

First Semester

Fundamental of Computer and Emerging Technology

Logic Development Programming-1

Mathematics for Computer Professionals

Communication Skills

Disaster Management

Third Semester

Computer Organization

Database Management System

Computer Network

Object Oriented Programming using C++

StartUp & Entrepreneurship

Fifth Semester

Machine Learning

IOS (Program Elective - II)

Android (Program Elective - II)

Advanced Java (Program Elective - II)

E-Commerce Technology and SEO (Program Elective - III)

Computer Graphics (Program Elective - III)

Minor Project

Second Semester

Statistical Method and Operation

Logic Development Programming

Basics of Web Designing

Data Structure

Environmental Studies

Fourth Semester

Java Programming

Python Programming

Cyber Security

Cloud Computing (Program Elective-1)

Data Mining (Program Elective-1)

Software Engineering

Sixth Semester

Major Project

Research
3 - 2
