credits
Complete the following:		
CS 483	Analysis of Algorithms	3
AND two of the following		6
CS 321	Software Engineering	
CS 440	Language Processors and Programming Environments	
CS 450	Database Concepts	
CS 451	Computer Graphics	
CS 455	Computer Communications and Networking	
CS 465	Computer Systems Architecture	
CS 468	Secure Programming and Systems	

CS 480	Introduction to Artificial Intelligence	
CS 484	Data Mining	
Total Credits		9

Computer Science Minor

Academic Advising

Phone: 703-993-1530
Email: csinfo@gmu.edu
Website: cs.gmu.edu/current-students/undergraduates/minors/

Admissions & Policies

Admissions

Declaring a CS Minor

Students requesting a Computer Science Minor must have completed CS 112 Introduction to Computer Programming or CS 211 Object-Oriented Programming with a grade of B or better.

Policies

Grades

No more than 3 credits of D grades may be used to satisfy requirements for the Computer Science Minor.

Program Requirements

The minor in computer science requires completion of at least 19 credits. Students should pay careful attention to prerequisites when selecting courses. Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00.

For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 19-20

Required Courses

Code	Title	Credits
CS 112	Introduction to Computer Programming	4
CS 211	Object-Oriented Programming	3
CS 310	Data Structures	3
Total Credits		10

Additional Computer Science Courses

Code	Title	Credits
Select three from the following:		9-10
CS 222	Computer Programming for Engineers	
or CS 262	Introduction to Low-Level Programming	
CS 306	Synthesis of Ethics and Law for the Computing Professional (Mason Core)	
CS 321	Software Engineering	
CS 325	Introduction to Game Design	
CS 330	Formal Methods and Models	
CS 332	Object-Oriented Software Design and Implementation	
CS 367	Computer Systems and Programming	
CS 450	Database Concepts	
CS 451	Computer Graphics	
CS 455	Computer Communications and Networking	
CS 463	Comparative Programming Languages	
CS 465	Computer Systems Architecture	
CS 468	Secure Programming and Systems	
CS 471	Operating Systems	
CS 480	Introduction to Artificial Intelligence	
CS 483	Analysis of Algorithms	
CS 484	Data Mining

Computer Science, BS

Banner Code: VS-BS-CS

Academic Advising

Phone: 703-993-1530
Email: csug@gmu.edu
Website: http://cs.gmu.edu/prospective-students/undergraduate-programs/bs-in-computer-science/

The objectives of the Computer Science, BS program relate to the abilities of the graduates several years after graduation. Our graduates are expected within three to five years of graduation to have:

- Established themselves as successful and productive computing professionals or engaged in advanced study such as a graduate degree program.
- Worked effectively both in team environments and as individuals.
- Fulfilled their responsibilities in the areas of ethics, continuing professional development, and effective written and oral communications.

The bachelor's program in Computer Science is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

Admissions & Policies

Policies

Advanced Placement, Credit by Exam

A score of 4 on the Advanced Placement (AP) computer science exam qualifies the student for credit in CS 112 Introduction to Computer Programming. A score of 4 on the International Baccalaureate (IB) computer science exam qualifies students for credit in CS 112 Introduction to Computer Programming, and a score of 5 or more qualifies students for credit in CS 211 Object-Oriented Programming.

Change of Major

Students who are considering computer science as their major must meet with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. Students considering a change of major to computer science must have a GPA of at least 2.75 in all computer science and math courses, and successfully completed one of CS 112 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302778) or CS 211 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=302780), and one of MATH 113 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305052), MATH 114 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305053) or MATH 125 (http://catalog.gmu.edu/preview_course_nopop.php?catoid=29&coid=305056), with a grade of B or better. See Change of Major for more information.

Computer Science, Computer Engineering Double Major

Computer Science majors can earn a double major in Computer Science and Computer Engineering if they complete additional credits beyond the 120 credits required for the Computer Science degree. The additional credits must be part of an approved plan of study. For more information, visit the department website.

Cooperative Education

Students may participate in the Mason cooperative education program or a work-study program in the Washington, D.C. area.

Grades

Students must earn a C or better in any course intended to satisfy a prerequisite for a computer science course. Computer science majors may not use more than one course with grade of C- or lower toward department requirements.

Repeating Courses

Students may attempt an undergraduate course taught by the Volgenau School of Engineering twice. A third attempt requires approval of the department offering the course. This policy does not apply to STAT 250 Introductory Statistics I (Mason Core), which follows the normal university policy for repeating undergraduate courses.

The CS Department may not allow students to retake certain high-demand CS courses in which they have already earned a grade of C or better simply to improve their GPA.

Writing-Intensive Requirement

Computer science majors complete the writing-intensive requirement through a sequence of projects and reports in CS 306 Synthesis of Ethics and Law for the Computing Professional (Mason Core) and CS 321 Software Engineering. Faculty members provide feedback on students' expository writing.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements

Total credits: 120

Computer Science Core

Code	Title	Credits
CS 110	Essentials of Computer Science (Mason Core) [1]	3
CS 112	Introduction to Computer Programming	4
CS 211	Object-Oriented Programming	3
CS 262	Introduction to Low-Level Programming	3
CS 306	Synthesis of Ethics and Law for the Computing Professional (Mason Core)	3
CS 310	Data Structures	3
CS 321	Software Engineering	3
CS 330	Formal Methods and Models	3
CS 367	Computer Systems and Programming	4
CS 471	Operating Systems	3
CS 483	Analysis of Algorithms	3
Total Credits		35

[1] Must be taken within the first year as an Applied Computer Science or Computer Science major.

Senior Computer Science

Code	Title	Credits
Select one from the following:		3
CS 455	Computer Communications and Networking	
CS 468	Secure Programming and Systems	
CS 475	Concurrent and Distributed Systems	
CS 487	Introduction to Cryptography	
Select four additional courses from the following:		12
CS 425	Game Programming I	
CS 440	Language Processors and Programming Environments	
CS 450	Database Concepts	
CS 451	Computer Graphics	
CS 455	Computer Communications and Networking	
CS 463	Comparative Programming Languages	
CS 465	Computer Systems Architecture [1]	
CS 468	Secure Programming and Systems	
CS 469	Security Engineering	
CS 475	Concurrent and Distributed Systems	
CS 477	Mobile Application Development	
CS 480	Introduction to Artificial Intelligence	
CS 482	Computer Vision	
CS 484	Data Mining	
CS 485	Autonomous Robotics	
CS 487	Introduction to Cryptography	
CS 490	Design Exhibition [2]	
CS 491	Industry-Sponsored Senior Design Project [2]	
CS 499	Special Topics in Computer Science [3]	
MATH 446	Numerical Analysis I	
or OR 481	Numerical Methods in Engineering	
Total Credits		15

1 ECE 445 may be taken as a replacement for CS 465.

2 At most 3 credits total of CS 490 Design Exhibition and CS 491 Industry-Sponsored Senior Design Project may be counted toward the senior computer science requirement.

3 At most 3 credits total of CS 499 Special Topics in Computer Science may be counted toward the senior computer science requirement.

Mathematics

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
or MATH 123 & MATH 124	Calculus with Algebra/Trigonometry, Part A and Calculus with Algebra/Trigonometry, Part B (Mason Core)	
MATH 114	Analytic Geometry and Calculus II	4
MATH 125	Discrete Mathematics I (Mason Core)	3
MATH 203	Linear Algebra	3
MATH 213	Analytic Geometry and Calculus III	3
Total Credits		17

Note:

MATH 104 Trigonometry and Transcendental Functions, MATH 105 Precalculus Mathematics, MATH 108 Introductory Calculus with Business Applications (Mason Core), and courses with an IT designation (and any associated cross-listed courses) cannot be counted toward this degree.

Statistics

Code	Title	Credits
STAT 344	Probability and Statistics for Engineers and Scientists I [1]	3
Total Credits		3

1 Those planning to take MATH 352 Statistics may replace STAT 344 Probability and Statistics for Engineers and Scientists I with MATH 351 Probability.

Computer Science-Related Courses

Students may need to choose electives to satisfy prerequisites for the following courses:

Code	Title	Credits
Select 6 credits from the following:		6
STAT 354	Probability and Statistics for Engineers and Scientists II	
OR 335	Discrete Systems Modeling and Simulation	
OR 441	Deterministic Operations Research	
OR 442	Stochastic Operations Research	
ECE 301	Digital Electronics	
ECE 231	Digital System Design	
ECE 232	Digital System Design Lab	
ECE 350	Embedded Systems and Hardware Interfaces	
ECE 446	Device Driver Development	
ECE 447	Microcontrollers	
ECE 511	Computer Architecture	
SWE 419	Object-Oriented Software Design and Implementation	
SWE 432	Web Application Development	
SWE 437	Software Testing and Maintenance	
SWE 443	Software Architectures	
SYST 371	Systems Engineering Management	
SYST 470	Human Factors Engineering	
PHIL 371	Philosophy of Natural Sciences	
PHIL 376	Symbolic Logic	
ENGH 388	Professional and Technical Writing	
Any MATH or CS course numbered above 300 (except MATH 351) [1]		
Any SWE course numbered 300 or above except SWE 301, SWE 401 and SWE 510		
Total Credits		6

[1] Those planning to take MATH 352 Statistics may replace STAT 344 Probability and Statistics for Engineers and Scientists I with MATH 351 Probability.

Natural Science

Code	Title	Credits
Select 12 credits of natural science		12
Total Credits		12

The courses should be intended for science and engineering students and must include a two course sequence with laboratories. Some approved combinations have a total of more than 12 hours.

Approved Two-Course Sequences with Laboratories

Code	Title	Credits
Biology		
BIOL 102	Introductory Biology I-Survey of Biodiversity and Ecology (Mason Core)	4
BIOL 103 & BIOL 105	Introductory Biology II-Survey of Cell and Molecular Biology (Mason Core) and Introductory Biology II Laboratory (Mason Core)	4
Chemistry		
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	4
CHEM 212 & CHEM 214	General Chemistry II (Mason Core) and General Chemistry Laboratory II (Mason Core)	4
Geology		
GEOL 101	Introductory Geology I (Mason Core)	4
GEOL 102 & GEOL 104	Historical Geology (Mason Core) and Historical Geology Laboratory (Mason Core)	4
Physics		
PHYS 160 & PHYS 161	University Physics I (Mason Core) and University Physics I Laboratory (Mason Core)	4
PHYS 260 & PHYS 261	University Physics II (Mason Core) and University Physics II Laboratory (Mason Core)	4

Additional Mason Core

Students must complete all Mason Core requirements not fulfilled by major requirements.

Code	Title	Credits
Oral Communication		3
COMM 100	Public Speaking (Mason Core)	
or COMM 101	Fundamentals of Communication (Mason Core)	
Written Communication		3
ENGH 100	Composition for Multilingual Writers (Mason Core)	
or ENGH 101	Composition (Mason Core)	
Advanced Composition [1]		3
ENGH 302	Advanced Composition (Mason Core) (Natural Sciences section) [1]	
Literature		3
Arts		3
Western Civilization/World History		3
Social and Behavioral Sciences		3
Global Understanding		3
Total Credits		24

[1] CS majors must take the Natural Sciences section of ENGH 302 Advanced Composition (Mason Core).

Electives

Code	Title	Credits
Students must complete 8 elective credits		8
Total Credits		8

4-Year Plan

Bachelor of Science in Computer Science Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Honors

Honors in the Major

The Department of Computer Science offers a CS Honors Program for students with strong computational foundations and the drive to delve deeper into computing. The program is based on the bachelor of science in computer science and applied computer science curriculum and is distinct from the University Honors College curriculum.

Entry Requirements

Students must be seeking a Bachelor of Science in Computer Science or a Bachelor of Science in Applied Computer Science and must apply for entry into the CS Honors Program after completing 12 credits of CS courses. Applicants must meet the GPA requirements outlined below to enter into the CS Honors Program.

Honors Requirements

CS Honors Program students must fulfill all standard courses required by the Bachelor of Science in Computer Science or Applied Computer Science degree as well as the following additional requirements:

- GPA Requirement: Students must maintain an overall GPA of at least 3.50 and a GPA of at least 3.50 for courses which count towards the BS/CS or BS/ACS major including math, natural sciences, and all CS/SWE courses.
- Research Project Requirement: Students must complete a significant research project prior to graduation. Students should seek out a CS faculty member willing to serve as their research advisor for the project. The project should comprise original work by the student and be demonstrated via two channels:
  a. a written project report that is approved by the student's research advisor and submitted to the department;
  b. a presentation of the project to an audience of students and/or faculty.

- Advanced Course Requirement: At least two Advanced Courses must be completed. A complete list of acceptable advanced courses is maintained by the CS department and is available on the department web site.

Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain an undergraduate BS degree and the Statistical Science, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program **if such an accelerated** Statistical Science, MS **pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs.**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Statistical Science, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00.
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 213	Analytic Geometry and Calculus III	3
MATH 203	Linear Algebra	3
or MATH 321	Abstract Algebra	
STAT 250	Introductory Statistics I (Mason Core)	3
or STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	3
or MATH 351	Probability	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits satisfying degree requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 560	Biostatistical Methods	3
STAT 574	Survey Sampling I	3
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Computer Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Computer Science and an MS in Computer Engineering in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See
AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

This accelerated option is offered jointly by the Computer Science Department and the Electrical and Computer Engineering Department.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see
AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below:

Code	Title	Credits
CS 571	Operating Systems (to replace CS 471)	3
ECE 508	Internet of Things	3
ECE 511	Computer Architecture	3
ECE 512	Computer Architecture Security	3
ECE 516	Mobile Systems and Applications	3
ECE 527	Learning From Data	3
ECE 542	Computer Network Architectures and Protocols	3

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Computer Science, BS/Computer Science, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS can complete both a BS-CS and a Computer Science, MS in five years through the BS-CS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework, on reserve, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Curriculum and Instruction, Accelerated MEd (Secondary Education Computer Science Concentration)

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Computer Science (degree without concentration) and an MEd in Curriculum and Instruction (Secondary Education Computer Science concentration) (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/curriculum-instruction-med/)in an accelerated time-frame after satisfactory completion of a minimum of 143 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered jointly by the Department of Computer Science (https://catalog.gmu.edu/colleges-schools/engineering/computer-science/computer-science-bs/) and the School of Education (https://catalog.gmu.edu/colleges-schools/education-human-development/school-education/).

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies (https://catalog.gmu.edu/admissions/graduate-policies/) and Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies. For information specific to this accelerated master's program, see Application Requirements and Deadlines (https://cehd.gmu.edu/bachelors-accelerated-masters-program/).

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MEd program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA
- Completion of specific undergraduate coursework
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following which can be taken as Advanced Standing or Reserve Graduate credit (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) (to be determined by the student and their advisor):

Code	Title	Credits
EDRD 619	Literacy in the Content Areas	3
SEED 522	Foundations of Secondary Education	3
SEED 540	Human Development and Learning: Secondary Education	3
SEED 566	Teaching Computer Science in the Secondary School	3
SEED 676	Advanced Methods of Teaching Computer Science in the Secondary School	3
SEED approved elective		

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Computer Science, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS can complete both a BS-CS and a Data Analytics Engineering, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models .

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 9 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 550	Database Systems (to replace CS 450)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students must still take the DAEN core courses (AIT 580 Analytics Big Data to Information, OR 531 Analytics and Decision Analysis, and STAT 515 Applied Statistics and Visualization for Analytics).
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS can complete both a BS-CS and a Information Security and Assurance, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Information Systems, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS can complete both a BS-CS and an Information Systems, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75

undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Note:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Computer Science, BS and an Operations Research, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Computer Science, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and Science requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Computer

Science course list and Systems Engineering and Operations Research course list given below.

- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Computer Science course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Computer Science courses:

Code	Title	Credits
CS 540	Language Processors	
CS 550	Database Systems	
CS 551	Computer Graphics	
CS 555	Computer Communications and Networking	
CS 571	Operating Systems	
CS 580	Introduction to Artificial Intelligence	
CS 583	Analysis of Algorithms	
CS 584	Theory and Applications of Data Mining	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Software Engineering, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS program can complete both a BS-CS and a Software Engineering, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models .

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Computer Science, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Computer Science, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and Science requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Computer Science course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Computer Science course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Computer Science courses:

Code	Title	Credits

Website: http://cs.gmu.edu/prospective-students/ms-programs/ms-in-cs/

The Computer Science graduate program prepares students for research and professional practice in computer science and related technologies. The program includes both fundamentals and advanced work in the areas of artificial intelligence and databases, programming languages and software engineering, systems and networks, theoretical computer science, and visual computing. Graduate classes are divided into basic classes, which have no graduate course prerequisite, and advanced classes, which have a graduate class as a prerequisite. Graduate classes are generally offered in the late afternoon and evening. Financial aid in the form of graduate assistantships may be available for full-time degree-seeking students.

Admissions & Policies

Admissions

In addition to fulfilling Mason's admission requirements for graduate study, applicants must meet the following requirements:

- Hold a baccalaureate degree that includes:
  - Data Structures and Algorithms (CS 310 Data Structures)
  - Automata Theory and Formal Languages (CS 330 Formal Methods and Models)
  - Computer Architecture including Assembly Language (CS 367 Computer Systems and Programming)
  - Calculus I and II
  - A substantial course in discrete mathematics such as MATH 125 Discrete Mathematics I (Mason Core)
- Earned a cumulative GPA of 3.00 or higher for the last two years of undergraduate work, preferably with a major in a technical field such as computer science, mathematics, physical sciences, engineering, or information systems.
- Submit transcripts of all post secondary education, complete the online application, including a goals statement, resume, and two letters of recommendation.
- A valid GRE score is required for those who have not earned a Bachelor's degree or higher from a US institution.
- English Proficiency Exam Score (https://www2.gmu.edu/admissions-aid/how-apply/graduate/standardized-test-information/), if applicable.

Requirements

Degree Requirements

Total credits: 30

Required Courses and Plan of Study

In addition to general university requirements, completion of the MS in CS requires 30 credits of graduate courses.

To ensure that students have uniform preparation for the core courses, all students are required to take CS 530 Mathematical Foundations of Computer Science and CS 531 Computer Systems and Fundamentals of Systems Programming as their first two courses in the program. Students with a strong academic background in computer science may have CS 530 and CS 531 substituted for other elective courses at the discretion of the program director. Students enrolled in PhD CS or the Bachelor's/Accelerated Master's program cannot take these courses for credit. Students also have the opportunity to indicate that they have the requisite knowledge corresponding to CS 530 and CS 531 by passing an exam. The exams are given before classes begin in January and August, and can only be taken once. Students failing either one of the exams must take the equivalent course in their first semester. Students who successfully test out of CS 530 or CS 531 will be required to fulfill the credit requirement with other coursework chosen under advisement.

Courses are grouped in the following five broad areas: Artificial Intelligence and Databases, Programming Languages and Software Engineering, Systems and Networks, Theoretical Computer Science, and Visual Computing. The list of pre-approved courses with their areas follows.

All the following requirements should be satisfied for the MS in CS degree:

- CS 583 Analysis of Algorithms (from the Theoretical Computer Science area) and two additional core courses from two other areas must be successfully completed with a grade of B- or higher. Students receiving lower than a B- must retake the course or face termination.
- At least four courses (12 credits) must be chosen from the advanced courses in the list of pre-approved courses from at least two different areas.

- At least six courses, including two advanced courses, must be designated CS.
- At least eight courses must be taken from the list of pre-approved courses. Up to two computer science-related courses that are not on the list of pre-approved courses may be taken with prior approval of the program director.

Plan of Study

Before the end of the first semester, students must have a plan of study approved by their academic advisor. This plan should be kept up to date by regular consultation with the academic advisor.

Core Courses by Area

Code	Title	Credits
Artificial Intelligence and Databases		
CS 550	Database Systems	
CS 580	Introduction to Artificial Intelligence	
CS 584	Theory and Applications of Data Mining	
Programming Languages and Software Engineering		
CS 540	Language Processors	
SWE 619	Object-Oriented Software Specification and Construction	
SWE 621	Software Design and Architecture	
Systems and Networks		
CS 555	Computer Communications and Networking	
CS 571	Operating Systems	
ISA 562	Information Security Theory and Practice	
Theoretical Computer Science		
CS 583	Analysis of Algorithms [1]	
Visual Computing		
CS 551	Computer Graphics	

[1] Must be successfully completed with a grade of B- or better

Preapproved Basic and Advanced MS CS Courses by Area

Code	Title	Credits
Artificial Intelligence and Databases		
Basic Courses:		
CS 550	Database Systems	
CS 580	Introduction to Artificial Intelligence	
CS 584	Theory and Applications of Data Mining	
INFS 623	Web Search Engines and Recommender Systems	
Advanced Courses:		
CS 595	Basic Topics in Computer Science	
CS 650	Advanced Database Management	
CS 657	Mining Massive Datasets with MapReduce	
CS 667	Biometrics and Identity Management	
CS 681	Instructable Cognitive Agents	
CS 685	Autonomous Robotics	
CS 687	Advanced Artificial Intelligence	
CS 688	Machine Learning	
CS 689	Planning Motions of Robots and Molecules	
CS 747	Deep Learning	
CS 782	Advanced Machine Learning	
CS 787	Decision Guidance Systems	
INFS 740	Database Programming for the World Wide Web	
INFS 760	Advanced Database Management	
INFS 772	Intelligent Agents and the Semantic Web	
INFS 774	Enterprise Architecture	
Programming Languages and Software Engineering		
Basic Courses:		
CS 540	Language Processors	
SWE 619	Object-Oriented Software Specification and Construction	
SWE 620	Software Requirements Analysis and Specification	
SWE 621	Software Design and Architecture	
SWE 622	Distributed Software Engineering	
Advanced Courses:		
CS 640	Advanced Compilers	
ISA 681	Secure Software Design and Programming	
SWE 631	Software Design Patterns	
SWE 632	User Interface Design and Development	
SWE 637	Software Testing	
SWE 642	Software Engineering for the World Wide Web	
SWE 645	Component-Based Software Development	
SWE 721	Reusable Software Architectures	
SWE 737	Advanced Software Testing	
SWE 760	Software Analysis and Design of Real-Time Systems	
Systems and Networks		
Basic Courses:		
CS 531	Computer Systems and Fundamentals of Systems Programming	
CS 555	Computer Communications and Networking	
CS 571	Operating Systems	
CS 587	Introduction to Cryptography	
ISA 562	Information Security Theory and Practice	
ISA 564	Security Laboratory	
Advanced Courses:		
CS 635	Foundations of Parallel Computation	
CS 655	Wireless and Mobile Computing	
CS 658	Networked Virtual Environments	
CS 672	Computer System Performance Evaluation	
CS 673	Multimedia Computing and Systems	
CS 675	Distributed Systems	
CS 706	Concurrent Software Systems	
CS 719	Scalable Internet Services	

CS 756	Performance Analysis of Computer Networks
CS 773	Real-Time Systems Design and Development
CS 779	Topics in Resilient and Secure Computer Systems
CS 788	Autonomic Computing
ISA 656	Network Security
ISA 673	Operating Systems Security
ISA 674	Intrusion Detection
ISA 697	Topics in Information Security
ISA 763	Security Protocol Analysis
ISA 764	Security Experimentation
ISA 785	Research in Digital Forensics
Theoretical Computer Science	
Basic Courses:	
CS 530	Mathematical Foundations of Computer Science
CS 583	Analysis of Algorithms
Advanced Courses:	
CS 600	Theory of Computation
CS 630	Advanced Algorithms
CS 633	Computational Geometry
CS 683	Parallel Algorithms
CS 684	Graph Algorithms
Visual Computing	
Basic Courses:	
CS 551	Computer Graphics
Advanced Courses:	
CS 662	Computer Graphics Game Technologies
CS 663	Computational Design
CS 667	Biometrics and Identity Management
CS 682	Computer Vision
CS 686	Image Processing and Applications
CS 752	Interactive Graphics Software
CS 774	Computational Vision
CS 777	Human-Computer Intelligent Interaction

Project or Thesis

Three to six credit hours of the advanced classes may be replaced by a project or thesis with consent of a faculty sponsor and faculty advisor. The project or thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. The thesis must meet relevant university requirements.

Code	Title	Credits
Select one from the following:		
CS 798	Project Seminar (3 credits)	
CS 799	Thesis (6 credits)	

Additional Pre-approved CS Courses

These courses are not classified by area. Note that CS 695 Topics in Computer Science/CS 795 Advanced Topics in CS can be used to satisfy the breadth requirement if the area is listed in the syllabus for the course.

Code	Title	Credits
CS 595	Basic Topics in Computer Science	3
CS 695	Topics in Computer Science	3
CS 697	Independent Reading and Research	1-3
CS 795	Advanced Topics in CS	3
CS 798	Project Seminar	3
CS 799	Thesis	1-6
CS 895	Research Topics in CS	3

Concentration in Cyber Security (CYSC)

In addition to the existing program requirements, MS CS degree students must satisfy the following requirements.

Students must take 5 courses from the following categories:

Code	Title	Credits
Required:		
ISA 656	Network Security	3
ISA 562	Information Security Theory and Practice	3
Choose 2-3 elective courses:		6-9
CS 587	Introduction to Cryptography	
ISA 564	Security Laboratory	
ISA 673	Operating Systems Security	
ISA 674	Intrusion Detection	
ISA 681	Secure Software Design and Programming	
ISA 763	Security Protocol Analysis	
ISA 764	Security Experimentation	
Choose 0-1 related course:		0-3
CS 540	Language Processors	
CS 555	Computer Communications and Networking	
CS 571	Operating Systems	
CS 600	Theory of Computation	
CS 655	Wireless and Mobile Computing	

Thesis:

Students, with the consent of a faculty sponsor and faculty advisor, may also elect a 6-credit thesis (CS 799 Thesis). The thesis must be guided and approved by a committee of three appropriate faculty members and presented at an appropriate forum. If the faculty advisor and the program director agree that the thesis is appropriate for the concentration the students will need to complete the two courses from the category 1 and one course from the category 2 in addition to the thesis to complete the Concentration requirements.

Concentration in Machine Learning (ML)

In addition to the existing program requirements, MS CS degree students must satisfy the following requirements.

Students must take 5 courses from the following categories:

Code	Title	Credits
Required:		
CS 584	Theory and Applications of Data Mining	3
CS 688	Machine Learning	3
Choose 2-3 elective courses:		6-9

CS 657	Mining Massive Datasets with MapReduce	
CS 681	Instructable Cognitive Agents	
CS 747	Deep Learning	
CS 782	Advanced Machine Learning	
Choose 0-1 related course:		0-3
CS 580	Introduction to Artificial Intelligence	
CS 687	Advanced Artificial Intelligence	
CS 685	Autonomous Robotics	
CS 682	Computer Vision	

Thesis (optional):
Students, with the consent of a faculty sponsor and faculty advisor, may also elect a 6-credit thesis (CS 799 Thesis). The thesis must be guided and approved by a committee of three faculty members and presented to the committee. If the faculty advisor and the program director agree that the thesis is appropriate for the concentration the student will need to complete the two courses from category 1 and one course from category 2 in addition to the thesis to complete the concentration requirements.

Accelerated Master's

Applied Computer Science, BS/Computer Science, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS can complete both a BS-ACS and a Computer Science, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Computer Science, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS can complete both a BS-CS and a Computer Science, MS in five years through the BS-CS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework, on reserve, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, PhD

Banner Code: VS-PHD-CS

Academic Advising

Phone: 703-993-1530
Email: csphd@gmu.edu
Website: http://cs.gmu.edu/prospective-students/phd-program/

The PhD program in Computer Science prepares students to become technical leaders in their fields of research. We have a world-class faculty with research expertise in a diverse set of computer science areas and our program is nationally ranked. Additionally, we are located in in the suburbs of Washington, DC at the center of one of the largest computer science and information technology corridors in the nation and a major center for science and engineering research and funding. Our PhD graduates have been highly successful both in academic and industrial positions.

The Computer Science PhD program requires coursework, successful completion of a breadth requirement, comprehensive examination, and a doctoral dissertation that is first proposed and eventually defended. Mason's general doctoral requirements (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) apply to this program.

Admissions & Policies

Admissions

All applicants must have an undergraduate degree, and their prior academic work must show a strong academic background in computer science. In addition, the GRE General Test is required from every applicant. Finally, each applicant must provide a resume, brief statement of career goals and personal aspirations, as well as three letters of reference. Each application receives careful consideration from the PhD Admission Committee.

Policies

Program Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research.

Requirements

Degree Requirements

Total credits: 72

Doctoral Coursework

Code	Title	Credits
The 48 credits of regular coursework required for the degree consists of the following courses:		
CS 600	Theory of Computation (Must be completed with a B+ or better)	3
CS 700	Research Methodology in Computer Science (Must be completed with a B or better)	3
CS 701	Research Experience in Computer Science (Must be completed with a B or better)	3
CS 800	Computer Science Colloquium (Must enroll in course for two semesters)	0
Nine credits of advanced graduate courses [1]		9
30 credits of graduate level courses in the Computer Science department or a field related to the student's doctoral research area [2]		30
Total Credits		48

1. Must be selected in consultation with the student's advisor from a list maintained by the CS department. Independent study courses cannot be used towards the 9 credit hours that must be obtained in advanced graduate courses.
2. Must be selected in consultation with the student's advisor.

Note:

With careful selection of courses, students may earn an MS degree as part of their PhD studies.

Reduction of Credit

Students entering the PhD program with an approved MS degree can receive a reduction of credit for up to 30 credits. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school.

Breadth Requirement

Students must demonstrate breadth of knowledge in computer science by obtaining superior grades in four graduate courses, including CS 583 Analysis of Algorithms. Collectively the four courses must span at least three of the following eight areas: Theoretical Computer Science, Systems and Networks, Security, Programming Languages, Software Engineering, Artificial Intelligence, Databases, and Visual Computing.

The grades obtained in the four selected courses must meet the following requirements:

- Students must obtain an A- or better grade in at least three of the four courses
- In the fourth course, students must obtain a grade of B or better.

A list of courses that can be used to satisfy the breadth requirement is maintained by the CS department.

A course that is used to satisfy the breadth requirement may be repeated at most once (the grade received in the last attempt is considered when evaluating the breadth requirement).

To satisfy the breadth requirement, a student can use the grades (s)he received in the past, provided that at most five years elapsed since the course was taken. The course must have been taken at GMU. Exceptions to this rule are rare and require filing a petition with supplementary documents to the Computer Science department.

An alternative way to satisfy the breadth requirement is to pass the written qualifying exams (https://cs.gmu.edu/current-students/doctoral-students/breadth-requirement/qualifying-exams/). The exams are offered once every semester (usually two weeks before the semester begins).

To qualify, each student must pass exams in **four areas**, one of which is *Foundations of Computer Science*. The other three areas are chosen from these eight areas: *computer systems, networks, compilers and languages, software construction, software testing, artificial intelligence, database systems,* and *information security*.

The four exams must be attempted in the same semester, and a failed exam may be retaken once only, in the next semester. A student who fails to pass the four exams in two consecutive semesters is deemed to have failed to satisfy the breadth requirement, and is subject to termination.

If the student takes one or more written qualifying exams, the breadth requirement can only be satisfied by passing the qualifying exams (the criterion based on course performance cannot apply).

Dissertation Research

A minimum of 24 credits of CS 998 Doctoral Dissertation Proposal and CS 999 Doctoral Dissertation must be completed, of which at least 12 must be in CS 999 Doctoral Dissertation. Only 24 credits of CS 998 Doctoral Dissertation Proposal and CS 999 Doctoral Dissertation may be applied toward the degree. Students may enroll in CS 998 Doctoral Dissertation Proposal only after passing the breadth requirement, and they may enroll in CS 999 Doctoral Dissertation only after advancing to candidacy.

Code	Title	Credits
Select 24 credits from the following:		24
CS 998	Doctoral Dissertation Proposal	
CS 999	Doctoral Dissertation (minimum 12 credits required)	

Comprehensive Exam

To demonstrate the depth of knowledge in their intended area of research, the students must pass a comprehensive exam. The comprehensive exam is administered by a committee consisting of four members: the research advisor, an additional faculty member selected by the student, and two tenured CS faculty members selected by the PhD program director. One of the members selected by the program director chairs the committee.

The comprehensive exam has both written and oral components. The student is required to initiate the comprehensive exam procedure by submitting a form to the CS department at least four months prior to the target oral exam date. For the written component of the exam, the student prepares a critical review of research literature on a topic in the intended area of research. The report should synthesize the previous research in the target area with particular emphasis on open problems. The report should be 8-10 pages long and should contain a minimum of 20 references. The written report must be received by the committee members at least one month before the oral exam date.

The oral exam includes a presentation by the student based on the written report. The duration of the oral exam is typically two hours with the presentation limited to 20 minutes. The exam is public but only the members of the committee are permitted to ask questions.

The scope of the oral exam is defined by a **reading list** that includes research articles selected by the student and advisor, as well as the textbooks and articles related to the intended **broader** research area of the student selected by the other members of the committee and the CS department. The complete reading list, as well as the members of the examination committee will be finalized and communicated to the student by the CS department at least three months before the oral exam date. The comprehensive exam reading list becomes part of the student's record.

When in both written and oral components at least three out of four committee members find the student's performance satisfactory, the student passes the comprehensive exam. Otherwise the student is allowed to re-take the exam only once (with both written and oral components) and no later than the next semester. If the written report is found unsatisfactory by two or more committee members, the oral exam is not administered in that attempt. Students who fail the comprehensive exam are subject to termination.

The student can form a dissertation committee only after successfully passing the comprehensive exam.

Milestones and Deadlines

The students are expected to make steady progress in the program by completing the required coursework and research-related milestones within the specified deadlines. Students who fail to meet the deadlines

will be dismissed from the program unless there are extenuating circumstances approved by the department.

Successful completion of CS 700 Research Methodology in Computer Science: Within the first two semesters in the program.

Successful completion of CS 701 Research Experience in Computer Science: Within the first 18 credits in the program.

Determining the research advisor: Within the first 24 credits in the program or three years, whichever comes first.

Satisfy the breadth requirement: Within the first 24 credits in the program or three years, whichever comes first.

Successful completion of both instances of CS 800 Computer Science Colloquium: Within the first 36 credits in the program or five years, whichever comes first.

Taking the comprehensive exam: Within the first 36 credits in the program (cannot be postponed beyond five years). The student must pass the exam in at most two attempts.

Advancing to candidacy and graduation: Time limits are determined by the general university rules that apply to the PhD programs.

A student who misses any time limits is subject to termination.

Annual Evaluation

All students in the program (except the students in their first year in the PhD program) are required to complete an annual progress report (http://cs.gmu.edu/resources/student-forms/). This report must be submitted **by the end of September** every year to the Administrative Coordinator of the CS PhD program.

The annual reports are reviewed by the members of the faculty to assess the student's progress in the program and feedback is provided to each student.

Dissertation Committee Selection

Each student must form a dissertation committee, comprising four or five individuals. Three members of the committee must be Graduate Faculty in the Computer Science Department. The fourth member should be a member of the George Mason University graduate faculty who is outside the department. A fifth member may be from outside the university. The chair of the dissertation committee, who must also be the dissertation director, must be a member of the Graduate Faculty in the Volgenau School. The committee must be approved by the chair of the Computer Science Department.

Dissertation Proposal

Each student must prepare a written dissertation proposal. While preparing this proposal, the student enrolls in CS 998 Doctoral Dissertation Proposal. The proposal must be made available to the committee at least two weeks in advance of the presentation. The proposal must be presented to and approved by the dissertation committee. The committee determines whether the proposal has merit and can lead to significant contributions to the area and whether the student has the knowledge and skills to complete the proposed work successfully and in a timely manner. Students may present their dissertation proposal only after passing the comprehensive exam, and the presentation may not be on the same day as the comprehensive exam. If the student fails to defend the proposal, the student may present a dissertation proposal a second time at a later date. Failure in the second attempt results in termination from the program. On completing this requirement successfully, the student is advanced to candidacy for the PhD degree.

Dissertation Preparation and Defense

While preparing the dissertation, the candidate must enroll in CS 999 Doctoral Dissertation each term. When the work is deemed complete, the dissertation is defended. The public defense is preceded by a predefense meeting in which only the candidate, the dissertation committee members, and the director of the PhD in Computer Science Program (or his or her representative) are present. If the committee approves, the candidate may then schedule the final public defense. There should be at least one month between the predefense meeting and the defense, and the defense must be announced at least two weeks in advance. The dissertation must be made available to the committee at least two weeks in advance of the defense. The entire dissertation committee must be present at the defense, unless an exception is approved by the director of the PhD in Computer Science Program in advance of the defense. The dissertation must make significant contributions to its area and be publishable in refereed journals or conferences. If the candidate defends the dissertation successfully, the dissertation committee recommends that the final form of the dissertation be completed under the supervision of the dissertation director and the graduate faculty of Mason accept the candidate for the PhD degree. If the candidate fails to defend the dissertation, the candidate may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request other than general time limits for the doctoral degree and an additional predefense is not required. A candidate who fails a second attempt to defend the dissertation is terminated from the program.

Information Security and Assurance Graduate Certificate

Banner Code: VS-CERG-ISA

Academic Advising

Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/graduate-certificates/

This graduate certificate program is intended for students interested in science and methods for ensuring secrecy, integrity, availability, and legitimate use of information systems. The certificate may be pursued concurrently with any of the graduate programs in the Volgenau School.

This graduate certificate may be pursued on a full-or part-time basis

Admissions & Policies

Admissions

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits.

Applicants must possess knowledge equivalent to that provided by the following courses:

Code	Title	Credits
INFS 501	Discrete and Logical Structures for Information Systems	3
SWE 510	Object-Oriented Programming in Java	3
INFS 515	Computer Organization Course and Operating Systems	3
INFS 519	Program Design and Data Structures	3

Students must also possess the equivalent knowledge of CS 555 Computer Communications and Networking and CS 571 Operating Systems, or the prerequisite courses required for the selected electives. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a full-or part-time basis.

Students must complete 12 credit hours (four courses) with an average GPA of 3.0 or higher.

Required Courses

Code	Title	Credits
ISA 562	Information Security Theory and Practice	3
ISA 656	Network Security	3
Total Credits		6

Additional Courses

Code	Title	Credits
Select two courses from the following:		6
ISA courses at the 600 and 700 level [1]		
ISA 564	Security Laboratory	
Total Credits		6

[1] Excluding ISA 697 Topics in Information Security, ISA 796 Directed Readings in Information Security, ISA 797 Advanced Topics in Information Security, and ISA 798 Research Project.

Information Security and Assurance, MS

Banner Code: VS-MS-ISA

Academic Advising

Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-information-security-and-assurance/

The Department of Computer Science's MS degree in Information Security and Assurance prepares graduates to fill the current and future need for information security and assurance professionals. Graduates work in a wide variety of capacities, protecting the information systems of different types of organizations and supporting the nation's information infrastructure. The Master of Science in Information Security and Assurance provides students with the general and technical knowledge and skills to understand the relationship between information security and advancing information systems technology. The program gives graduates a theoretical understanding of the science and methodologies for ensuring the secrecy and integrity of data, as well as the availability and legitimate use of data and information systems.

Students focus on the technical and management aspects of information security and examine ways to provide secure information processing systems by investigating operating systems security, distributed secure system architectures, database security, software applications security, security policies, secure e-commerce, network and distributed systems security, cryptography, and security protocols. Graduates of the program are actively recruited by federal, state, and local governments, as well as the private sector. Typical employers include Internet-based companies, software companies, banks and insurance companies, and in general any organization that depends heavily on the use of IT. All classes are scheduled in the late afternoon and early evening to accommodate employed students.

Admissions & Policies

Admissions

Eligibility and Application Requirements

Applicants must hold a four-year (120-credit minimum) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Other requirements are as follows:

- Submit the appropriate application with two letters of recommendation from people directly knowledgeable of the applicant's professional and academic competence, a one-page goals statement, and a work resume.
- International students must submit their English Proficiency scores.

Policies

Foundation Requirements

To succeed in graduate courses, students entering the MS program must have coursework or equivalent knowledge in the following five foundation areas: (1) **introductory programming** in any programming language; (2) knowledge of an **object-oriented programming** language such as Java, C++, or C#; (3) **data structures** and algorithms; (4) **machine organization** such as those given in computer system architecture or assembly language courses; (5) and topics in **discrete mathematics**, including sets, propositional and predicate logic, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be demonstrated in one of several ways:

1. Applicable undergraduate coursework: Such courses must appear on transcripts from the student's undergraduate university, or another accredited university. Applicable courses from George Mason University and Northern Virginia Community College (NVCC) are given here:
   a. **Foundation:** OO programming
      - **GMU CS:** CS 211 Object-Oriented Programming
      - **GMU IT:** IT 106 Introduction to IT Problem Solving Using Computer Programming & IT 206 Object Oriented Techniques for IT Problem Solving
      - **NVCC:** CSC 201
   b. **Foundation:** Data structures
      - **GMU CS:** CS 310 Data Structures
      - **GMU IT:** IT 306 Data Structures and Algorithms in Java
      - **NVCC:** None
   c. **Foundation:** Machine organization
      - **GMU CS:** CS 367 Computer Systems and Programming or CS 465 Computer Systems Architecture
      - **GMU IT:** IT 342 Operating Systems Fundamentals
      - **NVCC:** None
   d. **Foundation:** Discrete math
      - **GMU Math:** MATH 125 Discrete Mathematics I (Mason Core)
      - **NVCC:** MATH 288

- Preparatory coursework taken at GMU: The CS department offers the following bridge foundation courses: (1-2) SWE 510 Object-Oriented Programming in Java, (3) INFS 519 Program Design and Data Structures, (4) INFS 515 Computer Organization Course and Operating Systems, and (5) INFS 501 Discrete and Logical Structures for Information Systems. These courses may be taken by students in non-degree or provisional status.
- Passing appropriate testout exams: Students can self-prepare and attempt testout exams for SWE 510 Object-Oriented Programming in Java, INFS 519 Program Design and Data Structures, INFS 515 Computer Organization Course and Operating Systems, and INFS 501 Discrete and Logical Structures for Information Systems. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students who fail any one of the exams must take the equivalent course before enrolling in the core curriculum courses.
- Eligible domestic students who lack one or more foundations may be admitted provisionally and required to take the appropriate preparatory course or pass the testout exam. Other students may be advised to learn the foundation material and re-apply.

Advising

The department holds orientation meetings each January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site (https://cs.gmu.edu/).

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This serves as a planning guide for the student.

Requirements

Degree Requirements

Total credits: 30

Completion of the degree program requires a minimum of 30 approved graduate credits (10 courses). Students must choose a concentration.

Required Core Courses

These courses provide the necessary background and fundamentals of information systems security and assurance. To continue in the program, students are required to obtain a B- or higher grade in the core courses. Students receiving lower than a B- must retake the course or face termination.

Code	Title	Credits
ISA 562	Information Security Theory and Practice	3
ISA 656	Network Security	3
One of the following:		3
INFS 612	Principles and Practices of Communication Networks	
CS 555	Computer Communications and Networking [1]	
Total Credits		9

[1] Required for students who select the Network and System Security concentration.

Concentration in Applied Cyber Security (ACBS)

Students must take any five courses from the list below. At least three of the five courses must be designated ISA or CS.

Code	Title	Credits
Select five courses from the following:		15
CS 667	Biometrics and Identity Management	
ISA 650	Security Policy	
ISA 652	Security Audit and Compliance Testing	
ISA 681	Secure Software Design and Programming	
ISA 763	Security Protocol Analysis	
ISA 785	Research in Digital Forensics	
DFOR 663	Operations of Intrusion Detection for Forensics	
DFOR 761	Malware Reverse Engineering	
DFOR 780	Advanced Topics in Digital Forensics	
ECE 646	Applied Cryptography	
ECE 746	Advanced Applied Cryptography	
Total Credits		15

Concentration in Network and System Security (NSS)

Code	Title	Credits
ISA 564	Security Laboratory	3
Select four courses from the following:		12

CS 530	Mathematical Foundations of Computer Science	
CS 531	Computer Systems and Fundamentals of Systems Programming	
CS 571	Operating Systems [1]	
CS 779	Topics in Resilient and Secure Computer Systems	
ISA 673	Operating Systems Security	
ISA 674	Intrusion Detection	
ISA 681	Secure Software Design and Programming	
ISA 763	Security Protocol Analysis	
ISA 764	Security Experimentation	
ECE 646	Applied Cryptography	
ECE 746	Advanced Applied Cryptography	
Total Credits		15

[1] Students who elect to take CS 571 Operating Systems but who have not taken CS 367 Computer Systems and Programming or its equivalent are advised to take CS 531 Computer Systems and Fundamentals of Systems Programming first.

Additional Courses

Code	Title	Credits
All students select two remaining courses from any combination of the following: [1]		6
ISA 500, 600, and 700 level courses		
CS 500, 600, and 700 level courses		
Courses from the pre-approved electives list (follows)		
ISA 799	Thesis (must take 6 credits)	
Total Credits		6

[1] Students may choose other graduate electives with the consent of their faculty advisor and the graduate coordinator.

Pre-Approved Electives by Program

- Information Systems (INFS)
- Software Engineering (SWE)
- Computer Forensics (CFRS)
- Electrical and Computer Engineering (ECE)

Information Systems (INFS)

Code	Title	Credits
INFS 623	Web Search Engines and Recommender Systems	3
INFS 740	Database Programming for the World Wide Web	3
INFS 760	Advanced Database Management	3

Accelerated Master's

Applied Computer Science, BS/ Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS program can complete both a BS-ACS and an Information Security and Assurance, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/ Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3

CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS can complete both a BS-CS and a Information Security and Assurance, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Information Technology, BS/Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Security and Assurance, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 60 undergraduate credits and take graduate

level courses after completion of 75 credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Information Security and Assurance, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 6 credits) overlapping from the following courses:

Code	Title	Credits
ISA 562	Information Security Theory and Practice (satisfies IT 462 requirement in the BS INFT program)	3
ECE 646	Applied Cryptography (satisfies IT 466 requirement in the BS INFT program)	3

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Systems, MS

Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-information-systems/

Modern information systems manage data, information and knowledge to support enterprise functions and decision making as well as human social activity over the Internet. Increasingly, these systems are distributed, collaborative, involve big data and hosted in the cloud.

The mission of the MSIS program is to allow students of diverse baccalaureate and professional backgrounds to obtain a high-quality MS degree that:

- provides students with the theoretical knowledge and hands-on project experience needed to analyze, design, build, deploy, maintain, manage and promote effective organizational use of modern information systems;
- allows students to further specialize in related areas of big data, data and knowledge engineering, decision support systems, web-based software engineering and information security assurance; and,
- prepares students for careers in information systems in large and small organizations in both industry and government.

Career paths open to graduates include systems analyst, data administrator, database administrator, information architect, systems architect, decision analyst, data warehouse administrator, database application developer, web-based information systems designer and developer, information engineer, knowledge engineer, chief information officer, chief knowledge officer, chief privacy officer and project manager.

Admissions & Policies

Admissions

Eligibility and Application Requirements

Applicants must hold a four-year (120-credit minimum) baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants also must submit the following:

- A one-page goals statement
- A work resume.
- International students must submit their English proficiency scores.

Policies

Foundation Requirements

To succeed in graduate courses, students entering the MS program must have coursework or equivalent knowledge in the following five foundation areas: (1) introductory programming in any programming language; (2) knowledge of an object-oriented programming language such as Java, C++, or C#; (3) data structures and algorithms; (4) machine organization such as those given in computer system architecture or assembly language courses; (5) and topics in discrete mathematics, including sets, propositional and predicate logic, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be demonstrated in one of several ways:

1. Applicable undergraduate coursework: Such courses must appear on transcripts from the student's undergraduate university, or another accredited university. Applicable courses from George Mason University and Northern Virginia Community College (NVCC) are given here:
   a. **Foundation:** OO programming
      - **GMU CS:** CS 211 Object-Oriented Programming
      - **GMU IT:** IT 106 Introduction to IT Problem Solving Using Computer Programming & IT 206 Object Oriented Techniques for IT Problem Solving
      - **NVCC:** CSC 201
   b. **Foundation:** Data structures
      - **GMU CS:** CS 310 Data Structures
      - **GMU IT:** IT 306 Data Structures and Algorithms in Java
      - **NVCC:** None
   c. **Foundation:** Machine organization
      - **GMU CS:** CS 367 Computer Systems and Programming or CS 465 Computer Systems Architecture
      - **GMU IT:** IT 342 Operating Systems Fundamentals
      - **NVCC:** None
   d. **Foundation:** Discrete math
      - **GMU Math:** MATH 125 Discrete Mathematics I (Mason Core)
      - **NVCC:** MATH 288

2. Preparatory coursework taken at GMU: The CS department offers the following bridge foundation courses: (1-2) SWE 510 Object-Oriented Programming in Java, (3) INFS 519 Program Design and Data Structures, (4) INFS 515 Computer Organization Course and Operating Systems, and (5) INFS 501 Discrete and Logical Structures for Information Systems. These courses may be taken by students in non-degree or provisional status.
3. Passing appropriate testout exams: Students can self-prepare and attempt testout exams for SWE 510 Object-Oriented Programming in Java, INFS 519 Program Design and Data Structures, INFS 515 Computer Organization Course and Operating Systems, and INFS 501 Discrete and Logical Structures for Information Systems. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students who fail any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Eligible domestic students who lack one or more foundation may be admitted provisionally and required to take the appropriate preparatory course or pass the testout exam. Other students may be advised to learn the foundation material and re-apply.

Advising

The department holds orientation meetings in January and August to advise newly admitted and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site (https://cs.gmu.edu/).

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements. A plan of study form for the MS degree should be completed and submitted by the student soon after admission to the program. This plan serves as a guide for the student.

Requirements

Degree Requirements

Total credits: 30

Core Courses

To provide a common background in the fundamentals of information systems, the following core courses, which constitute the technical body of knowledge for the program, are required of all students. Students with strong academic background in mathematical foundations of computer science may have CS 530 Mathematical Foundations of Computer Science substituted for another elective course at the discretion of the program director.

Code	Title	Credits
CS 530	Mathematical Foundations of Computer Science	3
CS 550	Database Systems	3
INFS 612	Principles and Practices of Communication Networks	3
INFS 622	Information Systems Analysis and Design	3
INFS 740	Database Programming for the World Wide Web	3
Total Credits		15

Electives

Code	Title	Credits
Five courses selected from the lists which follow.		15
Total Credits		15

Electives are organized into the following emphasis areas: database management, data mining, electronic commerce, software engineering, knowledge management, and information security and assurance.

In addition to the core courses taken as part of the MS-ISYS curriculum, students may choose an emphasis within the program by taking five courses from one of the emphasis areas listed below. Students may also choose electives spanning several emphasis areas; they may also plan their electives so as to obtain certificates offered by the department. A list of approved electives is given within emphasis areas and by graduate program. A full list follows. Special topics courses may be used as electives with prior approval of the student's academic advisor and the graduate coordinator.

Students, with the consent of a faculty sponsor and faculty advisor, may also elect courses in individualized study, special topics, or a 6-credit thesis (INFS 799 Thesis), which is primarily intended for students planning to pursue a PhD in information technology with a concentration in information systems.

Database Management

Code	Title	Credits
CS 530	Mathematical Foundations of Computer Science	3
CS 787	Decision Guidance Systems	3
INFS 623	Web Search Engines and Recommender Systems	3
INFS 740	Database Programming for the World Wide Web	3
INFS 760	Advanced Database Management	3
INFS 772	Intelligent Agents and the Semantic Web	3
INFS 796	Directed Readings in Information Systems	3

Data Mining

Code	Title	Credits
CS 530	Mathematical Foundations of Computer Science	3
CS 657	Mining Massive Datasets with MapReduce	3

SYST 683	Modeling, Simulation, and Gaming	3

Accelerated Master's

Applied Computer Science, BS/ Information Systems, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS program can complete both a BS-ACS and an Information Systems, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/ Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3
CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Information Systems, Accelerated MS

At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Information Technology, BS/Information Systems, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Systems, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 60 undergraduate credits and take graduate level courses after completion of 75 credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Systems, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 6 credits) overlapping from the following courses:

Code	Title	Credits
CS 550	Database Systems (satisfies IT 414 requirement in the BS INFT program)	3
SWE 619	Object-Oriented Software Specification and Construction (satisfies as one DTP concentration course in the BS INFT program)	3

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Software Engineering Graduate Certificate

Academic Advising

Phone: 703-993-1530
Email: csgrad@gmu.edu
Website: cs.gmu.edu/prospective-students/ms-programs/graduate-certificates/

This graduate certificate program provides knowledge, tools, and techniques to those who are working in or planning to work in software

engineering, but do not want to complete requirements for a master's degree in the field. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School of Engineering.

The graduate certificate may be pursued on a part-time or full-time basis.

Admissions & Policies

Admissions

General Concentration

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits. In addition, applicants must complete a self-assessment form, which can be obtained from the Computer Science Department (https://cs.gmu.edu/). This form provides summary information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to the following undergraduate courses: structured programming in a modern programming language, data structures, discrete mathematics, and machine organization. The level of knowledge may also be achieved by taking the following foundation courses at Mason:

Code	Title	Credits
INFS 501	Discrete and Logical Structures for Information Systems	3
SWE 510	Object-Oriented Programming in Java	3
INFS 515	Computer Organization Course and Operating Systems	3
INFS 519	Program Design and Data Structures	3

In addition, it is desirable, but not necessary, for applicants to have at least one year of appropriate work experience in building or modifying software systems.

Applicants must submit a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering. Students not enrolled in a graduate degree program at Mason should apply for the certificate program through Graduate Admissions. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission into the certificate program does not guarantee acceptance into any MS program.

Web-Based Software Engineering Concentration

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits. Applicants must complete a self-assessment form, which can be obtained from the department web site (https://cs.gmu.edu/). The form provides information concerning background and preparation for the program.

Applicants must possess knowledge equivalent to that provided by the following courses:

Code	Title	Credits
INFS 501	Discrete and Logical Structures for Information Systems	3
SWE 510	Object-Oriented Programming in Java	3
INFS 515	Computer Organization Course and Operating Systems	3
INFS 519	Program Design and Data Structures	3

Policies

Students must complete four courses with an average GPA of 3.0 or higher for a total of 12 credits of graduate study.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a full-or part-time basis.

Requirements

Students must complete all requirements within a concentration.

Concentration in General (GEN)

Code	Title	Credits
Select three courses from the following:		9
SWE 619	Object-Oriented Software Specification and Construction	
SWE 621	Software Design and Architecture	
SWE 632	User Interface Design and Development	
SWE 637	Software Testing	
Select one course from the following: [1]		3
CS 675	Distributed Systems	
CS 706	Concurrent Software Systems	
SWE 620	Software Requirements Analysis and Specification	
SWE 625	Software Project Management	
SWE 626	Software Project Laboratory	
SWE 631	Software Design Patterns	
SWE 632	User Interface Design and Development	
SWE 637	Software Testing	
SWE 645	Component-Based Software Development	
SWE 681	Secure Software Design and Programming	
SWE 699	Special Topics in Software Engineering	
SWE 721	Reusable Software Architectures	
SWE 760	Software Analysis and Design of Real-Time Systems	
SWE 763	Software Engineering Experimentation	
SWE 795	Advanced Topics in Software Engineering	
SWE 798	Research Project	
SYST 621	Systems Architecture Design	
Total Credits		12

[1] Subject to satisfying the prerequisites

Notes:
Students enrolled in the MS in Information Systems Program must substitute SWE 620 Software Requirements Analysis and Specification for INFS 622 Information Systems Analysis and Design to obtain this certificate. Credit is not given for taking both INFS 622 Information Systems Analysis and Design and SWE 620 Software Requirements Analysis and Specification; only 3 credits will be awarded.

