

Bachelor of Architecture (B.Arch.)

Foundation Courses

All the undergraduate students at Anant National University undergo a common foundation programme which provides them with a basic understanding of architecture and design fields. As a part of the foundation year, students engage with a set of common courses taught by artists, designers, theorists and performance artists who represent various fields of expertise.

Foundation programme courses are introductory in nature and prepare the students for advanced courses offered during the upcoming years. The programme enables students with practical skills and introduces them to a broad and yet detailed interdisciplinary approach towards a critical analysis of cultural, socio-economic, political factors etc. and their effect on the practice of art and design. The programme acquaints the students with the following courses:

- Design, Text and Communication
- Sustainability
- World of Art
- Visualisation and Representation
- Technical Drawings
- Elements of Design
- World of Art and Design
- Materials: Properties and Processes
- Visualisation and Representation
- Exploring Design Principles
- Technical Drawings
- World and India
