Prepare for the Quantitative Ability Section – [Click here](#)

Now that you know about the section-wise syllabus for NMAT, you should start preparing for the NMAT exam at least six months prior to the exam schedule. To start with, one must take a diagnostic [NMAT mock test](#) to identify the strengths and weaknesses. Start with the weak areas first since you have more time in hand, which will help you in learning the fundamentals and building the concepts. You should also go through previous years' [NMAT analysis](#) and [question papers](#) to get a core idea of the question types and exam structures and what to expect on the exam day so that you can prepare accordingly.

Prepare a strategic preparation strategy that should give equal importance to studying and revising all sections, since NMAT gives equal weightage to each section. Refer to the [top books for NMAT](#) to have a systematic sectional preparation and practice. Once the sectional preparation is complete, test your preparation level by taking regular full-length mock tests and solving previous years' question papers and analyse those regularly. Based on the analysis, rectify your errors and improve the preparation.

Know the top [MBA entrance exams application](#) and exam schedule and the [top B-schools to apply](#) for the upcoming MBA admission session to keep a track of the important dates and act on time.