Students enrolled in the MS in Computer Science Program may obtain a certificate in software engineering by taking any four SWE courses. If CS 706 Concurrent Software Systems is included, it is possible to complete the MS in Computer Science and the certificate in software engineering in 30 hours.

Concentration in Web-Based Software Engineering (WBSE)

Code	Title	Credits
Required Courses:		
SWE 632	User Interface Design and Development	3
SWE 642	Software Engineering for the World Wide Web	3

Admissions & Policies

Admissions

Declaring a Software Engineering Minor

Students requesting a software engineering minor must have completed CS 112 Introduction to Computer Programming or CS 211 Object-Oriented Programming with a B or better.

Policies

General

Candidates for the minor in software engineering must complete 19 credits in software engineering with a minimum GPA of 2.00, 8 credits of which must be unique to the minor and not used for the major. For policies governing all minors, see AP.5.3.4 Minors.

Grades

No more than 3 credits of D grades may be used to satisfy minor requirements.

Requirements

Minor Requirements

Total credits: 19

Required Courses

Code	Title	Credits

Website: cs.gmu.edu/prospective-students/ms-programs/ms-in-software-engineering/

The MS in Software Engineering (MS-SWE) prepares students to become leaders in engineering high quality, large scale, computing solutions to real life problems. Software engineering spans all aspects of developing software, including requirements analysis, design, construction, testing, usability, security, maintenance, and economics. Software engineering spans all types of software, including mobile and web applications, software services, enterprise software, and large complex systems. We revise courses regularly to keep up with changes in software engineering.

The MS-SWE program emphasizes pragmatic problem solving that addresses reliability, usability, future growth, security, cost, and efficiency. Graduates go on to technical leadership positions such as engineering lead, software architect, director of engineering, and CTO, as well as managerial and executive positions. MS-SWE students come from a diversity of undergraduate backgrounds, including computer science, engineering, mathematics, sciences, and business. The DC area has one of the largest collections of software companies in the world and the workforce is constantly growing, making our graduates in very high demand. Many MS-SWE students work full-time at companies that are

constantly hiring, making every class meeting a mini-job fair. All classes are scheduled in the late afternoon to accommodate part-time students.

Admissions & Policies

Admissions

To succeed in graduate courses, students entering the MS program must have coursework or equivalent knowledge in the following five foundation areas: (1) **introductory programming** in any programming language; (2) knowledge of an **object-oriented programming** language such as Java, C++, or C#; (3) **data structures** and algorithms; (4) **machine organization** such as those given in computer system architecture or assembly language courses; (5) and topics in **discrete mathematics**, including sets, propositional and predicate logic, relations, functions, trees, graphs, and inductive proofs.

The level of knowledge required in these areas is equivalent to that taught in undergraduate courses and may be demonstrated in one of several ways:

1. Applicable undergraduate coursework: Such courses must appear on transcripts from the student's undergraduate university, or another accredited university. Applicable courses from George Mason University and Northern Virginia Community College (NVCC) are given here:
   a. **Foundation:** OO programming
      - **GMU CS:** CS 211 Object-Oriented Programming
      - **GMU IT:** IT 106 Introduction to IT Problem Solving Using Computer Programming & IT 206 Object Oriented Techniques for IT Problem Solving
      - **NVCC:** CSC 201

   b. **Foundation:** Data structures
      - **GMU CS:** CS 310 Data Structures
      - **GMU IT:** IT 306 Data Structures and Algorithms in Java
      - **NVCC:** None

   c. **Foundation:** Machine organization
      - **GMU CS:** CS 367 Computer Systems and Programming or CS 465 Computer Systems Architecture.
      - **GMU IT:** IT 342 Operating Systems Fundamentals.
      - **NVCC:** None

   d. **Foundation:** Discrete math
      - **GMU Math:** MATH 125 Discrete Mathematics I (Mason Core)
      - **NVCC:** MATH 288
2. Preparatory coursework taken at GMU: The CS department offers the following bridge foundation courses: (1-2) SWE 510 Object-Oriented Programming in Java, (3) INFS 519 Program Design and Data Structures, (4) INFS 515 Computer Organization Course and Operating Systems, and (5) INFS 501 Discrete and Logical Structures for Information Systems. These courses may be taken by students in non-degree or provisional status.
3. Passing appropriate testout exams: Students can self-prepare and attempt testout exams for SWE 510 Object-Oriented Programming in Java, INFS 519 Program Design and Data Structures, INFS 515 Computer Organization Course and Operating Systems, and INFS 501 Discrete and Logical Structures for Information Systems. The exams are given before classes begin in January and August, and can only be taken once. Registration is not required; students need only be present at the date, time, and location specified and bring some form of photographic identification. Detailed information is available on the department web site. Students who fail any one of the exams must take the equivalent course before enrolling in the core curriculum courses.

Eligible domestic students who lack one or more foundation may be admitted provisionally and required to take the appropriate preparatory course or pass the testout exam. Other students may be advised to learn the foundation material and re-apply.

Application Requirements

In addition to general admission requirements of the university, each applicant to the MS program must hold a four-year (120-credit minimum) baccalaureate degree in an appropriate discipline from an accredited institution and have earned a GPA of 3.00 or better in the last 60 credits of undergraduate study. Other requirements are as follows:

- Provide a resume and a one- to two-page statement of educational and work experience in the computing field that includes a statement of career goals in software engineering.
- International students must submit their English Proficiency scores.

Policies

Program Requirements

In addition to the general requirements of the university, the MS in Software Engineering requires a minimum of 30 graduate credits. The coursework is divided into three categories: a breadth requirement of 12 credits of core courses, a depth requirement of 9 credits of emphasis courses, and 9 credits of elective courses.

Advising

The department holds orientation meetings each January and August to advise incoming and continuing students. Members of the faculty are present to answer questions and offer advice concerning programs of study. Detailed information is available on the department web site (https://cs.gmu.edu/).

The department also provides an advising function to students, as outlined in the student advising form available from the department. Each student is assigned a faculty advisor with whom to confer on matters related to degree requirements.

SWE 637	Software Testing	3
Total Credits		12

Software Engineering Related Courses

Code	Title	Credits
Students must take three courses from the following list:		9
Software Engineering		
Any SWE course at the 600-level or above.		
Computer Science		
CS 540	Language Processors	
CS 550	Database Systems [1]	
CS 555	Computer Communications and Networking	
CS 571	Operating Systems	
CS 675	Distributed Systems [2]	
Information Security and Assurance		
ISA 562	Information Security Theory and Practice	
ISA 650	Security Policy	
ISA 673	Operating Systems Security	
Information Systems		
INFS 740	Database Programming for the World Wide Web	
Operations Research		
OR 542	Operations Research: Stochastic Models	
Total Credits		9

1 Credit will not be given for both INFS 614 and CS 550.

2 Credit will not be given for both SWE 622 and CS 675.

Research Option

With the consent of a faculty sponsor and faculty advisor, students may complete a 6-credit thesis as part of the electives.

Electives

Students may select the remaining courses from the following list. Students may select courses not on this list with prior approval from the faculty advisor.

Code	Title	Credits
List of allowed electives:		9
All Software Engineering (SWE) courses at the 600-level or above.		
All Computer Science (CS) courses at the 500-level or above.		
All Information Security and Assurance (ISA) courses at the 600-level or above.		
All Information Systems (INFS) courses at the 600-level or above.		
Any of the following Electrical and Computer Engineering courses:		
ECE 542	Computer Network Architectures and Protocols	
ECE 612	Real-Time Embedded Systems	
Any of the following Operations Research courses:		
OR 531	Analytics and Decision Analysis	
OR 541	Operations Research: Deterministic Models	
OR 542	Operations Research: Stochastic Models	
Any of the following Statistics courses:		
STAT 544	Applied Probability	
STAT 554	Applied Statistics I	
Any of the following Systems Engineering courses:		
SYST 560	Introduction to Air Traffic Control	
SYST 659	Topics in Systems Engineering	
SYST 680	Principles of Command, Control, Communications, Computing, and Intelligence (C4I)	
Any of the following Psychology courses:		
PSYC 530	Cognitive Engineering: Cognitive Science Applied to Human Factors	
PSYC 734	Seminar in Human Factors and Applied Cognition	
Total Credits		9

Accelerated Master's

Applied Computer Science, BS/Software Engineering, Accelerated MS

Overview

Highly-qualified students in the Applied Computer Science, BS can complete both a BS-ACS and a Software Engineering, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models.

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3
CS 551	Computer Graphics (to replace CS 451)	3
CS 555	Computer Communications and Networking (to replace CS 455)	3
CS 571	Operating Systems (to replace CS 471)	3
CS 580	Introduction to Artificial Intelligence (to replace CS 480)	3
CS 583	Analysis of Algorithms (to replace CS 483)	3

CS 584	Theory and Applications of Data Mining (to replace CS 484)	3
CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Computer Science, BS/Software Engineering, Accelerated MS

Overview

Highly-qualified students in the Computer Science, BS program can complete both a BS-CS and a Software Engineering, MS in five years through the BS-MS accelerated (BAM) program.

General BAM policies are in the catalog under AP.6.7 Bachelor's/Accelerated Master's Degrees. Policies governing all graduate degrees are in the catalog under AP.6 Graduate Policies.

Admission Requirements

Students in the Computer Science, BS program are encouraged to apply to the BAM program after earning 60 undergraduate credits with an overall GPA of at least 3.30. Students must also have successfully completed CS 310 Data Structures and CS 330 Formal Methods and Models .

Accelerated Option Requirements

Students accepted to the BAM program may earn up to 12 credits of graduate coursework that count towards both the BS and MS degrees. They may begin taking graduate courses after completing 75 undergraduate credits and successfully completing CS 367 Computer Systems and Programming.

The following graduate courses can replace the corresponding undergraduate courses.

Code	Title	Credits
CS 540	Language Processors (to replace CS 440)	3
CS 550	Database Systems (to replace CS 450)	3

CS 587	Introduction to Cryptography (to replace CS 487)	3
SWE 619	Object-Oriented Software Specification and Construction (to replace SWE 419)	3
SWE 637	Software Testing (to replace SWE 437)	3
SWE 642	Software Engineering for the World Wide Web (to replace SWE 432)	3

Notes:

- Students may not use both the graduate course and the undergraduate alternative for their BS degree.
- Students must satisfy all recommended and required prerequisites for the graduate courses they take.
- Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only.

Degree Conferral

Students must apply for degree conferral the semester before they expect to complete their BS requirements. At the beginning of their final undergraduate semester, students must submit a completed Bachelor's-Accelerated Master's Transition form to the CS department office. The master's degree will be conferred after the student completes the MS requirements.

Information Technology, BS/Software Engineering, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Software Engineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 60 undergraduate credits and take graduate level courses after completion of 75 credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Software Engineering, MS Program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 6 credits) overlapping from the following courses:

Code	Title	Credits
CS 550	Database Systems (satisfies IT 414 requirement in the BS INFT program)	3
SWE 619	Object-Oriented Software Specification and Construction (satisfies as one DTP concentration course in the BS INFT program)	3

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Department of Cyber Security Engineering

Phone: 703-993-1636

Cyber Security Engineering is concerned with the development of cyber resilient systems which include the protection of the physical as well as computer and network systems. It requires a proactive approach in engineering design of physical systems with cyber security incorporated from the beginning of system development. Cyber security engineering is an important quantitative methodology to be used in all industries to include, but not limited to, transportation, energy, healthcare, infrastructure, finance, government (federal, state, and local), and defense. The Cyber Security Engineering Department is focused on academics and research for the cyber security engineering of integrated cyber-physical systems. The department prepares students with a foundation in cyber security engineering, and is most appropriate for students with a strong mathematics and science background.

Cyber Security Engineering is concerned with the development of cyber-resilient systems which include the protection of physical as well as computer and network systems. It requires a proactive approach in engineering design of physical systems with cyber security incorporated from the beginning of system development. Cyber security engineering is an important quantitative methodology to be used in all industries including transportation, energy, healthcare, infrastructure, finance, government (federal, state, and local), and defense. The program is focused on the cyber security engineering of integrated cyber-physical systems. This degree provides a foundation in cyber security engineering and is most appropriate for students with a strong mathematics and science background.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Advising and Plan of Study

All cyber security engineering students are assigned a faculty advisor. With the advisor's help and approval, each student is required to complete a plan of study, which constitutes a learning plan for the degree program. The plan of study must be signed by the student's advisor and the Program Chair and be updated and signed by the advisor at least once a year.

Change of Major

See Change of Major for more information.

Grade Requirements

Students in the Cyber Security Engineering, BS program must complete all mathematics, science, and VSE courses with a grade of C or better.

Termination from the Major Policy

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a

Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

Cyber Security Engineering, BS/Computer Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Cyber Security Engineering and an MS in Computer Engineering in an accelerated time-frame after satisfactory completion of a minimum of 150 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

This accelerated option is offered jointly by the Cyber Security Engineering Department and the Electrical and Computer Engineering Department.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 6 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below:

Code	Title	Credits
ECE 505	Hardware Security	3
ECE 508	Internet of Things	3
ECE 511	Computer Architecture	3
ECE 512	Computer Architecture Security	3
ECE 542	Computer Network Architectures and Protocols	3

These courses may be used as technical electives in the Cyber Security Engineering, BS program.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Cyber Security Engineering, BS/Cyber Security Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Cyber Security Engineering and an MS in Cyber Security Engineering in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered by the Department of Cyber Security Engineering.

Students in an accelerated degree program must fulfil all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA,
- successfully meeting Mason's requirements for undergraduate degree conferral (graduation),
- and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing Courses

Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below:

Code	Title	Credits
CYSE 521	Industrial Control Systems Security	3
CYSE 570	Fundamentals of Operating Systems	3
CYSE 580	Hardware and Cyber Physical Systems	3
CYSE 587	Cyber Security Systems Engineering	3

These courses may be used as technical electives in the Cyber Security Engineering, BS program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree policies.

Cyber Security Engineering, BS/Digital Forensics, Accelerated MS

Overview

Highly-qualified students in the Cyber Security Engineering, BS have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Cyber Security Engineering, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two Digital Forensics core courses (6 credits) in place of two of the three required technical electives, as part of the undergraduate degree requirements.

Note: Students complete all Digital Forensics, MS core courses and apply the two courses from the above list toward the Digital Forensics, MS requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Cyber Security Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Cyber Security Engineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate

degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Cyber Security Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Cyber Security Engineering course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Cyber Security Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Cyber Security Engineering courses:

Code	Title	Credits
CYSE 570	Fundamentals of Operating Systems	
CYSE 580	Hardware and Cyber Physical Systems	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Cyber Security Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Cyber Security Engineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon

completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Cyber Security Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Cyber Security Engineering course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Cyber Security Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Cyber Security Engineering courses:

Code	Title	Credits
CYSE 570	Fundamentals of Operating Systems	
CYSE 580	Hardware and Cyber Physical Systems	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 510	Systems Definition and Cost Modeling (Core)	
SYST 514	Systems Thinking	
SYST 520	System Engineering Design (Core)	
SYST 530	Systems Engineering Management I (Core)	
SYST 542	Decision Support Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 560	Introduction to Air Traffic Control	
SYST 563	Evidence-Based Systems Engineering	
SYST 568	Applied Predictive Analytics	
SYST 584	Heterogeneous Data Fusion	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the

master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Cyber Security Engineering, MS

Banner Code: VS-MS-CYSE

The field of cyber security engineering is concerned with the development of cyber-resilient systems that include the protection of physical as well as computer and network systems. It requires a proactive approach in engineering the design of systems, with cybersecurity incorporated from the beginning of system development. The purpose of the MS in Cyber Security Engineering is to provide students with the currently rare combination of highly technical knowledge and skills, cyber security expertise, and a holistic systems engineering perspective. The program provides instruction on the design, planning, and management of systems and procedures for protecting critical physical and cyber infrastructure from external threats, including terrorism. The program provides students with the deep technical foundations of cyber security in the form of software, hardware, networking, and cryptography, as well as systems engineering tools and methods to design and secure complex cyber physical systems. Students learn homeland security policy, critical infrastructure policy, information security, matrix vulnerability assessment, threat assessment, physical security, personnel security, operational security, contingency planning, case analyses of specific industries and systems, redundancy planning, emergency and disaster planning, security systems, and intelligence operations. Graduates are prepared to design and implement secure complex and cyber-physical systems consisting of software, hardware, and networking components; respond to, investigate, and remediate incidents involving these systems; and develop offensive and defensive tools and techniques to attack and secure these systems.

Admissions & Policies

Admissions

The MS in Cyber Security Engineering will build on the body of knowledge acquired in undergraduate programs of study in engineering, computer science, or closely related disciplines. As such, applicants will be expected to have a bachelor's degree in engineering, computer science, or closely related disciplines and to have completed the engineering math sequence as well as courses in probability and statistics, and computer science. A minimum undergraduate GPA of 3.00 is required.

Policies

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree with a GPA of 3.00 or higher, with no more than 6 credit hours of C grades. The plan of study includes a 21 credit required Core component which includes a mandatory capstone course, and 9 credits of electives.

Accelerated Master's

Cyber Security Engineering, BS/Cyber Security Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Cyber Security Engineering and an MS in Cyber Security Engineering in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degree for policies related to this program.

This accelerated option is offered by the Department of Cyber Security Engineering.

Students in an accelerated degree program must fulfil all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- 3.0 overall GPA,
- successfully meeting Mason's requirements for undergraduate degree conferral (graduation),
- and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing Courses

Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below:

Code	Title	Credits
CYSE 521	Industrial Control Systems Security	3
CYSE 570	Fundamentals of Operating Systems	3
CYSE 580	Hardware and Cyber Physical Systems	3
CYSE 587	Cyber Security Systems Engineering	3

These courses may be used as technical electives in the Cyber Security Engineering, BS program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degree policies.

Department of Electrical and Computer Engineering

Phone: 703-993-1569
Email: ece@gmu.edu
Website: ece.gmu.edu

Undergraduate Programs

The undergraduate education mission of the Department of Electrical and Computer Engineering (ECE) is to provide a quality education for electrical engineering and computer engineering students to support the needs of Virginia and the nation.

Program Educational Objectives for the BS ELEN and BS CPE

Graduates of the Electrical Engineering and the Computer Engineering programs are expected within three to five years of graduation to have:

- Established themselves as successful and productive engineering professionals or engaged in advanced study such as a graduate degree program.
- Worked effectively in team environments and individually.
- Fulfilled their responsibilities in the areas of ethics, continuing professional development, and effective communications.

Graduate Programs

Graduate programs leading to MS and PhD degrees prepare students for careers in industry, government, and academia. Graduate certificate programs provide well-defined targets for students who want to advance or update their knowledge in selected areas. The ECE department offers the PhD in Electrical and Computer Engineering and master's degrees in computer engineering, electrical engineering, telecommunications, and digital forensics, and certificates in communications, forensics, networking, and small satellite engineering.

The ECE department is committed to high standards of teaching and research excellence in communications, computer networks, bioengineering, digital systems design, microprocessor and embedded systems, distributed computing, high performance computing, signal and image processing, control systems, robotics, intelligent systems, systems integration, space-based systems, and nanoelectronics. Graduate students are offered a progressive environment with ample opportunities for the type of advanced research needed to confront the complex realities of the 21st century.

Courses in the department's graduate programs are offered during the evening or late afternoon hours to accommodate students who are employed full time. For those who enter a program on a full-time basis, some financial aid may be available in various forms, such as teaching assistantships or research assistantships.

The Advanced Networking Protocols for Telecommunications certificate program offers courses on Internet Routing and Network Security. This graduate certificate program is designed for those who are working in or planning to work in the telecommunication industry but do not want to complete requirements for a master's degree in the field. The certificate may be pursued on a part-time or full-time basis. The certificate may also be pursued concurrently with any of the graduate degree programs in the Volgenau School of Engineering.

Admissions & Policies

Policies

This certificate may be pursued on a full-or part-time basis.

For all policies governing Graduate Certificates, please see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Website: https://ece.gmu.edu/academics/undergraduate

The field of computer engineering can be described as an amalgam of hardware and software design. Computer engineers are involved in research, design, development, production, and operation of a wide variety of digital systems, from integrated circuits through microcontrollers, multi-core processors, FPGA-based accelerators, to big-data and cloud computing platforms. Reflecting the industry trend to integrate hardware and software development, the computer engineering program is built around computer-aided design tools that can simulate and assist in the design of new digital systems, such as those found in smartphones, tablets, robots, autonomous vehicles, drones, spacecraft, computer networks, smart factories, defense systems, and the internet-of-things. Advanced languages, such as VHDL and Python, and software tools, such as those used for FPGA- and ASIC-design and simulation, can be used to model hardware and software functionality from the system and architecture level down to the gate and transistor levels. Design, optimization, verification, and testing methodology involving these tools are taught in the program. Hands-on design experiences and simulation are emphasized throughout the curriculum through labs and projects integrated into various courses. The program culminates in a year-long senior design project effort which provides each student with the opportunity to apply concepts to designing, innovating and building a functional hardware system in a team environment.

The Department of Electrical and Computer Engineering is staffed by 33 full-time professors and several part-time professors.

The bachelor's program in Computer Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Career Opportunities

Career opportunities exist in engineering design and development such as hardware/software co-design and integration, embedded system programming, mobile system and application development, robot and drone design, and cloud and big data computing. Other opportunities include engineering management, consultancy, technical sales, and patent law. The program provides a strong preparation for graduate study.

Specializations

The curriculum provides a strong background in the fundamentals of computer engineering. A number of technical elective specializations are offered, ranging from primarily hardware-oriented to those that are more software-oriented. These include robotics, embedded systems, computer networks, internet of things, power and energy systems and hardware and system security. The curriculum includes 9 credits of senior technical electives, which may be used for specialization in one of these technical areas.

Additional Information

The requirements for the degree may be satisfied on a full-time or part-time basis. Cooperative education provides students the opportunity to integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements cannot be given for co-op experience. In addition to the usual financial aid available through the Office of Student Financial Aid, computer engineering majors are encouraged to apply for scholarships provided by various professional societies and industrial organizations in their field.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Writing-Intensive Requirement

Mason's writing-intensive requirement is satisfied by the following two courses: ECE 333 Linear Electronics I and ECE 491 Engineering Seminar in which faculty provide writing instruction and feedback on student technical writing assignments. Drafts and revisions are required.

Change of Major

See Change of Major for more information.

Double Major and Minor Programs for Computer Engineering and Electrical Engineering

Computer Engineering majors and Electrical Engineering majors can earn degrees with double majors in a number of disciplines. Computer Engineering and Computer Science may be combined. Electrical Engineering has been combined with Computer Engineering, Mechanical Engineering, Computer Science, Physics, or Math. Details are available in the department brochures or at the Volgenau School website (http://

volgenau.gmu.edu). There are several minors available for students in the ECE Department including the Mechanical Engineering minor, Bioengineering minor and others as listed in the catalog.

Grade Requirements

All computer engineering students are strongly encouraged to see their major faculty advisor each semester before course registration.

Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS and STAT course presented as part of the required 126 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

ECE 321	Continuous-Time Signals and Systems	3
ECE 333	Linear Electronics I	3
ECE 334	Linear Electronics Lab I	1
ECE 350	Embedded Systems and Hardware Interfaces	3
ECE 445	Computer Organization	3
ECE 447	Microcontrollers	4
ECE 448	FPGA Design with VHDL	4
ECE 465	Computer Networking Protocols	3
ECE 491	Engineering Seminar	1
ECE 492	Senior Advanced Design Project I (Mason Core) [1]	1
ECE 493	RS: Senior Advanced Design Project II (Mason Core)	2
Total Credits		44

[1] Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 Engineering Design Studio to gain a semester head start in the design process.

Technical Electives

Three technical electives totaling 9 credit hours must be selected from the list below. Some graduate courses listed below and courses outside the ECE department may be taken to fulfill the technical elective requirement with the permission of the department. The decision to approve non-ECE courses as well as graduate courses as technical electives is at the discretion of the department based on a review of the course content and the student's academic record.

Code	Title	Credits
Select 9 credits from the following:		9
ECE 370	Robot Design	
ECE 410	Applications of Discrete-Time Signal Processing	
ECE 415	Power System Analysis	
ECE 416	Electric Machinery and Modern Applications	
ECE 417	Smart Grid and Cyber Security	
ECE 421	Classical Systems and Control Theory	
ECE 424	Modern Control Systems Design	
ECE 425	Secure RF Communications	
ECE 431	Digital Circuit Design	
ECE 433	Linear Electronics II	
ECE 446	Device Driver Development	
ECE 450	Mobile Robots	
ECE 460	Communication and Information Theory	

ECE 462	Data and Computer Communications
ECE 463	Digital Communications Systems
ECE 470	Introduction to Humanoid Robotics
ECE 476	Cryptography Fundamentals
ECE 499	Special Topics in Electrical and Computer Engineering
CYSE 462	Mobile Devices and Network Security
The following 500-level courses may also be taken (with prior approval of the department):	
ECE 505	Hardware Security
ECE 508	Internet of Things
ECE 510	Real-Time Concepts
ECE 511	Computer Architecture
ECE 512	Computer Architecture Security
ECE 516	Mobile Systems and Applications
ECE 521	Linear Systems and Control
ECE 527	Learning From Data
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering
ECE 530	Sensor Engineering
ECE 531	Introduction to Wireless Communications and Networks
ECE 535	Digital Signal Processing
ECE 542	Computer Network Architectures and Protocols
ECE 552	Big Data Technologies
ECE 567	Optical Fiber Communications
ECE 580	Small Spacecraft Engineering
ECE 590	Selected Topics in Engineering
Total Credits	9

Computer Science

Code	Title	Credits
CS 112	Introduction to Computer Programming	4
CS 211	Object-Oriented Programming	3
CS 222	Computer Programming for Engineers	3
CS 310	Data Structures	3
CS 471	Operating Systems	3
Total Credits		16

Mathematics and Statistics

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 125	Discrete Mathematics I (Mason Core)	3
MATH 203	Linear Algebra	3
MATH 213	Analytic Geometry and Calculus III	3
MATH 214	Elementary Differential Equations	3
STAT 346	Probability for Engineers	3
Total Credits		23

Physics

Code	Title	Credits
PHYS 160	University Physics I (Mason Core)	3
PHYS 161	University Physics I Laboratory (Mason Core)	1
PHYS 260	University Physics II (Mason Core)	3
PHYS 261	University Physics II Laboratory (Mason Core)	1
Total Credits		8

Engineering

Code	Title	Credits
ENGR 107	Introduction to Engineering (Mason Core)	2
Total Credits		2

Concentrations

Concentrations are available in the computer engineering baccalaureate program. Completion of specific courses leads to one of these designations on the student's transcript on graduation. Concentration requirements may also meet some or all of the Technical Elective requirements.

Available Concentrations:

- Computer Networks (CNWK)
- Embedded Systems (EMSY)
- Hardware and System Security (HSYS)
- Internet of Things (INOT)
- Robotics (ROB)
- Power and Energy Systems (PES)

Computer Networks (CNWK)

Code	Title	Credits
Required Course:		
ECE 465	Computer Networking Protocols	3
Select three from the following:		9
ECE 460	Communication and Information Theory	
ECE 462	Data and Computer Communications	
ECE 463	Digital Communications Systems	
ECE 476	Cryptography Fundamentals	
ECE 531	Introduction to Wireless Communications and Networks	
ECE 542	Computer Network Architectures and Protocols	
ECE 567	Optical Fiber Communications	
Total Credits		12

Embedded Systems (EMSY)

Code	Title	Credits
Required Course:		
ECE 447	Microcontrollers	4
Select three from the following:		9
ECE 421	Classical Systems and Control Theory	
ECE 446	Device Driver Development	
ECE 510	Real-Time Concepts	
ECE 516	Mobile Systems and Applications	

ECE 530	Sensor Engineering	
ECE 580	Small Spacecraft Engineering	
Total Credits		13

Hardware and System Security (HSYS)

Code	Title	Credits
Required Courses:		
ECE 465	Computer Networking Protocols	3
ECE 505	Hardware Security	3
Select two from the following:		6
ECE 425	Secure RF Communications	
ECE 462	Data and Computer Communications	
ECE 476	Cryptography Fundamentals	
ECE 512	Computer Architecture Security	
Total Credits		12

Internet of Things (INOT)

Code	Title	Credits
Required Courses:		
ECE 465	Computer Networking Protocols	3
ECE 508	Internet of Things	3
Select two from the following:		6
ECE 462	Data and Computer Communications	
ECE 476	Cryptography Fundamentals	
ECE 510	Real-Time Concepts	
ECE 512	Computer Architecture Security	
ECE 530	Sensor Engineering	
Total Credits		12

Robotics (ROB)

Code	Title	Credits
Required Courses:		
ECE 370	Robot Design	3
ECE 447	Microcontrollers	4
Select two from the following:		6
ECE 421	Classical Systems and Control Theory	
ECE 424	Modern Control Systems Design	
ECE 450	Mobile Robots	
ECE 470	Introduction to Humanoid Robotics	
ECE 510	Real-Time Concepts	
ECE 521	Linear Systems and Control	
ECE 530	Sensor Engineering	
Total Credits		13

Power and Energy Systems (PES)

Code	Title	Credits
Required Courses:		9
ECE 305	Electromagnetic Theory	3
ECE 465	Computer Networking Protocols	3
ECE 415	Power System Analysis	
or ECE 417	Smart Grid and Cyber Security	
Select one from the following:		3
ECE 415	Power System Analysis	
ECE 416	Electric Machinery and Modern Applications	
ECE 417	Smart Grid and Cyber Security	
ECE 424	Modern Control Systems Design	
ECE 425	Secure RF Communications	
ECE 462	Data and Computer Communications	
ECE 463	Digital Communications Systems	
ECE 476	Cryptography Fundamentals	
ECE 505	Hardware Security	
ECE 508	Internet of Things	
ECE 513	Applied Electromagnetic Theory	
ECE 527	Learning From Data	
ECE 531	Introduction to Wireless Communications and Networks	
Total Credits		18

English, Communication, and Economics

Code	Title	Credits
ENGH 302	Advanced Composition (Mason Core) (Natural Sciences and Technology or Multidisciplinary section)	3
COMM 100	Public Speaking (Mason Core)	3
or COMM 101	Fundamentals of Communication (Mason Core)	
ECON 103	Contemporary Microeconomic Principles (Mason Core)	3
Total Credits		9

Additional Mason Core

Students must complete all Mason Core requirements not fulfilled by major requirements. Mason Core courses should be selected from the department's list of approved courses. Honors college students meet the written and oral communication requirements through completion of the honors college curriculum. The Synthesis Mason Core requirement is satisfied by ECE 492 Senior Advanced Design Project I (Mason Core) plus ECE 493 RS: Senior Advanced Design Project II (Mason Core).

Code	Title	Credits
Written Communication [1]		3
Literature		3
Arts		3
Western Civilization/World History		3
Global Understanding		3
Total Credits		15

4-Year Plan

Bachelor of Science in Computer Engineering Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain an undergraduate BS degree and the Statistical Science, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program **if such an accelerated** Statistical Science, MS **pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs.**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Statistical Science, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00.
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 213	Analytic Geometry and Calculus III	3
MATH 203	Linear Algebra	3
or MATH 321	Abstract Algebra	
STAT 250	Introductory Statistics I (Mason Core)	3
or STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	3
or MATH 351	Probability	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits satisfying degree requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 560	Biostatistical Methods	3
STAT 574	Survey Sampling I	3
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Computer Engineering, BS/Computer Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Computer Engineering and an MS in Computer Engineering in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate

study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below: Note that ECE 542 can be used to meet the ECE 465 requirement for the BS in Electrical Engineering program. An additional 9 credits of graduate-level courses from the list below may be selected to substitute in place of the 9 credits of technical electives required for the undergraduate degree:

Code	Title	Credits
ECE 505	Hardware Security	3
ECE 508	Internet of Things	3
ECE 510	Real-Time Concepts	3
ECE 511	Computer Architecture	3
ECE 512	Computer Architecture Security	3
ECE 516	Mobile Systems and Applications	3
ECE 521	Linear Systems and Control	3
ECE 527	Learning From Data	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 530	Sensor Engineering	3
ECE 531	Introduction to Wireless Communications and Networks	3
ECE 535	Digital Signal Processing	3
ECE 542	Computer Network Architectures and Protocols	3
ECE 545	Digital System Design with VHDL	3
ECE 567	Optical Fiber Communications	3
ECE 580	Small Spacecraft Engineering	3
ECE 590	Selected Topics in Engineering	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Computer Engineering, BS/Electrical Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Computer Engineering and an MS in Electrical Engineering in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below. Note that ECE 542 can be used to meet the ECE 465 requirement for the BS in Electrical Engineering program. An additional 9 credits of graduate-level courses from the list below may be selected to substitute in place of the 9 credits of technical electives required for the undergraduate degree.

Code	Title	Credits
ECE 505	Hardware Security	3
ECE 508	Internet of Things	3
ECE 510	Real-Time Concepts	3
ECE 511	Computer Architecture	3
ECE 513	Applied Electromagnetic Theory	3
ECE 516	Mobile Systems and Applications	3

ECE 521	Linear Systems and Control	3
ECE 526	Neural Engineering	3
ECE 527	Learning From Data	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 530	Sensor Engineering	3
ECE 531	Introduction to Wireless Communications and Networks	3
ECE 535	Digital Signal Processing	3
ECE 542	Computer Network Architectures and Protocols	3
ECE 550	System Engineering Design	3
ECE 565	Introduction to Optical Electronics	3
ECE 567	Optical Fiber Communications	3
ECE 580	Small Spacecraft Engineering	3
ECE 584	Semiconductor Device Fundamentals	3
ECE 586	Digital Integrated Circuits	3
ECE 587	Design of Analog Integrated Circuits	3
ECE 590	Selected Topics in Engineering	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Computer Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Computer Engineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Computer Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS 160/161, and PHYS 260/261 requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Electrical and Computer Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Electrical and Computer Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Note that ECE 542 can be used to meet the ECE 465 requirement for the Computer Engineering, BS program. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Electrical and Computer Engineering courses:

Code	Title	Credits
ECE 505	Hardware Security	
ECE 508	Internet of Things	
ECE 510	Real-Time Concepts	
ECE 511	Computer Architecture	
ECE 512	Computer Architecture Security	
ECE 516	Mobile Systems and Applications	
ECE 521	Linear Systems and Control	
ECE 527	Learning From Data	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 530	Sensor Engineering	
ECE 531	Introduction to Wireless Communications and Networks	
ECE 535	Digital Signal Processing	
ECE 542	Computer Network Architectures and Protocols	
ECE 545	Digital System Design with VHDL	
ECE 567	Optical Fiber Communications	
ECE 580	Small Spacecraft Engineering	
ECE 590	Selected Topics in Engineering	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Computer Engineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Computer Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH, PHYS 160/161, and PHYS 260/261 requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Electrical and Computer Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Electrical and Computer Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Note that ECE 542 can be used to meet the ECE 465 requirement for the Computer Engineering, BS program. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Electrical and Computer Engineering courses:

Code	Title	Credits
ECE 505	Hardware Security	
ECE 508	Internet of Things	
ECE 510	Real-Time Concepts	
ECE 511	Computer Architecture	
ECE 512	Computer Architecture Security	
ECE 516	Mobile Systems and Applications	
ECE 521	Linear Systems and Control	
ECE 527	Learning From Data	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 530	Sensor Engineering	
ECE 531	Introduction to Wireless Communications and Networks	
ECE 535	Digital Signal Processing	
ECE 542	Computer Network Architectures and Protocols	
ECE 545	Digital System Design with VHDL	
ECE 567	Optical Fiber Communications	
ECE 580	Small Spacecraft Engineering	
ECE 590	Selected Topics in Engineering	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 510	Systems Definition and Cost Modeling (Core)	
SYST 520	System Engineering Design (Core)	
SYST 530	Systems Engineering Management I (Core)	
SYST 542	Decision Support Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 568	Applied Predictive Analytics	
SYST 584	Heterogeneous Data Fusion	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Website: https://ece.gmu.edu/academics/

Computer Engineering involves knowledge of hardware and software development. The students learn how to design new generations of

computers, as well as embedded computing systems, such as those found in smartphones, cars, appliances, computer networks, smart factories, and the internet-of-things. The program covers the entire digital integrated circuit design process targeting Field Programmable Gate Arrays (FPGAs) and Application Specific Integrated Circuits (ASICs), using various optimization criteria, such as speed, cost, power, energy, reliability, and security. It also encompasses the complete software development process targeting microcontrollers, microprocessors, multi-cores, and Graphics Processing Units (GPUs). It teaches students how to efficiently partition the system into software and hardware components, and develop high-performance interfaces between these two parts. Project-oriented courses and labs expose students to modern computer-aided design tools for hardware and software design. The students master the art of writing comprehensive technical reports and giving successful oral presentations. The computer engineering program offers the following concentrations: computer architecture and embedded systems, computer networks, digital signal processing, digital system design, hardware security and cryptographic engineering, internet of things and network security, machine learning and brain-inspired computing, and space-based systems.

Admissions & Policies

Admissions

Requirements

To be considered for admission to the degree, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program, and have earned a GPA of B or better during the last 60 credits. All students are also required to submit a resume and are encouraged to provide up to three choices for their preferred academic advisor and select their concentration at the time of application to the program.

For internationally educated applicants (as defined in the catalog section Admission of International Students (https://catalog.gmu.edu/admissions/international-students/#text), under English Proficiency Standards - Graduate Students), a satisfactory score on any of the English proficiency examinations accepted by Mason is required. Satisfactory scores are specific to Volgenau School of Engineering and are listed in the catalog section Admission of International Students (https://catalog.gmu.edu/admissions/international-students/#text), under English Proficiency Standards - Graduate Students.

All students are also required to submit resume and encouraged to provide up to three choices for their preferred academic advisor and select their concentration at the time of application to the program.

Students with BS or MS degrees in ECE-related disciplines (for example, computer science, cyber security engineering, mathematics, mechanical engineering, or physics) are encouraged to apply for admission. Domestic students may be admitted provisionally and required to satisfy provisional requirements before taking advanced coursework. Such students may also be advised to take some courses from the undergraduate electrical or computer engineering curriculum, according to their intended concentration and specific backgrounds.

Policies

Student Advising

Students can select a concentration from those available in the MS degree program at the time of application to the program or later during their studies. In the former case, students are assigned an academic advisor from the selected concentration at the time of admission. In the latter case, students can petition for a change of an academic advisor to match their concentration choice.

Plan of Study

Before completing 6 credit hours of coursework, each student must submit to the department a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

Requirements

Degree Requirements

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree. The plan of study for the degree must fulfill the following requirements:

Core Course Requirement

Code	Title	Credits
Select 15 credits from the following:		15
ECE 505	Hardware Security	
ECE 508	Internet of Things	
ECE 511	Computer Architecture	
ECE 516	Mobile Systems and Applications	
ECE 527	Learning From Data	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 531	Introduction to Wireless Communications and Networks	
ECE 535	Digital Signal Processing	
ECE 542	Computer Network Architectures and Protocols	
ECE 545	Digital System Design with VHDL	
ECE 611	Advanced Computer Architecture	
ECE 646	Applied Cryptography	
ECE 799	Master's Thesis [1]	
Total Credits		15

[1] See Thesis/Scholarly Paper option.

Concentration Requirement

Accomplished by choosing one of the concentrations, and then meeting course requirements for this concentration with the grade B or better in each course. For each concentration, related ECE 590 Selected Topics in Engineering courses can be used in addition to all explicitly listed 500-level courses, and related ECE 699 Advanced Topics in Electrical and Computer Engineering courses can be used in addition to all explicitly listed 600 level or above courses, subject to approval by the student's academic advisor. With assistance from their advisors, students may petition the graduate program coordinator to approve a specialization area of their own design, not fulfilling the requirements of any concentration.

Available Concentrations

- Concentration in Computer Architecture and Embedded Systems (CAES)
- Concentration in Computer Networks (CNWK)
- Concentration in Digital Signal Processing (DISP)
- Concentration in Digital System Design (DSYD)
- Concentration in Hardware Security and Cryptographic Engineering (HSCE)
- Concentration in Internet of Things and Network Security (INNS)
- Concentration in Machine Learning and Computer Engineering (MLCE)
- Concentration in Space-Based Systems (SBSY)

Concentration in Computer Architecture and Embedded Systems (CAES)

Code	Title	Credits
Required Courses		
ECE 511	Computer Architecture	3
ECE 516	Mobile Systems and Applications	3
Total Credits		6

Code	Title	Credits
Electives		
Select at least three courses from the following, including two courses at the 600 level or above:		9
CS 571	Operating Systems	
CS 583	Analysis of Algorithms	
ECE 508	Internet of Things	
ECE 510	Real-Time Concepts	
ECE 512	Computer Architecture Security	
ECE 545	Digital System Design with VHDL	
ECE 611	Advanced Computer Architecture	
ECE 612	Real-Time Embedded Systems	
ECE 615	Software/Hardware Codesign	
ECE 616	Advanced Mobile Systems and Applications

ECE 640	Small Satellite Development	
ECE 646	Applied Cryptography	
ECE 648	Digital Signal Processing Hardware Architectures	
ECE 660	Space Systems Engineering	
ECE 747	Cryptographic Engineering	
Total Credits		9

Upper-Level Course Requirement

A minimum of 9 credit hours of ECE or CS courses at the 600 level or above, other than ECE 799 (including, but not limited to, the selected concentration electives), with the grade B or better in each course. No more than 3 credit hours of either ECE 698 or ECE 798 may be used to fulfill this requirement.

ECE Course Requirement

A maximum of 6 credits of non-ECE courses may be used to fulfill degree requirements, subject to prior approval by the student's academic advisor, in the form of a plan of study signed by the advisor and submitted to the ECE Office. Additional 6 credit hours of DFOR, CS, ISA, or SWE courses may be used to fulfill degree requirements, subject to the same approval process.

Electives

Electives can be chosen from among all ECE graduate courses, as well as related graduate courses with other designations. The students are encouraged to discuss their choice of electives with their academic advisor prior to the registration.

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for degree conferral.

Seminar Requirement

Graduate students are expected to participate actively in the exchange of knowledge and ideas in their discipline. Towards this objective, all degree candidates must attend a minimum of 6 graduate seminars approved for the degree program. Approved seminars are publicized on the departmental webpage.

To demonstrate completion of the seminar requirement, students must register for ECE 795 Engineering Seminar in their final semester. The department office will verify that the seminar requirement has been met and submit a grade of S (satisfactory) upon completion of the requirement. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 Engineering Seminar in subsequent semesters until the requirement is met.

Thesis/Scholarly Paper Option

To complete the program, students may select one of the following options:

Thesis Option

Students who select this option must complete:

Code	Title	Credits
ECE 799	Master's Thesis	6
Coursework		24
Total Credits		30

The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. Choosing the thesis option requires approval of a full-time faculty member willing to serve as a thesis advisor. The topic and scope of the thesis must be approved by the thesis advisor. In some cases, permission may be granted to complete a portion of the work at the student's place of employment. The final written thesis and oral defense are approved by the student's advisory committee.

This committee consists of at least three full-time faculty members, including two affiliated with the MS in Computer Engineering Program, one of whom must be from the ECE Department. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of ECE 799 Master's Thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of ECE 799 Master's Thesis each fall and spring semester until graduation.

Scholarly Paper Option

Students who select to complete their degree program with a scholarly paper must:

Code	Title	Credits
Complete 30 credits of coursework		30
ECE 797	Scholarly Paper	0
Enroll in a 600-level or above course requiring a research project		
Write a Scholarly Paper project report and present findings as part of the course requirements		
Total Credits		30

An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports – not group projects. To qualify as a scholarly paper, an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 Scholarly Paper after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797 Scholarly Paper.

Accelerated Master's

Computer Engineering, BS/Computer Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Computer Engineering and an MS in Computer Engineering in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below: Note that ECE 542 can be used to meet the ECE 465 requirement for the BS in Electrical Engineering program. An additional 9 credits of graduate-level courses from the list below may be selected to substitute in place of the 9 credits of technical electives required for the undergraduate degree:

Code	Title	Credits
ECE 505	Hardware Security	3
ECE 508	Internet of Things	3
ECE 510	Real-Time Concepts	3
ECE 511	Computer Architecture	3
ECE 512	Computer Architecture Security	3
ECE 516	Mobile Systems and Applications	3
ECE 521	Linear Systems and Control	3
ECE 527	Learning From Data	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 530	Sensor Engineering	3
ECE 531	Introduction to Wireless Communications and Networks	3
ECE 535	Digital Signal Processing	3
ECE 542	Computer Network Architectures and Protocols	3
ECE 545	Digital System Design with VHDL	3
ECE 567	Optical Fiber Communications	3
ECE 580	Small Spacecraft Engineering	3
ECE 590	Selected Topics in Engineering	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Computer Science, BS/Computer Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Computer Science and an MS in Computer Engineering in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

See
AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

This accelerated option is offered jointly by the Computer Science Department and the Electrical and Computer Engineering Department.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see
AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on

the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below:

Code	Title	Credits
CS 571	Operating Systems (to replace CS 471)	3
ECE 508	Internet of Things	3
ECE 511	Computer Architecture	3
ECE 512	Computer Architecture Security	3
ECE 516	Mobile Systems and Applications	3
ECE 527	Learning From Data	3
ECE 542	Computer Network Architectures and Protocols	3

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Cyber Security Engineering, BS/Computer Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Cyber Security Engineering and an MS in Computer Engineering in an accelerated time-frame after satisfactory completion of a minimum of 150 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

This accelerated option is offered jointly by the Cyber Security Engineering Department and the Electrical and Computer Engineering Department.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 6 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below:

Code	Title	Credits
ECE 505	Hardware Security	3
ECE 508	Internet of Things	3
ECE 511	Computer Architecture	3
ECE 512	Computer Architecture Security	3
ECE 542	Computer Network Architectures and Protocols	3

These courses may be used as technical electives in the Cyber Security Engineering, BS program.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7).

Electrical Engineering, BS/Computer Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Electrical Engineering and an MS in Computer Engineering in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below. Note that ECE 587 can be used to meet the ECE 433 requirement for the BS in Electrical Engineering program. An additional 9 credits of graduate-level courses from the list below may be selected to substitute in place of the 9 credits of technical electives required for the undergraduate degree.

Code	Title	Credits
ECE 505	Hardware Security	3
ECE 508	Internet of Things	3
ECE 510	Real-Time Concepts	3
ECE 511	Computer Architecture	3
ECE 512	Computer Architecture Security	3
ECE 516	Mobile Systems and Applications	3
ECE 521	Linear Systems and Control	3
ECE 527	Learning From Data	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 530	Sensor Engineering	3
ECE 531	Introduction to Wireless Communications and Networks	3
ECE 535	Digital Signal Processing	3
ECE 542	Computer Network Architectures and Protocols	3
ECE 545	Digital System Design with VHDL	3
ECE 567	Optical Fiber Communications	3
ECE 580	Small Spacecraft Engineering	3
ECE 590	Selected Topics in Engineering	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Digital Forensics, MS

Banner Code: VS-MS-DFOR

3100 Nguyen Engineering Building
MS 1G5

Phone: (703) 993-1569
Email: ece@gmu.edu

Digital forensics is a discipline addressing the collection, processing, and analysis of digital data for the purpose of verifying/validating the existence of an event of investigative, intelligence, cyber, or business interest. The data can be from physical media, a mobile device, real-time network traffic, the Internet of Things (IoT), unknown code, memory, the cloud, and many other sources. Digital forensics is interdisciplinary by nature and our program includes computer engineering, computer science, information technology, law, and ethics. Digital forensics is a key component in criminal, corporate, civil, cyber defense, incident response, intelligence, and counter-terrorism matters. In the last several years, with a proliferation of digital storage, transmission, and processing of sensitive information, there has been an increase in the aberrant use of digital devices. This aberrant behavior includes but is not limited to digital extortion, intrusions, economic espionage, child exploitation, cybercrime, fraud, terrorism, and identity theft. In response to this, digital forensics has become an important profession serving both public and private sectors. The MS in Digital Forensics will prepare graduates for a wide variety of careers to include law enforcement, various other branches of government, incident response, and all facets of cyber security by combining academic education with real world practical techniques and by offering advanced training in analyzing digital evidence, intrusion forensics, reverse engineering, network analysis, legal, and ethical matters.

Admissions & Policies

Admissions

Students who hold a bachelor's degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, or students who have equivalent work experience indicating analytical aptitude, may apply. Depending on their background, some domestic applicants may be accepted provisionally and required to complete 3 to 12 credits of preliminary coursework before they are allowed to enroll in any of the core or specialty courses in the program. A minimum undergraduate GPA of 3.00 is required for acceptance.

Requirements

(formerly VS-MS-CFRS)

Degree Requirements

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree with a GPA of 3.00 or higher, with no more than 6 credit hours of C grades. The plan of study includes a 21-credit required core component which includes a mandatory capstone course, and the choice of either a concentration or a 9-credit elective component as shown below:

Core Courses

Code	Title	Credits
DFOR 510	Digital Forensics Analysis	3
DFOR 660	Network Forensics	3
DFOR 661	Digital Media Forensics	3
DFOR 663	Operations of Intrusion Detection for Forensics	3
or DFOR 664	Incident Response Forensics	
DFOR 760	Legal and Ethical Issues in IT [1]	3
or DFOR 770	Fraud and Forensics in Accounting	
DFOR 762	Mobile Device Forensics	3
DFOR 790	Advanced Digital Forensics	3
Total Credits		21

[1] Both DFOR 760 and DFOR 770 may be taken, but only one may be used in the core component.

Concentration in Penetration Testing/Reverse Engineering (PTRE)

Focused on the practical aspects of penetration testing and reverse engineering. Students are expected to master tools, techniques, and methodologies of penetration testing and reverse engineering.

Code	Title	Credits
DFOR 761	Malware Reverse Engineering	3
DFOR 767	Penetration Testing in Digital Forensics	3
DFOR 772	Forensic Artifact Extraction	3
Total Credits		9

Electives

Code	Title	Credits
Students who do not choose the above concentration should select 9 credits from the following:		9
DFOR 590	Special Topics in Digital Forensics	
DFOR 663	Operations of Intrusion Detection for Forensics	
DFOR 664	Incident Response Forensics	
DFOR 698	Independent Reading and Research	
DFOR 710	Memory Forensics	
DFOR 720	Digital Audio Video Forensics	
DFOR 725	Linux Forensics	
DFOR 730	Forensic Deep Packet Inspection	
DFOR 737	Cloud Forensics	
DFOR 760	Legal and Ethical Issues in IT	
DFOR 761	Malware Reverse Engineering	
DFOR 762	Mobile Device Forensics	
DFOR 763	Registry Forensics - Windows	
DFOR 764	Mac Forensics	
DFOR 767	Penetration Testing in Digital Forensics	
DFOR 768	Digital Warfare	
DFOR 769	Anti-Forensics	
DFOR 770	Fraud and Forensics in Accounting	
DFOR 771	Digital Forensic Profiling	
DFOR 772	Forensic Artifact Extraction	
DFOR 773	Mobile Application Forensics and Analysis	
DFOR 775	Kernel Forensics and Analysis	
DFOR 780	Advanced Topics in Digital Forensics	
ECE 511	Computer Architecture	
ECE 611	Advanced Computer Architecture	
ECE 612	Real-Time Embedded Systems	
ECE 642	Design and Analysis of Computer Communication Networks	
ECE 646	Applied Cryptography	
ECE 746	Advanced Applied Cryptography	
ISA 650	Security Policy	
ISA 652	Security Audit and Compliance Testing	
ISA 656	Network Security	
ISA 674	Intrusion Detection	
ISA 785	Research in Digital Forensics	
TCOM 662	Advanced Secure Networking	
FRSC 510	Basic Crime Analysis	

Other courses may be appropriate as electives in the degree program, but they must be approved prior to registration.

Accelerated Master's

Applied Science, BAS Cyber Security Concentration/Digital Forensics, Accelerated MS

Overview

Highly-qualified students in the Applied Science, BAS, Cyber Security Concentration have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Science, BAS, Cyber Security Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/#cybs) program may apply for this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BAS and MS programs, with up to 12 credits overlapping from the following courses:

Code	Title	Credits
DFOR 510	Digital Forensics Analysis	3
DFOR 660	Network Forensics	3
DFOR 661	Digital Media Forensics	3
DFOR 663	Operations of Intrusion Detection for Forensics	3
DFOR 664	Incident Response Forensics	3

Degree Conferral

Students must apply the semester before they expect to complete the BAS requirements to have the BAS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Cyber Security Engineering, BS/Digital Forensics, Accelerated MS

Overview

Highly-qualified students in the Cyber Security Engineering, BS have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Cyber Security Engineering, BS program may apply for this option if they have earned 90 undergraduate credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with 6 credits overlapping.

Students register for two Digital Forensics core courses (6 credits) in place of two of the three required technical electives, as part of the undergraduate degree requirements.

Note: Students complete all Digital Forensics, MS core courses and apply the two courses from the above list toward the Digital Forensics, MS requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/Digital Forensics, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply for this option if they have earned 60 undergraduate credits and take graduate level courses after completion of 75 credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 9 credits) overlapping from the following courses:

Code	Title	Credits
DFOR 510	Digital Forensics Analysis	3
DFOR 660	Network Forensics	3
DFOR 663	Operations of Intrusion Detection for Forensics	3

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Electrical and Computer Engineering Minor

Banner Code: ECE

Phone: 703-993-1569
Email: ece@gmu.edu
Website: ece.gmu.edu

Electrical and computer engineering has transformed every single facet of our lives. The minor in electrical and computer engineering (ECE) is a broad program designed to provide non-ECE students with the foundational knowledge to build and analyze analog and digital circuits as well as signals and systems that form the foundations of any electrical device ranging from smart phones to satellites. These foundation courses enable students to then take on higher-level coursework as part of the minor electives, providing them with a deeper understanding and hands-on opportunity to build a diverse range of hardware systems.

The ECE minor is open to any student (except those pursuing the Electrical Engineering, BS or the Computer Engineering, BS degrees) and is especially conducive to those students with a strong mathematics and

science background, such as a major in another engineering or science field as well as those pursuing a bachelor's in computer science. By combining knowledge from their major, students can use the basics and hands-on experiences gained from the ECE minor to design, engineer, build and innovate practical systems to solve real-world problems.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 18-21

Required Courses

Code	Title	Credits
ECE 101	Introduction to Electrical and Computer Engineering	3
ECE 201	Introduction to Signals and Systems	3
ECE 330	Circuit Theory	3
or ECE 285	Electric Circuit Analysis I	
ECE 301	Digital Electronics	3-4
or ECE 231 & ECE 232	Digital System Design and Digital System Design Lab	
Total Credits		12-13

Technical Electives

Code	Title	Credits
Select at least six credits from the following list:		6-8
ECE 286	Electric Circuit Analysis II	
ECE 305	Electromagnetic Theory	
ECE 321	Continuous-Time Signals and Systems	
ECE 333	Linear Electronics I	
ECE 350	Embedded Systems and Hardware Interfaces	
ECE 370	Robot Design	
ECE 410	Applications of Discrete-Time Signal Processing	
ECE 415	Power System Analysis	
ECE 416	Electric Machinery and Modern Applications	
ECE 417	Smart Grid and Cyber Security	
ECE 421	Classical Systems and Control Theory	
ECE 424	Modern Control Systems Design	
ECE 425	Secure RF Communications	
ECE 430	Principles of Semiconductor Devices	
ECE 431	Digital Circuit Design	
ECE 433	Linear Electronics II	
ECE 445	Computer Organization	
ECE 446	Device Driver Development	
ECE 447	Microcontrollers	
ECE 448	FPGA Design with VHDL	
ECE 450	Mobile Robots	
ECE 460	Communication and Information Theory	
ECE 462	Data and Computer Communications	
ECE 463	Digital Communications Systems	
ECE 465	Computer Networking Protocols	
ECE 470	Introduction to Humanoid Robotics	
ECE 476	Cryptography Fundamentals	
ECE 499	Special Topics in Electrical and Computer Engineering	
Total Credits		6-8

Electrical and Computer Engineering, PhD

Banner Code: VS-PHD-ECE

Academic Advising

MSN 1G5
4400 University Drive
Fairfax, VA 22030

Phone: 703-993-1570
Email: ecephd@gmu.edu
Website: https://ece.gmu.edu/

The PhD program in Electrical and Computer Engineering educates students to do original research on ECE topics and to become technical leaders in their fields. It has a strong and growing reputation, as graduates from the department have become professors at other universities and researchers in various industrial and government research centers. Students may choose a research emphasis in areas such as bioengineering, communications and networking, computer architecture and digital design, control and robotics, electronics, hardware security and cryptographic engineering, machine learning, mobile systems, space-based systems, and signal processing. The ECE PhD program requires coursework, a qualifying exam, a teaching assignment, a dissertation proposal and research competency exam, a research seminar, dissertation research, and a dissertation defense. Mason's general doctoral requirements apply to this program.

Admissions & Policies

Admissions

All general Mason and specific Volgenau School admission requirements apply. Applicants must submit official transcripts, a resume, a goals statement, and three letters of recommendation. Official GRE General Test results are not required for admission but should be submitted by students who consider applying for certain research fellowships. For internationally educated applicants (as defined in the catalog section Admission of International Students (https://catalog.gmu.edu/admissions/international-students/#text), under English Proficiency Standards - Graduate Students), a satisfactory score on any of the English proficiency examinations accepted by Mason is required. Satisfactory scores are specific to Volgenau School of Engineering and are listed in the catalog section Admission of International Students

(https://catalog.gmu.edu/admissions/international-students/#text), under English Proficiency Standards - Graduate Students. Application materials are reviewed by the ECE PhD admissions committee.

Policies

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master's degree. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Program Requirements

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. More than half of the 72 credits applied to the doctoral degree must be earned at Mason. The degree plan outlined in Degree Requirements is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction should choose additional credits in consultation with their advisor.

Requirements

Degree Requirements

Total credits: 72

Doctoral Coursework

Courses that constitute a student's plan of study will be chosen in consultation with the student's advisor and/or dissertation committee, to include:

Code	Title	Credits
Select 18-30 credits		18-30
Total Credits		18-30

- Students are strongly encouraged to take ECE 701 Research Experience in Electrical and Computer Engineering prior to or in the same semester as the Research Qualifying Examination. In certain circumstances, this course can be skipped with the permission of the PhD advisor.
- A maximum of 21 credits of ECE 896 Directed Reading and Research. Note that ECE 698 Independent Reading and Research and ECE 798 Research Project are primarily master's level courses and cannot be counted as part of the PhD coursework. However, if these courses were taken prior to the introduction of ECE 896, the total number of credits of ECE 698, ECE 798, and ECE 896 may not exceed 21.
- A minimum of 15 credits of coursework other than ECE 701, ECE 896, ECE 998, and ECE 999.
- A maximum of 9 credits may be at the 500-level[1]

[1] For courses taken elsewhere, the equivalent levels are to be determined by the PhD advisor, subject to approval by the ECE Department chair.

Qualifying Exams

The ECE PhD Qualifying Exam tests students' knowledge of fundamental concepts and assesses their basic research skills. The exam consists of two parts: an in-class written technical qualifying exam and a research qualifying exam (RQE).

Technical Qualifying Exam

The Technical Qualifying Exam (TQE) that tests knowledge of fundamental concepts in a particular technical area. Students select one of seven areas for their TQE:

1. Computer Architecture and Digital Design
2. Control Theory
3. Electronics and Circuits
4. Hardware Security
5. Machine Learning in Computing
6. Machine Learning in Electrical Engineering
7. Signals and Systems.

The TQE is offered once a year in January before the start of the Spring semester. Students entering the program with a BS or an MS are required to take the TQE the first time it is offered after they have entered the program. A student who fails the exam will have a second and final chance to pass the exam in the following year. A student who obtains a marginal passing grade in the first attempt of the TQE will be required to take an oral exam in the same area within the subsequent four weeks. The oral exam will be administered by two ECE faculty members. A student who passes the oral exam will satisfy the TQE requirement. A student who demonstrates marginal performance in the oral exam will be required to take the written exam for the second and final time when it is offered in the following year. A student who fails the oral exam will be dismissed from the program. A student who fails the written TQE twice will be dismissed from the program.

Outstanding students may be exempt from the TQE if they obtain at least an A in two designated courses taken within the 24 months preceding the first attempt at the TQE, or within the twelve months after the student has failed the TQE in the first attempt. The designated courses are as follows:

- Area 1 - ECE 511 Computer Architecture and ECE 545 Digital System Design with VHDL
- Area 2 - ECE 521 Linear Systems and Control and ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
- Area 3 - Any two of ECE 584 Semiconductor Device Fundamentals, ECE 586 Digital Integrated Circuits, ECE 587 Design of Analog Integrated Circuits, or ECE 684 MOS Device Electronics
- Area 4 - ECE 505 Hardware Security and ECE 545 Digital System Design with VHDL
- Area 5 - ECE 511 Computer Architecture and ECE 527 Learning From Data
- Area 6 - ECE 527 Learning From Data and ECE 528 Introduction to Random Processes in Electrical and Computer Engineering
- Area 7 - ECE 521 Linear Systems and Control or ECE 535 Digital Signal Processing and ECE 528 Introduction to Random Processes in Electrical and Computer Engineering.

Research Qualifying Exam

The purpose of the Research Qualifying Exam (RQE) is to assess whether students can define a research problem, critically review the literature related to the problem, apply appropriate research methods to study the problem, and interpret and communicate their results. The RQE requires students to complete a short research project and to document

their results in a written report and an oral presentation. The RQE topic is defined by a faculty advisor in consultation with the student. A committee of three faculty members (the advisor plus two additional members) evaluates the written report and the oral presentation. During the presentation the student is expected to answer questions about their project and about fundamental concepts related to the research.

Students who enter the program with an MS degree are encouraged to start working on their RQE as soon as they enter the PhD program and no later than the start of their second semester in the program regardless of their performance on the TQE. These students are required to present their paper in the RQE exam no later than the end of their second semester in the program. Students who enter the program with a BS degree are required to take the exam prior to completing 30 credits in the program regardless of their performance on the TQE.

Evaluation

The written research paper and the presentation will be evaluated using the following four criteria. Students must receive at least a "competent" raking (three on a scale of one to five) on each of the following four evaluation criteria to pass the RQE:

- Ability to articulate the research problem and its significance.
- Ability to critically review the literature.
- Understanding of research methods.
- Ability to communicate and interpret research results.

After a student has passed the TQE and has taken the RQE, the ECE PhD Committee reviews the exam results, the student's transcript, and a letter of recommendation from the student's advisor. Based on this information, the PhD Committee determines whether the student is qualified for the PhD program. A qualified student will proceed to choose a thesis advisor.

Dissertation Research

A maximum of 24 credits of ECE 998 Doctoral Dissertation Proposal and ECE 999 Doctoral Dissertation may be applied to the degree. Students who choose to take fewer than 24 credits of ECE 998 Doctoral Dissertation Proposal and ECE 999 Doctoral Dissertation may earn the remaining credits from approved coursework. Students cannot enroll in ECE 999 Doctoral Dissertation before they have advanced to candidacy. Students advanced to candidacy after the add period for a given semester must wait until the following semester to register for ECE 999 Doctoral Dissertation. Students cannot advance to candidacy and defend their dissertation during the same semester. Once enrolled in ECE 999 Doctoral Dissertation, students must maintain continuous registration in ECE 999 Doctoral Dissertation each semester until graduation, excluding summers. Students who defend in the summer must be registered for at least 1 credit of ECE 999 Doctoral Dissertation during that summer term.

Code	Title	Credits
Select 12-24 credits from the following:		12-24
ECE 998	Doctoral Dissertation Proposal (minimum 9 credits required)	
ECE 999	Doctoral Dissertation (minimum 3 credits required)	
Total Credits		12-24

Advisor, Dissertation Director, and Dissertation Committee

The process of finding a dissertation topic and dissertation director is governed by the university's policies, as described in the Requirements for Doctoral Degrees in the Academic Policies section of the catalog. Upon admission to the program, each student is assigned an ECE faculty member as an academic advisor. After the student passes the qualifying exam, the student proposes and the ECE department chair appoints a dissertation director who must be a Mason graduate faculty member with a full-time appointment. The dissertation director becomes the student's academic advisor. Normally, the dissertation director is a member of the ECE department; however, a member of another department may be appointed if warranted by the dissertation research topic. A dissertation committee should be formed within a year after the student has passed the qualifying exam. The dissertation committee consists of the dissertation director who acts as chair plus three or four additional members. All dissertation committees must include at least three members of the Mason graduate faculty, at least two of whom must be from the ECE Department. At least one member of the dissertation committee must be from outside the discipline of electrical and computer engineering. The outside member may be faculty from another Mason department or, if justified by the research topic, a qualified scientist or engineer from outside the university. All committee members must have a doctoral level degree. The dissertation committee must be approved by the ECE department chair. The dissertation director, as academic advisor, and the ECE Department chair must approve all decisions concerning a student's course requirements and dissertation.

Dissertation Proposal, Research Competency Exam, Advancement to Candidacy

The student prepares a written dissertation proposal outlining the proposed research and submits it to the dissertation committee for approval. After completing coursework requirements and preparing a proposal, the student takes a research competency exam to demonstrate their preparation for dissertation research. The exam consists of a presentation of the dissertation proposal followed by an oral exam. The exam is administered by the student's dissertation committee. The purpose of the oral exam is to verify that the student is familiar with the relevant material related to their research. The student is advanced to candidacy when he or she passes the oral exam and the dissertation committee approves the proposal.

Dissertation Research and Defense

Students conduct dissertation research under the guidance of their dissertation director, with regular consultation with other members of the dissertation committee. During this period, students must present their research results at least once in the form of a department seminar. The dissertation must represent an achievement in research, must be a significant contribution to its field, and should be deemed publishable in refereed journals or at highly selective conferences. On completion of the dissertation the student may be asked, at the discretion of the dissertation committee, to present a predefense in the presence of the committee members. The dissertation committee and the department chair approve the student's application for a public defense of the doctoral dissertation. A copy of the dissertation must be placed in the University Libraries four weeks prior to the public defense. After a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of doctor of philosophy.

Teaching Requirement

To acquire teaching experience, each PhD student is required to participate in the department's teaching activity. The requirement is typically satisfied by working as a recitation instructor for one semester,

presenting several lectures within a course, or performing other teaching work approved by the department.

Electrical Engineering, BS

Academic Advising

MSN 1G5
4400 University Drive
Fairfax, VA 22030

Phone: 703-993-1569
Email: ece@gmu.edu
Website: https://ece.gmu.edu/academics/undergraduate

Electrical engineering is a major field of modern technology and has transformed every facet of our lives. Electrical engineers are involved in research, development, design, production, and operation of a wide variety of devices and systems, including reliable, secure, and high-speed communication networks, autonomous vehicles, robots, multi-agent systems, nanoscale integrated circuits as well as sensors that are essential to the internet-of-things. Other technologies in electrical engineering include smartphones, tablets and other modern computing platforms, as well as wearable technology such as health-monitoring wristbands, biomedical systems such as prosthetic devices, and brain-machine interfaces. The electrical engineering program offers a broad variety of courses and prepares students for a diverse array of careers in the field. Hands-on design experiences and simulation are emphasized throughout the curriculum through labs and projects integrated into various courses. The program culminates in a year-long senior design project effort which provides each student with the opportunity to apply concepts to designing, innovating and building a functional hardware system in a team environment.

The Department of Electrical and Computer Engineering is staffed by 33 full-time professors and several part-time professors.

The bachelor's program in Electrical Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Career Opportunities

Career opportunities exist in engineering research and development, system design, system integration, engineering management, engineering consultancy, technical sales, and patent law, among others. The program provides a strong preparation for graduate study.

Specializations

The curriculum provides a strong background in the fundamentals of electrical engineering and senior-level courses in the areas of electronics, networks, communications and signal processing, embedded systems, internet of things, power and energy systems, and controls and robotics. Further, the curriculum includes 9 credits of senior technical electives and 2 credits of advanced engineering labs, which may be used for further specialization in one of these areas.

Additional Information

Degree requirements may be satisfied on a full-time or part-time basis. Cooperative education provides students with the opportunity to integrate paid career-related work experience with classroom learning. Academic credit towards the completion of major requirements is not given for co-op experience. In addition to the usual financial aid available through the Office of Student Financial Aid, electrical engineering majors are encouraged to apply for scholarships provided by various professional societies and industrial organizations in their field.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Writing-Intensive Requirement

Mason's writing-intensive requirement is satisfied by the following two courses: ECE 333 Linear Electronics I and ECE 491 Engineering Seminar in which faculty provide writing instruction and feedback on student technical writing assignments. Drafts and revisions are required.

Change of Major

See Change of Major for more information.

Double Major and Minor Programs for Electrical Engineering and Computer Engineering

Electrical Engineering majors and Computer Engineering majors can earn degrees with double majors in a number of disciplines. Computer Engineering and Computer Science may be combined. Electrical Engineering has been combined with Computer Engineering, Computer Science, Mechanical Engineering, Physics or Math. Details are available in the department brochures or at the Volgenau School web site volgenau.gmu.edu (http://volgenau.gmu.edu). There are several minors available for students in the ECE Department including the Mechanical Engineering minor, Bioengineering minor, and others as listed in the catalog.

Grade Requirements

All electrical engineering students are strongly encouraged to see their major faculty advisor before course registration each semester.

Students must complete each ECE, ENGR, BENG, CS, MATH, PHYS, and STAT course presented as part of the required 121 credits for the degree with a grade of C or better.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements

Total credits: minimum 121

Electrical and Computer Engineering

Code	Title	Credits
ECE 101	Introduction to Electrical and Computer Engineering	3
ECE 201	Introduction to Signals and Systems	3
ECE 231	Digital System Design	3
ECE 232	Digital System Design Lab	1
ECE 285	Electric Circuit Analysis I	3
ECE 286	Electric Circuit Analysis II	3
ECE 305	Electromagnetic Theory	3
ECE 321	Continuous-Time Signals and Systems	3
ECE 333	Linear Electronics I	3
ECE 334	Linear Electronics Lab I	1
ECE 350	Embedded Systems and Hardware Interfaces	3
ECE 421	Classical Systems and Control Theory	3
ECE 433	Linear Electronics II	3
ECE 445	Computer Organization	3
ECE 460	Communication and Information Theory	3
ECE 491	Engineering Seminar	1
ECE 492	Senior Advanced Design Project I (Mason Core) [1]	1
ECE 493	RS: Senior Advanced Design Project II (Mason Core)	2
Total Credits		45

[1] Students who would like to complete a more challenging senior design project have the option of enrolling in ECE 392 Engineering Design Studio to gain a semester head start in the design process.

Technical Electives

Three technical elective courses totaling 9 credit hours must be selected from the list below. ECE 447 Microcontrollers and ECE 448 FPGA Design with VHDL, which are 4-credit courses with built-in labs, can be used to fulfill one technical elective and one advanced lab requirement. The graduate courses listed below and courses outside the ECE department may be taken to fulfill the technical elective requirement with the permission of the department. The decision to approve non-ECE courses as well as graduate courses as technical electives is at the discretion of the department based on a review of the course content and the student's academic record.

Code	Title	Credits
Select 9 credit hours from the following:		9
ECE 370	Robot Design	
ECE 410	Applications of Discrete-Time Signal Processing	
ECE 415	Power System Analysis	
ECE 416	Electric Machinery and Modern Applications	
ECE 417	Smart Grid and Cyber Security	
ECE 424	Modern Control Systems Design	
ECE 425	Secure RF Communications	
ECE 430	Principles of Semiconductor Devices	
ECE 431	Digital Circuit Design	
ECE 446	Device Driver Development	
ECE 447	Microcontrollers	
ECE 448	FPGA Design with VHDL	
ECE 450	Mobile Robots	
ECE 462	Data and Computer Communications	
ECE 463	Digital Communications Systems	
ECE 465	Computer Networking Protocols	
ECE 470	Introduction to Humanoid Robotics	
ECE 476	Cryptography Fundamentals	
ECE 499	Special Topics in Electrical and Computer Engineering	
The following 500-level courses may also be taken (with prior approval of the department):		
ECE 505	Hardware Security	
ECE 508	Internet of Things

Total Credits		9

Additional Mason Core

Students must complete all Mason Core requirements not fulfilled by major requirements. Mason Core courses should be selected from the department's list of approved courses. Honors college students meet the written and oral communication requirements through completion of the honors college curriculum. The Synthesis Mason Core requirement is satisfied by ECE 492 Senior Advanced Design Project I (Mason Core) and ECE 493 RS: Senior Advanced Design Project II (Mason Core).

[1] Lower-level requirement.

Concentrations

Concentrations are available in the electrical engineering baccalaureate program. Completion of specific science courses and senior-level courses leads to one of these designations on the student's transcript on graduation. Concentration requirements may also meet some or all of the Advanced Engineering Lab and Technical Elective requirements.

Available Concentrations

- Concentration in Controls and Robotics (CARB)
- Concentration in Communications and Signal Processing (CSP)
- Concentration in Electronics (ELE)
- Concentration in Embedded Systems (EMSY)
- Concentration in Internet of Things (IOT)
- Concentration in Power and Energy Systems (PES)

Concentration in Controls and Robotics (CARB)

Code	Title	Credits
Required Courses:		7
ECE 350	Embedded Systems and Hardware Interfaces	
ECE 424	Modern Control Systems Design	
ECE 429	Modern Control Systems Lab	
Select two from the following:		6-7
ECE 370	Robot Design	
ECE 447	Microcontrollers	
ECE 450	Mobile Robots	
ECE 470	Introduction to Humanoid Robotics	
ECE 521	Linear Systems and Control	
ECE 527	Learning From Data	
Total Credits		13-14

Concentration in Communications and Signal Processing (CSP)

Code	Title	Credits
Required Courses:		7
ECE 321	Continuous-Time Signals and Systems	
ECE 460	Communication and Information Theory	
ECE 461	Communication Engineering Laboratory	
or ECE 467	Computer Networking Laboratory	
Select three from the following:		9
ECE 410	Applications of Discrete-Time Signal Processing	
ECE 425	Secure RF Communications	
ECE 462	Data and Computer Communications	
ECE 463	Digital Communications Systems	
ECE 465	Computer Networking Protocols	
ECE 476	Cryptography Fundamentals	
PHYS 306	Wave Motion and Electromagnetic Radiation	
ECE 527	Learning From Data	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 531	Introduction to Wireless Communications and Networks	
ECE 535	Digital Signal Processing	
ECE 567	Optical Fiber Communications	
Total Credits		16

Concentration in Electronics (ELE)

Code	Title	Credits
Required Courses:		4
ECE 433	Linear Electronics II	
ECE 434	Linear Electronics II Laboratory	
Select three from the following:		9-11
ECE 415	Power System Analysis	
ECE 430	Principles of Semiconductor Devices	
ECE 431	Digital Circuit Design	
ECE 447	Microcontrollers	
ECE 448	FPGA Design with VHDL	
PHYS 306	Wave Motion and Electromagnetic Radiation	
ECE 513	Applied Electromagnetic Theory	
ECE 565	Introduction to Optical Electronics	
ECE 567	Optical Fiber Communications	
ECE 584	Semiconductor Device Fundamentals	
ECE 586	Digital Integrated Circuits	
ECE 587	Design of Analog Integrated Circuits	
Total Credits		13-15

Concentration in Embedded Systems (EMSY)

Code	Title	Credits
Required Courses:		7
ECE 350	Embedded Systems and Hardware Interfaces	
ECE 447	Microcontrollers	
Select two from the following:		6
ECE 446	Device Driver Development	
ECE 510	Real-Time Concepts	
ECE 516	Mobile Systems and Applications	
ECE 530	Sensor Engineering	
ECE 580	Small Spacecraft Engineering	
Total Credits		13

Concentration in Internet of Things (INOT)

Code	Title	Credits
Required Courses:		9
ECE 350	Embedded Systems and Hardware Interfaces	
ECE 465	Computer Networking Protocols	
ECE 508	Internet of Things	
Select one from the following:		3
ECE 462	Data and Computer Communications	
ECE 476	Cryptography Fundamentals	
ECE 510	Real-Time Concepts	
ECE 512	Computer Architecture Security	
ECE 530	Sensor Engineering	
Total Credits		12

Concentration in Power and Energy Systems (PES)

Code	Title	Credits
Required Courses:		6
ECE 305	Electromagnetic Theory	
ECE 415	Power System Analysis	
Select one from the following:		3
ECE 416	Electric Machinery and Modern Applications	
or ECE 417	Smart Grid and Cyber Security	
Select one from the following:		3
ECE 416	Electric Machinery and Modern Applications	
ECE 417	Smart Grid and Cyber Security	
ECE 424	Modern Control Systems Design	
ECE 425	Secure RF Communications	

ECE 462	Data and Computer Communications	
ECE 463	Digital Communications Systems	
ECE 465	Computer Networking Protocols	
ECE 476	Cryptography Fundamentals	
ECE 505	Hardware Security	
ECE 508	Internet of Things	
ECE 513	Applied Electromagnetic Theory	
ECE 527	Learning From Data	
ECE 531	Introduction to Wireless Communications and Networks	
Total Credits		12

4-Year Plan

Bachelors of Science in Electrical Engineering Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain an undergraduate BS degree and the Statistical Science, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program **if such an accelerated** Statistical Science, MS **pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs.**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Statistical Science, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00.
- Completion of the following Mason courses each with a grade of C or better:

Code	Title	Credits
MATH 213	Analytic Geometry and Calculus III	3
MATH 203	Linear Algebra	3
or MATH 321	Abstract Algebra	
STAT 250	Introductory Statistics I (Mason Core)	3
or STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	3
or MATH 351	Probability	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits satisfying degree requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 560	Biostatistical Methods	3
STAT 574	Survey Sampling I	3
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate

Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Electrical Engineering, BS/Computer Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Electrical Engineering and an MS in Computer Engineering in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below. Note that ECE 587 can be used to meet the ECE 433 requirement for the BS in Electrical Engineering program. An additional 9 credits of graduate-level courses from the list below may be selected to substitute in place of the 9 credits of technical electives required for the undergraduate degree.

Code	Title	Credits
ECE 505	Hardware Security	3
ECE 508	Internet of Things	3
ECE 510	Real-Time Concepts	3
ECE 511	Computer Architecture	3
ECE 512	Computer Architecture Security	3
ECE 516	Mobile Systems and Applications	3
ECE 521	Linear Systems and Control	3
ECE 527	Learning From Data	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 530	Sensor Engineering	3
ECE 531	Introduction to Wireless Communications and Networks	3
ECE 535	Digital Signal Processing	3
ECE 542	Computer Network Architectures and Protocols	3
ECE 545	Digital System Design with VHDL	3
ECE 567	Optical Fiber Communications	3
ECE 580	Small Spacecraft Engineering	3
ECE 590	Selected Topics in Engineering	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Electrical Engineering, BS/Electrical Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Electrical Engineering and an MS in Electrical Engineering in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below: Note that that ECE 587 can be used to meet the ECE 433 requirement for the BS in Electrical Engineering program. ECE 584	Semiconductor Device Fundamentals	3
ECE 586	Digital Integrated Circuits	3
ECE 587	Design of Analog Integrated Circuits	3
ECE 590	Selected Topics in Engineering	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees

Electrical Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain an Electrical Engineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Electrical Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH, PHYS 160/161, and PHYS 260/261 requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The

courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Electrical and Computer Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Electrical and Computer Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Note that ECE 587 can be used to meet the ECE 433 requirement for the Electrical Engineering, BS program. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Electrical and Computer Engineering courses:

Code	Title	Credits
ECE 505	Hardware Security	
ECE 508	Internet of Things	
ECE 510	Real-Time Concepts	
ECE 511	Computer Architecture	
ECE 513	Applied Electromagnetic Theory	
ECE 516	Mobile Systems and Applications	
ECE 521	Linear Systems and Control	
ECE 526	Neural Engineering	
ECE 527	Learning From Data	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 530	Sensor Engineering	
ECE 531	Introduction to Wireless Communications and Networks	
ECE 535	Digital Signal Processing	
ECE 538	Medical Imaging	
ECE 542	Computer Network Architectures and Protocols	
ECE 550	System Engineering Design	
ECE 565	Introduction to Optical Electronics	
ECE 567	Optical Fiber Communications	
ECE 580	Small Spacecraft Engineering	
ECE 584	Semiconductor Device Fundamentals	
ECE 586	Digital Integrated Circuits	
ECE 587	Design of Analog Integrated Circuits	
ECE 590	Selected Topics in Engineering	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Electrical Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain an Electrical Engineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Electrical Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH, PHYS 160/161, and PHYS 260/261 requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Electrical and Computer Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Electrical and Computer Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Note that ECE 587 can be used to meet the ECE 433 requirement for the Electrical Engineering, BS program. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

SYST 568	Applied Predictive Analytics
SYST 584	Heterogeneous Data Fusion
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Electrical Engineering, BS/ Telecommunications, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Electrical Engineering and an MS in Telecommunications in an accelerated time-frame after satisfactory completion of a minimum of 142 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 9 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below. At least one class (3 credits) needs to be an ECE course. These 9 credits of graduate-level courses may be selected to substitute in place of the 9 credits of technical electives required for the undergraduate degree:

Code	Title	Credits
TCOM 514	Basic Switching: Lecture and Laboratory Course	3
or TCOM 515	Internet Protocol Routing: Lecture and Laboratory Course	
TCOM 535	The TCP/IP Suite of Internet Protocols	3
ECE 542	Computer Network Architectures and Protocols	3
ECE 531	Introduction to Wireless Communications and Networks	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the list below as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

Code	Title	Credits
TCOM 500	Modern Telecommunications	3
TCOM 514	Basic Switching: Lecture and Laboratory Course	3
TCOM 515	Internet Protocol Routing: Lecture and Laboratory Course	3
TCOM 535	The TCP/IP Suite of Internet Protocols	3
TCOM 552	Introduction to Mobile Communications Systems	3
TCOM 570	Network Automation	3
TCOM 590	Selected Topics in Telecommunications	1.5-3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Fairfax, VA 22030

Phone: 703-993-1569
Email: ece@gmu.edu

Website: https://ece.gmu.edu/

Electrical Engineering is the discipline that drives our increasingly-connected society. Electrical engineers design systems, devices, and algorithms that contribute innovative solutions across a broad spectrum of applications. The Electrical Engineering program offers the following concentrations: bioengineering, communications and networking, control and robotics, electronics, signal processing, and space-based systems. The graduates of our program develop reliable, secure, and high-speed communication networks and systems; apply modern signal processing algorithms to extract information from images, audio, video, sonar, and radio signals; apply control theory and robotics foundations to applications such as autonomous vehicles, humanoid robots, and multi-agent systems; design nanoscale devices for the highly integrated circuits that drive the Internet of Things, health-monitoring devices, smartphones, tablets, and modern-day computer systems; develop prosthetic devices, brain-machine interfaces, and systems to ameliorate neurological disorders. Students in this program will develop theoretical foundations, analytical capabilities, and practical hands-on skills in their chosen field of specialization. They will also develop the oral and written communication skills necessary to articulate their ideas and succeed as entrepreneurs, practicing engineers, or technical managers in high-tech companies.

Admissions & Policies

Admissions

Requirements

To be considered for admission to the degree, applicants should have a baccalaureate degree in electrical engineering, computer engineering, or a closely-related discipline from an accredited program, and have earned a GPA of B or better during the last 60 credits. All students are also required to submit a resume and are encouraged to provide up to three choices for their preferred academic advisor and select their concentration at the time of application to the program.

For internationally educated applicants (as defined in the catalog section Admission of International Students (https://catalog.gmu.edu/admissions/international-students/#text), under English Proficiency Standards - Graduate Students), a satisfactory score on any of the English proficiency examinations accepted by Mason is required. Satisfactory scores are specific to Volgenau School of Engineering and are listed in the catalog section Admission of International Students (https://catalog.gmu.edu/admissions/international-students/#text), under English Proficiency Standards - Graduate Students.

All students are also required to submit resume and encouraged to provide up to three choices for their preferred academic advisor and select their concentration at the time of application to the program.

Students with BS or MS degrees in ECE-related disciplines (for example, bioengineering, computer science, cyber security engineering, mathematics, mechanical engineering, or physics) are encouraged to apply for admission. Domestic students may be admitted provisionally and required to satisfy provisional requirements before taking advanced coursework. Such students may also be advised to take some courses from the undergraduate electrical engineering curriculum, according to their intended specialization and specific backgrounds.

Policies

Student Advising

Students can select a concentration from those available in the MS degree program at the time of application to the program or later during their studies. In the former case, students are assigned an academic advisor from the selected concentration at the time of the admission, in the latter case, students can petition for a change of an academic advisor to match their concentration choice.

Plan of Study

Before completing 6 credit hours of coursework, each student must submit to the department a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

Requirements

Degree Requirements

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree. The plan of study for the degree must fulfill the following requirements:

Core Course Requirement

Code	Title	Credits
Required Courses		
Select 15 credits from the following:		15
ECE 511	Computer Architecture	
ECE 521	Linear Systems and Control	
ECE 526	Neural Engineering	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 535	Digital Signal Processing	
ECE 542	Computer Network Architectures and Protocols	
ECE 580	Small Spacecraft Engineering	
ECE 584	Semiconductor Device Fundamentals	
ECE 586	Digital Integrated Circuits	
ECE 587	Design of Analog Integrated Circuits	
ECE 621	Systems Identification	
ECE 630	Statistical Communication Theory	
ECE 799	Master's Thesis [1]	
Total Credits		15

[1] See Thesis/Scholarly Paper option.

Concentration Requirement

Accomplished by choosing one of the concentrations, and then meeting course requirements for this concentration with the grade B or better in each course. For each concentration, related ECE 590 Selected Topics in Engineering courses can be used in addition to all explicitly listed 500-level courses, and related ECE 699 Advanced Topics in Electrical and Computer Engineering courses in addition to all explicitly listed 600 level or above courses, subject to approval by the student's academic advisor.

With assistance from their advisors, students may petition the graduate program coordinator to approve a specialization area of their own design, not fulfilling the requirements of any concentration.

Available Concentrations

- Concentration in Bioengineering (BIOE)
- Concentration in Communications and Networking (CONE)
- Concentration in Control and Robotics (CORO)
- Concentration in Electronics (ELE)
- Concentration in Signal Processing (SIGP)
- Concentration in Space-Based Systems (SBSY)

Concentration in Bioengineering (BIOE)

Code	Title	Credits
Required Courses		
ECE 526	Neural Engineering	3
ECE 538	Medical Imaging	3
Total Credits		6

Code	Title	Credits
Electives		
Select at least three courses from the following, including two courses at the 600 level or above:		9
BENG 501	Bioengineering Research Methods	
BENG 738	Advanced Medical Image Processing	
ECE 521	Linear Systems and Control	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 530	Sensor Engineering	
ECE 535	Digital Signal Processing	
ECE 537	Introduction to Digital Image Processing (DIP)	
ECE 542	Computer Network Architectures and Protocols	
ECE 620	Optimal Control Theory	
ECE 621	Systems Identification	
ECE 622	Kalman Filtering with Applications	
ECE 636	Advanced Digital Signal Processing	
ECE 637	Array Processing	
ECE 734	Detection and Estimation Theory	
Total Credits		9

Concentration in Communications and Networking (CONE)

Code	Title	Credits

ECE 636	Advanced Digital Signal Processing	
ECE 637	Array Processing	
ECE 648	Digital Signal Processing Hardware Architectures	
ECE 651	Advanced Learning From Data	
ECE 728	Random Processes in Electrical and Computer Engineering	
ECE 731	Digital Communications	
ECE 732	Mobile Communication Systems	
ECE 734	Detection and Estimation Theory	
ECE 751	Information Theory	
Total Credits		9

Concentration in Space-Based Systems (SBSY)

Code	Title	Credits
Required Courses		
ECE 511	Computer Architecture	3
ECE 580	Small Spacecraft Engineering	3
Total Credits		6

Code	Title	Credits
Electives		
Select at least three courses from the following, including two courses at the 600 level or above:		9
ECE 510	Real-Time Concepts	
ECE 513	Applied Electromagnetic Theory	
ECE 521	Linear Systems and Control	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 530	Sensor Engineering	
ECE 535	Digital Signal Processing	
ECE 545	Digital System Design with VHDL	
ECE 550	System Engineering Design	
ECE 612	Real-Time Embedded Systems	
ECE 615	Software/Hardware Codesign	
ECE 620	Optimal Control Theory	
ECE 622	Kalman Filtering with Applications	
ECE 627	Adaptive Control	
ECE 630	Statistical Communication Theory	
ECE 631	Software-Defined Radio	
ECE 635	Adaptive Signal Processing	
ECE 637	Array Processing	
ECE 639	Satellite Communications	
ECE 640	Small Satellite Development	
ECE 660	Space Systems Engineering	
Total Credits		9

Upper-Level Course Requirement

A minimum of 9 credit hours of ECE courses at the 600 level or above, other than ECE 698, ECE 798, and ECE 799 (including, but not limited to, the selected concentration elective), with the grade B or better in each course.

ECE Course Requirement

A maximum of 6 credits of non-ECE courses may be used to fulfill degree requirements, subject to prior approval by the student's academic advisor, in the form of a plan of study signed by the advisor and submitted to the ECE Office.

Electives

Electives can be chosen from among all ECE graduate courses, as well as related graduate courses with other designations. The students are encouraged to discuss their choice of electives with their academic advisor prior to the registration.

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Seminar Requirement

Graduate students are expected to participate actively in the exchange of knowledge and ideas in their discipline. Towards this objective, all degree candidates must attend a minimum of 6 graduate seminars approved for the degree program. Approved seminars are publicized on the departmental website.

To demonstrate completion of the seminar requirement, students must register for ECE 795 Engineering Seminar in their final semester. The department office will verify that the seminar requirement has been met and submit a grade of S (satisfactory) upon completion of the requirement. Students who have not met the seminar requirement in their final semester must continue to register for ECE 795 in subsequent semesters until the requirement is met.

Thesis/Scholarly Paper Option

To complete the program, students may select one of the following options:

Thesis Option

Students who select this option must complete:

Code	Title	Credits
ECE 799	Master's Thesis	6
Coursework		24
Total Credits		30

The thesis is particularly recommended for those students who wish to develop and document their research skills or contemplate subsequent enrollment in a PhD program. The thesis involves a research effort, which is conducted under the guidance of a faculty advisor. Choosing the thesis option requires approval of a full-time faculty member willing to serve as a thesis advisor. The topic and scope of the thesis must be approved by the thesis advisor. In some cases, permission may be granted to complete a portion of the work at the student's place of employment. The final written thesis and oral defense are approved by the student's advisory committee.

This committee consists of at least three full-time faculty members, including two from the student's concentration, and one from outside the concentration. Thesis students may not register for ECE 798 Research Project. Students must register for at least 3 credits of ECE 799 Master's Thesis for their first thesis semester. Following their first thesis semester, they must register for at least 1 credit of ECE 799 Master's Thesis each fall and spring semester until graduation.

Scholarly Paper Option

Students who select to complete their degree program with a scholarly paper must:

Code	Title	Credits
Complete 30 credits of coursework		30
ECE 797	Scholarly Paper	0
Enroll in a 600-level or above course requiring a research project		
Write a Scholarly Paper project report and present findings as part of the course requirements		
Total Credits		30

An acceptable scholarly paper must be technically sound, adhere to accepted formatting standards for technical reports, and contain a significant literature review evidenced by a comprehensive list of cited references.

A list of courses requiring projects that can be used to satisfy the scholarly paper requirement will be published on the department website. Scholarly papers must be individual written project reports – not group projects. To qualify as a scholarly paper an oral presentation of the project is required. A passing grade for the project, reflecting both the written report and the oral presentation, satisfies the scholarly paper requirement.

A successful scholarly paper will be recorded by awarding a satisfactory (S) grade for ECE 797 Scholarly Paper. Students are eligible to attempt the scholarly paper and register for ECE 797 Scholarly Paper after completion of 18 hours of coursework. Students choosing the scholarly paper option are not eligible for graduation until they have received a final, passing grade for ECE 797 Scholarly Paper.

Accelerated Master's

Computer Engineering, BS/Electrical Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Computer Engineering and an MS in Electrical Engineering in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below. Note that ECE 542 can be used to meet the ECE 465 requirement for the BS in Electrical Engineering program. An additional 9 credits of graduate-level courses from the list below may be selected to substitute in place of the 9 credits of technical electives required for the undergraduate degree.

Code	Title	Credits
ECE 505	Hardware Security	3
ECE 508	Internet of Things	3
ECE 510	Real-Time Concepts	3
ECE 511	Computer Architecture	3
ECE 513	Applied Electromagnetic Theory	3
ECE 516	Mobile Systems and Applications	3
ECE 521	Linear Systems and Control	3
ECE 526	Neural Engineering	3
ECE 527	Learning From Data	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 530	Sensor Engineering	3
ECE 531	Introduction to Wireless Communications and Networks	3
ECE 535	Digital Signal Processing	3
ECE 542	Computer Network Architectures and Protocols	3
ECE 550	System Engineering Design	3
ECE 565	Introduction to Optical Electronics	3
ECE 567	Optical Fiber Communications	3
ECE 580	Small Spacecraft Engineering	3
ECE 584	Semiconductor Device Fundamentals	3
ECE 586	Digital Integrated Circuits	3
ECE 587	Design of Analog Integrated Circuits	3
ECE 590	Selected Topics in Engineering	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Electrical Engineering, BS/Electrical Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Electrical Engineering and an MS in Electrical Engineering in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 12 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below: Note that that ECE 587 can be used to meet the ECE 433 requirement for the BS in Electrical Engineering program. An additional 9 credits of graduate-level courses from the list below may be selected to substitute in place of the 9 credits of technical electives required for the undergraduate degree:

Code	Title	Credits
ECE 505	Hardware Security	3
ECE 508	Internet of Things	3
ECE 510	Real-Time Concepts	3
ECE 511	Computer Architecture	3
ECE 513	Applied Electromagnetic Theory	3
ECE 516	Mobile Systems and Applications	3
ECE 521	Linear Systems and Control	3
ECE 526	Neural Engineering	3
ECE 527	Learning From Data	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 530	Sensor Engineering	3
ECE 531	Introduction to Wireless Communications and Networks	3
ECE 535	Digital Signal Processing	3
ECE 538	Medical Imaging	3

ECE 542	Computer Network Architectures and Protocols	3
ECE 550	System Engineering Design	3
ECE 565	Introduction to Optical Electronics	3

ECE 580	Small Spacecraft Engineering	3
ECE 584	Semiconductor Device Fundamentals	3
ECE 586	Digital Integrated Circuits	3
ECE 587	Design of Analog Integrated Circuits	3
ECE 590	Selected Topics in Engineering	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the above list as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees

Mechanical Engineering, BS/Electrical Engineering, Accelerated MS

Overview

The university offers highly-qualified students in the Mechanical Engineering, BS the option of obtaining an accelerated Electrical Engineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Mechanical Engineering, BS program may apply for this option if they have earned 60 undergraduate credits, with an overall GPA of at least 3.0, and passed MATH 203 Linear Algebra and STAT 346 Probability for Engineers, or their equivalents, with the grade C or better. Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students must complete all credits that satisfy the requirements for the BS and MS programs, with up to 9 credits overlapping.

Students take up to 9 credits of 500-level ECE or SYST courses as part of their technical electives or substitutes for required courses in the Mechanical Engineering, BS program.

Specifically, students are encouraged to take up to three of the following courses:

Code	Title	Credits
ECE 521	Linear Systems and Control	3
ECE 526	Neural Engineering	3
ECE 527	Learning From Data	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 580	Small Spacecraft Engineering	3
SYST 521	Network Analysis	3

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Small Satellite Engineering Graduate Certificate

Banner Code: VS-CERG-SSEN

Phone: 703-993-1569
Email: ece@gmu.edu
Website: ece.gmu.edu

The Department of Electrical and Computer Engineering, in conjunction with the Department of Systems Engineering and Operations Research, offers the certificate in small satellite engineering. This graduate certificate provides a broad understanding of small satellite mission and operations and of technologies for spacecraft design and engineering, satellite bus, hardware and software systems, and communications. A two-semester hands-on project course is included to exercise a transition of theory into engineering practice in satellite and ground station engineering. Coursework for the graduate certificate can be used for credit toward the MS in Electrical or Computer Engineering. However, the certificate's primary purpose is to provide a well-defined body of information for students who want to advance or update their knowledge in small satellite technologies, but who do not necessarily wish to complete requirements for the MS degree. The certificate may be pursued concurrently with any of the graduate degree programs in the Volgenau School of Engineering.

Admissions & Policies

Admissions

The graduate certificate is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities and can hold graduate status (either degree or non-degree) in the Volgenau School.

Policies

The certificate is awarded on completion of four required graduate courses (12 credits) in space systems. A cumulative GPA of 3.00 is required, and at most one course with a grade of C may be applied toward the certificate.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a part-time basis only.

Code	Title	Credits
ECE 580	Small Spacecraft Engineering	3
ECE 639	Satellite Communications	3
ECE 691	CubeSat Design	1.5
ECE 692	CubeSat Engineering	1.5

Admissions & Policies

Admissions

Concentration in Architecture-Based Systems Integration (ABSI)

A bachelor's degree is required for admission to a certificate program.

Concentration in C4I & Cyber (C4IC)

The certificate with this concentration is available to students who hold bachelor's degrees in engineering and scientific disciplines or are in graduate status in such programs.

Concentration in Communications and Networking (CONE)

The certificate with this concentration in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Concentration in Engineering Resilient Enterprise Systems (ERES)

The certificate with this concentration is available to any student who holds a bachelor's degree in an engineering or scientific discipline or has graduate status in such a program. Math requirements include MATH 113 Analytic Geometry and Calculus I (Mason Core), MATH 114 Analytic Geometry and Calculus II, or their equivalents, and a probability and statistics course.

Concentration in Financial Systems (FNSY)

The certificate with this concentration will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a minimum GPA of 3.0. Students who are already enrolled in a master's program must submit a secondary certificate form to enroll in this certificate with concentration program; all others must apply for graduate admission to this certificate with concentration program.

Concentration in Tactical Computer Operations (TCO)

Students applying to the certificate with this concentration must hold a bachelor's degree in either computer science or computer engineering. Prospective students without these specific degrees will need to have a technical bachelor's degree and show academic competence in the areas of: C (C++, C#, Objective C), Assembler, discrete mathematics, and computer networking. An undergraduate grade point average (GPA) of 3.0 or better (4.0 scale) is required.

Policies

The Systems Engineering Graduate Certificate may be pursued on a part-time basis only.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 12-15

This certificate may be pursued on a part-time basis only.

Concentration in Architecture-Based Systems Integration (ABSI)

Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/)

Coursework

The following four courses must be completed with a grade of B or better:

Code	Title	Credits
SYST 520	System Engineering Design	3
SYST 618	Model-based Systems Engineering	3
SYST 620	Discrete Event Systems	3
SYST 621	Systems Architecture Design	3
Total Credits		12

Certificate coursework within the Systems Engineering MS

In addition to the ABSI concentration courses, students must take the following six courses within the Systems Engineering, MS:

Code	Title	Credits
SYST 505	Systems Engineering Principles [1]	3
SYST 510	Systems Definition and Cost Modeling	3
SYST 530	Systems Engineering Management I	3
SYST 611	System Methodology and Modeling	3
SYST 699	Masters Project	3
Select one approved elective from the ABSI concentration		3
Total Credits		18

[1] Students who have work experience in systems engineering should consult with their advisor on replacing SYST 505 with a higher-level SYST course.

Concentration in C4I & Cyber (C4IC)

Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/)

The certificate with concentration requires 12 credits (4 courses). Students must complete the following with an average grade of B or better:

Coursework

Code	Title	Credits
SYST 680	Principles of Command, Control, Communications, Computing, and Intelligence (C4I)	3
or ECE 670	Principles of Command, Control, Communications, Computing, and Intelligence (C4I)	
OR 542	Operations Research: Stochastic Models	3
or ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
Select two from the following:		6
ECE 542	Computer Network Architectures and Protocols	
ECE 630	Statistical Communication Theory	
ECE 642	Design and Analysis of Computer Communication Networks	
OR 635	Discrete System Simulation	
SYST 584	Heterogeneous Data Fusion	
SYST 664	Bayesian Inference and Decision Theory	
SYST 683	Modeling, Simulation, and Gaming	
Total Credits		12

Completing the certificate with the C4I concentration within the Systems Engineering Master's Program

In addition to the four courses above, students must complete the following six courses:

Code	Title	Credits
SYST 505	Systems Engineering Principles	3
SYST 510	Systems Definition and Cost Modeling	3
SYST 520	System Engineering Design	3
SYST 530	Systems Engineering Management I	3
SYST 611	System Methodology and Modeling	3
SYST 699	Masters Project	3
Total Credits		18

Concentration in Communications and Networking (CONE)

Administered by the Department of Electrical and Computer Engineering (https://ece.gmu.edu/).

The certificate with a concentration in Communications and Networking is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three electives.

Coursework

Code	Title	Credits
Foundation Courses:		
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 542	Computer Network Architectures and Protocols	3
Total Credits		6

Electives

After completing the foundation courses, students choose electives by taking three courses from the following:

Code	Title	Credits
Select three courses from the following:		9
ECE 535	Digital Signal Processing	
ECE 565	Introduction to Optical Electronics	
ECE 567	Optical Fiber Communications	
ECE 630	Statistical Communication Theory	
ECE 633	Error Control Coding	
ECE 635	Adaptive Signal Processing	
ECE 642	Design and Analysis of Computer Communication Networks	
ECE 643	Network Switching and Routing	
ECE 646	Applied Cryptography	

ECE 731	Digital Communications	
ECE 732	Mobile Communication Systems	
ECE 734	Detection and Estimation Theory	
ECE 741	Wireless Networks	
ECE 742	High-Speed Networks	
OR 635	Discrete System Simulation	
OR 643	Network Modeling	
OR 647	Queuing Theory	
Total Credits		9

Concentration in Engineering Resilient Enterprise Systems (ERES)

Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/).

To be eligible for a certificate with concentration in Engineering Resilient Enterprise Systems, students must complete two required courses (6 credits) plus two electives (6 credits) with an average grade of B or better.

Coursework

Code	Title	Credits
SYST 523	Engineering Resilient and Agile Enterprise Systems	3
SYST 618	Model-based Systems Engineering	3
Total Credits		6

Electives

The remaining two electives must be taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective. Some certificate electives may require stronger math requirements.

Code	Title	Credits
Electives		**6**
Select at least one course from the following:		
SYST 514	Systems Thinking	
INFS 622	Information Systems Analysis and Design	
SWE 619	Object-Oriented Software Specification and Construction	
SYST 542	Decision Support Systems Engineering	
SYST 584	Heterogeneous Data Fusion	
SYST 630	Systems Engineering Management II	
Select the second course from the courses listed above or from the following:		
CS 555	Computer Communications and Networking	
ECE 542	Computer Network Architectures and Protocols	
INFS 612	Principles and Practices of Communication Networks	
Total Credits		6

Concentration in Financial Systems (FNSY)

Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/).

To be eligible for the certificate with concentration in Financial Systems Engineering, students must complete three required courses (9 credits) plus one elective (3 credits) with an average grade of B or better.

Coursework

Code	Title	Credits
SYST/OR 538	Analytics for Financial Engineering and Econometrics	3
SYST/OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	3
SYST/OR 688	Financial Systems Engineering II: Derivative Products and Risk Management	3
Total Credits		9

Elective

Code	Title	Credits
Select one from the following:		3
OR 645	Stochastic Processes	
OR 682	Computational Methods in Engineering and Statistics	
SYST 584	Heterogeneous Data Fusion	
SYST 671	Judgment and Choice Processing and Decision Making	
Total Credits		3

Concentration in Tactical Computer Operations (TCO)

Administered by the Department of Electrical and Computer Engineering (https://ece.gmu.edu/).

Students must meet prerequisites for courses by either taking the appropriate undergraduate courses or through instructor permission.

Coursework

Code	Title	Credits
CS 571	Operating Systems	3
ECE 511	Computer Architecture	3
DFOR 761	Malware Reverse Engineering	3
Total Credits		9

Electives

Code	Title	Credits
Select two courses from the following:		6
DFOR 767	Penetration Testing in Digital Forensics	
DFOR 769	Anti-Forensics	
DFOR 773	Mobile Application Forensics and Analysis	
DFOR 775	Kernel Forensics and Analysis	
ECE 646	Applied Cryptography	
ISA 564	Security Laboratory	
ISA 656	Network Security	
ISA 681	Secure Software Design and Programming	
ISA 763	Security Protocol Analysis	
Total Credits		6

Telecommunications Forensics and Security Graduate Certificate

Banner Code: VS-CERG-TFAS

3100 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-3810
Email: tcom@gmu.edu
Website: volgenau.gmu.edu/program/view/20548

The Telecommunications Forensics and Security certificate program offers courses on analyzing digital evidence, intrusion forensics and network analysis. This graduate certificate program is designed for those who are working in or planning to work in digital forensics and cyber analysis but do not want to complete requirements for a master's degree in the field. The certificate may be pursued on a part-time or full-time basis. The certificate may also be pursued concurrently with any of the graduate degree programs in the Volgenau School.

Admissions & Policies

Policies

For all policies governing Graduate Certificates, please see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Core Courses

Code	Title	Credits
TCOM 562	Network Security Fundamentals	3
or ISA 562	Information Security Theory and Practice	
TCOM 515	Internet Protocol Routing: Lecture and Laboratory Course	3
or TCOM 561	Security, Privacy, and Applied Cryptography for Telecommunications	
Select one from the following:		3
TCOM 660	Network Forensics [1]	
TCOM 661	Digital Media Forensics [1]	
TCOM 663	Operations of Intrusion Detection for Forensics [1]	
TCOM 664	Incident Response Forensics [1]	
Total Credits		9

[1] May not be taken twice for credit. If any of these courses is taken in the core element, it cannot be taken again in the elective element.

Electives

Code	Title	Credits
Select 6 credits from the following:		6
ISA 562	Information Security Theory and Practice	
TCOM 660	Network Forensics	
TCOM 661	Digital Media Forensics	
TCOM 662	Advanced Secure Networking	
TCOM 663	Operations of Intrusion Detection for Forensics	
TCOM 664	Incident Response Forensics	
Total Credits		6

Telecommunications, MS

Banner Code: VS-MS-TCOM

Academic Advising

MSN 2B5
4400 University Drive
Fairfax, VA 22030

Phone: 703-993-3810
Email: tcom@gmu.edu
Website: telecom.gmu.edu

The Master of Science in Telecommunications offers a blend of cutting-edge practice-oriented courses in network engineering, cloud computing, wireless communications (e. g. 5G), and cyber security. This industry-oriented program is designed for students who wish to enter the field of network engineering or are working in the field and want to advance their knowledge. The program concentrates on practical applications of network engineering, rather than on a theoretical approach, while providing a thorough education in the necessary engineering principles. Hands-on laboratory courses provide students with practical skills and knowledge needed to hit the ground running after graduation. This program also offers two certificate programs that may be incorporated into, and taken concurrently with, the MS in Telecommunications.

Admissions & Policies

Admissions

Requirements

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&_ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

The program is open to students who hold a BS or BA degree from an accredited college or university in engineering, math, science, computer science, business (with a quantitative background), economics, or other analytical disciplines, and students who have equivalent work experience indicating analytical aptitude. Depending on their background, some applicants may be required to complete 3 to 6 credits of preliminary coursework before they are allowed to enroll in any of the core courses or elective courses in the program. A minimum undergraduate GPA of 3.00 is usually required.

Students may be admitted to the MS program as degree seeking students, or they may be admitted for non-degree study within the program, which allows them to take individual courses. Students in the non-degree program may apply to the degree program, provided their GPA within the MS in Telecommunications Program is 3.00 or above. Up to 12 credits earned in non-degree study may be transferred into the degree program, provided each of the courses to be transferred in was passed with a grade of B or above.

Policies

GPA Requirements

A maximum of 6 credits of courses with grades of C or B- may be applied toward the degree. The student must present a GPA of at least 3.00 for all courses submitted for the degree.

Plan of Study

Before completing 9 credit hours of coursework, each student must submit to the TCOM office a plan of study that has been approved by the academic advisor. This plan should be kept up to date by regular consultation with the academic advisor. A final, signed version of the plan must be turned in when the student submits a graduation application.

Telecommunications Certificates

Two 15-credit Telecommunications certificates are offered by the department. Students may pursue these certificates as stand-alone programs through the normal admissions process or as a secondary certificate to their MS degree. Certificate courses are drawn directly from the MS in TCOM curriculum. If a student has successfully completed and conferred one of these certificates prior to acceptance to the MS, it is possible to transfer up to 12 credits (B or better) into the MS. Please note that no more than 12 credits of coursework can be brought in to the MS.

- Advanced Networking Protocols for Telecommunications Graduate Certificate
- Telecommunications Forensics and Security Graduate Certificate

Requirements

Degree Requirements

Total credits: 30

Students must complete a minimum of 30 graduate credits beyond the bachelor's degree. The plan of study includes a 21-credit required core component and a 9-credit elective component. Electives should be chosen either from the list of elective courses or from one of the two concentration options.

Core Courses

Code	Title	Credits
TCOM 500	Modern Telecommunications	3
TCOM 514	Basic Switching: Lecture and Laboratory Course	3
TCOM 515	Internet Protocol Routing: Lecture and Laboratory Course	3
TCOM 535	The TCP/IP Suite of Internet Protocols [1, 2]	3
TCOM 570	Network Automation	3
TCOM 610	Border Gateway Protocol (BGP) Routing [1]	3
TCOM 750	Coordinating Seminar	3
Total Credits		21

1 Required for the Concentration in Network Technologies

2 Required for the Concentration in Network Forensics and Security

Electives

Code	Title	Credits
Select three courses from the following:		9
TCOM 552	Introduction to Mobile Communications Systems	
TCOM 608	Optical Communications Systems	
TCOM 611	Multi-Protocol Label Switching (MPLS) [1]	
TCOM 614	Advanced Routing Lab [1]	
TCOM 616	Scalable Network Architecture [1]	
TCOM 617	Enterprise Network Architecture [1]	
TCOM 631	Voice Over IP [1]	
TCOM 652	5G Service, Technology and Network	
TCOM 660	Network Forensics [2]	
TCOM 661	Digital Media Forensics [2]	
TCOM 663	Operations of Intrusion Detection for Forensics [2]	
TCOM 664	Incident Response Forensics [2]	
TCOM 590	Selected Topics in Telecommunications	
TCOM 690	Advanced Topics in Telecommunications	
ECE 542	Computer Network Architectures and Protocols	
ECE 643	Network Switching and Routing	
ECE 646	Applied Cryptography	
Total Credits		9

1 Applicable to the Concentration in Network Technologies

2 Applicable to the Concentration in Network Forensics and Security

Concentration in Network Technologies (NTEC)

Code	Title	Credits
Required Core Courses		
TCOM 535	The TCP/IP Suite of Internet Protocols	3
TCOM 610	Border Gateway Protocol (BGP) Routing	3
Electives		
Select at least two courses from the following:		6
TCOM 611	Multi-Protocol Label Switching (MPLS)	
TCOM 614	Advanced Routing Lab	
TCOM 616	Scalable Network Architecture	
TCOM 617	Enterprise Network Architecture	
TCOM 631	Voice Over IP	
Total Credits		12

Concentration in Network Forensics and Security (NFSC)

Code	Title	Credits
Required Core Courses		
TCOM 535	The TCP/IP Suite of Internet Protocols	3
Electives		

Select at least three courses from the following:		9
TCOM 660	Network Forensics	
TCOM 661	Digital Media Forensics	
TCOM 663	Operations of Intrusion Detection for Forensics	
TCOM 664	Incident Response Forensics	
Total Credits		12

Accelerated Master's

Electrical Engineering, BS/ Telecommunications, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Electrical Engineering and an MS in Telecommunications in an accelerated time-frame after satisfactory completion of a minimum of 142 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form: 3.0 overall GPA, successfully meeting Mason's requirements for undergraduate degree conferral (graduation), and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced standing courses: Students may take up to 9 credits of graduate-level courses that will count as advanced standing (i.e., overlap between the BS/MS program) from the list below. At least one class (3 credits) needs to be an ECE course. These 9 credits of graduate-level courses may be selected to substitute in place of the 9 credits of technical electives required for the undergraduate degree:

Code	Title	Credits
TCOM 514	Basic Switching: Lecture and Laboratory Course	3
or TCOM 515	Internet Protocol Routing: Lecture and Laboratory Course	
TCOM 535	The TCP/IP Suite of Internet Protocols	3
ECE 542	Computer Network Architectures and Protocols	3
ECE 531	Introduction to Wireless Communications and Networks	3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

Reserve credit courses: Additional courses (up to 6 credits) may be selected from the list below as credits to be put on reserve to be later applied to the graduate program. Students can take these courses while undergraduates but these reserve courses will only count for the graduate degree program.

Code	Title	Credits
TCOM 500	Modern Telecommunications	3
TCOM 514	Basic Switching: Lecture and Laboratory Course	3
TCOM 515	Internet Protocol Routing: Lecture and Laboratory Course	3
TCOM 535	The TCP/IP Suite of Internet Protocols	3
TCOM 552	Introduction to Mobile Communications Systems	3
TCOM 570	Network Automation	3
TCOM 590	Selected Topics in Telecommunications	1.5-3

Selected 600 level courses may be taken as well with permission of an advisor granted before registering for a given course.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Individualized Study, BIS/ Telecommunications, Accelerated MS

Overview

Highly-qualified students in the Individualized Study, BIS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Individualized Study, BIS program may apply for this option if they have earned 75 undergraduate credits (including 15 Mason resident credits) with an overall GPA of at least 3.00. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

Accelerated Option Requirements

Students must complete all requirements for the BIS and MS programs, with 6 credits overlap.

Students select TCOM courses from the list below to meet the requirements of the accelerated program. Six credits of TCOM courses will be applied to meet the requirements of both the BIS and MS TCOM programs. An additional three credits of TCOM courses is required for the BIS Individualized Concentration (IND) with emphasis on telecommunication. Note that accelerated students can only take the courses in the list below if they passed the listed prerequisite course with a B or higher.

BIS Concentration

Total credits: 34-46

Students who are pursuing the Individualized Study, BIS, Individualized concentration (IND) with an emphasis on telecommunications must take:

Code	Title	Credits
Select an additional 500-level TCOM course(s) from the list below		3
BIS 300	Understanding Interdisciplinary Studies	3
BIS 390	The Research Process	3
BIS 490	RS: Senior Project (Mason Core)	4
ECE 301	Digital Electronics	3
IT 341	Data Communications and Network Principles	3
TCOM 500	Modern Telecommunications	3
Select additional courses related to telecommunication [1]		9-21
Total Credits		31-43

[1] Required to reach the necessary number of credits for the BIS Individualized concentration.

Telecommunications Courses

Code	Title	Credits
TCOM 500	Modern Telecommunications	3
TCOM 535	The TCP/IP Suite of Internet Protocols	3
TCOM 608	Optical Communications Systems	3
TCOM 631	Voice Over IP	3

Note:

Accelerated students who have passed IT 341 Data Communications and Network Principles with a grade of B or higher will not be required to take TCOM 535 in the Telecommunications, MS core. Other TCOM courses may be approved on a case-by-case basis.

See each course for individual prerequisite requirements.

Degree Conferral

Students must apply the semester before they expect to complete the BIS requirements to have the BIS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/ Telecommunications, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply for this option if they have earned 60 undergraduate credits take graduate level courses after completion of 75 credits with an overall GPA of at least 3.00. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 9 credits) overlapping from the following courses:

Code	Title	Credits
Select nine credits from the following:		9
TCOM 500	Modern Telecommunications (To satisfy the IT 300 BS, INFT requirement)	
TCOM 515	Internet Protocol Routing: Lecture and Laboratory Course (satisfies as one NTEL concentration course in the BS INFT program)	
TCOM 631	Voice Over IP (To satisfy the IT 484 BS, INFT requirement.)	
Total Credits		9

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Systems Engineering, BS/ Telecommunications, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Systems Engineering, BS and a Telecommunications, MS in an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students in the Systems Engineering, BS program who preferably have chosen to take the systems engineering of telecommunications elective sequence will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.0, and completed all MATH and PHYS requirements. Other students will be considered on their individual merit.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Telecommunications, MS program. Students already admitted in the BAM Pathway will be admitted to the Telecommunications, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.0
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

These courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the BS program. The undergraduate version of these courses, if any, may *not* be applied toward the Telecommunications, MS.

Code	Title	Credits
TCOM 500	Modern Telecommunications	3
TCOM 535	The TCP/IP Suite of Internet Protocols	3
OR 541	Operations Research: Deterministic Models	3
SYST 530	Systems Engineering Management I	3
SYST 573	Decision and Risk Analysis (if taken, replaces TCOM 521 in the telecommunications core requirements)	3

Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Department of Information Sciences and Technology

Phone: 703-993-3565
Website: ist.gmu.edu

Information Sciences and Technology offers undergraduate and graduate programs to develop expertise in applying information technology to support business applications. The programs emphasize problem-solving, communication, technical, and leadership skills.

Undergraduate

The BS in Information Technology program aims to meet the existing and emerging needs of industry by educating students in current principles and practices in the application of information technology (IT). The program focuses on equipping graduates with effective skills for interacting at the management level as well as the technical level. Graduates are hired in positions that focus on the application of IT in an increasing number of emerging sub-disciplines, including network administration and telecommunications, information security, web development and multimedia, database technology and programming, and health information technology.

Graduate

The MS in Applied Information Technology is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government, industry or non-profit. Its objective is to graduate individuals of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. The MS in AIT provides a high quality curricula for students seeking to pursue their careers in the leading IT areas including Cyber Security, Big Data Analytics, Knowledge Mining, Data Analytics in Social Media, and Cyber-Human Interaction.

At the doctoral level, the department offers a concentration in the Volgenau School's PhD in IT program.

Applied Cyber Security Graduate Certificate

Banner Code: VS-CERG-ACBS

5400 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-3565
Email: msait@gmu.edu
Website: http://ist.gmu.edu/programs/graduate-programs/

This graduate certificate offers courses in four key elements of cyber security. It is designed for professionals who work for, or in support of, U.S. federal agencies and provides post-bachelor's academic preparation for students who may not wish to complete a full master's degree program as well as for master's graduates who wish to take the topic-specific courses the certificate provides.

The graduate certificate may be pursued on a full or part-time basis.

Admissions & Policies

Admissions

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits.

Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission to the certificate program does not guarantee admission to any MS program.

Policies

For policies governing all graduate certificate programs, see AP.6 Graduate Policies.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a full-or part-time basis.

Coursework

Code	Title	Credits
Select twelve credits from any of the following:		12
AIT 660	Cyber Security Fundamentals	
AIT 670	Cloud Computing Security	
AIT 671	Information System Infrastructure Lifecycle Management	
AIT 672	Identity and Access Management	
AIT 673	Cyber Incident Handling and Response	
AIT 701	Cyber Security: Emerging Threats and Countermeasures

The MS in Applied Information Technology (https://catalog.gmu.edu/colleges-schools/engineering/information-sciences-technology/applied-information-technology-ms/) is the very best graduate education in IT for high-potential leaders, especially those working on IT solutions that affect the federal government, industry or non-profit. Its objective is to graduate individuals of competence and character who can lead multidisciplinary teams in the design, justification, development, management, and sustainment of mega-systems from data to decision in the private and federal sectors. The MS in AIT provides a high quality curricula for students seeking to pursue their careers in the leading IT areas including Cyber Security, Big Data Analytics, Knowledge Mining, Data Analytics in Social Media, and Cyber-Human Interaction.

The MS AIT program offers the Cyber Security concentration fully online. For the online program, courses are offered in a condensed 8-week format, with students taking one course at a time. Content of courses, objectives, evaluation methods, and outcomes are identical to those for the on-campus program. Only the delivery format is different. The online program is intended to be completed in about 2.5 years. Request additional information for the online program, learn more, or apply (https://masononline.gmu.edu/programs/ms-applied-information-technology/).

At the doctoral level, the department offers a concentration in the Volgenau School's PhD in IT (https://catalog.gmu.edu/colleges-schools/engineering/information-technology-phd/) program.

Admissions & Policies

Admissions

Applicants must have completed a baccalaureate degree from one of the Mason-recognized U.S. institutional accrediting agencies and earned a GPA of 3.00 or better in their 60 highest-level credits. They must be experienced in the fundamentals of IT and quantitative methods. In addition, applicants must:

- Provide two letters of recommendation, preferably from academic references or references in industry or government who are familiar with the applicant's professional accomplishments.
- Provide a resume and detailed statement of career goals and professional aspirations.
- Have achieved a satisfactory score on the TOEFL examination for non-native English speakers.

A high-achieving Mason Engineering alum who has shown exemplary work in an undergraduate degree may consider our Fast-Track graduate admission process which requires fewer supplementary admission materials.

Requirements

Degree Requirements

Total credits: 30

Completion of the MS program requires a minimum of 30 approved graduate credits (10 courses). To provide a common background in the fundamentals of information sciences and technology, all students are required to complete four core courses. In addition to the core courses, students must choose a concentration within the program by taking six courses from one of the concentration areas listed below.

Students interested in the PhD in IT program must pursue the Cyber Security, Data Analytics and Intelligence Methods, or Cyber-Human Systems concentrations. They are required to meet with an advisor before applying to the program. In addition, students must take AIT 602 and one of the following courses: AIT 699, AIT 799, or AIT 796, while they are completing their MS AIT degree.

Students in all concentrations may take other VSE graduate-level courses not listed below as part of their MS technical electives subject to prior advisor approval.

Core Courses

Code	Title	Credits
Required Core Courses		**12**
For students in all concentrations except the IT Management concentration:		
AIT 512	Algorithms and Data Structures Essentials	
AIT 524	Database Management Systems	
AIT 542	Fundamentals of Computing Platforms	
AIT 664	Information: Representation, Processing and Visualization	
For students in the IT Management concentration:		
AIT 524	Database Management Systems	
AIT 542	Fundamentals of Computing Platforms	
AIT 580	Analytics: Big Data to Information	
AIT 664	Information: Representation, Processing and Visualization	
Total Credits		12

Concentrations

Available Concentrations

- Cyber Security (CYBR)
- Cyber-Human Systems (CBHS)
- Data Analytics and Intelligence Methods (DAIN)
- IT Management (ITMG)

Accelerated Master's

Applied Science, BAS Cyber Security Concentration/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Applied Science, BAS, Cyber Security Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/#cybs) have the option of obtaining an accelerated Applied Information Technology, MS (https://catalog.gmu.edu/colleges-schools/engineering/information-sciences-technology/applied-information-technology-ms/).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7). For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Admission Requirements

Students in the Applied Science, BAS, Cyber Security Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/#cybs) program may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. They may begin taking graduate-level courses once they have earned 75 undergraduate credits. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BAS and MS programs, with up to 12 credits overlapping from the following courses:

Code	Title	Credits
AIT 512	Algorithms and Data Structures Essentials	3
or AIT 580	Analytics: Big Data to Information	
AIT 524	Database Management Systems	3
AIT 542	Fundamentals of Computing Platforms	3
AIT 660	Cyber Security Fundamentals [1]	3
AIT 664	Information: Representation, Processing and Visualization	3

[1] This course is only applicable to the CYBR and ITMG concentrations in the MSAIT. Students planning to pursue CBHS or DAIN should select a different course.

Note: When selecting between AIT 512 and AIT 580, students should select the course that aligns with the MSAIT concentration they intend to pursue.

Degree Conferral

Students must apply the semester before they expect to complete the BAS requirements to have the BAS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Applied Science, BAS Data Analytics Concentration/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Applied Science, BAS, Data Analytics Concentration (https://catalog.gmu.edu/colleges-schools/interdisciplinary-programs-courses/applied-science-bas/) have the option of obtaining an accelerated Applied Information Technology, MS (https://catalog.gmu.edu/colleges-schools/engineering/information-sciences-technology/applied-information-technology-ms/).

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Applied Science, BAS Data Analytics concentration may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. Students may begin taking the master's level courses once they have earned 75 undergraduate credits.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BAS and MS programs. Students may select up to 12 credits to overlap from the following options. Students should consult with both the BAS and MSAIT advisors.

Code	Title	Credits
AIT 512	Algorithms and Data Structures Essentials [1]	3
or AIT 580	Analytics: Big Data to Information	
AIT 524	Database Management Systems	3
AIT 542	Fundamentals of Computing Platforms	3
AIT 664	Information: Representation, Processing and Visualization	3

[1] When selecting between AIT 512 and AIT 580, students should select the course that aligns with the MSAIT concentration they intend to pursue.

Individualized Study, BIS/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Individualized Study, BIS have the option of obtaining an accelerated Applied Information Technology, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions. Mason undergraduate students in the BIS Program can apply in the semester in which they will have completed 90 or more credits (including 15 Mason resident credits) applicable toward the BIS. Students must have an overall GPA of at least 3.30 to apply to the program.

Reserve Graduate Credit

Students may take up to 6 additional graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree. The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. Permission to take a graduate course for reserve graduate credit is normally granted only to Mason seniors within 15 hours of graduation.

To apply these credits to the master's degree, students must request that the credits be moved from the undergraduate degree to the graduate degree using the Bachelor's/Accelerated Master's Transition Form (http://registrar.gmu.edu/forms/).

Accelerated Option Requirements

Students in the accelerated master's option must maintain a minimum 3.30 GPA in the undergraduate segment until they have satisfied all requirements for the BIS degree. On completion and conferral of the undergraduate degree they submit the Bachelor's/Accelerated Master's Transition Form (http://registrar.gmu.edu/forms/) and are admitted to graduate status.

As graduate students, accelerated master's students have an advanced standing. Students must complete all credits that satisfy requirements of the BIS program and those of the MSAIT program, with two courses overlapping from the courses necessary to earn the BIS with a concentration IND (individualized), applied information technology emphasis as listed below.

Code	Title	Credits
AIT 524	Database Management Systems	3
AIT 542	Fundamentals of Computing Platforms	3
Total Credits		6

Information Technology, BS/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Applied Information Technology, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 60 undergraduate credits and take graduate level courses after completion with an overall GPA of 75 credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 12 credits) overlapping from the following courses:

Code	Title	Credits
AIT 512	Algorithms and Data Structures Essentials (satisfies the IT 306 requirement in the BS INFT program)	3
AIT 524	Database Management Systems (satisfies the IT 314 requirement in the BS INFT program)	3
AIT 542	Fundamentals of Computing Platforms (satisfies the IT 342 requirement in the BS INFT program)	3
AIT 580	Analytics: Big Data to Information (satisfies the IT 322 requirement in the BS INFT program)	3
AIT 664	Information: Representation, Processing and Visualization (satisfies the IT 415 requirement in the BS INFT program)	3
AIT 682	Network and Systems Security (satisfies the IT 366 requirement in the BS INFT program)	3

Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only. See AP.1.4.4 Graduate Course Enrollment by Undergraduates.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, BS/Applied Information Technology, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Mechanical Engineering, BS and an Applied Information Technology, MS in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate

study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Mechanical Engineering, BS Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

The criteria for admission are identical to criteria for admission to the Applied Information Technology, MS program.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing Courses

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

Code	Title	Credits
AIT 524	Database Management Systems	3
AIT 542	Fundamentals of Computing Platforms	3
AIT 664	Information: Representation, Processing and Visualization	3
AIT 512	Algorithms and Data Structures Essentials [1]	3
AIT 580	Analytics: Big Data to Information [2]	3

1 This course should be selected for all concentrations except for the IT Management concentration

2 This course should be selected for the IT Management concentration

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Students are strongly encouraged to meet with a graduate advisor to select reserve graduate credits. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

The Information Sciences Graduate Certificate with a concentration in Intelligence Technologies offers courses in four key elements of intelligence analysis. Designed for professionals who work for, or in support of, intelligence community agencies, it provides additional academic preparation for post-bachelor's students who may not wish to complete a full master's program, as well as for master's graduates who wish to take the area-specific courses a concentration provides.

Admissions & Policies

Admissions

Applicants must hold a baccalaureate degree from an accredited institution and have earned a GPA of 3.00 or higher in the last 60 credits.

Students not enrolled in a graduate degree program at Mason should apply for the certificate program through the Office of Graduate Admission. Students already enrolled in a Mason graduate degree program should apply to the department for admission into the certificate program. Admission to the certificate program does not guarantee admission to any MS program.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Total credits: 12

This certificate may be pursued on a full-or part-time basis.

Requirements

The minor is designed primarily for students who desire to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this minor provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The minor requires a minimum of 18 credits, including 12 credits of core courses. Beyond these requirements, students must select two additional technical focus courses (6 credits) of which one course must be at the upper 300- or 400-level. Minimum 2.5 GPA is needed in completed 100- and 200-level IT core and foundation courses, and a minimum C in IT 106 or IT 109 is required in order to declare the IT minor. Minimum "C" grade in all IT courses is required to earn the IT minor. Students pursuing the IT minor should consult with an advisor to select their additional courses.

Admissions & Policies

Admissions

Declaration of Minor

In order to declare the IT Minor, students must earn a minimum 2.5 GPA in completed 100- and 200-level IT core courses required for the minor (from IT 102 or MATH 125, IT 104, IT 105, IT 106 or IT 109, and any technical focus courses being applied to the IT minor), and a minimum C in IT 106 Introduction to IT Problem Solving Using Computer

Programming or IT 109 Introduction to Computer Programming. Grades in approved course substitutions taken at Mason will be included.

Note: IT courses at the 300 and 400 level are restricted to students who have declared an Information Technology major, minor, or undergraduate certificate, and to students in the BAS or BIS program. IT 293 Applied IT: Junior Transition and IT 343 IT Project Management are restricted to students who have declared an Information Technology major. Students who have declared an Information Technology Minor will not be permitted to take IT 293 or IT 343.

Policies

Grades

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the Information Technology Minor, students must have a GPA of 2.00 or better across all courses applied to the Information Technology minor. Additionally, if a technical focus course requires a minimum B in a specified course, students will be held to meeting this prerequisite. Eight credits of coursework must be unique to the minor.

For policies governing all minors, see the Undergraduate Policies section of this catalog.

Website: ist.gmu.edu/programs/undergraduate-programs/

This certificate is designed primarily for those students who have earned a bachelor's degree or current undergraduate students who desire deeper knowledge than what can be accomplished through the IT minor. It allows students to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this undergraduate certificate provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. The certificate requires a minimum of 24 credits, including 15 credits of core courses. Beyond these requirements, students must select three additional IT courses (9 credits, at least 3 upper division credits). Students pursuing the IT undergraduate certificate should consult with an advisor to select their additional courses.

Students pursuing only the undergraduate certificate in information technology will not maintain full-time status which requires a minimum of 12 credits per semester.

Requirements

Certificate Requirements

Total credits: 24-28

This certificate may be pursued on a part-time basis only.

Requirements

Students must complete all requirements for this certificate.

The Information Technology certificate is designed primarily for those students who have earned a bachelor's degree or current undergraduate students who desire deeper knowledge than what can be accomplished through the IT minor. It allows students to augment the knowledge gained through their major-related courses with a foundation of information technology (IT) topics and their application within organizations to achieve organizational objectives. Completing this undergraduate certificate provides students with the necessary skills to improve their attractiveness to employers in our technology-driven society. This certificate requires a minimum of 24 credits, including 15 credits of required courses. Beyond these requirements, students must select three additional IT courses (9 credits, at least 3 upper division credits). Students pursuing the IT undergraduate certificate should consult with an advisor to select their additional courses.

Email: bsit@gmu.edu
Website: http://ist.gmu.edu/programs/undergraduate-programs/

The Information Technology, BS prepares students to apply IT to support business processes. The degree produces graduates with strong problem-solving, writing, and communication skills who successfully compete for technical employment and are prepared for advanced study. The objectives of the B.S. program in Information Technology relate to the expected abilities of the graduates three to five years after graduation.

The objectives include:

1. Be employed in a position in which they have successfully used their information technology skills as evidenced by achieving improved organizational objectives
2. Progress through increasing levels of responsibility in the workplace
3. Demonstrate ethical, social and professional responsibility consistent with organizational values
4. Work effectively in teams, whether as a participant or as a leader
5. Grow through self-study, continuing education and professional development relevant to their profession

The program can be successfully completed in eight full-time semesters with an average of 15 credits each semester. It is also possible for students to complete the degree on a part-time basis. The 120-credit degree requirement consists of Mason Core requirements, IT foundation and core courses, and courses required for the chosen IT concentration. At least 30 credits toward the BS degree must be earned at Mason, and at least 45 credits must be at or above the 300 level. Upper division courses in the program are taught at the Science and Technology campus, where many Department of Information Sciences and Technology faculty offices are located.

The bachelor's program in Information Technology is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

Admissions & Policies

Admissions

Students who meet Mason's general eligibility requirements may apply for admission to the IT major. Admission is based on the appropriateness of the student's academic objectives and the likelihood of the student benefiting from the program. Preference in admission is given to students who have four years of high school mathematics, including precalculus.

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Change of Major

Mason students considering a change of major to Information Technology must have a minimum GPA of 3.00 in completed courses from the following list:IT 102 Discrete Structures or MATH 125 Discrete Mathematics I (Mason Core), IT 104 Introduction to Computing or IT 191 Review of Computing Fundamentals, IT 105 IT Architecture Fundamentals, IT 106 Introduction to IT Problem Solving Using Computer Programming or IT 196 Review of IT Problem Solving Using Computer Programming or IT 109 Introduction to Computer Programming or CS 112 Introduction to Computer Programming, IT 206 Object Oriented Techniques for IT Problem Solving or IT 209 Introduction to Object Oriented Programming or CS 211 Object-Oriented Programming, IT 216 Systems Analysis and Design, IT 207 Applied IT Programming, IT 213 Multimedia and Web Design or IT 193 Review of Multimedia and Web Design, IT 214 Database Fundamentals or IT 194 Review of Database Fundamentals, and IT 223 Information Security Fundamentals, and a grade of C or better in IT 106 Introduction to IT Problem Solving Using Computer Programming or IT 109 Introduction to Computer Programming or IT 196 Review of IT Problem Solving Using Computer Programming or both CS 112 Introduction to Computer Programming and CS 211 Object-Oriented Programming.

Note: IT courses at the 300 and 400 level are restricted to students who have declared an Information Technology major, minor, or undergraduate certificate, and to students in the BAS or BIS program. IT 293 Applied

IT: Junior Transition and IT 343 IT Project Management are restricted to students who have declared the Information Technology, BS major.

Advanced Study

Mason offers students the ability to complete both BS and MS degrees in a shorter time through an Accelerated Masters (MS) program. Choosing to pursue an accelerated MS may affect a student's choice of courses in the BS program. Students should consult with an advisor for assistance.

Grades

Students must have a C or better in any course that satisfies a prerequisite for an IT course. To graduate with the BS in Information Technology, students must have a GPA of 2.75 or better across the IT foundation, core, capstone, and concentration courses. Additionally, students must have a C or better in their foundation, core, capstone, and concentration courses. Furthermore, students must have a B or better in gateway courses for the respective concentration.

Course Repeat Policy

In addition to the University's Undergraduate Course Repeat Policy, the following courses listed have additional repeat restrictions:

- A student who has taken IT 106 twice may not take IT 109 for their third attempt, nor will they be permitted to start over with three attempts of IT 109 in lieu of taking IT 106.
- A student who has taken IT 109 twice may not take IT 106 for their third attempt, nor will they be permitted to start over with three attempts of IT 106 in lieu of taking IT 109.
- A student who has taken IT 206 twice may not take IT 209 for their third attempt, nor will they be permitted to start over with three attempts of IT 209 in lieu of taking IT 206.
- A student who has taken IT 209 twice may not take IT 206 for their third attempt, nor will they be permitted to start over with three attempts of IT 206 in lieu of taking IT 209.
- A student who has taken IT 102 Discrete Structures twice may not take MATH 125 Discrete Mathematics I (Mason Core) for their third attempt, nor will they be permitted to start over with three attempts of MATH 125 in lieu of taking IT 102.
- A student who has taken MATH 125 twice may not take IT 102 for their third attempt, nor will they be permitted to start over with three attempts of IT 102 in lieu of taking MATH 125.
- A student who has taken MATH 108 twice may not take MATH 113 for their third attempt, nor will they be permitted to start over with three attempts of MATH 113 in lieu of taking MATH 108.
- A student who has taken MATH 113 twice may not take MATH 108 for their third attempt, nor will they be permitted to start over with three attempts of MATH 108 in lieu of taking MATH 113.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements

Total credits: 120

Foundation Courses

Code	Title	Credits
IT 102	Discrete Structures	3
or MATH 125	Discrete Mathematics I (Mason Core)	
IT 104	Introduction to Computing	3
IT 105	IT Architecture Fundamentals	3
IT 106	Introduction to IT Problem Solving Using Computer Programming	3
or IT 109	Introduction to Computer Programming	
IT 206	Object Oriented Techniques for IT Problem Solving	3
or IT 209	Introduction to Object Oriented Programming	
IT 216	Systems Analysis and Design	3

IT 300	Modern Telecommunications	3
IT 304	IT in the Global Economy	3

IT 341	Data Communications and Network Principles	3
IT 342	Operating Systems Fundamentals	3
IT 343	IT Project Management	3
MBUS 300	Accounting in a Global Economy	3
SYST 469	Human Computer Interaction	3
Total Credits		33

Two-Semester Sequence of Approved Capstone Design Courses

Code	Title	Credits
IT 492	Senior Design Project I (Mason Core)	3
IT 493	Senior Design Project II (Mason Core)	4
Total Credits		7

Information Technology Concentrations

Students choose one of six concentrations from the list below. To be eligible to choose a concentration, a student must have a B or better grade in the concentration's gateway course.

Concentration Gateway Courses

Code	Title	Credits
Database Technology and Programming (DTP)		
IT 206	Object Oriented Techniques for IT Problem Solving	3
or IT 209	Introduction to Object Oriented Programming	
IT 214	Database Fundamentals	3
or IT 194	Review of Database Fundamentals	
Health Information Technology (HIT)		
IT 214	Database Fundamentals	3
or IT 194	Review of Database Fundamentals	
Cyber Security (CYBR)		
IT 223	Information Security Fundamentals	3
Networking and Telecommunications (NTEL)		
IT 341	Data Communications and Network Principles	3
Web Application Development (WADV)		
IT 213	Multimedia and Web Design	3
or IT 193	Review of Multimedia and Web Design	
Cloud Computing (CCG)		
IT 341	Data Communications and Network Principles	3

To fulfill the requirements for a concentration, students need 15 credits made up of four courses from their chosen concentration and a fifth course chosen from any of the six concentrations. Students may choose to have two concentrations. To be eligible, the student must have a B or better in the gateway course for each concentration. If two concentrations are declared, the student must take four courses in each concentration, for a total of eight different concentration courses.

Concentrations

- Database Technology and Programming (DTP)
- Health Information Technology (HIT)
- Cyber Security (CYBR)
- Network and Telecommunications (NTEL)
- Web Application Development (WADV)
- Cloud Computing (CCG)

4-Year Plan

Bachelors of Science in Information Technology Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

Information Technology, BS/Information Security and Assurance, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Security and Assurance, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 60 undergraduate credits and take graduate level courses after completion of 75 credits with an overall GPA of at

least 3.30. Criteria for admission are identical to criteria for admission to the Information Security and Assurance, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 6 credits) overlapping from the following courses:

Code	Title	Credits
ISA 562	Information Security Theory and Practice (satisfies IT 462 requirement in the BS INFT program)	3
ECE 646	Applied Cryptography (satisfies IT 466 requirement in the BS INFT program)	3

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/Information Systems, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Information Systems, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 60 undergraduate credits and take graduate level courses after completion of 75 credits with an overall GPA of at least 3.30. Criteria for admission are identical to the criteria for admission to the Information Systems, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 6 credits) overlapping from the following courses:

Code	Title	Credits
CS 550	Database Systems (satisfies IT 414 requirement in the BS INFT program)	3
SWE 619	Object-Oriented Software Specification and Construction (satisfies as one DTP concentration course in the BS INFT program)	3

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/Software Engineering, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Software Engineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 60 undergraduate credits and take graduate level courses after completion of 75 credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Software Engineering, MS Program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 6 credits) overlapping from the following courses:

Code	Title	Credits
CS 550	Database Systems (satisfies IT 414 requirement in the BS INFT program)	3
SWE 619	Object-Oriented Software Specification and Construction (satisfies as one DTP concentration course in the BS INFT program)	3

Note:

Students must complete MATH 125 Discrete Mathematics I (Mason Core) as their discrete math requirement and IT 306 Data Structures and Algorithms in Java as part of their concentration requirements in the BS program

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the

beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/Digital Forensics, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Digital Forensics, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply for this option if they have earned 60 undergraduate credits and take graduate level courses after completion of 75 credits with an overall GPA of at least 3.25. Criteria for admission are identical to criteria for admission to the Digital Forensics, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 9 credits) overlapping from the following courses:

Code	Title	Credits
DFOR 510	Digital Forensics Analysis	3
DFOR 660	Network Forensics	3
DFOR 663	Operations of Intrusion Detection for Forensics	3

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/ Telecommunications, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Telecommunications, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply for this option if they have earned 60 undergraduate credits take graduate level courses after completion of 75 credits with an overall GPA of at least 3.00. Criteria for admission are identical to criteria for admission to the Telecommunications, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 9 credits) overlapping from the following courses:

Code	Title	Credits
Select nine credits from the following:		9
TCOM 500	Modern Telecommunications (To satisfy the IT 300 BS, INFT requirement)	
TCOM 515	Internet Protocol Routing: Lecture and Laboratory Course (satisfies as one NTEL concentration course in the BS INFT program)	
TCOM 631	Voice Over IP (To satisfy the IT 484 BS, INFT requirement.)	
Total Credits		9

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Information Technology, BS/Applied Information Technology, Accelerated MS

Overview

Highly-qualified students in the Information Technology, BS have the option of obtaining an accelerated Applied Information Technology, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Information Technology, BS program may apply to this option if they have earned 60 undergraduate credits and take graduate level courses after completion with an overall GPA of 75 credits with an overall GPA of at least 3.30. Criteria for admission are identical to criteria for admission to the Applied Information Technology, MS program.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with a minimum of 3 credits (maximum 12 credits) overlapping from the following courses:

Code	Title	Credits
AIT 512	Algorithms and Data Structures Essentials (satisfies the IT 306 requirement in the BS INFT program)	3
AIT 524	Database Management Systems (satisfies the IT 314 requirement in the BS INFT program)	3

AIT 542	Fundamentals of Computing Platforms (satisfies the IT 342 requirement in the BS INFT program)	3
AIT 580	Analytics: Big Data to Information (satisfies the IT 322 requirement in the BS INFT program)	3
AIT 664	Information: Representation, Processing and Visualization (satisfies the IT 415 requirement in the BS INFT program)	3
AIT 682	Network and Systems Security (satisfies the IT 366 requirement in the BS INFT program)	3

Students also have the option to take up to 6 additional credits of graduate coursework *on reserve*, which can be used for the MS degree only. See AP.1.4.4 Graduate Course Enrollment by Undergraduates.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Department of Mechanical Engineering

Phone: 703-993-5383
Email: mechengr@gmu.edu
Website: mechanical.gmu.edu/

Mechanical engineering is the broadest of the engineering disciplines, and traces its origins to antiquity. The discipline of mechanical engineering involves anything that moves or uses energy. There are two major stems in mechanical engineering: mechanical systems and thermal fluid systems. Mechanical engineers design, build, and analyze complex devices, systems, and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another.

Today, the scope of the mechanical engineering discipline is ever-expanding. Mechanical engineers work in industries that include, but are not limited to, the aerospace, bio-pharmaceutical, civil, computer and cyber, biomedical, industrial, materials and manufacturing industries. They provide innovative solutions for contemporary problems and address problems yet identified. For example, 3-D printed components are readily being used in manufactured components, as part of medical implants and devices and even in structural applications. The mechanical performance of the components will likely vary dramatically from the ideal laboratory environment in which they were produced. Mechanical engineers are needed to characterize these aggressive environments in which they may be used, design test matrices to study their performance, and determine environmentally-based mechanical properties needed for design.

The Mechanical Engineering, BS is designed to support the goal of educating leaders for the future – men and women capable of meeting the needs of society. The curriculum is designed to provide its graduates with the technical skills and competencies to analyze and design both mechanical and thermal systems, and to give them an in-depth experience in one of these two areas. With a solid foundation in these discipline-specific areas, graduates of the program will be well-prepared to enter any of the industries identified above. All students will take core courses in both content areas through their junior year. During their senior year, they will have the opportunity to focus their program of study with a design elective and three technical electives. These electives can be arranged to focus on areas such as advanced manufacturing, aerospace, bioengineering, robotics, or sustainable energy.

Academic Advising

3300 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-5383
Email: mechengr@gmu.edu
Website: mechanical.gmu.edu

Mechanical Engineering is the broadest of the engineering disciplines, concerned with anything that moves or uses energy. There are two major stems in mechanical engineering: mechanical systems and thermal fluid systems. Mechanical engineers design, build, and analyze complex devices, systems and processes that involve the conversion of energy from one form to another, the production of work, and the transport of energy and mass from one location to another. This minor provides

a foundation in mechanical engineering and is most appropriate for students with a strong mathematics and science background, such as a major in another engineering or science field. The minor is administered by the Volgenau School Dean's office.

Admissions & Policies

Admissions

To be admitted to the minor, students must have completed MATH 114 Analytic Geometry and Calculus II and PHYS 160 University Physics I (Mason Core)/PHYS 161 University Physics I Laboratory (Mason Core) with a grade of C or better.

Policies

The minor in mechanical engineering consists of a minimum of 20-21 credit hours of coursework. All students must complete 14 credit hours of core courses. They must also complete two additional elective courses. All courses must be completed with a grade of C or better.

Eight credits of coursework must be unique to the minor. For policies governing all minors, see AP.5.3.4 Minors.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Today, the role of mechanical engineer is ever expanding in order to find innovative solutions for contemporary problems, and to address problems yet to be identified. To meet the growing demands of worldwide energy needs spurred by population growth and dwindling supplies of fossil fuels, for instance, mechanical engineers seek innovations in nuclear energy, bio-fuels, wind, and tidal energies to build an energy portfolio that exploits these seemingly limitless resources. From product design, which spans from biomedical devices to turbo-machinery, to manufacturing, which develops machines and systems needed to process raw materials into these products, an awareness of the benefits of advanced materials for sensing and monitoring the health of these systems and an awareness of the stealth threats to manufacturing brought on by an ever present cyber threat are in the minds of the mechanical engineers. Now more mechanical engineers oversee the operations and management of large systems along with the fiscal and human resources needed to run them.

James Michener once said, "Scientists dream about doing great things. Engineers do them." Mechanical engineers use science to advance technologies and to develop products for the benefit of society, in a discipline which dates back to the earliest of times in civilization. The major in mechanical engineering has three program education objectives, namely:

- Graduates have demonstrated success as a mechanical engineer or their chosen career field;
- Graduates have advanced their educational pursuits through graduate education, professional registration, or similar means;
- Graduates have advanced their careers by engaging in professional society participation and community service outreach.

The bachelor's program in Mechanical Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Change of Major

See Change of Major for more information.

Grade Requirements and Advising

Degree requirements include 121 credits distributed in three main areas: mechanical engineering, mathematics and basic science, and humanities and social sciences. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 121 credits for the degree with a grade of C or better.

Students are required to see their faculty advisor at least once each year to plan their curriculum.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

4-Year Plan

Bachelors of Science in Mechanical Engineering Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

Mechanical Engineering, BS/Applied and Engineering Physics, Accelerated MS

Overview

This program allows academically strong undergraduates with a demonstrable commitment to research to obtain the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) and Applied and Engineering Physics, MS degrees by successfully completing 139 credits. Upon completion, students are well-prepared for entering into the professional

workforce, or a PhD program in physics or a related engineering discipline.

Admitted students take selected graduate courses during their senior year and are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program and complete an additional 18 credits to receive the master's degree.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Successful applicants majoring in Mechanical Engineering will have completed at least 60 credits toward their undergraduate degree with an overall GPA of at least 3.00, and the following courses with a GPA of 3.00 or better:

Code	Title	Credits
CS 112	Introduction to Computer Programming	4
ME 212	Solid Mechanics	3
ME 231	Dynamics	3
ME 313	Material Science	3
ME 322	Fluid Mechanics	3
ME 323	Heat Transfer	3
ME 351	Analytical Methods in Engineering	3

One or more recommendation letters from one or more research supervisors are also required. Interested applicants majoring in Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) should submit a letter to the undergraduate Mechanical Engineering coordinator and the Physics Graduate Coordinator, respectively, requesting admission along with the aforementioned recommendation letter(s). Contact the Mechanical Engineering undergraduate and the Physics graduate coordinator for further details.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites

Accelerated Option Requirements

At the beginning of the student's final undergraduate semester, students must submit a bachelor's/accelerated master's transition form (http://registrar.gmu.edu/forms/) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/). Students must begin their master's program in the semester immediately following conferral of the bachelor's degree.

Students must maintain an overall GPA of 3.00 or higher in graduate coursework.

Reserve Graduate Credit

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and career-readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
PHYS 510	Computational Physics I	3
PHYS 620	Continuum Mechanics	3
PHYS 690	Engineering Thermodynamics	3

Mechanical Engineering, BS/Applied Information Technology, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Mechanical Engineering, BS and an Applied Information Technology, MS in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Mechanical Engineering, BS Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits, and additional unit-specific criteria.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

The criteria for admission are identical to criteria for admission to the Applied Information Technology, MS program.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing Courses

Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

Code	Title	Credits
AIT 524	Database Management Systems	3
AIT 542	Fundamentals of Computing Platforms	3
AIT 664	Information: Representation, Processing and Visualization	3
AIT 512	Algorithms and Data Structures Essentials [1]	3
AIT 580	Analytics: Big Data to Information [2]	3

1 This course should be selected for all concentrations except for the IT Management concentration

2 This course should be selected for the IT Management concentration

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Students are strongly encouraged to meet with a graduate advisor to select reserve graduate credits. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, BS / Bioengineering, Accelerated MS

Overview

Highly-qualified students in the Mechanical Engineering, BS have the option of obtaining an accelerated Bioengineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Mason undergraduate students majoring in Mechanical Engineering, BS may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.20, completed all MATH and PHYS requirements, and passed BENG 320 Bioengineering Signals and Systems and BIOL 213 Cell Structure and Function (Mason Core) with the grade of C or better. It is also recommended that students take BENG 214 Physiology for Engineers and are proficient in MATLAB. Criteria for admission are identical to criteria for admission to the Bioengineering, MS program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Options Requirement

Students must complete all credits that satisfy requirements for both the BS and MS programs. Students take up to 9 credits of approved MS level BENG courses as part of their undergraduate degree that will also be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisor of both the BS and MS programs and by the Bioengineering department chair.

Specifically, students are encouraged to take up to three of the following courses to apply towards both their undergraduate and graduate degree.

Code	Title	Credits
BENG 520	Biomedical Data Analytics	3
BENG 521 or BENG 541	Cell and Tissue Engineering Biomaterials	3
BENG 526	Neural Engineering	3
BENG 537 or BENG 538	Medical Image Processing Medical Imaging	3
BENG 501	Bioengineering Research Methods	3
BENG 514	Pathophysiology and the Role of New Technologies in Human Diseases	3
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	3

Degree Conferral

Students are recommended to meet with their undergraduate academic advisor one year before and must apply to the program one semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a MS degree is conferred.

Mechanical Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) and an MS in Civil and Infrastructure Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-ms/). in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) program may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS (https://catalog.gmu.edu/

colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-ms/) program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs. Students register for up to 12 credits of overlapping graduate level courses in place of undergraduate technical elective courses.

Students are encouraged to take up to four of the following courses, based on their chosen concentration area in the master's program:

Concentration in Construction Engineering and Management (CEM)

CEIE 571 Construction Administration

CEIE 572 Building Information Modeling

CEIE 573 Legal Aspects of the Construction Process

CEIE 575 Design for Constructability

CEIE 576 Construction Cost Estimating

Concentration in Environmental and Water Resources Engineering (EWRE)

CEIE 540 Water Supply and Distribution CEIE 540 Water Supply and Distribution CEIE 540 Water Supply and Distribution

CEIE 542 Open Channel Flow CEIE 542 Open Channel Flow CEIE 542 Open Channel Flow

CEIE 550 Environmental Engineering Systems

CEIE 553 Water and Wastewater Treatment Processes

CEIE 557 Remote Monitoring Techniques for Civil Engineering Applications

Concentration in Geotechnical Engineering (GEOE)

CEIE 501 Sustainable Development

CEIE 524 Introduction to Bridge Engineering

CEIE 531 Earth Retaining Structures and Slope Stability

CEIE 532 Foundation Design

CEIE 535 Engineering Geology

Concentration in Structural Engineering (STRE)

CEIE 512 Structural Steel Design

CEIE 513 Reinforced Concrete Design

CEIE 525 Structural Evaluation and Rehabilitation

CEIE 532 Foundation Design

CEIE 575 Design for Constructability

Concentration in Transportation Engineering (TRNE)

CEIE 560 Public Transportation Systems

CEIE 561 Traffic Engineering

CEIE 562 Urban Transportation Planning

STAT 544 Applied Probability

Students also have the option of taking the following one or two additional graduate-level courses for reserve that will only count for the graduate degree program:

CEIE 601 Infrastructure Modeling

CEIE 605 Risk and Uncertainty in Civil Engineering

Degree Requirements

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Advising & Plan of Study

Each student is assigned a faculty advisor upon acceptance. Students must meet with their advisors during their first semester and design an approved plan of study. Students are encouraged to seek out their advisor when questions arise and when their plan of study needs to be revised.

Students must have a working background in their selected concentration area. A student lacking these foundations may be required to take one or more foundation courses.

Mechanical Engineering, BS/ Computational Science, Accelerated MS

Overview

This option enables enthusiastic, highly qualified, undergraduates to obtain the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) and the Computational Science, MS within the accelerated time frame of five years. The program requires 139 credits total, allowing students to undertake graduate coursework during their final year in the bachelor's degree. Upon completion of this 139 credit BS/MS combined program, students are exceptionally well prepared for undertaking doctoral studies or entering the professional workforce.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Application Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog[1]. Application information for this Accelerated Master's program can be found on the Department of Computational and Data Sciences (http://cos.gmu.edu/cds/academic-programs/) website. Applicants must have an overall undergraduate GPA of at least 3.00 and have completed

at least 60 credits. Additionally, applicants will have completed the following courses with a GPA of 3.00 or better:

Code	Title	Credits
CS 112	Introduction to Computer Programming	4
ME 212	Solid Mechanics	3
ME 231	Dynamics	3
ME 313	Material Science	3
ME 322	Fluid Mechanics	3
ME 323	Heat Transfer	3
ME 351	Analytical Methods in Engineering	3
Total Credits		22

Students must maintain an overall GPA of 3.00 or higher in graduate coursework and should consult with their faculty advisor to coordinate their academic goals within the modeling and simulation or data science emphases of the Computational Science, MS.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites

[1] GRE-general scores are waived for graduates of BS degrees from any program in the College of Science or the Volgenau School of Engineering at George Mason University.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs, with up to twelve credits overlap chosen from the following courses:

Code	Title	Credits
CSI 500	Computational Science Tools	3
CSI 501	Introduction to Scientific Programming	3
CSI 600	Quantitative Foundations for Computational Sciences	3
Select one course from the following options:		3
Any CDS, CSI, or CSS-prefixed courses numbered 500-689, or		
STAT 544	Applied Probability	
STAT 554	Applied Statistics I	
Total Credits		12

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees.

Mechanical Engineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified students in the Mechanical Engineering, BS program have the option of applying to the accelerated Data Analytics Engineering, MS program.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Mechanical Engineering, BS program may apply to the accelerated Data Analytics Engineering, MS program if they have earned 60 undergraduate credits with an overall GPA of at least 3.30.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following courses:

Code	Title	Credits
AIT 580	Analytics: Big Data to Information	3
CS 504	Principles of Data Management and Mining	3
OR 531	Analytics and Decision Analysis	3
STAT 515	Applied Statistics and Visualization for Analytics	3

All graduate course prerequisites must be completed prior to enrollment. Each 500-level course must be completed with a grade of B or better to apply toward the MS program. The graduate courses selected for overlap must be approved by the academic advisors of both the BS and MS programs. The graduate courses may be counted as Electives toward the Mechanical Engineering, BS program requirements, with approval of the Mechanical Engineering Department.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form (https://registrar.gmu.edu/forms/) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment office. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, BS/Electrical Engineering, Accelerated MS

Overview

The university offers highly-qualified students in the Mechanical Engineering, BS the option of obtaining an accelerated Electrical Engineering, MS.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Mechanical Engineering, BS program may apply for this option if they have earned 60 undergraduate credits, with an overall GPA of at least 3.0, and passed MATH 203 Linear Algebra and STAT 346 Probability for Engineers, or their equivalents, with the grade C or better.

Criteria for admission are identical to criteria for admission to the Electrical Engineering, MS program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students must complete all credits that satisfy the requirements for the BS and MS programs, with up to 9 credits overlapping.

Students take up to 9 credits of 500-level ECE or SYST courses as part of their technical electives or substitutes for required courses in the Mechanical Engineering, BS program.

Specifically, students are encouraged to take up to three of the following courses:

Code	Title	Credits
ECE 521	Linear Systems and Control	3
ECE 526	Neural Engineering	3
ECE 527	Learning From Data	3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 580	Small Spacecraft Engineering	3
SYST 521	Network Analysis	3

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Mechanical Engineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Mechanical Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Mechanical Engineering course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Mechanical Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.

- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Mechanical Engineering courses:

Code	Title	Credits
ME 521	Energy Transfer	
ME 531	Energy Transmission	
ME 541	Power Generation	
ME 542	Energy Utilization	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Mechanical Engineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Mechanical Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Mechanical Engineering course list and Systems Engineering and Operations Research course list given below.

- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Mechanical Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Mechanical Engineering courses:

Code	Title	Credits
ME 521	Energy Transfer	
ME 531	Energy Transmission	
ME 541	Power Generation	
ME 542	Energy Utilization	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 510	Systems Definition and Cost Modeling (Core)	
SYST 514	Systems Thinking	
SYST 520	System Engineering Design (Core)	
SYST 530	Systems Engineering Management I (Core)	
SYST 542	Decision Support Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 560	Introduction to Air Traffic Control	
SYST 563	Evidence-Based Systems Engineering	
SYST 568	Applied Predictive Analytics	
SYST 584	Heterogeneous Data Fusion	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Naval Ship Design Graduate Certificate

Banner Code: VS-CERG-NSDN

The graduate certificate in naval ship design provides students with the fundamentals and hands-on experience to be effective ship designers and design managers. Through coursework and experiential learning, students will develop specific knowledge in the art of naval ship design and acquire the skills to support the management of new and in-service design programs.

Upon completion of the certificate program, graduates will be able to:

- Design a vessel to execute a specified mission profile.
- Critically assess the impact of vessel design decisions on the concept of operations.
- Support programmatic needs by translating fleet requirements to design specifications while managing cost.

Admissions & Policies

Admissions

The following admission requirements apply to all graduate program applicants across the university. All applicants must:

- Submit a completed online application for graduate study.
- Submit a nonrefundable application fee.
- Submit one unofficial transcript from all institutions previously attended.
- Have earned a baccalaureate degree from a regionally accredited institution of higher education, or international equivalent.
- Have earned a minimum 3.00 GPA on a 4.00 scale in baccalaureate study.

In addition, students who have not earned a baccalaureate degree in the U.S. must submit:

- Official English translations of all diplomas, certificates, and transcripts that are not already in English. Also, documents from foreign institutions must meet the university's guidelines for international transcript submission.

- Proof of English proficiency: either TOEFL, IELTS academic exam, or Pearson Test of English meeting the minimum requirements:
  - TOEFL: 88 points total and a minimum of 20 points in each section (IBT) or 570 (PBT)
  - IELTS: 6.5 total band score
  - Pearson: 59 overall score

The Department of Mechanical Engineering will also require applicants to have earned an ABET-accredited engineering degree. Applicants seeking to enroll without an ABET-accredited engineering degree must seek approval, in writing, from the program director.

Requirements

Certificate Requirements

Total credits: 15

This certificate may be pursued on a full-or part-time basis.

Core Courses

Code	Title	Credits
ME 551	Naval Engineering	3

Department of Statistics

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

Statistics is the science of data. Statistical reasoning, methods, design and data analysis are crucial for all disciplines in which data are present. As collection of data grows in all sectors of employment, the Department of Statistics prepares students to meet the challenges of data science, including design of experiments, data collection, curation, analysis, and interpretation.

Department Offerings

Courses

The department offers a variety of introductory, intermediate and advanced courses, including specialized statistical methodology and applications. The focus of the department's offerings is applied, computational, and theoretical, with special emphasis on statistical, biostatistical, graphical and computational statistics, as well as federal statistics, data analytics, and statistics interfaced with modern sciences.

Undergraduate Programs

The Department of Statistics offers an undergraduate Statistics, BS (http://catalog.gmu.edu/colleges-schools/engineering/statistics/statistics-bs/) with four concentrations, as well as a Data Analysis Minor (http://catalog.gmu.edu/colleges-schools/engineering/statistics/data-analysis-minor/) and a Statistics Minor (http://catalog.gmu.edu/colleges-schools/engineering/statistics/statistics-minor/), and BS/MS accelerated options. A variety of advanced undergraduate courses are also available for inclusion in other degree programs.

Graduate Programs

The department also administers three master's degree programs: Statistical Science, MS , Biostatistics, MS (http://catalog.gmu.edu/colleges-schools/engineering/statistics/biostatistics-ms/), and Data Analytics Engineering, MS. The Data (http://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/) Analytics Engineering, MS (http://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms/) is a multidisciplinary program with courses and concentrations offered by many participating departments in the Volgenau School of Engineering.

Two dual master's degree programs, the Mathematics and Statistical (http://catalog.gmu.edu/colleges-schools/engineering/statistics/statistical-science-ms/#dualdegreeoptionstext) Science Dual-Degree, MS (http://catalog.gmu.edu/colleges-schools/engineering/statistics/statistical-science-ms/#dualdegreeoptionstext) and the Operations Research and Statistical Science Dual-Degree, MS (http://catalog.gmu.edu/colleges-schools/engineering/statistics/statistical-science-ms/#dualdegreeoptionstext) are offered in conjunction with the Mathematical Sciences (http://catalog.gmu.edu/colleges-schools/science/mathematical-sciences/#text) and Systems Engineering and Operations Research departments, respectively.

Finally, the Statistical Science, PhD (http://catalog.gmu.edu/colleges-schools/engineering/statistics/statistical-science-phd/) represents the highest academic attainment for a statistician and, as such, requires in-depth training to gain skills and knowledge of modern statistical theory, methodology, and practice.

Applied Statistics Graduate Certificate

Banner Code: VS-CERG-ASTA

Phone: 703-993-4835
Email: statistics@gmu.edu
Website: statistics.gmu.edu

This graduate certificate trains students in data analysis and statistical methodology. It provides a clear record of additional instruction in statistics for future graduate programs or employers.

The General Concentration is intended to complement PhD and MS programs outside the Department of Statistics. It is also intended to be responsive to the needs of those who teach or work in government/ industry and want to increase their knowledge of statistics. The certificate emphasizes the application of statistical tools, not theory. As such, there are no required prerequisite math courses, although one semester of calculus is strongly recommended.

The Federal Statistics Concentration is targeted at upgrading the skills of current practitioners. The federal statistical system is a complex data collection and analysis system that requires a wide variety of multidisciplinary skills for its maintenance. The Federal Statistics Certificate is intended to respond to the need for broad training in statistics, survey methods, and data analysis, including graphics and data visualization. The program is extremely flexible and can be tailored to the needs of students within the federal statistical sector. It is also intended to be responsive to the needs of those in state and local governments, and those in the private sector involved in the collection, interpretation, or statistical analysis of federal data.

Admissions & Policies

Admissions

General Concentration

Applicants should have an undergraduate degree from an accredited institution, with a minimum overall GPA of at least 3.00 (on a 4.00 scale). No specific undergraduate degree is required. Applicants are expected to have basic computer literacy. Successful completion of an undergraduate course in statistics is required for admission. One semester of calculus is strongly recommended.

Federal Statistics Concentration

Potential candidates must hold a bachelor's degree and have taken at least two courses in calculus and one course in calculus-based probability and statistics. These minimal course requirements are normally satisfied by students who have successfully completed courses equivalent to the following Mason courses: MATH 113 Analytic Geometry and Calculus I (Mason Core), MATH 114 Analytic Geometry and Calculus II, and STAT 344 Probability and Statistics for Engineers and Scientists I. Candidates must also be computer literate.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 12

This certificate may be pursued on a part-time basis only.

Concentration in General (GEN)

Coursework

Code	Title	Credits
Select 12 credits from the following list:		12
STAT 515	Applied Statistics and Visualization for Analytics	
STAT 517	Experimental Design	
STAT 522	Applied Multivariate Statistics	
STAT 525	Nonparametric Statistics and Categorical Data Analysis	
STAT 526	Applied Regression Analysis	
STAT 532	Introduction to Statistical Software Packages	
STAT 535	Analysis of Experimental Data [1]	
STAT 539	Topics in Applied Statistics	
STAT 560	Biostatistical Methods	
STAT 574	Survey Sampling I [2]	
STAT 674	Survey Sampling II	
Total Credits		12

1. STAT 535 is the prerequisite for all other courses besides STAT 574 and STAT 674. A student with sufficient background in statistics may seek a waiver of the STAT 535 prerequisite from the appropriate course instructor.
2. Enrollment in STAT 574 requires special permission from the course instructor.

Concentration in Federal Statistics (FSS)

Some courses may have prerequisites beyond minimal admission requirements for which students must qualify or seek a waiver from the course instructor.

Biostatistics, MS

Banner Code: VS-MS-BSTA

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The MS in Biostatistics will allow students to specialize in the design and analysis of health-related and biological studies, while maintaining the rigor and technical training of the Statistical Science master's program.

In this degree, students will take a statistics core and a "bio" core, involving courses in public health, biology, and clinical medicine (including ethics). It also involves a research core which allows students to solve real data problems in the biological or health area and collaborate with other scientists in an interdisciplinary team. Finally, students will choose from electives in bioinformatics, global and community health, or targeted statistics courses.

This graduate degree prepares students for analyzing difficult data specific to biology and health. The program, with its research core, will also be sufficiently rigorous for students who wish to pursue a PhD in Biostatistics.

Admissions & Policies

Admissions

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy. They also must hold a bachelor's degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, and calculus-based probability. Applicants with degrees in such fields as mathematics, statistics, and some engineering programs usually meet these requirements. For applicants with degrees in other fields, these requirements are normally satisfied if students have successfully completed courses equivalent to the listed Mason courses.

Note that coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 213	Analytic Geometry and Calculus III	3
MATH 203	Linear Algebra	3
or MATH 321	Abstract Algebra	
STAT 250	Introductory Statistics I (Mason Core)	3
or STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	3
or MATH 351	Probability	

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&_ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

Requirements

Degree Requirements

Total credits: 30

In addition to meeting general requirements that apply to master's degrees at Mason, all students must complete the 21-credit core requirements for the degree. A grade of "B-" or better is required in all 500-level statistics core courses. Students build on these core requirements by choosing 9 credits of electives.

Core Courses

Statistics Core

The Statistics core provides the basic probability, statistical analysis techniques, and statistical modeling tools that all biostatisticians must know, and provides a basis for higher level elective coursework.

Code	Title	Credits
STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 654	Applied Statistics II	3
Total Credits		9

Bio Core

The Bio core is designed to provide the biological background necessary for biostatisticians. These courses offer preparation in the areas of public health and epidemiology (GCH 712 Introduction to Epidemiology), bioengineering (BENG 501 Bioengineering Research Methods , BENG 538 Medical Imaging) as well as bioinformatics (BINF 630 Bioinformatics Methods). In addition, this portion of the core curriculum ensures that students are trained in the statistical techniques required for clinical medicine, and includes material on ethics in research (STAT 560 Biostatistical Methods).

Code	Title	Credits
GCH 712	Introduction to Epidemiology	3
or BENG 501	Bioengineering Research Methods	
BINF 630	Bioinformatics Methods	3
or BENG 538	Medical Imaging	

STAT 560	Biostatistical Methods	3
Total Credits		9

Research Core

The Research core has been designed to assist students in the development of the requisite skills for careers in consulting or research. These courses will allow students to consult directly with biologists and medical and public health scientists on real data problems and provide opportunities to write reports and give oral presentations.

Code	Title	Credits
STAT 634	Case Studies in Data Analysis	3
or STAT 798	Master's Research Project	
Total Credits		3

Electives

The electives labeled STAT are specifically chosen from the department's master's-level electives to include techniques that are particularly important for biostatisticians.

Code	Title	Credits
Select three electives from the following:		9
GCH 782	International Research Ethics and Methods	
GCH 806	Advanced Multivariate Statistics and Data Analysis for Health Care Research	
STAT 652	Statistical Inference	
STAT 657	Nonparametric Statistics	
STAT 662	Multivariate Statistical Methods	
STAT 663	Statistical Graphics and Data Exploration I	
STAT 665	Categorical Data Analysis	
STAT 668	Survival Analysis	
STAT 672	Statistical Learning and Data Analytics	
STAT 760	Advanced Biostatistical Methods	
STAT 773	Statistical Methods for Longitudinal Data Analysis	
BENG 525	Neural Engineering	
BENG 537	Medical Image Processing	
BENG 541	Biomaterials	
BENG 550	Advanced Biomechanics	
Total Credits		9

Accelerated Master's

Bioengineering, BS/Biostatistics, Accelerated MS

Overview:

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain the Bioengineering, BS and the Biostatistics, MS in an accelerated time-frame after satisfactory completion of a minimum of 146 credits.

Admitted students are able to use up to 6 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements:

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Biostatistics, MS program if they meet the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of at least 3.0.
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 213	Analytic Geometry and Calculus III	3
BENG 320	Bioengineering Signals and Systems	3

Accelerated Pathway Requirements:

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits that satisfy requirements for the BS and MS programs. Students can take up to six credits of the following approved graduate level courses listed below as part of their undergraduate degree that will also be applied to the graduate degree.

Code	Title	Credits
BENG 501	Bioengineering Research Methods	3
STAT 554	Applied Statistics I	3
STAT 560	Biostatistical Methods	3
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS program. The graduate courses may be counted as Technical Electives toward Bioengineering, BS program requirements, with approval of the Bioengineering Department undergraduate coordinator.

While still in undergraduate status, a maximum of six additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral:

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form (https://registrar.gmu.edu/forms/) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Biostatistics, Accelerated MS

Overview:

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain the Statistics, BS and the Biostatistics, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements:

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Biostatistics, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00.
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 114	Analytic Geometry and Calculus II	4
MATH 203	Linear Algebra	3
STAT 334	Introduction to Probability Models and Simulation	3
or STAT 346	Probability for Engineers	
STAT 354	Probability and Statistics for Engineers and Scientists II	3
or STAT 360	Introduction to Statistical Practice II	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements:

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits that satisfy requirements for the BS and MS program with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability [1]	3
STAT 554	Applied Statistics I [1]	3
STAT 560	Biostatistical Methods [2]	3
STAT 663	Statistical Graphics and Data Exploration I [1]	3

1 May be counted as a Technical Elective towards the BS program requirements.

2 Replaces the corresponding undergraduate version STAT 460 as a Statistical Elective. Credit may not be received for both STAT 460 and STAT 560.

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Degree Conferral:

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Data Analysis Minor

Banner Code: DATA

Phone: 703-993-3645

Email: statistics@gmu.edu
Website: statistics.gmu.edu

The Data Analysis Minor provides students with a background in data analysis, statistical methodology, and data science. It is intended to complement undergraduate degree programs such as computer science, economics, environmental engineering, geography, mathematics, nursing, psychology, public administration, sociology, and systems engineering.

Admissions & Policies

Policies

For policies governing all minors, see AP.5.3.4 Minors.

Digital Technology Credential

Student can earn the Digital Technology Credential (https://volgenau.gmu.edu/academics/certificates-and-credentials/digital-technology-credential/) by enrolling in the Data Analysis Minor.

Program Requirements

The minor requires 15 credits: a core sequence of 6 credits, plus 9 credits of electives. Grades of C or better are required in all courses. At least 3 of the 9 elective credits must be in STAT or CDS courses numbered above 300. At least 8 credits must be in courses not required by the student's major.

Requirements

Minor Requirements

Total credits: 15

Core Sequence Credits

Code	Title	Credits
Select one sequence from the following: [1]		6
Sequence 1:		
STAT 250	Introductory Statistics I (Mason Core)	
STAT 350	Introductory Statistics II	
Sequence 2:		
STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 354	Probability and Statistics for Engineers and Scientists II	
Total Credits		6

[1] Mathematics majors may substitute MATH 351 and MATH 352 for the core sequence credits provided all 9 elective credits are in STAT courses.

Electives

Code	Title	Credits
Select 9 credits from the following:		9
STAT 362	Introduction to Computer Statistical Packages	
STAT 455	Experimental Design	
STAT 456	Applied Regression Analysis	
STAT 460	Introduction to Biostatistics	
STAT 462	Applied Multivariate Statistics	
STAT 463	Introduction to Exploratory Data Analysis	
STAT 465	Nonparametric Statistics and Categorical Data Analysis	
STAT 472	Introduction to Statistical Learning	
STAT 474	Introduction to Survey Sampling	
STAT 499	Special Topics in Statistics	
BENG/IT 322	Health Data Challenges	
BINF 401	Bioinformatics and Computational Biology I	
BIOL 214	Biostatistics for Biology Majors	
BIOL 312	Biostatistics for Bioinformatics	
BIOL 314	Introduction to Research Design and Analysis	
CDS 130	Computing for Scientists	
CDS 301	Scientific Information and Data Visualization	
CDS 302	Scientific Data and Databases	
CDS 303	Scientific Data Mining	
CS 445	Computational Methods for Genomics	
CS 450	Database Concepts	
CS 484	Data Mining	
CYSE 101	Introduction to Cyber Security Engineering	
CYSE 325	Discrete Events Systems Modeling	
ECON 345	Introduction to Econometrics	
ECON 445	Design and Analysis of Experiments	
GOVT 300	Research Methods and Analysis	
GGS 300	Spatial Quantitative Methods	
GGS 354	Data Analysis and Global Change Detection Techniques	
OR/SYST 335	Discrete Systems Modeling and Simulation	
OR/MATH 441	Deterministic Operations Research	
OR/MATH 442	Stochastic Operations Research	
PSYC 300	Statistics in Psychology	
SOCI 313	Statistics for the Behavioral Sciences (Mason Core)

Total Credits		9

Statistical Science, MS

Banner Code: VS-MS-STAT

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

Statistical science is regarded as one of the oldest and most successful information technology (IT) subjects. It focuses on the conversion of raw data into information. In this graduate program, students are trained

in the theory and practice of statistical methodology, particularly as it relates to high-technology applications.

Admissions & Policies

Admissions

In addition to satisfying general admission requirements for graduate study, all applicants are expected to have basic computer literacy and some experience using statistical software (such as SAS and R). They also must hold a bachelor's degree from an accredited institution in a field that includes coursework in multivariable calculus, matrix or linear algebra, statistics, calculus-based probability, and statistical software. These requirements are normally satisfied if students have successfully completed courses equivalent to the following Mason courses:

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 213	Analytic Geometry and Calculus III	3
MATH 203	Linear Algebra	3
or MATH 321	Abstract Algebra	
STAT 250	Introductory Statistics I (Mason Core)	3
or STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	3
or MATH 351	Probability	
STAT 362	Introduction to Computer Statistical Packages	3
Coursework taken to correct deficiencies in undergraduate preparation is not counted toward the degree.		

Specific application deadlines and requirements (https://admissions.gmu.edu/grad/application-deadlines-and-requirements/?academicUnit=VS&_ga=1.107632321.273102085.1480697294) are available through the Office of Graduate Admissions.

Requirements

Degree Requirements

Total credits: 30

In addition to meeting general requirements that apply to master's degrees at Mason, all students must complete the 15-credit core requirements for the degree. Grades of B- or better are required in three of the core courses: STAT 544 Applied Probability, STAT 544 Applied Probability, and STAT 654 Applied Statistics II. Students build on these core requirements by choosing 9 credits of methodology courses and 6 credits of electives.

Students select either the professional or research option, depending on career ambitions. The professional option provides MS degree qualifications to those seeking an expanded knowledge base in modern statistical theory and practice but do not wish to pursue a research career. The research option is for students planning to continue with a PhD degree, or begin/continue careers in statistical methodology research.

Professional Option

The professional option focuses on completing coursework in modern statistical theory and practice. 30 credits are required for the degree: 15 credits of core courses (taken by all MS students), 9 credits of methodology courses, and 6 credits of electives.

Students who select the professional option may elect to complete a master's research project resulting in a technical report. This report is not an original research report but a scholarly essay on a topic of current interest in the statistical science discipline. The technical report is usually about 20 to 25 pages long and demonstrates the student's ability to read and synthesize current technical literature into a scholarly essay. The report is evaluated by the student's advisor, taking into account the comprehensiveness of the coverage of the scientific literature, the accuracy of presentation and interpretation, and the literary style. Students are notified of their evaluations, and they may be required to revise their report to further develop their skills in preparing reports on technical subjects. The report is usually written in the context of 3 credits of STAT 798 Master's Research Project, which count as elective credits. Students opting not to complete a research project must take 30 credits of coursework.

Research Option

The research option requires 30 credits, including 6 credits that must be in independent research (thesis). Research is done with approval under the guidance of a faculty member. Research may be carried out at Mason or, if appropriate, at nearby facilities. For example, students may pursue research at their place of employment on topics of interest to their employer, provided the research meets the standards of the university. The thesis is usually written in the context of 6 credits of STAT 799 Master's Thesis, which count as elective credits. The remaining 24 credits include the 15 core credits and 9 methodology credits.

In addition to satisfying general university requirements for a master's degree, candidates who select the research option must submit a thesis based on the research to the student's thesis committee, which must give preliminary approval. The composition and appointment of this committee follows graduate program policies.

Candidates also must pass a final oral exam that concentrates on, but is not limited to, the area on which the thesis is written. The exam is administered by the student's thesis committee, and all interested members of the graduate faculty are invited to attend and participate in the questioning. The thesis committee makes the final decision on whether the candidate passes or fails.

Core Courses

The core coursework covers the basic elements of statistics at the graduate level. STAT 544 Applied Probability covers the major mathematical framework for statistical theory and practice. STAT 652 Statistical Inference provides basic statistical theory. After completing this course, students have the theoretical basis from which statistical methods are derived.

STAT 554 Applied Statistics I is a survey of statistical methods that have become the backbone of statistical practice. Focus in this course is on techniques that quantify random behavior. STAT 654 Applied Statistics II, provides an overview of principles of statistical modeling.

The final core course is STAT 634 Case Studies in Data Analysis, which is a writing intensive course that serves as a capstone experience.

Students synthesize methods and ideas acquired in their coursework in a statistical consulting environment.

Code	Title	Credits

or CSI 775	Graphical Models for Inference and Decision Making	
SYST 664	Bayesian Inference and Decision Theory	
or CSI 674	Bayesian Inference and Decision Theory	
Total Credits		6

Notes:

- Credit toward the MS in Statistical Science will not be given for both STAT 515 Applied Statistics and Visualization for Analytics and STAT 663 Statistical Graphics and Data Exploration I.
- Credit toward the MS in Statistical Science will not be given for both MATH 654 Construction and Evaluation of Actuarial Models II and STAT 668 Survival Analysis.
- A student concurrently enrolled in the Actuarial Sciences Graduate Certificate and the MS in Statistical Science may count MATH 551 Regression and Time Series and MATH 553 Advanced Mathematical Statistics in Actuarial Sciences as elective courses and may count MATH 555 Actuarial Modeling I and MATH 653 Construction and Evaluation of Actuarial Models I as methodology courses. The Graduate Certificate in Actuarial Sciences must be completed prior to or concurrently with the MS in Statistical Science. Otherwise, at most two of MATH 551 Regression and Time Series, MATH 553 Advanced Mathematical Statistics in Actuarial Sciences, MATH 555 Actuarial Modeling I, and MATH 653 Construction and Evaluation of Actuarial Models I can be counted toward the MS in Statistical Science as elective courses; none can be applied as methodology courses.

Dual Degree Options

Mathematics and Statistical Science Dual-Degree MS

This program allows students to earn an MS in Mathematics and an MS in Statistical Science by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for both the MS in Mathematics and the MS in Statistical Science programs. A joint faculty committee from the Department of Mathematical Sciences and the Department of Statistics make final admission decisions into the dual-degree program.

MS-MATH/STAT Dual-Degree Requirements

Total credits: 48

Code	Title	Credits

STAT 554	Applied Statistics I	3
STAT 634	Case Studies in Data Analysis	3
STAT 652	Statistical Inference	3
STAT 654	Applied Statistics II	3
Total Credits		27

Electives

Code	Title	Credits
Select 12 elective credits in MATH courses numbered 615 or higher [1]		12
Select any STAT courses numbered 540-775		9
Total Credits		21

[1] Excluding MATH 653 Construction and Evaluation of Actuarial Models I, MATH 654 Construction and Evaluation of Actuarial Models II, MATH 655 Pension Valuation, and MATH 799 MS Thesis

Notes:

- Students in either the BS/Accelerated MS in Mathematics program or the BS(selected)/Accelerated MS in Statistical Science program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for either the MS in Mathematics or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Operations Research and Statistical Science Dual-Degree MS

This program allows students to earn an MS in Operations Research and an MS in Statistical Science by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

MS-OPRS/STAT Dual Degree Requirements

Total credits: 48

Elective Credits in STAT Courses

Code	Title	Credits
Select 9 elective credits from any STAT courses numbered 540-775		9
Total Credits		9

Notes

- Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS (selected)/Operations Research, Accelerated MS program or the BS (selected)/Statistical Science, Accelerated MS program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain an undergraduate BS degree and the Statistical Science, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program **if such an accelerated** Statistical Science, MS **pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs.**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Statistical Science, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00.
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 213	Analytic Geometry and Calculus III	3
MATH 203	Linear Algebra	3
or MATH 321	Abstract Algebra	
STAT 250	Introductory Statistics I (Mason Core)	3
or STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	3
or MATH 351	Probability	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits satisfying degree requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 560	Biostatistical Methods	3
STAT 574	Survey Sampling I	3
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Statistical Science, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain the Statistics, BS and the Statistical Science, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

STAT 560	Biostatistical Methods [2]	3
STAT 574	Survey Sampling I [3]	3
STAT 663	Statistical Graphics and Data Exploration I [1]	3

1. May be counted as a Technical Elective towards the BS program requirements.
2. Replaces the corresponding undergraduate version STAT 460 as a Statistical Elective. Credit may not be received for both STAT 460 and STAT 560.
3. Replaces the corresponding undergraduate version STAT 474 as a Statistical Elective. Credit may not be received for both STAT 474 and STAT 574.

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. These can be chosen from STAT 500-519 and STAT 540-799. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Statistical Science, PhD

Banner Code: VS-PHD-STAT

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The PhD in Statistical Science represents the highest academic attainment for a statistician and, as such, requires in-depth knowledge of modern statistical theory and practice. The degree program is a hybrid of theory, computation, and data analysis; and students are expected to be proficient in all three. Current research areas of key department faculty in the program include biostatistics, modern statistical methodology, big data, data analytics, statistical or machine learning, applied probability, statistical networks, statistical computing, statistical imaging, bioinformatics, financial statistics, Bayesian statistics, data confidentiality, and statistics interfaced with other disciplines.

Admissions & Policies

Admissions

Students should have a master's degree in a mathematically-intensive discipline with a minimum 3.50 GPA. Students entering with a master's degree are expected to have completed coursework equivalent to STAT 544 Applied Probability, STAT 554 Applied Statistics I, STAT 652 Statistical Inference, and STAT 654 Applied Statistics II with exceptional performance. The program also requires a course in advanced calculus, MATH 315 Advanced Calculus I or equivalent, with a B or better. In exceptional circumstances, talented students with a mathematically-intensive undergraduate degree may be admitted.

Specific application deadlines and requirements (https://www2.gmu.edu/admissions-aid/apply-now/how-apply/graduate/) are available through the Office of Graduate Admissions.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 24 credits with a master's degree in statistics, mathematics, or similar discipline, or by 30 credits with a Master's degree from the George Mason University Department of Statistics. Reduction of credit requires the approval of the Director(s) of the PhD program in Statistical Science or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Requirements

Degree Requirements

Total credits: 72

The 72 hours of required doctoral-level credits typically consist of 48 credits of regular coursework and 24 credits of dissertation research. The following degree plan is based on a student who receives a 24 credit reduction. Students who receive more or less than a 24 credit reduction should consult with their advisor.

Doctoral Coursework

Students are required to complete a minimum of 24 credits of advanced emphasis coursework, including five core courses:

Code	Title	Credits
STAT 662	Multivariate Statistical Methods	3
or STAT 672	Statistical Learning and Data Analytics	
STAT 778	Statistical Computing	3
STAT 971	Probability Theory	3
STAT 972	Mathematical Statistics I	3
STAT 973	Mathematical Statistics II	3
The remaining three courses are selected and approved by the Dissertation Committee and the Director(s) of the PhD program in Statistical Science and should be numbered 600 or above. [1]		9
Total Credits		24

[1] STAT 652 Statistical Inference and STAT 654 Applied Statistics II do not count toward advanced emphasis coursework, if a student has received a 24 credit reduction.

Qualifying Exams

Written qualifying exams will be taken in the following areas:

- Applied Statistics
- Theoretical Statistics

The exam on Applied Statistics will cover content from STAT 778 Statistical Computing and (STAT 662 Multivariate Statistical Methods or STAT 672 Statistical Learning and Data Analytics). The exam on Theoretical Statistics will cover content from STAT 971 Probability Theory, STAT 972 Mathematical Statistics I and STAT 973 Mathematical Statistics II.

Qualifying exams are offered in August and January. Full-time students are required to take the qualifying exams in August of the year following year of admission. Part-time students are required to take the qualifying exams within the first three years of enrollment in the program. Students who do not pass both exams in two consecutive exam periods are terminated from the program.

Dissertation Research

In order to advance to candidacy, students must complete all coursework, pass the qualifying exams, and defend a dissertation proposal.

Code	Title	Credits
Select 24 credits from the following:		24
STAT 990	Dissertation Topic Presentation (required)	
STAT 998	Doctoral Dissertation Proposal	
STAT 999	Doctoral Dissertation (must complete a minimum of 12 credits)	
Total Credits		24

Dissertation Committee Selection

Following successfully passing the qualifying exams, students should identify a dissertation director who is willing to work with them and together assemble a Dissertation Committee. The chair of the Dissertation Committee must be a member of the graduate faculty with a regular appointment in the Department of Statistics, and will typically be the dissertation director. The Dissertation Committee consists of a chair, two members of the graduate faculty who hold regular appointments in the Department of Statistics, and an external member; see AP.6.10.5 Dissertation Committee. The Dissertation Committee must be approved by the Director(s) of the PhD program in Statistical Science.

Advancement to Candidacy

Admission to candidacy is acquired on completion of a dissertation proposal examination. A dissertation proposal examination consists of:

- A proposal manuscript containing a problem statement, a review of related scholarly work, preliminary results, and an outline of the work to be conducted.
- An oral proposal presentation and a subsequent examination by the Dissertation Committee on aspects within the scope of the proposal that pertain to principles and questions fundamental to the field of Statistics. The presentation and examination are attended by the Dissertation Committee and the Director(s) of the PhD program in Statistical Science.

A student who fails the dissertation proposal examination may take it a second time, within six months. If the student fails a second time, the student is terminated from the program.

Doctoral Defense

The dissertation defense serves as the student's final examination and is conducted by the Dissertation Committee. Both the pre-defense and final defense are scheduled on approval of a written request to the department chair; see AP.6.10.8 Doctoral Defense.

Statistics Minor

Banner Code: STIC

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The statistics minor provides students with a background in the methodology and application of statistics. It is intended to complement undergraduate degree programs in the Volgenau School and the College of Science, especially those programs that require MATH 113 Analytic Geometry and Calculus I (Mason Core), MATH 114 Analytic Geometry and Calculus II, and STAT 344 Probability and Statistics for Engineers and Scientists I as a part of the major requirements.

Admissions & Policies

Admissions

To be admitted to the minor, students must have completed MATH 113 Analytic Geometry and Calculus I (Mason Core) and MATH 114 Analytic Geometry and Calculus II with a grade of C or better.

Policies

The minor in Statistics requires 15 credit hours of coursework. Grades of C or better are required in all courses. At least 8 credits must be in courses not required by the student's major. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 15

Core Requirements

Code	Title	Credits
STAT 344	Probability and Statistics for Engineers and Scientists I [1,2]	3
STAT 354	Probability and Statistics for Engineers and Scientists II [2]	3
STAT 362	Introduction to Computer Statistical Packages	3
STAT 456	Applied Regression Analysis	3
Total Credits		12

1. STAT 346 Probability for Engineers and a course in statistics, such as STAT 250 Introductory Statistics I (Mason Core), can be substituted for the STAT 344 Probability and Statistics for Engineers and Scientists I core requirement.
2. Students enrolled in the Mathematics, BS may substitute MATH 351 Probability and MATH 352 Statistics for STAT 344 Probability and Statistics for Engineers and Scientists I and STAT 354 Probability and Statistics for Engineers and Scientists II.

Elective Requirement

Code	Title	Credits
Select one from the following:		3
STAT 455	Experimental Design	
STAT 460	Introduction to Biostatistics	
STAT 462	Applied Multivariate Statistics	
STAT 463	Introduction to Exploratory Data Analysis	
STAT 465	Nonparametric Statistics and Categorical Data Analysis	
STAT 472	Introduction to Statistical Learning	
STAT 474	Introduction to Survey Sampling	
Total Credits		3

Statistics, BS

Banner Code: VS-BS-STIC

Phone: 703-993-3645
Email: statistics@gmu.edu
Website: statistics.gmu.edu

The Bachelor of Science in Statistics is designed to provide a framework for students to develop connections between statistical concepts and theories, their impact to data science, and their applications to statistical practice. It will prepare statisticians to use modern statistical techniques to design studies, collect data, analyze and visualize high dimensional data sets, and draw valid conclusions in an increasingly data-centric world. In this program, students will meld the time-tested concepts and theories of statistics with modern methods of analysis, in order to interpret the data that is collected in nearly every discipline and every sector of industry and government.

The BS in Statistics requires a total of 120 credit hours, including major core requirements, concentration requirements, and Mason Core requirements. The program's major core curriculum provides students with a firm foundation in statistics, mathematics, and computing. Selection of a concentration allows a student to specialize in applied, theoretical, or computational aspects of statistical practice.

Students will select one of four concentrations: Applied Statistics, Mathematical Statistics, Sports Analytics or Statistical Analytics. The Applied Statistics concentration focuses on developing proficiency in analytical methods applicable to a specific discipline of the student's choosing. This is accomplished through the requirement to complete a minor in a field that makes substantial use of data analysis. The Mathematical Statistics concentration is designed for students interested in mastering the theoretical underpinnings of statistics and probability; this concentration is recommended for students who intend to continue graduate studies in statistics or whose main focus is on research. The Sports Analytics concentration is designed to provide students with an understanding of the principles of research methodology, economics, statistics, and data analytics integral to the growing field of sports analytics. This concentration will prepare students to work with sports teams as well as companies related to the field of sports such as advertisers, sponsors, etc. where data skills are crucial for today's workforce. The Statistical Analytics concentration blends the disciplines of computer science and statistics, as two core disciplines of data science, in a modern way and is designed for students interested in applying concepts from statistics and computer science to the analysis of complex data sets.

Graduates of this program can look forward to careers in local, state, and federal government, and in the many industries that conduct scientific research, collect, and analyze data, or where data science is essential. They will enter the workforce with the ability to impact science, public policy, technology, and industry in a positive way through their expertise in data collection, analysis, synthesis, and interpretation, each with the highest ethical standards. Graduates will also be prepared to continue their studies in graduate schools.

Admissions & Policies

Policies

Advanced Placement, Credit by Exam

A score of 5 on the Advanced Placement (AP) statistics exam qualifies students for credit in STAT 260.

Change of Major

Students considering changing their major to Statistics should consult with the Volgenau School of Engineering Coordinator of Undergraduate Advising, 2500 Nguyen Engineering Building. These students must have a cumulative GPA of at least 2.75 and completed MATH 113 with a grade of C or better. See Change of Major for more information.

Grades

Students must earn a C or better in Major Core requirement courses as well as in courses required to satisfy prerequisites. Also, students must earn a C or better in at least 6 credits of the courses used to fulfill the 9 credits of Statistics Restricted Electives.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

SYST 488	Financial Systems Engineering	
Total Credits		9

[1] May not be used to fulfill other degree requirements.

Concentrations

Select one concentration and complete all requirements.

Concentrations

- Concentration in Applied Statistics (ASTA)
- Concentration in Mathematical Statistics (MTHS)
- Concentration is Sports Analytics (SPAL)
- Concentration in Statistical Analytics (STLA)

Concentration in Applied Statistics (ASTA)

Focuses on developing proficiency in analytical methods applicable to a specific discipline of the student's choosing. This is accomplished through the requirement to complete a minor in a field that makes substantial use of data analysis.

Code	Title	Credits
Students must complete 15 - 21 credits in a pre-approved minor, selected in consultation with the undergraduate coordinator. Courses taken to fulfill the minor requirements that are not used to fulfill Major Core or Restricted Electives requirements are considered unique to the minor. At least 15 credits of the minor coursework, technical electives, general electives, and additional Mason Core courses must be at or above the 300 level.		15-21

Concentration in Mathematical Statistics (MTHS)

Designed for students interested in mastering the theoretical underpinnings of statistics and probability; this concentration is recommended for students who intend to continue graduate studies in statistics or whose main focus is on research.

Code	Title	Credits
STAT 356	Statistical Theory	3
CDS 130	Computing for Scientists	3
MATH 125	Discrete Mathematics I (Mason Core)	3
MATH 213	Analytic Geometry and Calculus III [1]	3
MATH 300	Introduction to Advanced Mathematics	3
MATH 315	Advanced Calculus I	3
Total Credits		18

[1] MATH 215 may be taken in place of MATH 213 if student qualifies.

Code	Title	Credits
At least 9 credits of the technical electives, general electives, and additional Mason Core courses must be at or above the 300 level.		

Concentration in Sports Analytics (SPAL)

Code	Title	Credits
SPMT 201	Introduction to Sport Management	3
SPMT 425	Sport Analytics	3
SRST 450	Research Methods	3
ECON 103	Contemporary Microeconomic Principles (Mason Core)	3
ECON 104	Contemporary Macroeconomic Principles (Mason Core)	3
Select six credits of SPMT electives		6
SPMT courses numbered between 400-499		
Select three credits of a computational elective		3

4-Year Plan

Bachelor of Science in Statistics Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

Statistics, BS/Biostatistics, Accelerated MS

Overview:

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain the Statistics, BS and the Biostatistics, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements:

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Biostatistics, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00.
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 114	Analytic Geometry and Calculus II	4
MATH 203	Linear Algebra	3
STAT 334	Introduction to Probability Models and Simulation	3
or STAT 346	Probability for Engineers	
STAT 354	Probability and Statistics for Engineers and Scientists II	3
or STAT 360	Introduction to Statistical Practice II	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements:

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits that satisfy requirements for the BS and MS program with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability [1]	3
STAT 554	Applied Statistics I [1]	3
STAT 560	Biostatistical Methods [2]	3
STAT 663	Statistical Graphics and Data Exploration I [1]	3

1 May be counted as a Technical Elective towards the BS program requirements.

2 Replaces the corresponding undergraduate version STAT 460 as a Statistical Elective. Credit may not be received for both STAT 460 and STAT 560.

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) policies.

Degree Conferral:

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain the Statistics, BS and the Data Analytics Engineering, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Data Analytics Engineering, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of at least 3.0.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits that satisfy requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
CS 504	Principles of Data Management and Mining	3
or CS 584	Theory and Applications of Data Mining	
OR 541	Operations Research: Deterministic Models (Credit may not be received for both OR 441 and OR 541.)	3
or OR 531	Analytics and Decision Analysis	
STAT 515	Applied Statistics and Visualization for Analytics	3
or STAT 554	Applied Statistics I	
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS program.

The graduate courses may be counted as Technical Electives toward the Statistics, BS program requirements, with approval of the Statistics Department undergraduate coordinator.

While still in undergraduate status, a maximum of six additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form (https://registrar.gmu.edu/forms/) that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Recruitment office. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Statistics, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Statistics, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Statistics course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Statistics course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select from the following Statistics courses:

Code	Title	Credits
STAT 544	Applied Probability	
STAT 554	Applied Statistics I	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST/OR 568	Applied Predictive Analytics (Core)	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Statistics, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an

accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Statistics, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Statistics course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Statistics course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select from the following Statistics courses:

Code	Title	Credits
STAT 544	Applied Probability	
STAT 554	Applied Statistics I	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST/OR 568	Applied Predictive Analytics	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	
OR 541	Operations Research: Deterministic Models	
OR 542	Operations Research: Stochastic Models	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must

complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Statistical Science, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain the Statistics, BS and the Statistical Science, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Statistical Science, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00,
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 114	Analytic Geometry and Calculus II	4
MATH 203	Linear Algebra	3
STAT 334	Introduction to Probability Models and Simulation	3
or STAT 346	Probability for Engineers	
STAT 354	Probability and Statistics for Engineers and Scientists II	3
or STAT 360	Introduction to Statistical Practice II	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits that satisfy requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability [1]	3
STAT 554	Applied Statistics I [1]	3
STAT 560	Biostatistical Methods [2]	3
STAT 574	Survey Sampling I [3]	3
STAT 663	Statistical Graphics and Data Exploration I [1]	3

1. May be counted as a Technical Elective towards the BS program requirements.
2. Replaces the corresponding undergraduate version STAT 460 as a Statistical Elective. Credit may not be received for both STAT 460 and STAT 560.
3. Replaces the corresponding undergraduate version STAT 474 as a Statistical Elective. Credit may not be received for both STAT 474 and STAT 574.

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. These can be chosen from STAT 500-519 and STAT 540-799. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Department of Systems Engineering and Operations Research

John Shortle, Chair

2100 Nguyen Engineering Building

Fairfax Campus

Phone: 703-993-5689
Email: seor@gmu.edu
Website: https://seor.gmu.edu/

The Systems Engineering and Operations Research (SEOR) Department offers a bachelor's degree in systems engineering, a minor in systems engineering, a minor in aviation flight training and management, a master's degree in systems engineering, a master's degree in operations research, and a doctoral degree in systems engineering and operations research. The department also offers a concentration in predictive analytics and a concentration in financial engineering within the school-wide master's degree in data analytics engineering. In addition, the department offers six systems engineering certificates at the master's level: architecture-based systems integration, C4I and cyber (command, control, communications, computing, intelligence, and cyber), engineering resilient enterprise systems, communication and networking, tactical computer operations, and financial systems; the department offers three operations research certificates: computational modeling, military operations research, and predictive data analytics. The department also offers a dual master's degree in operations research and master's degree in statistical science jointly with the Statistics Department.

There is much overlap between systems engineering and operations research. The department encourages students of either discipline to elect courses in the other. For more information, go to the department's website (http://seor.gmu.edu/).

Systems Engineering

Systems engineers determine the most effective ways to use all of a system's components: people, machines, materials, information, and energy. The engineers plan, design, implement, and manage integrated systems, working to ensure performance, safety, reliability, and maintainability. They also work to ensure that systems are delivered on time at a reasonable cost. Examples of systems include the national air transportation system, computer networks, autonomous vehicles, intelligent robots, the electric power grid, healthcare systems, and financial trading systems. Whereas other engineering disciplines concentrate on individual aspects of a system, such as electronics, ergonomics, or software, systems engineers focus on the system as a whole and the interaction of the underlying parts. Systems engineering, perhaps more than any other engineering discipline, is involved with the human and organizational aspects of developing the desired system. Systems engineering is the people-oriented engineering profession.

Operations Research

Operations research is the professional field that uses analytical and data-based methods in engineering to support management decision making, often focusing on how best to allocate limited resources. Operations researchers do for organizations what physicists do for the physical world: they try to find order in apparent chaos by identifying the structure in complex situations and understanding how the components of organizations interact. The goal is to explain and predict the effects of actions taken on these systems and to use the information to make informed management decisions. Much of this work is developing and manipulating mathematical and computer models of organizational systems, frequently making use of big data to build and run the models.

Website: https://seor.gmu.edu/

Students completing the minor will take classes for Pilot Ground School and Flight Training leading up to a solo flight. In addition, students will study aspects of aviation from systems engineering of air traffic control, design of airports, human factors and psychology, and financial planning and management. Students will be trained for required government licensing exams such as the Federal Aviation Administration (FAA) Knowledge Test and FAA Flight tests. Special fees to cover flight training costs will apply. Students are responsible for meeting all eligibility requirements.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 15

Required SEOR Courses

Code	Title	Credits
SYST 460	Introduction to Air Traffic Control	3
SYST 462	Flight Training Lab I (Lab fees to cover flight training costs apply)	3
SYST 463	Flight Training Lab II (Lab fees to cover flight training costs apply)	3
Total Credits		9

Two Additional Courses

Code	Title	Credits
Select one from the following:		3
SYST 370	Systems Project Management [1]	
or SYST 371	Systems Engineering Management	
SYST 461	Air Transportation System Engineering	
MIS 303	Introduction to Business Information Systems	
MBUS 301	Managing People and Organizations in a Global Economy	
MBUS 305	Introduction to International Business (Mason Core)	
ECON 471	Airline Economics	
Total Credits		3

[1] Credit cannot be received for both SYST 370 and SYST 371.

Code	Title	Credits
Select one from the following:		3
SYST 469	Human Computer Interaction [2]	
or SYST 470	Human Factors Engineering	
PSYC 317	Cognitive Psychology	
PSYC 333	Industrial and Organizational Psychology	
HIST 378	History of Aviation	
Total Credits		3

[2] Credit cannot be received for both SYST 469 and SYST 470.

Prerequisites

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.

Operations Research, MS

Banner Code: VS-MS-OPRS

Academic Advising

2100 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-5689
Email: seor@gmu.edu
Website: https://seor.gmu.edu/

The Master of Science in Operations Research prepares students for research and professional practice associated with the formulation, analysis, and computer implementation of mathematical models for decision making. Major components include optimization, stochastic modeling, computer simulation, predictive data analytics, and application of these components to realistic and relevant operational analysis problems. Students focus their studies in a concentration area such as data analytics, decision analysis, financial engineering, military operations research, optimization, or stochastic modeling; students can also choose a self-defined concentration with approval of a faculty advisor.

To obtain the MS degree, students complete an approved plan of study that contains a minimum of 30 graduate credits. Appropriate courses may be transferred, with advisor approval, into this degree program. Students may also take courses through the Commonwealth Graduate Engineering Program. The program also prepares students for pursuing advanced graduate study leading to the PhD degree in Systems Engineering and Operations Research (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-operations-research-phd/).

Admissions & Policies

Admissions

To be admitted to the program, students must hold a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field. They also must have completed courses in:

Code	Title	Credits
Calculus		
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 213	Analytic Geometry and Calculus III	3
Matrix Algebra		
MATH 203	Linear Algebra	3
Differential Equations		
MATH 214	Elementary Differential Equations	3
Applied Probability and Statistics		
STAT 346	Probability for Engineers	3
Scientific Programming Language		
CS 112	Introduction to Computer Programming	4

Specific application deadlines and requirements (https://www2.gmu.edu/admissions-aid/apply-now/how-apply/graduate/) are available through the Office of Graduate Admissions.

Requirements

Degree Requirements

Total credits: 30

Students must complete four core courses and the project (15 credits). The remaining 15 credits are electives subject to the requirements below, and can be taken in one of five concentration areas or in an individual plan approved by the student's advisor.

Required Core Courses

Code	Title	Credits
OR 541	Operations Research: Deterministic Models	3
OR 542	Operations Research: Stochastic Models	3
OR 568	Applied Predictive Analytics	3
OR 635	Discrete System Simulation	3
Total Credits		12

Project or Thesis (Optional)

Students must complete three credit hours of OR 699 Masters Project. Students in this course work in teams on approved applied project. A project report is submitted at the end of the semester, and a final project presentation is made to the entire faculty of the SEOR Department.

Students with the consent of a faculty adviser and departmental approval, may be approved to complete a thesis.

Code	Title	Credits
OR 699	Masters Project	3
Total Credits		3

Methods Courses

Code	Title	Credits
Select at least one deterministic methods and one stochastic methods course:		6
Deterministic Methods Courses:		
OR 641	Linear Programming	
OR 642	Integer Programming	
OR 643	Network Modeling	
OR 644	Nonlinear Programming	
OR 670	Metaheuristics for Optimization	
Stochastic Methods Courses:		
OR 645	Stochastic Processes	
OR 647	Queuing Theory	
OR 674	Dynamic Programming	
OR 675	Reliability Analysis	
SYST 664	Bayesian Inference and Decision Theory	
Total Credits		6

Additional Electives

Code	Title	Credits
Select up to three additional electives from the list of allowable electives with written concurrence of the advisor [1]		9
Total Credits		9

[1] At least two of these electives must be taken from SEOR course offerings, and one of these must be OR 600-level or higher. The remaining course should be taken in an area appropriate to the student's interests, such as operations research, systems engineering, computer science, information systems, statistics, data analytics, electrical and computer engineering, economics, mathematics or supply chain management.
The allowable elective for MS students includes:
A. Within VSE:
- o Any OR course ≥600
- o Any SYST course > 500
- o Any STAT course ≥ 554
- o Any CS course ≥ 500
- o Any ECE course≥ 500 but not 528
- o Any CEIE course > 500 but not 601

B. External to VSE (subject to approval by the Department Chair):
- o Any MATH course > 601 and permitted for Math majors;
- o Any CSI course > 610
- o Any ECON course ≥ 611

Concentrations

Students may construct concentration areas by choosing electives from among special groupings. The six concentrations available are data analytics, decision analysis, financial engineering, military operations research, optimization, and stochastic modeling. In addition to the required core courses (12 credits) and project course (3 credits), the remaining 15 credit hours consist of methods and elective courses associated with the concentration areas as outlined below. Students can also devise their own grouping of electives subject to prior approval of their advisor.

Available Concentrations

- Concentration in Data Analytics (DNIC)
- Concentration in Decision Analysis (DA)
- Concentration in Financial Engineering (FNNE)
- Concentration in Military Operations Research (MOR)
- Concentration in Optimization (OPT)
- Concentration in Stochastic Models (STM)

Concentration in Data Analytics (DNIC)

Code	Title	Credits
Students concentrating in data analytics must complete the following:		
CS 504	Principles of Data Management and Mining	3
One deterministic methods course		3
One stochastics methods course		3
and two courses from the following list:		6
OR 604	Practical Optimization	
OR 670	Metaheuristics for Optimization	
STAT 663	Statistical Graphics and Data Exploration I	

SYST 664	Bayesian Inference and Decision Theory	
Total Credits		15

Concentration in Decision Analysis (DA)

Code	Title	Credits
OR 671	Judgment and Choice Processing and Decision Making	3
OR 681	Decision and Risk Analysis	3
SYST 664	Bayesian Inference and Decision Theory	3
Select one deterministic methods course		3
Select one stochastic methods course		3
Total Credits		15

Concentration in Financial Engineering (FNNE)

Code	Title	Credits
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	3
OR 688	Financial Systems Engineering II: Derivative Products and Risk Management	3
Select one from the following:		3
OR 538	Analytics for Financial Engineering and Econometrics	
SYST 548	Technologies and Security for Cryptocurrencies and Financial Transactions	
OR 645	Stochastic Processes	
OR 671	Judgment and Choice Processing and Decision Making	
OR 681	Decision and Risk Analysis	
OR 682	Computational Methods in Engineering and Statistics	
Students must also complete:		6
One deterministic methods course		
One stochastics methods course [1]		
Total Credits		15

[1] If the student has already taken OR 645 Stochastic Processes this can be substituted for an elective course with written concurrence of the student's advisor

Concentration in Military Operations Research (MOR)

Code	Title	Credits
OR 651	Military Operations Research I: Cost Analysis	3
OR 652	Military Operations Research Modeling II: Effectiveness Analysis	3
SYST 683	Modeling, Simulation, and Gaming	3
One deterministic methods course		3
One stochastics methods course		3
Total Credits		15

Concentration in Optimization (OPT)

Code	Title	Credits
Select three courses from the following:		9
OR 604	Practical Optimization	
OR 641	Linear Programming	
OR 642	Integer Programming	
OR 643	Network Modeling	
OR 644	Nonlinear Programming	
OR 646	Stochastic Optimization	
OR 670	Metaheuristics for Optimization	
OR 682	Computational Methods in Engineering and Statistics	
Students must also complete:		6
One stochastic methods course		
One elective course with written concurrence of the student's advisor		
Total Credits		15

Concentration in Stochastic Models (STM)

Code	Title	Credits
Select three courses from the following:		9
OR 645	Stochastic Processes	
OR 647	Queuing Theory	
OR 674	Dynamic Programming	
OR 719	Graphical Models for Inference and Decision Making	
SYST 664	Bayesian Inference and Decision Theory	
STAT 554	Applied Statistics I	
or STAT 663	Statistical Graphics and Data Exploration I	
Select must also complete:		6
One deterministic methods course		
One elective course with written concurrence of the student's advisor		
Total Credits		15

Dual Degree Options

Operations Research and Statistical Science Dual-Degree MS

This program allows students to earn an MS in Operations Research and an MS in Statistical Science by completing 48 credits of coursework in both areas instead of the 60 that would be required if the degrees were sought independently.

Admission Requirements

Applicants must satisfy admission requirements for the MS in Operations Research Program and the MS in Statistical Science Program. A joint faculty committee from the Statistics and Systems Engineering and Operations Research Departments make final admission decisions into the dual-degree program.

MS-OPRS/STAT Dual Degree Requirements

Total credits: 48

Required Courses

Code	Title	Credits
OR 541	Operations Research: Deterministic Models	3
OR 542	Operations Research: Stochastic Models	3
OR 635	Discrete System Simulation	3
OR 699	Masters Project	3
STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 634	Case Studies in Data Analysis	3
STAT 652	Statistical Inference	3
STAT 654	Applied Statistics II	3
Total Credits		27

Elective Credits in OR Courses

Code	Title	Credits
Select 12 elective credits in OR courses at the 600 level, including at least one deterministic methods course and at least one stochastic methods course:		12
Deterministic Methods Courses:		
OR 641	Linear Programming	
OR 642	Integer Programming	
OR 643	Network Modeling	
OR 644	Nonlinear Programming	
OR 670	Metaheuristics for Optimization	
Stochastic Methods Courses:		
OR 645	Stochastic Processes	
OR 647	Queuing Theory	
OR 674	Dynamic Programming	
OR 675	Reliability Analysis	
SYST 664	Bayesian Inference and Decision Theory	
Total Credits		12

Elective Credits in STAT Courses

Code	Title	Credits
Select 9 elective credits from any STAT courses numbered 540-775		9
Total Credits		9

Notes

- Students currently enrolled in one of the MS programs must declare pursuit of the dual MS within one year of matriculation into the first MS program.
- A maximum of 6 credits across the two disciplines may be in independent research (thesis). The requirements for independent research are the same as detailed for the associated MS program.
- Students in either the BS (selected)/Operations Research, Accelerated MS program or the BS (selected)/Statistical Science, Accelerated MS program cannot get a reduction of 6 credits toward this dual degree. Students who want to proceed to a PhD degree will only be able to waive the number of credits specified in the associated PhD degree requirements, even though they will have 48 credits at the MS level.
- If a student decides not to complete the required 48 credits, a single MS degree will not be granted unless the student fulfills the requirements for the MS in Operations Research or the MS in Statistical Science.
- Once a student receives one of the MS degrees from either department, the student will no longer be eligible for the reduction in credit (i.e., will need to complete 30 credits) if the student later decides to earn the other MS degree.

Accelerated Master's

Bioengineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Bioengineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 140 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Bioengineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Bioengineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Bioengineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select from the following Bioengineering courses:

Code	Title	Credits
Required course:		
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	
Select at most one from the following Bioengineering courses:		
BENG 501	Bioengineering Research Methods	
BENG 514	Pathophysiology and the Role of New Technologies in Human Diseases	
BENG 520	Biomedical Data Analytics	
BENG 521	Cell and Tissue Engineering	
or BENG 541	Biomaterials	
BENG 526	Neural Engineering	
BENG 537	Medical Image Processing	
or BENG 538	Medical Imaging	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Civil and Infrastructure Engineering, BS/ Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Civil and Infrastructure Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-bs/) and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate

study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Civil and Infrastructure Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-bs/) students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Civil and Infrastructure Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Civil and Infrastructure Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Civil and Infrastructure Engineering courses:

Code	Title	Credits
CEIE 501	Sustainable Development	
CEIE 512	Structural Steel Design	
CEIE 532	Foundation Design	
CEIE 535	Engineering Geology	
CEIE 540	Water Supply and Distribution	
CEIE 542	Open Channel Flow	
CEIE 550	Environmental Engineering Systems	
CEIE 553	Water and Wastewater Treatment Processes	
CEIE 557	Remote Monitoring Techniques for Civil Engineering Applications	
CEIE 561	Traffic Engineering	
CEIE 562	Urban Transportation Planning	
CEIE 571	Construction Administration	
CEIE 572	Building Information Modeling	
CEIE 573	Legal Aspects of the Construction Process	
CEIE 574	Construction Computer Application and Informatics	
CEIE 576	Construction Cost Estimating	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is

submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Computer Engineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Computer Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS 160/161, and PHYS 260/261 requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Electrical and Computer Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Electrical and Computer Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Note that ECE 542 can be used to meet the ECE 465 requirement for the Computer Engineering, BS program. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Electrical and Computer Engineering courses:

Code	Title	Credits
ECE 505	Hardware Security	
ECE 508	Internet of Things	
ECE 510	Real-Time Concepts	
ECE 511	Computer Architecture	
ECE 512	Computer Architecture Security	
ECE 516	Mobile Systems and Applications	
ECE 521	Linear Systems and Control	
ECE 527	Learning From Data	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 530	Sensor Engineering	
ECE 531	Introduction to Wireless Communications and Networks	
ECE 535	Digital Signal Processing	
ECE 542	Computer Network Architectures and Protocols	
ECE 545	Digital System Design with VHDL	
ECE 567	Optical Fiber Communications	
ECE 580	Small Spacecraft Engineering	
ECE 590	Selected Topics in Engineering	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Mechanical Engineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Mechanical Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS

requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Mechanical Engineering course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Mechanical Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Mechanical Engineering courses:

Code	Title	Credits
ME 521	Energy Transfer	
ME 531	Energy Transmission	
ME 541	Power Generation	
ME 542	Energy Utilization	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Statistics, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Statistics, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Statistics course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Statistics course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select from the following Statistics courses:

Code	Title	Credits
STAT 544	Applied Probability	
STAT 554	Applied Statistics I	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST/OR 568	Applied Predictive Analytics (Core)	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Systems Engineering BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Systems Engineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Systems Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

These courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may *not* be applied toward the Operations Research, MS.

Undergraduate	Graduate	
SYST 420	SYST 521/OR 643	Credit may not be received for both courses.
SYST 473	SYST 573	Credit may not be received for both courses.
OR 441	OR 541	Core course in the graduate program. Credit may not be received for both courses.
OR 442	OR 542	Core course in the graduate program. Credit may not be received for both courses.
SYST 438	SYST 538	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.
SYST 468	OR/SYST 568	Core course in the graduate program. Credit may not be received for both courses.
SYST 488	SYST 588	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair. Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

BS (selected)/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in their major and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Mason undergraduate students majoring in both engineering and non-engineering disciplines will be considered for admission into the BAM Pathway if 1) such an accelerated Operations Research, MS pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have completed of a minimum of 60 credits with an overall GPA of at least 3.3, and 3) they have completed all MATH and PHYS requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS program. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

The courses may be chosen from the list of Systems Engineering and Operations Research graduate courses in the following table.

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Admissions & Policies

Admissions

Computational Modeling Concentration

For admission to the certificate with a Computational Modeling concentration, applicants must meet minimum entrance requirements for the MS in operations research, the MS in statistical science, or the PhD in computational sciences and informatics.

Military Operations Research Concentration

Admissions requirements for the certificate with a Military Operations Research concentration are identical to those for the Operations Research, MS.

Predictive Data Analytics Concentration

The certificate with Predictive Analytics concentration will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a minimum GPA of 3.0. Students who are already enrolled in a master's program must submit a secondary certificate form to enroll in this certificate with concentration program; all others must apply for graduate admission to this certificate with concentration program.

Policies

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Courses taken for the Computational Modeling certificate can count toward a master's degree in operations research or statistics or a PhD in computational sciences and informatics. One must be concurrently enrolled in the program for courses to count toward the certificate and the other degree.

Requirements

Total credits: 12-15

This certificate may be pursued on a part-time basis only.

Certificate Requirements

Students must complete all requirements within a concentration.

Concentration in Computational Modeling (CCM)

Code	Title	Credits
OR 541	Operations Research: Deterministic Models	3
OR 635	Discrete System Simulation	3
OR 682	Computational Methods in Engineering and Statistics	3
or MATH 685	Numerical Analysis	
Select one from the following Electives:		3
CSI 744	Linear and Nonlinear Modeling in the Natural Sciences	
OR 542	Operations Research: Stochastic Models	
SYST 611	System Methodology and Modeling	
SYST 683	Modeling, Simulation, and Gaming	
ECE 521	Linear Systems and Control	
MATH 673	Dynamical Systems	
Total Credits		12

Concentration in Military Operations Research (MOR)

Certificate candidates must complete five courses, with an average grade of B or better, for a total of 15 graduate credits.

Code	Title	Credits
OR 541	Operations Research: Deterministic Models	3
OR 635	Discrete System Simulation	3
OR 651	Military Operations Research I: Cost Analysis	3
OR 652	Military Operations Research Modeling II: Effectiveness Analysis	3
SYST 683	Modeling, Simulation, and Gaming	3
Total Credits		15

Concentration in Predictive Data Analytics (PDA)

Code	Title	Credits
OR 541	Operations Research: Deterministic Models	3
OR 568	Applied Predictive Analytics	3
One from the following:		3
OR 542	Operations Research: Stochastic Models	
OR 604	Practical Optimization	
OR 635	Discrete System Simulation	
One from the following:		3
CS 504	Principles of Data Management and Mining	
CS 584	Theory and Applications of Data Mining	
Total Credits		12

Admissions & Policies

Admissions

Concentration in Architecture-Based Systems Integration (ABSI)

A bachelor's degree is required for admission to a certificate program.

Concentration in C4I & Cyber (C4IC)

The certificate with this concentration is available to students who hold bachelor's degrees in engineering and scientific disciplines or are in graduate status in such programs.

Concentration in Communications and Networking (CONE)

The certificate with this concentration in communications and networking is open to all students who hold BS degrees in scientific and engineering disciplines from accredited universities.

Concentration in Engineering Resilient Enterprise Systems (ERES)

The certificate with this concentration is available to any student who holds a bachelor's degree in an engineering or scientific discipline or has graduate status in such a program. Math requirements include MATH 113 Analytic Geometry and Calculus I (Mason Core), MATH 114 Analytic Geometry and Calculus II, or their equivalents, and a probability and statistics course.

Concentration in Financial Systems (FNSY)

The certificate with this concentration will be open to all students who hold a BS degree in scientific and engineering disciplines from an accredited university program, with a minimum GPA of 3.0. Students who are already enrolled in a master's program must submit a secondary certificate form to enroll in this certificate with concentration program; all others must apply for graduate admission to this certificate with concentration program.

Concentration in Tactical Computer Operations (TCO)

Students applying to the certificate with this concentration must hold a bachelor's degree in either computer science or computer engineering. Prospective students without these specific degrees will need to have a technical bachelor's degree and show academic competence in the areas of: C (C++, C#, Objective C), Assembler, discrete mathematics, and computer networking. An undergraduate grade point average (GPA) of 3.0 or better (4.0 scale) is required.

Policies

The Systems Engineering Graduate Certificate may be pursued on a part-time basis only.

For policies governing all graduate certificates, see AP.6.8 Requirements for Graduate Certificates.

Requirements

Certificate Requirements

Total credits: 12-15

This certificate may be pursued on a part-time basis only.

Concentration in Architecture-Based Systems Integration (ABSI)

Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/)

Coursework

The following four courses must be completed with a grade of B or better:

Code	Title	Credits
SYST 520	System Engineering Design	3
SYST 618	Model-based Systems Engineering	3
SYST 620	Discrete Event Systems	3
SYST 621	Systems Architecture Design	3
Total Credits		12

Certificate coursework within the Systems Engineering MS

In addition to the ABSI concentration courses, students must take the following six courses within the Systems Engineering, MS:

Code	Title	Credits
SYST 505	Systems Engineering Principles [1]	3
SYST 510	Systems Definition and Cost Modeling	3
SYST 530	Systems Engineering Management I	3
SYST 611	System Methodology and Modeling	3
SYST 699	Masters Project	3
Select one approved elective from the ABSI concentration		3
Total Credits		18

[1] Students who have work experience in systems engineering should consult with their advisor on replacing SYST 505 with a higher-level SYST course.

Concentration in C4I & Cyber (C4IC)

Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/)

The certificate with concentration requires 12 credits (4 courses). Students must complete the following with an average grade of B or better.

Coursework

Code	Title	Credits
SYST 680	Principles of Command, Control, Communications, Computing, and Intelligence (C4I)	3
or ECE 670	Principles of Command, Control, Communications, Computing, and Intelligence (C4I)	
OR 542	Operations Research: Stochastic Models	3
or ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
Select two from the following:		6
ECE 542	Computer Network Architectures and Protocols	
ECE 630	Statistical Communication Theory	
ECE 642	Design and Analysis of Computer Communication Networks	
OR 635	Discrete System Simulation	
SYST 584	Heterogeneous Data Fusion	
SYST 664	Bayesian Inference and Decision Theory	
SYST 683	Modeling, Simulation, and Gaming	
Total Credits		12

Completing the certificate with the C4I concentration within the Systems Engineering Master's Program

In addition to the four courses above, students must complete the following six courses:

Code	Title	Credits
SYST 505	Systems Engineering Principles	3
SYST 510	Systems Definition and Cost Modeling	3
SYST 520	System Engineering Design	3
SYST 530	Systems Engineering Management I	3
SYST 611	System Methodology and Modeling	3
SYST 699	Masters Project	3
Total Credits		18

Concentration in Communications and Networking (CONE)

Administered by the Department of Electrical and Computer Engineering (https://ece.gmu.edu/).

The certificate with a concentration in Communications and Networking is awarded on completion of five graduate courses (15 credits) in communications and networking. A cumulative GPA of 3.00 is required and one course with a grade of C at most may be applied toward the certificate. The certificate courses comprise two required foundation courses and three electives.

Coursework

Code	Title	Credits
Foundation Courses:		
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	3
ECE 542	Computer Network Architectures and Protocols	3
Total Credits		6

Electives

After completing the foundation courses, students choose electives by taking three courses from the following:

Code	Title	Credits
Select three courses from the following:		9
ECE 535	Digital Signal Processing	
ECE 565	Introduction to Optical Electronics	
ECE 567	Optical Fiber Communications	
ECE 630	Statistical Communication Theory	
ECE 633	Error Control Coding	
ECE 635	Adaptive Signal Processing	
ECE 642	Design and Analysis of Computer Communication Networks	
ECE 643	Network Switching and Routing	
ECE 646	Applied Cryptography	
ECE 731	Digital Communications	
ECE 732	Mobile Communication Systems	
ECE 734	Detection and Estimation Theory	
ECE 741	Wireless Networks	
ECE 742	High-Speed Networks	
OR 635	Discrete System Simulation	
OR 643	Network Modeling	
OR 647	Queuing Theory	
Total Credits		9

Concentration in Engineering Resilient Enterprise Systems (ERES)

Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/).

To be eligible for a certificate with concentration in Engineering Resilient Enterprise Systems, students must complete two required courses (6 credits) plus two electives (6 credits) with an average grade of B or better.

Coursework

Code	Title	Credits
SYST 523	Engineering Resilient and Agile Enterprise Systems	3
SYST 618	Model-based Systems Engineering	3
Total Credits		6

Electives

The remaining two electives must be taken from the list below with the approval of the advisor. Courses designated as basic methods courses may also be used as an elective. Some certificate electives may require stronger math requirements.

Code	Title	Credits
Electives		**6**
Select at least one course from the following:		
SYST 514	Systems Thinking	
INFS 622	Information Systems Analysis and Design	
SWE 619	Object-Oriented Software Specification and Construction	
SYST 542	Decision Support Systems Engineering	
SYST 584	Heterogeneous Data Fusion	
SYST 630	Systems Engineering Management II	
Select the second course from the courses listed above or from the following:		
CS 555	Computer Communications and Networking	
ECE 542	Computer Network Architectures and Protocols	
INFS 612	Principles and Practices of Communication Networks	
Total Credits		6

Concentration in Financial Systems (FNSY)

Administered by the Department of Systems Engineering and Operations Research (https://seor.gmu.edu/).

To be eligible for the certificate with concentration in Financial Systems Engineering, students must complete three required courses (9 credits) plus one elective (3 credits) with an average grade of B or better.

Coursework

Code	Title	Credits
SYST/OR 538	Analytics for Financial Engineering and Econometrics	3
SYST/OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	3
SYST/OR 688	Financial Systems Engineering II: Derivative Products and Risk Management	3
Total Credits		9

Elective

Code	Title	Credits
Select one from the following:		3
OR 645	Stochastic Processes	
OR 682	Computational Methods in Engineering and Statistics	
SYST 584	Heterogeneous Data Fusion	
SYST 671	Judgment and Choice Processing and Decision Making	
Total Credits		3

Concentration in Tactical Computer Operations (TCO)

Administered by the Department of Electrical and Computer Engineering (https://ece.gmu.edu/).

Students must meet prerequisites for courses by either taking the appropriate undergraduate courses or through instructor permission.

Coursework

Code	Title	Credits
CS 571	Operating Systems	3
ECE 511	Computer Architecture	3
DFOR 761	Malware Reverse Engineering	3
Total Credits		9

Electives

Code	Title	Credits
Select two courses from the following:		6
DFOR 767	Penetration Testing in Digital Forensics	
DFOR 769	Anti-Forensics	
DFOR 773	Mobile Application Forensics and Analysis	
DFOR 775	Kernel Forensics and Analysis	
ECE 646	Applied Cryptography	
ISA 564	Security Laboratory	
ISA 656	Network Security	
ISA 681	Secure Software Design and Programming	
ISA 763	Security Protocol Analysis	
Total Credits		6

Systems Engineering Minor

Banner Code: SYST

Academic Advising

2100 Nguyen Engineering Building
Fairfax Campus

Phone: 703-993-5689
Email: seor@gmu.edu
Website: https://seor.gmu.edu/

The minor in systems engineering offers an attractive complement to many undergraduate majors. Systems engineers define, design, develop, integrate, and test systems. Whereas other engineering disciplines concentrate on individual aspects of a system (electronics, ergonomics, software, etc.), systems engineers focus on the system as a whole. This minor provides students with the fundamentals of systems engineering and operations research. In these courses, students learn how to deal with the system life cycle and to use scientific methods for analyzing operations of a system or organization. The structured set of courses helps students across the technical fields prepare for the information technology work now common in public and private industry. This minor is open to all majors, and especially appropriate for students in the natural sciences, computational sciences, information technology, finance, economics, mathematics, engineering, or computer science programs.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 15

Required Courses

Code	Title	Credits
SYST 473	Decision and Risk Analysis	3
Select one from the following:		3
SYST 210	Systems Design [1]	
SYST 101	Understanding Systems Engineering [2]	
or SYST 205	Systems Engineering Principles	
Total Credits		6

1 SYST 210 cannot be counted as both a required and additional course.

2 Credit cannot be received for both SYST 101 and SYST 205.

Three Additional Courses

Code	Title	Credits
Select any three additional courses from the following. Students are encouraged to take SYST 460 and SYST 461 for technical emphasis in Aviation Systems, SYST 438 and SYST 468 for technical emphasis in Data Analytics, SYST 438 and SYST 488 for technical emphasis in Financial Engineering, and OR 441/MATH 441, OR 442/MATH 442, and OR 481/MATH 446 for technical emphasis in Operations Research.		9
SYST 130	Introduction to Computing for Digital Systems Engineering	
SYST 210	Systems Design	
SYST 220 & SYST 221	Dynamical Systems I and Systems Modeling Laboratory	
SYST 230	Object-oriented Modeling and Design	
SYST 320	Dynamical Systems II	
SYST 330	Systems Methods	
SYST 370	Systems Project Management [1]	
or SYST 371	Systems Engineering Management	
SYST 438	Analytics for Financial Engineering and Econometrics	
SYST 460	Introduction to Air Traffic Control	
SYST 461	Air Transportation System Engineering	
SYST 468	Applied Predictive Analytics	
SYST 469	Human Computer Interaction [2]	
or SYST 470	Human Factors Engineering	
SYST 488	Financial Systems Engineering	
OR 335	Discrete Systems Modeling and Simulation	
OR/MATH 441	Deterministic Operations Research	
OR/MATH 442	Stochastic Operations Research	
OR 481	Numerical Methods in Engineering	
or MATH 446	Numerical Analysis I	
Total Credits		9

1 Credit cannot be received for both SYST 370 and SYST 371.

2 Credit cannot be received for both SYST 469 and SYST 470.

Prerequisites

Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.

The program leading to the BS in Systems Engineering prepares students for a professional career in systems engineering. The program reflects the systems engineer's unique perspective, which considers all aspects of a system throughout its lifetime. Mason's systems engineering program is interdisciplinary, drawing from engineering, computer science, operations research, psychology, and economics. The core systems engineering courses tie these diverse threads to provide a global understanding of how individual engineering disciplines fit into the development of complex, large-scale systems. Students gain depth in a technical area by selecting a sequence of technical electives that constitute an emphasis. Students choose their own emphasis with the help of their advisor. A year-long senior design project provides hands-on experience in applying various systems engineering methods and tools. In the first two years, students obtain a basic foundation in mathematics, natural sciences, computing, writing, humanities, arts, and social sciences. The systems engineering program builds on this foundation, teaching theoretical knowledge, practical skills, and the ability to apply systems thinking to problems. Teamwork, collaborative learning, analytical skills, practical problem solving, and oral and written communication are strongly stressed.

Mission

The mission of the undergraduate program is to equip students with the ability to participate productively in the many professional activities associated with engineering a trustworthy system that satisfies client needs. The term "system" is interpreted broadly to include information, telecommunication, defense, health delivery, transportation, energy or manufacturing systems, as well as corporate processes.

Objectives

The program educational objectives of the Systems Engineering program are what we expect our students to attain within three to five years

of graduation. Graduates earning the Bachelor of Science degree in Systems Engineering at George Mason University will:

- Use critical thinking, quantitative methods, and systems thinking to contribute to solutions for global societal challenges.
- Apply systems engineering methods, processes, models and tools to the engineering of complex systems.
- Advance the objectives of their organizations, profession, and society in a rapidly changing world.

Accreditation

The bachelor's program in Systems Engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The requirements for the degree may be satisfied through part-time enrollment.

Admissions & Policies

Policies

Change of Major

See Change of Major for more information.

Grade Requirements

Students in the Systems Engineering, BS program must complete all mathematics, science, and VSE courses with a grade of C or better. However, students may apply for a one-time grade waiver for no more than one mathematics, science, or VSE course with grade of C- or D.

Students must also complete any course required by the program that is a prerequisite to another course applicable to the degree with a grade of C or better.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements

Total credits: 123

Mathematics and Statistics

Code	Title	Credits
MATH 113	Analytic Geometry and Calculus I (Mason Core)	4
MATH 114	Analytic Geometry and Calculus II	4
MATH 203	Linear Algebra	3
MATH 213	Analytic Geometry and Calculus III	3
MATH 214	Elementary Differential Equations	3
STAT 344	Probability and Statistics for Engineers and Scientists I	3
STAT 354	Probability and Statistics for Engineers and Scientists II	3
Total Credits		23

Natural Science

Code	Title	Credits
PHYS 160 & PHYS 161	University Physics I (Mason Core) and University Physics I Laboratory (Mason Core)	4
PHYS 260 & PHYS 261	University Physics II (Mason Core) and University Physics II Laboratory (Mason Core)	4
Select 4 credits from the following: [1]		4
PHYS 262 & PHYS 263	University Physics III (Mason Core) and University Physics III Laboratory (Mason Core)	
BIOL 213	Cell Structure and Function (Mason Core)	
CHEM 211 & CHEM 213	General Chemistry I (Mason Core) and General Chemistry Laboratory I (Mason Core)	
CHEM 271 & CHEM 272	General Chemistry for Engineers Lecture (Mason Core) and General Chemistry for Engineers Lab (Mason Core)	
Total Credits		12

[1] Students who select the Bioengineering technical emphasis area are strongly encouraged to take BIOL 213 Cell Structure and Function (Mason Core). Students who select the Environmental Engineering technical emphasis area are strongly encouraged to take Chemistry. Both lecture and laboratory must belong to the same natural science subject. Students are not permitted to take PHYS 262 University Physics III (Mason Core) and CHEM 213 General Chemistry Laboratory I (Mason Core) or CHEM 211 General Chemistry I (Mason Core) and PHYS 263 University Physics III Laboratory (Mason Core). Both lecture and laboratory must belong to the same natural science subject.

Computing

Code	Title	Credits
Select from options below:		7
SYST 130	Introduction to Computing for Digital Systems Engineering	
or CDS 130	Computing for Scientists	
or CS 112	Introduction to Computer Programming	
or ENGR 125T	Introduction to Engineering Methods - Transfer

Cyber Security Engineering

Code	Title	Credits
CYSE 211	Operating Systems and Lab	3
CYSE 430	Critical Infrastructure Protection	3
And choose one of the following:		3
CYSE 460	Power Systems and Smart Grid Security	
CYSE 465	Transportation Systems Design	
CYSE 470	Human Factors and Cyber Security Engineering	
CYSE 477	Intrusion Detection	
Total Credits		9

Data Analytics

Code	Title	Credits
SYST 468	Applied Predictive Analytics	3
IT 214	Database Fundamentals	3
STAT 463	Introduction to Exploratory Data Analysis	3
or SYST 438	Analytics for Financial Engineering and Econometrics	
Total Credits		9

Environmental Engineering

Code	Title	Credits
CEIE 240	Hydraulics	3
CEIE 355	Environmental Engineering and Science	3
CEIE 450	Environmental Engineering Systems	3
or CEIE 453	Water and Wastewater Treatment Processes	
Total Credits		9

Financial Engineering

Code	Title	Credits
SYST 438	Analytics for Financial Engineering and Econometrics	3
SYST 488	Financial Systems Engineering	3
And choose one of the following:		3
STAT 463	Introduction to Exploratory Data Analysis	
STAT 455	Experimental Design	
SYST 468	Applied Predictive Analytics	
MBUS 304	Entrepreneurship: Starting and Managing a New Enterprise	
Total Credits		9

Mechanical Engineering

Code	Title	Credits
Select one of the following options:		9
Option 1: Mechanical Design		
ME 211	Statics	
or CEIE 210	Statics	
ME 212	Solid Mechanics	
or CEIE 310	Mechanics of Materials	
ME 341	Design of Mechanical Elements	
or ME 231	Dynamics	
Option 2: Thermal Fluids		
ME 221	Thermodynamics	
ME 322	Fluid Mechanics	
ME 323	Heat Transfer	
or ME 342	Design of Thermal Systems	
Some of the courses listed above have additional prerequisites. Students should pay careful attention to prerequisites when selecting courses.		
Total Credits		9

Operations Research

Code	Title	Credits
OR 481	Numerical Methods in Engineering	3
SYST 420	Network Analysis	3
SYST 468	Applied Predictive Analytics	3
Total Credits		9

Software-Intensive Systems

Code	Title	Credits
CS 310	Data Structures	3
CS 321	Software Engineering	3
CS 332	Object-Oriented Software Design and Implementation	3
CS 310 listed above requires CS 112 and CS 211 computing sequence. Students should pay careful attention to prerequisites when selecting courses.		
Total Credits		9

Synthesis Requirement

Mason's synthesis requirement for systems engineering majors is satisfied by successful completion of SYST 495 Senior Design Project II (Mason Core). Students who do not pass SYST 495 Senior Design Project II (Mason Core) with a C or better must retake both SYST 490 Senior Design Project I and SYST 495 Senior Design Project II (Mason Core).

Writing-Intensive Requirement

Mason's writing-intensive requirement for systems engineering majors is satisfied by successful completion of SYST 489 Senior Seminar.

Advising and Plan of Study

All systems engineering students are assigned a faculty advisor. With the advisor's help and approval, each student is required to complete a plan of study. This plan of study, which is available from the SEOR office, constitutes a learning plan for the degree program and must be signed by the student's advisor and the Department Chair. The plan of study must be updated and signed by the advisor at least once per year.

4-Year Plan

Bachelor of Science in Systems Engineering Sample Plan of Study

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Accelerated Master's

BS (selected)/Statistical Science, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program (BAM) and obtain an undergraduate BS degree and the Statistical Science, MS in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

BAM Pathway Admission Requirements

No specific undergraduate BS degree is required. Students enrolled in any BS degree may apply to the accelerated Statistical Science, MS program **if such an accelerated** Statistical Science, MS **pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs.**

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of 3.0.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific prerequisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Statistical Science, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Completion of Mason's requirements for undergraduate degree conferral (graduation) and completion of application for graduation.
- An overall GPA of 3.00.
- Completion of the following Mason courses each with a grade of C or better.

Code	Title	Credits
MATH 213	Analytic Geometry and Calculus III	3
MATH 203	Linear Algebra	3
or MATH 321	Abstract Algebra	
STAT 250	Introductory Statistics I (Mason Core)	3
or STAT 344	Probability and Statistics for Engineers and Scientists I	
STAT 346	Probability for Engineers	3
or MATH 351	Probability	
STAT 362	Introduction to Computer Statistical Packages	3

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, students complete all credits satisfying degree requirements for the BS and MS programs, with up to twelve credits overlap chosen from the following graduate courses:

Code	Title	Credits
STAT 544	Applied Probability	3
STAT 554	Applied Statistics I	3
STAT 560	Biostatistical Methods	3
STAT 574	Survey Sampling I	3
STAT 663	Statistical Graphics and Data Exploration I	3

All graduate course prerequisites must be completed prior to enrollment. Each graduate course must be completed with a grade of B or better to apply toward the MS degree.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Systems Engineering, BS/Data Analytics Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Systems Engineering, BS and a Data Analytics Engineering, MS in an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Systems Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.0.

For the predictive analytics and financial engineering concentrations, students must submit evidence of:

- Satisfactory completion of courses in calculus, applied probability and statistics, and a scientific programming language.
- Familiarity with analytical modeling software, such as spreadsheets or math packages.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

Students already admitted in the BAM Pathway will be admitted to the Data Analytics Engineering, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.0
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

These courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may *not* be applied toward the Systems Engineering, MS.

Undergraduate	Graduate	
SYST 473	SYST 573	This course applies to only certain concentrations; Credit may not be received for both courses.
OR 441	OR 541	Satisfies OR 531 core requirement in the graduate program. Credit may not be received for both courses.
SYST 438	SYST 538	This course applies to only certain concentrations; Credit may not be received for both courses
SYST 468	SYST 568	This course applies to only certain concentrations; Credit may not be received for both courses
SYST 488	SYST 588	This course applies to only certain concentrations; Credit may not be received for both courses

For the predictive analytics and financial engineering concentration, any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

OR 541 Operations Research: Deterministic Models will substitute for the OR 531 Analytics and Decision Analysis core requirement in the MS DAE program. Students Bachelor of Science in Systems Engineering program are not permitted to take OR 531 Analytics and Decision Analysis.

Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Systems Engineering BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Systems Engineering, BS and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Systems Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

These courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may *not* be applied toward the Operations Research, MS.

Undergraduate	Graduate	
SYST 420	SYST 521/OR 643	Credit may not be received for both courses.
SYST 473	SYST 573	Credit may not be received for both courses.
OR 441	OR 541	Core course in the graduate program. Credit may not be received for both courses.
OR 442	OR 542	Core course in the graduate program. Credit may not be received for both courses.
SYST 438	SYST 538	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.
SYST 468	OR/SYST 568	Core course in the graduate program. Credit may not be received for both courses.
SYST 488	SYST 588	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair. Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at

the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Systems Engineering BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Systems Engineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Systems Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

These courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may *not* be applied toward the Systems Engineering, MS.

Undergraduate	Graduate	
SYST 420	SYST 521/OR 643	Credit may not be received for both courses.
SYST 473	SYST 573	Credit may not be received for both courses.
OR 441	OR 541	Credit may not be received for both courses.
OR 442	OR 542	Credit may not be received for both courses.
SYST 438	SYST 538	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.
SYST 468	SYST/OR 568	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.
SYST 488	SYST 588	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.

Any course chosen from the above course list may be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair. Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

Systems Engineering, BS/ Telecommunications, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Systems Engineering, BS and a Telecommunications, MS in an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Students in the Systems Engineering, BS program who preferably have chosen to take the systems engineering of telecommunications elective sequence will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.0, and completed all MATH and PHYS requirements. Other students will be considered on their individual merit.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Telecommunications, MS program. Students already admitted in the BAM Pathway will be admitted to the Telecommunications, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.0
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

These courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the BS program. The undergraduate version of these courses, if any, may *not* be applied toward the Telecommunications, MS.

Code	Title	Credits
TCOM 500	Modern Telecommunications	3
TCOM 535	The TCP/IP Suite of Internet Protocols	3
OR 541	Operations Research: Deterministic Models	3
SYST 530	Systems Engineering Management I	3
SYST 573	Decision and Risk Analysis (if taken, replaces TCOM 521 in the telecommunications core requirements)	3

Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Website: https://seor.gmu.edu/

Systems engineers are the visionaries who take a global perspective of the system. Whereas discipline-specific engineers deal with system components, the systems engineer is concerned with the integration of these components and the overall success of the system throughout its life cycle. Systems engineers focus on needs and requirements, design, production, deployment, operation, maintenance, refinement, and retirement of systems, considering multiple objectives and constraints from different stakeholder groups. Systems engineering comprises product, process, and resource management and focuses on architecture, human factors, decision support, performance and evaluation, and management. Our educational and research program reflects the systems engineer's unique perspective on the system life cycle.

Mason's graduate program in Systems Engineering recognizes the importance of balancing an education in quantitative models and engineering tools with a proper understanding of the systems perspective. Concentration areas include Advanced Transportation Systems (ATS), Architecture-Based Systems Integration (ABSI), Command, Control, Communications, Computing, and Intelligence (C4I), Energy Systems (NRGS), Financial Systems Engineering (FNSE), Systems Engineering and Data Analytics (SEDA), Systems Engineering of Software-Intensive Systems (SESI) and Systems Management (SMG).

The graduate program leading to the Master of Science in Systems Engineering emphasizes both analytical and practical aspects of engineering complex systems. Students are expected to demonstrate proficiency in using qualitative and quantitative tools relevant to systems engineering practice. The program also prepares students for careers in research and development and for pursuing advanced graduate study leading to the PhD degree in Systems Engineering and Operations Research (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-operations-research-phd/).

Admissions & Policies

Admissions

Foundation and Admission Requirements

Each applicant for the MS program should meet the following entrance requirements:

1. Have a baccalaureate degree from an accredited institution in engineering, mathematics, computer science, physical sciences, economics, or a related field.
2. Have completed courses in multivariate calculus, matrix algebra, differential equations, applied probability and statistics, and a computer language.
3. Provide evidence of satisfactory educational achievement in at least one of the following forms: a GPA of at least 3.00 as an undergraduate or an acceptable GPA in graduate courses. International students must also achieve satisfactory scores on the Graduate Record Examination (GRE).
4. Have achieved a satisfactory score on the TOEFL examination for non-native English speakers.
5. Have two letters of recommendation submitted by former professors or supervisors.

Policies

Advising & Plan of Study

All entering systems engineering students should attend an orientation meeting. Each student is assigned a faculty advisor upon acceptance. Students must meet with their advisors during their first semester and design an approved plan of study. Students are encouraged to seek out their advisor when questions arise and when their plan of study needs to be revised. Any changes to the plan of study must be approved by the faculty advisor and remain on file with the department. Selection of a concentration (if any) within the program must be submitted to the Registrar, with departmental approval, via formal paperwork. It is the student's responsibility to ensure that their intended concentration is reflected on their transcript prior to graduation.

Requirements

Degree Requirements

Total credits: 30-33

To obtain the Master of Science degree, students must complete a minimum of 30 semester hours of graduate level courses that consists of five core courses, three concentration courses, an elective, and a systems engineering project.

Students must have a working background in engineering mathematics and computer systems. A student lacking these foundations may be required to take one or more foundation courses. The department offers SYST 500 Quantitative Foundations for Systems Engineering as an intensive review of undergraduate engineering mathematics, including matrix algebra, calculus, differential equations, probability and statistics. Students who have not completed a two-semester calculus sequence and matrix algebra will be required to complete these courses prior to taking SYST 500.

Approved basic methods and concentration courses for the eight concentration areas are listed below. Students are expected to select a set of concentration courses that constitute a clearly defined focus. These courses must be approved by the student's advisor. Each student is required to have a current plan of study on file with the Systems Engineering and Operations Research Department.

Candidates for the MS must have a minimum GPA of 3.00 in coursework applied to the degree, which may include no more than 6 credits of C. The GPA calculation excludes all transfer courses and Mason nondegree studies credits not formally approved for the degree.

Core Courses

Code	Title	Credits
Students must complete the following five courses:		15
SYST 505	Systems Engineering Principles [1]	
SYST 510	Systems Definition and Cost Modeling	
SYST 520	System Engineering Design	
SYST 530	Systems Engineering Management I	
SYST 611	System Methodology and Modeling	
Total Credits		15

[1] SYST 505 may be replaced by an approved elective for students who have work experience in systems engineering or who have been enrolled in the undergraduate BSSE program at Mason. SYST 505, if taken, must be taken in the first semester of enrollment in the MSSE program.

Project or Thesis (Optional)

Students must complete three credit hours of SYST 699 Masters Project. Students in this course work in teams on an approved applied project. A project report is submitted at the end of the semester, and a final project presentation is made to the entire faculty of the SEOR Department.

Students with the consent of a faculty advisor and departmental approval, may be approved to complete a thesis.

Code	Title	Credits
SYST 699	Masters Project	3
Total Credits		3

Basic Methods Course

Code	Title	Credits
Select one course from the following: [1]		3
OR 531	Analytics and Decision Analysis	
OR 541	Operations Research: Deterministic Models	
OR 542	Operations Research: Stochastic Models	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 563	Evidence-Based Systems Engineering	
SYST 568	Applied Predictive Analytics	
or OR 568	Applied Predictive Analytics	
SYST 573	Decision and Risk Analysis	
SYST 620	Discrete Event Systems	
SYST 664	Bayesian Inference and Decision Theory	
Total Credits		3

[1] Students must complete one basic methods course. The choice of basic methods course may depend on the student's concentration and must be selected from the list above.

Concentrations

Students must complete 3 courses (9 credits) from their area of emphasis. Students may select one of the following eight areas of concentration, or may create their own emphasis area with the approval of their advisor and the Department Chair

- Advanced Transportation Systems (ATS)
- Architecture-Based Systems Integration (ABSI)
- Command, Control, Communications, Computing, and Intelligence (C4I)
- Energy Systems (NRGS)
- Financial Systems Engineering (FNSE)
- Systems Engineering and Data Analytics (SEDA)
- Systems Engineering of Software-Intensive Systems (SESI)
- Systems Management (SMG)

Concentration in Advanced Transportation Systems (ATS)

The air transportation system is among the most complex networked systems. This concentration is designed to provide students with the skills to address the next generation of challenges of the air transportation system. Topics addressed include congestion and safety of the national air space, economic and human factors, impact of technology innovation, and public policy. The program emphasizes design, modeling, and analysis to support decision making for government and the aviation industry.

Code	Title	Credits
Required Coursework		
SYST 560	Introduction to Air Traffic Control	3
SYST 660	Air Transportation Systems Modeling	3
Select one from the following:		3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
OR 531	Analytics and Decision Analysis	
OR 541	Operations Research: Deterministic Models	
OR 542	Operations Research: Stochastic Models	
OR 568	Applied Predictive Analytics	
or SYST 568	Applied Predictive Analytics	
SYST 563	Evidence-Based Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 620	Discrete Event Systems	
SYST 664	Bayesian Inference and Decision Theory	
One free elective, chosen under advisement:		3
Total Credits		12

Concentration in Architecture-Based Systems Integration (ABSI)

There is much interest today in the engineering of systems that comprise other component systems, where each of the component systems serves organizational and human purposes. These systems families are often categorized as systems of systems, federations of systems, or coalitions of systems. The design of architectures is a major ingredient in the design of systems families. Furthermore, it provides the conceptual basis for achieving system integration. This concentration covers the formulation of the system integration problem, definition of architecture frameworks, use of structured analysis and object-oriented methodologies for the design of architectures, modeling and simulation for the evaluation of architectures, and approaches to integration. Both defense and industrial applications are considered.

Code	Title	Credits
Required Coursework		
SYST 618	Model-based Systems Engineering	3
SYST 621	Systems Architecture Design	3
Select one of the following basic methods course:		3
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
OR 531	Analytics and Decision Analysis	
OR 541	Operations Research: Deterministic Models

OR 568	Applied Predictive Analytics	
or SYST 568	Applied Predictive Analytics	
SYST 563	Evidence-Based Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 620	Discrete Event Systems	
SYST 664	Bayesian Inference and Decision Theory	
One free elective, chosen under advisement		3
Total Credits		12

Concentration in Command, Control, Communications, Computing, and Intelligence (C4I)

C4I systems are concerned with gathering, retrieving, analyzing, and disseminating time-sensitive information to achieve mission-critical objectives. These systems support military operations across the spectrum of conflict, intelligence operations, transportation monitoring, emergency response, drug interdiction, and law enforcement, among others. C4I systems include the equipment, people, and procedures necessary to accomplish the mission. The equipment may include a variety of sensors, communications systems, and information processing and decision-support systems.

The program focuses on the analysis, design, development, and management of C4I systems. Topics addressed include C4I architectures and software, communications, decision support, modeling and simulation, and sensor data fusion.

Code	Title	Credits

OR 542	Operations Research: Stochastic Models	3
or ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
SYST 584	Heterogeneous Data Fusion	3
One free elective, chosen under advisement:		3
Total Credits		12

Concentration in Energy Systems (NRGS)

With the rising economic and environmental costs to power homes, businesses and the transportation systems that move people and goods from place to place, innovative solutions are required to meet the world's expanding energy needs. Students completing the energy systems concentration will build upon a foundation in systems engineering design by incorporating physical principles of thermal fluid energy transfer into system models. Students will develop the tools to model and analyze generation, transmission, and utilization systems in steady and dynamic operation. Students will optimize these systems by considering physical principles, economics, local policy and security concerns. Graduates will be able to apply their expertise to work with: traditional power generation facilities; renewable energy integration; national, local, and smart grids; mechanical and electrical energy storage systems; utilization of energy in building and transportation systems.

Code	Title	Credits
Required Coursework		
ME 521	Energy Transfer	3
ME 531	Energy Transmission	3
ME 541	Power Generation	3
One free elective, chosen under advisement:		3
Total Credits		12

Concentration in Financial Systems Engineering (FNSE)

Financial engineering is a cross-disciplinary field which relies on mathematical finance, numerical methods, and computer simulations to make trading, hedging, and investment decisions, as well as facilitating the risk management of those decisions. While mathematics is indispensable in financial engineering, the concentration will try best to focus on the concepts and ideas of finance, while limiting the math within a scope acceptable to most students in engineering.

Code	Title	Credits
Required Coursework		
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	3
Basic methods course:		
SYST 538	Analytics for Financial Engineering and Econometrics	3
One technical elective, chosen from below		3
SYST 548	Technologies and Security for Cryptocurrencies and Financial Transactions	3
SYST 688	Financial Systems Engineering II: Derivative Products and Risk Management	3
Total Credits		15

Concentration in Systems Engineering and Data Analytics (SEDA)

Systems engineers must address a broad range of issues relevant to the design, implementation, analysis, and management of systems. This concentration provides methodological tools that can be applied to the systems engineering process. Areas of focus include decision support systems, distributed intelligent systems, knowledge-based planning systems, network systems, probabilistic reasoning systems, sensor fusion systems, and optimization methods.

Code	Title	Credits
Required Coursework		
OR 531	Analytics and Decision Analysis	3
SYST 568	Applied Predictive Analytics	3
SYST 573	Decision and Risk Analysis	3
One free elective, chosen under advisement:		3
Total Credits		12

Concentration in Systems Engineering of Software-Intensive Systems (SESI)

This concentration addresses the software component of the systems engineering life cycle. It specifically covers the allocation of system requirements to software. Practitioners are concerned with the theoretical and practical aspects of technology, cost, and the social effect of computer systems that are reliable, maintainable, secure, efficient,

and cost effective. The program emphasizes the integration of hardware, software, and firmware, and the management of these complex computer systems over their life cycle through systems engineering methods, tools, and processes.

Code	Title	Credits
Required Coursework		
SYST 542	Decision Support Systems Engineering	3
SYST 618	Model-based Systems Engineering	3
One from the following:		3

or SYST 568	Applied Predictive Analytics	
SYST 563	Evidence-Based Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 620	Discrete Event Systems	
SYST 664	Bayesian Inference and Decision Theory	
One free elective, chosen under advisement:		3
Total Credits		12

Concentration in Systems Management (SMG)

The management aspect of systems engineering involves tracking and control of system development through the major phases of the system lifecycle, identifying and resolving problems to minimize their effect on cost, schedule, or performance, and iteratively improving product and process. This concentration emphasizes the theory and practice of systems management and prepares students for careers in management.

Online MS in Systems Engineering

The graduate program leading to the Master of Science in Systems Engineering can be completed entirely online. The delivery mode for the online program is asynchronous, but many courses are also offered in synchronous mode. Students may also plan a program with some courses taken online and some in the classroom. The following courses are offered online at least once a year: SYST 500 Quantitative Foundations for Systems Engineering, SYST 505 Systems Engineering Principles, SYST 510 Systems Definition and Cost Modeling, SYST 520 System Engineering Design, SYST 530 Systems Engineering Management I, SYST 542 Decision Support Systems Engineering, SYST 573 Decision and Risk Analysis, SYST 611 System Methodology and Modeling, SYST 618 Model-based Systems Engineering, SYST 620 Discrete Event Systems, SYST 621 Systems Architecture Design, SYST 630 Systems Engineering Management II, SYST 699 Masters Project, OR 531 Analytics and Decision Analysis, OR 541 Operations Research: Deterministic Models and OR 542 Operations Research: Stochastic Models.

Accelerated Master's

Bioengineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Bioengineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 140 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Bioengineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Bioengineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Bioengineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select from the following Bioengineering courses:

Code	Title	Credits
Required course:		
BENG 575	Intellectual Property, Regulatory Concepts and Product Development	
Select at most one from the following Bioengineering courses:		
BENG 501	Bioengineering Research Methods	
BENG 514	Pathophysiology and the Role of New Technologies in Human Diseases	
BENG 520	Biomedical Data Analytics	
BENG 521	Cell and Tissue Engineering	
or BENG 541	Biomaterials	
BENG 526	Neural Engineering	
BENG 537	Medical Image Processing	
or BENG 538	Medical Imaging	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 510	Systems Definition and Cost Modeling (Core)	
SYST 514	Systems Thinking	
SYST 520	System Engineering Design (Core)	
SYST 530	Systems Engineering Management I (Core)	
SYST 542	Decision Support Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 560	Introduction to Air Traffic Control	
SYST 563	Evidence-Based Systems Engineering	
SYST 568	Applied Predictive Analytics	
SYST 584	Heterogeneous Data Fusion	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Civil and Infrastructure Engineering, BS/ Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Civil and Infrastructure Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-bs/) and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Civil and Infrastructure Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-bs/) students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Civil and Infrastructure Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Civil and Infrastructure Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Civil and Infrastructure Engineering courses:

Code	Title	Credits
CEIE 501	Sustainable Development	
CEIE 512	Structural Steel Design	
CEIE 532	Foundation Design	
CEIE 535	Engineering Geology	
CEIE 540	Water Supply and Distribution	
CEIE 542	Open Channel Flow	
CEIE 550	Environmental Engineering Systems	
CEIE 553	Water and Wastewater Treatment Processes

CEIE 571	Construction Administration	
CEIE 572	Building Information Modeling	
CEIE 573	Legal Aspects of the Construction Process	
CEIE 574	Construction Computer Application and Informatics	
CEIE 576	Construction Cost Estimating	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 510	Systems Definition and Cost Modeling (Core)	
SYST 514	Systems Thinking	
SYST 520	System Engineering Design (Core)	
SYST 530	Systems Engineering Management I (Core)	
SYST 542	Decision Support Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 560	Introduction to Air Traffic Control	
SYST 563	Evidence-Based Systems Engineering	
SYST 568	Applied Predictive Analytics	
SYST 584	Heterogeneous Data Fusion	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Computer Engineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Computer Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH, PHYS 160/161, and PHYS 260/261 requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Electrical and Computer Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Electrical and Computer Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Note that ECE 542 can be used to meet the ECE 465 requirement for the Computer Engineering, BS program. Students are highly recommended to select courses marked as core courses because it applies to the master's degree

regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.

- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Electrical and Computer Engineering courses:

Code	Title	Credits
ECE 505	Hardware Security	
ECE 508	Internet of Things	
ECE 510	Real-Time Concepts	
ECE 511	Computer Architecture	
ECE 512	Computer Architecture Security	
ECE 516	Mobile Systems and Applications	
ECE 521	Linear Systems and Control	
ECE 527	Learning From Data	
ECE 528	Introduction to Random Processes in Electrical and Computer Engineering	
ECE 530	Sensor Engineering	
ECE 531	Introduction to Wireless Communications and Networks	
ECE 535	Digital Signal Processing	
ECE 542	Computer Network Architectures and Protocols	
ECE 545	Digital System Design with VHDL	
ECE 567	Optical Fiber Communications	
ECE 580	Small Spacecraft Engineering	
ECE 590	Selected Topics in Engineering	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 510	Systems Definition and Cost Modeling (Core)	
SYST 520	System Engineering Design (Core)	
SYST 530	Systems Engineering Management I (Core)	
SYST 542	Decision Support Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 568	Applied Predictive Analytics	
SYST 584	Heterogeneous Data Fusion	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Computer Science, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Computer Science, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Computer Science, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an

overall GPA of at least 3.3, and completion of all MATH and Science requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Computer Science course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Computer Science course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Computer Science courses:

Code	Title	Credits
CS 540	Language Processors	
CS 550	Database Systems	
CS 551	Computer Graphics	
CS 555	Computer Communications and Networking	
CS 571	Operating Systems	
CS 580	Introduction to Artificial Intelligence	
CS 583	Analysis of Algorithms	
CS 584	Theory and Applications of Data Mining	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
OR 541	Operations Research: Deterministic Models	
OR 542	Operations Research: Stochastic Models	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Cyber Security Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Cyber Security Engineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 144 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Mechanical Engineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Mechanical Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Mechanical Engineering course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Mechanical Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Mechanical Engineering courses:

Code	Title	Credits
ME 521	Energy Transfer	
ME 531	Energy Transmission	
ME 541	Power Generation	
ME 542	Energy Utilization	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 510	Systems Definition and Cost Modeling (Core)	
SYST 514	Systems Thinking	
SYST 520	System Engineering Design (Core)	
SYST 530	Systems Engineering Management I (Core)	
SYST 542	Decision Support Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 560	Introduction to Air Traffic Control	
SYST 563	Evidence-Based Systems Engineering	
SYST 568	Applied Predictive Analytics	
SYST 584	Heterogeneous Data Fusion	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Statistics, BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Statistics, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate

degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Statistics, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the combined Statistics course list and Systems Engineering and Operations Research course list given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Statistics course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select from the following Statistics courses:

Code	Title	Credits
STAT 544	Applied Probability	
STAT 554	Applied Statistics I	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST/OR 568	Applied Predictive Analytics	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	
OR 541	Operations Research: Deterministic Models	
OR 542	Operations Research: Stochastic Models	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Systems Engineering BS/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Systems Engineering, BS and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in

an accelerated time-frame after satisfactory completion of a minimum of 141 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Systems Engineering, BS students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree.

These courses may be chosen from the list of graduate courses in the following table. For Systems Engineering, BS students, these graduate courses replace the corresponding undergraduate courses listed in the table. The undergraduate version of these courses may *not* be applied toward the Systems Engineering, MS.

Undergraduate	Graduate	
SYST 420	SYST 521/OR 643	Credit may not be received for both courses.
SYST 473	SYST 573	Credit may not be received for both courses.
OR 441	OR 541	Credit may not be received for both courses.
OR 442	OR 542	Credit may not be received for both courses.
SYST 438	SYST 538	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.
SYST 468	SYST/OR 568	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.
SYST 488	SYST 588	The course applies only to certain concentrations in the graduate program; credit may not be received for both courses.

Any course chosen from the above course list may be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair. Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and Graduate

Recruitment and Enrollment Services. At the completion of MS requirements, a master's degree is conferred.

BS (selected)/Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in their major and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 138 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Mason undergraduate students majoring in both engineering and non-engineering disciplines will be considered for admission into the BAM Pathway if 1) such an accelerated Systems Engineering, MS pathway is allowable from the student's BS program, which will be determined by the academic advisors of both the BS and MS programs and by the SEOR department chair, 2) they have completed of a minimum of 60 credits with an overall GPA of at least 3.3, and 3) they have completed all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from the course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

The courses may be chosen from the list of Systems Engineering and Operations Research graduate courses in the following table.

Code	Title	Credits
SYST 510	Systems Definition and Cost Modeling (Core)	
SYST 514	Systems Thinking	
SYST 520	System Engineering Design (Core)	
SYST 530	Systems Engineering Management I (Core)	
SYST 542	Decision Support Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 560	Introduction to Air Traffic Control	
SYST 563	Evidence-Based Systems Engineering	
SYST 568	Applied Predictive Analytics	
SYST 584	Heterogeneous Data Fusion	

SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives

Any other 500-level course may be applied to both the undergraduate and graduate degrees with approval of the advisor and SEOR department chair.

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Website: https://seor.gmu.edu/

This doctoral program offers a unique integration of systems engineering and operations research. This integration gives students a strong analytical and computational capability combined with an overarching systems perspective that is well-grounded in application. No other department in the nation offers a PhD degree program that covers systems engineering and operations research in this integrated manner. The program prepares students for leadership positions in research and development in government, industry, and academia.

Admissions & Policies

Admissions

All general Mason and specific Volgenau School admissions requirements apply. Candidates for the PhD program typically must hold an MS degree from an accredited institution of higher education in systems engineering, operations research or related areas in engineering, mathematics, and computer science with a minimum graduate GPA of 3.50 and a minimum undergraduate GPA of 3.00. In addition, well-qualified candidates holding a BS degree in these areas may apply directly to the PhD program.

All applicants should have a strong background in engineering mathematics, which includes three semesters of calculus, differential equations, linear algebra, and probability. In addition, students entering the doctoral program must have a sound working knowledge in computing.

The admission process involves submitting the application for admission, undergraduate and graduate transcripts from previous colleges and universities attended, GRE test results, three letters of reference, a résumé and a statement of career goals and aspirations, and a self-assessment of past background. Translations of international credentials must be provided if they are not in English; in some cases, applicants will be required to have documents evaluated by an external agency. A satisfactory score on the TOEFL examination is required for non-native English speakers. All of an applicant's background is examined before an admission decision is made.

Policies

For policies governing all graduate programs, see AP.6 Graduate Policies.

Program Requirements

The program includes: course requirements; a qualifying exam that tests fundamental concepts in systems engineering and operations research; a comprehensive exam that tests the research competency of the student; dissertation proposal defense; dissertation research; and dissertation pre-defense and defense. All general Mason and specific Volgenau School requirements apply to this program.

PhD dissertations are extremely time intensive, and successful completion requires full time focus. It is expected that students who have reached candidacy (that is, successfully presented their dissertation proposal) will spend full time on their research for at least one academic year and will attend the majority of the SEOR departmental seminars throughout that period.

Reduction of Credit

The doctoral program is a 72 credit hour program; however, students entering with a master's degree in a related discipline may be given a reduction of credit up to 24 hours. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

The 72 hours of required doctoral-level credits typically consist of 48 credits of coursework and 24 credits of dissertation research. Students who receive a reduction of credit will complete a minimum of 48 credits as outlined in Degree Requirements.

All decisions concerning the student's course requirements and plan of study must be approved by the dissertation committee chair, as well as by the department's doctoral coordinator.

Requirements

Degree Requirements

Total credits: 72

Doctoral Coursework

A GPA of 3.50 is required, and no grade of C is allowed in doctoral coursework. Students lacking prerequisites for their courses or lacking

the coursework to complete the qualifying exams or their dissertation may need to take additional courses.

Code	Title	Credits
OR 568	Applied Predictive Analytics	3
or SYST 568	Applied Predictive Analytics	
SYST 763	Research Methods in Systems Engineering and Information Technology	3
Select 12 credits of 700-level SEOR approved courses [1,2]		12
Select 6 credits in SYST or OR courses numbered 600 or higher [2,3]		6
SYST Courses		
OR Courses		
SEOR 800	Systems Engineering and Operations Research Colloquium I [4]	0
Total Credits		24

1. A list of approved courses is available from the department
2. No more than 3 credits are allowed for a directed reading course. All courses and course substitutions must be approved by the student's dissertation committee chair and the SEOR doctoral coordinator.
3. Excluding SYST 699 Masters Project and OR 699 Masters Project
4. Students must register the 0-credit SEOR 800 Systems Engineering and Operations Research Colloquium I 3 times before being able to take SEOR 997 Systems Engineering and Operations Research Colloquium II .

Additional Coursework Requirements

Students entering without a master's degree are required to complete an additional 24 credits of Master's level courses, including the following:

Code	Title	Credits
SYST 505	Systems Engineering Principles	3
SYST 520	System Engineering Design	3
OR 541	Operations Research: Deterministic Models	3
OR 542	Operations Research: Stochastic Models	3
Select 12 additional credits from one of two alternatives (systems engineering or operations research) [1]		12
Total Credits		24

1. Consult the SEOR Department for the list of allowable courses.

Note

With appropriate selection of courses, students may obtain the MS degree in systems engineering or operations research by completing 6 additional credits, including 3 approved credits from the advanced emphasis courses (which may also apply towards the PhD degree advanced emphasis requirements) and 3 credits of either SYST 699 Masters Project or OR 699 Masters Project. Consult the SEOR Department for further detail. Credits taken in the courses SYST 699 or OR 699 may not be applied towards the PhD degree program requirements.

Qualifying Exams

The exams are primarily for testing the students' familiarity with fundamental concepts. Each student must take the following four exams within two years of enrolling in the program:

- Systems Engineering Principles
- Systems Engineering Design
- Deterministic Models
- Stochastic Models

A student who passes three of the four exams in the first attempt must retake and pass the failed exam within one year. A student who passes fewer than three exams in the first attempt must retake and pass an entire set of four exams within one year. After two unsuccessful attempts, a student is dismissed from the PhD program.

Systems Engineering and Operations Research Colloquium II

Code	Title	Credits
SEOR 997	Systems Engineering and Operations Research Colloquium II [1]	3

1. SEOR 997 Systems Engineering and Operations Research Colloquium II must be taken after coursework is completed, after three semesters of SEOR 800 Systems Engineering and Operations Research Colloquium I are completed, and along with SEOR 998 Doctoral Dissertation Proposal. Students should also have a dissertation advisor and a dissertation topic prior to registering. The colloquium presentation in SEOR 997 must be given at least one month prior to the proposal defense.

Dissertation Research

Code	Title	Credits
Select 21 credits from the following:		21
SEOR 998	Doctoral Dissertation Proposal	
SEOR 999	Doctoral Dissertation (must complete a minimum of 12 credits)	
Total Credits		21

Doctoral Supervisory Committee

Students should identify a potential dissertation director and approach them to see if they are willing to work together, and identify a doctoral supervisory committee as soon as possible. It is recommended that the committee be formed by the end of the second or third semester of study. The dissertation director must be a member of the SEOR graduate faculty or a member of the Mason graduate faculty with approval from the SEOR department chair. The doctoral supervisory committee must include at least three members from the SEOR department-approved graduate faculty, and at least one non-SEOR member from the Mason graduate faculty. The composition of the doctoral supervisory committee is to be approved by the doctoral coordinator. At least four members of the committee must be members of the Mason graduate faculty.

Comprehensive Exam

The comprehensive exam is taken after the student has satisfactorily completed all the advanced emphasis coursework requirements in the approved plan of study filed by the student. The examiners will include the supervisory committee plus any outside examiners considered appropriate. However, the supervisory committee determines whether the student passes or not. The comprehensive exam consists of a written examination of 8 hours in length and an oral examination. The committee will determine if the student has a mastery of the advanced emphasis coursework. If a student fails the comprehensive exam, the student may request a re-examination within 60 days of receiving notice of the exam result. The request should be made in writing to the doctoral

coordinator. If the student fails the re-examination or does not request a re-examination within 60 days, the student may be terminated from the PhD program. In such a case, with recommendation of the supervisory committee and approval of the SEOR Chair, the student may apply his/her coursework towards a master's degree.

Dissertation Proposal

After passing the comprehensive exam, each doctoral student prepares a written dissertation proposal, which is presented to the doctoral supervisory committee. After successfully completing SEOR 997 Systems Engineering and Operations Research Colloquium II , this requirement, and with the dissertation supervisory committee's recommendation, the student is formally admitted as a candidate for the PhD degree.

Dissertation Defense

When the central portions of the research have been completed to the point where the student is able to describe the original contributions of the dissertation effort, a candidate submits the written dissertation to the supervisory committee and schedules an oral predefense with the committee. The predefense is attended by the supervisory committee. The supervisory committee must approve the work or the student must schedule a second predefense.

Once the committee believes the student is ready, a final public oral defense may be scheduled no sooner than one month after the conclusion of the predefense, with an announcement posted for at least two weeks. The defense must be attended by the supervisory committee and the department's doctoral coordinator, unless an exception has been approved in advance by the doctoral coordinator. Following a satisfactory evaluation of the oral defense of the dissertation by the supervisory committee, the student must prepare, with supervision from the dissertation director, a final publishable dissertation that represents a definitive contribution to knowledge in systems engineering and operations research. This document must meet format guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to successfully defend the dissertation, the student may request a second defense, following the same procedures as for the initial defense. There is no time limit for this request, other than the general time limits for the doctoral degree. An additional predefense is not required, but the student is strongly advised to consult with the committee before scheduling a second defense. If the student fails on the second attempt to defend the dissertation, the student will be terminated from the PhD program.

Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering

Sam Salem, Chair

Phone: 703-993-1675
Website: civil.gmu.edu

The Sid and Reva Dewberry Department of Civil, Environmental, and Infrastructure Engineering (CEIE) offers BS, MS, MEng, and PhD degrees. These degree programs focus on the physical and organizational infrastructure essential to the functioning of society.

Civil and infrastructure engineering is the study of land, transportation, water resources, environment, structures, geotechnology, and construction from a civil engineering perspective and within a complex technological, social, political, economic, and environmental context. The focus is on how these systems are successfully conceived, developed, designed, built, operated, maintained, and renewed in the built environment. This applies to major metropolitan areas in developed countries, such as Washington, D.C. and its integrated suburbs, and extends to infrastructure issues in developing nations which often involve very different issues.

An urban society thrives and prospers when adequate, appropriate, reliable, robust, secure, and cost-effective infrastructure systems are provided. The investment in existing infrastructure and other urban systems in the United States and abroad is enormous. The investment required to maintain, operate, renew, and manage the evolution of these infrastructure systems in the future is even greater. The need for highly educated and creative professionals to confront and solve these continuing vital problems is pressing. Examples of infrastructure systems include water supply and distribution; streets, roads, and highways; wastewater management; transit; storm water management; public utilities; energy supply and distribution; telecommunications; buildings, facilities and structures; and solid waste management.

The bachelor's degree program provides essential underpinnings in the theory and design methods of civil and infrastructure engineering for engineering practice. Students benefit from exposure to practical civil, environmental, and infrastructure engineering problems and their solutions in the classroom, lab, and field. The educational objectives of the Civil and Infrastructure Engineering program describe expectations for graduates approximately three to five years after obtaining their degree. Graduates of the program will be professionals who:

- Engage in the engineering practice of planning, designing, constructing, operating and maintaining sustainable infrastructure;
- Participate in public discussions concerning infrastructure in the urban, suburban, and exurban setting by providing professional guidance;
- Stay current through continuing education opportunities, professional conferences, graduate school, and other self-learning experiences; have the ability to obtain and maintain professional licensing.

Civil engineering students can look forward to a career in local, state, and federal government organizations, and in architectural and engineering firms that specialize in land development, transportation, water resources, environment, structures, geotechnical, construction, and other related fields. The program also prepares students for continuing graduate studies for sophisticated practice, research, and teaching.

The bachelor's program in civil and infrastructure engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

This is a Green Leaf program.

Admissions & Policies

Policies

For policies governing all undergraduate degrees, see AP.5 Undergraduate Policies.

Change of Major

See Change of Major for more information.

Program Requirements

Degree requirements include 121 credits distributed in three main areas: mathematics and basic science, humanities and social sciences, and civil engineering analysis and design. Students must complete all math, science and Volgenau School of Engineering courses presented as part of the required 121 credits for the degree with a grade of C or better.

The prerequisite structure for these courses is extensive. Sample schedules, available from the department, provide a comprehensive listing of major and Mason Core requirements and serve as a guide to the progression of the courses to satisfy all prerequisites.

Students are required to see their academic advisor at least once each year to plan their curriculum, and to develop an approved plan of study, which constitutes a learning plan for the degree program.

Termination from the Major

No math, science, or Volgenau School of Engineering course that is required for the major may be attempted more than three times. Those students who do not successfully complete such a course within three attempts will be terminated from the major. Undeclared students in the Volgenau School who do not successfully complete a course required for a Volgenau School major within three attempts will also be terminated.

In addition, students in the Volgenau School with evidence of continued failure to make adequate progress toward declaring or completing a Volgenau School major will be terminated from the school. Adequate progress is determined by the major program. For more information, see AP.5.2.4 Termination from the Major (https://catalog.gmu.edu/policies/academic/undergraduate-policies/#ap-5-2-4).

Once a student has attempted one of these courses twice unsuccessfully, the third attempt must be no later than the next semester of enrollment, excluding summers. Failure to take the course at that time will result in termination from the major. A third attempt of a Volgenau School of Engineering course requires support by the student's major department as well as permission by the department offering the course. This permission is not guaranteed. If the student is unable to take the course when required, the student may request an extension to a future semester; extensions require approval of the student's advisor, their department, and the Associate Dean for Undergraduate Programs. The deadline for extension requests is the add deadline for the semester in which the course is required.

Students who have been terminated from a Volgenau School of Engineering major may not register for a Volgenau School course without permission of the department offering the course. This applies to all undergraduate courses offered by the Volgenau School except IT 104 Introduction to Computing (Mason Core) and STAT 250 Introductory Statistics I (Mason Core).

A student may not declare any major in the Volgenau School of Engineering if the student has previously met the termination criteria for that major at any time, regardless of what the student's major was at the time the courses were taken.

Requirements

Degree Requirements

Total credits: 121

This is a Green Leaf program.

Code	Title	Credits
CEIE 101	Introduction to Civil Engineering	2
or ENGR 107	Introduction to Engineering (Mason Core)	

Civil Engineering

or COMM 101	Fundamentals of Communication (Mason Core)	
ECON 103	Contemporary Microeconomic Principles (Mason Core)	3
Total Credits		6

Writing-Intensive Requirement

The university's writing-intensive requirement for civil and infrastructure engineering majors is satisfied by the successful completion of CEIE 301 Engineering and Economic Models in Civil Engineering.

Additional Mason Core

Students must complete all Mason Core requirements not fulfilled by major requirements with one modification. CEIE students are required to take 6 credits of written communication, 3 credits of literature, and courses in two of the following three areas: arts, global understanding, and western civilization/world history. This exemption means that CEIE students meet the Volgenau School of Engineering's requirement for humanities and social science courses by taking 21 credits rather than 24. The two additional Mason Core areas to be satisfied must be approved by the CEIE faculty advisor with the goal of best meeting the Mason Core needs of the student. All other Mason Core requirements must be met.

Code	Title	Credits
Written Communication		6
Literature		3
Select courses from two of the following areas:		6
Arts		
Western Civilization/World History		
Global Understanding

4-Year Plan

Bachelor of Science in Civil & Infrastructure Engineering Sample Study Plan

Detailed four year plans and degree planning checklists can be found at https://advising.gmu.edu/current-student/majors-at-mason/.

Honors

Honors in the Major

The Sid and Reva Dewberry Department of Civil, Environmental and Infrastructure Engineering offers an Honors Program in Civil and Infrastructure Engineering that creates a community of outstanding scholars in civil engineering who share a commitment to learning, service, and leadership. The Program is crafted around the civil and infrastructure curriculum, and is distinct from the University Honors Curriculum. Entry to the Honors Program is by invitation, extended to students with a minimum high school GPA of 3.80.

Requirements

The Honors Program is challenging, designed for the highly motivated student, and consists of 120 credits. Honors students must satisfy requirements in addition to those of the normal BS CEIE degree, including:

- An advanced communication course, COMM 320 Business and Professional Communication or COMM 637 Risk Communication, which may serve as a substitute for one CEIE (4xx) level senior technical elective.
- A minimum of 6 credits of CEIE graduate (5xx/6xx) level courses (these courses may substitute for CEIE (4xx) level senior technical electives by approval of the Department Chair). Students must submit a Graduate Course for Undergraduate Credit Form for approval to the course instructor and Department Chair.

Once admitted to the Honors Program, students must remain in good standing and maintain a minimum cumulative GPA of 3.50 and a minimum GPA of 3.20 in each semester for all courses counting toward the BS CEIE degree, maintain continuous enrollment working toward the BS CEIE degree, and abide by the Mason Honor Code.

Accelerated Master's

Civil and Infrastructure Engineering, BS/ Civil and Infrastructure Engineering, Accelerated MS

Overview

Highly-qualified students in the Civil and Infrastructure Engineering, BS have the option of obtaining an accelerated Civil and Infrastructure Engineering, MS.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Civil and Infrastructure Engineering, BS program may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students register for up to 12 credits of overlapping graduate level courses in place of undergraduate technical elective courses.

Students are encouraged to take up to four of the following courses, based on their chosen concentration area in the master's program:

Concentration in Construction Engineering and Management (CEM)

CEIE 571 Construction Administration

CEIE 572 Building Information Modeling

CEIE 573 Legal Aspects of the Construction Process

CEIE 575 Design for Constructability

CEIE 576 Construction Cost Estimating

Concentration in Environmental and Water Resources Engineering (EWRE)

CEIE 540 Water Supply and Distribution

CEIE 542 Open Channel Flow

CEIE 550 Environmental Engineering Systems

CEIE 553 Water and Wastewater Treatment Processes

CEIE 557 Remote Monitoring Techniques for Civil Engineering Applications

Concentration in Geotechnical Engineering (GEOE)

CEIE 501 Sustainable Development

CEIE 524 Introduction to Bridge Engineering

CEIE 531 Earth Retaining Structures and Slope Stability

CEIE 532 Foundation Design

CEIE 535 Engineering Geology

Concentration in Structural Engineering (STRE)

CEIE 512 Structural Steel Design

CEIE 513 Reinforced Concrete Design

CEIE 524 Introduction to Bridge Engineering

CEIE 525 Structural Evaluation and Rehabilitation

CEIE 532 Foundation Design

CEIE 575 Design for Constructability

Concentration in Transportation Engineering (TRNE)

CEIE 560 Public Transportation Systems

CEIE 561 Traffic Engineering

CEIE 562 Urban Transportation Planning

STAT 554 Applied Statistics I

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program from the list below. Reserve graduate credits do not apply to the undergraduate degree.

CEIE 601 Infrastructure Modeling

CEIE 605 Risk and Uncertainty in Civil Engineering

Degree Requirements

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs, and students must have satisfactory performance (grade of 'B' or better) in each of the graduate courses intended to be applied towards the MS degree. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office for approval. At the completion of MS requirements, a master's degree is conferred.

Bachelor's Degree (selected)/ Environmental Science and Policy, Accelerated MS

Overview

This bachelor's/accelerated master's degree program allows academically strong undergraduates with a commitment to advance their education to obtain a Green Leaf-designated bachelor's degree and the Environmental Science and Policy, MS (https://catalog.gmu.edu/colleges-schools/science/environmental-policy/environmental-science-policy-ms/) degrees within an accelerated timeframe. Upon completion of this 141 credit accelerated program, students will be exceptionally well prepared for entry into their careers or into a doctoral program in the field or in a related discipline.

Students are eligible to apply for this accelerated program once they have earned at least 60 undergraduate credits and can enroll in up to 18 credits of graduate coursework after successfully completing 75 undergraduate credits. This flexibility makes it possible for students to complete a bachelor's and a master's in five years.

For more detailed information, see AP.6.7 Bachelor's/Accelerated Master's Degrees. For policies governing all graduate degrees, see AP.6 Graduate Policies. For more information on undergraduates enrolling in graduate courses, see AP.1.4.4 Graduate Course Enrollment by Undergraduates (https://catalog.gmu.edu/policies/academic/registration-attendance/#text).

Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in the Graduate Admission Policies section of this catalog.

Important application information and processes for this accelerated master's program can be found here (https://www2.gmu.edu/admissions-aid/how-apply/accelerated-masters/).

The GRE exam is not required for this accelerated master's program.

Students should submit three letters of recommendation (at least one from a former professor or someone with a PhD), a recent resume, a statement of interest/research goals and interests (including information on the candidate's proposed MS research), and a letter from their advisor (see Graduate Advisor section below) stating that the advisor agrees to

take on the candidate as an MS student, how the candidate would be a good fit for them and why candidate's research topic would be suitable.

Students with an overall GPA of at least 3.20 who are pursuing any Green Leaf-designated major or minor may apply to this accelerated master's program after completing two semesters of chemistry (including CHEM 211 General Chemistry I (Mason Core) and CHEM 212 General Chemistry II (Mason Core) and three semesters of biology, including a course in ecology, or the equivalent, for example:

Code	Title	Credits
Select one of the following options:		13
Option 1:		
BIOL 213	Cell Structure and Function (Mason Core)	
BIOL 214	Biostatistics for Biology Majors	
BIOL 308	Foundations of Ecology and Evolution	
Option 2:		
EVPP 210	Environmental Biology: Molecules and Cells	
EVPP 301	Environmental Science: Biological Diversity and Ecosystems	
EVPP 302	Environmental Science: Biomes and Human Dimensions	
EVPP 305	Environmental Microbiology Essentials	
EVPP 306	Environmental Microbiology Essentials Laboratory	
Option 3:		
CONS 401	Conservation Theory	
CONS 402	Applied Conservation	
6 credits of BIOL or CONS electives		

Graduate Advisor

By at least the beginning of their senior year, students should seek out a faculty member in the Department of Environmental Science and Policy who is willing to serve as their advisor. This advisor will aid the student in choosing the appropriate graduate courses to take and help to prepare the student for graduate studies. Admission into a research-oriented master's concentration is dependent upon securing the agreement of a faculty advisor. Faculty from a variety of departments and colleges at George Mason University (called "program faculty") can serve as master's advisors. Potential students are encouraged to speak with the graduate program coordinator in the department to obtain guidance on this issue.

Accelerated Option Requirements

After the completion of 75 undergraduate credits, students may complete 3 to 12 credits of graduate coursework that can apply to both the undergraduate and graduate degrees.

In addition to applying to graduate from the undergraduate program, students in the accelerated program must submit a bachelor's/accelerated master's transition form (available from the Office of the University Registrar (https://registrar.gmu.edu/forms/)) to the College of Science's Office of Academic and Student Affairs (https://cos.gmu.edu/about/contact-us/) by the last day to add classes of their final undergraduate semester. Students should enroll for courses in the master's program in the fall or spring semester immediately following conferral of the bachelor's degree, but should contact an advisor if they would like to defer up to one semester.

Students must maintain an overall GPA of 3.00 or higher in all graduate coursework and should consult with their faculty advisor to coordinate their academic goals.

Reserve Graduate Credits

Accelerated master's students may also take up to 6 graduate credits as reserve graduate credits. These credits do not apply to the undergraduate degree, but will reduce the master's degree by up to 6 credits. With 12 graduate credits counted toward the undergraduate degree plus the maximum 6 reserve graduate credits, the credits necessary for the graduate degree can be reduced by up to 18.

Graduate Course Suggestions

The following list of suggested courses is provided for general reference. To ensure an efficient route to graduation and post-graduation readiness, students are strongly encouraged to meet with an advisor before registering for graduate-level courses.

Code	Title	Credits
EVPP 518	Conservation Biology	3
EVPP 529	Environmental Science Communication	3
EVPP 621	Overview of Biodiversity Conservation	3
EVPP 635	Environment and Society	3

Civil and Infrastructure Engineering, BS/Operations Research, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Civil and Infrastructure Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-bs/) and an Operations Research, MS in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Civil and Infrastructure Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-bs/) students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS

requirements. Students must additionally complete MATH 203 Linear Algebra prior to applying for the graduate program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Operations Research, MS program. Students already admitted in the BAM Pathway will be admitted to the Operations Research, MS program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Civil and Infrastructure Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Civil and Infrastructure Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Operations Research, MS. The undergraduate version of these courses, if any, may *not* be applied toward the Operations Research, MS. Credit may not be received for both the undergraduate and graduate version of these courses.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Operations Research, MS program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Civil and Infrastructure Engineering courses:

Code	Title	Credits
CEIE 501	Sustainable Development	
CEIE 512	Structural Steel Design	
CEIE 532	Foundation Design	
CEIE 535	Engineering Geology	
CEIE 540	Water Supply and Distribution	
CEIE 542	Open Channel Flow	
CEIE 550	Environmental Engineering Systems	
CEIE 553	Water and Wastewater Treatment Processes	
CEIE 557	Remote Monitoring Techniques for Civil Engineering Applications	
CEIE 561	Traffic Engineering	
CEIE 562	Urban Transportation Planning	
CEIE 571	Construction Administration	
CEIE 572	Building Information Modeling	
CEIE 573	Legal Aspects of the Construction Process	
CEIE 574	Construction Computer Application and Informatics	
CEIE 576	Construction Cost Estimating	

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 521	Network Analysis	
OR 538	Analytics for Financial Engineering and Econometrics	
OR 541	Operations Research: Deterministic Models (Core)	
OR 542	Operations Research: Stochastic Models (Core)	
OR 568	Applied Predictive Analytics (Core)	
OR 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Civil and Infrastructure Engineering, BS/ Systems Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a Civil and Infrastructure Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-bs/) and a Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

Admitted students are able to use up to 12 graduate credits in partial satisfaction of requirements for the undergraduate degree. Upon completion and conferral of the bachelor's degree and with satisfactory performance (grade of 'B' or better) in each of the graduate courses, students are given advanced standing in the master's program.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies (https://catalog.gmu.edu/policies/academic/graduate-policies/).

BAM Pathway Admission Requirements

Applicants to all graduate programs at George Mason University must meet the admission standards and application requirements for graduate study as specified in Graduate Admissions Policies and Bachelor's/Accelerated Master's Degree policies.

Civil and Infrastructure Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-bs/) students will be considered for admission into the BAM Pathway after completion of a minimum of 60 credits with an overall GPA of at least 3.3, and completion of all MATH and PHYS requirements.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Master's Admission Requirements

The criteria for admission are identical to criteria for admission to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. Students already admitted in the BAM Pathway will be admitted to the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program, if they have met the following criteria, as verified on the Bachelor's/Accelerated Master's Transition form:

- An overall GPA of at least 3.3
- Successfully meeting Mason's requirements for undergraduate degree conferral (graduation) and completing the application for graduation.

Accelerated Pathway Requirements

To maintain the integrity and quality of both the undergraduate and graduate degree programs, undergraduate students interested in taking graduate courses must choose from the following:

Advanced Standing course: Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs and by the SEOR department chair. For the BS programs that allow undergraduate electives from the department of system engineering and operations research, the students may choose the graduate version of such elective courses to replace the corresponding undergraduate courses.

- Students selecting up to two courses (6 credits) of approved master's level courses may select from the Civil and Infrastructure Engineering courses given below.
- Students selecting up to three or four courses (9 or 12 credits) of approved master's level courses may select at most two courses from the Civil and Infrastructure Engineering course list and select the remaining courses from the Systems Engineering and Operations Research course list given below. Students are highly recommended to select courses marked as core courses because it applies to the master's degree regardless of the graduate-level concentration chosen in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program. The undergraduate version of these courses, if any, may *not* be applied toward the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/). Credit may not be received for both the undergraduate and graduate version of these courses.
- Except for the courses marked as core, any course chosen from either course list can be used to satisfy SYST 505 Systems Engineering Principles core requirement in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Some of the courses in the Systems Engineering and Operations Research course list applies only to certain concentrations in the Systems Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/systems-operations-research/systems-engineering-ms/) program.
- Students must pay attention to the prerequisites required for a course, and the master's degree concentration that the course may satisfy.

Select at most two from the following Civil and Infrastructure Engineering courses:

Code	Title	Credits
CEIE 501	Sustainable Development	
CEIE 512	Structural Steel Design	
CEIE 532	Foundation Design	
CEIE 535	Engineering Geology	
CEIE 540	Water Supply and Distribution	
CEIE 542	Open Channel Flow	
CEIE 550	Environmental Engineering Systems	

CEIE 553	Water and Wastewater Treatment Processes
CEIE 557	Remote Monitoring Techniques for Civil Engineering Applications
CEIE 561	Traffic Engineering
CEIE 562	Urban Transportation Planning
CEIE 571	Construction Administration
CEIE 572	Building Information Modeling
CEIE 573	Legal Aspects of the Construction Process
CEIE 574	Construction Computer Application and Informatics
CEIE 576	Construction Cost Estimating

Select the remaining from the following Systems Engineering and Operations Research courses:

Code	Title	Credits
SYST 510	Systems Definition and Cost Modeling (Core)	
SYST 514	Systems Thinking	
SYST 520	System Engineering Design (Core)	
SYST 530	Systems Engineering Management I (Core)	
SYST 542	Decision Support Systems Engineering	
SYST 573	Decision and Risk Analysis	
SYST 538	Analytics for Financial Engineering and Econometrics	
SYST 560	Introduction to Air Traffic Control	
SYST 563	Evidence-Based Systems Engineering	
SYST 568	Applied Predictive Analytics	
SYST 584	Heterogeneous Data Fusion	
SYST 588	Financial Systems Engineering I: Introduction to Options, Futures, and Derivatives	

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program. Reserve graduate credits do not apply to the undergraduate degree.

For more detailed information on coursework and timeline requirements, see AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#text).

Degree Conferral

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Civil and Infrastructure Engineering, MS

Banner Code: VS-MS-CEIE

Laura Kosoglu, PhD, Associate Department Chair; Director, CEIE Graduate Program; Associate Professor

Phone: 703-993-5319
Email: ceiegrad@gmu.edu
Website: https://civil.gmu.edu/academics/master-science

This MS is designed for students who have completed a bachelor's degree in civil engineering, although domestic students with related undergraduate degrees may be considered for provisional admission. The MS educates students in the theory and practice of civil engineering science and design, with a technical concentration. The master's degree is increasingly expected for high level practice in civil engineering, and prepares graduates to practice in civil engineering for: federal, state, or local government; engineering design firms; construction firms; public utilities; non-governmental organizations; and local and regional planning firms, among others. The MS degree serves as a foundation for subsequent study in a doctoral program in civil engineering, as well as for graduate studies in architecture, law, business, economics, finance, and public policy and administration.

Both part-time and full-time study is available. Full-time students typically complete the degree in one and a half, to two years.

Admissions & Policies

Admissions

To be considered for admission to the program, a candidate must:

- Satisfy general University and Volgenau School requirements for admission to a graduate program,
- Have earned a baccalaureate degree in engineering or a related science,
- Provide two letters of reference, submitted by former professors or supervisors,
- Provide a goals statement and professional résumé.

Acceptance to the degree program is based on an assessment of the applicant's capacity to pursue graduate studies successfully. Consideration is given to the undergraduate record, any previous graduate work, professional work experience, and reference letters.

Requirements

Degree Requirements

Total credits: 30

All MS students must develop a faculty-approved plan of study with a minimum of 30 graduate credits. These credits include two core courses (CEIE 601 Infrastructure Modeling and CEIE 605 Risk and Uncertainty in Civil Engineering), specific requirements of a concentration declared by the student, and seminar requirement (CEIE 795 Civil and Infrastructure Engineering Seminar).

Plan of Study

Students are responsible for developing and receiving advisor approval on a plan of study no later than the end of their second semester of study. Courses taken without prior approval by the faculty advisor may not be accepted for credit toward the degree. No more than three courses used for credit toward the MS may be cross-listed as undergraduate courses. None may repeat material completed as part of the student's previous studies. Most MS courses are offered on a two-semester or three-semester rotation.

Core Courses

All MS students must complete the following two core courses, preferably within the first 12 credit hours of their MS studies. These courses provide a common background for understanding the breadth and complexity of civil and infrastructure engineering and for analyzing and solving engineering problems.

Code	Title	Credits
CEIE 601	Infrastructure Modeling	3
CEIE 605	Risk and Uncertainty in Civil Engineering	3
Total Credits		6

Concentration in Construction Engineering and Management (CEM)

Code	Title	Credits
Select at least three from the following five construction engineering and management core courses:		9
CEIE 571	Construction Administration [1]	
CEIE 572	Building Information Modeling [1]	
CEIE 573	Legal Aspects of the Construction Process	
CEIE 575	Design for Constructability	
CEIE 576	Construction Cost Estimating [1]	
Total Credits		9

[1] Cross-lists with an undergraduate course

Electives

A list of approved electives for the construction engineering and management concentration is provided below. Note that the remaining construction engineering and management core courses can also be selected as electives.

Code	Title	Credits
CEIE 501	Sustainable Development [1]	3
CEIE 524	Introduction to Bridge Engineering	3
CEIE 525	Structural Evaluation and Rehabilitation	3
CEIE 531	Earth Retaining Structures and Slope Stability	3
CEIE 532	Foundation Design [1]	3
CEIE 574	Construction Computer Application and Informatics [1]	3
CEIE 578	Construction Planning and Scheduling [1]	3
CEIE 607	Public Infrastructure Management and Finance	3
CEIE 636	Sources of Geotechnical Data	3
CEIE 677	Construction Simulation	3
CEIE 678	Infrastructure Asset Management	3
CEIE 679	Special Topics in Construction Management	3
GGS 553	Geographic Information Systems	3

[1] Cross-lists with an undergraduate course

Concentration in Environmental and Water Resources Engineering (EWRE)

Code	Title	Credits
Select at least three from the following five environmental and water resources engineering core courses:		9
CEIE 557	Remote Monitoring Techniques for Civil Engineering Applications [1]	
CEIE 641	Water Resources Engineering I: Principles and Practice	
CEIE 642	Flood Hazards Engineering	
CEIE 658	Water Quality	
CEIE 742	Water Resources Engineering II: Water Resource Systems	
Total Credits		9

Electives

A list of approved electives for the environmental and water resources engineering concentration is provided below. Note that the remaining environmental and water resources engineering core courses can also be selected as electives.

Code	Title	Credits
CEIE 540	Water Supply and Distribution [1]	3
CEIE 542	Open Channel Flow [1]	3
CEIE 550	Environmental Engineering Systems [1]	3
CEIE 553	Water and Wastewater Treatment Processes [1]	3
CEIE 607	Public Infrastructure Management and Finance	3
CEIE 634	Geoenvironmental Design	3
CEIE 643	Coastal Flood Hazards	3
CEIE 649	Special Topics in Water Resources Engineering	3
CEIE 657	Environmental Engineering Microbiology	3
CEIE 659	Hazardous Waste	3
CEIE 664	Transportation Engineering and the Environment	3
CEIE 683	Water and Wastewater Systems Security	3

Concentration in Transportation Engineering (TRNE)

Code	Title	Credits
Select at least three of the following five transportation engineering core courses:		9
CEIE 662	Travel Demand Modeling	
CEIE 663	Intelligent Transportation Systems	
CEIE 664	Transportation Engineering and the Environment	
CEIE 767	Traffic Engineering Modeling and Analysis	
STAT 554	Applied Statistics I	
Total Credits		9

Electives

A list of approved electives for the transportation engineering concentration is provided below. Note that the remaining transportation engineering core courses can also be selected as electives.

Code	Title	Credits
CEIE 560	Public Transportation Systems	3
CEIE 561	Traffic Engineering [1]	3
CEIE 562	Urban Transportation Planning [1]	3
CEIE 607	Public Infrastructure Management and Finance	3
CEIE 665	Travel Survey Methods and Data Analysis	3
CEIE 667	Multi-modal Transportation Systems	3
CEIE 668	Transportation Economics	3
CEIE 669	Special Topics in Transportation Engineering	3
CEIE 762	Network Models for Transportation Planning	3
CEIE 763	Discrete Choice Analysis in Transportation	3

CS 504	Principles of Data Management and Mining	3
GGS 553	Geographic Information Systems	3

[1] Cross-lists with an undergraduate course

Note:

For all concentrations, electives outside of the chosen concentration can only be taken or substituted with the approval of the faculty advisor or the department.

Project or Thesis Option

Students, with the consent of a faculty advisor and departmental approval, may be approved to complete a project or thesis.

Research Project

Students complete CEIE 798 Research Project in Civil Engineering, during which they prepare and present a scholarly paper. The scholarly paper is a technical report on an independent study, laboratory or computer experimentation, or literature search on a current civil and infrastructure engineering topic selected with approval of a faculty advisor. CEIE 798 Research Project in Civil Engineering credits count toward elective credit hours required for the MS degree.

Code	Title	Credits
CEIE 798	Research Project in Civil Engineering	3
Total Credits		3

Master's Thesis

Students complete CEIE 799 Master's Thesis which counts toward the 30 credit hours required for the MS degree. The MS thesis should reflect a significant, independent research effort that advances engineering science, and is worthy of publication. The work is conducted with the approval of a faculty thesis advisor, and the final written thesis and oral defense are defended before a three-member faculty committee. The thesis is recommended for those students who wish to develop and document their research skills, or contemplate subsequent enrollment in a PhD program. Students are advised of the university's continuous registration requirement for thesis and dissertation research credits. Upon first enrolling in CEIE 799 Master's Thesis, the student must continue registration for each fall and spring semester until the thesis is successfully completed. CEIE 799 Master's Thesis credits count toward elective credit hours required for the MS degree.

Code	Title	Credits
CEIE 799	Master's Thesis (must complete 6 credits)	1-6
Total Credits		1-6

Seminar Requirement

All degree candidates must attend a minimum of five graduate seminars approved by the CEIE Department for the degree program. Students must enroll in CEIE 795 Civil and Infrastructure Engineering Seminar and receive a satisfactory (S) grade by their final semester. This course is used to verify the seminar attendance requirement and is repeatable. Continuous enrollment every semester is encouraged for attendance tracking and for dissemination of seminar information but is not required.

Code	Title	Credits
CEIE 795	Civil and Infrastructure Engineering Seminar	0
Total Credits		0

Accelerated Master's

Civil and Infrastructure Engineering, BS/ Civil and Infrastructure Engineering, Accelerated MS

Overview

Highly-qualified students in the Civil and Infrastructure Engineering, BS have the option of obtaining an accelerated Civil and Infrastructure Engineering, MS.

See AP.6.7 Bachelor's/Accelerated Master's Degrees for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Civil and Infrastructure Engineering, BS program may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students register for up to 12 credits of overlapping graduate level courses in place of undergraduate technical elective courses.

Students are encouraged to take up to four of the following courses, based on their chosen concentration area in the master's program:

Concentration in Construction Engineering and Management (CEM)

CEIE 571 Construction Administration

CEIE 572 Building Information Modeling

CEIE 573 Legal Aspects of the Construction Process

CEIE 575 Design for Constructability

CEIE 576 Construction Cost Estimating

Concentration in Environmental and Water Resources Engineering (EWRE)

CEIE 540 Water Supply and Distribution

CEIE 542 Open Channel Flow

CEIE 550 Environmental Engineering Systems

CEIE 553 Water and Wastewater Treatment Processes

CEIE 557 Remote Monitoring Techniques for Civil Engineering Applications

Concentration in Geotechnical Engineering (GEOE)

CEIE 501 Sustainable Development

CEIE 524 Introduction to Bridge Engineering

CEIE 531 Earth Retaining Structures and Slope Stability

CEIE 532 Foundation Design

CEIE 535 Engineering Geology

Concentration in Structural Engineering (STRE)

CEIE 512 Structural Steel Design

CEIE 513 Reinforced Concrete Design

CEIE 524 Introduction to Bridge Engineering

CEIE 525 Structural Evaluation and Rehabilitation

CEIE 532 Foundation Design

CEIE 575 Design for Constructability

Concentration in Transportation Engineering (TRNE)

CEIE 560 Public Transportation Systems

CEIE 561 Traffic Engineering

CEIE 562 Urban Transportation Planning

STAT 554 Applied Statistics I

While still in undergraduate status, a maximum of 6 additional graduate credits may be taken as reserve graduate credit and applied to the master's program from the list below. Reserve graduate credits do not apply to the undergraduate degree.

CEIE 601 Infrastructure Modeling

CEIE 605 Risk and Uncertainty in Civil Engineering

Degree Requirements

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. Students must complete all credits that satisfy requirements for both the BS and MS programs. Up to four courses (12 credits) of approved master's level courses taken as part of the undergraduate degree may be applied to the graduate degree. The courses selected for this purpose must be approved by the academic advisors of both the BS and MS programs, and students must have satisfactory performance (grade of 'B' or better) in each of the graduate courses intended to be applied towards the MS degree. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office for approval. At the completion of MS requirements, a master's degree is conferred.

Mechanical Engineering, BS/Civil and Infrastructure Engineering, Accelerated MS

Overview

Highly-qualified undergraduates may be admitted to the bachelor's/accelerated master's program and obtain a BS in Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) and an MS in Civil and Infrastructure Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-ms/). in an accelerated time-frame after satisfactory completion of a minimum of 139 credits.

See AP.6.7 Bachelor's/Accelerated Master's Degrees (https://catalog.gmu.edu/policies/academic/graduate-policies/#ap-6-7) for policies related to this program.

Students in an accelerated degree program must fulfill all university requirements for the master's degree. For policies governing all graduate degrees, see AP.6 Graduate Policies.

Admission Requirements

Students in the Mechanical Engineering, BS (https://catalog.gmu.edu/colleges-schools/engineering/mechanical/mechanical-engineering-bs/) program may apply to this option if they have earned 60 undergraduate credits with an overall GPA of at least 3.30. All other criteria for admission are identical to criteria for admission into the Civil and Infrastructure Engineering, MS (https://catalog.gmu.edu/colleges-schools/engineering/civil-environmental-infrastructure/civil-infrastructure-engineering-ms/) program.

Students who are accepted into the BAM Pathway will be allowed to register for graduate level courses after successful completion of a minimum of 75 undergraduate credits and course-specific pre-requisites.

Accelerated Option Requirements

Students must complete all credits that satisfy requirements for both the BS and MS programs. Students register for up to 12 credits of overlapping graduate level courses in place of undergraduate technical elective courses.

Students are encouraged to take up to four of the following courses, based on their chosen concentration area in the master's program:

Concentration in Construction Engineering and Management (CEM)

CEIE 571 Construction Administration

CEIE 572 Building Information Modeling

CEIE 573 Legal Aspects of the Construction Process

CEIE 575 Design for Constructability

CEIE 576 Construction Cost Estimating

Concentration in Environmental and Water Resources Engineering (EWRE)

CEIE 540 Water Supply and Distribution CEIE 540 Water Supply and Distribution CEIE 540 Water Supply and Distribution

CEIE 542 Open Channel Flow CEIE 542 Open Channel Flow CEIE 542 Open Channel Flow

CEIE 550 Environmental Engineering Systems

CEIE 553 Water and Wastewater Treatment Processes

CEIE 557 Remote Monitoring Techniques for Civil Engineering Applications

Concentration in Geotechnical Engineering (GEOE)

CEIE 501 Sustainable Development

CEIE 524 Introduction to Bridge Engineering

CEIE 531 Earth Retaining Structures and Slope Stability

CEIE 532 Foundation Design

CEIE 535 Engineering Geology

Concentration in Structural Engineering (STRE)

CEIE 512 Structural Steel Design

CEIE 513 Reinforced Concrete Design

CEIE 525 Structural Evaluation and Rehabilitation

CEIE 532 Foundation Design

CEIE 575 Design for Constructability

Concentration in Transportation Engineering (TRNE)

CEIE 560 Public Transportation Systems

CEIE 561 Traffic Engineering

CEIE 562 Urban Transportation Planning

STAT 544 Applied Probability

Students also have the option of taking the following one or two additional graduate-level courses for reserve that will only count for the graduate degree program:

CEIE 601 Infrastructure Modeling

CEIE 605 Risk and Uncertainty in Civil Engineering

Degree Requirements

Students must apply the semester before they expect to complete the BS requirements to have the BS degree conferred. In addition, at the beginning of the student's final undergraduate semester, students must complete a Bachelor's/Accelerated Master's Transition form that is submitted to the Office of the University Registrar and the VSE Graduate Admissions Office. At the completion of MS requirements, a master's degree is conferred.

Advising & Plan of Study

Each student is assigned a faculty advisor upon acceptance. Students must meet with their advisors during their first semester and design an approved plan of study. Students are encouraged to seek out their advisor when questions arise and when their plan of study needs to be revised.

Students must have a working background in their selected concentration area. A student lacking these foundations may be required to take one or more foundation courses.

Civil and Infrastructure Engineering, PhD

Banner Code: VS-PHD-CEIE

Laura Kosoglu, PhD, Associate Department Chair; Director, CEIE Graduate Program; Associate Professor

Phone: 703-993-5319
Email: ceiegrad@gmu.edu
Website: https://civil.gmu.edu/academics/phd

The Doctor of Philosophy in Civil and Infrastructure Engineering was created to prepare students for advanced leadership positions in research and development in the public or private sector, academics, or government. Students may elect to study in the areas of: construction engineering and management, environmental and water resources engineering, geotechnical engineering, structural engineering, or transportation engineering. Admitted students will complete both required and applicable coursework in their technical interest area based on a plan of study prepared with a doctoral advisor. They will take qualifying exams that assess student's breadth of knowledge at the graduate level and competency to conduct research. They will form a doctoral committee and prepare and defend a dissertation proposal leading to PhD candidacy. Finally, they will conduct original scholarly research and prepare, then defend a doctoral dissertation. Both part-time and full-time study is available.

Admissions & Policies

Admissions

Requirements

All general George Mason University and specific Volgenau School admission requirements (including deadlines) apply. In addition, all applicants, including Mason undergraduates, must submit the following:

- Official transcript of undergraduate and graduate course work,
- For applicants whose official language is not English, official TOEFL scores which meet the minimum requirements set by the Volgenau School,
- Three letters of recommendation from individuals knowledgeable about the applicant's professional or academic work (at least two of the letters should be from individuals with doctorates),
- Recent professional résumé,
- Substantial statement of interest that includes a description of the specific area of proposed dissertation research, contacts the student has made with potential faculty advisors, and an explanation of career and research goals

Admission decisions will be based on the student's qualifications, the availability of a faculty advisor, and the faculty advisor's approval in their proposed area of research. The application materials will be reviewed by the department doctoral committee and decisions made with input from appropriate faculty members.

Financial support for outstanding applicants is available in the form of fellowships as well as research and teaching assistantships. For best consideration, applicants are encouraged to apply early and to contact potential faculty advisors to express interest in support.

Policies

Reduction of Credit

Students must complete a minimum of 72 graduate credits, which may be reduced by a maximum of 30 credits from a completed master's degree in civil engineering or other related fields. Reduction of credit requires the approval of the program director or designee and the dean or designee of the school. They determine whether the credits are eligible for reduction of credit and applicable to the degree program and the number of credits to be reduced.

Program Requirements

The PhD in Civil and Infrastructure Engineering requires 72 graduate credits. Admitted students are expected to hold at a minimum a Bachelor of Science in Civil Engineering or a degree in a closely-related engineering or science field.

The degree plan outlined in Degree Requirements is based on a student who receives a full 30 credit reduction. Students who do not receive a full credit reduction must choose additional credits in consultation with their advisor.

Requirements

Degree Requirements

Total credits: 72

Doctoral Coursework

A minimum GPA of 3.50 is required and no C grades are allowed for the coursework earned beyond the MS. A detailed plan of study will be prepared for each student upon acceptance into the program and in consultation with the faculty advisor, which outlines all course requirements to include:

Required Courses

The following must be completed while in residence in the program.

Code	Title	Credits
The following must be completed while in residence in the program.		3
CEIE 800	Civil, Environmental, and Infrastructure Engineering Colloquium (must be taken at least twice)	
CEIE 990	Civil and Infrastructure Dissertation Topic Presentation	
Select one from the following:		3
CEIE 603	Research Methods in Civil Engineering	
CEIE 796	Directed Reading	
Total Credits		6

Courses Chosen with Advisor

Code	Title	Credits
Courses, especially in the student's technical interest area, chosen in consultation with his or her advisor (minimum) [1]		12
Total Credits		12

[1] No more than three courses used for credit toward the PhD may be cross-listed as undergraduate courses. None may repeat material completed as part of the student's previous studies.

Qualifying Exam

The PhD qualifying exam is offered twice a year prior to the start of the fall and spring semesters. The qualifying exam is intended to test students' breadth of knowledge at the MS level in their research area and to evaluate readiness for research. Students entering with a MS degree are required to attempt the qualifying exam within 18 months of admission to the program. Students entering without a MS degree must attempt the qualifying exam within two years of admission to the program.

The qualifying exam consists of one written exam and one oral exam in the student's primary research area. The available examination areas include:

- Area A: Construction Engineering and Management
- Area B: Environmental Engineering
- Area C: Geotechnical Engineering
- Area D: Structural Engineering
- Area E: Transportation Engineering
- Area F: Water Resources Engineering

The requirements of the written exam (deadlines for exam request, list of topics, allowed aid sheets, calculator policy etc.) are posted on the department's website. The oral exam is conducted by an examining committee of three CEIE graduate faculty, of whom two must be in the student's research area. Students give a five minute research presentation, and answer questions from the examination committee about the written exam, the research presentation and other related topics.

Students who receive an overall passing grade form a dissertation committee and register for CEIE 998 Doctoral Dissertation Proposal. Students who receive an overall failing grade may petition to repeat the exam. If granted, the second attempt, which includes both the written and the oral exam, must be completed within one calendar year. The petition to repeat the exam must be received within one month of the first exam attempt. No more than two exam attempts are permitted. Students who do not receive an overall passing grade are terminated from the program.

Dissertation Research

Students become eligible for CEIE 998 Doctoral Dissertation Proposal upon passing the qualifying exam (preceding section). Upon admission to candidacy, which requires satisfactory preparation and defense of a dissertation proposal, students may register for CEIE 999 Doctoral Dissertation.

Code	Title	Credits
Select 12- 24 credits from the following: [1]		12-24
CEIE 998	Doctoral Dissertation Proposal	

CEIE 999	Doctoral Dissertation (minimum 3 credits required)	
Total Credits		12-24

[1] Note: 60 total credits of coursework is required if only completing 12 credits of research.

Dissertation Committee

A dissertation committee (separate from the examination committee) is formed upon successful completion of the qualifying exams. The dissertation committee is composed of at least four members, including the student's advisor. The student, in consultation with their advisor, shall select at least one other full-time CEIE Department faculty member to serve on the committee, and at least one committee member from outside of the CEIE department. At least three members of the committee are to be members of the Mason graduate faculty. All committee members must hold earned doctorates and possess applicable knowledge and experience in the student's chosen topic. The CEIE Department Chair must approve the composition of the dissertation committee. Additional committee members from outside Mason (e.g., from industry, other institutions, etc.,) may be appointed if approved by the majority of the CEIE faculty. The committee must be formed and approved before admission to candidacy (described in the next section) and before registering for CEIE 999 Doctoral Dissertation. Substitutions to the dissertation committee are allowed with the approval of the CEIE Department Chair.

Dissertation Proposal Preparation and Advancement to Candidacy

After successfully passing the qualifying exams and forming of a dissertation committee, the student may register for CEIE 998 Doctoral Dissertation Proposal research credits and begin preparation of the dissertation research proposal. The student will consult with his or her advisor on the selection of an original scholarly topic and preparation of a formal research proposal. Students are also encouraged to register for the required CEIE 990 Civil and Infrastructure Dissertation Topic Presentation course during this time. Students must schedule a formal proposal defense (also known as the research competency exam) with all members of their chosen committee present. This cannot be done before successful completion of the qualifying exams. Committee members should receive printed copies for the final proposal not less than two weeks prior to the scheduled defense date.

The research competency exam (proposal defense) includes the written proposal and a presentation of the planned dissertation research. The dissertation proposal defense shall not include already completed research. The dissertation proposal defense is the main opportunity for the committee to provide input and for the dissertation committee members to examine the student's knowledge in higher-level coursework and familiarity with existing and emerging research related to the student's research area. After the student's presentation, and after private deliberation, the committee makes a pass/fail determination that is given to the student by his or her advisor.

Students who pass the research competency exam are admitted to candidacy and become PhD Candidates. Students who do not pass the exam may, in consultation with their advisor, schedule a second exam within 120 days of receiving notice of the first exam result. Students who do not successfully pass the research competency within this period are terminated from the program.

Dissertation Research and Defense

On successful completion of the dissertation proposal, students are to conduct original research under the guidance of their dissertation director and dissertation committee members. Students are not to schedule their dissertation defense sooner than two semesters after advancement to candidacy. The dissertation must represent achievement in research, must be a significant contribution to the field of civil engineering, and should be deemed publishable in refereed journals. When the majority of the research has been completed, the candidate is to submit a written draft of the dissertation to the doctoral dissertation committee and schedule an oral defense to be attended by the doctoral dissertation committee. The CEIE department and the CEIE Graduate Coordinator must be notified of the defense at least two weeks prior to the defense to allow time to advertise it broadly.

On successful completion of the oral defense, students must submit a final dissertation that meets the guidelines specified by the Guide for Preparing Graduate Theses, Dissertations, and Projects. If the student fails to defend the dissertation successfully, the student may request a second defense following the same procedures as the initial defense. This request has no time limit, other than the general time limits for the doctoral degree as per Mason policy. The student is strongly advised to consult with the committee before scheduling the second defense. If the student fails on the second attempt to successfully defend the dissertation, the student will be terminated from the PhD program. Following a successful public defense and completion of the final form of the dissertation, the dissertation committee recommends the candidate for the degree of Doctor of Philosophy.

Teaching Opportunities

All PhD students are encouraged to participate in teaching activities in consultation with their major advisors. Teaching opportunities include presenting lectures, conducting recitation sessions, serving as a teaching assistant, working as a laboratory assistant, participating in teaching workshops, preparing course materials, and other related activities approved by the student's advisor.

Environmental Engineering Minor

Banner Code: EENG

Lisa Nolder, Associate Director for Undergraduate Programs

Phone: 703-993-1675
Email: snolder@gmu.edu
Website: https://volgenau.gmu.edu/program/environmental-engineering-minor

Students with engineering majors in CEIE, BIOE, SEOR, and non-engineering majors in Biology, Chemistry, Environmental Science and Policy, Geography and Geoinformation Science, and Geology are especially encouraged to consider this offering. The minor prepares students through additional coursework for subsequent graduate studies in water and environmental engineering at Mason or elsewhere, and for employment in environmental engineering, although the minor by itself does not constitute an engineering qualification.

Admissions & Policies

Policies

Eight credits of coursework must be unique to the minor and students must complete all coursework with a minimum GPA of 2.00. For policies governing all minors, see AP.5.3.4 Minors.

Requirements

Minor Requirements

Total credits: 19

Coursework

ACCT 332: *Intermediate Accounting II.* 3 credits.
This is the second of the two-course financial accounting sequence that examines financial accounting from the viewpoint of preparers and users of financial statements, including preparing financial statements to reflect financing, operating, and investing decisions of the firm and using financial statement information to make financing, operating and investing decisions for the firm. Continuation of ACCT 331. Mid-term and final exams may be scheduled on Saturdays for this class. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ((ACCT 331[C] or 331[XS]) and (FNAN 301[C], L301, 303[C], L303 or 303[XS])).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 351: *Taxation and Managerial Decision Making.* 3 credits.
Introduction to fundamental topics in taxation using a business-entities approach. Specific topics include gross income, deductions, losses, and property transactions. The course emphasizes the identification of planning and compliance issues and the application of tax law to resolve those issues. Both tax and non-tax factors affecting decision making are considered. Mid-term and final exams may be scheduled on Saturdays for this class. Accommodations will be made for religious conflicts, Saturday classes, and certain official university activities. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ((ACCT 301[C] or L301) or (ACCT 303[C], L303 or 303[XS]) or (ACCT 330[C], L330 or 330[XS])).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 361: *Accounting Analytics.* 3 credits.
This course involves the collection, storage, and processing of financial and non-financial data used to report information to internal and external users. The focus is on relational database systems to capture the business processes of an organization and the internal controls embedded in those processes. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ((ACCT 301[C], L301, 303[C], L303, 303[XS], 330[C], L330 or 330[XS]) and (MIS 301[C], L301, 303[C], L303 or 303[XS])).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 370: *International Accounting.* 3 credits.
International Accounting is study of entity reported as multinational company or entity whose reporting obligations to stakeholders are located in a different country. Course focuses on effects of financial reporting, managerial planning and control, international taxation, and international financial statement analysis on multinational reporting entity, and as the convergence of U.S. Generally Accepted Accounting Principles and International Financial Reporting Standards. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ACCT 301[C], 303[C], 330[C], 303[XS], 330[XS], L301, L303, L330, 301T, 303T or 330T.
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 372: *Financial Statement Analysis.* 3 credits.
Detailed overview of financial statement analysis by users of financial statements. Students learn about common features of mandatory and voluntary accounting disclosures, behaviors and interactions among different users of financial statement information. Primary focus is analysis of financial statement information in body of financial statements and footnotes, and implications of those disclosures for firm valuation, fraud prediction, taxation, and governance. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 301[C], L301, 303[C], 303[XS], L303, 330[C], 330[XS] or L330).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 390: *Introduction to Financial Planning and Wealth Management.* 3 credits.
This course provides an introduction to the financial planning process for students interested in a career in financial planning and wealth management. Course topics include education, insurance, and retirement planning. The course also will cover professional responsibilities and regulations governing the financial services industry. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts. Equivalent to FNAN 390.

Registration Restrictions:
Required Prerequisites: (FNAN 303[B-] or L303) and ((ACCT 303[C] or L303) or (ACCT 330[C], 330[XS] or L330)).
[B-] Requires minimum grade of B-.
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

ACCT 408: *Taxes Insurance and Risk Management.* 3 credits.
This course provides a detailed look at tax issues that investors and businesses face. In addition, the class will focus on risk management strategies from the perspective of the business and individual and a detailed look at insurance and insurance products in full detail. The course also will cover professional responsibilities and regulations governing the financial services industry. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ((FNAN 303[B-], 301[B-] or L303) and (ACCT 303[B-], 330[B-], 301[B-], L303, L330 or L301)).
[B-] Requires minimum grade of B-.

Students with a class of Freshman may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 411: *Advanced Managerial Accounting.* 3 credits.
Managerial uses of accounting information in planning, controlling, motivating, and decision making. Emphasizes quantitative and behavioral aspects of managerial accounting. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 311[C] or 311[XS]).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 433: *Advanced Financial Accounting.* 3 credits.
Focuses on advanced topics in financial accounting. Students study accounting business combinations, preparation of consolidated financial statements, accounting for foreign currency transactions, translation and remeasurement of foreign currency financial statements, partnership accounting, interim and segment reporting, and Securities and Exchange Commission reporting issues. International Financial Reporting Standards (IFRS) are discussed. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 332[C] or 332[XS]).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 441: *Estate Planning.* 3 credits.
Students will learn to plan efficient and effective wealth transfers to meet clients' goals. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 351[C] or 351[XS]).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 451: *Advanced Federal Taxation.* 3 credits.
Federal taxation of corporations, partnerships, fiduciaries, and gratuitous transfers. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 351[C] or 351[XS]).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 461: *Assurance and Audit Services.* 3 credits.
Introduction to audit and other assurance services' objectives, theory, and practices. Focuses on developing skills for interpreting business strategies and identifying related business risks, describing internal control solutions to those risks, identifying evidential sources, providing assurance about those risks and controls, and designing strategies to provide assurance services about the reliability of business information. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Specialized Designation: Writing Intensive in Major

Registration Restrictions:
Required Prerequisites: ((ACCT 331[C] or 331[XS]) and (ACCT 361[C] or 361[XS])).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 462: *Honors Seminar in Accounting.* 3 credits.
An in-depth study and analysis of contemporary developments and topics of interest in accounting. Enrollment in this course is limited and competitive. Notes: The topics and format will vary. Enrollment in this course is limited and competitive. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Specialized Designation: Mason Impact.

Recommended Prerequisite: Accounting major, senior standing, permission of instructor.

Registration Restrictions:
Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 465: *Advanced Accounting Analytics.* 3 credits.
This course presents advanced topics in analytics used in the accounting and finance professions. The course focuses on the development of skills required to analyze data captured in enterprise resource planning (ERP) systems – the type of data most often used by accountants – and the exploration and presentation of data for decision making. The topics include a continuation of business process knowledge and advanced skills in data visualization and analysis introduced in ACCT 361. Emerging issues in the accounting and finance professions are also introduced, such as blockchain technology and distributed databases and ledgers. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: ((ACCT 361[C] or 361[XS]) and (ACCT 361[C], 361[XS], MIS 310[C] or 310[XS])).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 472: *Government and Not-for-Profit Accounting.* 3 credits.
Introduction to accounting for nonbusiness organizations. Emphasizes accounting issues unique to these entities, including non-exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, charitable organizations, and the federal government. A third attempt will require academic advisor approval. Offered by School of Business. Limited to two attempts.

Registration Restrictions:
Required Prerequisites: (ACCT 331[C] or 331[XS]).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 491: *Seminar in Accounting.* 3 credits.
Advanced study of accounting concepts and selected topics. A third attempt will require academic advisor approval. Offered by School of Business. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Required Prerequisites: (ACCT 331[C] or 331[XS]).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 492: *Internship in Accounting.* 3 credits.
Opportunity to gain practical, professional experience in conjunction with academic development. An internship is an important part of academic and career preparation. May be used as elective credit, but may not be repeated. Notes: No more than 6 credits of School of Business internship coursework (BUS 492 or ACCT 492) can be applied towards a student's 120 (BU) degree applicable credits. Students must receive departmental approval in order to register for this course; please contact the School of Business Office of Career Services for internal eligibility requirements. Offered by School of Business. May be repeated within the degree for a maximum 6 credits. Equivalent to BUS 492, FNAN 492, MGMT 492, MIS 492, MKTG 492, OM 492, OSCM 492.

Recommended Prerequisite: 75 credit hours

Registration Restrictions:
Required Prerequisites: (ACCT 330[B-], 330[XS] or L330) or (ACCT 303[B-], 303[XS] or L303).
[B-] Requires minimum grade of B-.
[XS] Requires minimum grade of XS.

Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 493: *Financial Planning and Wealth Management Capstone.* 3 credits.
Financial planners need unique skills and knowledge to successfully serve clients. Students will learn the cognition and decision-making of clients and planners, the techniques to facilitate effective counsel, and the planners' professional responsibilities including those of the CFP(c) Board. Students will apply their knowledge through a collaboration with an employer or a financial planning clinic in which they will create a financial plan for an actual client. A third attempt will require academic advisor approval. Offered by School of Business. May be repeated within the degree for a maximum 6 credits. Equivalent to FNAN 493.

Specialized Designation: Writing Intensive in Major

Recommended Corequisite: FNAN 411

Registration Restrictions:
Required Prerequisites: ((ACCT 390[C], FNAN 390[XS] or 390[C]) and ((FNAN 311[C] or 311[XS]) and (ACCT 351[C] or 351[XS]))).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Enrollment limited to students with a class of Senior Plus or Senior.

Non-Degree level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ACCT 499: *Independent Study.* 1-3 credits.
Research and analysis of selected problems or topics in accounting. Notes: Must be arranged with an instructor, and students must receive written approval from the associate dean for undergraduate programs before registration. Written report required. May be repeated if topics vary. Offered by School of Business. May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: 9 hours in upper-level accounting courses.

Registration Restrictions:
Students with a class of Freshman or Sophomore may **not** enroll.

Non-Degree or Washington Consortium level students may **not** enroll.

Students with the Ineligible to take FNAN crses, Ineligible to take FPWM crses or terminated from BU major attributes may **not** enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

ACCT 520: *Fundamentals of Accounting.* 3 credits.
This course will provide students with an understanding of the principles of financial and managerial accounting. Students will gain knowledge and skills needed to prepare the accounting information for external and internal users. Topics include: transactions analysis, the accounting cycle, financial statement analysis, revenue recognition and cost measurement, job costs accounting, analyzing cost-volume-profit relationships, standard costs and variances. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 531: *Foundations of Financial Reporting I.* 3 credits.
Upon completing course students will be knowledgeable about global business and trade as it applies to international financial reporting standards. Students will be capable of recording, analyzing, interpreting, and communicating financial and non-financial information for users of such information in accordance with applicable professional authoritative literature. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: ACCT 301 or BMGT 613, or equivalent with grade of B- or higher or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in a Master of Science degree.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 532: *Foundations of Financial Reporting II.* 3 credits.
Upon completing course students will be knowledgeable about global business and trade as it applies to international financial reporting standards. Students explore topics including: current liabilities and contingencies, bonds and long term notes, leases, accounting for income taxes, pensions, shareholder's equity and share based compensation. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: ACCT 331, ACCT 531, or equivalent and FNAN 301, BMGT 643 or equivalent, both with a grade of B- or higher or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in a Master of Science degree.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 551: *Foundations of Taxation of Business Entities.* 3 credits.
The objective of this course is to build a sound conceptual and technical foundation for the study of federal income taxation that provides students with the tools necessary to stay current with the ever-changing tax law. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in a Master of Science degree.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 561: *Foundations of Assurance Services.* 3 credits.
The course focuses on planning, performing and reporting on an audit of financial statements conducted in accordance with U.S. generally accepted auditing standards (U.S. GAAS). It also introduces the public accounting profession and the services CPAs provide. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: ACCT 331 or ACCT 531 with a B- or better or permission of MSA Program Director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in a Master of Science degree.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

600 Level Courses

ACCT 601: *Online MSA Orientation Course.* 0 credits.
The main objective of this course is to help students understand program expectations and time commitment and prepare themselves for online communication and technology requirements necessary to successfully complete their online MSA degree. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Enrollment in the online MSA program or permission of the MSA academic director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Special scale.

ACCT 611: *Advanced Issues in Managerial Accounting.* 3 credits.
Examines the firm's planning and control decisions that require a more sophisticated approach than the rule-of-thumb procedures advocated for traditional cost accounting problems. Students will work with real-world issues and problems and apply the appropriate analytical model to develop relevant management accounting treatments. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: ACCT 311 and admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 621: *GovCon Acquisition Regulations and Reporting.* 3 credits.
This course will provide students with an understanding on the regulation governing government agency procurement contracts. Students will gain knowledge about various acquisition regulations and requirements applicable to government contracts. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Enrollment in Graduate Certificate in Accounting for Government Contracts or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 623: *Project Accounting and Cost Management.* 3 credits.
This course will provide students with an understanding of the rules for government-wide procurement that have been designed to achieve uniformity and consistency in the cost accounting practices governing measurement, assignment, and allocation of costs to governments contracts. Students will learn project management techniques including budgeting, revenue recognition and cost allocations. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Enrollment in Graduate Certificate in Accounting for Government Contracts or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 624: *GovCon Business Systems and Control.* 3 credits.
This course will provide students an understanding of web-based software and technology solutions used by businesses to manage project based contracts. Students will learn how to navigate various stand-alone or cloud based platforms like resource management, budgeting, timesheets billing, CRM, analytics and project accounting. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Enrollment in Graduate Certificate in Accounting for Government Contracts or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 625: *GovCon Audit and Compliance.* 3 credits.
This course will provide students with an understanding of the audit and assurance requirements for government contracts. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Enrollment in Graduate Certificate in Accounting for Government Contracts or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 630: *Advanced Financial Accounting.* 3 credits.
This course covers advanced topics in financial accounting like business combinations and preparation of consolidated financial statements. Students are also introduced to specialized accounting issues related to partnerships and segment reporting. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (ACCT 332[C] or 332[XS]).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Accounting, Business Administration or Forensic Accounting.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 633: *Advanced Issues in Financial Reporting.* 3 credits.
Students will gain knowledge and skills used in the interpretation of complex corporate financial accounting issues and in the preparation of complex financial statements. Topics include acquisitions, consolidations, derivatives, segment reporting, partnerships, and SEC reporting. Students also will learn to conduct research using the FASB Accounting Standards Codification to resolve ambiguous reporting issues. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Permission of MSA Director if not already enrolled in the MSA program.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major, minor, or concentration in Accounting or Business Administration.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 636: *Fraud Examination.* 3 credits.
Introduces strategies and techniques for fraud prevention and detection. Focuses on financial fraud such as bribery, contract rigging and kickbacks, embezzlement, fraudulent financial reporting, payroll fraud, and misappropriation of inventory and other assets. Several real-life cases and examples will be used to illustrate how to detect and prevent

fraud. Offered by School of Business. May not be repeated for credit. Equivalent to GBUS 744, MBA 744.

Recommended Prerequisite: Admission to MSA program or permission of program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 641: *Estate Planning.* 3 credits.
Students will learn to plan efficient and effective wealth transfers to meet clients' goals. Topics include transfers of property outright or with trusts, wills, and powers of appointment; use of the marital deduction; valuation of assets; and buy-sell agreements. Students will learn differences in planning for citizens and non-citizen as well as traditional and non-traditional families. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Graduate.

Enrollment is limited to students with a major in Accounting.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 651: *Advanced Issues in Taxation.* 3 credits.
Examines the application of the federal income tax law to C-corporations, S-corporations, and partnerships. Topics will include the formation, operations, and dissolutions of such entities. Students will read and apply primary tax authorities to client fact patterns and engage in significant professional research and writing. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Admission to the MSA program or permission of the program director. ACCT 351 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

Enrollment is limited to students with a major, minor, or concentration in Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 661: *Accounting Analytics.* 3 credits.
This course involves the collection, storage, and processing of financial and nonfinancial data used to report information to internal and external users. The focus is on relational database systems to capture the business processes of an organization and the internal controls embedded in those processes. Technical skills including the design and implementation of ERP systems is emphasized. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Have not completed ACCT 361 or equivalent, or permission of the Program Director

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 665: *Advanced Accounting Analytics.* 3 credits.
This course presents advanced topics in analytics used in business professions. The course focuses on the development of skills required to analyze data captured in enterprise resource planning (ERP) systems – the type of data most often used by business professionals – and the exploration and presentation of data for decision-making. The topics include a continuation of business process knowledge and advanced skills in data visualization and analysis. Emerging issues in business are also introduced, such as blockchain technology and distributed databases and ledgers. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ((ACCT 661^{C}, 661^{XS} or 661^{XP}) or (ACCT 361^{C} or 361^{XS}) or (MIS 310^{C} or 310^{XS})).
^{C} Requires minimum grade of C.
^{XS} Requires minimum grade of XS.
^{XP} Requires minimum grade of XP.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 670: *International Accounting.* 3 credits.
International Accounting is study of entity reported as multinational company or entity whose reporting obligations to stakeholders are located in a different country. Course focuses on effects of financial reporting, managerial planning and control, international taxation, and

international financial statement analysis on multinational reporting entity, and as the convergence of U.S. Generally Accepted Accounting Principles and International Financial Reporting Standards. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: BUS 200[C], ACCT 303[C], 330[C], FNAN 303[C], BUS 200[XS], ACCT 303[XS], 330[XS] or FNAN 303[XS].
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 671: *Managing Data Quality and Integrity.* 3 credits.
This course provides students with the current techniques used by business professionals to manage and improve data quality for later analysis and use in managerial decision making. The course focuses on the development of the skills required to collect and extract data and validate data integrity. The topics covered include data extraction, data transformation, data cleansing, data classification, and data automation. Further, the course introduces students to the topics of data warehousing and advances their knowledge of data mining techniques. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Demonstrated proficiency in introductory database management theory may substitute for required prerequisites.

Registration Restrictions:
Required Prerequisites: ACCT 661[C], 661[XS], 661[XP], 361[C], MIS 310[C], ACCT 361[XS] or MIS 310[XS].
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.
[XP] Requires minimum grade of XP.

Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 672: *Governmental and Nonprofit Accounting.* 3 credits.
Accounting and Reporting for non-business organizations. Emphasizes accounting issues unique to these entities, including non-exchange transactions and lack of ownership interest. Includes accounting and reporting for state and local governments, nongovernment organizations, and the federal government. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Accounting or Government Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 690: *Professional Accounting Colloquium.* 3 credits.
The Professional Accounting Colloquium is designed to give graduate accounting students the opportunity to identify, develop, and improve professional skills and attributes critical to success in the accounting profession. Students will gain an understanding of these professional accounting skills and attributes from both a theoretical and applied perspective. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

Enrollment is limited to students with a major, minor, or concentration in Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale.

ACCT 695: *Graduate Field Experience.* 1-3 credits.
This course provides a framework for approaching, successfully completing, and reflecting upon a professional field experience in accounting. The course is designed for students who will complete semester long internship in the field of accounting either in public accounting or in industry. Offered by School of Business. May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Permission of MSA Program Director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to students with a major in Accounting or Forensic Accounting.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Regular scale.

ACCT 696: *Directed Studies in Accounting.* 1-3 credits.
Approval by faculty member and program director required prior to registration. Studies specialized topics in business not otherwise available in the curriculum. Offered by School of Business. May be repeated within the degree for a maximum 3 credits.

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate or Undergraduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

ACCT 697: *Special Topics in Accounting.* 1-3 credits.
Sections established as necessary to focus on various topical issues that emerge in practice of accounting. Offered by School of Business. May be repeated within the term for a maximum 6 credits.

Specialized Designation: Topic Varies

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Special scale.

700 Level Courses

ACCT 701: *Business Valuation.* 3 credits.
Provides hands-on-experience in financial statement analysis and valuation. Takes an accounting-based valuation perspective and offers a comprehensive framework for analyzing financial statements consisting of (a) Business Strategy, (b) Accounting Analysis, (c) Financial Analysis, and (d) Prospective Analysis and Valuation. Offered by School of Business. May not be repeated for credit. Equivalent to MBA 701.

Recommended Prerequisite: Admission to the MSA program or permission of instructor. Grade of B or better in MBA 613.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 708: *Taxes and Business Strategy.* 3 credits.
Provides a framework for making managerial decisions in a global tax environment. Examines business decisions such as location of facilities, employee compensation, mergers and acquisitions, capital and asset structure, and business form. Focuses on tax planning concepts and the effect of taxes on business decisions. Offered by School of Business. May not be repeated for credit. Equivalent to MBA 708.

Recommended Prerequisite: Admission to the MSA program or permission of instructor. Completion of MBA core requirements.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 737: *Fraud and the Law.* 3 credits.
Provides an overview of US legal system including law-making process, structure of court system, and how frauds are brought to trial, prosecuted and resolved. Explores common fraud statutes used to penalize wrongdoers. Course will examine evidentiary rules including types of evidence, hearsay, impeachment and privileges. Highlight the legal requirements for serving as an expert witness and testifying in court. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 738: *Advanced Topics in Fraud.* 3 credits.
Course will cover advanced topics in forensic accounting. The focus will be on contemporary issues in fraud. Examples of topics include litigation support, money laundering, consumer fraud, bankruptcy, divorce and tax fraud, fraud in e-commerce, insurance fraud and mortgage fraud. The course will provide a comprehensive look at fraud investigation. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:

Required Prerequisites: ACCT 636[C], 636[XS], 636[XP], MBA 744[C], 744[XS] or 744[XP].
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.
[XP] Requires minimum grade of XP.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 741: *Information Technology Auditing.* 3 credits.
Introduces methodologies to assess security and control issues concerning accounting and other information systems. Key feature of course is applying computer-assisted audit tools and techniques to test effectiveness of application controls. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Permission of program director if not already admitted to MSA or MBA program.

Registration Restrictions:
Enrollment is limited to students with a major in Accounting or Business Administration.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 742: *Governance and Ethics.* 3 credits.
Focuses on developing understanding of corporate governance issues and ethical decision making. Topics include examination of internal and external international governance issues, and ethical analysis in current business environment. Offered by School of Business. May not be repeated for credit. Equivalent to MBA 742.

Recommended Prerequisite: Permission of program director if not already admitted to MSA or MBA program.

Registration Restrictions:
Enrollment is limited to students with a major in Accounting, Business Administration, Forensic Accounting or Government Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 743: *Corporate Financial Reporting.* 3 credits.
Addresses contemporary issues in corporate financial reporting. Focuses on role of financial reporting in providing decision-useful information to participants of capital market, and theoretical and empirical assessments of its performance. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Permission of program director if not already admitted to MSA or MBA program.

Registration Restrictions:
Enrollment is limited to students with a major in Accounting or Business Administration.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ACCT 771: *Audit Analytics.* 3 credits.
This course prepares students to enter a rapidly changing audit environment. The course provides students with current techniques used by accounting and finance professionals to improve audit efficiency and effectiveness through data analytics. The topics covered include auditing through information systems, continuous auditing, automated audit procedures, and artificial intelligence to support judgment and decision-making. Emerging issues that impact the audit function are also covered, such as blockchain technologies, information assets and digital currencies. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (ACCT 665[C], 665[XS] or 665[XP]) and (ACCT 671[C], 671[XS] or 671[XP]).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.
[XP] Requires minimum grade of XP.

Enrollment limited to students with a class of Advanced to Candidacy or Graduate.

Enrollment is limited to students with a major in Accounting Analytics or Accounting.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 772: *Federal Accounting and Reporting.* 3 credits.
Designed to give graduate students the opportunity to learn about accounting and reporting issues facing government accounting professionals. The course discusses the differences between the federal sector and other sectors, and the integral use of budgetary accounting versus the more traditional financial accounting. Students will learn about federal reporting at both the agency and government-wide level, be introduced to innovative reporting practices in the federal government and will build critical writing and reporting skills. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: ACCT 672[C], 672[XS], 672[XP], 472[C] or 472[XS].

[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.
[XP] Requires minimum grade of XP.

Enrollment is limited to students with a major in Accounting or Government Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 781: *Tax Analytics.* 3 credits.
This course prepares accounting students to be effective tax leaders. It focuses on emerging issues in tax analytics using case studies and applied technologies. The topics include extracting and analyzing tax data for risk analysis, tax strategy, transfer pricing, artificial intelligence, and technology automation related to the tax function. Emerging issues that impact the tax profession are also covered, such as blockchain technologies, information assets and digital currencies. Offered by School of Business. May not be repeated for credit.

Registration Restrictions:
Required Prerequisites: (ACCT 665[C], 665[XS] or 665[XP]) and (ACCT 671[C], 671[XS] or 671[XP]).
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.
[XP] Requires minimum grade of XP.

Enrollment is limited to students with a major in Accounting Analytics or Accounting.

Enrollment limited to students in a Graduate Certificate or Master of Science degrees.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 792: *Seminar in Accounting.* 3 credits.
Selective analysis of topics addressing important issues in contemporary accounting practice. Discussion of two or three major topics. Offered by School of Business. May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ACCT 795: *Global Accounting Environment.* 3 credits.
Examines the activities of accounting firms competing in the global business environment. Students will observe these activities in residency and study the decision-making processes of international accounting firms to develop an understanding of the regulatory environment of global accounting. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Admission to the MSA program or permission of the program director.

Registration Restrictions:
Enrollment is limited to students with a major, minor, or concentration in Accounting.

Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ACCT 796: *Independent Studies/Directed Readings.* 1-3 credits.
Research and analysis of selected problems or topics in accounting not otherwise available in curriculum. Notes: Approval of faculty member and program director required. Offered by School of Business. May not be repeated for credit.

Recommended Prerequisite: Permission of Program Director.

Registration Restrictions:
Enrollment is limited to Graduate level students.

Students in a Non-Degree Post-Baccalaureate or Non-Degree Undergraduate degrees may **not** enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

African and African American Studies (AFAM)

200 Level Courses

AFAM 200: *Introduction to African American Studies.* 3 credits.
Interdisciplinary introduction to the field of African American studies. Includes comparative analysis of approaches, methodologies, and key concepts related to the study of people of African descent in the United States, continental Africa, and throughout the African diaspora. Lectures and discussion integrate attention to such issues as diversity and multiculturalism from national and global perspectives. Offered by African & Af-American Studies. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

300 Level Courses

AFAM 390: *Special Topics in African and African American Studies.* 3 credits.
Study of selected topics related to the study of people of African descent in Africa, the United States, the Caribbean, Latin Americas and throughout

the African Diaspora. Notes: May be repeated when topic is different. Offered by African & Af-American Studies. May be repeated within the term for a maximum 12 credits.

Specialized Designation: Topic Varies

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

AFAM 490: *Internship.* 1-6 credits.
Approved work-study program in cooperation with specific organizations including area museums; NGOs; and local, state, and federal agencies. Students should arrange for an internship in the semester before they wish to enroll. Permission required from program director. Offered by African & Af-American Studies. Limited to three attempts.

Schedule Type: Internship

Grading:
This course is graded on the Undergraduate Regular scale.

AFAM 499: *Independent Study.* 1-3 credits.
Investigation of an area related to African American studies according to individual interest, with emphasis on research. Permission required from program director. Offered by African & Af-American Studies. May be repeated within the term for a maximum 9 credits.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

Anthropology (ANTH)

100 Level Courses

ANTH 114: *Introduction to Cultural Anthropology.* 3 credits.
Overview of major ideas and approaches to the study of cultures around the world. Surveys kinship, social organization, political economy, religious beliefs, language and other aspects of non-Western cultures. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 120: *Unearthing the Past: Prehistory, Culture and Evolution.* 3 credits.
Introduction to archaeology. Explores the ways in which the archaeological record contributes to issues and debates about the human past and present, as well as the lab and field methods used for understanding archaeological remains. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 121: *People of the Earth: Humanity's First Five Million Years.* 3 credits.
Introduction to world prehistory. Begins with the biological, cultural, and technological evolution of the human species during a period known as the Paleolithic, followed by a consideration of developments following the end of the last Ice Age, focusing primarily on the origins of agriculture and the rise of complex societies around the globe. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 135: *Introduction to Biological Anthropology.* 3 credits.
Uses an evolutionary perspective to introduce students to the study of humans and non-human primates as biological organisms. The course will analyze the genetic and environmental bases for modern human biological variation, understand primate behavior and biological relationships, and reconstruct the fossil record. Discussions about prehistoric skeletal remains will emphasize biological responses to changes in subsistence and social structure. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Natural Science Overview, Social/Behavioral Sciences

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

300 Level Courses

ANTH 300: *Civilizations.* 3 credits.
Cross-cultural and transtemporal examination of complex societies and civilizations. Explores developmental schema for rise, articulation, spread, and decline of historic and contemporary civilizations. Offered by Sociology & Anthropology. Limited to three attempts.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 302: *Peoples and Cultures of Latin America.* 3 credits.
Examines Latin American cultures and selected aspects of historical record. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Specialized Designation: Non-Western Culture

Recommended Prerequisite: ANTH 114, 60 hours, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 307: *Ancient Mesoamerica.* 3 credits.
Examines the peoples and cultures of ancient Mesoamerica, including Olmec, Maya, Teotihuacan, and Aztec societies. Major topics include

the rise of civilization, the development of the Mesoamerican cultural tradition, the growth of cities, trade, exchange, writing systems, political organization, religion, conflict, and the archaeological study of this indigenous heritage. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Specialized Designation: Non-Western Culture

Recommended Prerequisite: ANTH 120, 60 credits, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 308: *Peoples and Cultures of the Middle East.* 3 credits.
Examines the anthropological literature on peoples and cultures of the Middle East, with particular attention to political and social change over the course of the 20th century. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 309: *Peoples and Cultures of India.* 3 credits.
Examination of South Asia, with emphasis on India. Includes general overview of prehistory and history; impact of colonialism; contemporary Indian culture, including the changing relations of caste and class, family organization, and the roles of women, religion, and ideology; and current trends in economic development and socioeconomic differences in different parts of the country. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 312: *Political Anthropology.* 3 credits.
Examines cultural and ecological contexts of political structures and competition for power in selected societies; and cross-cultural and comparative approaches to study of political conflict, leadership, values, and symbolism. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Recommended Prerequisite: ANTH 114, 60 hrs, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 313: *Myth, Magic, and Mind.* 3 credits.
Examines religion as a cultural system. Topics include mythology, ritual, symbolism, and dogma. Emphasizes cross-cultural and predominantly non-Western material. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 314: *Zombies.* 3 credits.
Explores how human beings across cultures have historically expressed social anxieties through references to the one particular manifestation of the undead: zombies, figures representing a state in which human beings are animate and affective in the world around them, but lack consciousness or free will. Offered by Sociology & Anthropology. Limited to three attempts.

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 320: *Global Africa.* 3 credits.
Explores the complex and distance-defying connections shaping Africa and being shaped by Africans on the continent. Emphasizes the diversity and change characterizing peoples who are at the center of world processes. Topics include popular representations of Africa and Africans, colonial and postcolonial histories, gender, money, family, religion, environment, and health. Offered by Sociology & Anthropology. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 322: *Pirates, Conquest, and Death: Archaeology and Globalism since 1500.* 3 credits.
Examines materials, theories, and methods of archaeology derived from and applied to historical sites, as they complement archival records. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 120, 60 hrs, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 324: *Warfare, Violence, and Sacrifice in Antiquity.* 3 credits.
Examines origin and nature of conflict in human society with an emphasis on the ancient past. Major topics include the possible role of violence in human evolution, cross-cultural studies of conflict in indigenous society, warfare in early states, and sacrifice as a ritual practice. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 120, 60 credits, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 325: *Field Techniques in Archaeology.* 3-6 credits.
Intensive study of archaeological field techniques by directed group projects in site survey, site testing, recording techniques, and stratigraphy through discussions, demonstrations, and hands-on experience. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: ANTH 120, 60 hours, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 330: *Peoples and Cultures of Selected Regions: Non-Western.* 3 credits.
Examines cultures of a specific region such as Africa and the Middle East. Focuses primarily on non-Western cultures. Offered by Sociology & Anthropology. Limited to three attempts.

Specialized Designation: Non-Western Culture

Recommended Prerequisite: ANTH 114, 60 credits, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 331: *Refugees.* 3 credits.
Introduction to causes and consequences of forced dislocation as a global issue. Covers formally recognized refugees, as well as people such as internally displaced persons and asylum seekers who are in refugee-like circumstances. Focuses on understanding the personal experiences of refugees and examining efforts on their behalf at national and international levels. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Recommended Prerequisite: ANTH 114, 60 credits, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 332: *Cross-Cultural Perspectives on Globalization.* 3 credits.
Examines the varieties of cultural experience. Several cultures are studied in depth; with attention to local histories, global contexts, and shifting perspectives on the practice of ethnography. Notes: May be used for credit toward the BA in sociology. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 340: *Comparative Perspectives on Immigration.* 3 credits.
Considers the dimensions and meanings of the immigrant experience in the United States, with a focus on the diversity of immigrants and refugees who have arrived during the past 30 years. Emphasis on the social context in which immigration occurs and on the bearing of institutional and cultural influences on patterns of adaptation, assimilation, and exclusion from the host society. Offered by Sociology & Anthropology. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 345: *Ritual and Power in Social Life.* 3 credits.
Domains of religion and ritual are conjoined by questions of power: its deployment, distribution, and forms of resistance it engenders. Course investigates connections among religious thought, ritual practice, and social action by drawing on a variety of theoretical orientations in the social sciences including structuralism, semiotics, and performance theory. Offered by Sociology & Anthropology. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 350: *Human Growth and Development.* 3 credits.
Introduces human developmental stages in terms of behavior, biology, and genetics. Addresses the history and methods of human growth research. Explores the environmental and socioeconomic influences on human growth. Investigates the evolution of uniqueness in human developmental stages of the human species in comparison of other primates. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 353: *Anthropological Genomics.* 3 credits.
Deepens knowledge of genome technologies, the history of genome research, and how genomics has contributed to our understanding of humanity past and present. Considers how different paradigms of evolutionary thought have influenced the field and how forces of evolution act to shape genome variation in humans. Considers the central role of genomics in the both the rise of and resistance to race science, and how an anthropological perspective is essential to gain a fuller understanding of the social and political dimensions of genome science. Provides hands-on training of laboratory techniques for generating, analyzing, and interpreting human genome data and contextualizes these methods within historical and ethical frameworks. Traces how genome scientists have used these techniques to better understand human evolution, population history, health, and biodiversity. Evaluates the power of genome science to impact questions of human agency, kinship,

identity, ancestry, and belonging. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135 or similar introductory level coursework in biology.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 355: *Human Origins.* 3 credits.
Explores the fossil evidence for human and primate evolution. Exposes students to evidence for the origins of mammals and primates, and to discussions of human evolution. Uses human fossils as tools to understand evolutionary relationships (phylogenetics), behavior, functional anatomy, and broader adaptation. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 357: *Bioarchaeology.* 3 credits.
Introduces students to the study of human skeletal remains and their associated archaeological artifacts, focusing on using the human skeleton to address behavior, growth, stress, ritual, social complexity, diet, disease, and violence in the past. Uses the human body and associated artifacts to provide a detailed analysis of cultural transitions, expression of socioeconomic inequality, the origins of ritual complexity, violence, and disease. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 363: *Humans, Disease, and Death.* 3 credits.
Explores human health and disease from anthropological and evolutionary perspectives. Examines what a disease is, what causes them, how we have co-evolved with diseases, how disease patterns have changed over human history, and the future of disease. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Social/Behavioral Sciences

Specialized Designation: Mason Impact.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 365: *Scientific Racism and Human Variation.* 3 credits.
Explores scientific methods of classification as a reflection of social values. Explains the harms of "race" and eugenics committed under the aegis of science. While critiquing the biological concept of race, considers how the social construction of race becomes part of living bodies through racism. Details modern human variation as a product of evolutionary forces. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135, 60 hours or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 366: *Food and Human Evolution.* 3 credits.
Explores the relationship between diet and human adaptation from biological, archaeological, cultural, and evolutionary perspectives. Examines how humans are unique in our ability to find and process a wide range of foods. Introduces agriculture as a co-evolutionary strategy between humans and other species. Offered by Sociology & Anthropology. Limited to three attempts.

Specialized Designation: Mason Impact.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 367: *DNA, Identity, and Power.* 3 credits.
Considers the history and development of genomics in relation to questions of human identities and belonging, including issues of race, cultural heritage, sex, gender, sexuality, violence, and monogamy. Evaluates how genomics has become a seemingly authoritative source of knowledge about human identities and our relations to one another, and assesses the consequences of genomic truth claims in society today. Evaluates the field of genomics as a form of knowledge production and also as a culturally and politically situated process. Brings science into better relation with critical race theories, Indigenous studies, and queer and feminist science studies to disrupt and reinvent how genomic knowledge of humans is made and understood. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135 or additional introductory coursework in one or more of the following areas: Biological and/or Cultural Anthropology; Biology; Science and Technology Studies; History of Science and/or Medicine; African and African-American Studies; Native American Studies; Latin American Studies; LGBTQ Studies; and Women and Gender Studies.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 370: *Environment and Culture.* 3 credits.
Examines relationships among environment, culture, and human behavior with an emphasis on cultural ecological explanations in mainly non-Western contexts. Offered by Sociology & Anthropology. Limited to three attempts.

Specialized Designation: Green Leaf Focused Course

Recommended Prerequisite: ANTH 114, or 60 hours, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 373: *Archaeological Science.* 3 credits.
Explores the use of the biological and physical sciences in archaeology. Topics include dating, site discovery, prehistoric ecology, diet and technology. Emphasizes the ways in which data deriving from the archaeological sciences can contribute to a more contextualized and theoretically sophisticated understanding of the human past. Offered by Sociology & Anthropology. Limited to three attempts.

Registration Restrictions:
Required Prerequisites: ANTH 120[C], 120[XS], 135[C] or 135[XS].
[C] Requires minimum grade of C.
[XS] Requires minimum grade of XS.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 374: *Archaeology of Hunter-Gatherers.* 3 credits.
Explores the nature of traditional hunter-gatherer societies and the range of methods and theories employed by archaeologists to reconstruct the lifeways and practices of prehistoric hunter-gatherers. Topics include ecology, diet, social organization, mobility, ritual, and technology from a cross-cultural perspective; case studies will derive primarily from tropical/sub-tropical and northern forager populations. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 114 or ANTH 120

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 375: *Culture, Power, History.* 3 credits.
Use of ethnographic, archaeological, linguistic, and documentary data, in light of anthropological theory, to interpret the past and processes of change among indigenous peoples throughout the world. Offered by Sociology & Anthropology. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 376: *Food and Culture.* 3 credits.
Examines a variety of experiences through foods, which bring not only nutritional but also sociocultural debates to our table (e.g. identity, memory, senses, ethnicity, gender, geopolitics, climate change, and globalization). Focuses on both Western and non-Western cultures. Offered by Sociology & Anthropology. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 377: *Mortuary Archaeology.* 3 credits.
Focuses on the study of burial patterns and death rituals in antiquity by introducing students to the methods of burial excavation, examining the history of mortuary archaeology theory and engagement with processual and postprocessual schools of thought, and examining case studies from around the world to decode the complex symbolisms encoded in burial practices. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 378: *Humans and Animals.* 3 credits.
Provides an introduction to anthropology of human's relationship with animals across a large geographic and temporal span. From domestication of animals to animism, pets and animal classification systems, course explores society's attitudes toward and dynamic interactions with the animal kingdom. Offered by Sociology & Anthropology. Limited to three attempts.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 379: *Andean Archaeology.* 3 credits.
Examines 12,000 years of pre-Hispanic cultures of the Andean region of western South America. Focuses on the development and key achievements of some of the most remarkable civilizations of the New World, including the Chavin, Paracas, Cupisnique, Moche, Sicán, Nasca, Chimú, Wari, and Inka. Considers as well the nature, priorities, and accomplishments of scientific Andean archaeology. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 380: *Language and Culture.* 3 credits.
Anthropological analyses of language behavior, origins, and change. Emphasizes the interplay of language, culture, anthropology, and linguistics. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 114, 60 credits, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 381: *Medical Anthropology.* 3 credits.
Surveys the discipline of medical anthropology, focusing on traditional medical beliefs and the diverse responses to modern scientific medicine in developing countries and among cultural minorities in the United States. Offered by Sociology & Anthropology. Limited to three attempts.

Specialized Designation: Non-Western Culture

Recommended Prerequisite: ANTH 114, 60 credits, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 382: *Urban Anthropology.* 3 credits.
Uses tools and resources of sociocultural anthropology to study life in cities in a comparative, global context, including topics such as poverty, discrimination, migration, transnationalism, and urban planning. Case studies draw from different urban environments in Asia, Latin America, Europe, Africa, and North America. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Global Understanding

Recommended Prerequisite: ANTH 114 and 60 credits, or Permission of Instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 386: *Quantitative Methods in Anthropology.* 3 credits.
Introduces students to statistical methods used in anthropology. Emphasizes appropriate and creative application of statistical tests to anthropological problems and careful interpretation of results. Explores methods used to compare means, variances, and correlations within and between samples. Provides instruction on methods used in anthropological demography. Builds fluency in the use of statistical software. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 114, 120, 135

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 387: *Zooarchaeology.* 4 credits.
Explores the methods and theories applied in zooarchaeology through integrating hands-on assignments working with a comparative collection. Examines how archaeologists can understand human-animal relationships in the past including their role in reconstructing paleoenvironments, their contribution to ancient foodways, domestication of animals, and ritual uses of fauna. Offered by Sociology & Anthropology. Limited to three attempts.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 388: *Human Osteology.* 3 credits.
Introduces students to the methods of modern human skeletal analysis in bio- and forensic anthropology. Covers introductory human skeletal and dental gross anatomy and describes analytical techniques spanning including age and sex estimation, osteometry, and paleopathology. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 389: *Human Osteology Lab.* 2 credits.
Laboratory course associated with ANTH 388. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Recommended Corequisite: ANTH 388.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 390: *History of Anthropological Thought.* 3 credits.
Overview of the major theoretical traditions and schools of thought in anthropology. Notes: Required for Anthropology majors, and for students applying to the Accelerated Master's program in Anthropology. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 114 and 60 credits, including 6 credits of ANTH 300-level (or above) courses, or permission of instructor

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 391: *Forensic Anthropology.* 3 credits.
Human remains play key roles in medicolegal investigations. Provides an overview of contemporary forensic anthropology including age and sex estimation from human remains, estimation of the time since death, analysis of sharp force, blunt force, and gunshot trauma, mass disaster contexts, and the forensic archaeological recovery of buried remains. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 392: *Forensic Anthropology Lab.* 2 credits.
This lab class in the companion to ANTH 391. Involves hands-on lab exercises in the learning of methods in modern forensic anthropology, covering age and sex estimation from human remains, estimation of the time since death, analysis of traumatic trauma, individual identification, and archaeological recovery of buried remains. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Recommended Corequisite: ANTH 391.

Schedule Type: Laboratory

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 393: *Paleopathology.* 3 credits.
Provides an introduction to the field of paleopathology which involves identification of pathological conditions in human skeletal remains, and reconstruction of the natural history and co-evolution of disease with humans. Covers the differential diagnosis and history of infectious pathogens, skeletal trauma, oral diseases, metabolic abnormalities,

developmental defects, and more. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 135.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 394: *Archaeology of Climate Change.* 3 credits.
Explores the contributions that archaeology can make to the study of climate change, past and present. Emphasizes the methods and theories used by archaeologists to reconstruct past environments and to evaluate the nature of human responses to climate change. Explores cases in which climate change has been evoked as a causal mechanism for human biological and behavioral change (spanning from the origins of the human lineage to the collapse of civilizations), while also addressing the ways in which archaeological data can contribute to dialogue about the changes in climate we are experiencing today and how climate change is impacting the preservation of cultural heritage. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 120

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 395: *Work, Technology, and Society: An IT Perspective.* 3 credits.
Introduction to the anthropology of work, technology, and society, with emphasis on information technology. Covers general conceptual issues of information technology and also involves specific practical exercises with computers, their operating systems, the logic of automated production, databases, and web-based communication. Attention also directed to social and ethical issues raised by contemporary information technology. Offered by Sociology & Anthropology. Limited to three attempts.

Mason Core: Info Tech & Computing

Recommended Prerequisite: ANTH 114, 60 hours, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 396: *Issues in Anthropology: Social Sciences.* 3 credits.
Topic of contemporary interest in anthropology, focusing on social science topics of interest. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 18 credits.

Mason Core: Social/Behavioral Sciences

Specialized Designation: Non-Western Culture

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 398: *Study Abroad.* 1-6 credits.
Field project or study abroad experience leading to the production of a written report Notes: May be repeated with permission of department. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 399: *Issues in Anthropology.* 3 credits.
Topic of contemporary interest in anthropology, changing from semester to semester, and focusing on topics such as sex roles, anthropology and ethics, and primate social organization. Notes: May be repeated for credit when topic is different. Offered by Sociology & Anthropology. May be repeated within the term.

Recommended Prerequisite: ANTH 114, 60 hours, and permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

400 Level Courses

ANTH 400: *Engaging the World: Anthropological Perspectives.* 3 credits.
Examines selected topics with emphasis on the integration of different kinds of knowledge and the balancing of alternative ways of assessing meaning and relevance. Topics usually drawn from issues of global economic processes, civic rights and responsibilities, ethics, museums, public policy, the environment, and migration. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 9 credits.

Mason Core: Synthesis

Recommended Prerequisite: ANTH 114, 60 credits, or permission of instructor.

Schedule Type: Seminar

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 440: *Applied Anthropology.* 3 credits.
Examines the needs and problems of communities and organizations and develops professional skills for a career in applied anthropology. Topics include the history of applied anthropology, research methods and ethics, fields in which applied anthropologists work, career options, and professionalization. Students prepare a career portfolio and other documents common in the workplace for applied anthropologists. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: ANTH 114, 60 hours, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 450: *Qualitative Methods: Nonstatistical Approaches in Culture and Social Research.* 3 credits.
Explores some of the most useful nonquantitative research techniques in social sciences and offers practice in their application. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: 60 credits and 6 credits of ANTH including ANTH 114, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 488: *Gender, Sexuality, and Culture.* 3 credits.
Examines how gender, sexuality, race, and class come together as analytically distinct, yet practically intertwined, systems of meaning and practice. Examples highlight questions of political economy and history while focusing on specific ethnographic or historical readings. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: 60 hours and ANTH 340 or Permission of Instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 490: *Theories, Methods, and Issues II.* 3 credits.
Second of a two-course sequence that reviews major theoretical traditions and schools of thought in anthropology. Notes: Required for anthropology majors and usually taken as a senior seminar. Offered by Sociology & Anthropology. Limited to three attempts.

Specialized Designation: Writing Intensive in Major

Recommended Prerequisite: 60 hours and 9 hours of ANTH, including ANTH 390, or permission of instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 495: *Internship.* 1-6 credits.
Supervised project in applying anthropology in relevant settings including public and historical archaeology, developmental anthropology, museums, non-profit organizations, advocacy, communications, or consulting organizations. Notes: Students must complete 45 hours of work at the internship site for each credit. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: 60 credits or permission of instructor.

Schedule Type: Internship

Grading:
This course is graded on the Satisfactory/No Credit scale.

ANTH 496: *Evolutionary Theory.* 3 credits.
Considers evolution as a biological as well as cultural concept. Parallels and contrasts among conceptual approaches allow a critique of the potential of evolution as a unifying biosocial theory. Offered by Sociology & Anthropology. Limited to three attempts.

Recommended Prerequisite: 60 hours and 9 hours of ANTH, including ANTH 390, or Permission of Instructor.

Schedule Type: Lecture

Grading:
This course is graded on the Undergraduate Regular scale.

ANTH 499: *Independent Research.* 1-12 credits.
Individual research on a topic to be organized in advance by student and instructor. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 12 credits.

Schedule Type: Independent Study

Grading:
This course is graded on the Undergraduate Regular scale.

500 Level Courses

ANTH 535: *Anthropology and the Human Condition: Seminar I.* 3 credits.
Examines some of the major theorists of 19th- and early 20th-century cultural theory. Marx, Freud, Durkheim, and Weber are surveyed as foundational thinkers for reading the works of such 20th-century theorists as Boas, Malinowski, Benedict, and Sapir. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ANTH 536: *Anthropology and the Human Condition: Seminar II.* 3 credits.
Examines contemporary theorists of anthropology, covering ongoing debates over epistemology and the multiple strands that inform anthropological theory and practice. Offered by Sociology & Anthropology. May not be repeated for credit.

Recommended Prerequisite: ANTH 535.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ANTH 545: *Ritual and Power in Social Life.* 3 credits.
Domains of religion and politics are conjoined by questions of power: its deployment, distribution, and forms of resistance it engenders. Course investigates connections among religious thought, ritual practice, and political action by drawing on a variety of theoretical orientations in the

social sciences including structuralism, semiotics, psychoanalysis, and performance theory. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 555: *Policy and Culture.* 3 credits.
Examines the relevance of cultural processes to policymaking and the culture of policymaking organizations. Topics include development, welfare policy, environmental and energy policy, regulation and risk; health care and immigration policy; and the war on drugs. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ANTH 556: *Human Growth and Development.* 3 credits.
Introduces human developmental stages in terms of behavior, biology, and genetics. Addresses the history and methods of human growth research. Explores the environmental and socioeconomic influences on human growth. Investigates the evolution of uniqueness in human developmental stages of the human species in comparison of other primates. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 557: *Human Origins.* 3 credits.
Explores the fossil evidence for human and primate evolution. Exposes students to evidence for the origins of mammals and primates, and to discussions of human evolution. Uses human fossils as tools to understand evolutionary relationships (phylogenetics), behavior, functional anatomy, and broader adaptation. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 570: *Andean Archaeology.* 3 credits.
Examines 12,000 years of pre-Hispanic cultures of the Andean region of western South America - that constituted the most remarkable complex civilizations of the New World. Focuses on the development and key achievements of the Chavin, Paracas, Cupisnique, Moche, Sican, Nasca, Chimu, Wari, and Inka cultures, and the nature, priorities, and accomplishments of scientific Andean archaeology. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 573: *Archaeological Science.* 3 credits.
Explores the use of the biological and physical sciences in archaeology. Topics include dating, site discovery, prehistoric ecology, diet and technology. Emphasizes the ways in which data deriving from the archaeological sciences can contribute to a more contextualized and theoretically sophisticated understanding of the human past. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 574: *Archaeology of Hunter-Gatherers.* 3 credits.
Explores the nature of traditional hunter-gatherer societies and the range of methods and theories employed by archaeologists to reconstruct the lifeways and practices of prehistoric hunter-gatherers. Topics include ecology, diet, social organization, mobility, ritual, and technology from a cross-cultural perspective; case studies will derive primarily from tropical/sub-tropical and northern forager populations. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:

Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 576: *American Cultures.* 3 credits.
Examines U.S. cultures and explores concept of an American culture. Course readings and discussions explore underpinnings of the American experience, document broad historical shifts, and detail the experience of diverse groups of Americans, thus forming the basis for a critical, analytical, and comparative discussion of American life and life in America. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 577: *Mortuary Archaeology.* 3 credits.
Focuses on the study of burial patterns and death rituals in antiquity by introducing students to the methods of burial excavation, examining the history of mortuary archaeology theory and engagement with processual and postprocessual schools of thought, and examining case studies from around the world to decode the complex symbolisms encoded in burial practices. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 578: *Humans and Animals.* 3 credits.
Provides an introduction to anthropology of human's relationship with animals across a large geographic and temporal span. From domestication of animals to animism, pets and animal classification systems, course explores society's attitudes toward and dynamic interactions with the animal kingdom. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 580: *Environmental Anthropology.* 3 credits.
Covers major theoretical trends and ethnographic works in environmental anthropology, focusing on the frameworks developed and used by environmental anthropologists, including cultural ecology, ecological anthropology, environmentalism, political ecology, new ecology, and science and technology studies. Explores how environmental anthropologists have contributed to broader debates about modernity, globalization, power, kinship, science and technology, and human-environmental relations. Offered by Sociology & Anthropology. May not be repeated for credit.

Specialized Designation: Green Leaf Related Course

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 582: *Human Osteology.* 3 credits.
Introduces students to the methods of modern human skeletal analysis in bioarchaeological and forensic science. Covers introductory human skeletal and dental gross anatomy and describes analytical techniques spanning including age and sex estimation, osteometry, and paleopathology. Offered by Sociology & Anthropology. May not be repeated for credit.

Recommended Corequisite: ANTH 583.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 583: *Human Osteology Lab.* 2 credits.
Laboratory course associated with ANTH 582. Offered by Sociology & Anthropology. May not be repeated for credit.

Recommended Corequisite: ANTH 582.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale.

ANTH 584: *Paleopathology.* 3 credits.
Provides an introduction to the field of paleopathology which involves identification of pathological conditions in human skeletal remains, and reconstruction of the natural history and co-evolution of disease with humans. Covers the differential diagnosis and history of infectious pathogens such as tuberculosis and syphilis, skeletal trauma, oral diseases, metabolic abnormalities neoplasms developmental defects joint disease and more. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 585: *Bioarchaeology.* 3 credits.
Explores the cutting-edge methods of bioarchaeological science and reconstructs ancient living worlds from the remarkable information encoded in bones via patterns of demography, disease, diet, trauma, violence, lifestyle, social structures, sex and gender, ethnicity, and identities on a global scale and over the last 10,000 years of history. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 586: *Quantitative Methods in Anthropology.* 3 credits.
Introduces students to statistical methods used in anthropology. Emphasizes appropriate and creative application of statistical tests to anthropological problems and careful interpretation of results. Explores methods used to compare means, variances, and correlations within and between samples. Provides instruction on methods used in anthropological demography. Builds fluency in the use of statistical software. Offered by Sociology & Anthropology. May not be repeated for credit. Equivalent to ANTH 650.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 587: *Zooarchaeology.* 4 credits.
Explores the methods and theories applied in zooarchaeology through integrating hands-on assignments working with a comparative collection. Examines how archaeologists can understand human-animal relationships in the past including their role in reconstructing paleoenvironments, their contribution to ancient foodways, domestication of animals, and ritual uses of fauna. Offered by Sociology & Anthropology. May not be repeated for credit. Equivalent to ANTH 593.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Laboratory, Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 590: *Forensic Anthropology.* 3 credits.
Provides an overview of contemporary forensic anthropology. Topics include: age and sex estimation from human remains, estimation of the postmortem interval, analysis of sharp force, blunt force, and gunshot trauma, individual identification, forensic taphonomy, mass disaster contexts, and the forensic archaeological recovery of buried remains. Offered by Sociology & Anthropology. May not be repeated for credit.

Recommended Corequisite: ANTH 591.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:

This course is graded on the Graduate Regular scale.

ANTH 591: *Forensic Anthropology Lab.* 2 credits.
Laboratory course associated with ANTH 590. Involves hands-on lab exercises in the learning of methods in modern forensic anthropology, covering age and sex estimation from human remains, estimation of postmortem intervals, analyses of traumatic trauma, individual identification, forensic taphonomy, and archaeological recovery of buried remains. Offered by Sociology & Anthropology. May not be repeated for credit.

Recommended Corequisite: ANTH 590.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Laboratory

Grading:
This course is graded on the Graduate Regular scale.

ANTH 594: *Archaeology of Climate Change.* 3 credits.
Explores the contributions that archaeology can make to the study of climate change, past and present. Emphasizes the methods and theories used by archaeologists to reconstruct past environments and to evaluate the nature of human responses to climate change. Explores cases in which climate change has been evoked as a causal mechanism for human biological and behavioral change (spanning from the origins of the human lineage to the collapse of civilizations), while also addressing the ways in which archaeological data can contribute to dialogue about the changes in climate we are experiencing today and how climate change is impacting the preservation of cultural heritage. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

600 Level Courses

ANTH 616: *Anthropology of the City.* 3 credits.
Examines classic and contemporary works in urban theory, in light of broader scholarly discussions of modernity and globalization. Uses a case-study approach to analyze topics such as: public and private space, citizenship and governance, architecture and design, housing, transportation, formal and informal settlements, and the contest over space and environmental resources in cities around the world. Notes: Course may be offered fall or spring. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ANTH 619: *Disrupting Nature: Queer, Feminist, and Indigenous Science Studies.* 3 credits.
Introduces bodies of theory at the intersections of queer, feminist, and Indigenous studies and science and technology studies (STS), and questions how the concepts now known as “nature”, “sex”, and “life” were made. Illuminates connections between science and colonialism and how scientific concepts of nature have helped produce and maintain inequalities. Examines how colonial modes of thought have worked to isolate natural phenomena from their cultural contexts, and imposed divisions that have become the basis of colonial violence. Engages with multiple sustained efforts to resist these divides and/or rethink connections between nature and culture. Offered by Sociology & Anthropology. May not be repeated for credit.

Recommended Prerequisite: One introductory graduate level social theory course in any discipline or consent of professor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ANTH 631: *Refugees in the Contemporary World.* 3 credits.
Explores major refugee flows since the mid-20th century, emphasizing mechanisms for providing assistance, asylum, and resettlement. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 635: *Regional Ethnography.* 3 credits.
In-depth study of peoples and cultures of a specific world region (Latin America, East Asia, the Pacific, or United States). Content may include cultures defined by diaspora, migration, and other global forces and processes. Notes: May be repeated when topic is different. Offered by

Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

ANTH 640: *Applied Anthropology.* 3 credits.
Explores the application of contemporary anthropological ideas, theories, and methods to find solutions to practical problems as defined by various organizations and institutions including business, government, nongovernmental organizations, and various institutions. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 650: *Methods in Anthropology.* 3 credits.
Reviews and examines major research methods commonly employed in cultural anthropological field study, with emphasis on ethnographic research design and the use of standard ethnographic techniques. Includes practice in designing ethnographic research project and using ethnographic methods and techniques in a field setting. Offered by Sociology & Anthropology. May not be repeated for credit. Equivalent to ANTH 586.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 670: *Regional Studies in Archaeology.* 3 credits.
Regional survey of specific culture area in archaeology to be chosen by student and instructor. Offered by Sociology & Anthropology. May not be repeated for credit.

Recommended Prerequisite: Permission of Instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

ANTH 677: *Anthropology and History.* 3 credits.
Considers anthropological approaches to the study of history, the ways in which people construct their histories, and social historians' effort to incorporate anthropological and ethnographic orientations into their accounts. Attention to tensions between culture and power in the constitution of historiography and to methodological challenges of interpreting qualitative and quantitative data. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 684: *Independent Study in Sociocultural Anthropology.* 1-6 credits.
Directed reading and research on a specific topic, agreed on by student and faculty member, resulting in a written project. May be repeated for maximum of 6 credits. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Special scale.

ANTH 687: *Medical Anthropology.* 3 credits.
Explores the wide variety of cultural interpretations of health, illness, and curing. Examines a number of different curing systems, both traditional and modern, and compares them with cosmopolitan biomedicine. Several book-length case studies cover a wide variety of cultural groups, health topics, and theoretical orientations. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 690: *Internship.* 3-6 credits.
All internships must be approved by faculty advisor to ensure suitability to the student's course of study. Introduction to applied anthropology through approved work and study at a museum, institute, agency, or other approved site. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 6 credits.

Recommended Prerequisite: Graduate standing, with 3 hours of methods and 12 hours in program, or by permission of instructor.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Internship

Grading:
This course is graded on the Graduate Special scale.

ANTH 698: *Study Abroad.* 1-6 credits.
Intended for participation in formally organized course offered by Center for Global Education or an overseas institution or engagement in a field project related to the Master's thesis or project. May be repeated for a maximum of 6 credits. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Graduate Regular scale.

ANTH 699: *Contemporary Issues in Sociocultural Anthropology.* 3 credits.
Explores current issues and debates in sociocultural anthropology. Notes: May be repeated when topic is different. Offered by Sociology & Anthropology. May be repeated within the term for a maximum 6 credits.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Seminar

Grading:
This course is graded on the Graduate Regular scale.

700 Level Courses

ANTH 721: *Culture, Power, and Conflict.* 3 credits.
Explores power and social conflict through the lens of cultural analysis. Special attention to the role of cultural differences in the structuring of conflict and the deployment of cultural theory in formulating a practice of conflict resolution. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 750: *Ethnographic Genres.* 3 credits.
"Genre" refers to kind, sort, or type. Course surveys the various modes of representation anthropologists use in elaborating participant-observation field work, as well as how these styles refer to and construct ethnographic "others." Explores a set of central philosophical and methodological issues in social-cultural anthropology such as framing, perspective, authority, reflexivity, and politics of style. Offered by Sociology & Anthropology. May not be repeated for credit.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

ANTH 796: *Master's Research Project.* 1-6 credits.
Capstone research project conducted under the supervision of a faculty project director and project evaluation committee. Project should be a substantial contribution to anthropological knowledge and is in lieu of a thesis. Notes: Students must initially enroll for a minimum of 3 credits of ANTH 796 and maintain continuous enrollment in 796 until project is submitted. A maximum of 6 credits of ANTH 796 may be applied to the degree. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 12 credits.

Recommended Prerequisite: Approval of project proposal.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Independent Study

Grading:
This course is graded on the Satisfactory/No Credit scale.

ANTH 798: *Thesis or Project Proposal.* 3 credits.
Work on research proposal that forms basis for master's thesis or project. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 6 credits.

Recommended Prerequisite: Completion of 15 credits, including all other core courses.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

ANTH 799: *Master's Thesis.* 1-6 credits.
Master's thesis research and writing under direction of thesis committee. Notes: Students must register for a minimum of three credit hours in their first semester of 799 and maintain continuous enrollment in 799 while writing and submitting a thesis. A maximum of 6 credits of 799 may be applied to the degree. Offered by Sociology & Anthropology. May be repeated within the degree for a maximum 24 credits.

Recommended Prerequisite: Approval of thesis proposal.

Registration Restrictions:
Enrollment is limited to Graduate or Non-Degree level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Thesis

Grading:
This course is graded on the Satisfactory/No Credit scale.

Applied Information Technology (AIT)

500 Level Courses

AIT 500: *Quantitative Foundations for Information Systems Analysis.* 3 credits.
Provides common background in basic quantitative areas focused on decision making, information processing, and telecommunications. Topics include review of precalculus, introduction to matrix algebra, problems in optimization, and introduction to probability and statistics. Notes: Does not fulfill any VSITE graduate degree requirement. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: MATH 108 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 502: *Programming Essentials.* 3 credits.
Introduces basic procedural and object-oriented programming. Topics include: variables, data types, assignments, conditionals, loops, arrays, input/output, static methods, libraries, recursion, data types, API, classes, access modifiers, instance variables, constructors, instance methods, testing, encapsulations, immutability, interface inheritance, implementation inheritance, exceptions, assertions, analysis of algorithms, order of growth, memory usage, binary search, insertion sort, merge sort, stacks, array implementation of stacks, linked list implementation of stacks, queues, generics, autoboxing, iteration, symbol tables, hash tables, binary search trees, examples and applications. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Basic information technology knowledge.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 504: *Issues of Cyberspace.* 3 credits.
Student panels explore, report on, and make recommendations regarding major and novel problems presented by the explosive and intrusive growth of 'cyberspace'. Legal, ethical, financial, security, utility and value to users and organizations, feasibility, and desirability aspects are considered. Each semester features a major topic area. Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 510: *Learning Technology: Theory, Application and Design.* 3 credits.
Introduces students to theory, application and design of learning technologies, discussing why technology should be used for learning and education, how it should be applied, and how one can design digital tools to improve learning and education. Use of data, analytics, and emerging

applications such as social media will also be discussed. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: (IT 415 or equivalent) and (SYST 469 or equivalent).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 512: *Algorithms and Data Structures Essentials.* 3 credits.
Introduces analysis of algorithms and basic data structures assuming basic programming knowledge. Topics include: collections, sorting, searching, graphs, strings, B-Trees, and analysis of algorithms. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: AIT 502 with B- or above, or other academic or industry experience with programming.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate or Senior Plus.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 521: *Software Engineering Essentials.* 3 credits.
Provides an overview of essential topics in software engineering, including problem solving with computers, requirements, software design, software development, testing, verification, validation, usability, and management. Discuss concepts related to building software, including data structures, object-oriented programming, event handling in GUIs, and web application technologies and how these concepts are handled in various languages, but without requiring the students to program. Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 524: *Database Management Systems.* 3 credits.
Relational database management systems. Covers logical and physical database design; query languages and database programming; and examines commercial systems. Computing lab. Notes: This course does not count towards MS programs offered in the Computer Science Department and cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Academic or industry experience with database systems.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 526: *Introduction to Natural Language Processing.* 3 credits.
This is an introductory course in natural language processing (NLP). It explores a broad set of NLP tasks and introduces the students to the data, methods, and baseline solutions related to each. Topics covered include n-gram language models, text classification, part of speech tagging, word sense disambiguation, named entity extraction, information retrieval, and question answering. Methods explored include rule-based systems, classification with naïve bayes, sequence labeling with hidden Markov models and conditional random fields, as well as end-to-end systems. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Python programming. Statistics or probability. Machine learning (desirable).

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 542: *Fundamentals of Computing Platforms.* 3 credits.
Contemporary information systems are platforms inextricably combining operating systems and networks. This graduate course provides an overview of OS and networking elements of information systems, and examines the particular issues relating to the range of platforms, from

handheld mobile devices to cloud and supercomputer systems. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Academic of industry experience with operating systems and computer networks.

Registration Restrictions:
Enrollment limited to students with a class of Graduate or Senior Plus.

Enrollment limited to students in the College of Science, Schar School of Policy and Gov or Volgenau School of Engineering colleges.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 580: *Analytics: Big Data to Information.* 3 credits.
Course provides an overview of Big Data and its use in commercial, scientific, governmental and other applications. Topics include technical and non-technical disciplines required to collect, process and use enormous amounts of data available from numerous sources. Lectures cover system acquisition, law and policy, and ethical issues. It includes brief discussions of technologies involved in collecting, mining, analyzing and using results. Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 581: *Problem Formation and Solving in Big Data.* 3 credits.
The course explores challenges facing analysts exploiting Big Data or Bespoke Data in combination with Big Data, and looks at solutions, mindful of the fact that our intellectual and practical practices are based entirely on the 5000 year old Bespoke Data paradigm, and considering that Big Data practices are too recent to lead to comparable Big Data tools and practices. Notes: Course may be used in other certificate and degree programs. Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 582: *Metadata Analytics for Big Data.* 3 credits.
Course explores technical and analytical issues, solutions and gaps in processing large volumes of data by leveraging metadata. The goal is to find "facts of interest" (Intelligence) that represent threats to, or even opportunities for, a given industry or domain (e.g., healthcare, finance or national intelligence/national defense) where there is limited time. Notes: Course may be used in other Certificate or Degree programs. Offered by Info Sciences & Technology. May not be repeated for credit.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 590: *Topics in Applied Information Technology.* 3 credits.
Topics in the application of information technology. Students are expected to participate actively through class dialogues and the crafting of IT solutions to specific problem areas. Notes: Course cannot be used to satisfy course requirements for PhD IT students. Offered by Info Sciences & Technology. May be repeated within the term for a maximum 6 credits.

Specialized Designation: Topic Varies

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 597: *Developing IT Leaders of Integrity.* 3 credits.
Considers the cultural and organizational influences and focuses on leadership's ethical dimensions. Students identify their core values, study the attributes of effective and toxic leaders, and examine the difference between managing and leading through selected readings, discussions, team projects, in-class activities and guest presentations. Students practice and receive in-class coaching to hone their leadership skills. Notes: Course cannot be used to satisfy course requirements for PhD IT

students. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Registered student in MS, Applied IT or instructor's permission.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

600 Level Courses

AIT 601: *Foundations of Applied Information Technology.* 3 credits.
Introduces students to foundational scholarship in applied information technology. Reviews seminal readings and applications of information technology. Students learn about the interdisciplinary history of the field, are introduced to influential scholars and important topics, and get an overview of key theoretical paradigms in applied information technology. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Admission to a graduate program in Applied IT.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 602: *Introduction to Research in Applied Information Technology.* 3 credits.
Introduces students to research methods required to conduct data-driven and theory-based research in information sciences and technology. The course will review different research approaches and methods, discusses issues of data collection, reliability, data analysis, and interpretation. Throughout, seminal research papers will be used as case studies, and students will learn to understand and design research. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: Admission to a graduate program in Applied IT.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 603: *Research Practice.* 3 credits.
Complementing AIT 602's treatment on the nature of AIT research, this course examines various pragmatic aspects of conducting research, including: research venues, public & private funding sources, grant proposals, publishing, regulation and reporting obligations, operating labs and centers, legal and intellectual property issues, collaboration nationally and internationally. Offered by Info Sciences & Technology. May not be repeated for credit.

Recommended Prerequisite: AIT 602 or equivalent.

Registration Restrictions:
Enrollment limited to students with a class of Advanced to Candidacy, Graduate, Non-Degree or Senior Plus.

Enrollment is limited to Graduate, Non-Degree or Undergraduate level students.

Students in a Non-Degree Undergraduate degree may **not** enroll.

Enrollment limited to students in the Volgenau School of Engineering college.

Schedule Type: Lecture

Grading:
This course is graded on the Graduate Regular scale.

AIT 614: *Big Data Essentials.* 3 credits.
